Publication 1149 -- Washington, D.C. -- 30 July 1964

The astronomical explanation is supported by the general-
ization of this phenomena.

This investigator considers whether the potential "lifts"
that may have been in the neighborhood. The size of displacement
and [illegible] of a lift would probably have given the
observations [illegible].

It should be noted that the size of the other kind,
[illegible] are not studied.
