Incident #147 -- [illegible] Ohio -- 17 July 1[illegible]

[illegible] description of this incident, although [illegible], is in agreement with the hypothesis that the object observed was a fireball. [illegible] "[illegible] rate of rise," "travelled in straight line," "remained at," and the [illegible] all increase the probability that it was a [illegible]. The fact that it was travelling north, at this time of [illegible], implies that the meteor was [illegible] the orbit of the earth on its way toward the sun [illegible] the collision occurred.
