HEADQUARTERS
146TH FIGHTER-BOMBER WING
George Air Force Base
Victorville, California

21 May 1952

Statement of Observer

I, A/1C Charles M. Walton, AF 28201435, 146th Base Flight, do this date make the following statement concerning observations of an unidentified object made by me on 20 May 1952:

1. My impression of this object was that of a ball of mercury. When it turned over and headed north, it revealed its underneath side which was much larger than the top side and which was of a light brown color. Before that time it was relatively stationary. In size it was comparable to a B-29, but of a bulky character.

2. I sighted the object at 1425 PDST on the date indicated for a period of about five minutes.

3. Visually from ground.

4. The object appeared due north on the flight line, George Air Force Base, at a 1 o'clock position above the vapor trail of a F-47 which had recently been in the vicinity. I was standing on the flight line at the time.

5. - -

6. Weather conditions were as follows: Clear weather with clouds at high altitudes.

7. None.

8. None.

9. None.
