2019-09-23T18:57:04+00:00

https://twitter.com/_/status/1176208879232802816

@gerrycan1 So you are saying that 100 foot deformation is an accurate result from the linear static analysis?

2019-09-23T18:47:54+00:00

https://twitter.com/_/status/1176206573917466629

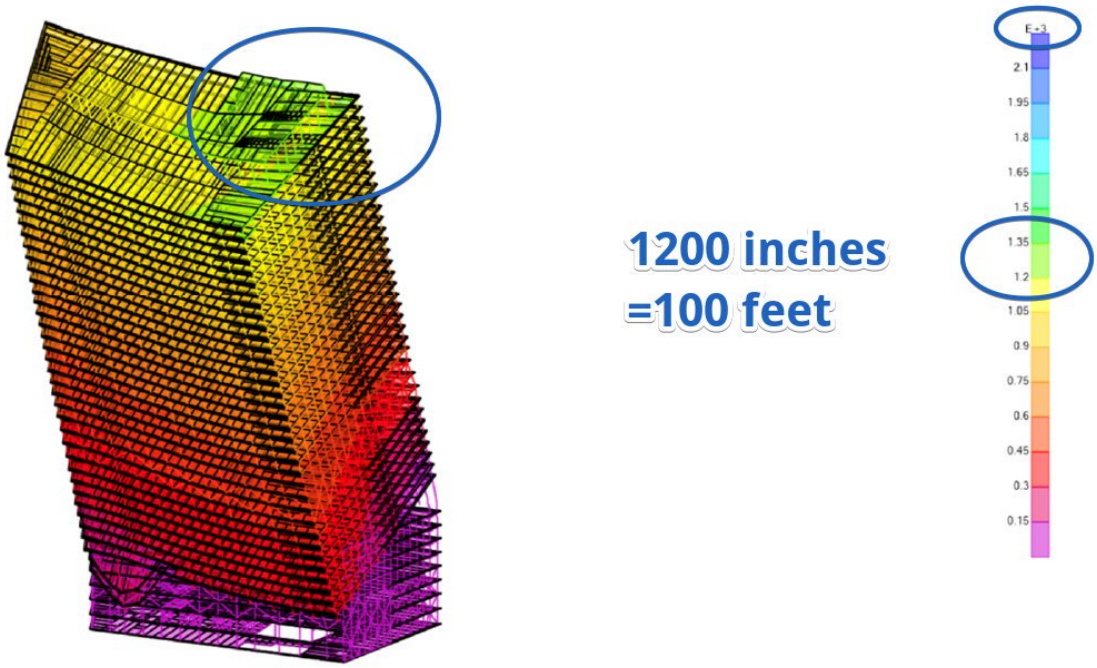
@gerrycan1 So why is he using linear static analysis?

2019-09-23T18:47:02+00:00

https://twitter.com/_/status/1176206352768622592

@gerrycan1 So this is like an artist's impression, not based on actual numbers?

What's with the scale then? http://pbs.twimg.com/media/EFK5bqPU0AAct7w.jpg



http://pbs.twimg.com/media/EFK5bqPU0AAct7w.jpg

2019-09-23T18:44:05+00:00

https://twitter.com/_/status/1176205613035966464

@gerrycan1 " Simply put, in linear analysis deformations of the system does not impact its response.

... And hence, you get really stupid outcomes!"

Like this, maybe? http://pbs.twimg.com/media/EFK4u8LUcAEoEHN.jpg

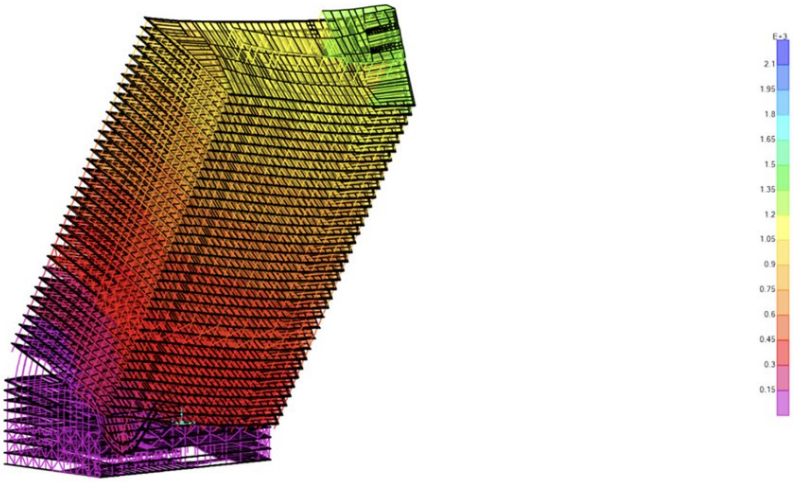


Figure 4.15: Visualization of linear static analysis, from the southwest, showing the building tipping to the southeast after the hypothetical failure of Columns 76 to 81.

http://pbs.twimg.com/media/EFK4u8LUcAEoEHN.jpg

2019-09-23T18:42:17+00:00

https://twitter.com/_/status/1176205160923557890

@gerrycan1 "Linear Finite Element Method simplifies a lot of things. For instance, the material

will never yield resulting in unrealistically high stresses in your model."

Like this, maybe? http://pbs.twimg.com/media/EFK4QmFVAAA0l6o.jpg

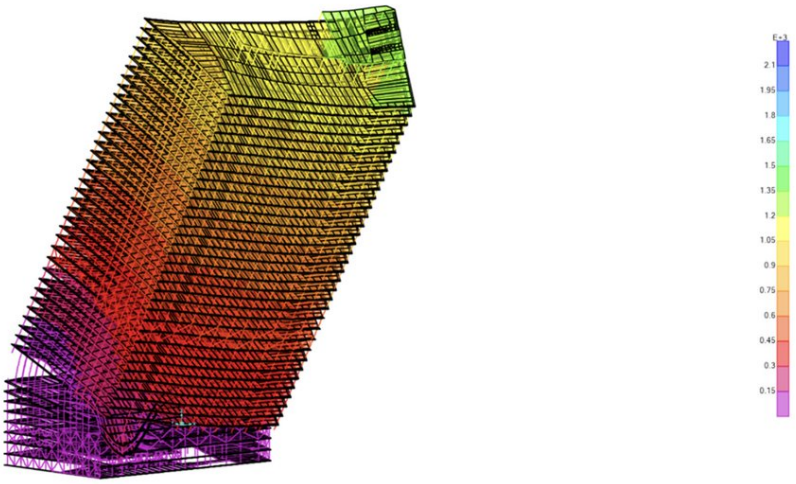

Figure 4.15: Visualization of linear static analysis, from the southwest, showing the building tipping to the southeast after the hypothetical failure of Columns 76 to 81.

http://pbs.twimg.com/media/EFK4QmFVAAA0l6o.jpg

2019-09-23T18:40:11+00:00

https://twitter.com/_/status/1176204629853368320

@gerrycan1 How does it show it is not plausible? By showing the building tipping over 100 feet.

How can you do that with a static analysis?

2019-09-23T18:34:52+00:00

https://twitter.com/_/status/1176203294802186240

@gerrycan1 Again you say "dynamic elements to a linear analysis"

So, you either mean "STATIC", not "LINEAR", or "NON-LINEAR" not "DYNAMIC".

Either way, the issue here is the building is leaning over 100 feet, so linear static analysis is not appropriate. You need non-linear dynamic .

2019-09-23T18:25:17+00:00

https://twitter.com/_/status/1176200881131245568

@gerrycan1 No. Since the top of the building has clearly moved over 100 feet, it's also very clearly not a static situation.

You don't seem to understand the role of time here.

2019-09-23T18:19:58+00:00

https://twitter.com/_/status/1176199542217142273

@gerrycan1 So, by "dynamic" you don't actually mean "dynamic analysis" you mean "a non-linear stiffness matrix in static analysis", aka "non-linear static analysis"?

2019-09-23T18:12:19+00:00

https://twitter.com/_/status/1176197616649924608

@gerrycan1 Then you don't understand.

2019-09-23T18:11:50+00:00

https://twitter.com/_/status/1176197496944525312

@gerrycan1 Look like all the columns would fail. How the building falls depends on WHEN they fail, which is a time variable. Which needs dynamic analysis.

2019-09-23T18:10:22+00:00

https://twitter.com/_/status/1176197126054768640

@gerrycan1 What you describe is not dynamic analysis.

It's non-linear analysis.

2019-09-23T18:09:32+00:00

https://twitter.com/_/status/1176196917715292160

@gerrycan1 I understand the distinctions.

So when you said "linear, not dynamic", you actually meant "linear static, not dynamic"?

2019-09-23T18:07:22+00:00

https://twitter.com/_/status/1176196372082462720

@gerrycan1 You know what it is, don't ask rhetorical questions please.

Has the roof been displaced in the analysis? Or are they measuring the displacement in an artistic "visualization"?

2019-09-23T18:05:56+00:00

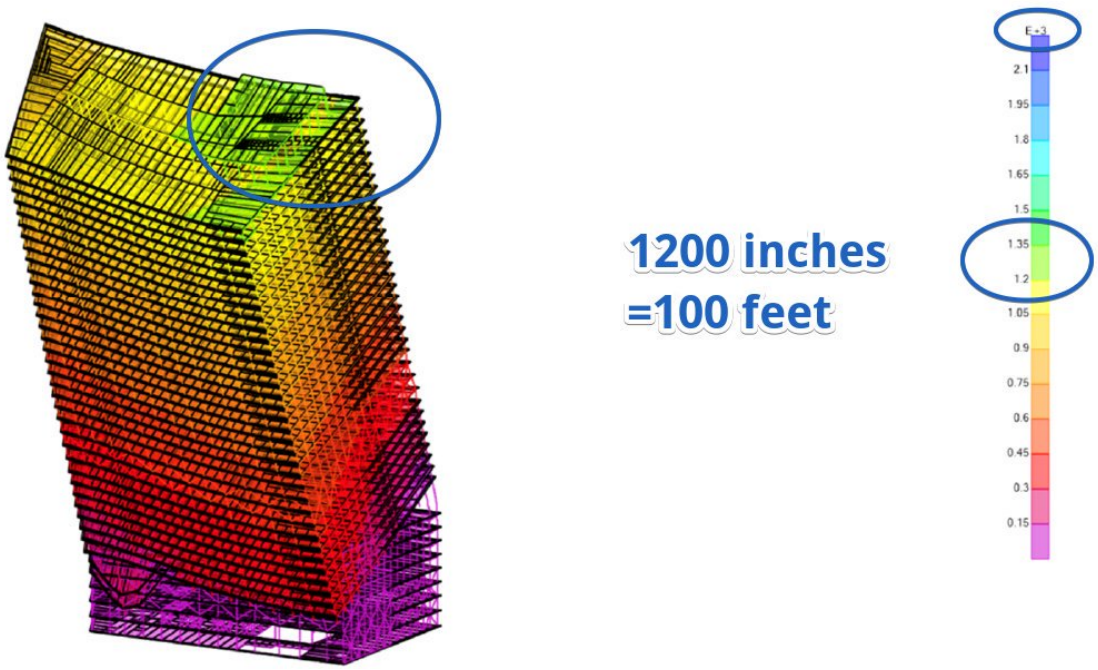
https://twitter.com/_/status/1176196011246514176

@gerrycan1 Correct (although you don't need to specify "linear").
So what does "Their properties are linear though, NOT dynamic." mean?

2019-09-23T17:59:37+00:00

https://twitter.com/_/status/1176194421580128256

@gerrycan1 Look at this diagram. I'm referring to the color coded displacement of the top of the building. It's green. That's >1200 inches. >100 feet.
http://pbs.twimg.com/media/EFKuHxwUEAA86b4.jpg



http://pbs.twimg.com/media/EFKuHxwUEAA86b4.jpg
2019-09-23T17:56:32+00:00
https://twitter.com/_/status/1176193647194193920
@gerrycan1 "linear, not dynamic"

If those things are so different, then what's a linear dynamic analysis?

You might want to look up the definitions. You are mixing up terms.

2019-09-23T17:52:09+00:00
https://twitter.com/_/status/1176192541579857920
@gerrycan1 But this roof movement. It's that data? I mean it's a number. 112 feet, right there in the diagram. Isn't that "analysis" and not "visualization" ?

2019-09-23T17:51:17+00:00
https://twitter.com/_/status/1176192322972708867
@gerrycan1 Err, it says it right there. Hulsey also discussed it in his presentation.

Obviously they are in tension, that's why they are stretched out like rubber bands to 3x their natural length. http://pbs.twimg.com/media/EFKsajTUwAAJ-Xc.jpg

---

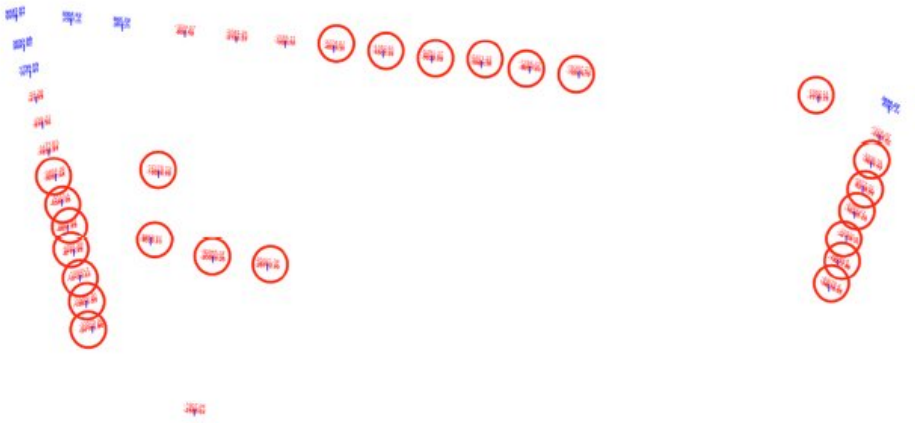


Figure 4.12: Linear static analysis results show that the failure of additional columns (shown in Figure 4.11 above) leads to the failure of the remaining core columns and many exterior columns (circled in red). The columns with blue values are in tension rather than compression, indicating the building is tipping away from those columns.

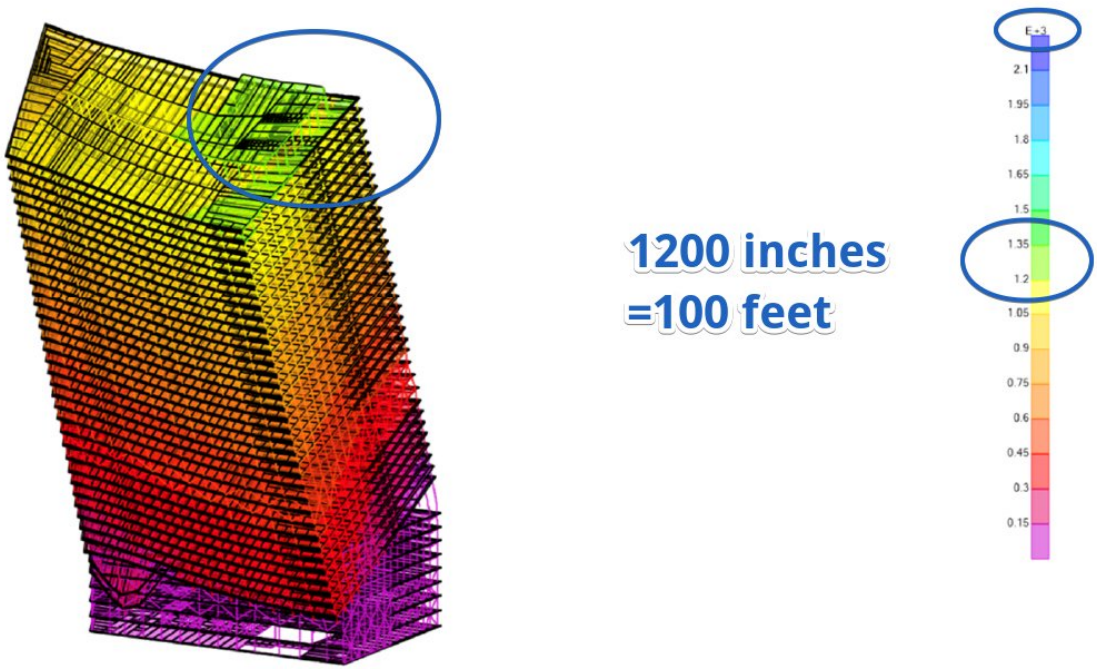
http://pbs.twimg.com/media/EFKsajTUwAAJ-Xc.jpg
2019-09-23T17:46:48+00:00
https://twitter.com/_/status/1176191196466577408
@AE911Truth @AE911Truth, you can contact me mick@mickwest.com, or phone 530-903-5359

I realize Ae911Truth might not monitor this twitter account, so if people can share this with them in other ways, that would be great. I'd like to clear this up.

2019-09-23T17:44:24+00:00
https://twitter.com/_/status/1176190592432263168
@gerrycan1 (actually, 112 feet for the green, but the question remains the same)

2019-09-23T17:42:23+00:00
https://twitter.com/_/status/1176190085642899456
@gerrycan1 So, when the 4.14 says the roof has moved 100 feet. Is that just a "visualization" Or has it actually moved 100 feet in in the analysis?
http://pbs.twimg.com/media/EFKqniHU0AA_hcW.jpg

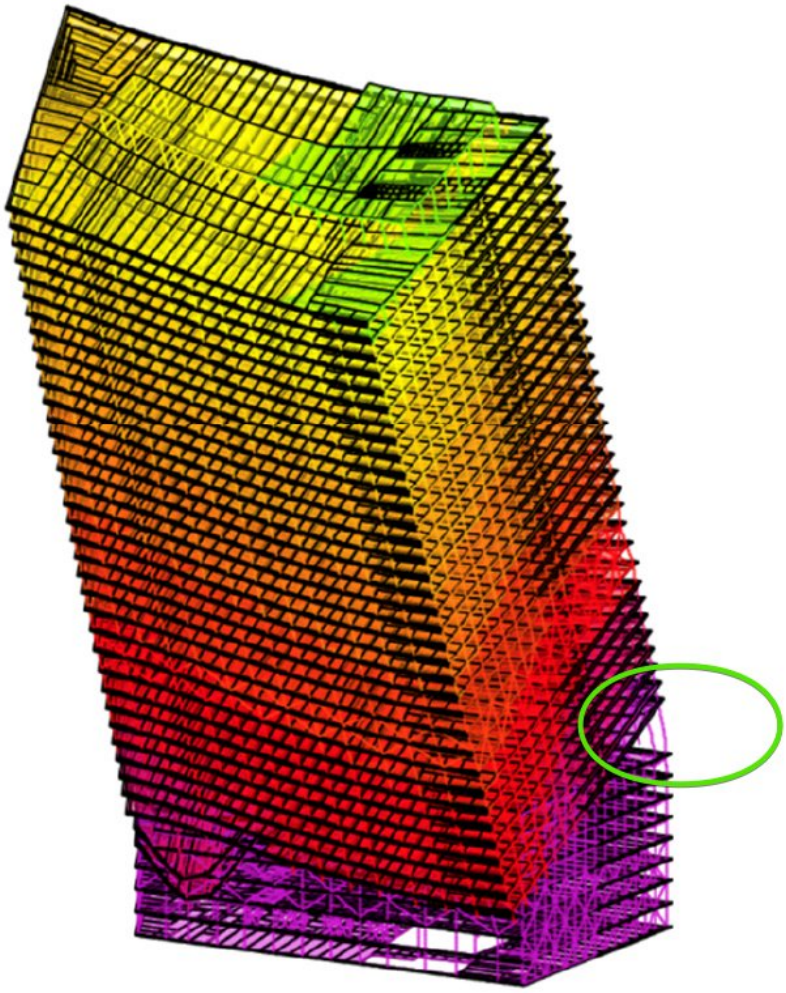


http://pbs.twimg.com/media/EFKqniHU0AA_hcW.jpg

2019-09-23T17:38:41+00:00

https://twitter.com/_/status/1176189153551085569

@gerrycan1 Just that one bit? http://pbs.twimg.com/media/EFKpkOrVAAExJzV.jpg



http://pbs.twimg.com/media/EFKpkOrVAAExJzV.jpg
2019-09-23T17:29:56+00:00
https://twitter.com/_/status/1176186953777074176
This is an open invitation to Architects and Engineers for 9/11 Truth @AE911Truth

I've raised several questions regarding Dr. Hulsey's study. Could any structural engineer with SAP2000 experience look at my critique, and then we can discuss publicly?

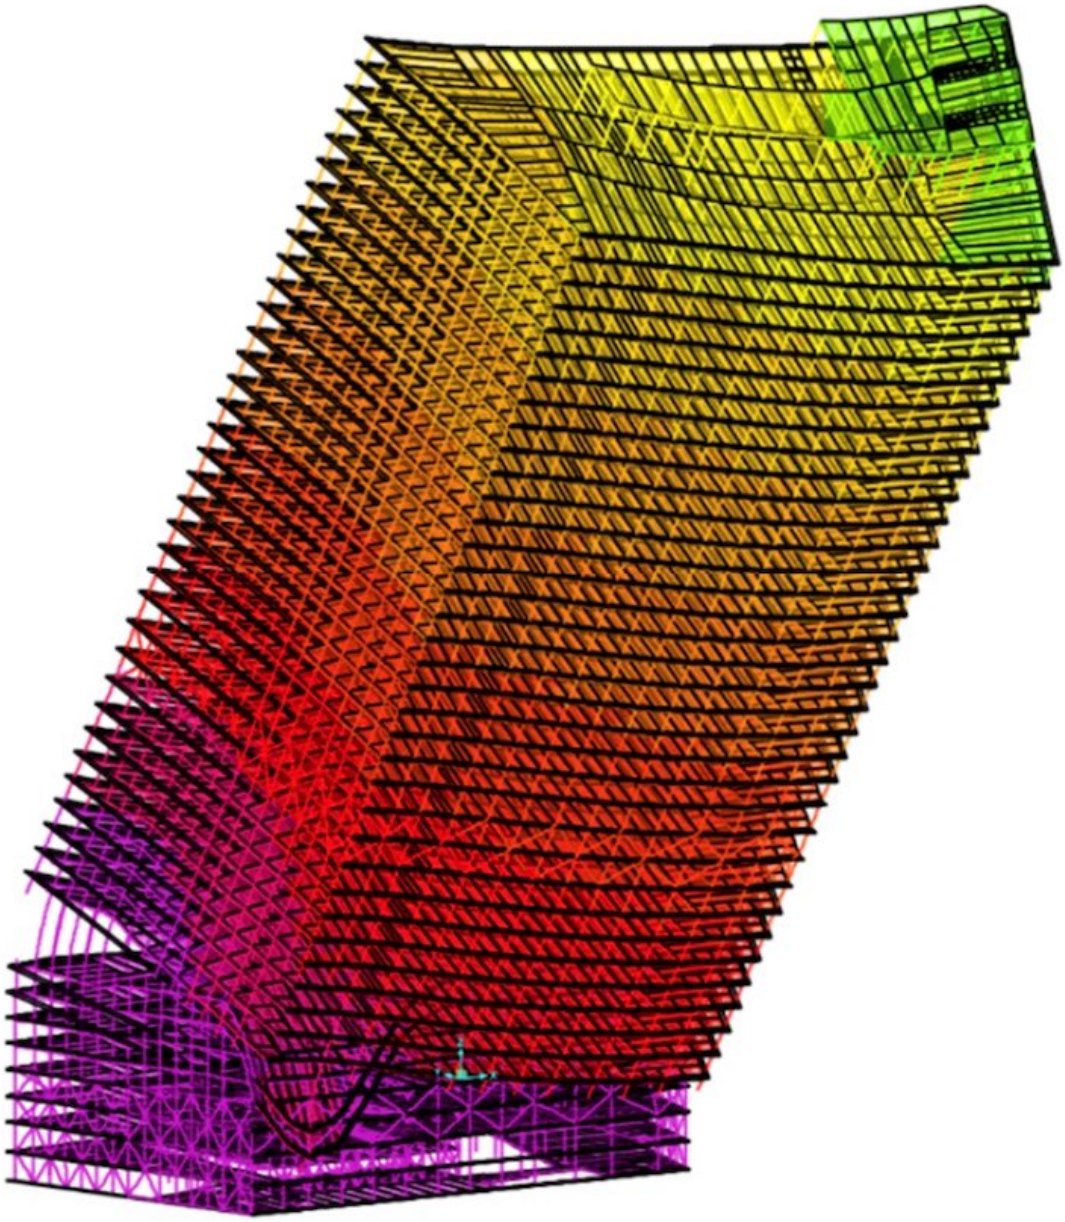
https://www.youtube.com/watch?v=7OClixCTdDw

2019-09-23T17:25:57+00:00
https://twitter.com/_/status/1176185947492245504
@gerrycan1 So the building is not actually tipping? Just WANTING to tip?

2019-09-23T17:21:20+00:00
https://twitter.com/_/status/1176184787062550528
@gerrycan1 Does figure 4.14 show the accurate position, orientation. and deformations of the parts of the building?

2019-09-23T17:15:47+00:00
https://twitter.com/_/status/1176183392485797888
@gerrycan1 Wait, surely you are not saying that the data on page 101 is ALL the data that is being visualized? http://pbs.twimg.com/media/EFKkhrkU0AI9iRu.jpg

---



http://pbs.twimg.com/media/EFKkhrkU0AI9iRu.jpg

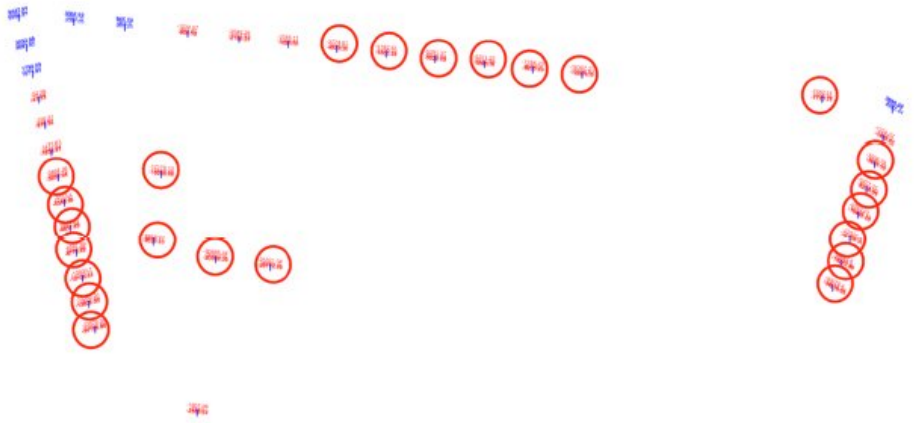


Figure 4.12: Linear static analysis results show that the failure of additional columns (shown in Figure 4.11 above) leads to the failure of the remaining core columns and many exterior columns (circled in red). The columns with blue values are in tension rather than compression, indicating the building is tipping away from those columns.

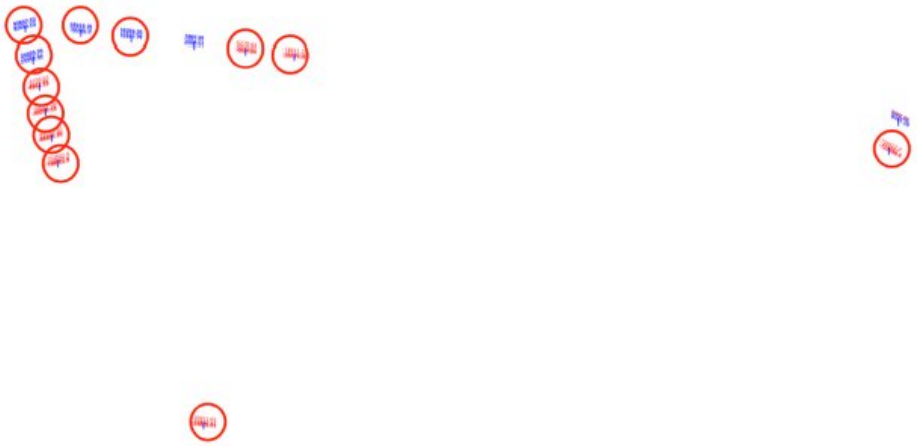

Figure 4.13: Linear static analysis results show that the failure of additional columns (shown in Figure 4.12 above) leads to the failure of nearly every remaining column (circled in red).

http://pbs.twimg.com/media/EFKkds5U0AEllm6.jpg

2019-09-23T17:13:51+00:00

https://twitter.com/_/status/1176182902670807049

@gerrycan1 So this is visualized by them stretching out on one floor only, to 3x their natural length?

2019-09-23T17:11:54+00:00

https://twitter.com/_/status/1176182414571261957

@paulmuaddib61 @rock_n_my_soul @Bluebir20887474 @gerrycan1 @caldred21 @Guy_Forget2000 @xenuqueue @Oswald1160 Google pays me about $12 a year for the ads I run on http://cowboyprogramming.com

That's it.

2019-09-23T17:06:59+00:00

https://twitter.com/_/status/1176181176991535104

@gerrycan1 No, I want to check your understanding of visualizations.

Explain what data is being visualized here. http://pbs.twimg.com/media/EFKidpYU4AAFOlB.jpg

---

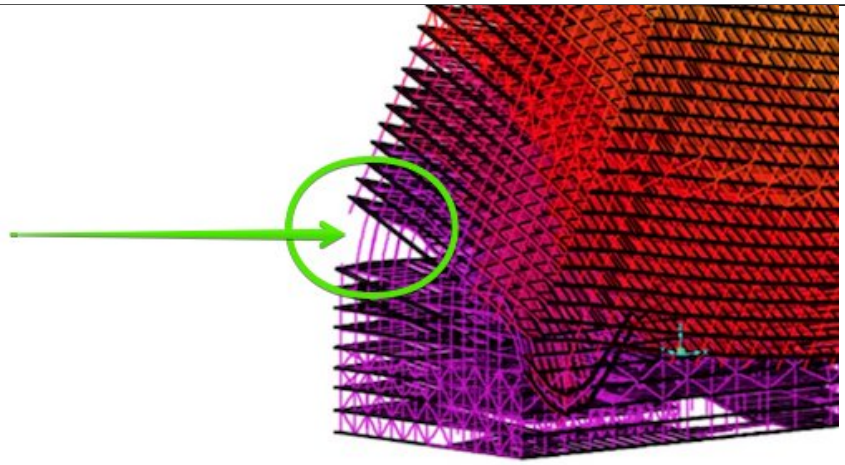

Figure 4.15: Visualization of linear static analysis,

http://pbs.twimg.com/media/EFKidpYU4AAFOlB.jpg

2019-09-23T17:05:15+00:00

https://twitter.com/_/status/1176180739949264896

@gerrycan1 I've mentioned him a couple of times already. Donald Friedman, he worked at the WTC site. I linked a relevant portion of our talk before. The full discussion of the Hulsey report (which he'd only just seen) starts at 31:44, linked here. https://youtu.be/ezHc9x75808?t=1904

2019-09-23T16:57:32+00:00

https://twitter.com/_/status/1176178797885870080

@gerrycan1 You make it sound like a "visualization" is just some artist impression.

Let's talk about that, specifically, since you keep saying: That is a visualization. NOT an analysis.

How was that visualization generated from the analysis?

2019-09-23T16:56:06+00:00

https://twitter.com/_/status/1176178438090051584

@cosmicdahlia @GalaxyReport @zcichy Questions are great, I just said "you should check it." So I'm encouraging people to question things.

Also my goal in life is to do things I enjoy and make a difference in the world. I'm not complaining.

2019-09-23T16:53:16+00:00

https://twitter.com/_/status/1176177723674263553

@gerrycan1 I have no problem with "linear static is a standard type analysis for SAP2000 and core column DCR".
The actualy issue here is 4.14/5 showing something different. It's showing a dynamic situation

What are those back stretchy columns visualizing?
http://pbs.twimg.com/media/EFKfUysVAAAqv8g.jpg

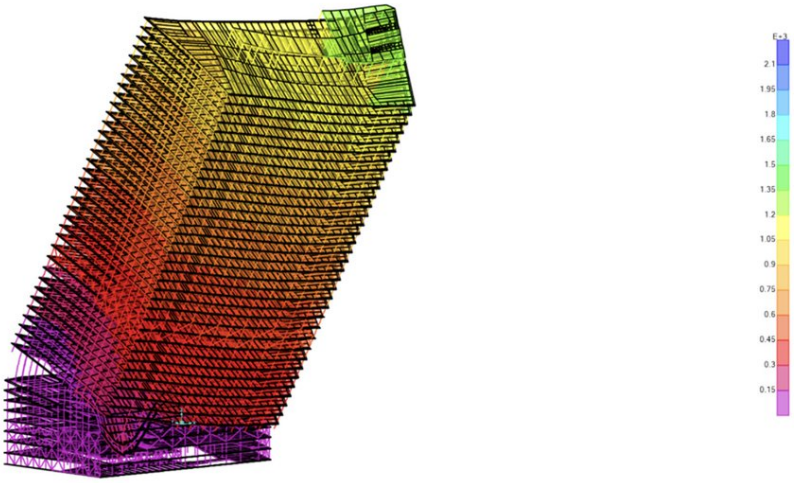

Figure 4.15: Visualization of linear static analysis, from the southwest, showing the building tipping to the southeast after the hypothetical failure of Columns 76 to 81.

http://pbs.twimg.com/media/EFKfUysVAAAqv8g.jpg
2019-09-23T16:51:03+00:00
https://twitter.com/_/status/1176177168583294976
@gerrycan1 I have yet to see anyone, or any paper, that conflicts with what I say.

2019-09-23T16:45:48+00:00
https://twitter.com/_/status/1176175843904589824
@gerrycan1 Which bit of it? It seemed fine, but I don't want to give a sweeping okay.
Quote the relevant part please.

2019-09-23T16:44:48+00:00
https://twitter.com/_/status/1176175592447725571
@gerrycan1 You are rapidly wearing me out. Find someone else who agrees with you, and get back to me.

2019-09-23T16:44:08+00:00
https://twitter.com/_/status/1176175424960749568
@gerrycan1 If you want me to ask him a question, you actually need to be more coherent than continually just saying that visualization of the output of an analysis is not the output of the analysis.
You are not making any sense. I'm not going to waste his time with that.

2019-09-23T16:41:36+00:00
https://twitter.com/_/status/1176174789964124160
@gerrycan1 Okay, find me one who will talk to me.

2019-09-23T16:41:16+00:00

https://twitter.com/_/status/1176174703494352896

@gerrycan1 No, I've been discussing it all along. You've just been repeating this bizarre platonic assertion that a visualization of an analysis is not the analysis.

The visualization of the data shows the data. That's why we have graphs. That's what red circles are. Visualization. http://pbs.twimg.com/media/EFKceLVU0AERz4C.jpg

---

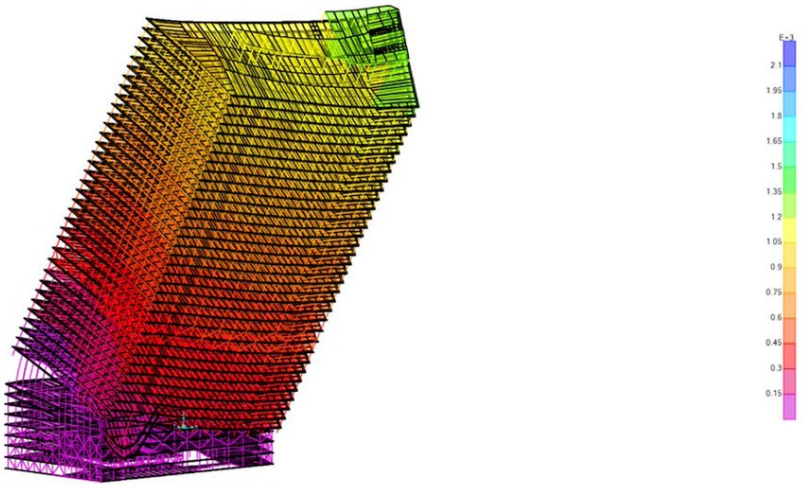

Figure 4.15: Visualization of linear static analysis, from the southwest, showing the building tipping to the southeast after the hypothetical failure of Columns 76 to 81.

http://pbs.twimg.com/media/EFKceLVU0AERz4C.jpg

2019-09-23T16:37:32+00:00

https://twitter.com/_/status/1176173766969159687

@gerrycan1 I think you are missing the point here. I've said long ago a static analysis is fine for sudden column removal, and calculating DCRs and progressive collapse initiation in a static structure is fine.

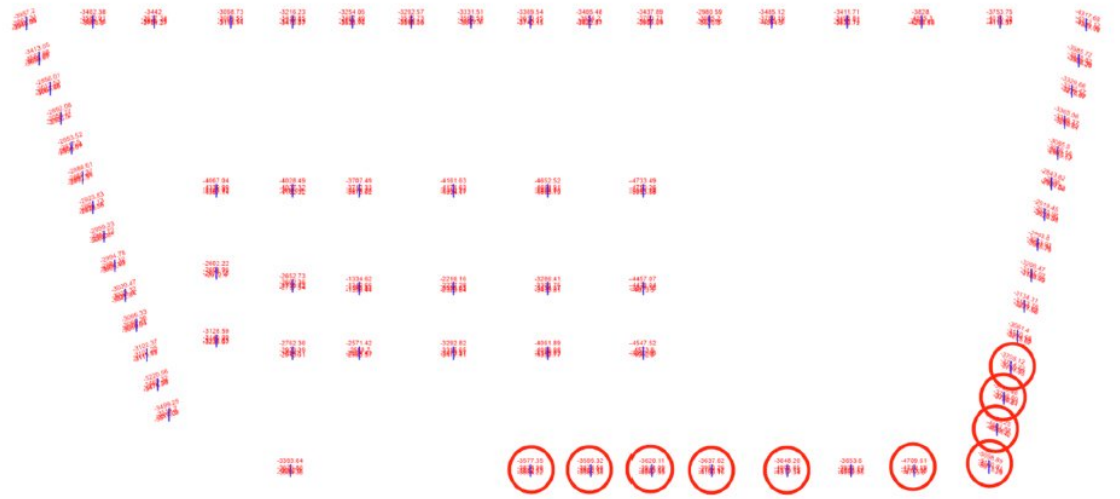
The problem is once the structure starts to tip, it's now a dynamic situation.

2019-09-23T16:34:15+00:00

https://twitter.com/_/status/1176172939017768960

@gerrycan1 The green circles seems to be a simple denotation, not a >1 DCR. Unless it's done selectively. Most columns have no circle.

http://pbs.twimg.com/media/EFKbDCXUcAYrJB_.jpg



http://pbs.twimg.com/media/EFKbDCXUcAYrJB_.jpg

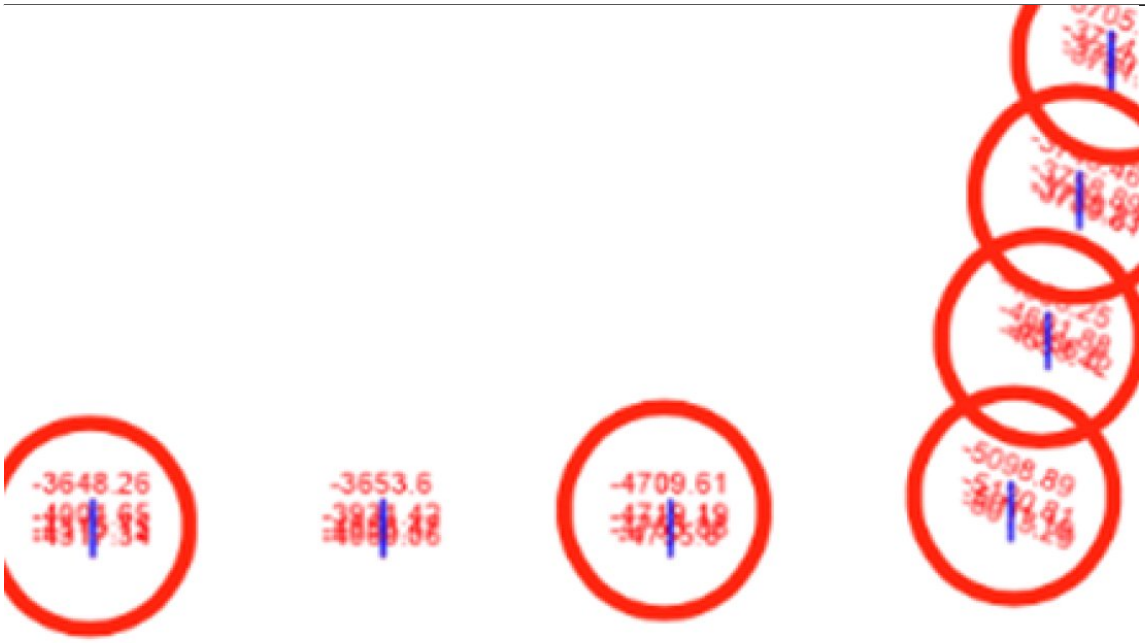
2019-09-23T16:32:01+00:00

https://twitter.com/_/status/1176172378616786944

@gerrycan1 I don't see any "ratios" here. What are you referring to?

The numbers are a bit hard to read. The bottom three are overlaid. I'm assuming one is the axial load capacity and one is the calculated axial load? Can you explain the four numbers?

http://pbs.twimg.com/media/EFKaGU8UUAAtkk7.jpg



http://pbs.twimg.com/media/EFKaGU8UUAAtkk7.jpg

2019-09-23T16:29:45+00:00

https://twitter.com/_/status/1176171805075099648

@gerrycan1 Correct! I'm just looking at the diagrams, and using my knowledge of computer modeling from video games and personal experiments.

I did ask Donald Friedman about it though.

2019-09-23T16:23:48+00:00

https://twitter.com/_/status/1176170308627156992

@gerrycan1 I though it showed the actual load and capacity, rather than a ratio. Let me check...

2019-09-23T16:21:29+00:00

https://twitter.com/_/status/1176169726185070592

@gerrycan1 No, most of the simulations I've done have been things I've programmed myself from scratch.

2019-09-23T16:20:38+00:00

https://twitter.com/_/status/1176169513982681088

@ufotodaynetwork Well, verification would be tricky, as I generally don't like strangers coming around to look in my pockets.

Much the same as the military not wanting randos lookin at their data.

2019-09-23T16:19:21+00:00

https://twitter.com/_/status/1176169190442405888

@gerrycan1 No, it has not. I'm still going with this.

2019-09-23T16:17:34+00:00

https://twitter.com/_/status/1176168741974896641

@gerrycan1 When is output ever just graphical? Simulations are numeric. Their input, processes and outputs are numeric. If those numbers include coordinates then visualization is a view of the output data.

I'm starting to think you don't really understand computer models and graphics.

2019-09-23T16:12:39+00:00

https://twitter.com/_/status/1176167501777928197

@ufotodaynetwork And a CRKT pocket knife. Clipped in, so I forget it's even there.

http://pbs.twimg.com/media/EFKWEXOUYAEJEhp.jpg

http://pbs.twimg.com/media/EFKWEXOUYAEJEhp.jpg

2019-09-23T16:10:38+00:00

https://twitter.com/_/status/1176166995789639680

@ufotodaynetwork A Fenix PD2 with a Streamlight battery and half a roll of AmazonBasic dog waste bags.

2019-09-23T16:06:56+00:00

https://twitter.com/_/status/1176166063538499584

@gerrycan1 I love having errors pointed out. I'm just not sure that's what you are doing.

2019-09-23T16:06:16+00:00

https://twitter.com/_/status/1176165897553080321

@gerrycan1 Aha, so you problem is that you can't prove they don't have justification in removal of the bridging trusses from the model, so you've got nothing?

2019-09-23T16:05:08+00:00

https://twitter.com/_/status/1176165613426765825

@gerrycan1 Isn't "tip forward" a rather dynamic action for a tall building?

2019-09-23T16:03:01+00:00

https://twitter.com/_/status/1176165078980120576

@gerrycan1 Sure. That makes sense. So you are saying NIST rigged their model in this really stupidly obvious way that anyone can see, with zero justification?

Seems like you've cracked the case! What's the next step? Grand jury?

2019-09-23T16:01:17+00:00

https://twitter.com/_/status/1176164641166069761

@gerrycan1 What is the purpose of the visualization of the analysis?

2019-09-23T16:00:29+00:00

https://twitter.com/_/status/1176164439952740353

@gerrycan1 And as a reminder, 4.15 is like 4.14, but with the problems more apparent.

http://pbs.twimg.com/media/EFKTLWBUUAA1Lkg.jpg

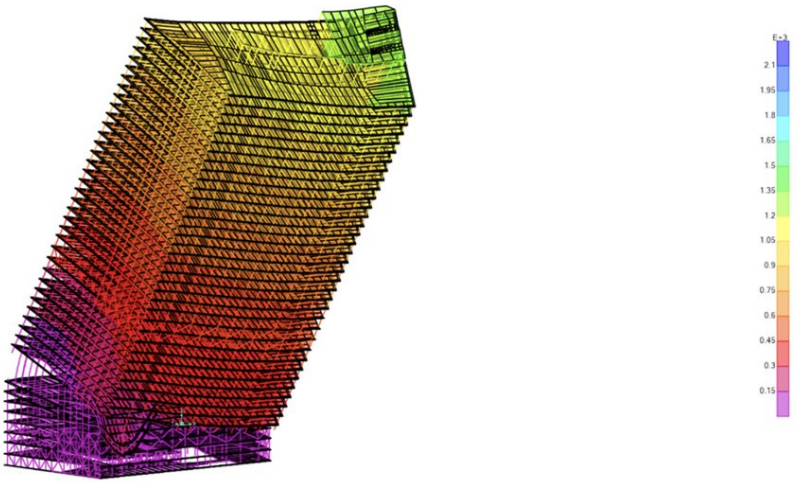


Figure 4.15: Visualization of linear static analysis, from the southwest, showing the building tipping to the southeast after the hypothetical failure of Columns 76 to 81.

http://pbs.twimg.com/media/EFKTLWBUUAA1Lkg.jpg

2019-09-23T15:58:32+00:00

https://twitter.com/_/status/1176163951949729792

@gerrycan1 I don't know.

2019-09-23T15:58:08+00:00

https://twitter.com/_/status/1176163850455941120

@gerrycan1 Erm, you asked a question. I gave an answer, and you accuse me of changing the subject?.

Sure. let's go back to 4.14 and 4.15. Can you find an engineer to discuss this live?

2019-09-23T15:54:25+00:00

https://twitter.com/_/status/1176162915717505024

@gerrycan1 Yeah, the bridging trusses were discussed back in 2014. Been a while, so it's a bit hazy. https://www.metabunk.org/posts/130912/

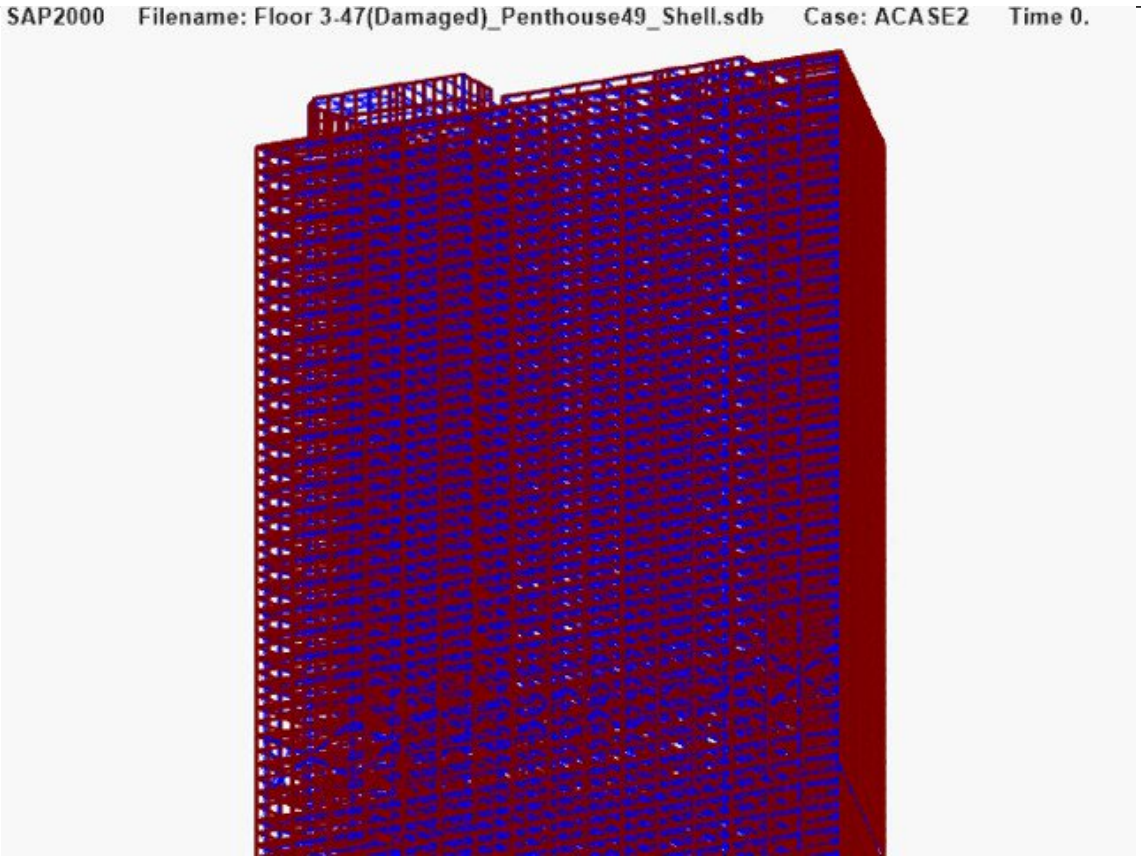
2019-09-23T15:50:55+00:00

https://twitter.com/_/status/1176162032141258752

@gerrycan1 4.24a

Also not an actual dynamic analysis, or a visualization of one, except in the "artist's impression" sense.

http://pbs.twimg.com/ext_tw_video_thumb/1176161803178373122/pu/img/V4QKSyz3sUggdnkB.jpg



http://pbs.twimg.com/ext_tw_video_thumb/1176161803178373122/pu/img/V4QKSyz3sUggdnkB.jpg

2019-09-23T15:48:38+00:00

https://twitter.com/_/status/1176161460075937792

@gerrycan1 How would it get to that angle without moving?

2019-09-23T15:47:32+00:00

https://twitter.com/_/status/1176161183839055872

@gerrycan1 @PamelaDrew Yes, I discussed linear static analysis for sudden column removal with Donald Friedman. Here's the part of the discussion discussing static vs. dynamic. https://youtu.be/ezHc9x75808?t=2120

2019-09-23T15:40:50+00:00

https://twitter.com/_/status/1176159495803662338

@gerrycan1 @PamelaDrew You brought up pushover analysis. But if you want to talk about 4.14. Would you say this is an appropriate use of linear static analysis? Are there REALLY zero time/momentum/collision/inelastic considerations at this point? http://pbs.twimg.com/media/EFKOcp6U0AABa63.jpg

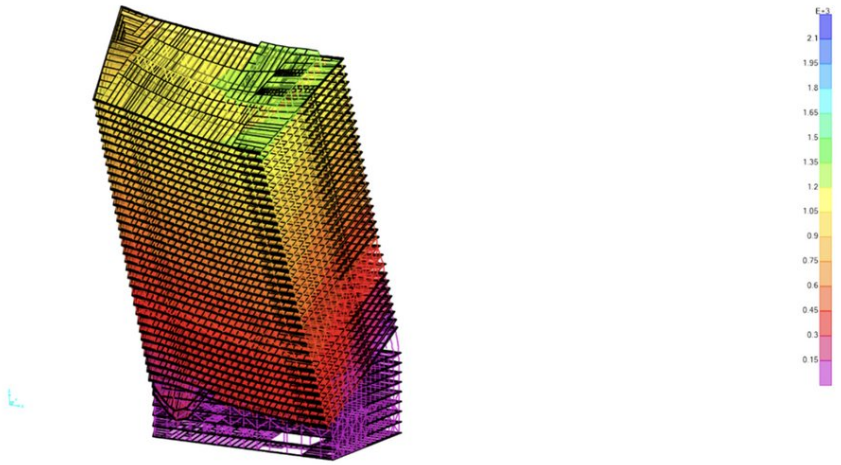


Figure 4.14: Visualization of linear static analysis, from the southeast, showing the building tipping to the southeast after the hypothetical failure of Columns 76 to 81.

http://pbs.twimg.com/media/EFKOcp6U0AABa63.jpg

2019-09-23T15:34:38+00:00

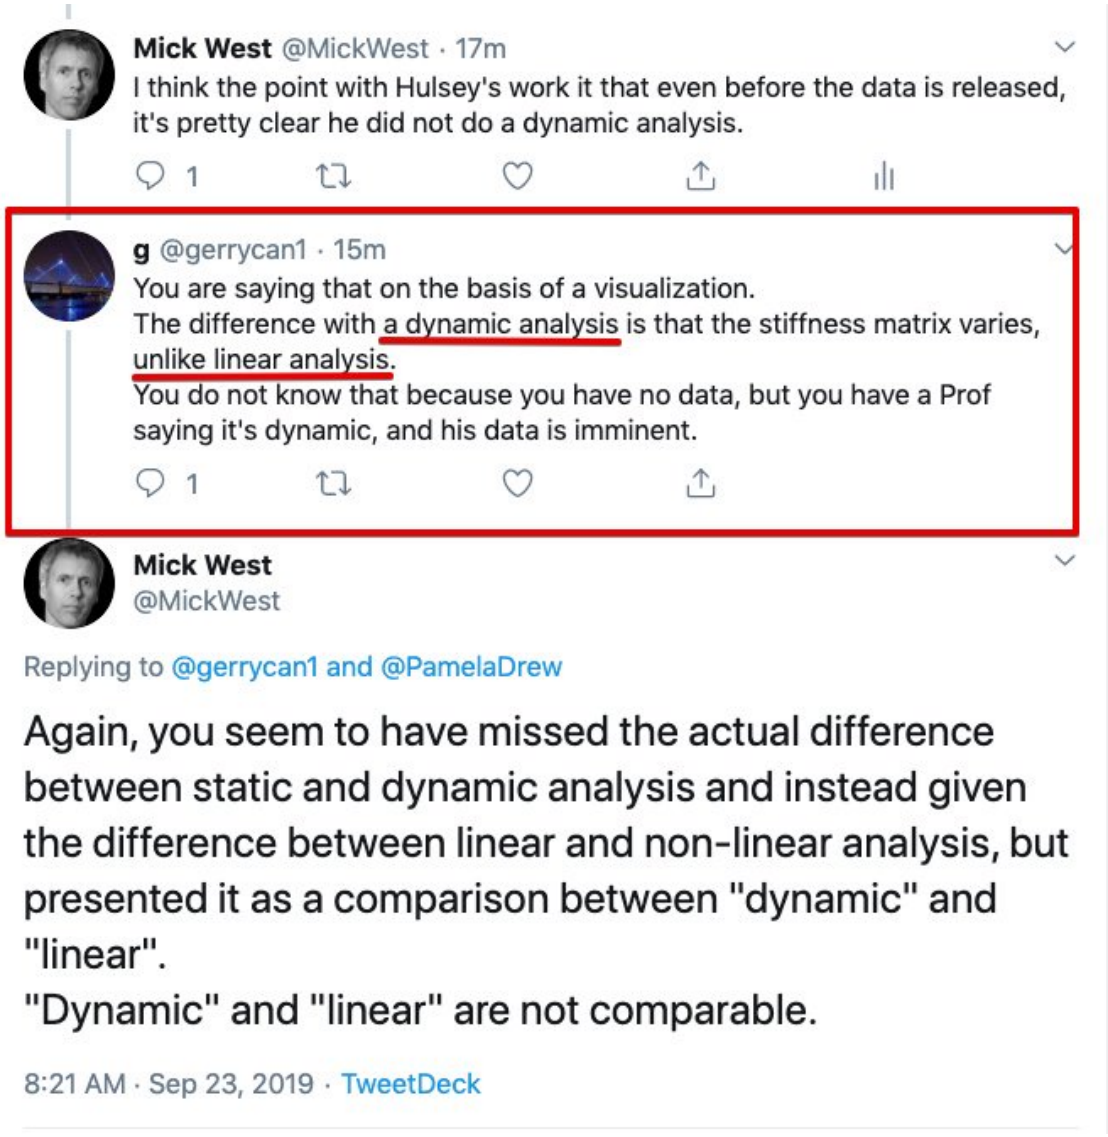
https://twitter.com/_/status/1176157936130748416

@gerrycan1 @PamelaDrew Pushover needs a push (a monotonic displacement-controlled lateral load pattern, in the lingo)

2019-09-23T15:31:40+00:00

https://twitter.com/_/status/1176157188017930242

@gerrycan1 @PamelaDrew I think first we need to clear up your misunderstanding regarding static/dynamic and linear/non-linear. http://pbs.twimg.com/media/EFKMnTjU0AAMABW.jpg



http://pbs.twimg.com/media/EFKMnTjU0AAMABW.jpg
2019-09-23T15:28:59+00:00
https://twitter.com/_/status/1176156514622398467
@gerrycan1 @PamelaDrew I was chatting about that last year:
https://www.metabunk.org/posts/219956/

2019-09-23T15:25:28+00:00
https://twitter.com/_/status/1176155627338354688
@ufotodaynetwork @GalaxyReport @cosmicdahlia @zcichy Only I know that.

We are veering into epistemology. Let's not.

2019-09-23T15:24:20+00:00
https://twitter.com/_/status/1176155344587804673
@cosmicdahlia @GalaxyReport @zcichy I'm a "trust, yet verify" kinda guy.

2019-09-23T15:23:29+00:00
https://twitter.com/_/status/1176155130908987392
@ufotodaynetwork @GalaxyReport @cosmicdahlia @zcichy Sure. I'm the only person in the universe who knows what is in my pocket.

2019-09-23T15:21:53+00:00

https://twitter.com/_/status/1176154727634980867

@gerrycan1 @PamelaDrew Again, you seem to have missed the actual difference between static and dynamic analysis and instead given the difference between linear and non-linear analysis, but presented it as a comparison between "dynamic" and "linear".
"Dynamic" and "linear" are not comparable.

2019-09-23T15:15:12+00:00

https://twitter.com/_/status/1176153045274464257

@GalaxyReport @cosmicdahlia @zcichy I'm suspicious of credentials. Arguments are best when they stand alone. A high school math kid could verify the analysis I present. No authority is needed.

2019-09-23T15:13:49+00:00

https://twitter.com/_/status/1176152695901540355

@gerrycan1 @PamelaDrew What I lack is time and a good rationale for spending time on some obscure point that nobody except you seems to find important. Convince some more people, then come back.

2019-09-23T15:12:30+00:00

https://twitter.com/_/status/1176152364278927360

@gerrycan1 @PamelaDrew I think the point with Hulsey's work it that even before the data is released, it's pretty clear he did not do a dynamic analysis.

2019-09-23T15:11:38+00:00

https://twitter.com/_/status/1176152148591071232

@cosmicdahlia @GalaxyReport @zcichy Video game programming might sound like a trivial profession, but it's actually pretty complicated.
However I think whenever you just have to take someone's word for it, you should check it, regardless of their profession.

2019-09-23T15:07:59+00:00

https://twitter.com/_/status/1176151229652619264

@gerrycan1 @PamelaDrew I presume you are going to check Hulsey's work?

2019-09-23T15:06:27+00:00

https://twitter.com/_/status/1176150843084529665

@GalaxyReport @cosmicdahlia @zcichy Why are y'all so obsessed with professions? You don't care about professions. If professions were a factor you'd be believing Neil deGrasse Tyson and Seth Shostak.

2019-09-23T15:02:05+00:00

https://twitter.com/_/status/1176149743421911042

@gerrycan1 @xenuqueue @paulmuaddib61 @rock_n_my_soul @Oswald1160 A data visualization shows a view of the data. It's an actual product of an analysis. What Hulsey is showing here is not a visualization of dynamic analysis. It's a hand-produced animation inappropriately extrapolated from static analysis and assumptions

https://www.youtube.com/watch?v=cQkRR81haW8

2019-09-23T14:39:06+00:00

https://twitter.com/_/status/1176143960453959681

@naoehogui @RobAgs0817 @alien_expanse If you have puzzle pieces that don't fit, then you can't just say "we don't need to put these pieces together".

You need to consider that they might be pieces from different puzzles.

2019-09-23T14:35:10+00:00

https://twitter.com/_/status/1176142971734904833

@PamelaDrew NIST addressed this very question in their FAQ. #12

The other questions are a good read too.

https://www.nist.gov/topics/disaster-failure-studies/faqs-nist-wtc-7-investigation

http://pbs.twimg.com/media/EFJ_s_VUYAAe8C0.jpg

---

12. Are there hundreds or thousands of unsafe tall buildings with long span supports that must be retrofitted in some way? How would one retrofit a building to prevent this problem?

While the partial or total collapse of a tall building due to fires is a rare event, NIST strongly urges building owners, operators, and designers to evaluate buildings to ensure the adequate fire performance of structural systems. Of particular concern are the effects of thermal expansion in buildings with one or more of the following characteristics: long-span floor systems, connections that cannot accommodate thermal effects, floor framing that induces asymmetric forces on girders, and composite floor systems, whose shear studs could fail due to differential thermal expansion (i.e., heat-induced expansion of material at different rates). Engineers should be able to design cost-effective fixes to address any areas of concern identified by such evaluations.

Several existing, emerging, or even anticipated capabilities could have helped prevent the collapse of WTC 7. The degree to which these capabilities improve performance remains to be evaluated. Possible options for developing cost-effective fixes include:

- More robust connections and framing systems to better resist effects of thermal expansion on the structural system.
- Structural systems expressly designed to prevent progressive collapse. Current model building codes do not require that buildings be designed to resist progressive collapse.
- Better thermal insulation (i.e., reduced conductivity and/or increased thickness) to limit heating of structural steel and minimize both thermal expansion and weakening effects. Insulation has been used to protect steel strength, but it could be used to maintain a lower temperature in the steel framing to limit thermal expansion.
- Improved compartmentation in tenant areas to limit the spread of fires.
- Thermally resistant window assemblies to limit breakage, reduce air supply, and retard fire growth.

NIST is recommending that building standards and codes be strengthened beyond their current intent to achieve life safety to prevent structural collapse even during infrequent building fires like those in WTC 7 when sprinklers do not function, do not exist, or are overwhelmed by fire.

2019-09-22T15:28:56+00:00

https://twitter.com/_/status/1175794112068407296

@xenuqueue @paulmuaddib61 @rock_n_my_soul @Oswald1160 I think any large report is guaranteed to contain errors. And any model is not going to perfectly reflect history, especially when information is limited.

The main problem here is that Hulsey claims to have done a dynamic analysis, but he did not. He did animation.

2019-09-22T15:10:09+00:00

https://twitter.com/_/status/1175789384731283464
@xenuqueue @paulmuaddib61 @rock_n_my_soul @Oswald1160 I didn't call it debunked, I just identified numerous problems with it.

And here I'm addressing the Hulsey study, which should stand alone. Don't you want to discuss it?

2019-09-22T14:52:38+00:00
https://twitter.com/_/status/1175784980015763462
@xenuqueue @paulmuaddib61 @rock_n_my_soul @Oswald1160 Not really. Here I'm specifically addressing the Hulsey report. The problems are in that report. I show the NIST model only to show what a proper dynamic simulation would look like (i.e. not like a box rotating above another box)

2019-09-22T14:41:30+00:00
https://twitter.com/_/status/1175782175397965824
@gerrycan1 @paulmuaddib61 @rock_n_my_soul @Oswald1160 Because Iâ□□m hardly going to figure out the entire colllapse initiation and progression sequence by myself. I just look at claims of evidence. I presumed you were planning a critique of NUST and an alt explanation?

2019-09-22T14:25:19+00:00
https://twitter.com/_/status/1175778104704266242
@gerrycan1 @paulmuaddib61 @rock_n_my_soul @Oswald1160 I'll wait for your report. I've got enough stuff to work through!

2019-09-22T14:19:55+00:00
https://twitter.com/_/status/1175776746349588480
@xenuqueue @paulmuaddib61 @rock_n_my_soul @Oswald1160 Which other thread? My Twitter is a mess.
Here's some Problems with the UAF/Hulsey/AE911Truth WTC7 Draft Report
https://www.youtube.com/watch?v=7OClixCTdDw

2019-09-22T14:15:21+00:00
https://twitter.com/_/status/1175775594400776192
@gerrycan1 @paulmuaddib61 @rock_n_my_soul @Oswald1160 Why the delay in releasing them?

2019-09-22T14:14:43+00:00
https://twitter.com/_/status/1175775436032229377
@gerrycan1 @paulmuaddib61 @rock_n_my_soul @Oswald1160 Well they clearly failed by the column being torsioned in some way. So what did that torsioning, if not the general collapse? What made these weld fail? (say on a non-bent column, as this one was more obviously twisted.) http://pbs.twimg.com/media/EFExUYJU4AAO3sw.jpg

---

http://pbs.twimg.com/media/EFExUYJU4AAO3sw.jpg

2019-09-22T14:10:03+00:00

https://twitter.com/_/status/1175774259999723521

@gerrycan1 @paulmuaddib61 @rock_n_my_soul @Oswald1160 Thanks. I might have seen them before and forgotten. I tend to get easily distracted :)

2019-09-22T14:09:00+00:00

https://twitter.com/_/status/1175773998660980737

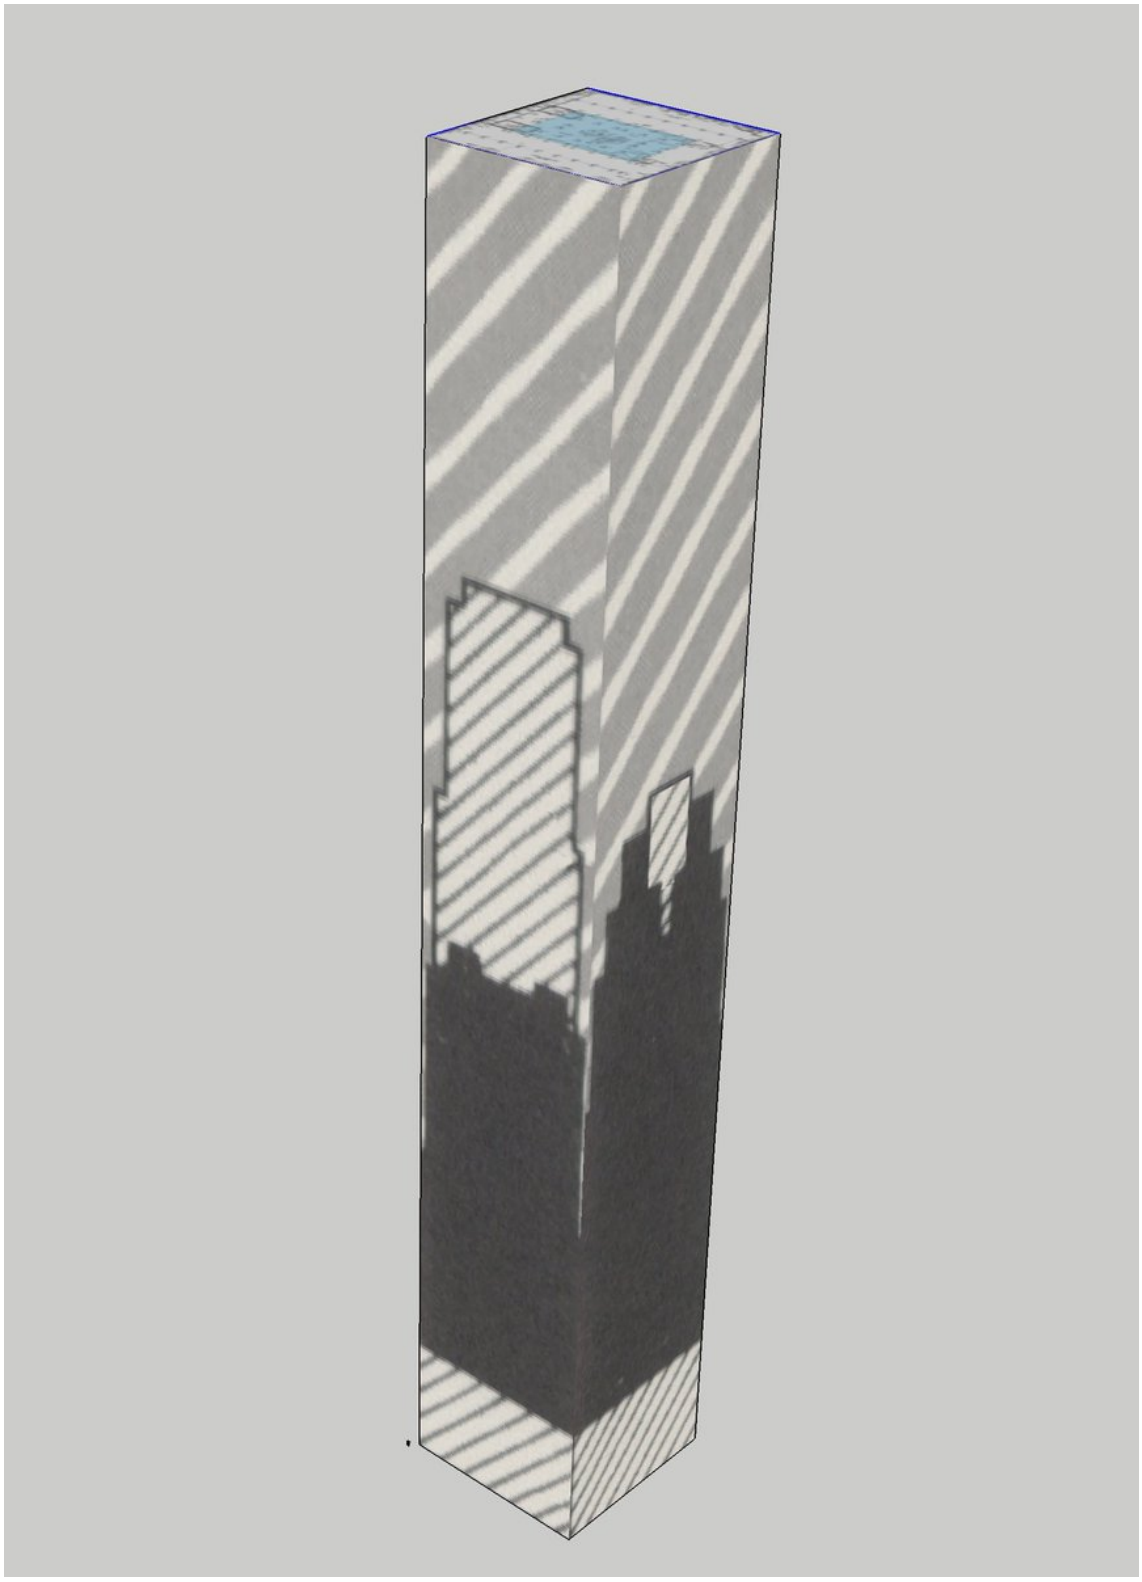
@gerrycan1 @paulmuaddib61 @rock_n_my_soul @Oswald1160 I know you are just asking questions, but I'm curious what mechanism you think cause all those column sections to fail at the splices? Some kind of rocket charge pushing against it?

2019-09-22T14:05:48+00:00

https://twitter.com/_/status/1175773191005802496

@gerrycan1 @paulmuaddib61 @rock_n_my_soul @Oswald1160 This thing? I seem to remember you saying this was going to be significant. http://pbs.twimg.com/media/EFEvX5FU0AAOwmI.jpg

---



http://pbs.twimg.com/media/EFEvX5FU0AAOwmI.jpg

https://twitter.com/_/status/1175766821787467781

@xenuqueue @paulmuaddib61 @rock_n_my_soul @Oswald1160 How did you confirm it?

I mean, nobody pays me. I disagree with a lot of people, but who doesn't?

2019-09-22T13:39:45+00:00

https://twitter.com/_/status/1175766637980479488

@paulmuaddib61 @xenuqueue @rock_n_my_soul @Oswald1160 Those are the cut marks for the lifting and alignment plates that were removed after the columns were assembled. Discussed in depth here:

https://www.metabunk.org/wtc-towers-core-columns-what-held-them-together-welds.t9256/

http://pbs.twimg.com/media/EFEphUkU8AAG3ki.jpg

@xenuqueue @paulmuaddib61 @rock_n_my_soul @Oswald1160 Regarding "3000+ architects and engineers" just remember that's 3000+ out of millions of qualified people. While a small number are engineers, they cast a wide net. One is a food engineer.
http://pbs.twimg.com/media/EFEo47rUwAYCIMD.jpg

http://pbs.twimg.com/media/EFEo47rUwAYCIMD.jpg
2019-09-22T13:29:27+00:00
https://twitter.com/_/status/1175764044466143232
@gerrycan1 @paulmuaddib61 @rock_n_my_soul @Oswald1160 How about a typical corner core column around floor 50?

2019-09-22T13:26:41+00:00
https://twitter.com/_/status/1175763347100168192
@gerrycan1 @paulmuaddib61 @rock_n_my_soul @Oswald1160 I'm interested in the percentages of different connections. Based on looking at the debris it seems mostly simple partial penetration welds between sections. Do you have pics of failed column splice plates?

2019-09-22T13:24:53+00:00
https://twitter.com/_/status/1175762893482020864
@gerrycan1 @paulmuaddib61 @rock_n_my_soul @Oswald1160 I mean the core below the initial collapse zone. And yes, the "spire" that remained. Needed more of an accumulation of damage and stripped bracing. The outer walls just peeled off.

2019-09-22T13:23:12+00:00
https://twitter.com/_/status/1175762472789315584
@gerrycan1 @paulmuaddib61 @rock_n_my_soul @Oswald1160 No, most of the ones I was looking at were box columns. I interviewed Donald Friedman a couple of weeks ago - a structural engineer who worked at GZ. Here's what he says in his book.
http://pbs.twimg.com/media/EFEloGSU4AE3CRb.png

the bevel and the flat top surface of the lower column formed a lopsided "V" shaped groove, which was then filled with weld. Partial penetration welds are not as strong as full-penetration welds, where the groove is the same depth as the steel is thick, but they are far stronger than is needed for most purposes. Under the extraordinary loads imposed during the collapse, the columns were free to buckle after the the welds ripped off of the flat surface of the groove.

Like a lot of the structural damage I saw, this was not a normal phenomenon and it was hard to accept. I spent a lot of time noting such issues and trying not to learn too much from them. It would be easy to stop trusting my knowledge of building design, and weld performance, and steel strength, and so on. I felt that by understanding what had physically happened on September 11, I could contrast it with the ordinary engineering problems I dealt with on my projects.]
http://pbs.twimg.com/media/EFEloGSU4AE3CRb.png

[*I had misgivings about the core columns I was seeing. I was sure the dunnage design would work–Kyle and Chris know their stuff–but I was unhappy that the columns I saw lying on West Street seemed to be in too-good condition. These huge columns–the largest weighed more than one ton per running foot–were almost all straight, with clean edges at both ends. There were some dents here and there, but I expected a piece of steel that had been wrenched out of a building to be bent. I examined the ends of the columns every chance I got. Every welded splice at the column ends I saw had failed the same way: by ripping out of the steel. The plates that had been assembled into boxes for the core columns varied from a couple of inches at the top to five inches at the bottom. The top and bottom ends of each column were flat and had been spliced with a partial-penetration groove weld: the upper column's four sides were beveled about an inch and a half. When the upper column was erected over the already in-place column below,*

2019-09-22T13:18:44+00:00

https://twitter.com/_/status/1175761346094256128

@gerrycan1 @paulmuaddib61 @rock_n_my_soul @Oswald1160 Could you maybe characterize the different types of connections, and their frequency? When you look at core columns in debris pile photos you generally see snapped welds.

2019-09-22T13:16:34+00:00

https://twitter.com/_/status/1175760803279982592

@gerrycan1 @paulmuaddib61 @rock_n_my_soul @Oswald1160 Yes, that's why the core was the last thing to fail.

2019-09-22T13:15:47+00:00

https://twitter.com/_/status/1175760604289593350

@gerrycan1 @paulmuaddib61 @rock_n_my_soul @Oswald1160 Looks like a splice in the upper columns? Where they were too thin to use welds? Interesting stuff.

2019-09-22T04:20:35+00:00

https://twitter.com/_/status/1175625918171115520

@316curtis @michaelshermer Me too!

2019-09-22T04:19:57+00:00

https://twitter.com/_/status/1175625759177576448

@rock_n_my_soul @paulmuaddib61 @Oswald1160 The cars were on fire. Burning debris ignited car fires.

2019-09-22T04:18:29+00:00

https://twitter.com/_/status/1175625389126766592

@Coleyufo @BlueprintUfo I suspect lots of scientist are looking at it. Iâ□□d think itâ□□s pollution, loss of habitat from land use change, and some climate change.

2019-09-22T04:16:40+00:00

https://twitter.com/_/status/1175624933621108736

@starapparatus @eye_walking @PostDisclosure Iâ□□ve put out some feelers, but they seem reluctant so far.

2019-09-22T01:14:06+00:00

https://twitter.com/_/status/1175578988153954305

@WilsonAdmiral @PostDisclosure UAP has been used for 20+ years in the UK and at least 10 in the US.

2019-09-22T00:21:47+00:00

https://twitter.com/_/status/1175565821931769858

@WilsonAdmiral @PostDisclosure They don't spend all that 800 billion in the same place.

2019-09-22T00:21:23+00:00

https://twitter.com/_/status/1175565719116713984

@WilsonAdmiral @PostDisclosure They are not being more open at all. They essentially surfaced only to say they were not going to comment.

2019-09-22T00:20:38+00:00
https://twitter.com/_/status/1175565530683432960
@WilsonAdmiral @PostDisclosure Perhaps because it WASN'T "hovering for days on end"

If there was some kind of mass airspace incursion into a carrier group than that's like an act of war. Yet there were practically no engagement attempts.

Is it POSSIBLE that the story grew in the telling?

2019-09-22T00:04:56+00:00
https://twitter.com/_/status/1175561582387982336
@paulmuaddib61 I made a short video with some references, showing that the persistent trails match contrails. https://www.youtube.com/watch?v=X72uACIN_00

2019-09-22T00:03:54+00:00
https://twitter.com/_/status/1175561322248822784
@paulmuaddib61 @rock_n_my_soul @Oswald1160 Automobile glass shatters in fires due to differential thermal expansion. It's very common.

https://twitter.com/_/status/1175556753934544896
@Deepneuron @PostDisclosure Or maybe he's young and I'm old? :)

What's wrong with emotional restraint and sensitivity?

2019-09-21T23:41:29+00:00
https://twitter.com/_/status/1175555681694302209
@SilvaRecord @alsniewaddan I was asking.

Clean rooms are not immune to dust, that's why they have air filters in the room - to remove dust that might be carried in or generated in the room. There was also different levels of dust-freeness.

So no guarantee of no dust, regardless. http://pbs.twimg.com/media/EFBpkd0VUAEpKdW.jpg

---

Airborne Particulate Cleanliness Classes (by cubic meter):

CLASS	Number of Particles per Cubic Meter by Micrometer Size					
	0.1 micron	0.2 micron	0.3 micron	0.5 micron	1 micron	5 microns
ISO1	10	2				
ISO2	100	24	10	4		
ISO3	1,000	237	102	35	8	
ISO4	10,000	2,370	1,020	352	83	
ISO5	100,000	23,700	10,200	3,520	832	29
ISO6	1,000,000	237,000	102,000	35,200	8,320	293
ISO7				352,000	83,200	2,930
ISO8				3,520,000	832,000	29,300
ISO9				35,200,000	8,320,000	293,000

In cleanrooms, particulate concentration changes over time — from the construction and installation of equipment to its operational status. ISO delineates three cleanroom classification standards: as-built, at-rest and operational. Read more about **cleanrooms** and

https://twitter.com/_/status/1175540189134909441

Infrared cameras often show strange orbs of light. These are usually dust (sometimes bugs)

people don't realize there's a really bright light close to the camera, because it's invisible infrared. Hence some confusion, and talk of ghosts.
https://www.youtube.com/watch?v=d5DjhbMZlOk

2019-09-21T22:26:03+00:00
https://twitter.com/_/status/1175536695707492353
@Aviation_Intel I made a video showing what dust looks like close to an IR camera with IR lights.
It looks like this.
https://www.youtube.com/watch?v=d5DjhbMZlOk

2019-09-21T20:38:55+00:00
https://twitter.com/_/status/1175509735048503297
@jimroy @paulmuaddib61 @Oswald1160 @rock_n_my_soul The core was no aluminum clad. And it did not "blow away", it fell straight down, leaving some dust.

2019-09-21T20:37:21+00:00
https://twitter.com/_/status/1175509341664710656
@rock_n_my_soul @paulmuaddib61 @Oswald1160 I don't paid.

2019-09-21T19:02:02+00:00

https://twitter.com/_/status/1175485353207033856

@Neil_Bower @Deepneuron @2gether_WeRise @SilvaRecord @jboat1992 @WilsonAdmiral @BigelowSpace @UfoJoe11 I'll wait too. If they posted it in seriousness then they demonstrate poor judgement. If it's a joke, it's not very funny.

2019-09-21T16:49:05+00:00

https://twitter.com/_/status/1175451894656815104

@BryanKelly @jboat1992 @2gether_WeRise @zcichy @Deepneuron @SilvaRecord @WilsonAdmiral @BigelowSpace @UfoJoe11 Really? Do you have a video of "shooting them around the room with light" because I don't imagine that looking like this.

This looks like typical motes on an IR illuminated security camera. Super common on baby monitors and home security camera.

2019-09-21T16:23:51+00:00

https://twitter.com/_/status/1175445546200252416

@paulmuaddib61 @tmc7316 @1_gramster the sunlight goes all the way down. At the time of collapse the sun was pretty much aligned with the towers, so the sun went all the way down to street level.

2019-09-21T16:14:08+00:00

https://twitter.com/_/status/1175443099004239872

@2gether_WeRise @jboat1992 @zcichy @Deepneuron @SilvaRecord @WilsonAdmiral @BigelowSpace @UfoJoe11 @LtTimMcMillan What do you mean by unconventional? I mean, a jetpack is unconventional.

I don't think there's any warping of spacetime going on in Earth's atmosphere, if that's what you mean.

2019-09-21T16:11:45+00:00

https://twitter.com/_/status/1175442499717881856

@jboat1992 @zcichy @Deepneuron @2gether_WeRise @SilvaRecord @WilsonAdmiral @BigelowSpace @UfoJoe11 @LtTimMcMillan @TTSAcademy "Turns out"? No, the Navy said they were unidentified. I think they are unidentified. I DON'T think they are birds, although that's possibly for "Go Fast." I think they are aircraft. Go Fast most likely a balloon.

Avoid getting your knowledge from memes.

2019-09-21T16:09:29+00:00

https://twitter.com/_/status/1175441930575966208

@Direax1 @2gether_WeRise @GalaxyReport @zcichy @Deepneuron @SilvaRecord @jboat1992 @WilsonAdmiral @BigelowSpace @UfoJoe11 There's patents for houses on the moon. There are no houses on the moon. There's patents for teleportation devices. There are no teleportation devices. There's patents for stratospheric geoengineering. etc.

Patents don't mean things exist or even that they work.

2019-09-21T16:05:45+00:00

https://twitter.com/_/status/1175440991546834950

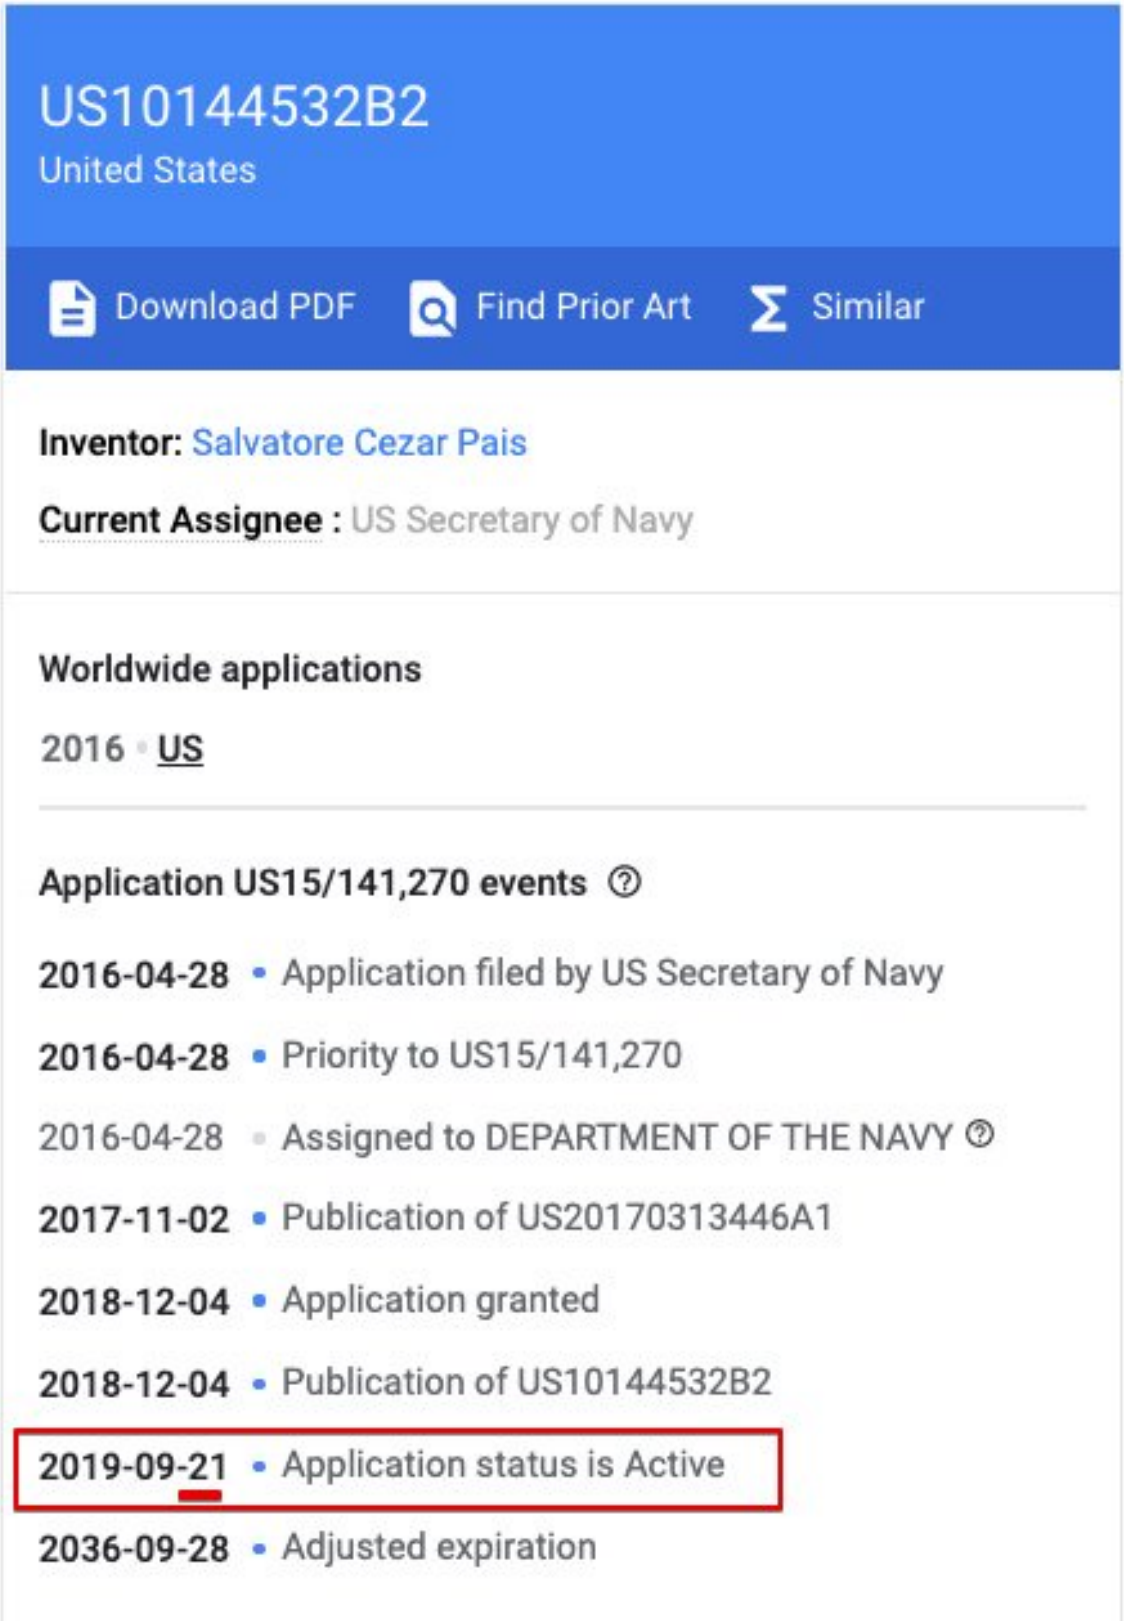
@paulmuaddib61 Watch the video again? Might it be sunlight?

2019-09-21T16:05:01+00:00

https://twitter.com/_/status/1175440804837388288

@2gether_WeRise @zcichy @Deepneuron @SilvaRecord @jboat1992 @WilsonAdmiral @BigelowSpace @UfoJoe11 That line just shows what the status is on today's date. It's still active today. It's been active since 2018-12-04.

http://pbs.twimg.com/media/EFABH4mUwAAjplI.jpg



http://pbs.twimg.com/media/EFABH4mUwAAjpII.jpg
2019-09-21T16:02:18+00:00
https://twitter.com/_/status/1175440120767320064
@paulmuaddib61 @tmc7316 @1_gramster That's the dust cloud emerging into sunlight. The camera is set for the darker scene behind it, so it looks white for a while until the camera adjusts.

2019-09-21T16:00:42+00:00

https://twitter.com/_/status/1175439720236474368

@jboat1992 @zcichy @Deepneuron @2gether_WeRise @SilvaRecord @WilsonAdmiral @BigelowSpace @UfoJoe11 @LtTimMcMillan No I don't. "Real" means something that exists. Specks of dust are real. Insects are real. anti-gravity microdrones would be real if they existed. Ghosts would be real if they existed.

So when you say "you are wrong, it is real" it's not at all clear what you mean.

2019-09-21T15:58:13+00:00

https://twitter.com/_/status/1175439095520059392

Dropping links of people will not work if they don't follow the links, and 99% of the time they don't. Especially if it's from a source they distrust.

Show them evidence, not links. https://twitter.com/debunker/status/1175437218669707265

2019-09-21T15:55:15+00:00

https://twitter.com/_/status/1175438349663784960

@jboat1992 @zcichy @Deepneuron @2gether_WeRise @SilvaRecord @WilsonAdmiral @BigelowSpace @UfoJoe11 @LtTimMcMillan You keep using this word "real." You are using it wrong. Use better words to explain what you mean.

Real what?

2019-09-21T15:52:18+00:00

https://twitter.com/_/status/1175437607339061249

@jboat1992 @2gether_WeRise @zcichy @Deepneuron @SilvaRecord @WilsonAdmiral @BigelowSpace @UfoJoe11 IR camera's see single specks of dust that is close to the lens as an "orb."

The thing people often miss is that there's a really bright IR light, often in a ring around the camera. The dust speck is super bright, but very small and out of focus.

2019-09-21T15:48:41+00:00

https://twitter.com/_/status/1175436694335578112

@2gether_WeRise @zcichy @Deepneuron @SilvaRecord @jboat1992 @WilsonAdmiral @BigelowSpace @UfoJoe11 How can you see a single speck of dust in a dark room?

2019-09-21T15:48:06+00:00

https://twitter.com/_/status/1175436547060928512

@jboat1992 @zcichy @Deepneuron @2gether_WeRise @SilvaRecord @WilsonAdmiral @BigelowSpace @UfoJoe11 Of course it's real. There it is on the video.

2019-09-21T15:44:09+00:00

https://twitter.com/_/status/1175435555955326976

@zcichy @Deepneuron @2gether_WeRise @SilvaRecord @jboat1992 @WilsonAdmiral @BigelowSpace @UfoJoe11 There's loads of videos on YouTube of similar orbs on baby monitors. Parents often think they are ghosts. https://youtu.be/Eh_Zw8NROtw

---

2019-09-21T15:43:16+00:00

https://twitter.com/_/status/1175435333627854848

@humanoidlord @Deepneuron Yeah, so it's probably not that.

2019-09-21T15:38:54+00:00

https://twitter.com/_/status/1175434234934120449

@zcichy @Deepneuron @2gether_WeRise @SilvaRecord @jboat1992 @WilsonAdmiral @BigelowSpace @UfoJoe11 Sure, either it's a joke, or they haven't really given it much thought. I'd presume joke, as a "orb" is such a common thing (usually attributed to ghosts.) But it's also possibly it's simply something new to them.

2019-09-21T15:35:02+00:00

https://twitter.com/_/status/1175433261163565056

@Deepneuron @2gether_WeRise @SilvaRecord @jboat1992 @WilsonAdmiral @BigelowSpace @UfoJoe11 Focus.

2019-09-21T15:34:50+00:00

https://twitter.com/_/status/1175433209477099520

@zcichy @Deepneuron @2gether_WeRise @SilvaRecord @jboat1992 @WilsonAdmiral @BigelowSpace @UfoJoe11 People are varied.

2019-09-21T15:34:20+00:00

https://twitter.com/_/status/1175433085099229184

@MusicAndTruth @GarryPNolan @GalaxyReport @AFSUnidentified @IvanBuchanJanus @nickpopemod @USNavy And I donâ□□t just focus on UFOs. I also look at 9/11, chemtrails, false flags, flat earth, ghosts, free energy, fake news, and wildfires.

2019-09-21T15:30:24+00:00

https://twitter.com/_/status/1175432093066620928

@Deepneuron @2gether_WeRise @SilvaRecord @jboat1992 @WilsonAdmiral @BigelowSpace @UfoJoe11 Dust or a bug. I see this nearly every day on one of my security camera.

2019-09-21T15:29:30+00:00

https://twitter.com/_/status/1175431869870964736

@MusicAndTruth @GarryPNolan @GalaxyReport @AFSUnidentified @IvanBuchanJanus @nickpopemod @USNavy I haven identified the aircraft behind the UFO videos, just shown that they are consistent with ordinary aircraft.

So I agree they are unidentifed. And flying. And objects.

2019-09-21T15:26:51+00:00

https://twitter.com/_/status/1175431200950767616

@ShepardAmbellas Seriously?

2019-09-21T15:22:57+00:00

https://twitter.com/_/status/1175430220221804544

@2gether_WeRise @Deepneuron @SilvaRecord @jboat1992 @WilsonAdmiral @BigelowSpace @UfoJoe11 Good grief! This is why UFOlogy gets laughed at. Tighten up your act people!

2019-09-21T15:20:56+00:00

https://twitter.com/_/status/1175429712337702912

@Aviation_Intel Are the actually saying the â□□orbâ□□ is significant? Lots of people do, and Iâ□□ve seen worse on TV.

2019-09-21T15:17:54+00:00
https://twitter.com/_/status/1175428947049238528
@MusicAndTruth @DeepStateDan @AFSUnidentified @IvanBuchanJanus @GarryPNolan @nickpopemod @GalaxyReport @USNavy But did they see the same things at the same times? Was it the same time and place as a video?

No.

2019-09-21T15:16:33+00:00
https://twitter.com/_/status/1175428608040456197
@MusicAndTruth @GarryPNolan @GalaxyReport @AFSUnidentified @IvanBuchanJanus @nickpopemod @USNavy No, not at all. I only try to debunk claims of evidence I think seem wrong. I focus on evidence, not speculation.

2019-09-21T02:29:28+00:00
https://twitter.com/_/status/1175235567170097152
@humanoidlord @Deepneuron The point is: military stuff is classified by default. So they can't discuss leaks, or leak investigations, or what is in the leaks.
They are not specifically hiding something, just everything that originates from the military is considered classified unless it's cleared.

2019-09-21T00:14:11+00:00
https://twitter.com/_/status/1175201522029694977
@joann_pruett High altitude humidity. Green in this map is contrail-supporting humidity at 30,000 feet.
https://www.instantweathermaps.com/GFS-php/conusupper.php?var=RH&lev=300mb&hour=000

2019-09-20T21:55:28+00:00
https://twitter.com/_/status/1175166611939966976
@TRandallizer @ValidatedM @SethShostak Well nobody knows what they are. However we CAN know things like the speed of Go Fast, or why Gimbal has an aura. Those things are relatively straightforward, even if the object is unidentified.
https://www.youtube.com/watch?v=r119JWI04Ls

2019-09-20T21:52:49+00:00
https://twitter.com/_/status/1175165943242055680
@thinkfree55 So why would they do it?

2019-09-20T21:42:52+00:00
https://twitter.com/_/status/1175163439578329089
@wilcher_grant @PostDisclosure If he did then it's a video of the same thing behaving differently. I can only go by what I see in the video.

2019-09-20T21:27:13+00:00
https://twitter.com/_/status/1175159500984111104
@wilcher_grant @PostDisclosure But the videos are of different things.

2019-09-20T21:17:53+00:00

https://twitter.com/_/status/1175157154677870592

@wilcher_grant @PostDisclosure For the videos yes. Not for the eyewitness accounts.

2019-09-20T17:33:54+00:00

https://twitter.com/_/status/1175100787887759360

@naoehogui Confirmation of what? What has changed since the 1910 form was released? Just some indication of TTSA shenanigans.

2019-09-20T16:13:58+00:00

https://twitter.com/_/status/1175080671364018176

@TheLightTruthIs @EricRWeinstein Either way works :)

2019-09-20T16:06:48+00:00

https://twitter.com/_/status/1175078868568297472

@Deepneuron @GalaxyReport @pjrbarnett Also they hire people without TS/SCI all the time - although the job offer is conditional on them passing the background checks.

Not that they would hire me, of course. Nor would I be interested, I think. I'll wait for the knock.

2019-09-20T16:03:56+00:00

https://twitter.com/_/status/1175078144383995907

@GalaxyReport @pjrbarnett @Deepneuron What did you hear about Hal? Where did you hear it?

2019-09-20T16:03:26+00:00

https://twitter.com/_/status/1175078018659696640

@Deepneuron @GalaxyReport @pjrbarnett They don't need to hire me. They can look at my videos for free!

2019-09-20T16:01:55+00:00

https://twitter.com/_/status/1175077640207654912

@GalaxyReport @pjrbarnett @Deepneuron We are all idiots in some areas of thought.

2019-09-20T16:01:02+00:00

https://twitter.com/_/status/1175077413941694464

@GalaxyReport @pjrbarnett @Deepneuron Skunkworks is not an arbiter of reality, that's a totally different thing. Why didn't Hal run Skunkworks?

2019-09-20T15:55:37+00:00

https://twitter.com/_/status/1175076052592287744

@GalaxyReport @pjrbarnett @Deepneuron It's a more attractive version of reality. But that's not how things work.

2019-09-20T15:54:57+00:00

https://twitter.com/_/status/1175075886967640066

@GalaxyReport @pjrbarnett @Deepneuron Hal Puthoff isn't a top scientist. He's was fooled by Uri Geller.

Steve Justice's plans for inventing a space-warp ship in a few years, based on studying UFO videos, appears borderline delusional. I'm sure he's a smart guy, but he's optimistically chasing ghosts.

2019-09-20T15:36:47+00:00

https://twitter.com/_/status/1175071314329030657

@GalaxyReport @UfoIssue @JonasCh57673093 I've watched it. I included a clip from it in my Go Fast video. I'm familiar with the context. https://www.youtube.com/watch?v=PLyEO0jNt6M

2019-09-20T15:34:47+00:00

https://twitter.com/_/status/1175070811968794625

@pjrbarnett @GalaxyReport @Deepneuron Y'all are missing what the Navy has been saying. Even training exercises involve classified information. So the Navy's default position is: "No comment."

That's partly why Lazar has got away with his story for so long. Banal secrecy regulations prevent military rebuttals.

2019-09-20T15:31:18+00:00

https://twitter.com/_/status/1175069931454386176

@HarryBannister @JonasCh57673093 I think "most" is not an accurate descriptor. Most regular people interested in the story think "aliens". There's some people who try to legitimize the inquiry by saying "but it might JUST be physics-defying human technology." But they all have "aliens" pretty high on their list.

2019-09-20T15:12:10+00:00

https://twitter.com/_/status/1175065120201822218

@naoehogui "Nothing there" refers to the current news story about the videos being "real". Everyone assumed they were real before now. Everyone knows the military would investigate unauthorized airspace incursions. So there's nothing there.

The videos still show unidentified objects.

2019-09-20T15:10:06+00:00

https://twitter.com/_/status/1175064597121785857

@UfoIssue @JonasCh57673093 My previous tweet is is 100% accurate. You are also correct. Currently the objects are unidentified. I've attempted to identify them. The whole idea is to find out what they are!

If my attempts don't fit the data, then I'd be force to hypothesize more fun stuff.

But it fits.

2019-09-20T15:05:39+00:00

https://twitter.com/_/status/1175063476261150721

@everevolve89 Also, atheists will have a big problem after the rapture.

Same thing.

2019-09-20T15:04:18+00:00

https://twitter.com/_/status/1175063136858034177

@JonasCh57673093 It would be great if UFOs were actually aliens. I'd take the hit, in a heartbeat!

But if there IS something there, the more bunk that can be pruned away â□□ the closer everyone gets to the truth.

2019-09-20T14:58:55+00:00

https://twitter.com/_/status/1175061783800758272

@EricRWeinstein Ooo, can I call you an intellectual phony and force you to come on my podcast? :)

2019-09-20T14:57:03+00:00

https://twitter.com/_/status/1175061314550423557

@UfoIssue @JonasCh57673093 I'm not debunking here, just pointing out there isn't much to this story. I've always assumed the videos are real Navy videos, showing real unidentified things. The Navy simply confirmed it, and said NOTHING about what the objects actually are.

2019-09-20T14:53:12+00:00

https://twitter.com/_/status/1175060344747610113

@nickpopemod @JonHNodge Hi Nick, that sounds like an interesting counterpoint to my last show with Seth Shostak from SETI. Email mick@mickwest.com and we can set it up.

2019-09-20T04:44:32+00:00

https://twitter.com/_/status/1174907170720104453

@ImChrisMinor @hoaxeye How is it obvious? Fravor didn't take the video. The object in the video moves nothing like the object Fravor described. So how would researching Fravor change anything about the analysis of these three videos?

2019-09-20T04:35:38+00:00

https://twitter.com/_/status/1174904931280490496

@sicktanick @mikeb8637 @tomdelonge @GarryPNolan Thanks for promoting the bird theory! I'd just like to make sure people know: it's only the #2 theory for the Go Fast video, and not the others. I actually think a balloon is more likely, so it would be great if you could also make some balloon memes? https://www.youtube.com/watch?v=PLyEO0jNt6M

2019-09-20T04:26:29+00:00

https://twitter.com/_/status/1174902625180872704

This might explain why the "UFO videos are real!" fluff is trending. It's a story that sounds interesting, but there's actually almost nothing there. But since it SOUNDS good, people share it. Goes viral. Nothing will come of it.

https://twitter.com/michellemanafy/status/1009855993038213121

2019-09-20T04:12:22+00:00

https://twitter.com/_/status/1174899072613773313

@UFOJase @PostDisclosure @Deepneuron @tomdelonge @TTSAcademy @neiltyson How does

it relate to trigonometry?

2019-09-19T23:51:31+00:00

https://twitter.com/_/status/1174833430770503680

@07904567432b @SecretzChannel @AFSUnidentified They are not necessarily something else either. In fact, if what things look like is the only data we have, then it's generally best to go with that, especially if it's unsurprising.

Other data changes things.

2019-09-19T23:49:47+00:00

https://twitter.com/_/status/1174832991970844672

@sardjatwopoinow @zcichy @ufoofinterest @Akam1129 @Deepneuron But why? All someone actually has to do is demonstrate that there's something that actually HAS extraordinary flight characteristics.

2019-09-19T22:55:03+00:00

https://twitter.com/_/status/1174819218757308416

@07904567432b @SecretzChannel @AFSUnidentified I was just saying what it looked like to me. Seemed more likely that alien visitors.

2019-09-19T22:54:10+00:00

https://twitter.com/_/status/1174818997516136448

@BlueValence I can see that itâ□□s just a plane. I donâ□□t invent realities for fun.

2019-09-19T21:52:08+00:00

https://twitter.com/_/status/1174803385893015552

@07904567432b @SecretzChannel @AFSUnidentified Canâ□□t look at everything. I figure if it was legit, it would get a lot of significant interest. Iâ□□ve barely heard of it.

2019-09-19T21:10:44+00:00

https://twitter.com/_/status/1174792967661338624

@BlueValence Yes, different sizes and altitudes. Plus you move the camera rightward near the end, making the small one seem to slow down.

2019-09-19T21:04:51+00:00

https://twitter.com/_/status/1174791486140903424

@BlueValence Various planes.

2019-09-19T20:37:46+00:00

https://twitter.com/_/status/1174784672036835329

@07904567432b @AFSUnidentified @SecretzChannel I've not really looked into it in depth. It does not seem that interesting.

2019-09-19T20:17:37+00:00

https://twitter.com/_/status/1174779599995076608

@slick1ru2 @MykeCole @sarahcruddas @medievalguy You can see the mountains that are even further away.

2019-09-19T19:49:57+00:00

https://twitter.com/_/status/1174772636280221696

@slick1ru2 @MykeCole @sarahcruddas @medievalguy You can see the mountains that are even further away.

2019-09-19T19:48:48+00:00

https://twitter.com/_/status/1174772348240547840

@IvanBuchanJanus @ddeanjohnson @sjn0094 @GalaxyReport @Jay09784691 @AFSUnidentified @paulsanderson @GarryPNolan @nickpopemod @USNavy Yeah, it wasn't a good comparison. But in one case people are describing a physical object they saw fall then later found, not just something they saw in the sky. And it would have remained uncertain if we did not have the actually rocks.

2019-09-19T19:45:43+00:00

https://twitter.com/_/status/1174771572550164480

@IvanBuchanJanus @monsieur_legris @Oswald1160 @NomadNurses @GalacticWorld @GalaxyReport @jehvee_ @GarryPNolan @nickpopemod @USNavy Good job we've got the video and can actually measure it.

You understand the image is not visually rotating, right? So why would the camera rotate to follow the rotation of the object?

2019-09-19T19:43:49+00:00

https://twitter.com/_/status/1174771094395355136

@slick1ru2 @MykeCole @sarahcruddas @medievalguy That is explained here: https://www.youtube.com/watch?v=2bFfuIidCK0

2019-09-19T19:36:12+00:00

https://twitter.com/_/status/1174769176319102976

@slick1ru2 @MykeCole @sarahcruddas @medievalguy This was solved last year. If you want to rebut the explanation, then start by addressing why the plane was in the same position in space as the UFO?

2019-09-19T19:34:33+00:00

https://twitter.com/_/status/1174768761242390528

@ddeanjohnson @sjn0094 @GalaxyReport @Jay09784691 @AFSUnidentified @paulsanderson @GarryPNolan @IvanBuchanJanus @nickpopemod @USNavy Lots of reports of rocks falling out of the sky = rocks falling out of the sky.

Lots of reports of unidentified flying objects = unidentified flying objects.

2019-09-19T19:31:13+00:00

https://twitter.com/_/status/1174767924411633664

@slick1ru2 @MykeCole @sarahcruddas @medievalguy It is reproducible. Go fly an helicopter there while a plane is departing Santiago.

It's also reproducible virtually using the actual radar track of the plane that was in that exact spot at that exact time.

2019-09-19T19:23:29+00:00

https://twitter.com/_/status/1174765978120376320

@slick1ru2 @MykeCole @sarahcruddas @medievalguy Read the article. Watch the videos. This is a solved case.

2019-09-19T19:15:15+00:00

https://twitter.com/_/status/1174763904804614145

@monsieur_legris @IvanBuchanJanus @Oswald1160 @NomadNurses @GalacticWorld @GalaxyReport @jehvee_ @GarryPNolan @nickpopemod @USNavy They rotate in sync. Itâ□□s not a coincidence.

2019-09-19T19:09:57+00:00

https://twitter.com/_/status/1174762569342472192

@ddeanjohnson @Jay09784691 @AFSUnidentified @paulsanderson @GarryPNolan @GalaxyReport @IvanBuchanJanus @nickpopemod @USNavy Iâ□□d be happy to discuss it with them.

2019-09-19T18:58:43+00:00

https://twitter.com/_/status/1174759742033383429

@ddeanjohnson @sjn0094 @GalaxyReport @Jay09784691 @AFSUnidentified @paulsanderson @GarryPNolan @IvanBuchanJanus @nickpopemod @USNavy The difference being the meteorites left physics evidence - impact craters, the meteorites themselves. Also consistent accounts with multiple independent witnesses. Lots of people gave accounts of ghosts and angels too. We don't believe them because there's no physical evidence.

2019-09-19T18:15:32+00:00

https://twitter.com/_/status/1174748875552215040

@sjn0094 @ddeanjohnson @GalaxyReport @Jay09784691 @AFSUnidentified @paulsanderson @GarryPNolan @IvanBuchanJanus @nickpopemod @USNavy Perhaps an example might be helpful?

2019-09-19T17:51:48+00:00

https://twitter.com/_/status/1174742904188702721

@sjn0094 @ddeanjohnson @GalaxyReport @Jay09784691 @AFSUnidentified @paulsanderson @GarryPNolan @IvanBuchanJanus @nickpopemod @USNavy How could the most plausible prosaic explanation be nonsensical? That's a bit of a contradiction.

2019-09-19T17:50:56+00:00

https://twitter.com/_/status/1174742687234215936

@carland27488094 @AFSUnidentified @Jay09784691 @Oswald1160 @SpaceDadOrbis @paulsanderson @GarryPNolan @GalaxyReport @IvanBuchanJanus @nickpopemod @USNavy @joerogan No fleet visible in the video, so I don't know what they were referring to. My first guess would be false radar tracks, second would be a flight of pelicans in formation. But that's all just guess based on one off-the-cuff remark.

2019-09-19T17:44:27+00:00
https://twitter.com/_/status/1174741054655848449
@paulsanderson @AFSUnidentified @Jay09784691 @Oswald1160 @SpaceDadOrbis @GarryPNolan @GalaxyReport @IvanBuchanJanus @nickpopemod @USNavy @joerogan What exactly did he say?
And in this video, the motion is nothing at all like the erratic high-speed motion Fravor described. In the video it does not move.

2019-09-19T17:25:03+00:00
https://twitter.com/_/status/1174736172477599744
@ddeanjohnson @GalaxyReport @Jay09784691 @AFSUnidentified @paulsanderson @GarryPNolan @IvanBuchanJanus @nickpopemod @USNavy One should consider all possibilities. Make a list. Sort the list into order. See what's near the top and work with that, but don't remove things from the list.
Also, don't avoid explanations that involve coincidences. They happen.

2019-09-19T17:06:51+00:00

https://twitter.com/_/status/1174731592582909952
@JetEnthusiast All the Navy's comments are here. Summary, it's unidentified, Navy is looking into it, but won't tell you what it is due to automatic classification of military stuff.
https://www.metabunk.org/are-the-navy-ufos-real-or-just-in-the-low-information-zone.t10921/

2019-09-19T17:05:13+00:00
https://twitter.com/_/status/1174731182367313920
@BrianRoemmele @earthdoggo @denise4607 They both are Sept 18, Las Vegas.
(Henderson is a part of Greater Las Vegas.)

2019-09-19T16:57:44+00:00
https://twitter.com/_/status/1174729298659311616
@JetEnthusiast Elizondo had the videos, probably as part of his job which involved declassifying things. He personally had clearance to view them. He emailed some people and got a DD-1910 form with a "Cleared for Open Publication" stamp on it, but no signature
Navy thinks it was done wrongly.

2019-09-19T16:54:03+00:00
https://twitter.com/_/status/1174728371915198464
@ddeanjohnson @Jay09784691 @AFSUnidentified @paulsanderson @GarryPNolan @GalaxyReport @IvanBuchanJanus @nickpopemod @USNavy Yeah, loss of situational awareness is a problem with military pilots. There's also a variety of cognitive illusions, like "giant hand" that most pilots experience.

Once a military pilot flew into the ground because he did not realize he was inverted.

@AFSUnidentified @Jay09784691 @Oswald1160 @SpaceDadOrbis @paulsanderson @GarryPNolan @GalaxyReport @IvanBuchanJanus @nickpopemod @USNavy @joerogan You mean the one that took the video? Of course I know that. A huge issue here is that the plane that took the video was not involved in the TicTac incident.

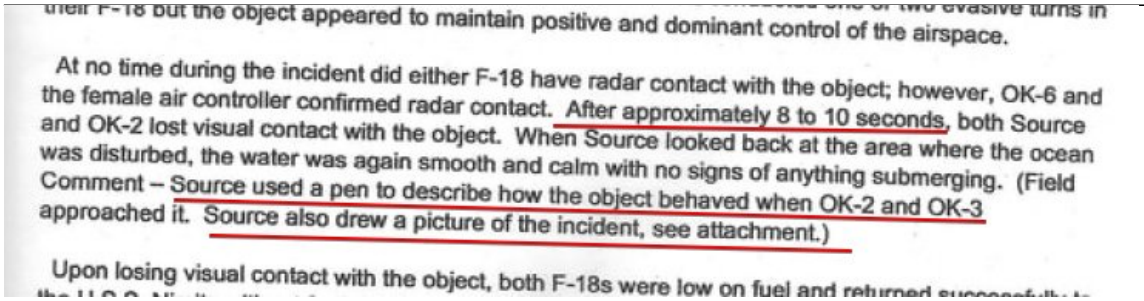
2019-09-19T15:59:54+00:00

https://twitter.com/_/status/1174714741001875456

@Jay09784691 @AFSUnidentified @paulsanderson @GarryPNolan @GalaxyReport @IvanBuchanJanus @nickpopemod @USNavy Why not both? Or all three? Maybe also a canopy glare?

Don't you think it's odd that all we have are these vague verbal descriptions? At one point "Source" drew some diagrams. Where are they? Where are Fravors diagrams? (also, what's the 8-10 seconds "after"?) http://pbs.twimg.com/media/EE1srYDUwAAJo8d.jpg

---



their F-18 but the object appeared to maintain positive and dominant control of the airspace.

At no time during the incident did either F-18 have radar contact with the object; however, OK-6 and the female air controller confirmed radar contact. After approximately 8 to 10 seconds, both Source and OK-2 lost visual contact with the object. When Source looked back at the area where the ocean was disturbed, the water was again smooth and calm with no signs of anything submerging. (Field Comment – Source used a pen to describe how the object behaved when OK-2 and OK-3 approached it. Source also drew a picture of the incident, see attachment.)

Upon losing visual contact with the object, both F-18s were low on fuel and returned

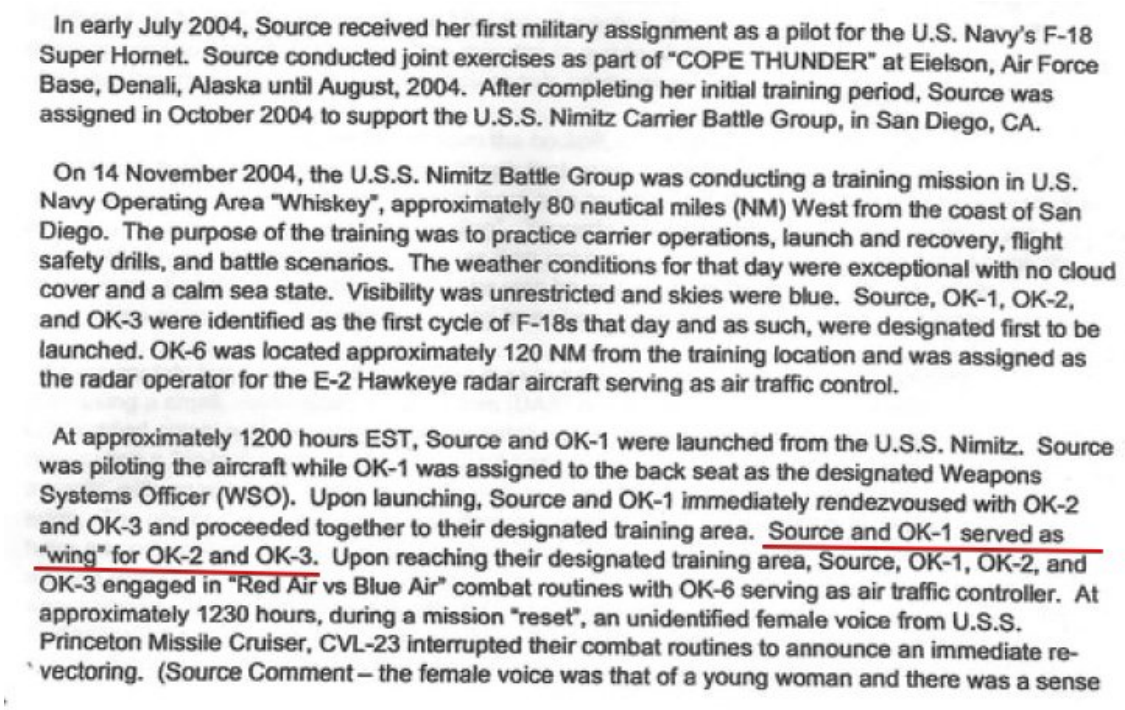
2019-09-19T15:51:57+00:00

https://twitter.com/_/status/1174712741128355841

@Oswald1160 @SpaceDadOrbis @Jay09784691 @AFSUnidentified @paulsanderson @GarryPNolan @GalaxyReport @IvanBuchanJanus @nickpopemod @USNavy @joerogan There were two aircraft. Fravor is one pilot OK-2, the female pilot of the other plane is "Source"
http://pbs.twimg.com/media/EE1qnlRU4AIpldf.jpg



In early July 2004, Source received her first military assignment as a pilot for the U.S. Navy's F-18 Super Hornet. Source conducted joint exercises as part of "COPE THUNDER" at Eielson, Air Force Base, Denali, Alaska until August, 2004. After completing her initial training period, Source was assigned in October 2004 to support the U.S.S. Nimitz Carrier Battle Group, in San Diego, CA.

On 14 November 2004, the U.S.S. Nimitz Battle Group was conducting a training mission in U.S. Navy Operating Area "Whiskey", approximately 80 nautical miles (NM) West from the coast of San Diego. The purpose of the training was to practice carrier operations, launch and recovery, flight safety drills, and battle scenarios. The weather conditions for that day were exceptional with no cloud cover and a calm sea state. Visibility was unrestricted and skies were blue. Source, OK-1, OK-2, and OK-3 were identified as the first cycle of F-18s that day and as such, were designated first to be launched. OK-6 was located approximately 120 NM from the training location and was assigned as the radar operator for the E-2 Hawkeye radar aircraft serving as air traffic control.

At approximately 1200 hours EST, Source and OK-1 were launched from the U.S.S. Nimitz. Source was piloting the aircraft while OK-1 was assigned to the back seat as the designated Weapons Systems Officer (WSO). Upon launching, Source and OK-1 immediately rendezvoused with OK-2 and OK-3 and proceeded together to their designated training area. Source and OK-1 served as "wing" for OK-2 and OK-3. Upon reaching their designated training area, Source, OK-1, OK-2, and OK-3 engaged in "Red Air vs Blue Air" combat routines with OK-6 serving as air traffic controller. At approximately 1230 hours, during a mission "reset", an unidentified female voice from U.S.S. Princeton Missile Cruiser, CVL-23 interrupted their combat routines to announce an immediate re-vectoring. (Source Comment – the female voice was that of a young woman and there was a sense

https://twitter.com/_/status/1174704097858994176

@Jay09784691 @AFSUnidentified @paulsanderson @GarryPNolan @GalaxyReport @IvanBuchanJanus @nickpopemod @USNavy A bot would not be above the disturbance, but if there was a boat some distance from it that he momentarily misinterpreted as a flying object,

then it might have seemed like it was above the disturbance.
Consider all possibilities. Keep an open mind.

2019-09-19T15:15:22+00:00
https://twitter.com/_/status/1174703536090693632
@pixelpiinc @mikeb8637 @tomdelonge @TTSAcademy You seem to be mistaking a well-poisoning meme for something I actually said?

Bird is a possible, but secondary, less likely, explanation for Go Fast (which was not hot, and was at 13,000 feet). It's not possible for Flir1/Nimitz or Gimbal.

2019-09-19T15:09:35+00:00
https://twitter.com/_/status/1174702081774505984
@Jay09784691 @AFSUnidentified @paulsanderson @GarryPNolan @GalaxyReport @IvanBuchanJanus @nickpopemod @USNavy
http://pbs.twimg.com/media/EE1hS09U4AA4DhB.png

http://pbs.twimg.com/media/EE1hS09U4AA4DhB.png

information was the USS Princeton's SPY-1 radar. According to CDR Fravor the first indication he had of the unknown contact was a visual of a disturbance on the water below the AAV. As he scanned the area he gained a visual on the object. It is important to note that when asked to describe the disturbance on the water he stated that it was localized underneath the object, did not appear as a trail or wake, and looked like frothy waves and foam almost as if the water was boiling.

https://twitter.com/_/status/1174695328693596160
@Soriluin @naoehogui 50%? I think you mean "indeterminate"

2019-09-19T14:42:15+00:00

https://twitter.com/_/status/1174695200276529157

@adrian_probert @AFSUnidentified @michaelsquest6 A bird has only been suggested as the #2 possible explanation for the "Go Fast" video. The other two videos are not birds, and nobody I know of has ever suggested otherwise.

And the #1 explanation for Go Fast is a balloon. #1 for the other is a distant jet.

2019-09-19T14:40:01+00:00

https://twitter.com/_/status/1174694637958782977

@SpaceDadOrbis @Jay09784691 @AFSUnidentified @paulsanderson @GarryPNolan @GalaxyReport @IvanBuchanJanus @nickpopemod @USNavy @joerogan "Pretty sure?" based on what? Do you know how common this is? What time of year it happens? How much Fravor flew? How much time he spent observing the water surface?

2019-09-19T14:37:34+00:00

https://twitter.com/_/status/1174694021450674176

@MATRA_ @hoaxeye We don't know what was seen on the radar. The audio says "there's a whole fleet of them", but it's hard to correlate one thing with the other without knowing range and heading.

2019-09-19T14:34:56+00:00

https://twitter.com/_/status/1174693359199367168

@nasty_dipsy @hoaxeye Gimbal isn't a balloon, it's something with a hot engine, like a jet. But Go-Fast might be - although the constant altitude would suggest it's not a normal working weather balloon (designed to rise rapidly though that altitude)

2019-09-19T14:32:23+00:00

https://twitter.com/_/status/1174692720490799104

@SpaceDadOrbis @AFSUnidentified @paulsanderson @GarryPNolan @GalaxyReport @IvanBuchanJanus @nickpopemod @USNavy There's only one such report. Graves, IIRC, said the majority of sightings were just distant lights.

2019-09-19T14:31:05+00:00

https://twitter.com/_/status/1174692391502131202

@_jraza @IvanBuchanJanus @GarryPNolan @nickpopemod @GalaxyReport @USNavy Close range? The closest any of the videos gets is about 4 miles.

UFO's have be "observed" by eyewitness much closer for decades. Some say they have even been INSIDE them. What's lacking is close range video evidence. This isn't it.

2019-09-19T14:28:06+00:00

https://twitter.com/_/status/1174691641359306754

@GalaxyReport They are not releasing anything because, as the Navy said, "Any report generated as a result of these investigations will, by necessity, include classified information on military operations. Therefore, no release of information to the general public is expected."

2019-09-19T14:26:07+00:00

https://twitter.com/_/status/1174691139930284032

@JetEnthusiast It needs the plane at the right distance, and the focus tweaked just so, and for the pilot to lock on to a far distant plane at full zoom. So not all the time, but I'm sure there are other examples. Military video is classified by default though. The Navy will figure it out.

2019-09-19T14:23:29+00:00

https://twitter.com/_/status/1174690479197360135

@chasekuertz None of the videos do.

2019-09-19T14:23:07+00:00

https://twitter.com/_/status/1174690385521729536

@Rett94291220 @rogerglassel @nickpopemod It's easy to make essentially disposable surveillance drones with a range of many miles. So that would be something the military would be concerned about. Here's a 25 mile flight with parts you can get on amazon for $1,5000. Hence Navy interest in UAPs.

https://www.youtube.com/watch?v=dxj8JwdQ7Lk&feature=youtu.be&t=1221

2019-09-19T14:17:28+00:00

https://twitter.com/_/status/1174688964923592704

@Jay09784691 @AFSUnidentified @paulsanderson @GarryPNolan @GalaxyReport @IvanBuchanJanus @nickpopemod @USNavy "Whale" is one possible explanation for the disturbance in the water that Fravor saw. It fits the location.

https://www.youtube.com/watch?v=Glt-W_5vw54&feature=youtu.be&t=46

2019-09-19T14:13:11+00:00

https://twitter.com/_/status/1174687888065191936

@SpaceDadOrbis @AFSUnidentified @paulsanderson @GarryPNolan @GalaxyReport @IvanBuchanJanus @nickpopemod @USNavy Sounds like something totally different to what is showing in any of the videos.

2019-09-19T14:11:28+00:00

https://twitter.com/_/status/1174687453229137920

@BlueValence It varies - a lot of them are just stylized conventions that evolved over time (like halos, for example). Note they were also depicting all kinds of supernatural things in paintings back then, and there's NEVER been those things.

2019-09-19T14:04:02+00:00

https://twitter.com/_/status/1174685585648185345

@Soriluin @naoehogui Who do I insult with my little illustration? Are you insulted?

2019-09-19T14:02:52+00:00

https://twitter.com/_/status/1174685288452382721

@naoehogui But the entire point of all the excitement around the current navy statements seems to boil down (for many outlets) to "UFOs are REAL!!!" - so I think it's fair to ask what this actually means. Millions of people are being clickbaited by this.

2019-09-19T14:00:19+00:00

https://twitter.com/_/status/1174684647617257472

@_jraza @IvanBuchanJanus @GarryPNolan @nickpopemod @GalaxyReport @USNavy No. The

Navy describes UAP as "sightings/observations of unauthorized/unidentified aircraft/objects that have been observed entering/operating in [military] airspace "

They say nothing about the craft being "unconventional"

2019-09-18T22:08:09+00:00
https://twitter.com/_/status/1174445029785399296
@wilcher_grant "Unidentified" does not mean "no idea".
I see something in the sky. Is a bird? Is it a plane? Is it a balloon? I have several ideas. I can even rank them by the most likely (plane, bird, balloon, something else). But it's not identified.
http://pbs.twimg.com/media/EEx3FxAU4AAYi1p.jpg

2019-09-18T22:05:22+00:00

https://twitter.com/_/status/1174444326316675073

@SecretzChannel Nobody took a photo?

2019-09-18T22:04:44+00:00

https://twitter.com/_/status/1174444169168748544

@edwardcurrent Also the Pentagon, the impact event was low information in the visual record, with just a couple of low resolution video. So theories like "cruise missiles" leapt into the the void.

Of course there was lots of other information, but visual is key for most people.

2019-09-18T21:52:09+00:00

https://twitter.com/_/status/1174441001869402112

@GalaxyReport No, it means that UFOs somehow magically are always just a bit further away than the range of whatever camera you happen to have with you. Lots of "UFO" photos that are very close (like mine) that would be resolved with a longer lens.

Should we discount all photos <2000mm?

2019-09-18T21:49:21+00:00

https://twitter.com/_/status/1174440295716376576

@GalaxyReport Gimbal? Have you see my gimbal explanation videos?

https://www.youtube.com/playlist?list=PL-4ZqTjKmhn4FcIJPKnJVGskuXDjHnTOS

2019-09-18T21:45:06+00:00

https://twitter.com/_/status/1174439229499199488

@GalaxyReport I have a superzoom camera too. It will give similar photos of birds if the birds are further away. The low information zone gets more distant as zoom power increases.

2019-09-18T21:42:42+00:00

https://twitter.com/_/status/1174438625422888960

@wilcher_grant They did not say they had no idea. They said they classed them as unidentified, and there will be an investigation, and when it is finished they won't tell you what the result is. So if they have started working on it, they probably have some reasonable hypotheses.

2019-09-18T21:41:06+00:00

https://twitter.com/_/status/1174438221343645696

@AFSUnidentified @michaelsquest6 I have no argument with what the Navy spokesman says. It conflicts in no way with my hypotheses.

2019-09-18T21:40:31+00:00

https://twitter.com/_/status/1174438075453198336

@LiberalForLife3 No, here I am focussing on UFOs. You think that's "low hanging fruit?" You should talk to some of the UFO fans.

Also, 9/11.

But I DO focus on things that can be subject to analysis, to clean up misunderstandings where possible.

2019-09-18T21:37:47+00:00

https://twitter.com/_/status/1174437384823267329

@MusicAndTruth @DeepStateDan @AFSUnidentified @IvanBuchanJanus @GarryPNolan @nickpopemod @GalaxyReport @USNavy The odds? The odd of something like this happening eventually are very high. What are the odds of winning the lottery? Someone does that. What are the odd of ANY strange coincidence? Happens all the time!

2019-09-18T21:35:35+00:00

https://twitter.com/_/status/1174436833352007680

UFOs are "real!" I just took this photo of a flying object near my house. It's black + white aura. Possibly an alien spacecraft with an spacetime warp field?

Or a bird with in-camera sharpening?

Can't say for sure from this photo, so it's a "REAL" UFO.

What does "real UFO" mean? http://pbs.twimg.com/media/EExvoRPU0AECS5G.jpg

---

https://twitter.com/_/status/1539645212372324353
@AAWSAP @travisstaylor1 I'm saying that if he thinks those are not stars then he's demonstrably wrong.

Qualifications have zero to do with that.

2022-06-22T15:11:30+00:00
https://twitter.com/_/status/1539627145030299648
@travisstaylor1 @Brian314159265 @ThomasWinterton @BrandonFugal @SWRDragon @KalebBench So what is making all the stars have a triangular shape?

2022-06-22T15:06:27+00:00
https://twitter.com/_/status/1539625874319757312
@rip_and_dipp @DingoRabid @caitgaist @Lewis_Brian1 The July 17 and July 30 videos, that have the snoopie team leader talking, show stars. The audio on the video seems to indicate they thought they were drones. The videos were shot two weeks apart. Those are all inarguable facts.

2022-06-22T15:01:31+00:00
https://twitter.com/_/status/1539624629559369728
@Daily_Sinner All but one of the triangles you see are stars.

Any points of light you see (when zoomed in enough to see the triangle shapes) are just noise that changes from frame to frame.

2022-06-22T14:52:59+00:00
https://twitter.com/_/status/1539622483338219522
@KilliK69 So you think that Knapp totally misrepresented Taylor?

Did Knapp also make this slide? http://pbs.twimg.com/media/FV3WZD_UEAEvUt1.jpg

George Knapp 3:13

Taylor and the taskforce spent three years analyzing the 144 incidents, including dozens of bizarre objects that buzzed multiple Navy ships in 2019. Some of them were spheres that swarmed and kept pace with the warships. Others appeared to be greenish pyramids. Taskforce members were stunned to hear a navy official tell the congressional hearing last month that all of these were, quote, drones as if the mystery had been sown. Someone had to disregard the work of the task force to make that claim.

Travis Taylor 3:46

We had a lot of sensor data on some of them, that we couldn't determine what they are. I mean, if it's our near peers doing it, that scary, but at the same time, we also never found any evidence that it was our near peers doing it.

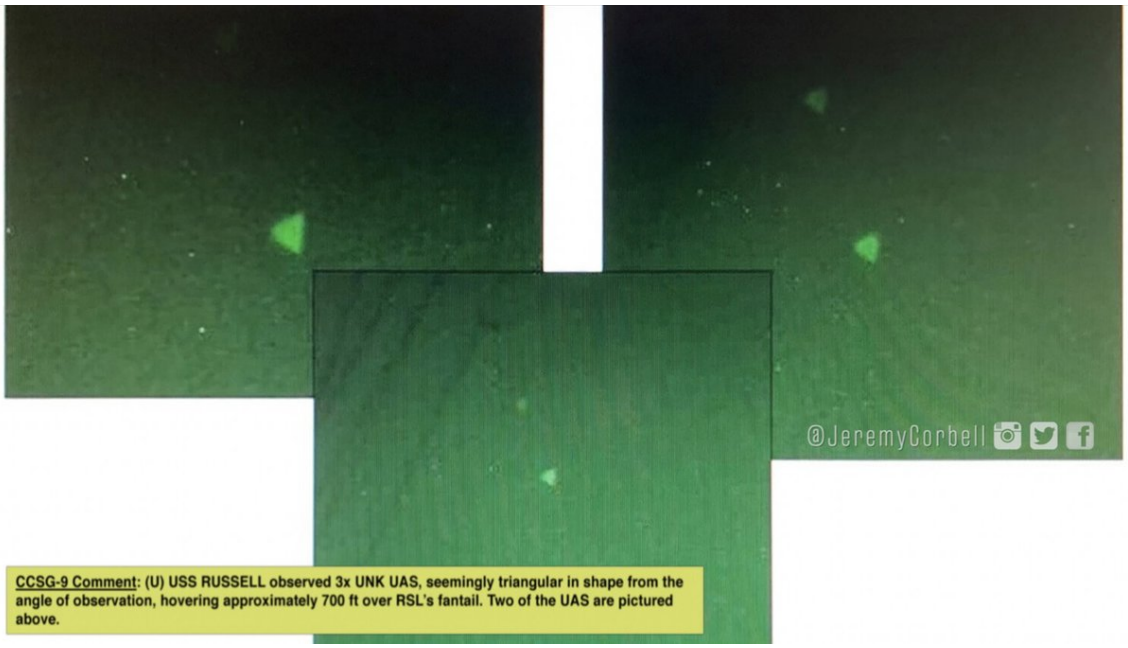
George Knapp 4:01

The drone conclusion was reached after the UAP taskforce was done and before the new UFO program AIOMSG even started. So who did it? George Knapp, eight news now.

Speaker 2 4:13

Dr. Taylor went into much greater detail about why the drone scenario just falls short of explaining the 2019 UFO encounters, and also why so many UFO videos appear to be fuzzy

http://pbs.twimg.com/media/FV3WUNfUYAIdjPx.jpg



http://pbs.twimg.com/media/FV3WZD_UEAEvUt1.jpg

2022-06-22T11:17:26+00:00

https://twitter.com/_/status/1539568237586681856

@uapstuditaly @ufo_studyita @mike82uapitaly @travisstaylor1 They seem unaware that the green triangles were nearly all stars.

Why is that?

2022-06-22T11:16:09+00:00

https://twitter.com/_/status/1539567915929702400

@ASYSOFFICIAL I'm explaining what the video shows.

I don't know what happened off camera.

2022-06-22T11:15:43+00:00

https://twitter.com/_/status/1539567807859347456

If you want to replicate (or refute) the star analysis of the green triangle videos, make sure you use the actual videos from the DoD, and not the degraded YouTube versions.

https://www.metabunk.org/threads/pyramid-ufos-in-night-vision-footage-maybe-bokeh.11695/page-7#post-272484

2022-06-22T11:13:19+00:00

https://twitter.com/_/status/1539567203543969792

@ASYSOFFICIAL Sensors won't change the stars. This video shows stars.

2022-06-22T11:05:27+00:00

https://twitter.com/_/status/1539565222855225344

@ADelarge60 @DeepImpcat Where did he say it? Link?

2022-06-22T11:03:05+00:00

https://twitter.com/_/status/1539564628350341121

@Peter50751945 @travisstaylor1 Everything is possible.

But this is what we've got.

2022-06-22T10:50:26+00:00

https://twitter.com/_/status/1539561445255282688

@ADelarge60 @DeepImpcat How do you know this?

2022-06-22T10:49:00+00:00

https://twitter.com/_/status/1539561084679401473

@ADelarge60 @DeepImpcat If they misidentify stars, why not planes?

Radar is only useful if you know where to look. If you think there's something 700 feet up, then a plane 10 miles away could get ignored.

2022-06-22T10:47:52+00:00

https://twitter.com/_/status/1539560796820078592

@ADelarge60 @DeepImpcat They saw multiple drones. They did not bring any down (that they mentioned)

2022-06-22T09:56:04+00:00

https://twitter.com/_/status/1539547761569214464

@ADelarge60 @JeremyCorbell @Condorman6 @PacificBasin @USNavCNO What radar returns? Are they at the same time and location?

2022-06-22T09:46:04+00:00

https://twitter.com/_/status/1539545245238538240

@ADelarge60 @JeremyCorbell @Condorman6 @PacificBasin @USNavCNO They vary. At least two people replicated it with NV they personally owned.

@mhmanley No, I'm saying that in the green triangle videos, all but one of the green triangles are actually stars. Verifiable named stars.

One, the "flasher," might be a drone but looks more like a plane to me.

2022-06-22T05:30:40+00:00
https://twitter.com/_/status/1539480972734787585
@RoGin1230 @realrightmemes @MiddleOfMayhem @travisstaylor1 One might be a drone. It looks more like a plane to me. The rest are stars. The two visible in the video that KLAS showed are stars.

2022-06-22T05:24:20+00:00
https://twitter.com/_/status/1539479377875914753
@RoGin1230 @realrightmemes @MiddleOfMayhem @travisstaylor1 Yeah, that's the star Okab. It's not moving.

Question for @travisstaylor1 - as chief scientist for the UAPTF, why did they never figure out that these two triangles (showcased on KLAS 8 News Now today) are the stars Tarazed and Altair? http://pbs.twimg.com/media/FV1LFjfVsAEKW0n.jpg

https://twitter.com/_/status/1539464095681769474

@RamonDe17166977 Not explicitly. I'm just explaining it, as it's in the video and someone might question it. It's not a star.

2022-06-22T04:16:20+00:00

https://twitter.com/_/status/1539462263873994753

@UFOApostle One blinks, that's probably a plane, maybe the drone. It's not a pyramid - that's been known for a year.

The rest are stars. All the ones they showed in this clip are stars. That's been known for a week.

https://www.youtube.com/watch?v=pbxtTEWczRk

2022-06-22T04:12:20+00:00

https://twitter.com/_/status/1539461257505280001

@RamonDe17166977 I mean that one of the lights that shows up as a triangle is a light that is fixed to the ship. You can tell because it moves with the ship, not with the stars.

2022-06-22T04:09:52+00:00

https://twitter.com/_/status/1539460639399153666

Is this a joke?

Doubling down on the "green pyramids"? Showing footage of what we know now, 100%, to be stars, and insisting they are some kind of flying pyramids?

If this is actually representative of the UAPTF, then it's no wonder they failed to solve most of the cases. https://twitter.com/UAPJames/status/1539418849333977090

https://twitter.com/_/status/1539287280744923136
@Robin081564 @Channa_Sr So this would have to happen twice, and then some.

Jul 17 - someone films four stars while some talks about four drones

Jul 30 - someone films a star while the same guy talks about a drone.

Later - the July 17 video is described by the UAPTF as drones.

2022-06-21T16:23:17+00:00
https://twitter.com/_/status/1539282822149550080
@markocheese @Funkadelick2 Yeah, here we have the Snoopie team leader, a "trained observer" seeming to mistakenly identify stars are drones.
And then the UAPTF says they are drones
Then Scott Bray says they are drones.
(And Jeremy says they are flying Pyramids)
But they were all stars. All except one.

2022-06-21T16:14:38+00:00
https://twitter.com/_/status/1539280641405071360

https://twitter.com/_/status/1538937745485139970

@JeremyCorbell I know that Pentagon spokesperson Gough did a general confirmation of the Green Triangle video and some photos (the Batman balloon, etc), but not specifically the green-triangle slide.

I have asked her for clarification. http://pbs.twimg.com/media/FVtnXlmUAAIAMPS.jpg

---

(CNN) — The Defense Department has confirmed that leaked photos and video of "unidentified aerial phenomena" taken in 2019 are indeed legitimate images of unexplained objects.

Photos and videos of triangle-shaped objects blinking and moving through the clouds were taken by Navy personnel, Pentagon spokeswoman Sue Gough said in a statement to CNN. She also confirmed that photos of three unidentified flying objects -- one "sphere" shaped, another "acorn" shaped and one characterized as a "metallic blimp" -- were also taken by Navy personnel.

"As we have said before, to maintain operations security and to avoid disclosing information that may be useful to potential adversaries, DOD does not discuss publicly the details of either the observations or the examinations of reported incursions into our training ranges or designated airspace, including those incursions initially designated as UAP," Gough said.

She also said that the Unidentified Aerial Phenomena Task Force, created in August to investigate UFO sightings observed by the military, has "included these incidents in their ongoing examinations."

The Navy photos and videos were published by Mystery Wire and on Extraordinary Beliefs' website last week but had been circulating online since last year.

http://pbs.twimg.com/media/FVtnXlmUAAIAMPS.jpg
2022-06-20T17:28:30+00:00
https://twitter.com/_/status/1538936845437792256
@kimball_23 @Lynda_Katerra I'm also curious as to what these "analysis companies" are. Can you give an example of one?

2022-06-20T17:26:32+00:00
https://twitter.com/_/status/1538936350409273345
@kimball_23 @Lynda_Katerra Which thing are you referring to?

2022-06-20T17:25:11+00:00
https://twitter.com/_/status/1538936008254709760
@kimball_23 @Lynda_Katerra I'm not mocking anyone. I'm presenting hypotheses that explain some events.

I'd be happy to talk to any military witness entirely off the record to show I'm on the level. YOu can pass on my email address, mick@mckwest.com, and my DMs are open.

2022-06-20T17:15:11+00:00
https://twitter.com/_/status/1538933493295554560
@nexisfan @JeremyCorbell @ufogarage And in this video, where we see the lights are 100% stars, we see minor differences in orientation across the frame. 00:20 for example.
http://pbs.twimg.com/ext_tw_video_thumb/1538933053761851395/pu/img/gKILvrzFBpDB12Ro.jpg

2019-09-18T20:46:32+00:00
https://twitter.com/_/status/1174424488789737472
And back to the Gimbal video, the rotation of the camera is a bit confusing, and I describe it in depth here: https://www.youtube.com/watch?v=4X1PRDbtiF0

2019-09-18T20:38:23+00:00
https://twitter.com/_/status/1174422437846376448
@paul_sailer I only really use sine(a) = opposite/hypotenuse. YouTube should be able to explain that for you :)

2019-09-18T20:37:05+00:00
https://twitter.com/_/status/1174422108681621504
@jehvee_ @GalaxyReport @GalacticWorld @IvanBuchanJanus @GarryPNolan @nickpopemod @USNavy I think it's more likely a balloon. But if it's a bird, it probably has around a 6 foot wingspan (in the video I calculate the size based on FOV) so a large soaring seabird like an albatross.

2019-09-18T20:35:15+00:00
https://twitter.com/_/status/1174421648520302592
And the "Flir1" video (AKA Nimitz Tic-Tac), while it has the most interesting backstory, is the least interesting of all the videos. Probably just a very distant plane.
https://youtu.be/s1oTg0kxzDs

2019-09-18T20:32:55+00:00
https://twitter.com/_/status/1174421062689255424
The "Go Fast" video is also less interesting than it seems when you do the math. It's actually a fairly slow object, and not really very large. Might even be a balloon.

https://youtu.be/PLyEO0jNt6M

2019-09-18T20:31:39+00:00

https://twitter.com/_/status/1174420744714899456

One thing that was touted as "unexplained" has been very well explained. The "aura" around the gimbal video isn't some space warp. It's just ordinary image sharpening.

https://youtu.be/r119JWI04Ls

2019-09-18T20:30:26+00:00

https://twitter.com/_/status/1174420435531812864

The recent flurry of interest in the Navy's acknowledgment of some videos of unidentified objects skims over the fact than there are actually some reasonable explanations for these videos. Here's the one most often shown, the rotating Gimbal video.

https://youtu.be/ka_bX9Hx1H0

2019-09-18T20:22:52+00:00

https://twitter.com/_/status/1174418533725261824

@GalaxyReport @GalacticWorld @jehvee_ @IvanBuchanJanus @GarryPNolan @nickpopemod @USNavy It's not convenient, that's just what it is. I look at the Go Fast video, I came up with what I thought was a reasonably hypothesis, I did the math. Here's the math:

https://www.youtube.com/watch?v=PLyEO0jNt6M

2019-09-18T20:18:49+00:00

https://twitter.com/_/status/1174417512290586624

@GalaxyReport @GalacticWorld @jehvee_ @IvanBuchanJanus @GarryPNolan @nickpopemod @USNavy Like I said, the bird/balloon hypothesis is just for the Go Fast Video.

2019-09-18T20:05:39+00:00

https://twitter.com/_/status/1174414202024259584

@GalacticWorld @GalaxyReport @jehvee_ @IvanBuchanJanus @GarryPNolan @nickpopemod @USNavy The bird hypothesis only applies to the Go Fast video, nothing else. Even there I think a balloon is more likely. The other observations you mention are from another incident years earlier.

2019-09-18T20:03:41+00:00

https://twitter.com/_/status/1174413703095013376

@BlueValence @IvanBuchanJanus @GalaxyReport @gammaraybeam @AFSUnidentified @GarryPNolan @nickpopemod @USNavy What if it doesn't?

2019-09-18T20:03:08+00:00

https://twitter.com/_/status/1174413566482374657

@rogerglassel @nickpopemod One thing the Navy would be concerned about would be unfriendly drones launched from submarines. Seems inevitable that enemy drone would probe operational airspace, be seen but not identified. But ANY investigation would be classified, even if it turned out to be a ballon.

2019-09-18T19:42:56+00:00

https://twitter.com/_/status/1174408484110008320

@apicasefiles @paulsanderson @GarryPNolan @GalaxyReport @AFSUnidentified @IvanBuchanJanus @nickpopemod @USNavy And you CAN identify unknown objects. The process is called "discovery". The first time someone saw an elephant it was an unknown object . And then it wasn't.

2019-09-18T19:38:17+00:00

https://twitter.com/_/status/1174407311042859008

@IvanBuchanJanus @GalaxyReport @gammaraybeam @AFSUnidentified @GarryPNolan @nickpopemod @USNavy What's the point of your "what if?" We can only go by the evidence we have. What if there's evidence that the Queen is an alien? It's a pointless hypothetical.

2019-09-18T19:36:09+00:00

https://twitter.com/_/status/1174406774285189121

@apicasefiles @paulsanderson @GarryPNolan @GalaxyReport @AFSUnidentified @IvanBuchanJanus @nickpopemod @USNavy What is this, Platonic classification time? You can take a clear high-resolution photo of an unknown object. Then it's identified as the thing in the photo. But UFO's have been curiously getting further and further away every year. People have big zooms. https://youtu.be/LhQlwKX3LQA?t=27

2019-09-18T19:28:30+00:00

https://twitter.com/_/status/1174404848843800576

@rory_blyth Look at their channel. They are very much still a paranormal thing.

2019-09-18T19:25:20+00:00

https://twitter.com/_/status/1174404053746339840

@GalaxyReport @gammaraybeam @IvanBuchanJanus @AFSUnidentified @GarryPNolan @nickpopemod @USNavy It's quite easy to get clear FLIR video, just fly closer.

2019-09-18T19:24:34+00:00

https://twitter.com/_/status/1174403862809038849

@paulsanderson @GarryPNolan @GalaxyReport @AFSUnidentified @IvanBuchanJanus @nickpopemod @USNavy Unidentified objects will remain unidentified is they are too far away to identify, regardless of what they actually are. Jet, Balloons, Birds, Drones, Flying Saucers, Whales, etc.

2019-09-18T18:19:19+00:00

https://twitter.com/_/status/1174387441202892800

@GalaxyReport @IvanBuchanJanus @AFSUnidentified @GarryPNolan @nickpopemod @USNavy Nobody is saying that there's no unidentified flying objects. I see them all the time. The fly just far enough away that you can't identify them.

2019-09-18T17:40:52+00:00

https://twitter.com/_/status/1174377765786673152

@GarryPNolan @GalaxyReport @AFSUnidentified @IvanBuchanJanus @nickpopemod @USNavy Why? The Navy hasn't eliminated any possibilities or even released any analysis at all. "Unidentifed" does not mean the same as "not an albatross" or "not a balloon"

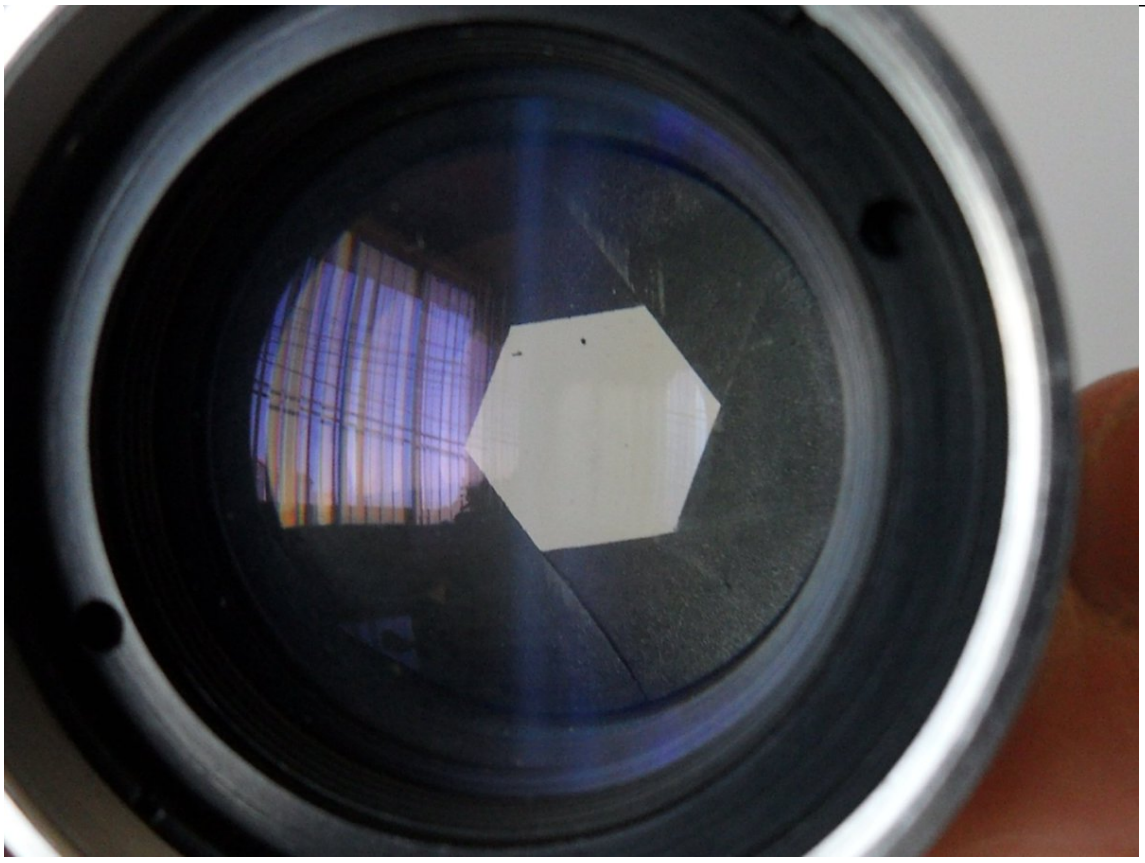
2019-09-18T17:20:45+00:00

https://twitter.com/_/status/1174372703148445696
@GalaxyReport @AFSUnidentified @IvanBuchanJanus @GarryPNolan @nickpopemod @USNavy They are already UFOs.

2019-09-18T17:20:18+00:00
https://twitter.com/_/status/1174372588555866112
@kimberley82h @mattjamesmedium @ni_skies @jconnor19662 @smit_anja @FLATEARTH111 @TheFlatEartherr @fergus_ezra The sun is always white (except for sunrise and sunset). Look at a sheet of white paper in sunlight. If the sun was giving off a yellow light, then the paper would look yellow. It looks white because sunlight is white.

2019-09-18T17:18:56+00:00
https://twitter.com/_/status/1174372243322753024
@IvanBuchanJanus @AFSUnidentified @GarryPNolan @nickpopemod @GalaxyReport @USNavy But the camera's DON'T get too close. That's the point. What you see is what you would expect to see of an object at that distance. If you were close you would see clearly what it is.
But the UFO's stay just beyond the range of whatever camera you are using.

2019-09-18T17:16:54+00:00
https://twitter.com/_/status/1174371733198913536
@kimberley82h @mattjamesmedium @ni_skies @jconnor19662 @smit_anja @FLATEARTH111 @TheFlatEartherr @fergus_ezra The hexagon shape comes from the aperture of the camera and glare. If you use a solar filter to view the sun you can see it's round.
http://pbs.twimg.com/media/EEw0vX5U8AE6ynK.jpg



http://pbs.twimg.com/media/EEw0vX5U8AE6ynK.jpg
2019-09-18T17:15:04+00:00

https://twitter.com/_/status/1174371272588845056

@GalaxyReport @AFSUnidentified @IvanBuchanJanus @GarryPNolan @nickpopemod @USNavy Why?

2019-09-18T17:13:06+00:00

https://twitter.com/_/status/1174370774334857217

@CryptGold @michiokaku Simple logic based on a false premise. Kaku said the VIDEOS showed "videotaped objects executing things that are impossible with ordinary commercial and military aircraft." This is wrong, and hence his conclusion based on this is also wrong.

2019-09-18T17:11:39+00:00

https://twitter.com/_/status/1174370410638348288

@CryptGold @michiokaku The navy spokesman said:

â□□The Navy has not publicly released characterizations or descriptions, nor released any hypothesis or conclusions, in regard to the objects contained in the referenced videos.â□□

2019-09-18T17:10:13+00:00

https://twitter.com/_/status/1174370048837709826

@buffcommacu @GarryPNolan @RahulRa94154451 @UAP1949 @Deepneuron He can look that up in Wikipedia. I was explaining why Rahul's statement was wrong.

2019-09-18T17:08:46+00:00

https://twitter.com/_/status/1174369686303100928

@AFSUnidentified @IvanBuchanJanus @GarryPNolan @nickpopemod @GalaxyReport @USNavy I'd need someone other than blurry video and personal anecdotes.

Why do UFO's never venture close enough so that people can get a good photo? Is it:

A) They can detect what type of camera you are carrying

B) They are ordinary things that are just too far way.

C) Something else?

2019-09-18T17:06:22+00:00

https://twitter.com/_/status/1174369081425682432

@IvanBuchanJanus @GarryPNolan @RahulRa94154451 @UAP1949 @Deepneuron Indeed. If you can push out the low information border to beyond where the object is, they you will be able to identify it. But right now it's just a blob on a video.

2019-09-18T17:05:08+00:00

https://twitter.com/_/status/1174368770803912704

@CryptGold @michiokaku How would I go about that? I know that someone in the Navy has been asked about the rotating glare hypothesis, but it's a rather monolithic organization resistant (with good reason) to outside ideas. Who would I send my video to? Why would they not just ignore it?

2019-09-18T17:02:59+00:00

https://twitter.com/_/status/1174368229403185152

@GarryPNolan @RahulRa94154451 @UAP1949 @Deepneuron And wrong. Debunking is about removing bunk - that does not mean eliminating possibilities, it's usually about removing false

claims of evidence or inaccurate leaps of logic. It's literally impossible to prove a low information sighting like Flir1 is not an alien.

2019-09-18T17:01:02+00:00

https://twitter.com/_/status/1174367738816450560

@RahulRa94154451 @UAP1949 @Deepneuron I explain why I think one possibility is more likely than another. You can rarely eliminate possibilities for things that exist in a low information zone.

2019-09-18T16:59:31+00:00

https://twitter.com/_/status/1174367359877832706

@CryptGold @michiokaku Okay, what did I get wrong? Show me the math.

2019-09-18T16:59:02+00:00

https://twitter.com/_/status/1174367236997308418

@IvanBuchanJanus @GarryPNolan @nickpopemod @GalaxyReport @USNavy That navy has said nothing at all about what their hypotheses for these objects are, so there's nothing to compare. At least I've shared my hypotheses.

2019-09-18T16:57:43+00:00

https://twitter.com/_/status/1174366906490376192

@nickpopemod There will always be videos of objects flying & unidentified. UFOs invariably fly in the LIZ, the Low Information Zone. An iPhone has a LIZ. Navy ATFLIR has a different LIZ. The Navy will invariably have video of UFOs. Just further away than iPhone video https://www.metabunk.org/are-the-navy-ufos-real-or-just-in-the-low-information-zone.t10921/

2019-09-18T16:51:10+00:00

https://twitter.com/_/status/1174365256988033024

@CryptGold @michiokaku You don't have to "trust" facts. You can check them for yourself.

2019-09-18T14:38:53+00:00

https://twitter.com/_/status/1174331965761183745

@mrbouffant @GreyAlien @nivrig That's true.

2019-09-18T05:37:23+00:00

https://twitter.com/_/status/1174195695068299265

@_Desmoden @Oswald1160 @SpaceDadOrbis @ValidatedM @michiokaku Now you are just randomly speculating.

2019-09-17T23:51:51+00:00

https://twitter.com/_/status/1174108736551440384

@_Desmoden @Oswald1160 @SpaceDadOrbis @ValidatedM @michiokaku And yet curiously they managed to track it going from 28,000 feet to sea level in 0.78 seconds. Is that the magic speed-limit for radar?

2019-09-17T21:27:25+00:00

https://twitter.com/_/status/1174072388155129856

@ForPolJournal Why on earth are people still going on about NIST's draft report? They gave a simplified analysis of the collapse, someone pointed out there was a period of near free-fall.

NIST's final report broke down the collapse in to sections that showed this
That was ELEVEN YEARS AGO!

2019-09-17T21:23:18+00:00

https://twitter.com/_/status/1174071354091429888

@_Desmoden @Oswald1160 @SpaceDadOrbis @ValidatedM @michiokaku And yet curiously no radar observed it depart to the south. What's up with that?

2019-09-17T21:19:35+00:00

https://twitter.com/_/status/1174070420124733440

@HALMACDAL @Metabunk I don't want testimony. I want a verified demonstration.

2019-09-17T19:37:23+00:00

https://twitter.com/_/status/1174044699272761344

@ddeanjohnson @generaldamras No.

2019-09-17T19:37:03+00:00

https://twitter.com/_/status/1174044616158404608

@HALMACDAL @Metabunk And yet nobody can demonstrate it working?

2019-09-17T19:32:27+00:00

https://twitter.com/_/status/1174043458958282752

@Scribe1969 @HALMACDAL @Metabunk Can you quote the bit where it's demonstrated with proper scientific controls?

2019-09-17T19:31:34+00:00

https://twitter.com/_/status/1174043233954910213

@generaldamras Yeah, they haven't identified them. Neither have I. But I've got some very reasonable hypotheses as to what they might be.

2019-09-17T16:51:03+00:00

https://twitter.com/_/status/1174002840970248192

@EricRWeinstein Well, what DOES it have to do with? Can you give some illustrating examples?

2019-09-17T16:48:51+00:00

https://twitter.com/_/status/1174002286336413697

@HALMACDAL @Metabunk I shall wait for him to provide scientific evidence of remote viewing. How hard can that be exactly? He's got a series of videos on TRAINING RV, so surely he can win a prize by demonstrating it?

2019-09-17T16:27:47+00:00

https://twitter.com/_/status/1173996983255629824

@leechristian69 @brendatomczak @brondmanmusic @Judy_Cockerton @RevCavs @geewilikers @marshallstackz @rubberclowncar @CosmicCrash1 @BedrokkV8 @axxepackes @LeonasSister @thebloodynerve @so_st_ca @GenuineCrude @podracerband @BrokenRomeo @SecondPlayrScor @RobertcTyson @RevelatorRyan @HikersHell There's an interesting story behind Prince's "chemtrails" reference.
https://www.metabunk.org/demythologizing-princes-reference-to-chemtrails.t7598/

2019-09-17T16:25:43+00:00

https://twitter.com/_/status/1173996464164360192
@EricRWeinstein How about with consequential public servants, like the US president?

2019-09-17T00:05:39+00:00
https://twitter.com/_/status/1173749823050113024
@Garyjayuk2 @AustinWaltersUK @dahboo7 Yeah, me too. But I get fooled occasionally when the planes are very far away, and precisely lined up. We could try eliminating planes. What was your date, time, view direction, and location?

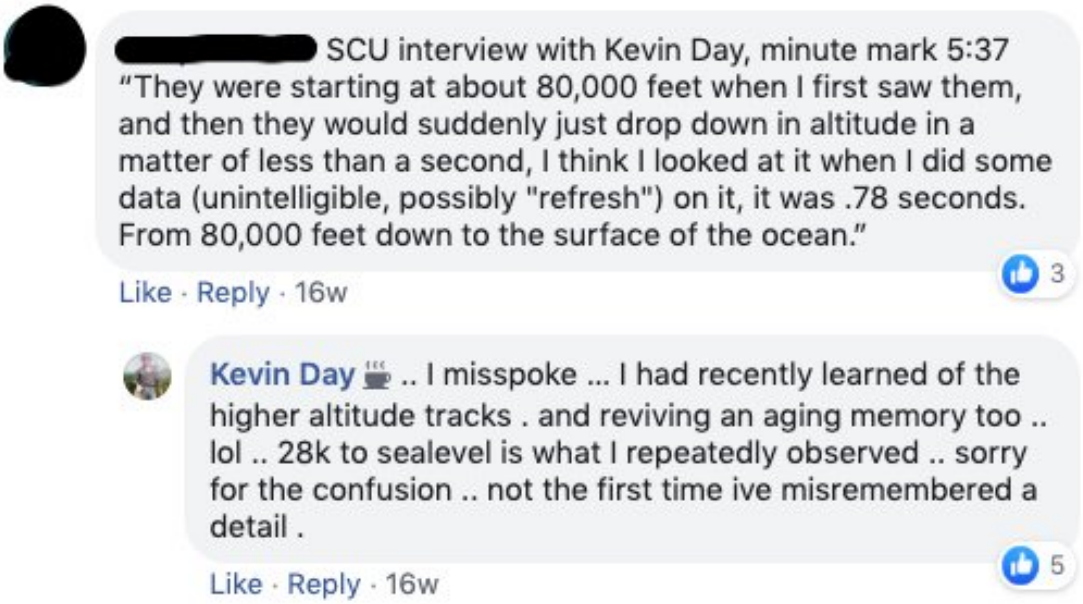
2019-09-16T21:44:19+00:00
https://twitter.com/_/status/1173714256253968386
@AustinWaltersUK @Garyjayuk2 @dahboo7 Probably the landing lights of a far distant plane heading for Manchester airport, or maybe even London. Here's an example.
https://www.youtube.com/watch?v=6e7cw4bYvM0

2019-09-16T21:38:35+00:00
https://twitter.com/_/status/1173712811689570304
@_Desmoden @Oswald1160 @ValidatedM @michiokaku How many discreet radar systems measured this 0.78 drop? How do you know this?

2019-09-16T20:26:59+00:00
https://twitter.com/_/status/1173694793123106817
@_Desmoden @Oswald1160 @ValidatedM @michiokaku It's also impossible to do without an incredibly loud sonic boom. Which means a radar glitch seems way more likely.

2019-09-16T18:59:28+00:00
https://twitter.com/_/status/1173672767062822915
@adrian_probert @AFSUnidentified @michiokaku And what exactly did the radar show at that point in time?

2019-09-16T18:56:55+00:00
https://twitter.com/_/status/1173672126181593088
@_Desmoden @Oswald1160 @ValidatedM @michiokaku
http://pbs.twimg.com/media/EEm4knHU4AAlknL.jpg



http://pbs.twimg.com/media/EEm4knHU4AAlknL.jpg

2019-09-16T18:50:11+00:00

https://twitter.com/_/status/1173670433649876992

@_Desmoden @Oswald1160 @ValidatedM @michiokaku It's not mysterious. Recollections vary. Recollections change over time. Stories change in the retelling. Intense focus on a story crystalizes one particular version - but does not indicate that's the right one.

2019-09-16T18:48:26+00:00

https://twitter.com/_/status/1173669992853688320

@adrian_probert @AFSUnidentified @michiokaku The issue here is what Kaku said about the burden of proof shifting because of the videos being testable evidence we did not have before. If you think the other evidence is "testable", then explain how you test it.

2019-09-16T18:35:57+00:00

https://twitter.com/_/status/1173666850636324864

@cptarkennedy @michiokaku Kaku is basing his statement on the videos. The videos don't show anything odd. The "radar data" is purely anecdotal recollections of different events.

2019-09-16T18:34:52+00:00

https://twitter.com/_/status/1173666577050296320

@rory_blyth @MarkSte96213981 @JeremyCorbell @michiokaku @area51basecamp Assume I have none at all. How does that affect what I said?

If you are interested in my past, you can see here: https://en.wikipedia.org/wiki/Mick_West

But again, what does it change? My degree subject has no effect on the facts, or on trigonometry.

2019-09-16T17:21:37+00:00

https://twitter.com/_/status/1173648144778723328

@cptarkennedy @michiokaku What is inaccurate is the assertion that the craft was

demonstrably pulling high-gs. It does not appear to move any more than a distant jet, flying away in straight and level flight.

2019-09-16T17:20:03+00:00

https://twitter.com/_/status/1173647751424307204

@AFSUnidentified @michiokaku They are not part of what Kaku said. They are not testable, as they are anecdotal.

2019-09-16T17:19:22+00:00

https://twitter.com/_/status/1173647578828685312

@adrian_probert @AFSUnidentified @michiokaku He said it flew off towards the horizon.

2019-09-16T17:19:00+00:00

https://twitter.com/_/status/1173647483886419968

@adrian_probert @AFSUnidentified @michiokaku It means they did not identify them exactly. If does not mean they are some bizarre impossible phenomenon.

2019-09-16T16:21:08+00:00

https://twitter.com/_/status/1173632923074883585

@adrian_probert @AFSUnidentified @michiokaku No I do not. There's zero evidence of a simultaneous event over multiple systems. Just different anecdotes from different people, in different places, at different times. For example, Fravor says the TicTac flew away. Radar only observed vertical movement.

2019-09-16T16:03:38+00:00

https://twitter.com/_/status/1173628520754319360

@cptarkennedy @michiokaku A large number of pages is not a good indicator of correctness. You also have to look at the contents.

2019-09-16T16:02:42+00:00

https://twitter.com/_/status/1173628285391200256

@_Desmoden @Oswald1160 @ValidatedM @michiokaku In fact it started out with everyone saying 80,000 feet, not 28,000. Also some said 60,000.

2019-09-16T15:46:11+00:00

https://twitter.com/_/status/1173624127938154496

@_Desmoden @Oswald1160 @ValidatedM @michiokaku Radar guy (Kevin Day) changed those numbers several times in his early recollections. They eventually solidified, but that might just be from multiple retellings.

2019-09-16T15:41:51+00:00

https://twitter.com/_/status/1173623035993026560

@AFSUnidentified @michiokaku Yet Kaku is basing his assessment on the TESTABLE data - the videos (in his own assessment.) Those videos do not show what he says they show, and I doubt he personally has analyzed them in any depth.

2019-09-16T08:08:57+00:00

https://twitter.com/_/status/1173509059221184513

@_Desmoden @ValidatedM @michiokaku Right, they say it would not lose lock except via super

fast motion. The mistake is saying this motion has to be the target object. The â□□motionâ□□ is the camera.

2019-09-16T06:28:49+00:00

https://twitter.com/_/status/1173483863340802048

@_Desmoden @ValidatedM @michiokaku Nope. It was changes in zoom, then the final shot is it just drifting away.

2019-09-14T18:40:35+00:00

https://twitter.com/_/status/1172943241949302785

@ForPolJournal Maybe that's why NIST hasn't described it like that since 2008? You should read their FAQ:

https://www.nist.gov/topics/disaster-failure-studies/faqs-nist-wtc-7-investigation

http://pbs.twimg.com/media/EEchoG4UEAArz05.jpg

---

11. In a video, it appears that WTC 7 is descending in free fall, something that would not occur in the structural collapse that you describe. How can NIST ignore basic laws of physics?

In the draft WTC 7 report (released Aug. 21, 2008; available at http://www.nist.gov/el/disasterstudies/wtc/wtc_draftreports.cfm), NIST stated that the north face of the building descended 18 stories (the portion of the collapse visible in the video) in 5.4 seconds, based on video analysis of the building collapse. This time period is 40 percent longer than the 3.9 seconds this process would have taken if the north face of the building had descended solely under free fall conditions. During the public comment period on the draft report, NIST was asked to confirm this time difference and define the reasons for it in greater detail.

To further clarify the descent of the north face, NIST recorded the downward displacement of a point near the center of the roofline from first movement until the north face was no longer visible in the video. Numerical analyses were conducted to calculate the velocity and acceleration of the roofline point from the time-dependent displacement data. The instant at which vertical motion of the roofline first occurred was determined by tracking the numerical value of the brightness of a pixel (a single element in the video image) at the roofline. This pixel became brighter as the roofline began to descend because the color of the pixel started to change from that of the building façade to the lighter color of the sky.

The approach taken by NIST is summarized in NIST NCSTAR Report 1A, Section 3.6, and detailed in NIST NCSTAR Report 1-9, Section 12.5.3.

The analyses of the video (both the estimation of the instant the roofline began to descend and the calculated velocity and acceleration of a point on the roofline) revealed three distinct stages characterizing the 5.4 seconds of collapse:

- Stage 1 (0 to 1.75 seconds): acceleration less than that of gravity (i.e., slower than free fall).
- Stage 2 (1.75 to 4.0 seconds): gravitational acceleration (free fall)
- Stage 3 (4.0 to 5.4 seconds): decreased acceleration, again less than that of gravity

This analysis showed that the 40 percent longer descent time—compared to the 3.9 second free fall time—was due primarily to Stage 1, which corresponded to the buckling of the exterior columns in the lower stories of the north face. During Stage 2, the north face descended essentially in free fall, indicating negligible support from the structure below. This is consistent with the structural analysis model, which showed the exterior columns buckling and losing their capacity to support the loads from the structure above. In Stage 3, the acceleration decreased as the upper portion of the north face encountered increased resistance from the collapsed structure and the debris pile below.

2019-09-12T00:30:34+00:00

https://twitter.com/_/status/1171944152839254017

@hughespj1 How do you know they were "Tic-Tac" shaped? You only had the one visual.

2019-09-12T00:29:52+00:00

https://twitter.com/_/status/1171943978016493568

@hughespj1 Was there a track that showed an object leaving Fravor's position at hypersonic speed?

2019-09-12T00:28:58+00:00

https://twitter.com/_/status/1171943748999139328

@hughespj1 Which were? Valid tracks that went from 80,000 feet to 200 feet in a fraction of a second?

2019-09-12T00:27:43+00:00

https://twitter.com/_/status/1171943436003479557

@mikeb8637 I've never claimed to be qualified (except in a few fields, like geometry, physics, video, and contrails). I just point things out.

2019-09-12T00:25:44+00:00

https://twitter.com/_/status/1171942936600178688

@_Desmoden @hughespj1 No, it does not. I've not seen any evidence of multiple radar reporting the exact same thing.

2019-09-12T00:25:11+00:00

https://twitter.com/_/status/1171942800734048256

@hughespj1 @_Desmoden Why did people at the time think that there might have been false returns?

2019-09-12T00:08:32+00:00

https://twitter.com/_/status/1171938607050805248

@hughespj1 @_Desmoden I've no practical experience with them. How does that change my suggestions? I'm not arguing from authority, I'm suggesting hypotheses. Maybe you should address the hypothesis and not me?

2019-09-11T23:56:27+00:00

https://twitter.com/_/status/1171935568743129089

@_Desmoden @hughespj1 Exactly what failed the same way, and what evidence do you have that it actually happened at the same time?

2019-09-11T23:55:40+00:00

https://twitter.com/_/status/1171935371409494017

@zcichy @ExogenesisHH @Rett94291220 @hughespj1 @Oswald1160 @earthdoggo @UFOCollage @Keithmayoh @michiokaku @GaryVoorhis @mintyhyperspace You ONLY have testimony of the radar.

The Navy keeps things classified by default, that's just the way it is.

2019-09-11T23:51:26+00:00

https://twitter.com/_/status/1171934306425458688

@zcichy @ExogenesisHH @Rett94291220 @hughespj1 @Oswald1160 @earthdoggo @UFOCollage @Keithmayoh @michiokaku @GaryVoorhis @mintyhyperspace Radar glitches are things that are known to happen all the time.

A 100g accelerating craft that appears not displace air has never been known to happen.

So a few instances of the first is still more likely than the second.

2019-09-11T23:08:15+00:00

https://twitter.com/_/status/1171923438417543168

@eebsterworld @rjornd @Kevin_Shipp What would you like to know?

2019-09-11T23:07:58+00:00

https://twitter.com/_/status/1171923367676366849

@zcichy @ExogenesisHH @Rett94291220 @hughespj1 @Oswald1160 @earthdoggo @UFOCollage @Keithmayoh @michiokaku @GaryVoorhis @mintyhyperspace I suspect all it means is that the proper declassification process was not followed, and that they don't know with 100% certainty what's on the videos.

2019-09-11T22:18:34+00:00

https://twitter.com/_/status/1171910936023552001
@ExogenesisHH @Rett94291220 @hughespj1 @Oswald1160 @earthdoggo @UFOCollage @Keithmayoh @michiokaku @GaryVoorhis @mintyhyperspace But that requires the addition of an incredible craft that defies physics. Vastly more of an assumption than some unrelated glitches and mistakes.

2019-09-11T22:00:01+00:00
https://twitter.com/_/status/1171906267054399488
@ExogenesisHH @Rett94291220 @hughespj1 @Oswald1160 @earthdoggo @UFOCollage @Keithmayoh @michiokaku @GaryVoorhis @mintyhyperspace That not how Occamâ□□s razor works. It says you donâ□□t add things to a hypothesis. Adding a silent hypersonic 100g craft is a superm example of a violation of Occamâ□□s razor. Glitches are not.

2019-09-11T21:57:28+00:00
https://twitter.com/_/status/1171905625825038336
@hughespj1 So they didnâ□□t ever have problems?

2019-09-11T21:46:01+00:00
https://twitter.com/_/status/1171902743537020928
@Rett94291220 @hughespj1 @ExogenesisHH @Oswald1160 @earthdoggo @UFOCollage @Keithmayoh @michiokaku @GaryVoorhis @mintyhyperspace They may well have had different glitches

---

2019-09-10T20:44:19+00:00

https://twitter.com/_/status/1171524826856452097

@UFOCollage @ExogenesisHH @Keithmayoh @michiokaku That's a camera movement.

2019-09-10T19:59:29+00:00

https://twitter.com/_/status/1171513547089567748

@ExogenesisHH @Keithmayoh @michiokaku That's a rather speculative statement, as nothing in the videos shows hypersonic speeds. So no burden of proof has shifted.

2019-09-10T19:57:51+00:00

https://twitter.com/_/status/1171513134097420291

@apicasefiles @Keithmayoh @ExogenesisHH Seth Shostak was the Chair of the International Academy of Astronautics SETI Permanent Committee from 2003-2012

2019-09-10T17:17:05+00:00

https://twitter.com/_/status/1171472676667285505

@greenfox49 @ExogenesisHH I didn't ask that, but as far as I know they are all just noise. If they had been "decoded" that would be major news.

2019-09-10T17:15:39+00:00

https://twitter.com/_/status/1171472316682780677

@TheLightTruthIs @ExogenesisHH @PostDisclosure I asked him. He thought it was a reasonable thing to look at, but felt it was unlikely to yield anything.

2019-09-10T17:13:02+00:00

https://twitter.com/_/status/1171471658596499457

@TheoryQed Yeah, he did say that the fact that so many had been detected made it more likely we'd get a good answer soon. There's one site in Canada in particular that's good at finding them.

2019-09-10T17:11:48+00:00

https://twitter.com/_/status/1171471346053701632

@cravingcannolis While I didn't ask him specifically about that, he does not think the US government is not disclosing alien knowledge. I'm sure he'd be all in favor of cheap transportation though.

2019-09-10T17:09:11+00:00

https://twitter.com/_/status/1171470686209994752

@TheoryQed I have to edit the episode, will probably be out at the weekend.

2019-09-10T17:08:27+00:00

https://twitter.com/_/status/1171470503615201281

@TheoryQed I asked him, basically he thinks radio is the best bet for comms, it could be something else, but since we have no idea what that is, it's hard to look at.

Also thinks Fast Radio Bursts in not alien, something natural.

https://twitter.com/_/status/1171440604300972032

The origin story of the Fermi Paradox is an interesting study in memory. Everyone present remembered it slightly differently.

https://en.wikipedia.org/wiki/Fermi_paradox#Original_conversation(s)

http://pbs.twimg.com/media/EEHLA7GUYAAMpoq.jpg

Teller remembered Fermi asking him, "Edward, what do you think. How probable is it that within the next ten years we shall have clear evidence of a material object moving faster than light?" Teller said, "10^-6" (one in a million). Fermi said, "This is much too low. The probability is more like ten percent." Teller wrote in 1984 that this was "the well known figure for a Fermi miracle."[9]

Herbert York does not remember these prior conversations.[21][9]

Years later, only Emil Konopinski clearly remembered that Fermi's lunchtime exclamation was connected to a conversation which had occurred on the same day.[9] Writing in 1984, Teller acknowledged that he may have been mentally linking two separate conversations.[22] Teller also remembers "approximately eight" persons sitting at the lunch table, whereas York and Konopinski remember just the three of them plus Fermi.[9]

At lunch, Fermi suddenly exclaimed, **"Where are they?"** (Teller's remembrance), or **"Don't you ever wonder where everybody is?"** (York's remembrance), or **"But where is everybody?"** (Konopinski's remembrance).[9]

Teller wrote, "The result of his question was general laughter because of the strange fact that in spite of Fermi's question coming from the clear blue, everybody around the table seemed to understand at once that he was talking about extraterrestrial life." And York wrote, "Somehow . . . we all knew he meant extra-terrestrials."[9]

However, Konopinski was not emphatic in his letter that he immediately knew Fermi was referring to possible extraterrestrials.[23][9]

https://twitter.com/_/status/1171069772823330816

@UfoIssue @zcichy It's a small object, likely an insect, close to the camera. The motion mostly comes from the drone motion itself. It's part of a general class of UFO sightings call "zip-bys" that arose because of drones.

Analysis: https://www.metabunk.org/utah-drone-video.t10370/

2019-09-08T00:42:14+00:00

https://twitter.com/_/status/1170497539767853057

@gerrycan1 I'd like to discuss the actual problems I raised, not some irrelevant straw-man.
But I really only have about 20 minutes now.
Skype: mickword

2019-09-08T00:35:19+00:00

https://twitter.com/_/status/1170495796040454145

@risingthunder4 @uafairbanks @AE911Truth I am. You're assuming UAF is correct. I'm pointing out some problems with their report. Did you watch my video?

2019-09-08T00:34:30+00:00

https://twitter.com/_/status/1170495593128480768

@gerrycan1 I'd be happy to chat though. Who are these real engineers?

2019-09-08T00:33:30+00:00

https://twitter.com/_/status/1170495339993825280

@gerrycan1 You can't write it down?

2019-09-08T00:05:55+00:00

https://twitter.com/_/status/1170488400241033216

@gerrycan1 @timtron2020 @uafairbanks @AE911Truth In this case - a building actively falling over at 45Â° with columns segments stretching to 3x their length - linear static analysis not a useful form of analysis. I stand by that, and I invite some actual engineers to explain why I'm wrong.

2019-09-07T23:07:00+00:00

https://twitter.com/_/status/1170473572780761088

@gerrycan1 @timtron2020 @uafairbanks @AE911Truth Yes. That's far beyond what's reasonable for linear static analysis. Look at those columns in the back stretching, and unless it took five hours to lean over, it's not static.

2019-09-07T22:30:54+00:00

https://twitter.com/_/status/1170464488522272771

@gerrycan1 @timtron2020 @uafairbanks @AE911Truth You can use static analysis for sudden load re-distribution, obviously. That could also include sudden column removal. But the situation in WTC7 was not static or linear. Certainly not Fig 4.14. Watch the video, I discuss it in more detail, with reference to specific figures.

2019-09-07T22:27:40+00:00

https://twitter.com/_/status/1170463673690669061

@uafairbanks @AE911Truth AE911Truth's initial description of this project is perhaps indicative of a desire to demonstrate a specific outcome, rather than find the true cause.

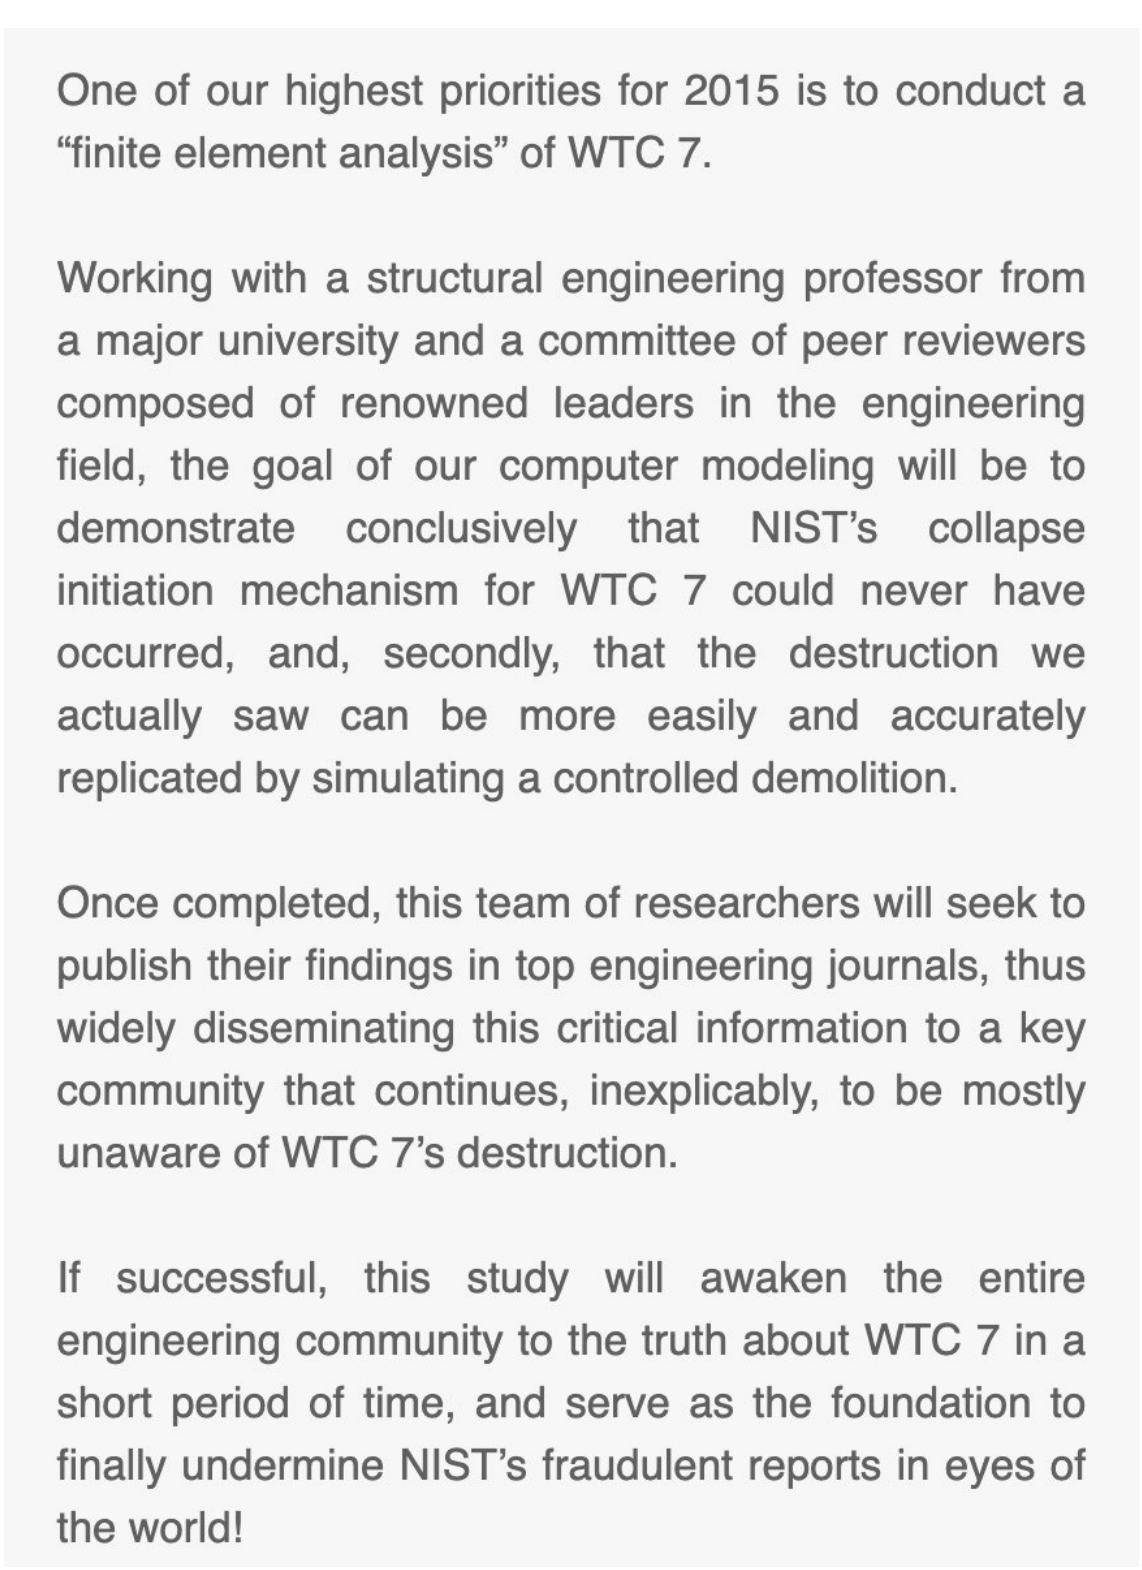
Source: http://action.ae911truth.org/o/50694/t/0/blastContent.jsp?email_blast_KEY=1309110
http://pbs.twimg.com/media/ED5SapxUEAAG8FL.jpg

One of our highest priorities for 2015 is to conduct a "finite element analysis" of WTC 7.

Working with a structural engineering professor from a major university and a committee of peer reviewers composed of renowned leaders in the engineering field, the goal of our computer modeling will be to demonstrate conclusively that NIST's collapse initiation mechanism for WTC 7 could never have occurred, and, secondly, that the destruction we actually saw can be more easily and accurately replicated by simulating a controlled demolition.

Once completed, this team of researchers will seek to publish their findings in top engineering journals, thus widely disseminating this critical information to a key community that continues, inexplicably, to be mostly unaware of WTC 7's destruction.

If successful, this study will awaken the entire engineering community to the truth about WTC 7 in a short period of time, and serve as the foundation to finally undermine NIST's fraudulent reports in eyes of the world!



http://pbs.twimg.com/media/ED5SapxUEAAG8FL.jpg
2019-09-07T22:17:39+00:00
https://twitter.com/_/status/1170461150942597120
@gerrycan1 @timtron2020 @uafairbanks @AE911Truth I explain in more detail here: https://www.youtube.com/watch?v=7OClixCTdDw

2019-09-07T22:16:56+00:00
https://twitter.com/_/status/1170460973729107969
9/11 Truth Activists are lauding the UAF draft report on Hulsey's study of WTC7 as proof of controlled demolition. But there seem to me to be some quite serious problems with it. I detail

them here, and invite answers. @uafairbanks @AE911Truth
https://www.youtube.com/watch?v=7OClixCTdDw

2019-09-07T20:47:54+00:00
https://twitter.com/_/status/1170438565722906624
@gerrycan1 @timtron2020 @uafairbanks @AE911Truth You should read the whole paper.

2019-09-06T18:34:10+00:00
https://twitter.com/_/status/1170042524045438976
@gerrycan1 @uafairbanks @AE911Truth No, it's a ridiculous and meaningless application of static linear analysis. Static means things don't move much. Linear means the deformation does not affect the connection response. Obviously not the case in this image. He should have used non-linear dynamic analysis. http://pbs.twimg.com/media/EDzTVLfU0AAh_GC.jpg

---

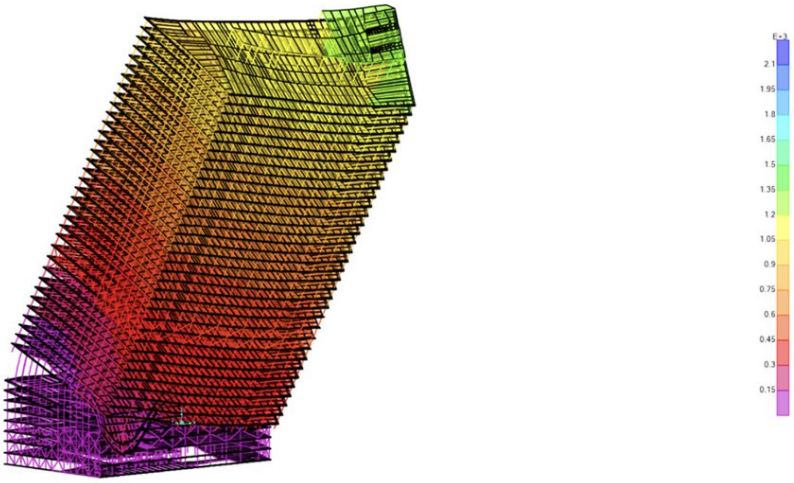

Figure 4.15: Visualization of linear static analysis, from the southwest, showing the building tipping to the southeast after the hypothetical failure of Columns 76 to 81.

2019-09-06T18:09:14+00:00

https://twitter.com/_/status/1170036249060491264

@Truth_inContext @edwardcurrent Compare with actual sounds of demolition.

https://www.youtube.com/watch?v=vMpJQgbKsms

2019-09-06T18:08:21+00:00

https://twitter.com/_/status/1170036024681975808

@gerrycan1 @uafairbanks @AE911Truth I don't have a huge problem with linear. It's more the static vs. dynamic thing. Does this look like a dynamic analysis of the full building structure? It's very clearly not.

Yet what I'm looking at is what Hulsey describes as "Dynamic analysis results" (fig 4.16)

http://pbs.twimg.com/ext_tw_video_thumb/1170035454621540353/pu/img/1xLTexG78ucNCKUO.jpg

https://twitter.com/_/status/1169704703661207554

@zcichy @Ave_The_Barber @multistagecorre @JCumsalot @malcolmstewart0 @awakeningMan Looks like a sun dog or parhelion, but seems a bit further away than the normal 22Â° sun dogs - so might be a rare 44Â° or even further. https://www.atoptics.co.uk/halo/44pars.htm

---

2019-09-05T17:34:19+00:00

https://twitter.com/_/status/1169665074140573696

@EtTuCarl @uafairbanks @AE911Truth I suspect they never did a full dynamic analysis (Unlike Nist). Or st least did not render them out. They had these crappy animations so were forced to use them.

2019-09-05T16:30:42+00:00

https://twitter.com/_/status/1169649062884151296

@MarkSte96213981 @AE911Truth How can an animation "test" anything?

2019-09-05T16:30:20+00:00

https://twitter.com/_/status/1169648971146416128

@MarkSte96213981 @AE911Truth Yes, and the others have similar problems. Watch the west penthouse sink into the building without anything underneath it actually moving. Watch the East penthouse crack open like an egg and pivot out and up.

These are not dynamic analyses. They are animations.

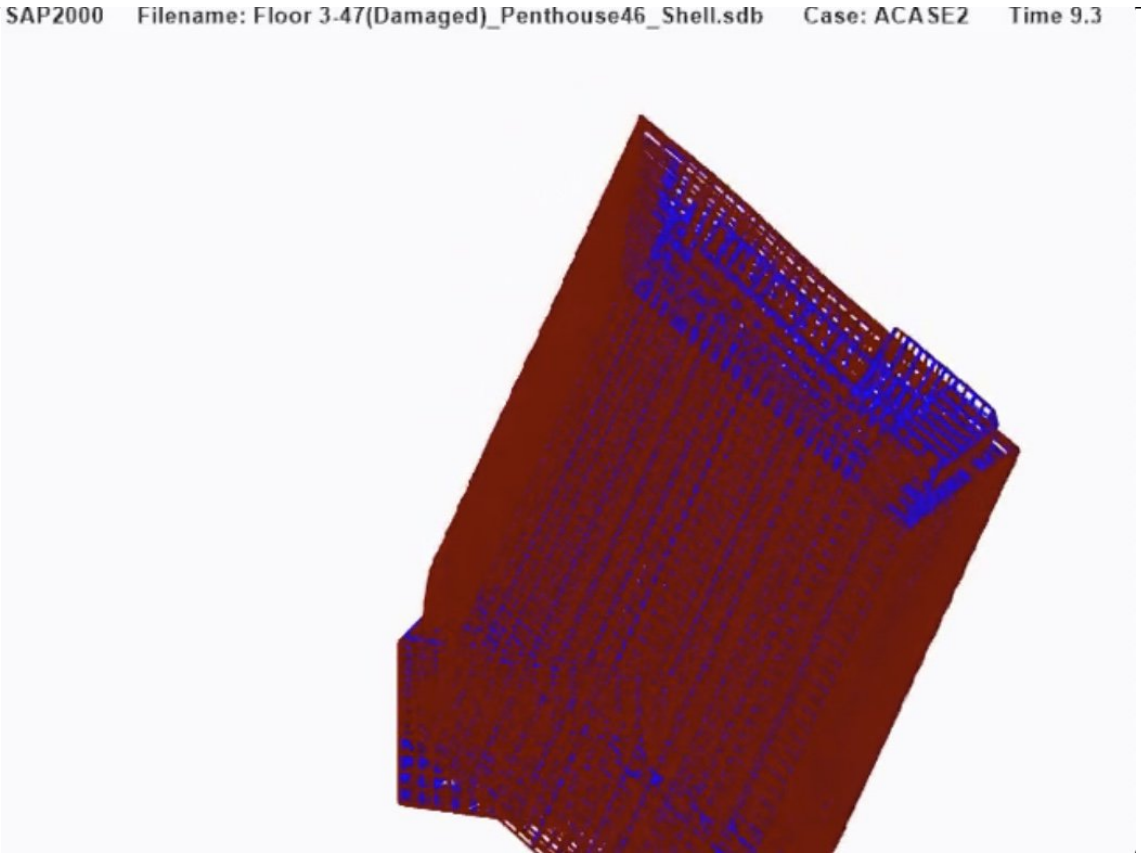
2019-09-05T16:11:01+00:00

https://twitter.com/_/status/1169644111810330624

@uafairbanks @AE911Truth It ends up like this. You can see here there's zero deformation of the top (so it's not a continuation of the static analysis). And both parts are undamaged. The top now passes through the ground.

It's a simple animation, done manually. It's not analysis. Yet you claim it is.

http://pbs.twimg.com/media/EDtonTKU0AAZfeN.jpg

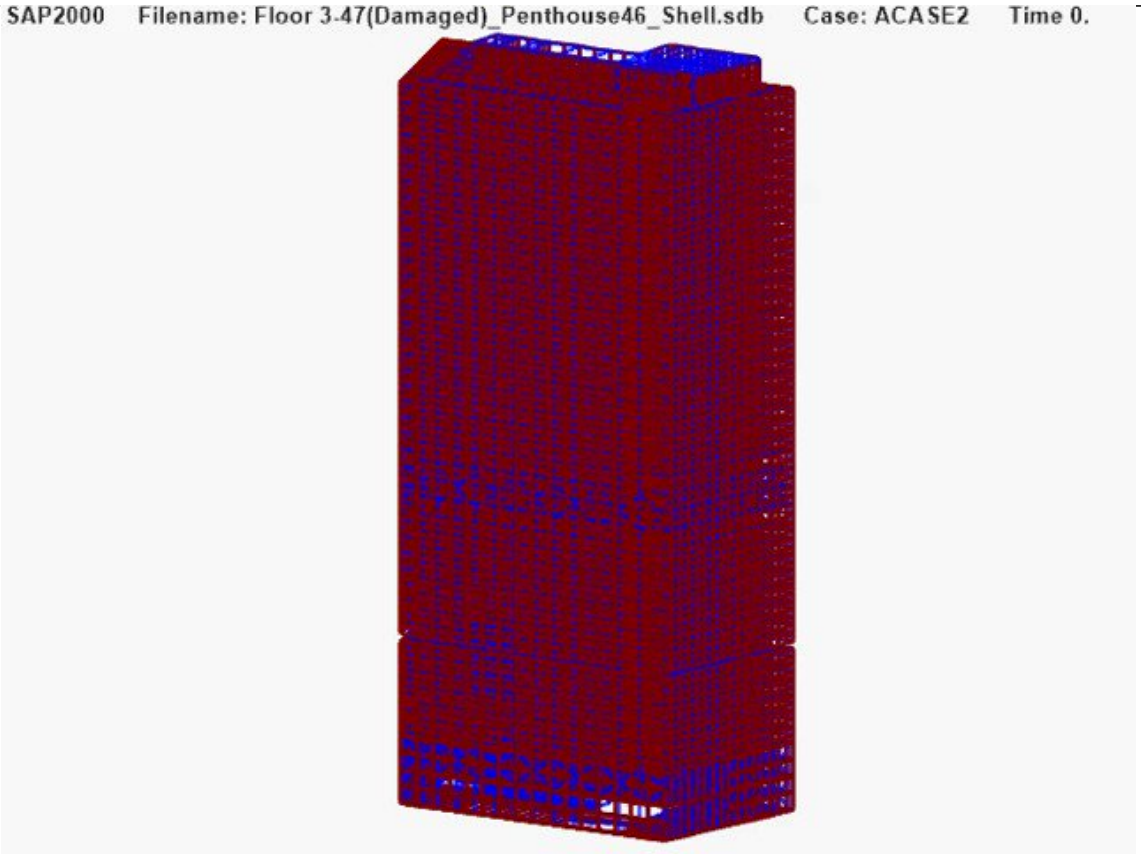


http://pbs.twimg.com/media/EDtonTKU0AAZfeN.jpg

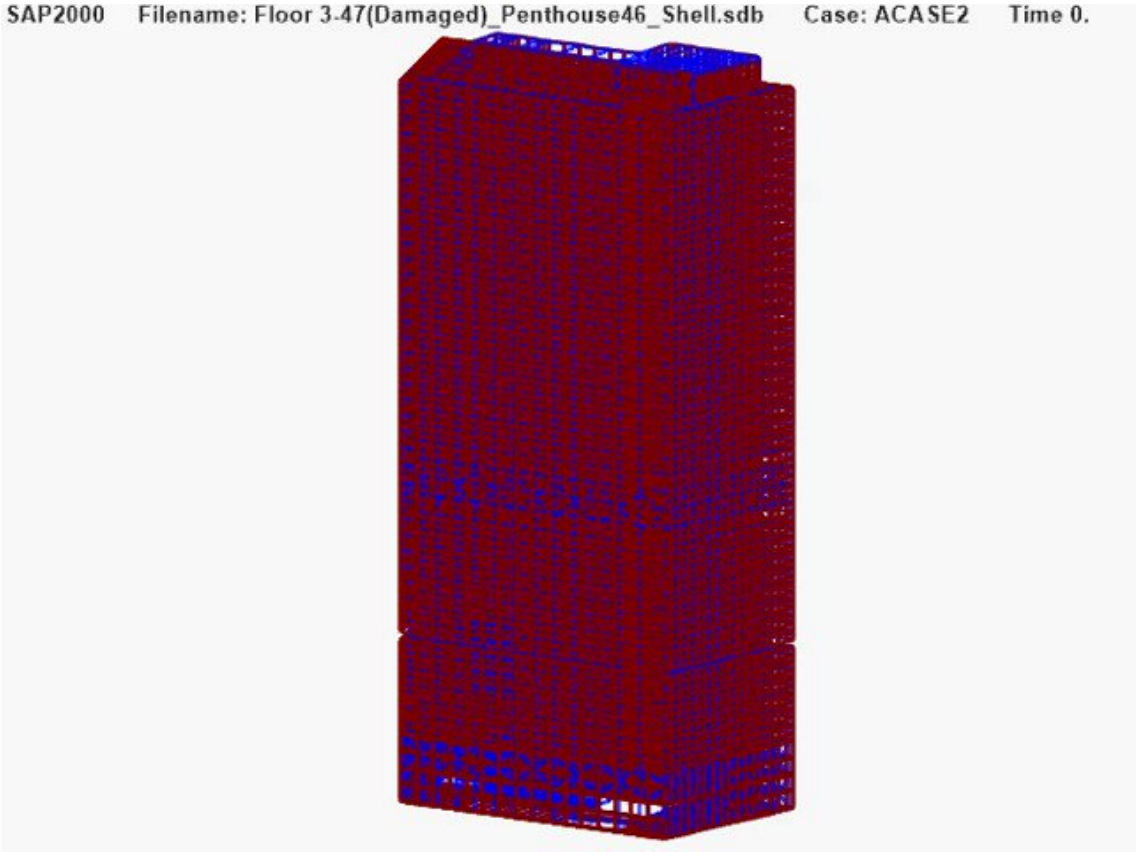
2019-09-05T16:03:08+00:00

https://twitter.com/_/status/1169642125375369217
@uafairbanks @AE911Truth To be clear, here's the video that is supposed to be a "dynamic analysis".

It's not. It's one rigid structure rotating, and one not rotating. No deformation. No collision. No damage. Probably hand animated.
http://pbs.twimg.com/ext_tw_video_thumb/1169641556761907200/pu/img/8VhkKNYzacfMXEQK.jpg



http://pbs.twimg.com/ext_tw_video_thumb/1169641556761907200/pu/img/8VhkKNYzacfMXEQK.jpg
2019-09-05T16:00:07+00:00
https://twitter.com/_/status/1169641367565324288
@MarkSte96213981 @AE911Truth Because there's zero deformation as the top part rotates cleanly THROUGH the bottom part.
This is supposed to be a dynamic analysis. It appears to have only two components. They might as well have used cardboard boxes.
http://pbs.twimg.com/ext_tw_video_thumb/1169641142310166529/pu/img/h3x5eNSyMAuKj_aq.jpg



http://pbs.twimg.com/ext_tw_video_thumb/1169641142310166529/pu/img/h3x5eNSyMAuKj_aq.jpg
2019-09-05T15:46:58+00:00
https://twitter.com/_/status/1169638058792144896
@MarkSte96213981 @AE911Truth Yes I do. See for example this thread where I question their focus on A2001/C79 and identify dubious manual edits they made to data-driven figures in the report.
https://www.metabunk.org/wtc7-is-ae911s-and-nists-focus-on-a2001-justified-if-it-was-not-key-in-nists-global-model.t9427/

https://twitter.com/_/status/1169637489318883329
This is bad static analysis.
This is pushing static analysis far beyond where it is appropriate. You can't ignore the momentum of a tilting building. It's not static. And stretching those rear columns means your acceptance criteria is incorrect. @uafairbanks @AE911Truth
http://pbs.twimg.com/media/EDth7fXU0AAflZm.jpg

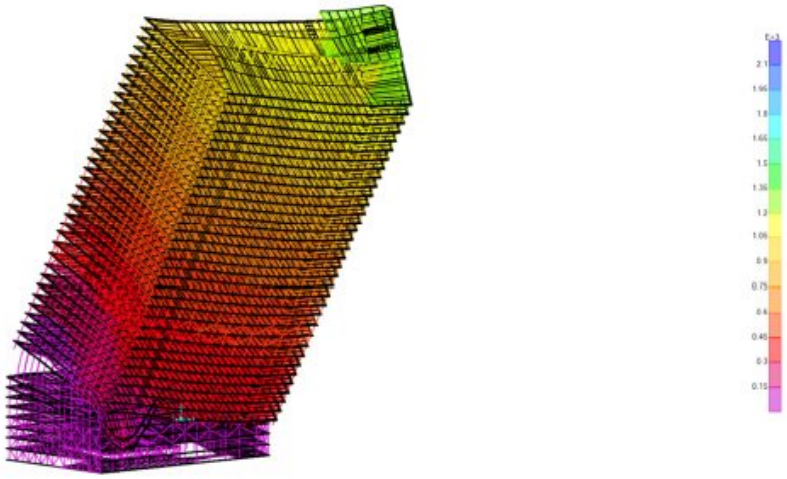

Figure 4.15: Visualization of linear static analysis, from the southwest, showing the building tipping to the southeast after the hypothetical failure of Columns 76 to 81.

2019-09-05T15:39:03+00:00

https://twitter.com/_/status/1169636065579171842

This is not dynamic analysis.

This is manual animation of the top of the building rotating without deformation though the lower part. Columns have be removed to avoid silly looking stretching. Calling this "dynamic analysis" is dishonest. @uafairbanks @AE911Truth

http://pbs.twimg.com/media/EDtg0bKUwAAF4jI.jpg

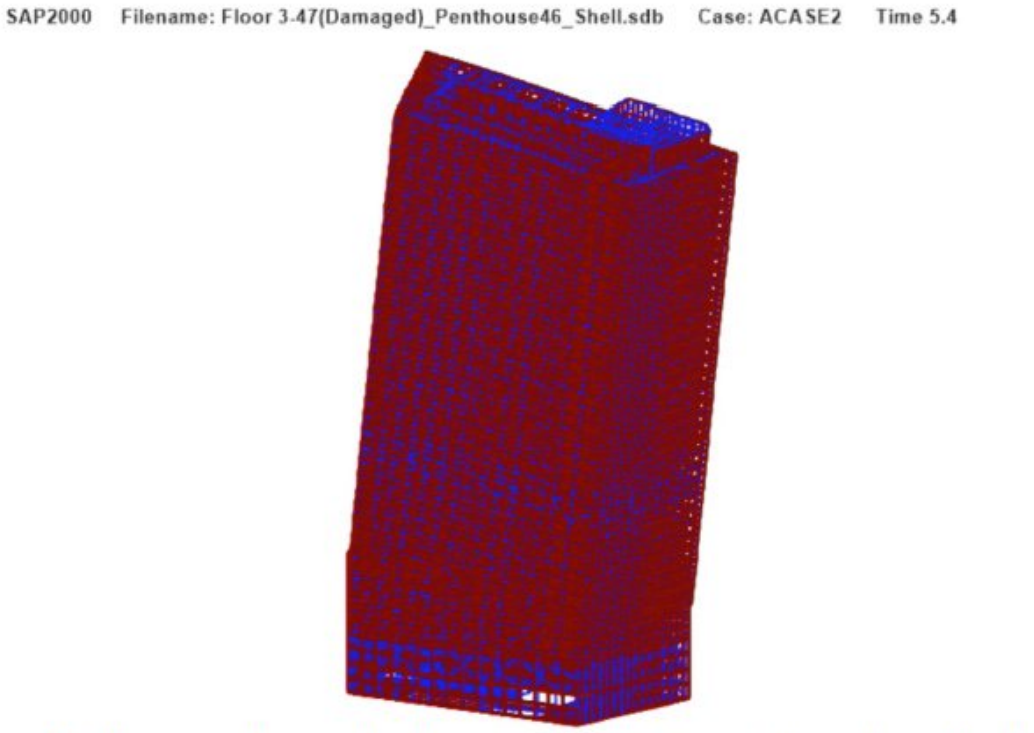

Figure 4.16: Dynamic analysis results showing the building tipping to the southeast after the hypothetical failure of Columns 76 to 81.

2019-09-04T21:55:47+00:00

https://twitter.com/_/status/1169368485723394048

This is supposed to be the @uafairbanks and @AE911Truth
replicating NIST's hypothesis for the collapse of WTC7 (failure of cols 79-81). Problem is: they seemingly removed floor 11, then didn't model any response from the exterior. The result is comically inaccurate.

http://pbs.twimg.com/ext_tw_video_thumb/1169367305429479424/pu/img/IwKa0bfPOG3ZUjWh.jpg

2019-09-02T19:38:58+00:00

https://twitter.com/_/status/1168609279252656129

Iron Microspheres are a byproduct of thermite combustion, so their presence in the Ground Zero dust is often cited as evidence that thermite was used to sneakily destroy the buildings after the plane impact and the fires.

But it's not evidence at all.

2019-09-02T17:03:45+00:00

https://twitter.com/_/status/1168570218999795715

@username_Dizzy @PJMcGuirk85 Some people take a lot more time than others. Hopefully her beliefs are not causing her too much harm. Mud Flood is a silly fun theory - hard to believe people take it seriously. But many people believe in the supernatural to varying degrees, and still have functioning lives.

2019-09-02T16:57:21+00:00

https://twitter.com/_/status/1168568608592580612

@edwardcurrent You might get a slight blip tomorrow.

2019-09-02T16:55:42+00:00

https://twitter.com/_/status/1168568190214950913

@username_Dizzy Yeah, Flat Earth has peaked. It was essentially just a viral thing driven by YouTube's algorithms, internet rubbernecking, and a few celebs pranking the media. Now YouTube is fixing their algorithms, and the novelty is gone. Fun times though. And some people still sadly stuck.

2019-09-02T16:51:55+00:00

https://twitter.com/_/status/1168567240846741504

@PJMcGuirk85 It varies. You can't lump them all together and say "people are X because of Y." And even if there's trends and correlations they don't apply to every individual.
I think information exposure is more significant than personality trait.

2019-09-02T16:33:43+00:00

https://twitter.com/_/status/1168562657789562881

@PJMcGuirk85 Yes. Check out "I Know Things They Don't Know" by Lantian, et al. Lots of good references too.
https://econtent.hogrefe.com/doi/10.1027/1864-9335/a000306
http://pbs.twimg.com/media/EDeRWXwVUAY5UNl.jpg

In recent years, psychologists have made significant ground in understanding what draws people to conspiracy theories. For example, personality traits such as openness to experience (Swami, Chamorro-Premuzic, & Furnham, 2010; Swami et al., 2011), distrust (Abalakina-Paap, Stephan, Craig, & Gregory, 1999; Goertzel, 1994; Wagner-Egger & Bangerter, 2007), low agreeability (Swami et al., 2010, 2011), narcissism (Cichocka, Marchlewska, & Golec de Zavala, 2016), and Machiavellianism (Douglas & Sutton, 2011) are associated with conspiracy belief. In terms of cognitive processes, people with stronger conspiracy beliefs are more likely to overestimate the likelihood of co-occurring events (Brotherton & French, 2014), to attribute intentionality where it is unlikely to exist (Brotherton & French, 2015; Douglas, Sutton, Callan, Dawtry, & Harvey, 2016), and to have lower levels of analytic thinking (Swami, Voracek, Stieger, Tran, & Furnham, 2014).

Conspiracy theories also appear to have important consequences, such as negatively influencing health decisions (Jolley & Douglas, 2014a; Oliver & Wood, 2014), decreasing intentions to engage in politics (Butler, Koopman, & Zimbardo, 1995; Jolley & Douglas, 2014b), increasing people's desire to leave their workplace (Douglas & Leite, in press), and reducing environmental behavioral intentions (Douglas & Sutton, 2015; Jolley & Douglas, 2014b; Lewandowsky, Oberauer, & Gignac, 2013; van der Linden, 2015). Further, some research suggests that conspiracy theories may perform certain functions for the self, allowing people to regain a sense of control (van Prooijen & Acker, 2015; Whitson & Galinsky, 2008), order (van Harreveld, Rutjens, Schneider, Nohlen, & Keskinis, 2014), power (Gray, 2010; Sapountzis & Condor, 2013), and to relieve death anxiety (Newheiser, Farias, & Tausch, 2011). The current research aims to further contribute to current knowledge about the personal needs that may be satisfied by conspiracy belief. Among the self-related motivations that could influence belief in conspiracy theories, we will argue that the *need for uniqueness* should play a role in people's adherence to conspiracy theories. More specifically, our general claim is that people with a high need for uniqueness should be more likely to believe in conspiracy theories.

http://pbs.twimg.com/media/EDeRWXwVUAY5UNl.jpg

2019-09-02T16:20:27+00:00

https://twitter.com/_/status/1168559319203237888

Every September there is a peak in interest in 9/11 "Truth" conspiracy theories. Every year it gets less and less.

I suspect the hardcore believers, whose lives revolve around 9/11 truth, are not aware of the scale of the decline. But even they are fading away.

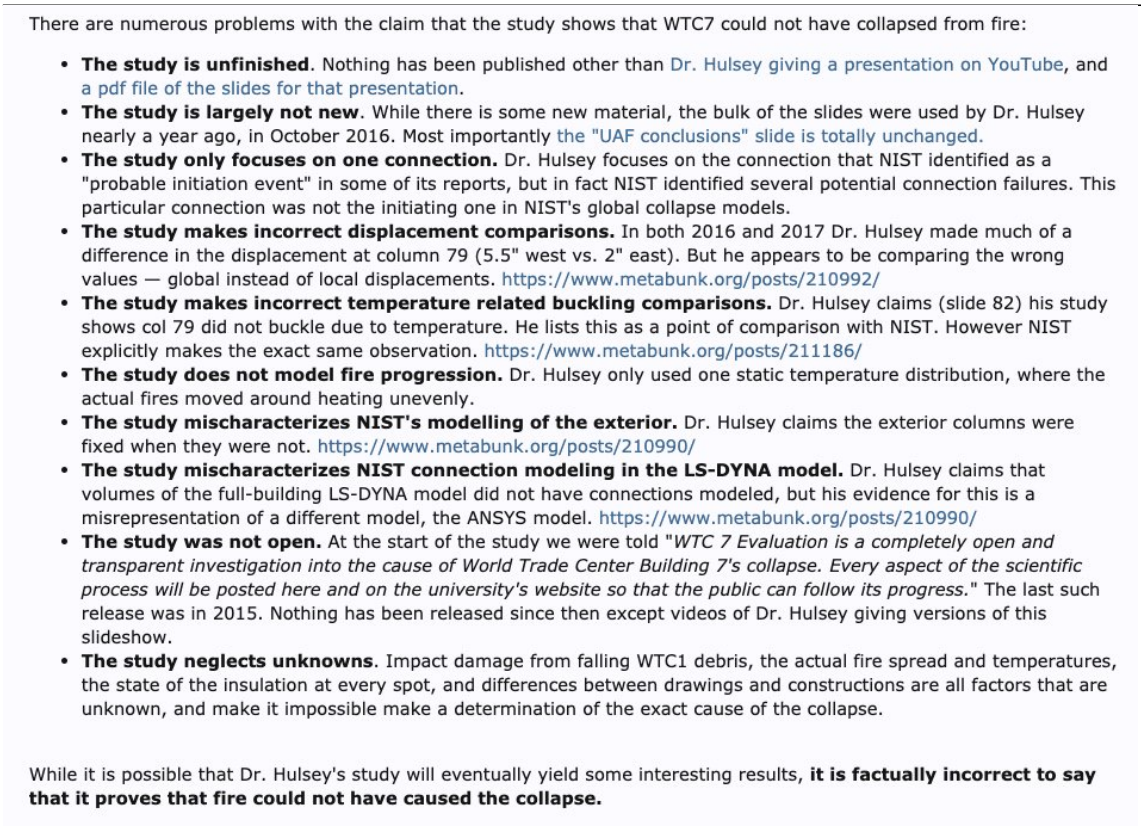
2019-08-29T20:40:52+00:00

https://twitter.com/_/status/1167175304374190080

@samhell @rybred8877 @michaelshermer I watched the presentation by Dr. Hulsey. My comments are here:
https://www.metabunk.org/debunked-uaf-study-shows-wtc7-could-not-have-collapsed-from-fire.

t9056/

However the full report has yet to be released. That's happening next week. I expect similar (or the same) mistakes. But more material. http://pbs.twimg.com/media/EDKjUXFU8AAEr2w.jpg



There are numerous problems with the claim that the study shows that WTC7 could not have collapsed from fire:

- **The study is unfinished**. Nothing has been published other than Dr. Hulsey giving a presentation on YouTube, and a pdf file of the slides for that presentation.
- **The study is largely not new**. While there is some new material, the bulk of the slides were used by Dr. Hulsey nearly a year ago, in October 2016. Most importantly the "UAF conclusions" slide is totally unchanged.
- **The study only focuses on one connection.** Dr. Hulsey focuses on the connection that NIST identified as a "probable initiation event" in some of its reports, but in fact NIST identified several potential connection failures. This particular connection was not the initiating one in NIST's global collapse models.
- **The study makes incorrect displacement comparisons.** In both 2016 and 2017 Dr. Hulsey made much of a difference in the displacement at column 79 (5.5" west vs. 2" east). But he appears to be comparing the wrong values — global instead of local displacements. https://www.metabunk.org/posts/210992/
- **The study makes incorrect temperature related buckling comparisons.** Dr. Hulsey claims (slide 82) his study shows col 79 did not buckle due to temperature. He lists this as a point of comparison with NIST. However NIST explicitly makes the exact same observation. https://www.metabunk.org/posts/211186/
- **The study does not model fire progression.** Dr. Hulsey only used one static temperature distribution, where the actual fires moved around heating unevenly.
- **The study mischaracterizes NIST's modelling of the exterior.** Dr. Hulsey claims the exterior columns were fixed when they were not. https://www.metabunk.org/posts/210990/
- **The study mischaracterizes NIST connection modeling in the LS-DYNA model.** Dr. Hulsey claims that volumes of the full-building LS-DYNA model did not have connections modeled, but his evidence for this is a misrepresentation of a different model, the ANSYS model. https://www.metabunk.org/posts/210990/
- **The study was not open.** At the start of the study we were told "*WTC 7 Evaluation is a completely open and transparent investigation into the cause of World Trade Center Building 7's collapse. Every aspect of the scientific process will be posted here and on the university's website so that the public can follow its progress.*" The last such release was in 2015. Nothing has been released since then except videos of Dr. Hulsey giving versions of this slideshow.
- **The study neglects unknowns**. Impact damage from falling WTC1 debris, the actual fire spread and temperatures, the state of the insulation at every spot, and differences between drawings and constructions are all factors that are unknown, and make it impossible make a determination of the exact cause of the collapse.

While it is possible that Dr. Hulsey's study will eventually yield some interesting results, **it is factually incorrect to say that it proves that fire could not have caused the collapse.**

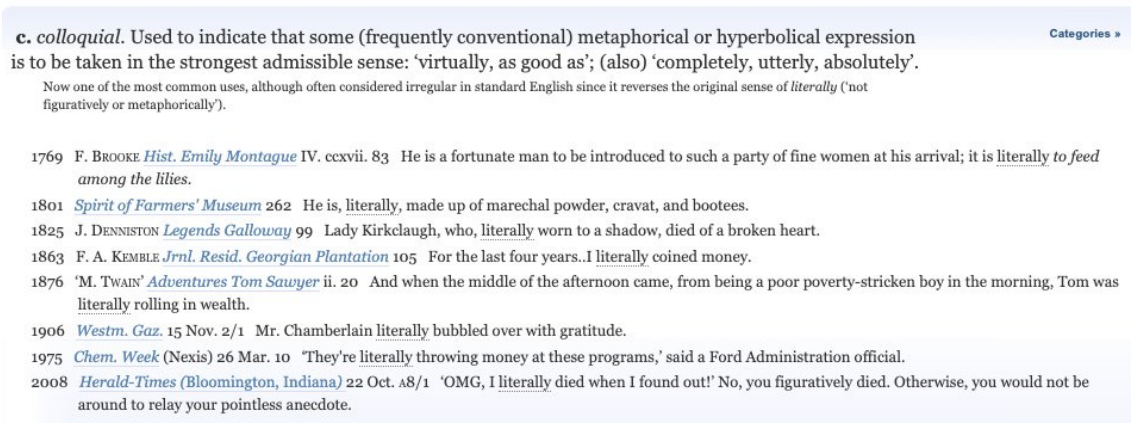
@Prof_Elle @KevinRyan911 @NPR So basically it doesn't encourage people to use the term. So Kevin was wrong.

2019-08-25T21:17:26+00:00
https://twitter.com/_/status/1165734955684524032
@Prof_Elle @KevinRyan911 @NPR But it is a common misconception. How should I have said it? A common mistake? An urban legend? Fake news? Straw man?

2019-08-25T21:15:03+00:00
https://twitter.com/_/status/1165734356909879302
@Prof_Elle @KevinRyan911 @NPR I think the graph is pretty clear. No real increase can be attributed to that one point in time. But the root point here is that the CIA did NOT encourage usage of the term.

2019-08-25T00:22:45+00:00
https://twitter.com/_/status/1165419205929254914
@sapinker The usage of "literally" to mean "virtually, as good as"" dates back to the 1700s. OED calls it colloquial, but they are a bit snooty.
http://pbs.twimg.com/media/ECxmY9RUUAIYLGn.jpg



c. *colloquial.* Used to indicate that some (frequently conventional) metaphorical or hyperbolical expression is to be taken in the strongest admissible sense: 'virtually, as good as'; (also) 'completely, utterly, absolutely'. Categories »

Now one of the most common uses, although often considered irregular in standard English since it reverses the original sense of *literally* ('not figuratively or metaphorically').

1769 F. Brooke *Hist. Emily Montague* IV. ccxvii. 83 He is a fortunate man to be introduced to such a party of fine women at his arrival; it is literally *to feed among the lilies.*

1801 *Spirit of Farmers' Museum* 262 He is, literally, made up of marechal powder, cravat, and bootees.

1825 J. Denniston *Legends Galloway* 99 Lady Kirkclaugh, who, literally worn to a shadow, died of a broken heart.

1863 F. A. Kemble *Jrnl. Resid. Georgian Plantation* 105 For the last four years..I literally coined money.

1876 'M. Twain' *Adventures Tom Sawyer* ii. 20 And when the middle of the afternoon came, from being a poor poverty-stricken boy in the morning, Tom was literally rolling in wealth.

1906 *Westm. Gaz.* 15 Nov. 2/1 Mr. Chamberlain literally bubbled over with gratitude.

1975 *Chem. Week* (Nexis) 26 Mar. 10 'They're literally throwing money at these programs,' said a Ford Administration official.

2008 *Herald-Times (Bloomington, Indiana)* 22 Oct. A8/1 'OMG, I literally died when I found out!' No, you figuratively died. Otherwise, you would not be around to relay your pointless anecdote.

http://pbs.twimg.com/media/ECxmY9RUUAIYLGn.jpg
2019-08-25T00:06:22+00:00
https://twitter.com/_/status/1165415079874985984
@sapinker It's a correct dictionary defined usage.
https://www.merriam-webster.com/dictionary/literally
http://pbs.twimg.com/media/ECxiv0BUUAER58L.jpg

---

literally adverb

lit·er·al·ly | \ ˈli-tə-rə-lē, ˈli-trə-lē, ˈli-tər-lē\

Definition of *literally*

1 : in a literal sense or manner: such as

a : in a way that uses the ordinary or primary meaning of a term or expression
// He took the remark *literally*.
// a word that can be used both *literally* and figuratively

b —used to emphasize the truth and accuracy of a statement or description
// The party was attended by *literally* hundreds of people.

c : with exact equivalence : with the meaning of each individual word given exactly
// The term "Mardi Gras" *literally* means "Fat Tuesday" in French.

d : in a completely accurate way
// a story that is basically true even if not *literally* true

2 : in effect : VIRTUALLY —used in an exaggerated way to emphasize a statement or description that is not literally true or possible
// will *literally* turn the world upside down to combat cruelty or injustice
— Norman Cousins

https://twitter.com/_/status/1162430558120493061

@limitedview @earthisaglobe @Oswald1160 @JPMajor Just make a scale model. Which is what was shown in previosus posts.

Optics scales, because light travels in straight lines. So the projection of an image onto the camera's sensor is a simple geometric transform. (x' = f * x / d)

This is not controversial.

2019-08-16T17:23:50+00:00

https://twitter.com/_/status/1162414679932542976

@limitedview @Oswald1160 @JPMajor @earthisaglobe It's not what you are describing though. The images of the Earth from satellites have the continents in the correction proportions for the altitudes of those cameras (relative to the size of the Earth). Easy to check with Google Earth.

http://pbs.twimg.com/media/ECG59hPUwAAxZsw.jpg

2019-08-15T15:00:15+00:00

https://twitter.com/_/status/1162016155671810048

@milodekiss Trust, yet verify.

Or don't trust at all, just go and figure it out for yourself, then verify.

2019-08-15T14:59:16+00:00

https://twitter.com/_/status/1162015909759766528

@limitedview @JPMajor @earthisaglobe How so? You can change the lens without changing the distance. And you can change the distance without changing the lens.

That seems almost the very definition of separable.

2019-08-14T20:57:21+00:00

https://twitter.com/_/status/1161743636360335360

@limitedview @JPMajor @earthisaglobe If the distortion was caused by the lens, then changing the lens would change the distortion. Since it does not, but changing the DISTANCE changes the distortion, we can only conclude it's a function of distance.

2019-08-14T19:17:07+00:00

https://twitter.com/_/status/1161718409672790017

@limitedview @JPMajor @earthisaglobe The 500 mm lense from that position shows the same image, if it could actually focus, it would look something like this.

http://pbs.twimg.com/media/EB9AlP1UcAAcrc5.jpg

http://pbs.twimg.com/media/EB9AlP1UcAAcrc5.jpg

2019-08-14T19:11:03+00:00

https://twitter.com/_/status/1161716884841984000

@limitedview @JPMajor @earthisaglobe But if we move closer, then we see the distortion. Here's the 10mm view from up close. http://pbs.twimg.com/media/EB8_SvkUIAAFmcT.jpg

---

http://pbs.twimg.com/media/EB8_SvkUIAAFmcT.jpg

2019-08-14T19:08:41+00:00

https://twitter.com/_/status/1161716287250132992

@limitedview @JPMajor @earthisaglobe With a 50-500 zoom lens, close to 500mm zoomed, it look the same, just more detailed. Neither lens has distorted the globe.

http://pbs.twimg.com/media/EB8-ti9U4AA2nq6.jpg

http://pbs.twimg.com/media/EB8-ti9U4AA2nq6.jpg

2019-08-14T19:06:28+00:00

https://twitter.com/_/status/1161715729655197696

@limitedview @JPMajor @earthisaglobe Magnify the globe, you can make out Europe and Aftrica. http://pbs.twimg.com/media/EB8-RsUUcAI3DQe.jpg

---

http://pbs.twimg.com/media/EB8-RsUUcAI3DQe.jpg

2019-08-14T19:05:34+00:00

https://twitter.com/_/status/1161715505389961216

@limitedview @JPMajor @earthisaglobe For example. Here's a 10mm focal length (1.6 crop) photo of a globe. http://pbs.twimg.com/media/EB8-DeYUwAAnttJ.jpg

---

http://pbs.twimg.com/media/EB8-DeYUwAAnttJ.jpg

2019-08-14T19:03:42+00:00

https://twitter.com/_/status/1161715034138894336

@limitedview @JPMajor @earthisaglobe The point is that is a function of the relative distance to the object. The distortion is NOT caused by the lens (unless it's a fisheye). It's caused by the

projection of a 3D image onto a 2D plane.

2019-08-14T18:54:22+00:00

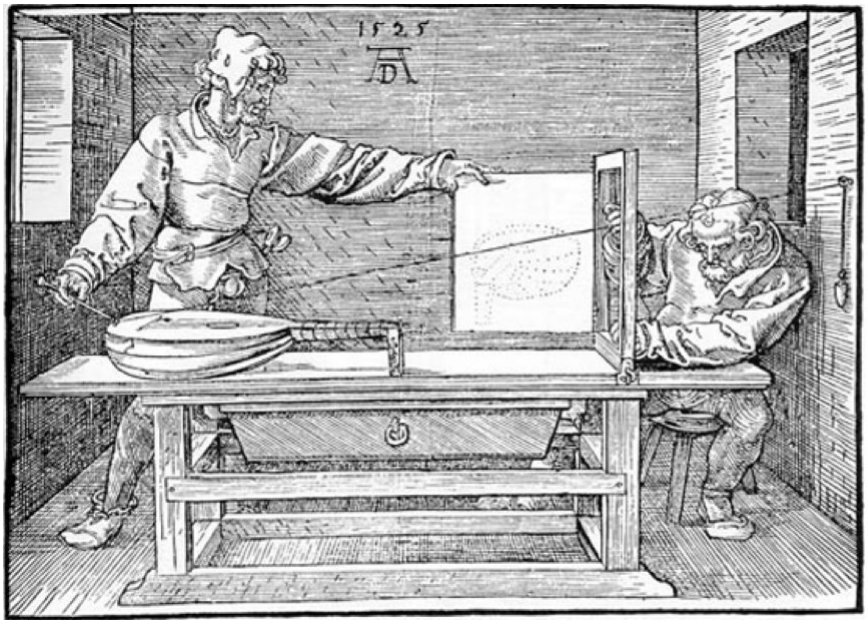
https://twitter.com/_/status/1161712684741435392

@limitedview @JPMajor @earthisaglobe A telephoto lens simply magnifies the middle bit of the same image as wide angle rectilinear lens. Take two photos of the same thing from the same distance with different lenses, and the result will be the same (just different size, but not distorted)

2019-08-14T18:36:32+00:00

https://twitter.com/_/status/1161708197083799553

@limitedview @JPMajor @earthisaglobe The problem here in understanding the face distortions and the planet scale distortions, is a lack of understanding of how a camera actually works, and more specifically how 3D->2D projection works. It's not hugely complex, but can be hard to grasp. http://pbs.twimg.com/media/EB83PrdUcAA88RI.jpg



"The Painter's Manual” - Albrecht Dürer, 1538

http://pbs.twimg.com/media/EB83PrdUcAA88RI.jpg

2019-08-14T18:26:21+00:00

https://twitter.com/_/status/1161705635496378369

@limitedview @JPMajor @earthisaglobe The effect scales to larger objects. Here's the Superdome from about 50m and 300m http://pbs.twimg.com/media/EB8znoFU8AUqxOt.jpg

---

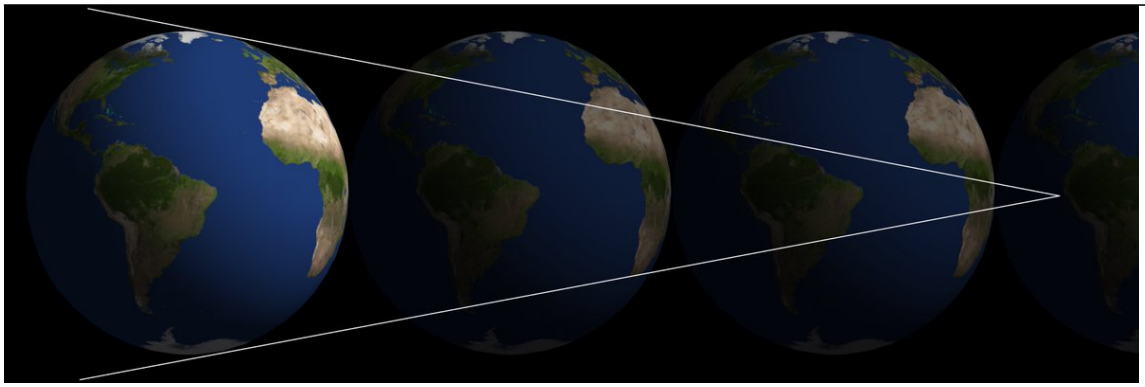
http://pbs.twimg.com/media/EB8znoFU8AUqxOt.jpg

2019-08-14T16:31:24+00:00

https://twitter.com/_/status/1161676708371505152

@earthisaglobe @JPMajor @limitedview It's not that huge of a difference in terms of how much of the Earth you can see though. 2 and bit diameters is quite a ways. http://pbs.twimg.com/media/EB8ayP0UYAAII5z.jpg

---



http://pbs.twimg.com/media/EB8ayP0UYAAII5z.jpg

2019-08-14T16:30:22+00:00

https://twitter.com/_/status/1161676447963967489

@JPMajor @earthisaglobe @limitedview That's not barrel distortion though, if that's what you meant by "barreling". It's just perspective.

2019-08-14T14:42:45+00:00

https://twitter.com/_/status/1161649365510807554

@limitedview @earthisaglobe @JPMajor "adjusting to infinity" only relates to focus. This feature distortion effect has nothing to do with focus. It has to do with A) the distance to the object, and B) The size of the object/features. So the face difference is the same as the continent difference from space. http://pbs.twimg.com/media/EB8BxtyU8AElJWm.jpg

@4thAnon I helped a bit. But it was actually on the AboveTopSecret forum that he started to figure things out. The old Ballast Barrels hoax was the key. He realized that was BS, and so wondered what else might be BS. http://pbs.twimg.com/media/EBn2Xs7U8AAYVul.jpg

During flight tests in 1994, the cabin interior of the prototype *777* was filled with what at first glance looked like aluminum beer kegs. In fact, these 55-gallon barrels contained water. The contents of two dozen barrels in the forward cabin and a like number of barrels in the aft section were pumped back and forth to simulate shifts in center of gravity that would result from passengers moving about. The top photo shows the cabin as it is when the *777* is delivered.

http://pbs.twimg.com/media/EBn2Xs3U8AA-Knr.jpg

http://pbs.twimg.com/media/EBn2Xs7U8AAYVul.jpg

Water tanks provided ballast to simulate passenger and cargo loads for flight testing. Not only could the tanks simulate various amounts of weight, they could also shift the weight fore and aft in flight through connecting pipes to test different center-of-gravity configurations. *Boeing*

@Freedom4thekids @motnevobrev @robbiederman198 @awakenflatearth @OnThisPlane Try that with a mountain over water. Small objects like people have too many complications from refraction.

Plus, there's no road that's level enough and long enough to see the effect of Earth's curvature.

@Freedom4thekids @motnevobrev @robbiederman198 @awakenflatearth @OnThisPlane Things in front of it obscure it.

2019-08-07T16:25:56+00:00

https://twitter.com/_/status/1159138615395381248

@Freedom4thekids @motnevobrev @robbiederman198 @awakenflatearth @OnThisPlane Conversely, I might ask, do you find it strange that 10,000 feet of a 11,000 foot mountain is not visible when it should be visible (if the water surface were flat)

2019-08-07T16:24:40+00:00

https://twitter.com/_/status/1159138298985508864

@Freedom4thekids @motnevobrev @robbiederman198 @awakenflatearth @OnThisPlane It's

not strange at all. I made that simulator using the verifiable refractive properties of air, and normal ray-tracing. The results correspond to what we see. So it's EXPECTED that refraction causes hidden things to be visible.

2019-08-07T16:23:15+00:00

https://twitter.com/_/status/1159137939244244994

@Freedom4thekids @motnevobrev @robbiederman198 @awakenflatearth @OnThisPlane The weather certainly does have an effect - with the mood (visibility) of the sun being the biggest factor. It heats the ground/water, and hence the very lowest layer of air.If your line of sight grazes the horizon, then it's hard to do a simple calculation for where it ends up

2019-08-05T05:35:12+00:00
https://twitter.com/_/status/1158250079456616448
@_Desmoden @Puxley101 They never though to fly over for a better look at these POSSIBLE ALIEN VISITORS!!!!??

2019-08-05T04:17:21+00:00
https://twitter.com/_/status/1158230487841701890
@IBKING46 @luismen1991 I look at individual events. In the case of the videos we don't actually have additional information about those events. Just other, different events reported by different people. So the videos each have to stand alone.

2019-08-05T04:01:46+00:00

https://twitter.com/_/status/1158226564699398145
@IBKING46 @luismen1991 Of different events, in different locations, reported or remembered by different people.

2019-08-05T03:57:09+00:00
https://twitter.com/_/status/1158225401199517696
@_Desmoden @Puxley101 No, I'm saying, based on your broad characterizations of the statistics, that there would only be occasional inexplicable sightings. You'd agree, I take it, that SOME sighting can be pilot error, let's say misidentifying Venus and never figuring it out? Like, occasionally?

2019-08-05T03:54:57+00:00
https://twitter.com/_/status/1158224847761215488
@_Desmoden @Puxley101 So you think the Navy had contact with super high technology, possible alien craft for 9 months, and they never went to check what it was, and only just now updated their pilot reporting guidelines?
Perhaps they just had crap radar system for a while? What's your source of 9mo?

2019-08-05T03:24:54+00:00
https://twitter.com/_/status/1158217287624642561
@Real_StephenLaw @Deepneuron @GarryPNolan @mikeb8637 @alejandrotrojas @AFSUnidentified I'm not suggesting that at all. Nothing at all like that.

2019-08-05T03:23:43+00:00
https://twitter.com/_/status/1158216990885994496
@_Desmoden @Puxley101 Exactly.
What percentage of flights involve an inexplicable UFO sighting?
Pilots occasionally make mistakes, often small mistakes, sometimes large mistakes.

2019-08-05T01:03:13+00:00
https://twitter.com/_/status/1158181630508331008
@GarryPNolan @mikeb8637 Which journal would you recommend?

2019-08-05T01:02:10+00:00
https://twitter.com/_/status/1158181365898043393
@JuenoMT @Deepneuron @zcichy @mikeb8637 @theyre_heeeere Which?

2019-08-04T23:57:51+00:00
https://twitter.com/_/status/1158165179995000832
@Deepneuron @GarryPNolan @mikeb8637 @alejandrotrojas @AFSUnidentified Sure, but I get a lot of feedback into the Metabunk discussion threads. The science is often hammered out over a long time. Look at the main Gimbal thread. 18 months of work, 400 posts. Lots of analysis, boiling down to some pretty solid conclusions.
https://www.metabunk.org/nyt-gimbal-video-of-u-s-navy-jet-encounter-with-unknown-object.t9333/

2019-08-04T23:54:51+00:00
https://twitter.com/_/status/1158164427759214592

@abinksma Well if they are running into them all the time, then there must be a lot of video out there. So I'll wait for some video combined with the testimony of the pilot who took that video.

2019-08-04T23:52:23+00:00

https://twitter.com/_/status/1158163806775853058

@Inquiri70388674 @Deepneuron @GarryPNolan @mikeb8637 @alejandrotrojas I'm not dismissing the pilots. They didn't take these videos. They were not in the plane when these videos were taken.

2019-08-04T23:49:03+00:00

https://twitter.com/_/status/1158162965591281665

@ThomasB57121856 @LevanaLomma1 Why do you ask?

2019-08-04T23:46:43+00:00

https://twitter.com/_/status/1158162377969246208

@_Desmoden @Puxley101 So you'd say in "Go Fast" that the pilots were perhaps being a bit premature in their assessment of the object as fast moving?

2019-08-04T23:45:21+00:00

https://twitter.com/_/status/1158162036599058432

@Deepneuron @GarryPNolan @mikeb8637 @alejandrotrojas @AFSUnidentified What's the big deal here? I've done some analysis of some videos. I actually put quite a bit of time into it, and made some helpful videos to explain it. Why do you think I'm a lazy coward if I don't write it out in scientific paper form.

I'm not afraid of people criticizing me.

2019-08-04T23:41:21+00:00

https://twitter.com/_/status/1158161027285962753

@ThomasB57121856 @LevanaLomma1 If you analyze ANYTHING you'd be hard-pressed not to find a few ppb of some metallic compound in it. Air has "metal" in it (mineral dust). You are breathing "metal" right now. What's your concern here? Aviation exhaust pollution? Look it up.

2019-08-04T23:38:58+00:00

https://twitter.com/_/status/1158160429039808512

@ThomasB57121856 @LevanaLomma1 Why does it matter?

2019-08-04T23:34:59+00:00

https://twitter.com/_/status/1158159426987020288

@_Desmoden @Puxley101 Well yes. The problem being that a lot of people don't take parallax into account when interpreting what an object seems to be doing. This is more of a factor in the "Go Fast" video though.

2019-08-04T23:33:17+00:00

https://twitter.com/_/status/1158159000170455041

@zcichy @theyre_heeeere @JuenoMT @mikeb8637 We all find a niche. I like 3D physics analysis because of my background as video game programmer, where I did lots of 3D physics. UFOs and chemtrails had a lack of people doing good analysis, so there were fun things for me to do.

2019-08-04T23:30:38+00:00

https://twitter.com/_/status/1158158330218479617

@ThomasB57121856 @LevanaLomma1 Here's a more recent thread. I don't think it's a particularly interesting topic. Jet fuel is almost entirely hydrogen and carbon.

https://www.metabunk.org/bunk-archeology-barium-in-jet-fuel-additive-stadis-450-there-isnt-any.t8233/

2019-08-04T23:27:06+00:00

https://twitter.com/_/status/1158157443567968256

@zcichy @theyre_heeeere @JuenoMT @mikeb8637 I believe everything I say. My "job" is not to debunk things, it's to figure out what really happened.

2019-08-04T23:25:01+00:00

https://twitter.com/_/status/1158156919120396289

@abinksma One should not believe something they otherwise would not simply because challenging the belief might be seen as impolite.

Pilots make mistakes, even highly trained ones. A pilot once flew his plane into the ground because he thought it was upside down.

2019-08-04T23:11:58+00:00

https://twitter.com/_/status/1158153632463724546

In #TFTRH Episode 16 I talk to Adam Taylor, a retired 9/11 Truth activist who decided after ten years it wasn't worth continuing advocating for a new investigation into the WTC collapses. It didn't look like it would ever happen.

https://www.tftrh.com/2019/08/04/episode-16-adam-taylor-retired-9-11-truth-activist/

https://www.youtube.com/watch?v=XXvrJHMpVYg

2019-08-04T23:05:45+00:00

https://twitter.com/_/status/1158152071264104448

@ThomasB57121856 @LevanaLomma1 There are all kinds of additives in all kinds of fuels. Not a lot though, parts per million or billion.

And what does that have to do with "chemtrails?"

2019-08-04T23:04:19+00:00

https://twitter.com/_/status/1158151707886379008

@JuenoMT @mikeb8637 @theyre_heeeere @zcichy And you were also incorrect.

2019-08-04T19:40:06+00:00

https://twitter.com/_/status/1158100317814132737

@PostDisclosure @murnut @zcichy @Deepneuron @mikeb8637 @theyre_heeeere So quite possible those three different things that happened at different times, in different locations, reported by different people, all have different causes?

2019-08-04T19:36:06+00:00

https://twitter.com/_/status/1158099310065569792

@Deepneuron @zcichy @mikeb8637 @PostDisclosure @theyre_heeeere I know. I have my name on one peer-reviewed paper. The reviewers didn't find some errors. Didn't change the

conclusion, but once it got a wide readership the errors were pointed out. I prefer starting with a wider audience, more eyes, more accurate.
https://iopscience.iop.org/article/10.1088/1748-9326/11/8/084011

2019-08-04T19:19:45+00:00
https://twitter.com/_/status/1158095194853502976
@zcichy @mikeb8637 @PostDisclosure @Deepneuron @theyre_heeeere Not really. Peer review is about checking your work for errors. I put out videos, accompanied by the math. People check them. They tell me if there's something wrong. I fix it. Things improve.

2019-08-04T19:17:56+00:00
https://twitter.com/_/status/1158094738605535232
@murnut @PostDisclosure @zcichy @Deepneuron @mikeb8637 @theyre_heeeere Multiple pilots reporting different things. Things that don't match the videos. Fravor saw an oval shape that jumped around rapidly then shot off horizontally. Radar showed thing dropping from FL800 at 100+g. Video shows something hot in the distance, just flying away like a jet.

2019-08-04T19:13:51+00:00
https://twitter.com/_/status/1158093710690664448
@PostDisclosure @zcichy @Deepneuron @mikeb8637 @theyre_heeeere If I get something wrong, then I figure out why, explain it and continue. It's like my videos are subject to peer review, but more efficiently than the academic kind.

2019-08-04T19:12:17+00:00
https://twitter.com/_/status/1158093317285937152
@IBKING46 Radar data? Where?

2019-08-04T19:11:51+00:00
https://twitter.com/_/status/1158093208301084672
@mikeb8637 @GarryPNolan @Deepneuron @alejandrotrojas Yes I'm serious. Peer review means a few people read your paper and see if they can spot problems with it. Passing it means they didn't find problems with it. To get good peer review you have to persuade a good journal to consider your paper.

2019-08-04T19:09:42+00:00
https://twitter.com/_/status/1158092664333410304
@mikeb8637 @zcichy @PostDisclosure @Deepneuron @theyre_heeeere I really don't see what your point is. You think academics won't take me seriously? Hello? We're talking about UFOs here. Rightly or wrongly, UFO research is not taken seriously except by aficionados.

2019-08-04T19:06:29+00:00
https://twitter.com/_/status/1158091854946025472
@PostDisclosure @zcichy @Deepneuron @mikeb8637 @theyre_heeeere Where is this rebuttal of the Gimbal Analysis? How about Go Fast?
Does me getting a plane the wrong way around in one example scenario of Flir1 somehow rebut everything?

2019-08-04T19:04:40+00:00

https://twitter.com/_/status/1158091397032865793

@mikeb8637 You know there's peer reviewed papers proving the existence of chemtrails, right? So what exactly would a peer review process prove? Do you even know how that works?

2019-08-04T19:03:27+00:00

https://twitter.com/_/status/1158091090945163265

@zcichy @PostDisclosure @Deepneuron @mikeb8637 @theyre_heeeere Nobody deifies me. The analyses I do stand or fall on their own merits. Nobody says "that must be true, because Mick West said so".

But people DO essentially say that about military pilots. Why exactly do you "believe the testimony"? Is it not possible that someone be mistaken?

2019-08-04T18:58:59+00:00

https://twitter.com/_/status/1158089970529099776

@knightsabers01 "Cute language?" You think the US Navy is just using random "cute language"?

2019-08-04T18:54:53+00:00

https://twitter.com/_/status/1158088936884846592

@knightsabers01 What did they say about this video?

They titled it "gimbal", for one thing. Might that be a clue?

2019-08-04T18:51:33+00:00

https://twitter.com/_/status/1158088100242788353

@mikeb8637 "Peer Reviewed" - You know there's peer reviewed papers proving the existence of chemtrails, right?

My posts and my video are just fine where they are.

You think the lack of peer review is what is stopping TTSA from rebutting my videos?

2019-08-04T18:47:37+00:00

https://twitter.com/_/status/1158087108793270272

@knightsabers01 Of course not. It looks like it's rotating doesn't it? How on earth could they by lying? They are just saying what it looks like to them on the screen.

2019-08-04T18:44:25+00:00

https://twitter.com/_/status/1158086302522155008

@mikeb8637 Papers? I don't have papers. I've got videos and forum posts.

I think the videos actually work much better in conveying things - as I'm analyzing video.

For example, look at this answer to a frequently asked question. How would that be better in a paper? https://youtu.be/ka_bX9Hx1H0

2019-08-04T18:36:40+00:00

https://twitter.com/_/status/1158084354305748992

@mikeb8637 @zcichy @Deepneuron @theyre_heeeere It's not though. Check it out. And check out his specific objection to what I suggest. Basically he didn't seem to understand how it would rotate independently of the horizon, and he thought there would be visible wings. He's wrong.

2019-08-04T18:33:20+00:00

https://twitter.com/_/status/1158083513943375872

@PostDisclosure @Deepneuron @zcichy @mikeb8637 @theyre_heeeere That's why I generally accompany my "debunked!" proclamations with a detailed and verifiable explanation.

UFOs by their nature are hard to conclusively debunk or explain, so it's NOT a term I use much about UFOs:

2019-08-04T18:27:47+00:00

https://twitter.com/_/status/1158082117479174145

UFO enthusiast highly doubt that well-trained US Military pilots would make mistakes. But human factors are often involved in all manner of mishaps. Including this fatal crash in 2012, where the pilot mistakenly thought the plane was upside down.

https://timemilitary.files.wordpress.com/2012/08/acc_f-15e_aib_082212.pdf

http://pbs.twimg.com/media/EBJVK0EU4AEvv5m.jpg

EXECUTIVE SUMMARY
AIRCRAFT ACCIDENT INVESTIGATION
F-15E, T/N 90-0235, SOUTHWEST ASIA
28 MARCH 2012

On Wednesday, 28 March 2012 at approximately 1603 Zulu (2003 local time), the Mishap Aircraft (MA), an F-15E, Tail Number 90-0235, impacted the ground approximately 18 nautical miles west, southwest of the deployed operating location of the 391st Expeditionary Fighter Squadron in Southwest Asia. The Mishap Weapon Systems Officer (MWSO) initiated ejection for the Mishap Crew (MC) and ejected safely with only minor injuries. The Mishap Pilot (MP) was fatally injured when his ejection sequence was interrupted by contact with a 377-foot tower that was part of a large radio tower array. The MA was destroyed after contacting the radio tower and subsequently the ground. The MA loss is valued at $47,094,662.60. The MA caused damage to Host Nation property.

The MC was participating in a large force exercise as the flight lead of a two-ship of F-15Es in a strike package of approximately 27 aircraft. At the conclusion of the tactical portion of the mission, the MC removed their night vision goggles (NVGs) and proceeded back to the base. Below 10,000 feet above mean sea level (MSL), blowing dust and sand obscured the horizon (with or without NVGs). At approximately 3,100 feet MSL, five degrees nose low and in a wings-level attitude, the MP incorrectly interpreted the visual scene in front of him and began a series of abrupt maneuvers that ultimately resulted in him rolling the MA into an inverted attitude 1,800 feet above ground level and 25 degrees nose low. Due to the lack of any significant topographical features, the expected lack of cultural lighting, the reduced visibility and the lack of a discernable horizon, the MP became disoriented by the cultural lighting in the vicinity of the mishap site and incorrectly perceived that the MA was inverted. This misperception caused the MP to roll the MA into a truly inverted attitude, at which time the MWSO became convinced the MP had become disoriented and took control of the MA. After attempting to recover the MA, the MWSO initiated ejection for the MC.

http://pbs.twimg.com/media/EBJVK0EU4AEvv5m.jpg

This would be due to the aforementioned highway lighting in his periphery and the atypical orientation of this isolated "Y" tower. This radio tower in the MP's focal view would have been an unfamiliar shape, wide at the top and narrow at the bottom. A typical radio tower would be the opposite shape, with a wide base and a narrow top (Figure 11). Instead of realizing he was viewing an unusual "Y" shaped tower, the MP may have thought he was viewing a "typical" tower that appeared like a "Y" because he was inverted.

Figure 11. The left image shows a "typical" tower, wide at the bottom and narrow at the top. The right image shows the "Y" tower located north of the tower array.

http://pbs.twimg.com/media/EBJUybNU4AEK_Sx.jpg

https://twitter.com/_/status/1158079937967824896

@Deepneuron @zcichy @mikeb8637 @theyre_heeeere Why? I love data!

2019-08-04T18:17:37+00:00

https://twitter.com/_/status/1158079558232395776

@Deepneuron @mikeb8637 @theyre_heeeere @zcichy Honorable? It's just math, geometry, optics.

Look at Gimbal. Is there something specifically wrong with my analysis of the video?

The video is consistent with an optically rotating IR glare on a distant jet engine. That does not prove what it is, just something to consider.

2019-08-04T16:15:52+00:00

https://twitter.com/_/status/1158048920234102786

@OVNI66 Essentially, although the tracking camera could be flying parallel.

2019-08-04T16:14:34+00:00

https://twitter.com/_/status/1158048590025019392

@ElectroDeeJ It flew that curve. That's why the horizon is at an angle, the jet is banking to the left.

2019-08-04T16:13:33+00:00

https://twitter.com/_/status/1158048336319934464

@ThomasB57121856 @LevanaLomma1 They don't add it to jet fuel because it would instantly ignite it in air. Aluminum Borohydride was used as an experimental chemical ignitor. Most jet engine ignitors are essentially spark plugs. Chemical ignitors have some theoretical benefits, but are rare. http://pbs.twimg.com/media/EBI18CtU0AAjqvC.jpg

http://pbs.twimg.com/media/EBI18CtU0AAjqvC.jpg

2019-08-04T15:54:33+00:00

https://twitter.com/_/status/1158043555249573888

UFOs filmed from fast jet at high zoom, with tracked camera, at an angle, can give the illusion that the object itself is moving sideways. Here Ian Goddard illustrates how parallax makes the Gimbal UFO seem to move relative to distant clouds, and to slow down as the angle narrows http://pbs.twimg.com/tweet_video_thumb/EBIxu4GUYAALxFa.jpg

https://twitter.com/_/status/1157681159481860097

@4thAnon And actual formula one engines have had many advances in technology over the years. We're certainly not using the same engines there. If F1 stopped as a sport in the 1970s, we'd have "lost" the technology there too, as the supply chain and institutional knowledge would degrade.

2019-08-03T15:50:48+00:00

https://twitter.com/_/status/1157680223820738561

@4thAnon No, we were talking about the moon landing technology. The F-1 engine was the engine used on the Saturn 5 rocket. It was a good engine, but it does not make sense to try to rebuild it exactly. Sorry I missed the dash. Technically F-1, not F1.

https://www.youtube.com/watch?v=ovD0aLdRUs0

https://twitter.com/_/status/1157653352424960000

@4thAnon Is your scientist going to argue something about combustion engines?

2019-08-03T14:03:05+00:00

https://twitter.com/_/status/1157653116050743297

@4thAnon No, just a general observation. Your conspiracist leanings make you more suspicious of the US Gov than average, and so you tend to give more credence to RT than the NYT. Maybe just "RT Fan"?

But we were talking about your issues with the combustion engine?

2019-08-02T19:48:17+00:00

https://twitter.com/_/status/1157377599103852545

The latest FBI definition of a conspiracy theories includes: "a conspiracy theory refers to an allegation that may or may not be true"

I expect a few folk will misinterpret this as "FBI FINALLY ADMITS CONSPIRACY THEORIES ARE TRUE!!" http://pbs.twimg.com/media/EA_USayUEAABw2t.jpg

---

(U) Appendix A: Defining Conspiracy Theories

(U) Although many conspiracy theories appear benign or inconsequential, others create serious risks. Throughout history, such conspiracy theories have fueled prejudice, witch-hunts, genocide, and acts of terrorism.[e] In the context of domestic terrorism, extremists often view the activities of alleged conspirators as an existential threat that can only be stopped through drastic, or even violent means. The definitions and notes below are meant to inform discussions within law enforcement as they relate to potentially harmful conspiracy theories and domestic extremism.

(U) A *conspiracy theory* is an attempt to explain events or circumstances as the result of a group of actors working in secret to benefit themselves at the expense of others.[f] Conspiracy theories typically allege wrongdoing by powerful others (for example, public officials, business executives, scientists) or societally marginalized groups (for example, Muslims, Jews), and are most prevalent among individuals with extreme political views.[g] Some conspiracy theories point to weak circumstantial evidence, but ignore stronger evidence that would refute their claims.[h, i] Consequently, they are usually at odds with official or prevailing explanations of events.[j] While a conspiracy theory refers to an allegation that may or may not be true, a *conspiracy* is a true causal chain of events. Real conspiracies involving illegal, antidemocratic, or harmful activities by high-level government officials and political elites have been exposed in the past and it has been argued that such plots have encouraged conspiracism in society.[k]

(U) Relying on the premises that nothing happens by accident, nothing is as it seems, and everything is connected, conspiracy theorists tend to view every bad outcome as the result of an intentional decision by an evil actor, dismiss disconfirming evidence as "fabricated" by the conspirators, and connect a wide range of seemingly unrelated occurences to suggest a larger plot.[l] Despite sharing key characteristics and at times featuring similar themes and intersecting plots, conspiracy theories vary greatly in their scope. Some are narrowly focused on a particular event or set of events whereas others suggest broad, expansive narratives that link multiple conspiracies in complex ways to portray a group of evil actors working to manipulate society on a global scale.

2019-07-29T13:57:29+00:00

https://twitter.com/_/status/1155839768250343424

@PostDisclosure Trump is an idiot. If he knew about UFOs I think you'd be able to tell.

Do you have a link to this subcontractor statement?

2019-07-29T13:37:04+00:00

https://twitter.com/_/status/1155834626771828736

@PostDisclosure I wouldn't say you were delusional. Perhaps wishful.

The President hasn't "chimed in", he was asked, and he said he does not believe there's

anything to it.
And Elizondo is not the director of a government UFO program. It's hard to say WHAT he actually was before TTSA.

2019-07-29T13:22:51+00:00
https://twitter.com/_/status/1155831051467407360
@KenSobers @monsieur_legris @Alien_Scientist @joerogan He probably briefly saw one somewhere. He worked for a contractor (Kirk Meyer) who did some work at at Los Alamos National Lab. Did he every use one though? His description is incorrect, saying his badge "popped out", and the "light shone thought your bones." That's all wrong.

2019-07-29T02:35:42+00:00
https://twitter.com/_/status/1155668191651061760
@UFOengineering It's a small book. If I wanted to make money then I'd make video games again.

2019-07-29T02:33:47+00:00
https://twitter.com/_/status/1155667707490004992
@jim_ripp @PostDisclosure I'm not, I just haven't seen any good evidence of such extraordinary technology. These TTSA videos are certainly not that evidence, as the objects in them are not moving very fast, and don't make any sudden changes in direction.

2019-07-28T20:05:40+00:00
https://twitter.com/_/status/1155570036309803008
@jeffhanson9 Those are shadows. The clouds are in layers at different altitudes, so you get multiple shadows from one contrail, which is above them.

2019-07-28T20:03:31+00:00
https://twitter.com/_/status/1155569495697575936
@JuenoMT @PostDisclosure @Taylor10255 @JeremyCorbell @joerogan I focus on pieces of evidence that the promoters of these stories claim are significant. Lazar talks about these scanners, Corbell makes a big deal about them, Rogan brings them up as evidence, many people think it's significant.
But it's not, and that fact deserves to spread.

2019-07-28T19:44:09+00:00
https://twitter.com/_/status/1155564619013873665
@BurliestCorgi Yeah, that's the theory.

2019-07-28T19:25:56+00:00
https://twitter.com/_/status/1155560034761265152
@ufoofinterest No, it was noted on Reddit last year, well before the Joe Rogan episode.
https://www.reddit.com/r/aliens/comments/aaihtw/i_still_believe_but_i_have_some_bad_newsidentimat/

2019-07-28T19:11:44+00:00
https://twitter.com/_/status/1155556462019526656
@Taylor10255 @JeremyCorbell @joerogan There's a couple of models that Corbell shows to

Lazar.

The thing is, it's quite possible Lazar saw one of these in Los Alomos. What's debunked here is that it somehow confirms he had access to super secret stuff. It's something made from nothing. http://pbs.twimg.com/media/EAlb3SoUwAA5iTt.jpg

https://twitter.com/_/status/1155547666119458816

@PostDisclosure @Blablablablubl2 So who is conspiring here? The government? How is the government's AATIP program predicated upon a government conspiracy? How would that even work?

2019-07-28T18:29:52+00:00

https://twitter.com/_/status/1155545926255013889

@PostDisclosure @Blablablablubl2 So what is the actual "conspiracy of UFOs?"

The simple fact that there are some sightings of things that remain unidentified is neither disputed, nor a conspiracy.

2019-07-28T18:14:03+00:00

https://twitter.com/_/status/1155541944367325184

@Blablablablubl2 @PostDisclosure No, I don't. Elizondo said "bureaucratic challenges and

inflexible mindsets" Where did he state there is a conspiracy by "interests" to suppress knowledge of aliens? http://pbs.twimg.com/media/EAlPFJ4UIAE1hKZ.jpg

OFFICE OF THE UNDER SECRETARY OF DEFENSE
5000 DEFENSE PENTAGON
WASHINGTON, DC 20301-5000

MEMORANDUM FOR: RECORD

SUBJECT: Letter of Resignation & Differed Retirement

Mr. Secretary;

It has been my sincere honor and pleasure to have served with some of America's finest men and women in both peace time and in war. For over 22 years, I have been blessed to learn from, and work with world-class leadership, you certainly being among the very best.

With that in mind, bureaucratic challenges and inflexible mindsets continue to plague the Department at all levels. This is particularly true regarding the controversial topic of anomalous aerospace threats. Despite overwhelming evidence at both the unclassified and classified levels, certain individuals in the Department remain staunchly opposed to further research on what could be a tactical threat to our pilots, sailors, and soldiers, and perhaps even an existential threat to our national security. In many instances, there seems to be a direct correlation the phenomena exhibits with respect to our nuclear and military capabilities. The Department must take serious the many accounts by the Navy and other Services of unusual aerial systems interfering with military weapon platforms and displaying beyond next generation capabilities. Underestimating or ignoring these potential threats is not in the best interest of the Department no matter the level of political contention. There remains a vital need to ascertain capability and intent of these phenomena for the benefit of the armed forces and the nation.

For this reason, effective 4 October 2017, I humbly submit my resignation in hopes it will encourage you to ask the hard questions: "who else knows?", what are their capabilities?", and "why aren't we spending more time and effort on the issue?". As I transition to a new chapter of my life, please know it has been an honor and privilege of a lifetime to serve with you. Rest assure, no matter where the path of life may lead me, I will always have the best interest of the Department and the American people as my guiding principle.

Luis D. Elizondo
Director
National Programs Special Management Staff
OUSD(I)

http://pbs.twimg.com/media/EAlPFJ4UIAE1hKZ.jpg
2019-07-28T18:08:45+00:00
https://twitter.com/_/status/1155540612256374784
@PostDisclosure You said there "a tax payer funded program predicated on the conspiracy of UFO" Yet there's nothing to indicate it's predicated on a conspiracy.
You are instead suggesting that the program later FAILED because of a conspiracy.

2019-07-28T18:05:51+00:00

https://twitter.com/_/status/1155539883722604544

@PostDisclosure So where did they say they "failed BECAUSE interests didn't want it to happen"

2019-07-28T17:46:26+00:00

https://twitter.com/_/status/1155534994703409153

@PostDisclosure Perhaps because the chain of command just though it was BS? Is that a conspiracy?

2019-07-28T17:45:21+00:00

https://twitter.com/_/status/1155534724191752192

@L_torre_s There's lots of stuff on Metabunk. You can often just google your question and add "Metabunk" and something will crop up. Here's one of the longer 9/11 related investigations: https://www.youtube.com/watch?v=hyFIHZwMm4w

---

2019-07-28T17:43:14+00:00

https://twitter.com/_/status/1155534190307229696

@PostDisclosure What was a "shock"? It's mildly exotic pork.

2019-07-28T17:42:40+00:00

https://twitter.com/_/status/1155534047562481667

@PostDisclosure So you are claiming the government knew the government was covering up the government's knowledge of UFOs so they started a program to discover what they already knew?

2019-07-28T17:14:11+00:00

https://twitter.com/_/status/1155526879610195968

@PostDisclosure It's not predicated on a conspiracy theory. The conspiracy theory is that the government is covering up the existence of aliens. Is the government investigating itself?

2019-07-28T17:11:35+00:00

https://twitter.com/_/status/1155526223784660992

@L_torre_s It's tricky to prove a negative of something that might have left very little evidence. But 9/11 conspiracy theories span the spectrum. I'd focus on specific claims involving physical evidence, like the idea that the buildings were destroyed with pre-planted explosives.

2019-07-28T16:56:49+00:00

https://twitter.com/_/status/1155522510198202368

Where does your friend draw their line on the conspiracy spectrum? When you want to help someone out of the rabbit hole, first figure out how deep they have gone, and start from there. https://www.youtube.com/watch?v=bP1EVkomsZA

2019-07-25T21:42:48+00:00

https://twitter.com/_/status/1154507315367649281

@jbb1996_jb @PostDisclosure Iâ□□ve seen the videos.

2019-07-25T16:57:44+00:00

https://twitter.com/_/status/1154435575287390208

@OnlyMe_Q_ @PostDisclosure @Xavi52397609 No, I hate it when people get frustrated. I want to have clear and constructive conversations with people, not rile them up. I like finding explanations that work.

2019-07-25T15:23:45+00:00

https://twitter.com/_/status/1154411923250671617

@OnlyMe_Q_ @PostDisclosure @Xavi52397609 I think it's very strong evidence that they saw something they were not able to identify. Or at least that's how they remember it. Or at the VERY least, that's what they are saying now. Consider all the possibilities. Human failings are

vastly more common than paradigm shifts.

2019-07-24T19:29:51+00:00

https://twitter.com/_/status/1154111470130483201

@PostDisclosure @Xavi52397609 So sounds like radar evidence is pretty dubious, based on what you are saying.

2019-07-24T19:28:51+00:00

https://twitter.com/_/status/1154111220326080512

@PostDisclosure How do you know the government hasn't got secret knowledge of angels? There's been lots of sightings.

2019-07-24T14:37:20+00:00

https://twitter.com/_/status/1154037854999154688

@PostDisclosure @Xavi52397609 What did the radar show exactly? What was the magnitude, direction, and speed of the movements?

2019-07-24T14:36:29+00:00

https://twitter.com/_/status/1154037643748864004

@PostDisclosure It's not as big a topic as you think. You have a very skewed perspective because it's a passion for you. Very few people get into it qua conspiracy theory. Mostly it's comparable to ghosts or angels.

I like it because it's fun identifying things. That's all.

2019-07-24T14:30:06+00:00

https://twitter.com/_/status/1154036036969754625

@PostDisclosure Maybe. Depends on what book gets out first.

2019-07-24T14:28:57+00:00

https://twitter.com/_/status/1154035744370855936

@PostDisclosure @Xavi52397609 And yet, curiously, it does not match the observations, or the video. Almost as if they were all different things.

2019-07-24T13:14:12+00:00

https://twitter.com/_/status/1154016933655662593

@murnut @PostDisclosure @Xavi52397609 Ruling things out is their first problem. When dealing with data that's insufficient to identify things, you generally can't rule things out either. Chilean NAVY spend 2 years ruling out everything, and declared it all ruled out. But then it was an A340. Never go full ruled-out.

2019-07-24T13:11:28+00:00

https://twitter.com/_/status/1154016245101944832

@PostDisclosure @Xavi52397609 How many witnesses saw exactly the same thing and had it exactly backed by radar?

Fravor didn't see his Tic-Tac drop from the sky at 100g, he saw it fly off horizontally. So does the radar back him up? Then the Flir1 footage is different again.

2019-07-24T13:05:32+00:00

https://twitter.com/_/status/1154014751975886851

@PressToDigitate @PostDisclosure @Xavi52397609 I genuinely think you are incorrect. Clean energy in particular would be impossible to suppress for decades on a global scale.

2019-07-24T13:02:18+00:00

https://twitter.com/_/status/1154013937945288704

@PostDisclosure @Xavi52397609 You have some statistics?

2019-07-24T12:54:46+00:00

https://twitter.com/_/status/1154012044577738752

@PostDisclosure @Xavi52397609 Or even the Science Channel's "Go-Fast and Gimbal Revisited - The errors in Mick West's Trigonometry."

If I was wrong about something then I want to understand WHY I was wrong, and I see no problem talking about it.

I'm pretty sure my trig is right though.

2019-07-24T12:47:50+00:00

https://twitter.com/_/status/1154010299369791488

@PostDisclosure @Xavi52397609 No. It seems like a remarkably unlikely scenario, and there would be more pressing matters to discuss. But wouldn't you like to eventually see the History Channel special "Our Zeta Reticuian Overlords - What Skeptics Got Wrong"

2019-07-24T12:42:35+00:00

https://twitter.com/_/status/1154008978226991105

@PressToDigitate @PostDisclosure @Xavi52397609 I don't think even UFO Jesus agrees with your version of imagined things that will be disclosed. Are you going to arrest him too?

It might seem obvious to you. But not to everyone else. So perhaps your case isn't actually that obvious. Perhaps you need to lay it out a bit better?

2019-07-24T12:29:31+00:00

https://twitter.com/_/status/1154005691532599296

@PressToDigitate @PostDisclosure @Xavi52397609 What exactly is the crime you envisage me being charged with?

2019-07-23T13:30:02+00:00

https://twitter.com/_/status/1153658530714406914

@Rainmaker1973 Here's a related effect, a "beam of light" that looks like it's coming down from the heavens. But it's just a combination of lightning and a rolling shutter.

http://pbs.twimg.com/media/D_sDmZgUEAADRqY.jpg

2019-07-15T18:49:29+00:00

https://twitter.com/_/status/1150839820274393088
@PstarmanUa @mesolithicguy @DaveFalch @TTSAcademy Graves does not give us much to go by. He says he personally saw only flashes of light. He says someone else saw a cube in a sphere. He says someone else saw something fly between two planes. He describes a video with no real resemblance to the Gimbal video. What's to dispute?

2019-07-15T18:37:26+00:00
https://twitter.com/_/status/1150836786349801472
@PstarmanUa @mesolithicguy @DaveFalch @TTSAcademy Well, OBVIOUSLY a plane cannot rotate 90*, stay that way, and maintain altitude. A child who likes planes could tell you that. Yes, Ryan is 100% correct on that point that nobody has ever argued with.

2019-07-15T18:35:32+00:00
https://twitter.com/_/status/1150836308366880769
@PstarmanUa @mesolithicguy @DaveFalch @TTSAcademy He says " At this time is pretty much where you see this video, where these guys are out of the picture, and it's just this guy that's stationary. "
But the gimbal object is not stationary.
It's all edited so much it's hard to see exactly what he's referring to.

2019-07-15T17:28:13+00:00
https://twitter.com/_/status/1150819368298668032
@PstarmanUa @mesolithicguy @DaveFalch @TTSAcademy I don't see anywhere that says or even implies that the pilots that took the video were under his command, or that he personally saw anything other than distant flashes of light.

2019-07-15T16:05:42+00:00
https://twitter.com/_/status/1150798603566211072
@PstarmanUa @mesolithicguy @DaveFalch @TTSAcademy He says nothing about "command" in that segment.

2019-07-15T16:00:32+00:00
https://twitter.com/_/status/1150797303461994496
@PstarmanUa @mesolithicguy @DaveFalch @TTSAcademy Yes. I've watched it. At 04:40, Graves says "It's not that I'm seeing a bright physical object, I'm just seeing a flash/shine out there."
That's all he says he saw.

2019-07-15T15:58:32+00:00
https://twitter.com/_/status/1150796800372047872
@PstarmanUa @mesolithicguy @DaveFalch @TTSAcademy No he didn't. He said "I'll never forget those voices. I know those guys, yeah."

2019-07-15T14:59:33+00:00
https://twitter.com/_/status/1150781955828416512
@PstarmanUa @mesolithicguy @DaveFalch @TTSAcademy "His command" meaning what exactly? Did he use the words "my command"? Why don't you quote what he said?

My point here is that we don't have anyone who actually took the video.

2019-07-15T14:52:41+00:00

https://twitter.com/_/status/1150780226915299329

@PstarmanUa @mesolithicguy @DaveFalch @TTSAcademy You said "Ryan Graves confirmed that the footage of the go fast video was his and another pilot. Both pilots ... confirmed the videos was taken by them " - So that's not true.

2019-07-15T12:44:30+00:00

https://twitter.com/_/status/1150747968393232384

@PstarmanUa @mesolithicguy @DaveFalch @TTSAcademy What did Graves say exactly? Which episode, and at what time?

2019-07-15T12:10:17+00:00

https://twitter.com/_/status/1150739360737685504

@chdescantes They are internal lens reflections, you can see they mirror the lights exactly.

2019-07-14T16:22:17+00:00

https://twitter.com/_/status/1150440388471037952

@mesolithicguy @PstarmanUa @DaveFalch @TTSAcademy The videos and the eyewitness accounts are for different events, so I consider them separately. If there's a good explanation (like a distant jet) for the video, then that does not mean the eyewitnesses saw a distant jet. It just means there's a good explanation FOR THE VIDEO.

2019-07-14T16:19:20+00:00

https://twitter.com/_/status/1150439647958278144

@cravingcannolis Yes, there's been some significant research into that exact question. Like many climate related questions it's a complex mutli-variable situation. Less sunlight, but more diffuse light, and lower heat peaks.
https://www.pbs.org/newshour/science/geoengineering-to-combat-global-warming-may-harm-major-crops

---

2019-07-14T03:27:38+00:00

https://twitter.com/_/status/1150245440132018176

@DaveFalch @Oswald1160 @mvtatertot @PostDisclosure @paulsanderson @Aviation_Intel

@PapayaBoei @michaelgruso So let's stop waving credentials around and get down to the nitty-gritty. Is it at all possible that this is a just the rotating glare of a distant jet engine?
If not, then why not, exactly.

2019-07-14T03:25:32+00:00

https://twitter.com/_/status/1150244913168015360

In #TFTRH Episode 13, I talk to professor David Keith, a well-known expert in the largely theoretical field of geoengineering (deliberately modifying the Earth's climate) who has become an often demonized target for "chemtrail" conspiracy theorists

https://www.youtube.com/watch?v=LVAxh39hlog

2019-07-14T03:23:38+00:00

https://twitter.com/_/status/1150244435197739008

@DaveFalch @Oswald1160 @mvtatertot @PostDisclosure @paulsanderson @Aviation_Intel @PapayaBoei @michaelgruso Neither do you.

2019-07-13T22:30:44+00:00

https://twitter.com/_/status/1150170724901896193

@starfleet_jraza @TTSA_Agent_001 @Inquiri70388674 @Deepneuron @murnut @theyre_heeeere @mesolithicguy @Th_Unidentified @AFSUnidentified @Aviation_Intel I'd looked at the Nimitz one. Not really very good. They say the object was actually moving at 40g instead of losing lock. It's obvious it was losing lock because of FOV changes. So huge chunks of their assessment was based on that mistake.

2019-07-13T22:26:17+00:00

https://twitter.com/_/status/1150169606503276544

@starfleet_jraza @TTSA_Agent_001 @Inquiri70388674 @Deepneuron @murnut @theyre_heeeere @mesolithicguy @Th_Unidentified @AFSUnidentified @Aviation_Intel It's just part of the HUD. Probably showing the relative position of the locked target.

2019-07-13T21:58:26+00:00

https://twitter.com/_/status/1150162597435416576

@ctfallen Buoyancy effects would be much smaller. Las Vegas is at 2000 feet, my house (in the Sierra Foothills) is at 1100 feet, very little pressure difference.
I also did Denver vs. Albuquerque, same altitude, significant difference from latitude.

2019-07-13T18:26:26+00:00

https://twitter.com/_/status/1150109244491911168

@mike18499668 @TheChilterns I think Elizondo is greatly misrepresenting things.

2019-07-13T18:19:26+00:00

https://twitter.com/_/status/1150107483555241984

@TTSA_Agent_001 @mesolithicguy @Inquiri70388674 @Th_Unidentified @AFSUnidentified @murnut @Aviation_Intel @USNavy They do have lots of humans.

2019-07-13T18:18:21+00:00

https://twitter.com/_/status/1150107211198128130

@mike18499668 @TheChilterns Why? We've got zero context about why these videos even

exist as discrete items. They might just have been training videos, like "here's a problem you might see with a gimbal lock", or "here's where things seem to go fast, but don't". DoD is silent so far.

2019-07-13T18:12:07+00:00

https://twitter.com/_/status/1150105641878351873

@theyre_heeeere @mesolithicguy @Inquiri70388674 @Th_Unidentified @AFSUnidentified @murnut @Aviation_Intel My "job" is to figure out what things really are. I'd love for UFOs to be real, it would be far more exciting. But math is math.

2019-07-13T18:09:32+00:00

https://twitter.com/_/status/1150104989211090945

@mesolithicguy @Inquiri70388674 @Th_Unidentified @AFSUnidentified @murnut @Aviation_Intel No, I'm saying it's probably mistakes.

2019-07-13T18:04:57+00:00

https://twitter.com/_/status/1150103835852996608

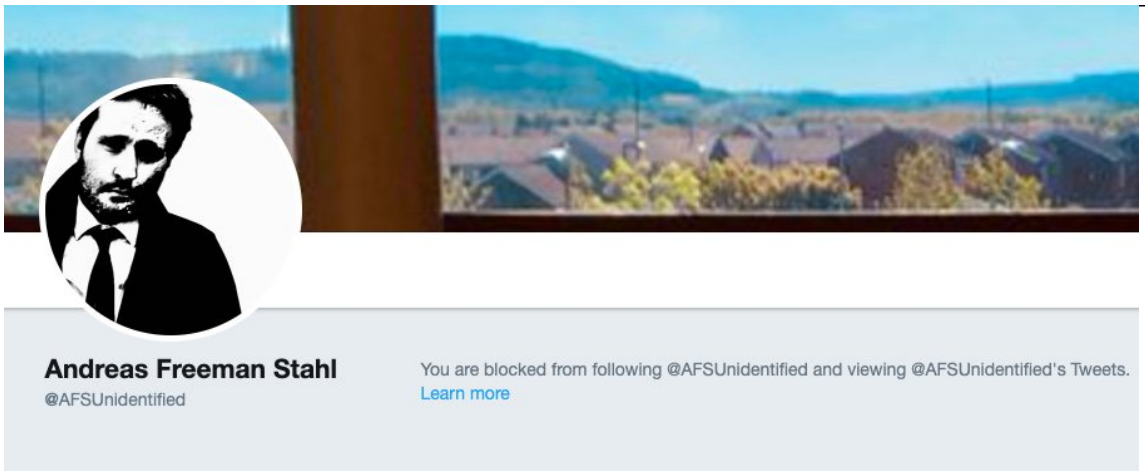
@mike18499668 @TheChilterns Huge mistakes? All we see is a few seconds of video. It may well have all been resolved a few seconds later.

2019-07-13T18:00:46+00:00

https://twitter.com/_/status/1150102786232614916

@Th_Unidentified @AFSUnidentified @murnut @Aviation_Intel Who is ignoring? I'd LOVE to have some relevant data. But accounts of different events are not relevant. The Gimbal video stands alone, so I analyze it in that context. http://pbs.twimg.com/media/D_X8Jv5U0AAlZKs.jpg

---



http://pbs.twimg.com/media/D_X8Jv5U0AAlZKs.jpg

2019-07-13T17:57:38+00:00

https://twitter.com/_/status/1150101997602820096

@JasonAlexan1986 @Inquiri70388674 I'd happily listen to the pilots who took this video, but they remain silent. Eyewitness accounts of one event are not that useful in analyzing a different event.

2019-07-13T17:55:26+00:00

https://twitter.com/_/status/1150101444206329856

@UFOengineering No, it's just me.

2019-07-13T17:53:31+00:00

https://twitter.com/_/status/1150100961932615681
@mike18499668 @TheChilterns How do you know they didn't?
Sometimes pilots identify things many miles away as being "in their vicinity", so they end up looking in the wrong place, and asking the wrong people. Like the Chilean Navy case.

2019-07-13T17:51:46+00:00
https://twitter.com/_/status/1150100519349903361
@Inquiri70388674 @Aviation_Intel Well that not a plane, that's an IR glare from the engine.

2019-07-13T17:31:12+00:00
https://twitter.com/_/status/1150095345012989954
@TTSA_Agent_001 And how do you know this?

2019-07-13T17:07:42+00:00
https://twitter.com/_/status/1150089429790257153
@TheChilterns Your statement is self-contradictory. If humans have something then human possess it. And as noted, lots of humans here, no evidence of aliens.

2019-07-13T16:07:06+00:00
https://twitter.com/_/status/1150074179011485696
@TheChilterns @Aviation_Intel Because the planet is full of humans, not aliens.

2019-07-13T15:49:40+00:00
https://twitter.com/_/status/1150069794281967624
@TheChilterns @Aviation_Intel In order: fighter jet, large jet, drone, fake, sun glare, advanced human craft, novel natural phenomenon, alien technology craft, alien craft, glitch in the matrix, magic, angel, something else.

2019-07-13T15:12:32+00:00
https://twitter.com/_/status/1150060449209040896
@TheChilterns @Aviation_Intel Yes I do. I start off with a position of not knowing what it is. I gather more information and I perform analyses and those point very strongly to it being man-made. But I always keep other possibilities on the list.

2019-07-13T14:22:24+00:00
https://twitter.com/_/status/1150047831979253761
@DaveFalch @Oswald1160 @PostDisclosure @paulsanderson @Aviation_Intel @mvtatertot @PapayaBoei @michaelgruso Oswald is referring to the actual motion of the camera required to keep the target centered, not the detection/calculation component of tracking.

2019-07-13T13:34:53+00:00
https://twitter.com/_/status/1150035873649455104
@Oswald1160 @mvtatertot @DaveFalch @PostDisclosure @paulsanderson @Aviation_Intel @PapayaBoei @michaelgruso And all these explanation gloss over the complexity of the optical path and the nature of the gimbal lock/singularity correction around +/- 3Â°. If you want a fuller understanding, read Raytheon's patent EP2525235B1, section 36-38
https://patents.google.com/patent/EP2525235B1/
http://pbs.twimg.com/media/D_W_CkxU4AA8Ayf.jpg

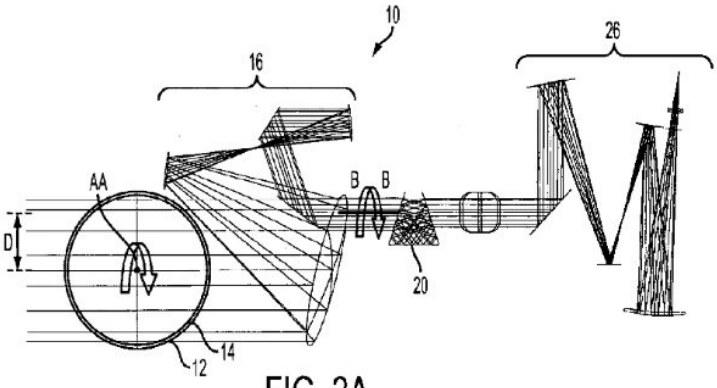


FIG. 2A

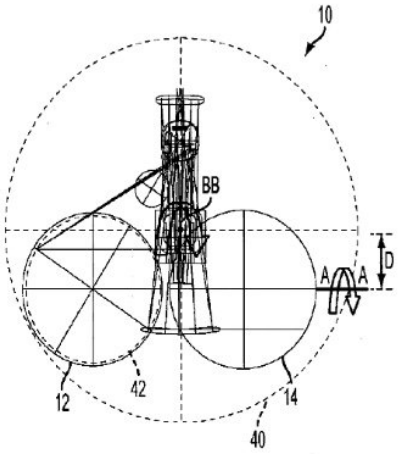

FIG. 2B

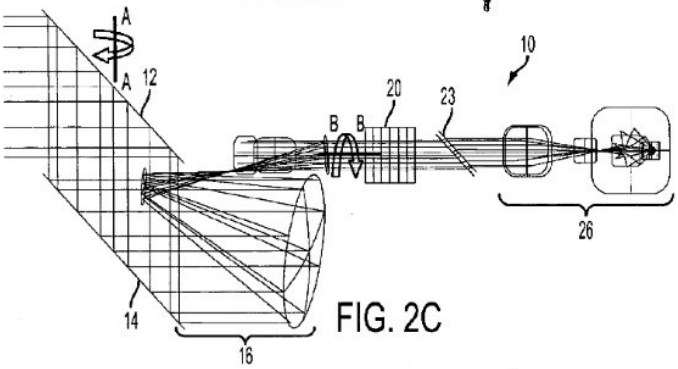

FIG. 2C

http://pbs.twimg.com/media/D_W_CkxU4AA8Ayf.jpg
2019-07-13T13:22:34+00:00
https://twitter.com/_/status/1150032774339784704
@Oswald1160 @mvtatertot @DaveFalch @PostDisclosure @paulsanderson @Aviation_Intel @PapayaBoei @michaelgruso Minor point, but the IR derotation mechanism is probably reflective, not refractive. i.e. mirrors rather than a prism, as IR doesn't like going through things. https://patents.google.com/patent/EP1031060B1/
http://pbs.twimg.com/media/D_W8XLhVUAEZzLI.jpg

[0021] The IR/CCD optical bench houses an IR sensor receiver 22, the time multiplexed modulated infrared (IR) reference source 21 that is mechanically aligned to the center of the field of view of the IR sensor receiver 22, a multispectral beam combiner 27 that combines beams of the coaligned IR sensor receiver 22 and the IR reference source 21. In the IR optical path is an IR imager 29 (or IR imaging optics 29), a focus mechanism 24, a reflective derotation mechanism 25 that derotates the IR beam to keep the IR image erect, and a relay beam expander 26 that expands the beams associated with the coaligned IR sensor receiver 22 and IR reference alignment source 21.

[0022] The IR/CCD optical bench 42 also houses a visible CCD sensor receiver 32, the time multiplexed modulated CCD optical reference source 31 that is mechanically aligned to the center of the field of view of the CCD sensor receiver 32, a beam combiner 33 that combines the coaligned beams associated with the CCD sensor receiver 32 and the CCD reference source 31. In the optical path is a visible imager 36 (or visible imaging optics 36), a focus mechanism 34 and a refractive derotation mechanism 35 that derotates the visible channel beam to keep the visible image erect.

http://pbs.twimg.com/media/D_W8XLhVUAEZzLI.jpg

2019-07-13T13:00:41+00:00

https://twitter.com/_/status/1150027265515773952

@ValidatedM @TheChilterns Imagination is not the limiting factor here. It's very easy to imagine alien spaceships or advanced secret human technology or trans-dimensional magic. Trivial, almost, as such things suffuse popular culture. But I'm trying to figure out what it actually is.

2019-07-13T12:57:36+00:00

https://twitter.com/_/status/1150026489569525760

@TheChilterns @Aviation_Intel In my experience, most things are prosaic. So in the absence of evidence that this video shows something extraordinary I think it's perfectly reasonable to assume it most likely does not.

Everything is possible, but not everything is equally probable.

2019-07-13T12:55:00+00:00

https://twitter.com/_/status/1150025837434961921

@TheChilterns @ValidatedM It's impossible for a conventional craft to rotate 90 degrees and maintain altitude. So if there's no explanation for the apparent rotation then it must be something else. With the glare as an explanation it moves "conventional craft" to the top of the list of possibilities.

2019-07-13T00:14:51+00:00

https://twitter.com/_/status/1149834539264442368

@Aviation_Intel @DaveFalch @Oswald1160 @mvtatertot @PapayaBoei @michaelgruso Works for me.

2019-07-13T00:09:01+00:00

https://twitter.com/_/status/1149833070461083650

@Aviation_Intel @DaveFalch @Oswald1160 @mvtatertot @PapayaBoei @michaelgruso Would the ATFLIR guy (or the others) go on the record with an opinion about the "rotating glare" explanation?

2019-07-13T00:07:53+00:00

https://twitter.com/_/status/1149832785143590912

@Aviation_Intel Unfortunately people often jump to conclusions without really watching or understanding the whole video. It's partly my fault for not making everything explicit - but I've tried to fix misunderstandings in subsequent videos.

2019-07-13T00:03:01+00:00

https://twitter.com/_/status/1149831562340384771

@Aviation_Intel Oh yes, It's almost certainly a jet engine, possibly on another fighter jet, or maybe on a more distant larger plane. A jet engine is very hot, so the glare is large, like from a bright light.

2019-07-12T23:52:16+00:00

https://twitter.com/_/status/1149828854288019456

It's been tricky to explain why, in relation to the "Gimbal" UFO video, the glare (the "UFO") rotates when the horizon does not. If the camera is rotating then why doesn't everything rotate? The answer is "derotation." A bit confusing. I try to explain.
https://www.youtube.com/watch?v=ka_bX9Hx1H0

2019-07-12T23:49:24+00:00

https://twitter.com/_/status/1149828134050471937

@DaveFalch @Aviation_Intel @Oswald1160 @mvtatertot @PapayaBoei @michaelgruso Here's a video that explains the common question of why the glare rotates when the horizon does not.
https://www.youtube.com/watch?v=ka_bX9Hx1H0

2019-07-12T22:54:52+00:00

https://twitter.com/_/status/1149814408358400000

@Mikelynette @mvtatertot @DaveFalch @PapayaBoei @Aviation_Intel @michaelgruso Yes, that's the region I always point out where the rotation is most obvious. You can see it in other regions of the sky too. It's quite clearly synced with the rotation of the "UFO" (the glare) and nothing else.

2019-07-12T22:50:00+00:00

https://twitter.com/_/status/1149813185412624384

@DaveFalch @mvtatertot @Aviation_Intel @Oswald1160 @PapayaBoei @michaelgruso Is a glare of a hot object, like a jet engine or two. The SHAPE of the glare is some function of the camera. So the rotation/derotation causes the shape of the glare to rotate independently of the horizon.

2019-07-12T22:48:24+00:00

https://twitter.com/_/status/1149812783984173057

@DaveFalch @mvtatertot @Aviation_Intel @Oswald1160 @PapayaBoei @michaelgruso The derotation is required to correct for the gimbal problem. It's NOT there to correct for banking, the display is supposed to show the bank angle. That's why the like plane icon in the middle is parallel to the horizon.

2019-07-12T22:43:18+00:00

https://twitter.com/_/status/1149811499264704512

@DaveFalch @Aviation_Intel @Oswald1160 @mvtatertot @PapayaBoei @michaelgruso Me too.

2019-07-12T22:42:25+00:00

https://twitter.com/_/status/1149811275787935744

@mvtatertot @Oswald1160 @DaveFalch @PapayaBoei @Aviation_Intel @michaelgruso I'm not ignoring him. I've talked to him quite a bit online.

What, you think I faked the videos I made of rotating glares?

2019-07-12T19:39:23+00:00

https://twitter.com/_/status/1149765213052215297

@mvtatertot @Aviation_Intel @Oswald1160 @DaveFalch @PapayaBoei @michaelgruso There's a more detailed explanation of why the glare rotates differently, here: https://www.metabunk.org/the-shape-and-size-of-glare-around-bright-lights.t10596/

2019-07-12T00:43:49+00:00

https://twitter.com/_/status/1149479441170440192

@mvtatertot @DaveFalch @PapayaBoei @Aviation_Intel @michaelgruso Sorry but I think you are misunderstand the explanation here. The rotation is an unwanted but necessary gimbal correction. The horizon is then de-rotated, so just the camera artifacts (glare and banding) rotate.

2019-07-12T00:02:02+00:00

https://twitter.com/_/status/1149468926121611265

@mvtatertot @DaveFalch @PapayaBoei @Aviation_Intel @michaelgruso In my gif above, the object (glare) and the light streaks in the sky, are rotating when the horizon is not rotating.

2019-07-11T23:00:15+00:00

https://twitter.com/_/status/1149453375181770752

@mvtatertot @DaveFalch @PapayaBoei @Aviation_Intel @michaelgruso Because the ATFLIR system has a derotation step to keep the horizon parallel to the actual horizon (and the horizon indication - the L shaped lines).

The glare though is an artifact of some component of the camera, so rotating the camera causes rotation of the glare independently

http://pbs.twimg.com/tweet_video_thumb/D_NwSVyUwAA1DQK.jpg

2019-07-11T15:11:10+00:00

https://twitter.com/_/status/1149335329599475713

@DaveFalch @PapayaBoei @mvtatertot @Aviation_Intel @michaelgruso I'm sorry Dave, but "the rotation seems independent of the horizon and unnatural" is MY argument. The fact that it's independent of the horizon is the evidence that proves it's a camera artifact. The unwanted light rotates when the horizon does not. https://www.youtube.com/watch?v=4Btns91W5J8

2019-07-11T07:08:31+00:00

https://twitter.com/_/status/1149213866057822208

@DaveFalch @mvtatertot @Aviation_Intel @michaelgruso Your videos are very useful, but they are shot on different equipment, in different circumstances - a fixed, ground-based camera position and relatively short distances.

2019-07-10T21:35:55+00:00

https://twitter.com/_/status/1149069767124250625

@BKatakis @keithkloor I know what you are talking about. The rotation of the glare independently of the horizon is the entire point.

2019-07-10T21:25:51+00:00

https://twitter.com/_/status/1149067233395560449

@BKatakis @keithkloor The cloud tops are not supposed to rotate. They are direct images, not glares. Glares often cover the plane, especially if itâ□□s flying away.

2019-07-10T19:42:21+00:00

https://twitter.com/_/status/1149041183810678784

@BKatakis @keithkloor Which bit is wrong?

2019-07-09T15:45:48+00:00

https://twitter.com/_/status/1148619269967532032

Hmm, I guess the title is "Simply Mick West", but those ain't the lyrics :)

2019-07-09T15:44:50+00:00

https://twitter.com/_/status/1148619026941091840

Someone made a song called "F**k off Mick West", sung to the tune of "Simply The Best." The video is kind of funny.

I had a fun chat with Hardy Haberland yesterday. We talked about how I became a video game programmer, the Neversoft and Tony Hawk days, and how I ended up as a writer and debunker.

https://twitter.com/HardyHaberland/status/1146311411401969664

2019-07-02T22:51:58+00:00

https://twitter.com/_/status/1146189800245846017

@jason_quitt @UFOengineering Those white specks? Could be something tiny really close to the drone.

2019-07-02T22:47:08+00:00

https://twitter.com/_/status/1146188583776030720

@jason_quitt @UFOengineering You sure you're not just looking at the propellers?

2019-07-01T22:20:21+00:00

https://twitter.com/_/status/1145819457765466114

@JeremyB018 @Jay09784691 @red_pill_junkie If there's one closer to the original, then I want that one. Apparently there were leaked files, flir_981.mp4, etc. But nobody is sharing them.

http://ufos-scientificresearch.blogspot.com/2018/08/aatip-documents-found-on-us-website.html

---

2019-07-01T22:04:42+00:00

https://twitter.com/_/status/1145815519972352002

@Jay09784691 @JeremyB018 @red_pill_junkie But both are worse than the original. No matter how small the original was.

2019-07-01T21:53:51+00:00

https://twitter.com/_/status/1145812789363015680

@Jay09784691 @JeremyB018 @red_pill_junkie Re-encoding with a lossy algorithm will lose information. With a higher bit-rate less information is lost. So the 12 Mbps file is closer to the original than the 5 Mbps file.

But the original file (or at least next file up the chain) has more information in it. I want that

one.

2019-07-01T21:46:34+00:00

https://twitter.com/_/status/1145810954229207041

@Inquiri70388674 Does not appear to be different to f4-2007.mpg, which has always been on http://archive.org

---

2019-07-01T21:41:12+00:00

https://twitter.com/_/status/1145809603524874240

@Jay09784691 @JeremyB018 @red_pill_junkie I understand how videos are encoded. What I want is to get the video that is the closest to the in-camera original. Currently, this is the 12 Mbps version. I understand a lot of what it is encoding is artifacts, but it's also actual information. But I'd like the original.

2019-07-01T21:32:24+00:00

https://twitter.com/_/status/1145807389976698880

@Jay09784691 @JeremyB018 @red_pill_junkie Or someone could just email me the video(s). mick@mickwest.com

---

2019-07-01T21:31:40+00:00

https://twitter.com/_/status/1145807204538150913

@Jay09784691 @JeremyB018 @red_pill_junkie No, I'm taking a screenshot of the video from the New York Time site that has overlaid captions to show you the spot I'd like YOU to take a screenshot. TTSA has an overlaid logo. So you should be able to take a screenshot, in HD, of that 5248 position in the video to prove it

---

2019-07-01T21:24:23+00:00

https://twitter.com/_/status/1145805370582949888

@Jay09784691 @JeremyB018 @red_pill_junkie Prove it. Post a screenshot with the timestamp at 5248.

And explain why you can't just give them to me. What's the restriction.
http://pbs.twimg.com/media/D-a3nUzVUAAQOQZ.jpg

http://pbs.twimg.com/media/D-a3nUzVUAAQOQZ.jpg

2019-07-01T20:38:27+00:00

https://twitter.com/_/status/1145793811760631808

@Jay09784691 @red_pill_junkie @nytimes @TTSAcademy @lesliekean @helenecooper @ralphblu @tomdelonge If you have them, then why does the public not have them?

I'm no saying that there's something "hidden". I'm saying you'd get much better results from public analysis by letting the public have the raw video.

2019-07-01T20:13:26+00:00

https://twitter.com/_/status/1145787517108551680

@Jay09784691 @red_pill_junkie @nytimes @TTSAcademy @lesliekean @helenecooper @ralphblu @tomdelonge Have you compared them?

2019-07-01T20:12:00+00:00

https://twitter.com/_/status/1145787157904158721

@Jay09784691 @red_pill_junkie @nytimes @TTSAcademy @lesliekean @helenecooper @ralphblu @tomdelonge No, but the lower bit rate version has LOST information.

2019-07-01T20:11:24+00:00

https://twitter.com/_/status/1145787005659299841

@OKftl @nytimes @TTSAcademy @lesliekean @helenecooper @ralphblu @tomdelonge If the original are not cleared then copies are not cleared. Top secret documents do not become declassified just because they are photocopied.

2019-07-01T20:09:15+00:00

https://twitter.com/_/status/1145786463709085696

@Jay09784691 @red_pill_junkie @nytimes @TTSAcademy @lesliekean @helenecooper @ralphblu @tomdelonge I know. But what was initially released was a lower bit rate. You can see more detail in the higher bit rate video.

2019-07-01T15:41:19+00:00

https://twitter.com/_/status/1145719038770679814

@JeremyB018 I used Downie by @charliemonroe, it's great.

2019-07-01T14:37:00+00:00

https://twitter.com/_/status/1145702850980241410

@_Desmoden There's only one data stream for this video (unless you count the audio). There's no DIRECT link from any other data to this video.

Other things reportedly happening at around the same time are NOT additional data streams on this object.

2019-07-01T14:34:54+00:00

https://twitter.com/_/status/1145702323181649920

@JeremyB018 I use Invisor on OSX. But you can also tell just by the file sizes.

IInvisor is great for this type of thing, particularly comparing files.

https://twitter.com/_/status/1145689937498349578

@_Desmoden I'm not analyzing THOSE objects, I'm analyzing THIS object. This object looks like a distant jet engine. Those objects are almost certainly something else.

2019-07-01T12:19:37+00:00

https://twitter.com/_/status/1145668279425306627

@UFOengineering @mission_europa The lens is rotating because of something called "gimbal lock" or "gimbal singularity"

It is explained in this thread here:

https://www.metabunk.org/gimbal-lock-and-derotation-in-flir-atflir-systems.t10792/

I certainly don't think the pilot in the Gimbal video is lying about anything.

2019-07-01T03:59:14+00:00

https://twitter.com/_/status/1145542353920262144

@46and26 @DailyGrail You think they train specifically for a slightly out of focus jet several miles away exhibiting visual rotation when transiting 0 degrees?

2019-07-01T01:32:09+00:00

https://twitter.com/_/status/1145505338847662081

@LittleBigRing @AdamGorightly Hence the radar returns were something else.

2019-07-01T00:33:38+00:00

https://twitter.com/_/status/1145490609043410944

Higher quality footage from the New York Times helps demonstrate that the Gimbal UFO is not actually rotating, and that it's not actually a flying saucer.

https://www.youtube.com/watch?v=4Btns91W5J8

2019-06-29T16:30:08+00:00

https://twitter.com/_/status/1145006547740684288

@JonHNodge @etufodisclosure Coming from Hawaii, so it was flying toward LA, and so the contrail looked vertical.

2019-06-29T14:57:08+00:00

https://twitter.com/_/status/1144983143612502018

https://twitter.com/_/status/1144960768724520960

@TheOutThere2016 Good 480p would have been enough. The problem here is the low resolution, the blurry video which looks like a second generation VHS copy and the noise. My recreation is actually to high in quality.

2019-06-29T12:07:56+00:00

https://twitter.com/_/status/1144940561155026944

The Nimitz UFO video was taken AFTER the famous "Tic-Tac" incident, and it shows a black blob far away, gradually getting close. Could it just be a plane, in out of focus, low resolution, noisy video? I make the case.

https://www.youtube.com/watch?v=s1oTg0kxzDs

2019-06-29T12:05:47+00:00

https://twitter.com/_/status/1144940019599024128

@JS18016995 @BarackObama So pretty reliable then!

2019-06-29T02:57:39+00:00

https://twitter.com/_/status/1144802078683828224

@PstarmanUa @Lemurian1897 Pretty much.

2019-06-28T18:43:21+00:00

https://twitter.com/_/status/1144677682795315202

@PstarmanUa @Lemurian1897 I'm just analyzing the videos here, they are different things to

the eyewitness accounts.

2019-06-27T18:22:06+00:00

https://twitter.com/_/status/1144309946789445632

@JuenoMT @AFSUnidentified @Th_Unidentified Historically speaking, what has been more accurate?

A) Eyewitness testimony
B) Hard data, like videos

2019-06-27T12:29:22+00:00

https://twitter.com/_/status/1144221177797177344

@paulsanderson @AFSUnidentified @Th_Unidentified All you can see is the glare. You can't see an object.

2019-06-27T12:28:54+00:00

https://twitter.com/_/status/1144221061795340288

@JuenoMT @AFSUnidentified @Th_Unidentified Well, if that hard data is not what people say it is, then what is wrong with me pointing that out and explaining it?
You still have eyewitness testimony, you just don't have hard data.

2019-06-27T12:27:38+00:00

https://twitter.com/_/status/1144220744089341954

@PstarmanUa @DaveFalch When far away, with large glare, you don't see wings.
It's hot. Gimbal is the hot one. Go Fast is the cold one. Different videos.
Pilots make mistakes.
TTSA is partly an entertainment company, making money.

2019-06-27T01:08:29+00:00

https://twitter.com/_/status/1144049830261473281

@Juddlydoright I suspect an antigravity bubble would actually be rather hot - especially when the craft moves. It's essentially magic though.

2019-06-27T01:06:53+00:00

https://twitter.com/_/status/1144049427310452737

@Alien_Scientist @ufo_seekers I'll buy a flying car!

2019-06-26T22:12:34+00:00

https://twitter.com/_/status/1144005559823192065

@RodrigoLVieira1 Almost certainly, yes.

2019-06-26T21:05:15+00:00

https://twitter.com/_/status/1143988617796186112

@Juddlydoright No, but it sure looks like they did. And it's an infinitely simple explanation that cold air in a bubble of anti-gravity.

2019-06-26T20:56:27+00:00

https://twitter.com/_/status/1143986403019124736

@Juddlydoright I varies based on the settings. It's kind of like a contrast knob you can turn up

and down except there are two main settings, amount and radius. Both will affect the apparent size of the glow.

2019-06-26T20:26:55+00:00

https://twitter.com/_/status/1143978969823186944

One of the things that stops people understanding the "rotating glare" aspect of the Gimbal vide is why the glare rotates when the clouds do not. I made a model, and a more detailed explanation. https://www.youtube.com/watch?v=4X1PRDbtiF0

2019-06-26T17:26:40+00:00

https://twitter.com/_/status/1143933609402720257

@PostDisclosure @SpaceDadOrbis I talked to Dave about that. You won't actually see the wings when the plane gets a bit further away - which was his main objection. He pretty much agreed with that.

2019-06-26T17:25:12+00:00

https://twitter.com/_/status/1143933239775522816

@EtTuCarl Ancient aliens had three "experts" claiming the glow was unusual (in the video above), and @JeremyCorbell repeated the same thing on @joerogan's podcast. The New York Times also mentioned it.

2019-06-26T17:06:32+00:00

https://twitter.com/_/status/1143928543929196545

@SpaceDadOrbis @PostDisclosure Yes, but those are nearby jets. Check out this comparison. https://www.youtube.com/watch?v=Jr1cfpos6vo

---

2019-06-26T16:57:32+00:00

https://twitter.com/_/status/1143926276463288320

@StevenM10657487 @ufoofinterest Well 1 and 2 have been explained. The glare covers the craft and the rotation of the glare is due to the derotation mechanism necessitated by a two axis gimbal system. Here's an overview: https://www.youtube.com/watch?v=Jr1cfpos6vo

---

2019-06-26T16:45:44+00:00

https://twitter.com/_/status/1143923307961438208

@SpaceDadOrbis @PostDisclosure Why? The camera artifacts (the glow, the glare shape, and the rotation) are the only interesting things there.

2019-06-26T16:41:25+00:00

https://twitter.com/_/status/1143922221305364480

@FreqTech @PostDisclosure @Mikelynette No, that's just a mistake or a false memory.

2019-06-26T16:33:15+00:00

https://twitter.com/_/status/1143920165312028672

@nickielisamc @stepickford It's a podcast. I also post it on YouTube. https://www.tftrh.com/

2019-06-26T16:32:18+00:00

https://twitter.com/_/status/1143919929848037376

The glow in the "Gimbal" video has puzzled various experts who theorized it might be evidence of anti-gravity propulsion. But it's actually just evidence of video edge-gradient sharpening with

the "unsharp mask" filter.
https://www.youtube.com/watch?v=r119JWI04Ls

2019-06-26T16:29:04+00:00
https://twitter.com/_/status/1143919114907312128

2019-06-26T00:47:09+00:00

https://twitter.com/_/status/1143682071442780160

@PostDisclosure Is there a rational reason to assume that Graves is not lying or mistaken?

2019-06-26T00:29:13+00:00

https://twitter.com/_/status/1143677559562854400

@PostDisclosure Video is data. Graves' account is less data-like.

2019-06-26T00:26:47+00:00

https://twitter.com/_/status/1143676948750585857

Preview of next weekend's podcast from my guest Jim Lee of Climate Viewer News. Jim used to be more of a conspiracy theorist, but now he wants to educate people about the possible dangers of climate engineering. Although, he's still a bit of a conspiracist in some areas.

https://twitter.com/climateviewer/status/1143673436486668289

2019-06-25T17:43:54+00:00

https://twitter.com/_/status/1143575559642894336

@Scribe1969 @Keithmayoh @JeremyCorbell @joerogan I'm not investigating extraordinary claims, like "UFOs are real". I'm investigating extraordinary claims of evidence, like "this UFO is surrounded by cold air". If false, I debunk it. Debunking false bits of evidence brings EVERYONE closer to the truth.

2019-06-25T16:45:37+00:00

https://twitter.com/_/status/1143560889926221824

@aSkepticalHuman All of the above.

2019-06-25T15:26:20+00:00

https://twitter.com/_/status/1143540940830732288

@Noti_ET @Keithmayoh @JeremyCorbell @joerogan I focus on isolated bits of VERIFIABLE and DEMONSTRABLE bullshit. If you want to keep those bits for some reason, then you might want to re-evaluate your overall approach.

2019-06-25T15:24:46+00:00

https://twitter.com/_/status/1143540544506777600

@discloseitnow @FreqTech @PostDisclosure @c0nan666 @DaveFalch You can't build a house on a foundation of bullshit. If there's something in the story that stinks (like the claim that "Go Fast" was going fast) then everyone moves close to the truth if I point this out.
Explain what is wrong with demonstrating actual falsehoods from TTSA etc.

2019-06-25T15:10:05+00:00

https://twitter.com/_/status/1143536850524504065

@discloseitnow @FreqTech @PostDisclosure @c0nan666 @DaveFalch But I'm giving analyses OF THE VIDEOS. They stand alone. You don't have draw broad conclusions from them - just that the videos have quite possible boring explanations.
Maybe they actually have transcendent explanations, but there's nothing in the videos themselves to show that

---

2019-06-25T15:05:40+00:00

https://twitter.com/_/status/1143535736290889729

@Keithmayoh @JeremyCorbell @joerogan That's not what I do. I check to see if claims of evidence are correct or not. I'm always looking to see IF things are bullshit.

I focus on extraordinary claims, because they are often under-examined because regular scientists ignore them. Often I find bullshit.

2019-06-25T05:11:47+00:00

https://twitter.com/_/status/1143386282376093696

@PostDisclosure @c0nan666 Where is their analysis?

2019-06-25T05:11:24+00:00

https://twitter.com/_/status/1143386187945480192

@aSkepticalHuman I don't think he saw a hanger full of alien spaceships.

2019-06-24T18:43:09+00:00

https://twitter.com/_/status/1143228080275673088

@IWANTTOKNOW2018 @joerogan @JeremyCorbell @TTSAcademy When a plane is small on screen, the glare can be bigger than the plane, so you can't see the wings. See the animation above. The image on the left has wings, but you can barely see them, just the glare.

2019-06-24T16:57:04+00:00

https://twitter.com/_/status/1143201384914833418

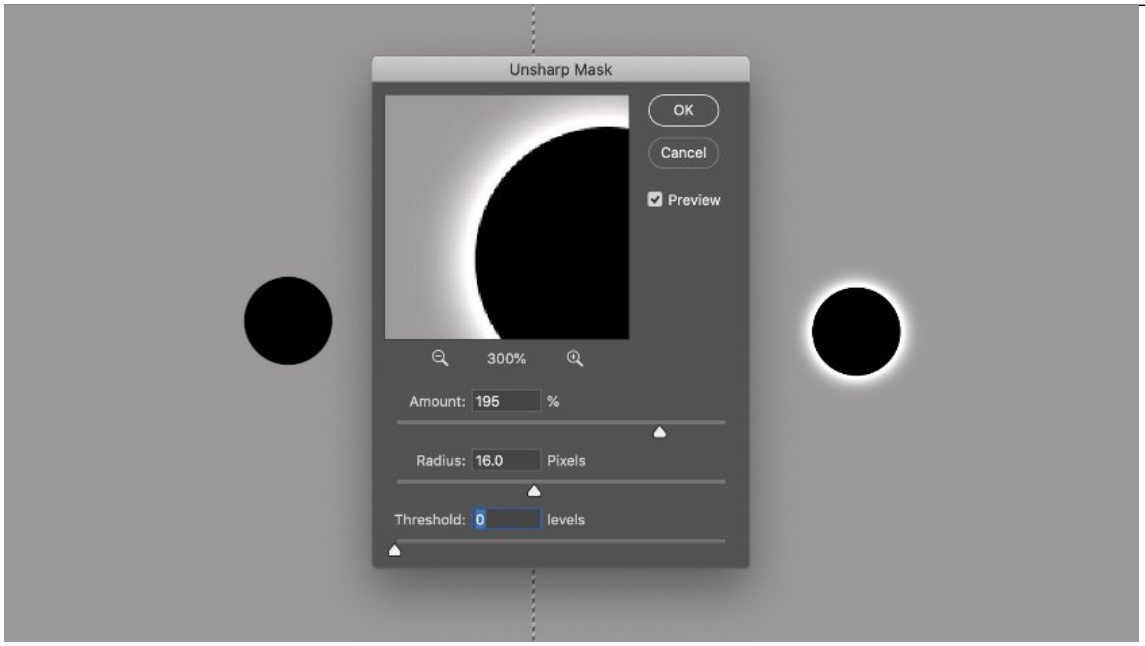
@buffcommacu It's a common video filter. Probably one they can turn on and off and adjust.

2019-06-24T16:44:43+00:00

https://twitter.com/_/status/1143198276746825728

The source of the glow artifact is probably a sharpening adjustment called an "Unsharp Mask". This makes objects easier to see, useful for fighter jets. Applying the adjustment to a black object on a gray background produces an identical "glow".

http://pbs.twimg.com/media/D910H5DVUAMiUzf.jpg



http://pbs.twimg.com/media/D910H5DVUAMiUzf.jpg

2019-06-24T16:19:32+00:00

https://twitter.com/_/status/1143191940311072768

@509thConductor @joerogan @JeremyCorbell @TTSAcademy @nytimes @Raytheon Raytheon have not commented on these UFO videos since 2017, AFAIK. But I do know people are asking them, so I'd expect something from them eventually.

2019-06-24T15:51:40+00:00

https://twitter.com/_/status/1143184925425717249

@509thConductor @joerogan @JeremyCorbell @TTSAcademy @nytimes @Raytheon It's because back then (in 2017) they just saw it as something they could use as a fun way to promote the ATFLIR system. Ask them again now.

2019-06-24T15:49:27+00:00

https://twitter.com/_/status/1143184367436455937

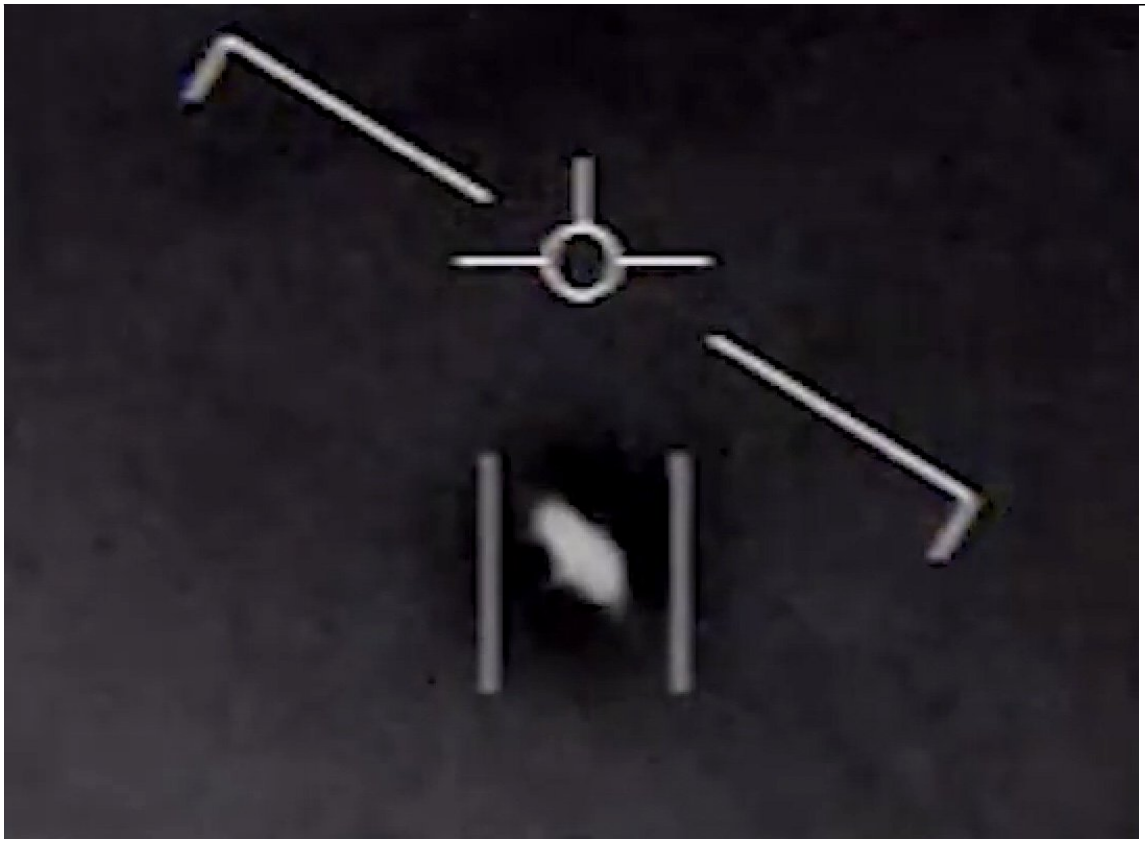
@chadbecker777 @joerogan @JeremyCorbell @TTSAcademy Different incidents. Fravor, for example, had eyes on a "tic-tac", later someone took a video of an unidentified heat source in the distance. No evidence they were the same thing.

2019-06-24T15:29:33+00:00

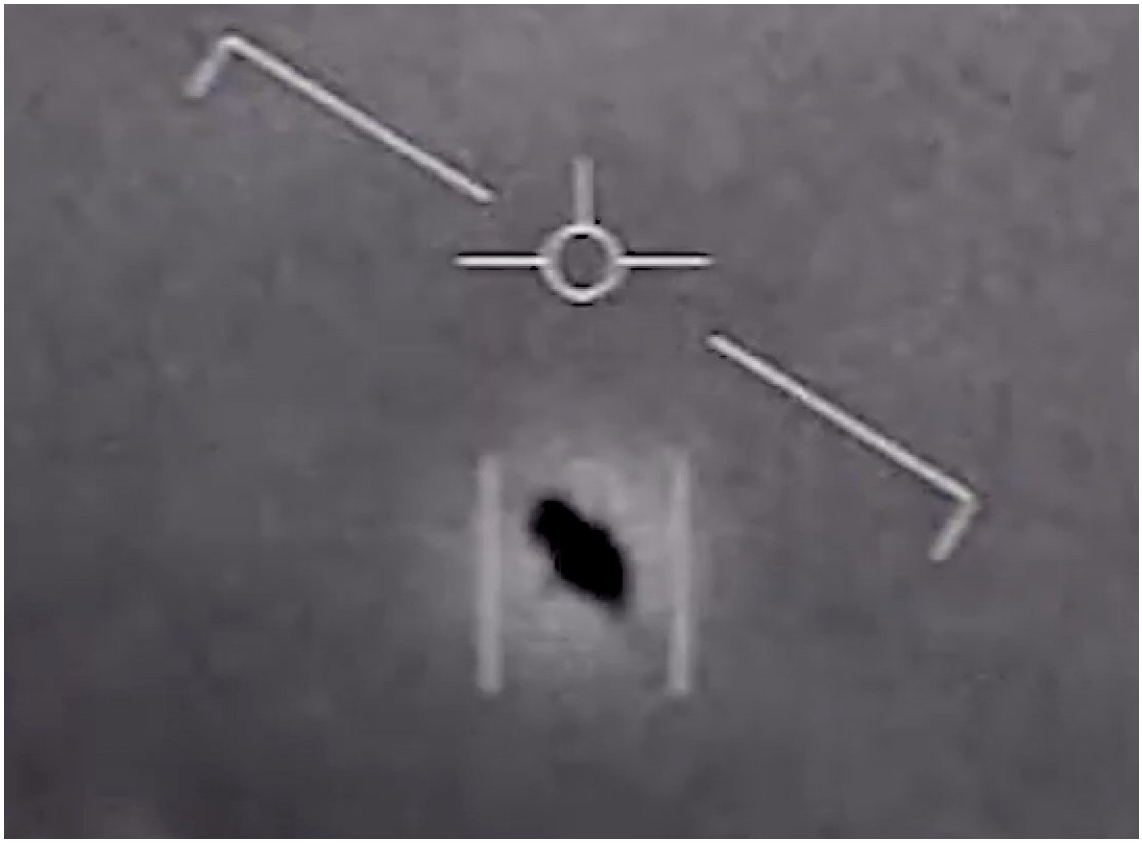
https://twitter.com/_/status/1143179359831769093

@77Fidelio @joerogan @JeremyCorbell @TTSAcademy @nytimes @Raytheon Yes, and then it switches to BLK. You can see the "cooler" "aura" in both WHT and BLK, it's just clearer in BLK. It's the same thing, just the image inverted.

http://pbs.twimg.com/media/D91jYeWU0AgdR-m.jpg



http://pbs.twimg.com/media/D91jR-OUcAAuIwU.jpg



http://pbs.twimg.com/media/D91jYeWU0AgdR-m.jpg
2019-06-24T14:54:52+00:00
https://twitter.com/_/status/1143170630918930432
@NoeRangel @TheOutThere2016 @JeremyCorbell @tomdelonge I'm pruning away the falsehoods. I'm not forcing you to draw conclusions from all these falsehoods. They cloud the truth. If something wrong, should I not point it out?

And it's not just "some shit", it was a New York Times headline!

2019-06-24T14:45:08+00:00
https://twitter.com/_/status/1143168181063704576
@NoeRangel @TheOutThere2016 I'm on solid ground here, no need to dig in.
Don't you want your story fact-checked? If @JeremyCorbell makes a claim about cold force-fields should we just accept it? Or should we check it, and, having found it to be false, together take a step closer to the truth?

2019-06-24T14:37:00+00:00
https://twitter.com/_/status/1143166137359687680
@NoeRangel @TheOutThere2016 I listened. I'm not lazy. The people who are still claiming that there's a "cold" region around the objects are the ones not putting in the work.

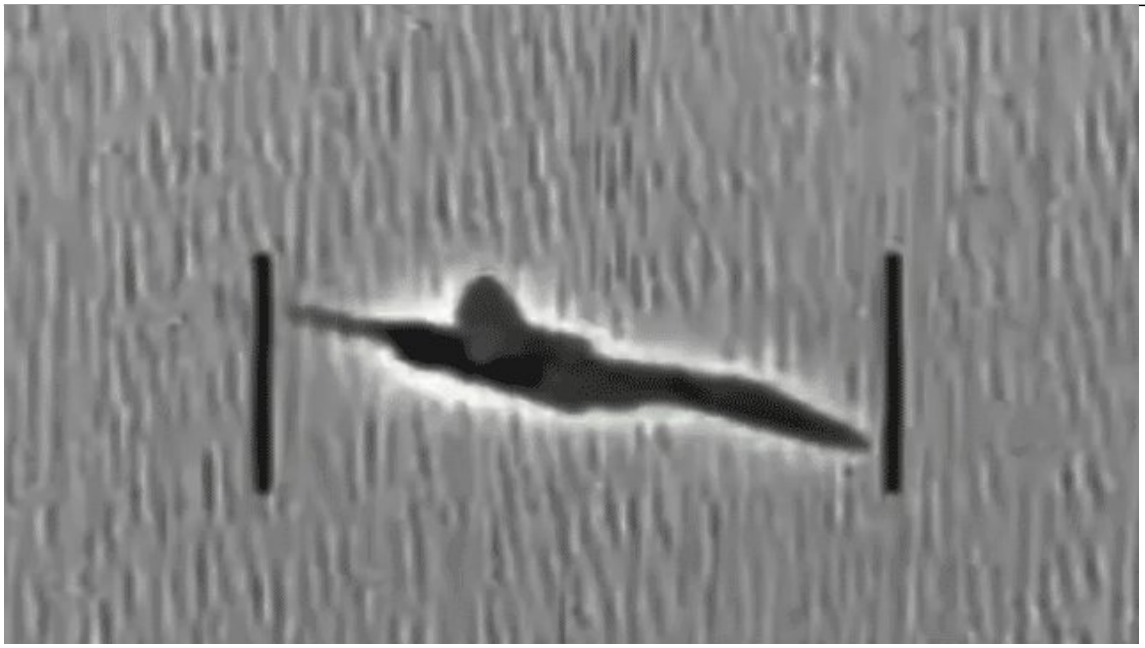
2019-06-24T14:33:49+00:00
https://twitter.com/_/status/1143165336000221184
@joerogan @JeremyCorbell @TTSAcademy @nytimes Footage from @Raytheon using the ATFLIR system (also used in the GIMBAL footage). Just normal fighter jets. Black hot in the IR, surrounded by a "cold" aura on the video. Not cold. Not anti-gravity. Just a camera artifact.

http://pbs.twimg.com/tweet_video_thumb/D91WI6nVAAEzJYx.jpg

---

http://pbs.twimg.com/tweet_video_thumb/D91WI6nVAAEzJYx.jpg
2019-06-24T14:26:56+00:00
https://twitter.com/_/status/1143163603006058496
@SamYork83 @joerogan @JeremyCorbell @TTSAcademy There are millions of hours of low information footage that's impossible to explain definitively. I see distant white dots in the sky every day that I can't identify. But there's generally at least one plausible explanation, even if you can't pin down which one exactly.

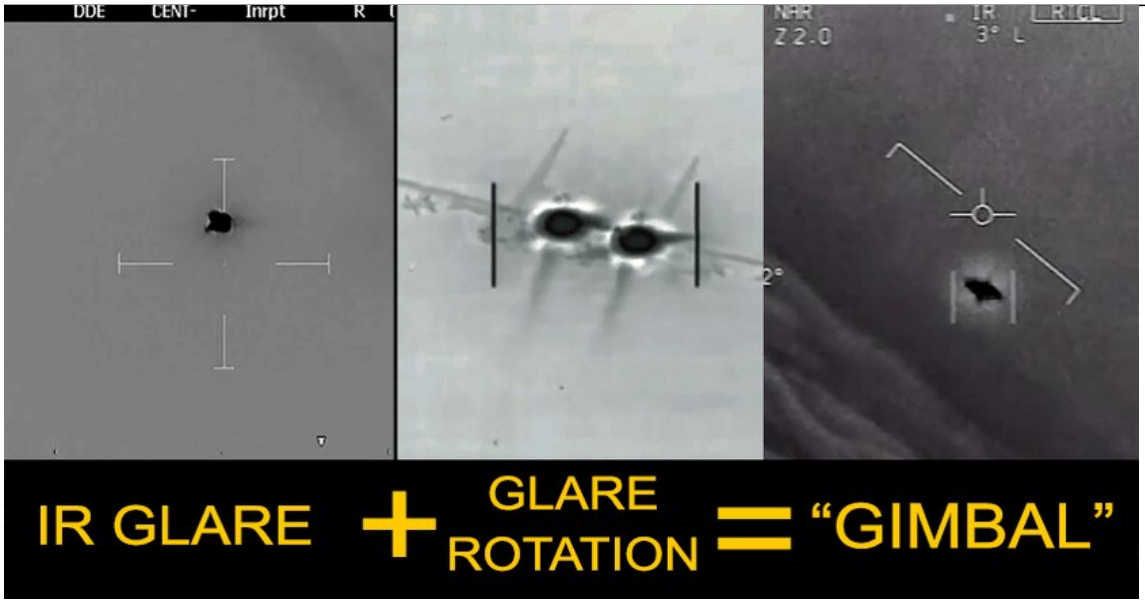
2019-06-24T14:21:57+00:00
https://twitter.com/_/status/1143162347013300224
@joerogan @JeremyCorbell @TTSAcademy @nytimes This isn't new. This was discussed back in March 2018. It should have been obvious, had they consulted real experts, or just sought out comparable footage. Black hot in IR often makes a "cold" aura in video. It's not anti-gravity.
http://pbs.twimg.com/tweet_video_thumb/D91T4WLUwAEqoJg.jpg



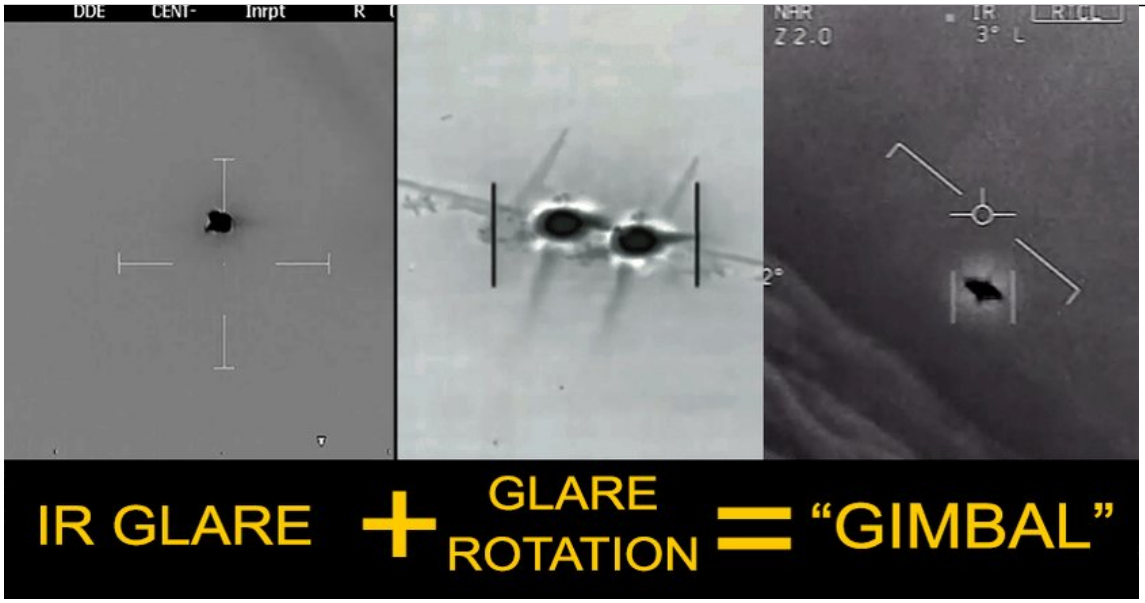
http://pbs.twimg.com/tweet_video_thumb/D91T4WLUwAEqoJg.jpg
2019-06-24T14:04:23+00:00
https://twitter.com/_/status/1143157925801709568
@joerogan @JeremyCorbell @TTSAcademy This particular mistake stated back with the @nytimes story "Glowing Auras and â□□Black Moneyâ□□: The Pentagonâ□□s Mysterious U.F.O. Program"
Which described
"... footage from a Navy F/A-18 Super Hornet showing an aircraft surrounded by some kind of glowing aura "
Again, just IR glare.

2019-06-24T14:00:57+00:00
https://twitter.com/_/status/1143157064459378695
On the @joerogan show last week, @JeremyCorbell mentioned a cold region surrounding the

objects on the @TTSAcademy UFO videos. This is presented as evidence of some gravity warp drive. But in fact it's just a commonly observed artifact of IR video, seen around jet engine glares. http://pbs.twimg.com/tweet_video_thumb/D91O1qIU8AYIVSu.jpg



http://pbs.twimg.com/tweet_video_thumb/D91O1qIU8AYIVSu.jpg
2019-06-24T13:56:22+00:00
https://twitter.com/_/status/1143155908962160640
@TheOutThere2016 Yes, the cold "aura" is a common thing seen around a hot IR glare. Look at the jet engines here. They are black hot, and they have a white "aura" around them, which would indicate cold. Except, of course, IT IS NOT COLD.
This was explained over a year ago. I should make a video.
http://pbs.twimg.com/tweet_video_thumb/D91N4BqUcAAY7HX.jpg



http://pbs.twimg.com/tweet_video_thumb/D91N4BqUcAAY7HX.jpg
2019-06-24T13:50:31+00:00
https://twitter.com/_/status/1143154436497264643
@stacknyc I'm used to it. And it helps refine my communication. People often get defensive because they think that the debunking of one thing (like a single video) is intended to debunk

their entire world view (or at lest all of UFOlogy.) It's not, which is something I need to tell them.

2019-06-24T13:47:54+00:00

https://twitter.com/_/status/1143153777916039169

@stacknyc A bird still generates some heat, so a bird is more likely to show up as hot (the object appears cold, relative to the Ocean). But it's still a possibility.

2019-06-24T05:05:05+00:00

https://twitter.com/_/status/1143022209935409152

@UfoJoe11 @rodogonio One of those experts commented on my video after I emailed him. Unfortunately his reply didn't really answer the questions. And it does not really seem like he did much geometric analysis.

https://www.youtube.com/watch?v=PLyEO0jNt6M&lc=UgzLAogi0gvhA6WYhfV4AaABAg

http://pbs.twimg.com/media/D9zUBXCUYAAa2WK.jpg

2019-06-23T23:38:09+00:00

https://twitter.com/_/status/1142939934107373568

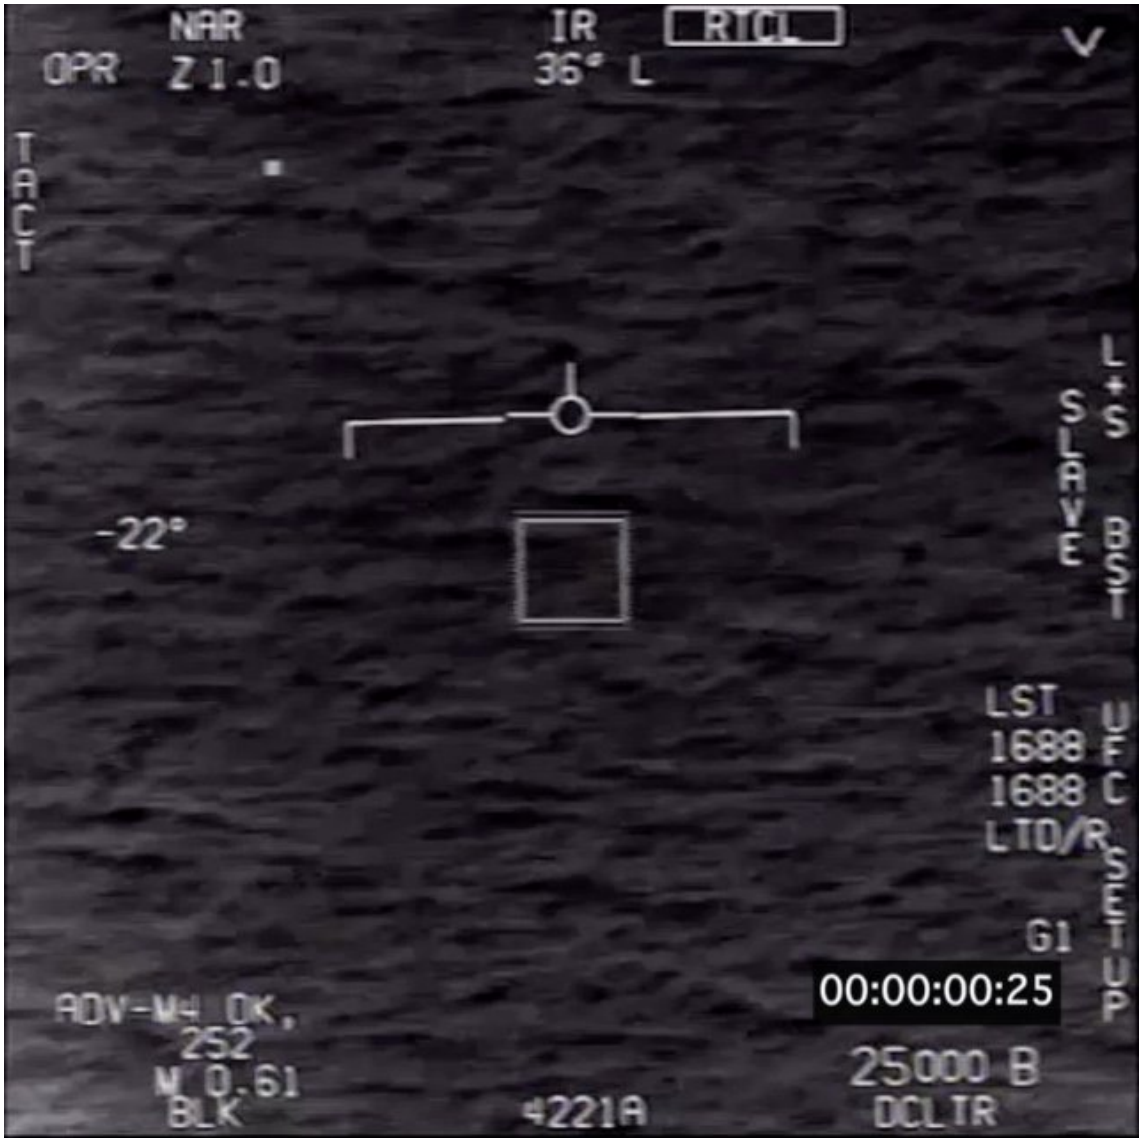
@conor_cowens22 @509thConductor @UfoJoe11 @anthonylappe The most likely explanation, given that it WAS parallax, is that they did not realize that the apparent speed was a parallax illusion.

2019-06-23T23:14:29+00:00

https://twitter.com/_/status/1142933975905660929

@conor_cowens22 @509thConductor @UfoJoe11 @anthonylappe But instead it looks like this, because the camera is moving to track the ocean.

http://pbs.twimg.com/media/D9yEMuRUIAAJkvg.jpg



http://pbs.twimg.com/media/D9yEMuRUIAAJkvg.jpg

2019-06-23T23:13:06+00:00

https://twitter.com/_/status/1142933630584365056

@conor_cowens22 @509thConductor @UfoJoe11 @anthonylappe It's physically impossible for it not to be. The camera is looking left 35Â° at the start and the plane was in level flight. If it was not ground tracking it would look like this. http://pbs.twimg.com/media/D9yEE1iUwAA1RM-.jpg

http://pbs.twimg.com/media/D9yEE1iUwAA1RM-.jpg

2019-06-23T23:04:34+00:00

https://twitter.com/_/status/1142931481427189760

@conor_cowens22 @509thConductor @UfoJoe11 @anthonylappe It's only going to slave to a lock if there's a lock. It's probably slaved to the radar look point which is ground stabilized The important point is that before the target is acquired it is NOT in snowplow mode - it's correcting for parallax. Otherwise, the ground would zip by.

2019-06-23T22:25:41+00:00

https://twitter.com/_/status/1142921696191500288

@blakevtruelove I'm just looking at this one video. If you'd like to point me at a contrary analysis of this one video, then I would be happy to look into any differences.

2019-06-23T22:01:39+00:00

https://twitter.com/_/status/1142915646658760704

@509thConductor @UfoJoe11 @anthonylappe An understandable misconception. At the start of the video the ATFLIR is in "ground stabilized mode" where it "stabilizes a non-designation point of interest on the ground", after the target is acquired it switches to "slaved pointing" and follows the reticle track. http://pbs.twimg.com/media/D9xzTONUwAACHEm.jpg

---

3.3 Pointed Mode

The FLIR operates in Pointed mode whenever the FLIR is in Operate (OPR) status. During Pointed mode, the FLIR's Line-of-Sight (LOS) is controlled via several sub-modes. When the FLIR is in Stabilized pointing, the MC provides the pod with LOS direction cosines which cause the pod to point to a specific spot on the ground. The FLIR will then maintain this LOS as the aircraft maneuvers. During Snowplow pointing, the MC forces the FLIR's LOS to constant azimuth and elevation angles relative to the aircraft, but does not attempt to maintain LOS on a fixed position. When the FLIR is not in STBY status, the following pointed modes are available:

- Slaved Pointing - With no designation (i.e. no ground target), the FLIR may be slaved to the HUD or Radar formats. With TDC priority to the HUD, the FLIR is slaved to the current HUD reticle LOS (e.g. CCIP, TDC cursor position, or AUTO mode reticle position). This allows the FLIR to be pointed prior to a HUD designation, or to display the CCIP impact point prior to release, even if the CCIP cross is below the HUD FOV. HUD slaving is not ground stabilized. If TDC priority is on the A/G Radar format, the FLIR is slaved to radar cursor look point by slewing with the in-video or EXP corral cursors visible. Radar slaving is always ground stabilized and always assumes a ground altitude of zero even if AGR is available. This is done to prevent undulations caused by rapidly changing terrain elevations which would in turn cause the look point elevation to rise and fall as the Radar cursor traverses the terrain.
- Snowplow Pointing - FLIR LOS remains at a constant azimuth/elevation angle off the ownship flight path. The FLIR's snowplow pointing LOS is changed by assigning priority to the FLIR and using the TDC cursor to slew the FLIR LOS directly.
- Stabilized Pointing (undesignated) - Snowplow pointing may be ground stabilized (without a designated target) at any time by pressing the cage/uncage switch CTRL+U while the FLIR LOS is below the horizon. This does not create a designation automatically, it simply stabilizes a non-designation point of interest on the ground. The stabilized point may be converted to a designation or moved/offset by using the DESIGNATE ENT and SLEW ▲/▼/►/◄ commands respectively.
- Stabilized Pointing (designated) - When a target is designated by any means, all other pointing modes are disabled and the FLIR LOS is slaved to the ground target/OAP LOS. When the FLIR is slaved to a designation, the FLIR will remain ground stabilized at all times and cannot be unstabilized. Ground stabilized means that the FLIR is geographically "locked" at a given point on the ground, horizon up.
- Velocity Vector Slaved (VVSLV) Pointing - The VVSLV option available along the right side of the FLIR format without a ground designation, can be used to point the FLIR along the velocity vector LOS. In the A/G or NAV Master Modes, depressing the Undesignate button SHFT+DEL also commands the FLIR into VVSLV mode. When this option is selected, the FOV reticle is removed (if present), the velocity vector symbol is frozen, and the horizon bar is elongated. The position of the velocity vector symbol is adjusted for dynamic differences between the velocity vector and the reported FLIR LOS. When VVSLV is selected, the FLIR reticle is initialized off (unboxed). Whenever VVSLV mode is exited or any designation is performed, the FLIR reticle is initialized on (boxed). While slaved, TDC priority may be assigned to the FLIR and a FLIR FOV reticle designation may be performed. Any designation causes the VVSLV option to be deselected and removed. Subsequently undesignating causes the VVSLV option to reappear (unboxed).

@Deepneuron @anthonylappe @AFSUnidentified @509thConductor @UfoJoe11 If they did indeed dismiss parallax in the Go Fast case then they were wrong.
Anthony, did it not occur to anyone to do the math based on the angles and the ranges rather than just go by the seat of their pants? Of course it LOOKS low and fast, but it's provably not.

2019-06-23T20:21:46+00:00
https://twitter.com/_/status/1142890511100858368
@funwithwords2u @AlcyoneProject @ProjectUnity6 @UFOnetwork_ @webseitz2 Radar reflectors are relevant in the "Go Fast" case as weather balloons have radar reflectors, and hence the jet could easily get an accurate radar lock on it.
The "cube in a sphere" thing is unrelated.

2019-06-23T20:06:31+00:00
https://twitter.com/_/status/1142886671819558912
Regarding "Go Fast", @TTSAcademy were aware of these issues. Back in March 2018, TTSA advisory board member Garry Nolan said: 'I understood all of Paracast's & Metabunk's math last week ... The video information says the object "can" be mundane'
https://www.metabunk.org/posts/220380/

2019-06-23T19:06:40+00:00
https://twitter.com/_/status/1142871612728852480
@DarrenReadUFO @keithkloor height = range * sin (angle)

Does not require a doctorate.

Where IS their math?

2019-06-23T18:46:44+00:00

https://twitter.com/_/status/1142866597016559616

@UnkleGravity I think there are probably two factors. Firstly they are trying to drum up publicity. Secondly the people doing PR don't understand the analysis.
Speculation though, and I prefer to stay with physics.

2019-06-23T18:23:02+00:00

https://twitter.com/_/status/1142860631713955844

@TTSA_Agent_001 @EtTuCarl @haroldputhoff So work it out. If something is 4.4 nautical miles away, and your view angle is 26Â° down, and you are at 25,000 feet. Then what altitude is the object?

2019-06-23T18:21:00+00:00

https://twitter.com/_/status/1142860117949288449

@TTSA_Agent_001 @Max31562629 @PostDisclosure @AFSUnidentified @UAP1949 Sorry, you think that aliens change trigonometry?

TTSA made claims about the video based on what they saw in the video. They did not inject "assuming some non-euclidean temporary space warp."

Start with reality, don't add magic just because you prefer amazing answers.

2019-06-23T18:14:13+00:00

https://twitter.com/_/status/1142858414306971650

@NECSS Was it inspired by Doctor Manhattan's logo?

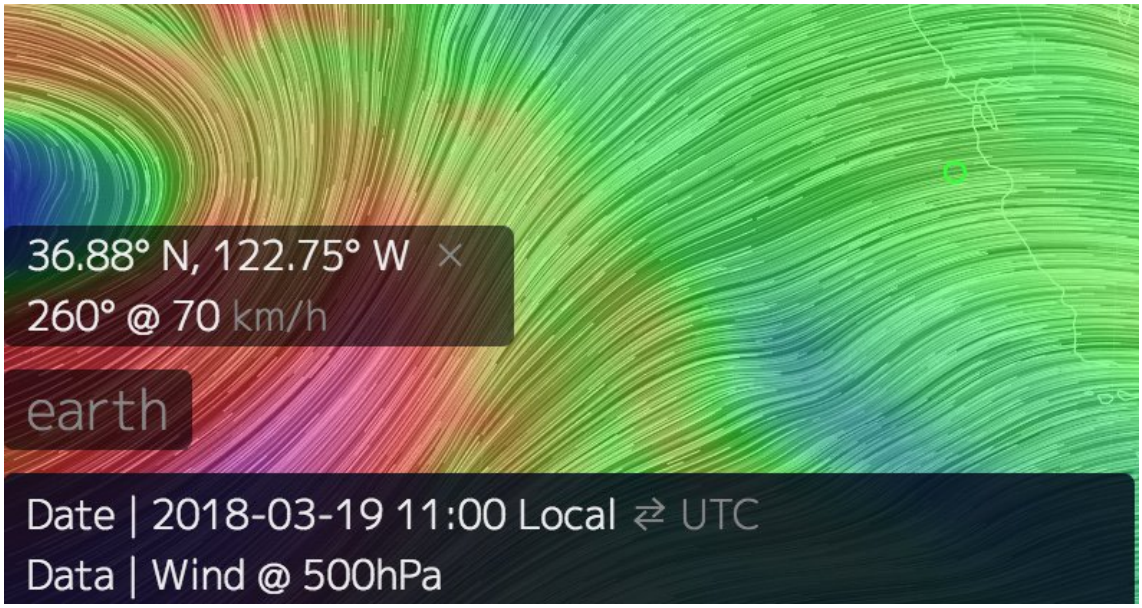
2019-06-23T16:55:36+00:00
https://twitter.com/_/status/1142838629267460096
@Deepneuron @TTSA_Agent_001 @haroldputhoff @PostDisclosure @SilvaRecord @UfoJoe11 @TTSAcademy @tomdelonge @Aviation_Intel The altitude calculation is really simple math.

2019-06-23T15:48:12+00:00
https://twitter.com/_/status/1142821664725405696
@PostDisclosure @AFSUnidentified @UAP1949 You're just lumping everything in as "unexplained advanced technology" but what the Navy seems interested in is just airspace incursions.

2019-06-23T15:00:20+00:00
https://twitter.com/_/status/1142809619607117824
@jgajek A variety of factors. At its simplest it just a desire for extraordinariness.

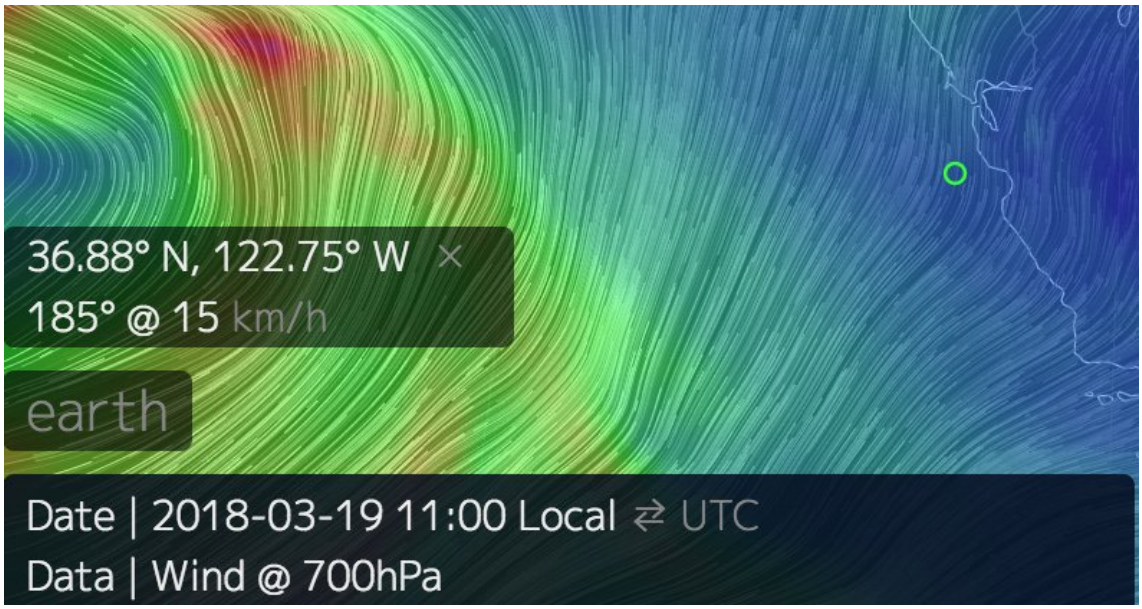
2019-06-23T14:47:28+00:00
https://twitter.com/_/status/1142806383814774789
@mcb1879 No, it's essentially flying towards the object, notice the RNG gets smaller through the video. Not directly towards it though. Like this:
https://www.youtube.com/watch?v=IRd1RY2PuvA

2019-06-23T14:44:12+00:00
https://twitter.com/_/status/1142805561840300032
@p4pmemes @Aviation_Intel Example wind diffs
At the surface, it's 15 km/h from the east (90Â°)
at 700mb (about 10,000 feet) it's 15 km/h from the south (185Â°)
At 500mb (about 18,000 feet) it's 70 km/h from the west (260Â°)
at 250mb (34,000 feet) it's 165 km/h from the west (270Â°).
http://pbs.twimg.com/media/D9wPg5ZVAAEVgwZ.jpg

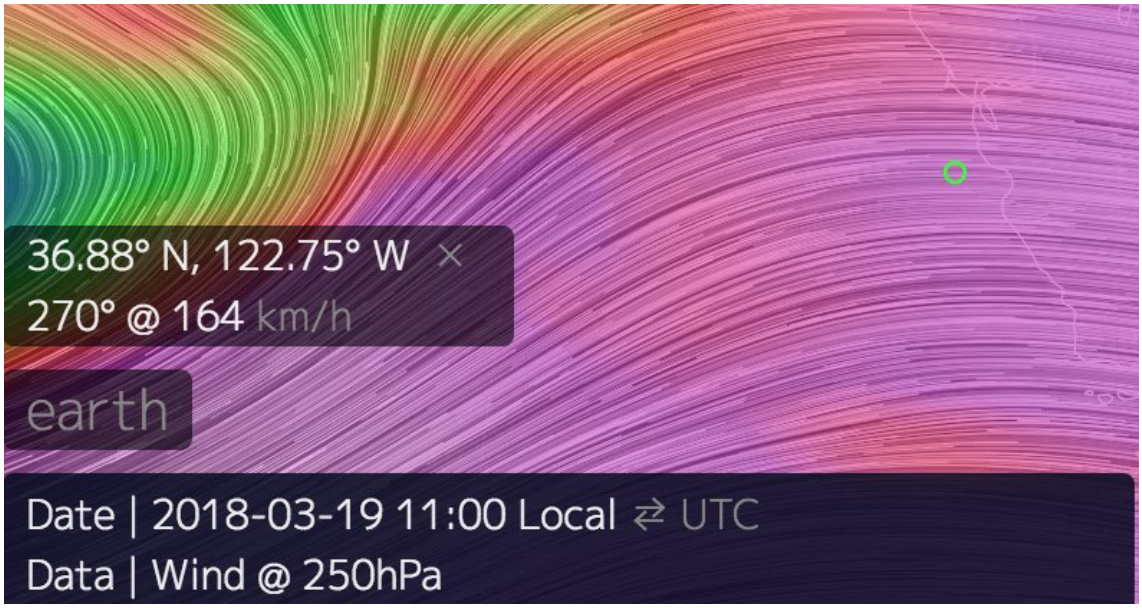


http://pbs.twimg.com/media/D9wPg5WVAAEo7a6.jpg

http://pbs.twimg.com/media/D9wPg5ZVAAEVgwZ.jpg



http://pbs.twimg.com/media/D9wPg5YUYAQWBYQ.jpg



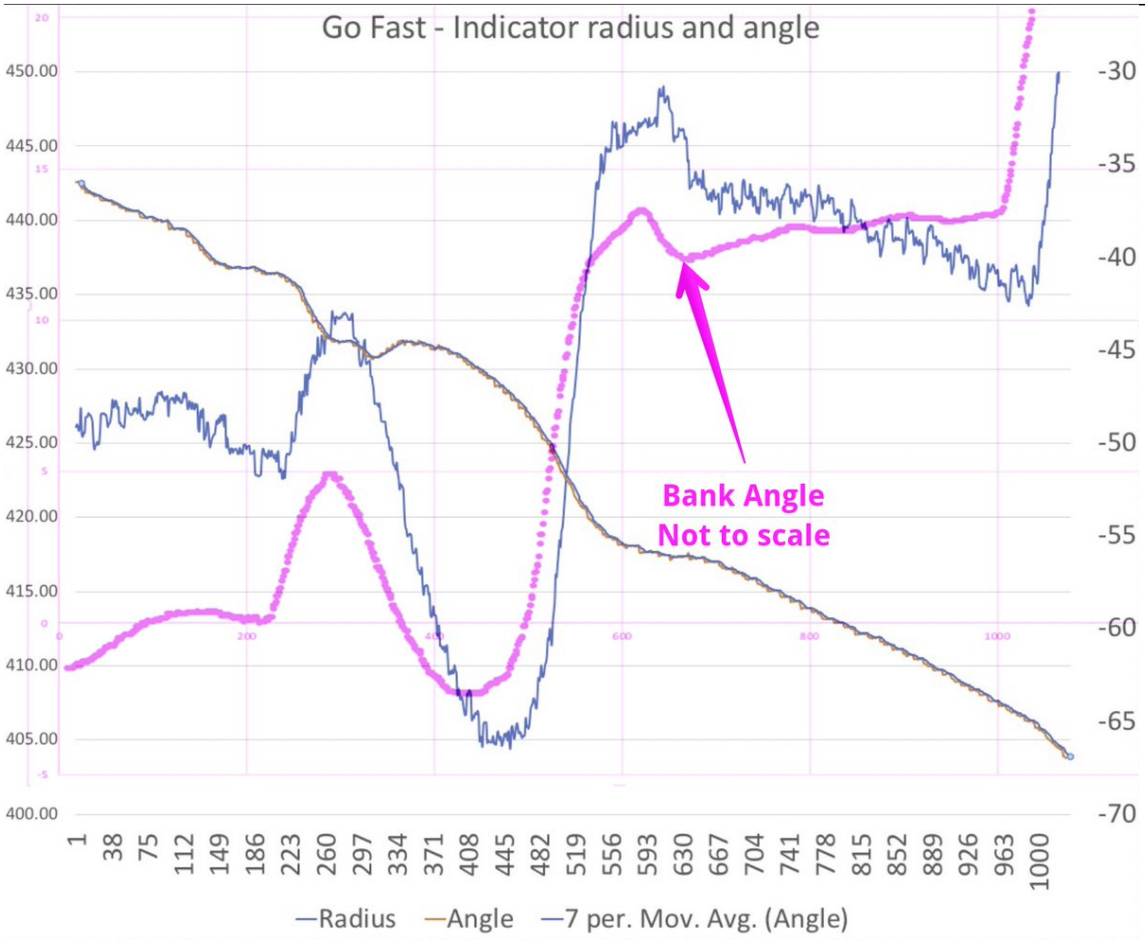
http://pbs.twimg.com/media/D9wPg5HU8AAlK3J.jpg

2019-06-23T14:42:32+00:00

https://twitter.com/_/status/1142805139641602048

@p4pmemes @Aviation_Intel Towards the end of the thread there was discussion of incorporating the frame-by frame bank/roll data. It's all linked in the thread. Unknown is the wind diff (jet vs. object vs. ground) which gives a range of possibilities. Data is here though, example: https://www.metabunk.org/posts/220389/

http://pbs.twimg.com/media/D9wOtfTUEAAIHZZ.jpg



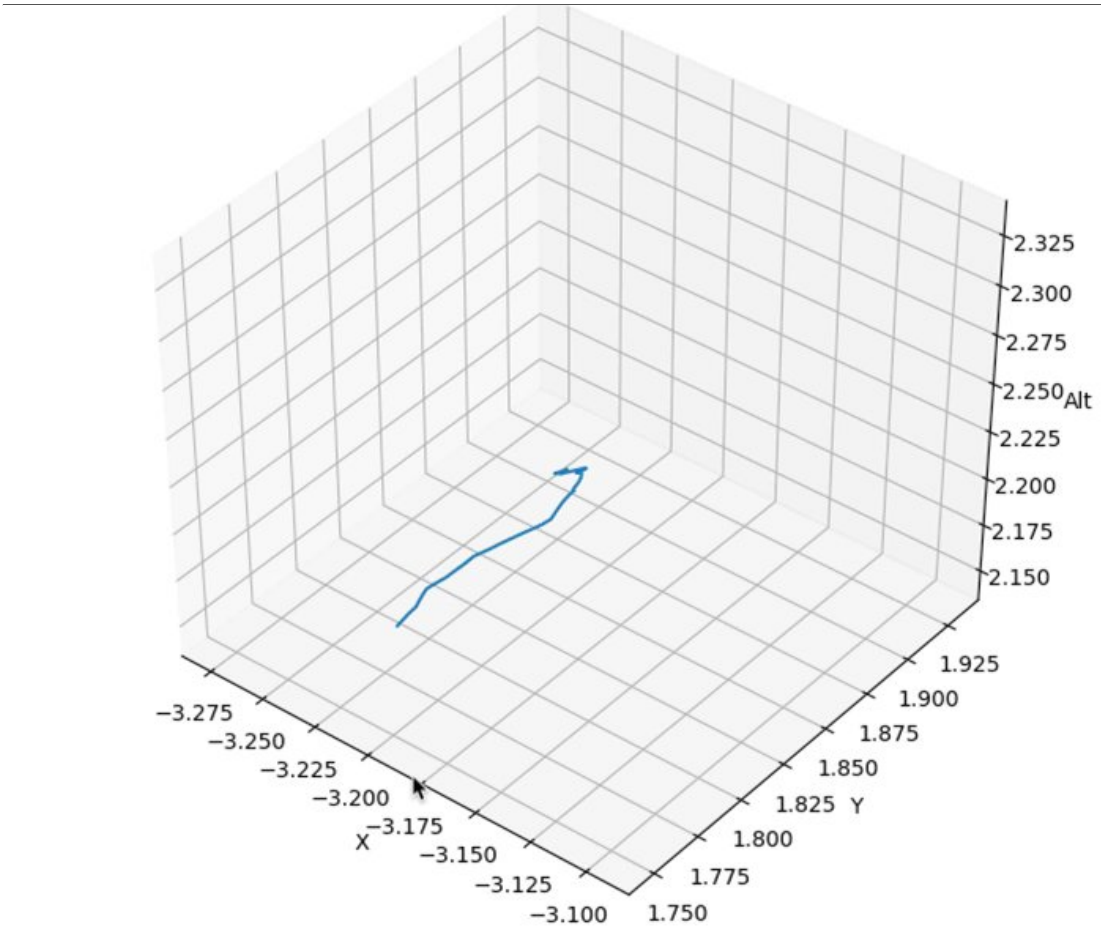
http://pbs.twimg.com/media/D9wOtfTUEAAIHZZ.jpg

2019-06-23T14:31:45+00:00

https://twitter.com/_/status/1142802425113223168

@p4pmemes @Aviation_Intel There's some much more complex analysis in the Metabunk thread, including frame-by-frame recording of the roll angle (and the other angles extrapolated from the coarser numbers), wind estimates, and various full 3D recreations.

http://pbs.twimg.com/tweet_video_thumb/D9wMn3FUIAE03_z.jpg



http://pbs.twimg.com/tweet_video_thumb/D9wMn3FUIAE03_z.jpg

2019-06-23T14:15:21+00:00

https://twitter.com/_/status/1142798301223256064

@JeremyB018 Sounds like you are talking about the Nimitz/FLIR video (not the "Go Fast" video discussed here). The movements in the Nimitz video all seem due to camera zoom and loss of lock. What they are seeing (just in that video) is almost certainly a far distant jet flying away.

2019-06-23T07:51:27+00:00

https://twitter.com/_/status/1142701690069499904

@AFSUnidentified @UAP1949 @PostDisclosure A large number of false reports would also be a serious national security issue.

2019-06-23T07:49:36+00:00

https://twitter.com/_/status/1142701222538801155

@AFSUnidentified @UAP1949 @PostDisclosure Not that I know of.

2019-06-23T07:10:06+00:00

https://twitter.com/_/status/1142691282860609536

@paulsanderson The pilot who supposedly shot this video declined to speak about it. A weather balloon also looks like a white orb, and the math shows this object is NOT moving fast.

2019-06-23T07:08:13+00:00

https://twitter.com/_/status/1142690806542716929

@AFSUnidentified Where's their math?

It's not that complicated, especially the height thing. Just range times sine of angle = height difference. Did they do that?

Why didn't they?

2019-06-23T06:55:09+00:00

https://twitter.com/_/status/1142687521769287681

@AFSUnidentified Math != narrative

2019-06-23T06:54:37+00:00

https://twitter.com/_/status/1142687386960220160

@TheOutThere2016 Why wouldn't they get it wrong, if it's a situation they never encountered before?

2019-06-23T06:49:30+00:00

https://twitter.com/_/status/1142686097387864064

@AFSUnidentified Yes, this video is based on claims made in episode 4.

2019-06-23T06:44:36+00:00

https://twitter.com/_/status/1142684864673533952

@p4pmemes @Aviation_Intel https://www.youtube.com/watch?v=PLyEO0jNt6M

2019-06-23T06:39:42+00:00

https://twitter.com/_/status/1142683632064069632

The "Go Fast" UFO video is deceptively simple. Yet it is perhaps the most misrepresented video shown on the "Unidentified" show. With a little high school math we can see that it's neither close to the water, nor is it fast. So why did TTSA say it was?
https://www.youtube.com/watch?v=PLyEO0jNt6M

2019-06-23T06:36:06+00:00

https://twitter.com/_/status/1142682724328587264

@PostDisclosure @Timma202012 Oh, I think that "being wrong about something" is greatly outweighed by "aliens proven to visit the Earth". I'll be fine.

2019-06-23T05:39:32+00:00

https://twitter.com/_/status/1142668488382640128

@Timma202012 I'm fine going wherever the evidence goes. I'd LOVE it if there was evidence of aliens. I've been reading science fiction since I was ten.

2019-06-23T05:32:18+00:00

https://twitter.com/_/status/1142666669258526720

@Timma202012 Thanks!

Coping with what?

2019-06-23T04:06:29+00:00

https://twitter.com/_/status/1142645073470902273

@p4pmemes @Aviation_Intel Yeah, he was wrong too.

2019-06-23T01:53:07+00:00

https://twitter.com/_/status/1142611512298622977

@p4pmemes @Aviation_Intel Source is the video. You can calculated the altitude (13,000 feet) and the speed, from the data in the display. TTSA got it wrong.

2019-06-23T01:11:42+00:00

https://twitter.com/_/status/1142601086261313537

@p4pmemes @Aviation_Intel No, it wasn't. It was going around 20-40 knots.

2019-06-23T01:11:06+00:00

https://twitter.com/_/status/1142600935203471361

@SamYork83 There are thousands of videos and photos that have too little information in them to solve. That's where UFOs live, in low information data sources.

2019-06-23T00:21:27+00:00

https://twitter.com/_/status/1142588442137616384

@ChambersofHeart It was designed by Chris Ward, who was into Heavy Metal music, so I suspect he took stylistic inspiration from there. No real symbolism though, other than reflecting the general free spirit of Neversoft in the early years.

2019-06-22T21:53:50+00:00

https://twitter.com/_/status/1142551293715607552

@PostDisclosure @Aviation_Intel You can take that as read. I don't think I'm causing any harm by not laboring an obvious point.

2019-06-22T21:50:12+00:00

https://twitter.com/_/status/1142550377268518912

http://pbs.twimg.com/media/D9nc9CqU8AEL8JJ.jpg

2019-06-21T21:43:51+00:00

https://twitter.com/_/status/1142186394095239168

@_Desmoden And where is this synthesized data track? Who saw it?

2019-06-21T21:43:07+00:00

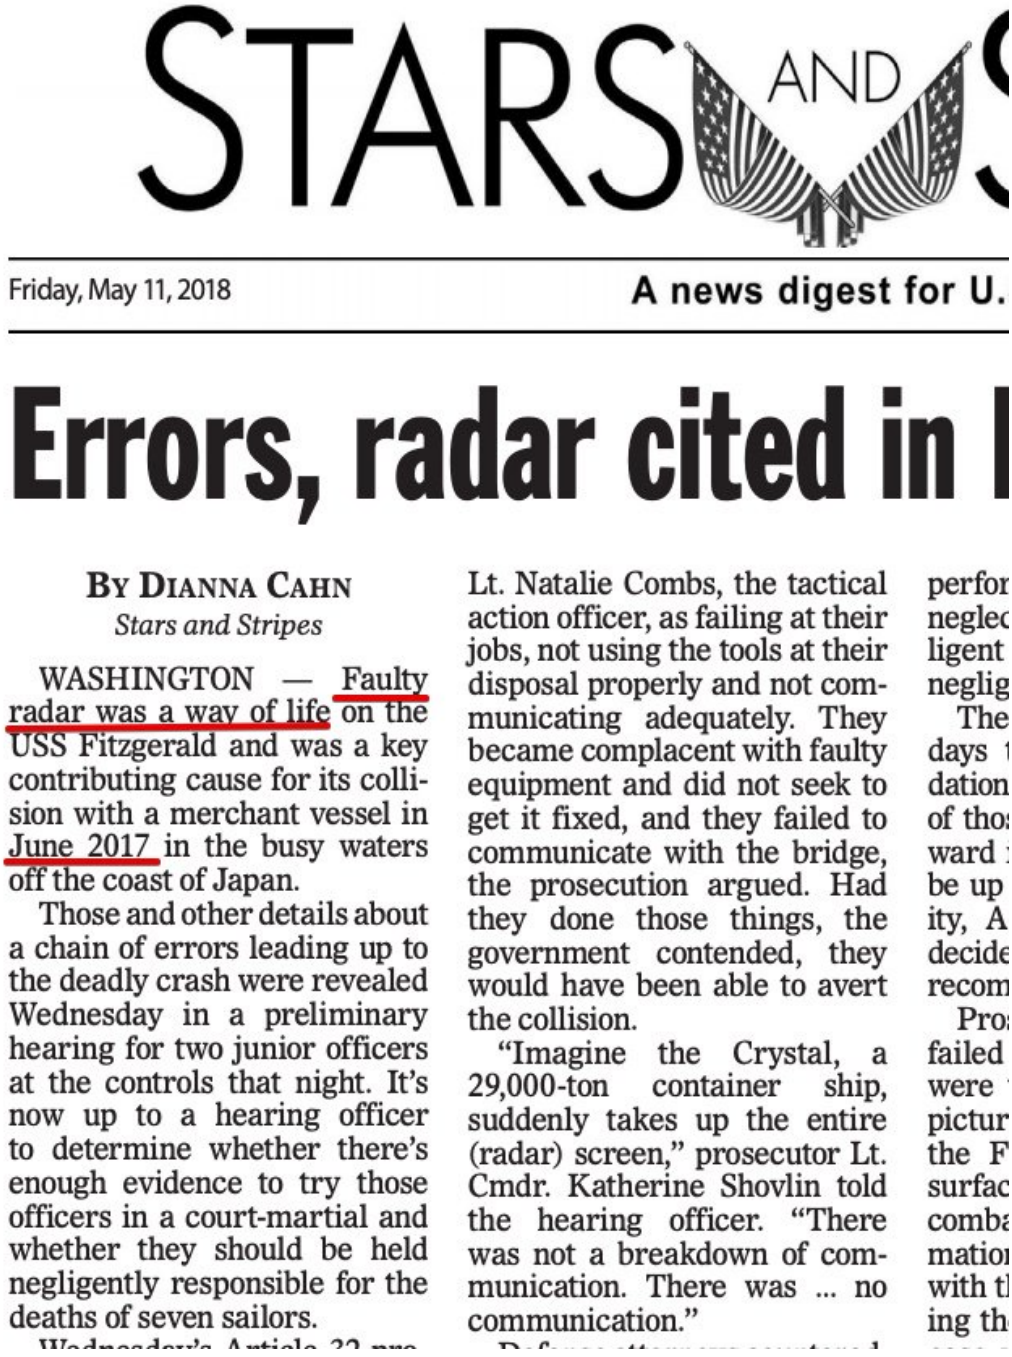
https://twitter.com/_/status/1142186209201889280

@_Desmoden But it didn't show up on Fravor's radar, if I remember correctly. So maybe what he saw wasn't what the ship's radar saw?

2019-06-21T21:15:20+00:00

https://twitter.com/_/status/1142179216110174208

@_Desmoden Besides, running diagnostics and resetting the system does not automatically flush out all the glitches - which could be system faults, or environmental false returns. Military radar has never been flawless. http://pbs.twimg.com/media/D9nV6V3VUAABsTh.jpg



STARS AND

Friday, May 11, 2018 A news digest for U.

Errors, radar cited in I

By Dianna Cahn
Stars and Stripes

WASHINGTON — Faulty radar was a way of life on the USS Fitzgerald and was a key contributing cause for its collision with a merchant vessel in June 2017 in the busy waters off the coast of Japan.

Those and other details about a chain of errors leading up to the deadly crash were revealed Wednesday in a preliminary hearing for two junior officers at the controls that night. It's now up to a hearing officer to determine whether there's enough evidence to try those officers in a court-martial and whether they should be held negligently responsible for the deaths of seven sailors.

Lt. Natalie Combs, the tactical action officer, as failing at their jobs, not using the tools at their disposal properly and not communicating adequately. They became complacent with faulty equipment and did not seek to get it fixed, and they failed to communicate with the bridge, the prosecution argued. Had they done those things, the government contended, they would have been able to avert the collision.

"Imagine the Crystal, a 29,000-ton container ship, suddenly takes up the entire (radar) screen," prosecutor Lt. Cmdr. Katherine Shovlin told the hearing officer. "There was not a breakdown of communication. There was ... no communication."

2019-06-20T20:06:20+00:00

https://twitter.com/_/status/1141799462232178688

@GazPyrotechnics @PostDisclosure @KikPlenty Yes, and it just shows a distant hot object. Probably a plane.

2019-06-20T19:00:22+00:00

https://twitter.com/_/status/1141782862657540096

@Blablablablubl2 @PostDisclosure We'll see.

2019-06-20T17:58:35+00:00

https://twitter.com/_/status/1141767314360156160

@GazPyrotechnics @PostDisclosure @KikPlenty I'd rather talk to the guy who shot the video. Fravor never even drew a diagram.

2019-06-20T17:54:52+00:00

https://twitter.com/_/status/1141766380980715520

@Blablablablubl2 @PostDisclosure I think they didn't really look into it in depth back then. Particularly the Gimbal video glare and rotation aspect.

2019-06-20T15:06:26+00:00

https://twitter.com/_/status/1141723992522289153

@GazPyrotechnics @PostDisclosure @KikPlenty No. I think that the radar equipment was malfunctioning, AND that Fravor did not see a hypersonic tic-tac.
However, that's just my opinion. Where it gets interesting is the actual data, which right now is just the videos. Those have boring verifiably possible explanations.

2019-06-20T15:03:45+00:00

https://twitter.com/_/status/1141723318371753984

@Blablablablubl2 @PostDisclosure In 2017. I'd be interested to see what they say now that they have had time to actually look into it.

2019-06-20T14:20:39+00:00

https://twitter.com/_/status/1141712470962130944

@Blablablablubl2 @PostDisclosure I really don't get this amazement that the Military wants to get to the bottom of reports of unidentified objects. Obviously on the edges of identifiability (distance, duration, situational awareness) there will be things that are unidentified. So they want to improve that.

2019-06-20T14:14:16+00:00

https://twitter.com/_/status/1141710865055379458

@GazPyrotechnics @PostDisclosure @KikPlenty I like surprises. However, I'm not surprised that a populist TV show has generated public interest. Heck, that X-Files did that too (probably much more so).

2019-06-20T14:05:42+00:00

https://twitter.com/_/status/1141708708633726976

@Blablablablubl2 @PostDisclosure You tell me. Imminent disclosure of alien contact, perhaps the most important event in human history, is met by almost nothing but Tom DeLonge and a breathless History channel special? Seems a bit dissonant, no?

2019-06-20T03:50:23+00:00

https://twitter.com/_/status/1141553856486133760

@PostDisclosure â□□Scientifically verified?â□□

2019-06-19T23:02:06+00:00

https://twitter.com/_/status/1141481308796776448

@GMan88420759 @Pandarcher @skeptropolis Distances change though.
Try it on a regular globe (or a basketball) Go south 1", then turn 90Â° go another inch, then another 90* and a third inch. You don't end up back where you started, so is a basketball not a sphere?

2019-06-19T16:29:04+00:00

https://twitter.com/_/status/1141382399424548865

@Heaney555 Looks like an actual bounce to me. I'd guess it's some kind of small remotely operated craft, like an RC jet plane. Hard to say with such poor quality video.

2019-06-19T04:43:50+00:00

https://twitter.com/_/status/1141204920810344450

@GMan88420759 @Pandarcher @skeptropolis So draw the diagram with a 100 mile line, then 1,000 mile, then 8,000 mile.

2019-06-19T04:43:05+00:00

https://twitter.com/_/status/1141204732754579456

@GMan88420759 @Pandarcher @skeptropolis You would only return to your start point if each side of that triangle was 8,000 miles long - i.e. a quarter of the globe. The smaller you get, then the flatter things look.

2019-06-19T04:06:05+00:00

https://twitter.com/_/status/1141195423291301888

@GMan88420759 @Pandarcher @skeptropolis Can you draw a diagram to demonstrate your claim?

2019-06-19T03:44:43+00:00

https://twitter.com/_/status/1141190045790961664

@GMan88420759 @Pandarcher @skeptropolis How far did you go? What was the size of the discrepancy you measured?

2019-06-19T03:41:34+00:00

https://twitter.com/_/status/1141189250022432769

@GMan88420759 @Pandarcher @skeptropolis Distance is measured over the surface. So they use that much.

SECTION IX.

LEVELLING.

Pl. 13. *fig.* 2.

LEVELLING is the art of ascertaining the perpendicular ascent or descent of one place (or more) above or below the horizontal level of another, for various intentions; and of marking out courses for conveyance of water, &c.

The *true level* is a curve conforming to the surface of the earth; as *ABG*.

The *apparent level* is a tangent to that curve; as *ADE*.

http://pbs.twimg.com/media/D9YYGm4UIAATt5j.jpg

faſtened three braſs ferrils, moveable by means of joints, wherein are ſtaves; and on this foot is placed the box.

LEVELLING, the finding a line parallel to the horizon, at one or more ſtations, and ſo to determine the height of one place with regard to another. See LEVEL.

A truly level ſurface is a ſegment of any ſpherical ſurface which is concentric to the globe of the earth. A true line of level is an arch of a great circle which is imagined to be deſcribed upon a truly level ſurface.

The apparent level is a ſtraight line drawn tangent to an arch or line of true level. Every point of the apparent level, except the point of contact, is higher than the true level: thus (plate LXXIX. *fig.* 13.) let EAG be an arch of a great circle drawn upon the earth; to a perſon who ſtands upon the earth at A, the line HD is the apparent level, parallel to his rational horizon RR; but this line, the further it is extended from his ſtation A, the further it recedes from the center; for BC is longer than AC, and DC is longer than BC, &c.

The common methods of levelling are ſufficient for laying pavements of walks, for conveying water to ſmall diſtances, for placing horizontal dials, or aſtronomical inſtruments: but, in levelling the bottoms of canals which are to convey water to the diſtance of many miles, the difference between the apparent and true level muſt be taken into the account; thus (*fig.* 14.) let IAL be an arch

http://pbs.twimg.com/media/D9YYCJlUIAAc9CD.jpg

those of our scientific men who have taken the matter in hand, have decided that for all practical geodesical operations it may be regarded as one-seventh part of the allowance to be made in respect of the curvature of the earth, from which it must be deducted, as will be seen on reference to Fig. 18,—*a* being the true position of the object observed, *b* its apparent position, *c d* and *c e*

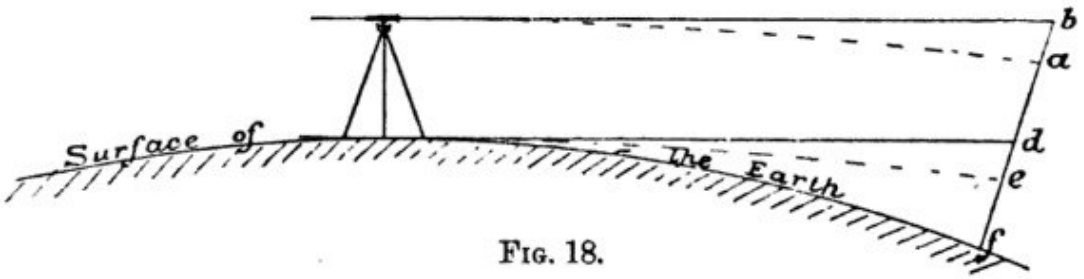

FIG. 18.

parallels drawn to account for the height of the instrument above the surface of the ground, and *d f* the allowance to be made in respect of the curvature of the earth, of which *d e* is a seventh part.

Now the curvature of the earth produces an apparent *depression* of an object viewed, as will be made quite clear from the following example and from reference to Fig. 19.

The level being properly set up, as shown in the figure, the centre of the eyepiece being 4·75 feet above the ground, and the horizontal cross web bisecting the summit of a chimney at a distance of 4 miles, required the difference of level between the site of the observation and the summit of the chimney.

	Feet.
Curvature for 4 miles (*vide* Chap. I.) = ·667 feet × 16 =	10·672
Less one-seventh for refraction	1·524
	9·148
Add for height of the instrument	4·750
Difference of level . . . . . =	13·898 feet.

http://pbs.twimg.com/media/D9YYCIMUcAAzmy6.jpg

A LEVEL LINE.

Benj. F. La Rue.

DIFFERENCE BETWEEN A LINE OF TRUE LEVEL AND A LINE OF APPARENT LEVEL—THE EARTH'S CURVATURE—REFRACTION—THE PRINCIPLE OF EQUAL SIGHTS.

THE operation of leveling consists in finding the difference between the elevations of given points on the earth's surface. The difference between the elevations of two points on the earth's surface is the difference between the distances of the respective points from the center of the earth. A point is said to be *above* or *below* another point according as it is situated at a greater or less distance from the center of the earth. Thus, let *a b*, Fig. 1, represent, in an exaggerated manner, a portion of the earth's crust, shown in section. It is evident that the higher point or summit of the mountain *s* is at a greater distance from the center of the earth *o* than is the lower point or valley *r*.

In order to ascertain the difference between the elevations of any two points on the earth's surface, however, it is not necessary to know the actual distance of either point from the center of the earth.

The *difference* between the distances of the two points from the center of the earth may be determined by ascertaining their respective distances vertically above or below a horizontal or level line.

A *vertical line* is one which coincides with the direction of the force of gravity, and *vertically* means in a vertical line. The distance of any point vertically above or below a level line passing through a given point, or above or below an imaginary level line whose position is arbitrarily assumed, is called the *elevation* of the point. What is meant by a level line will be understood from what follows.

A *horizontal surface* may be defined as a surface everywhere perpendicular to the direction of the force of gravity. Such a surface is also called a *level surface*. In a very general sense, a horizontal surface corresponds to the surface of the earth. The figure formed by a perfectly horizontal surface is, therefore, very nearly that of a true spheroid. For most purposes, however, it may be considered as a sphere. The surface of a body of water at rest is a very common example of a horizontal or level surface. The intersection of a vertical plane

http://pbs.twimg.com/media/D9YYCJXUYAEI4JK.jpg

2019-06-18T23:29:54+00:00

https://twitter.com/_/status/1141125918892576768

@GMan88420759 @Pandarcher @skeptropolis But who says that level isn't a curve? All the books on surveying for the last 300 years define "level" as following the curve of the Earth.

http://pbs.twimg.com/media/D9YX79uUwAEcZ2y.jpg

Gummere
1853

CHAPTER VIII.

LEVELLING.

The surface of an expanse of tranquil water or any similar surface concentric with it, is called a *Level Surface.* Any points situated in a level surface are said to be on the *same level;* and any line traced in such a surface is called a *line of level.*

If through any place, a level surface be conceived to pass, the distance which another place is from this surface, either above or below, measured on a line perpendicular to it, is called the *difference of level* of the two places.

Levelling is the art of determining the difference or differences of level of two or more places.

In consequence of the globular figure of the earth, a level surface is not, as it appears to be, a plane surface. It is nearly, though not exactly, spherical. In the operations of levelling we may, without sensible error, regard a level surface at any place, as being strictly a spherical surface, with a radius equal to 3956 miles, the mean radius of the earth, or, which is more exact, with a radius equal to 3968 miles;* the centre being

* The earth, if we disregard the inequalities in its surface, is an oblate spheroid. Its polar diameter is 7899 miles, and its equatorial diameter 7925 miles. A level surface is therefore a spheroidal surface. The radius of the spherical surface which most nearly coincides with any small portion of this spheroidal surface, changes slightly with the latitude of the place. For any place in the United States, the greatest error which can occur from

http://pbs.twimg.com/media/D9YX79uUwAAB6gM.jpg

CHAPTER VII.

LEVELLING AND CONTOURING.

Levelling. Levelling is the art of determining the relative altitudes of points on the Earth's surface.

Were the Earth a true sphere, the altitude of a point might be defined as its distance from the Earth's centre; but, as it is spheroidal in shape, the definition is not exact in a general sense, though it is nearly so as regards a limited area. If a long pipe A B (fig. 146) were laid, from one place to another, with vertical pipes at intervals, and filled with water, the altitude of the water-surfaces in the upright tubes would be equal when the water has come to rest. Further, if a network of

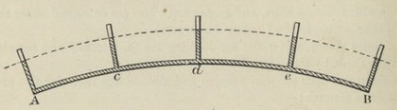

FIG. 146.

pipes were laid over a given area, connected together, and provided with upright pipes, the water-surface in each and every pipe would stand at the same altitude.

A surface passing through all water-surfaces in the several pipes, would be a surface of equal altitude, and would be an approximately spherical surface, whose radius is equal to the mean radius of the earth at the latitude of the place.

If levelling operations were conducted, from pipe to pipe, with perfect accuracy, the difference of the altitude of the water-surface, or water-level, in any two pipes, would be zero. The surface of a still lake is a surface of equal altitude. So, also, would be a surface, passing through 'mean sea level' at various places on the earth.

It is a property of a surface of equal altitude that a plane, tangential to it at any point, will be at right angles to a plumb-line, suspended at that point.

If the plumb-line be deflected from its normal position, for instance by the attraction of some large mountain, as sometimes happens, the plane of equal altitude will be deflected also.

The effect of the mountain mass, would be to produce local elevation in the surface of equal altitude (*vide* fig. 147, dotted lines), thus reducing the apparent height of the summit, above the general mean surface, in the neighbourhood thereof. But if a tunnel were driven through the mountain perfectly level, its invert would exactly satisfy the conditions of a line of equal altitudes as before

described, and it would be *level* from a hydrostatic point of view, as well as from that of the engine-driver.

The Level. The levelling instrument, in its essential parts, consists of a telescope with a horizontal wire accurately centred in the optical axis (*vide* Chapter on Instruments), thus affording a line of collimation, and two vertical wires to define a perpendicular portion of the field of view. A spirit-level is attached to the telescope, and it is so adjusted that, when the bubble is at the centre of its run, the line of collimation is horizontal, or in other words at right angles to a plumb-line suspended from the instrument.

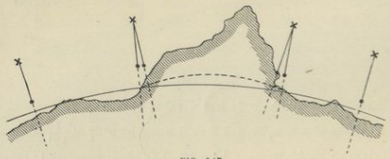

FIG. 147.

Levelling operations. To ascertain the difference of altitude (more commonly called the 'difference of level'), between two points, A and B (fig. 148), not far apart, it is only necessary to set up the instrument at one point A, adjust it so that the line of collimation is horizontal, direct it to a graduated staff at B, and read the height h at which the cross-wire cuts the staff.

Then, measuring the height of the centre of the telescope h above the point A, the difference between h and h_1 is the approximate 'difference level' between the points A and B.

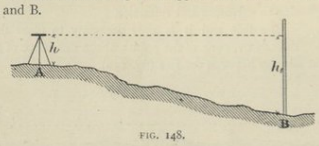

FIG. 148.

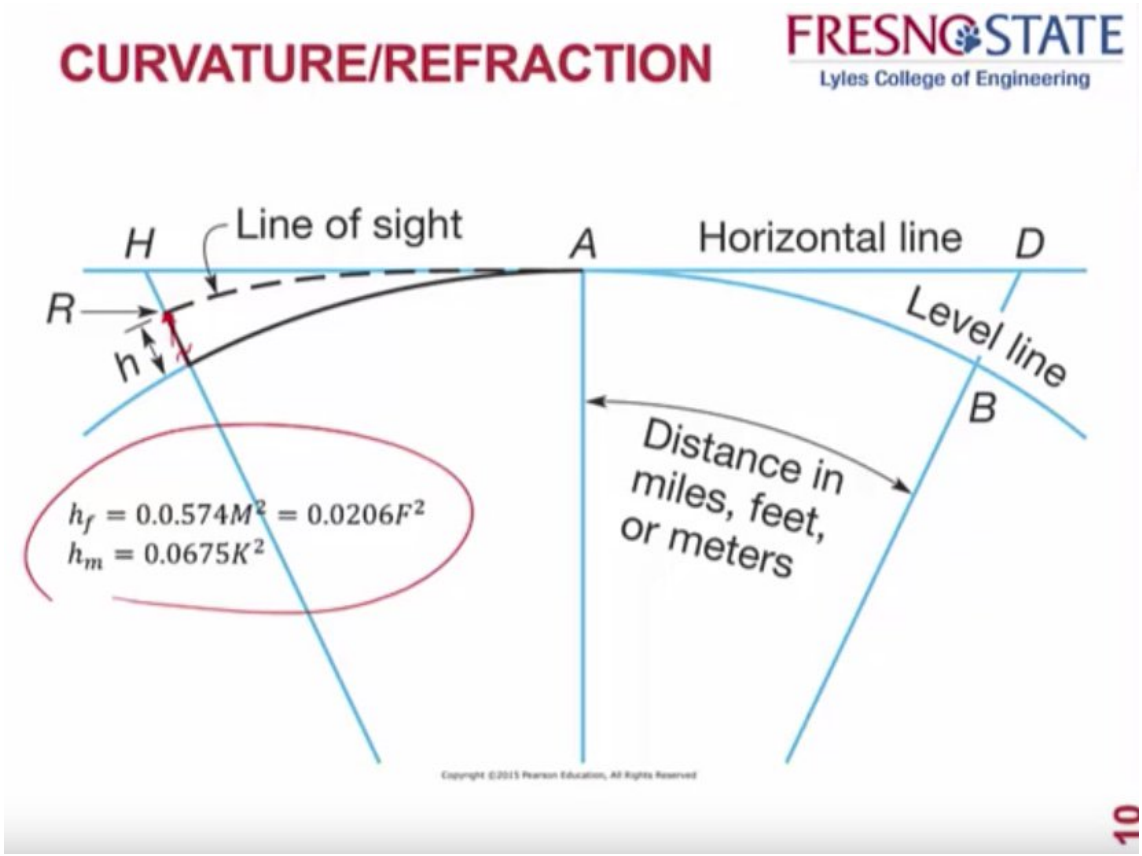
If h_1 is greater than h, then B is lower than A, if less, then A is lower than B.

This simple procedure would give for any two points, not more than one or two hundred feet apart, a practically accurate result, provided that the instrument were in perfect adjustment.

Effect of Curvature of the Earth on Levelling. For long distances, however, this procedure is inaccurate, on account of the curvature of the 'line of equal altitudes,' otherwise called the 'curvature of the earth.'

Let A C (fig. 149) be the curved line of equal altitudes, an arc of a circle, then B C is the true difference in level between the points A

http://pbs.twimg.com/media/D9YX790VUAAUadi.jpg



http://pbs.twimg.com/media/D9YX79uUwAEcZ2y.jpg

LIBRARY OF THE UNIVERSITY OF CALIFORNIA

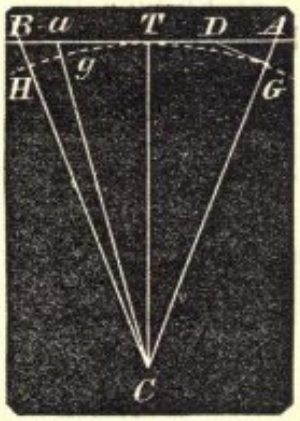
CHAPTER VIII.

LEVELING.

Two or more points are said to be on a level, when they are equally distant from the center of the earth, or when they are equally distant from a tranquil fluid, situated immediately below them. A level surface on the earth, is nearly spherical, *and is not a plane;* it is everywhere *perpendicular to a plumb line.*

Any small portion of a true level surface, cannot be distinguished from a plane; and, therefore, when observations are taken in respect to level, within short distances of each other, the spherical form of the earth is disregarded, and the level treated as a plane. But when any considerable portion of surface is taken into account, the curvature of the earth's surface must be considered.

The apparent level, at any point on the earth, is a tangent plane, touching the earth at that point only, and the true level is below this, and the distance below, depends on the distance from the tangent point.



Let T be any point on the surface of the earth, at right angles to the plumb line from this point is the plane or apparent level ATB; but the true level, or the surface of standing water, would be the curved surface GTH.

The distance AG, depends on the distance AT, and the radius of the earth CG or CT.

From G, draw GD, at right angles to AC; then the two triangles ATC, AGD, are equiangular and similar, and give the proportion

$$CT : TA :: DG : GA.$$

Practically.—TA is a very short distance compared to CT, for TA, the distance within which we can take observations, is never more than two or three miles, while the distance CT is near 4000 miles; therefore, CT is nearly equal to CA, consequently, DA is nearly equal to DG, so near that we shall call it equal.

Observe that $TD = DG$; hence $DG = \frac{1}{2}TA$.

https://twitter.com/_/status/1137232058856509440

@brax_whit @DavidJayB @ethan__tyson @skeptropolis @WBislin @jesse_kozlowski No. He took a photo of a line. It was curved before the compression.

2019-06-08T03:30:10+00:00

https://twitter.com/_/status/1137200115083427840

@brax_whit @DavidJayB @ethan__tyson @skeptropolis @WBislin @jesse_kozlowski Stretching an image can only magnify a curve.

If you draw a straight line in the image in photoshop, and then stretch it then the straight line will remain straight.

2019-06-08T03:26:03+00:00

https://twitter.com/_/status/1137199079786594309

@brax_whit @DavidJayB @ethan__tyson @skeptropolis @WBislin @jesse_kozlowski It is there. Same in this image. The line in the IMAGE is curved.

2019-06-07T20:20:10+00:00

https://twitter.com/_/status/1137091904468803584

@brax_whit @DavidJayB @ethan__tyson @skeptropolis @WBislin @jesse_kozlowski Yes, it'a quite hard to get an image with zero distortion with a cheap camera. But the horizon bends more than the straight edge, and constantly from one side to another. Subtract the lens distortion seen in the straight edge and you get the actual horizon bend.

2019-06-07T01:20:12+00:00

https://twitter.com/_/status/1136805019955556352

@Da_BuDMaN @skeptropolis Itâ□□s not a small distance, itâ□□s 20 miles. But you need 20 level miles in a straight line, a shallow view angle and high zoom.

2019-06-07T00:58:24+00:00

https://twitter.com/_/status/1136799534707642369

@Da_BuDMaN @skeptropolis Less zoom. You need high zoom at a shallow angle. The earth is very large, so the curve is very gradual and needs magnifying.

2019-06-07T00:49:33+00:00

https://twitter.com/_/status/1136797306370453504

@Da_BuDMaN @skeptropolis Thatâ□□s a salt flat. The road is on the ground.

2019-06-06T16:22:54+00:00

https://twitter.com/_/status/1136669803077201920

@livingEVOL They are there. Just hard to see planes with no contrails pointing to them. Contrail formation depends on high-altitiude weather.

2019-06-06T16:17:16+00:00

https://twitter.com/_/status/1136668388342652928

@jesse_kozlowski @skeptropolis Did any of the FE folk respond to this? I'd suspect one objection would be that GNSS is operating from cell phone towers and balloons and is just pretending to give you a curve.
I'd be impressed if they attempted the math behind that.

2019-06-06T16:01:20+00:00

https://twitter.com/_/status/1136664377552134144

@Fr1nk3 @skeptropolis A long exposure of that would be pretty cool. You'd see the headlights trace the curve.

2019-06-06T15:34:43+00:00

https://twitter.com/_/status/1136657677491118080

@CryptGold @PostDisclosure @__dregs__ @Juddlydoright @JeremyCorbell You don't have to go that far. I'd happily look at good evidence. Like close up photos, or even just photos of something other than blobs or lights.
Multiple sources would be ideal.

It's an oft-made point, but we have a billion times as much photographic power as 50 years ago.

2019-06-06T14:54:36+00:00

https://twitter.com/_/status/1136647582149570561

@brax_whit @ethan__tyson @skeptropolis @WBislin @jesse_kozlowski I watched @jeranism's video. The countertop is curved in the image, but that's probably just his camera. An actual straight line in the image will not curve when stretched. He seems to misunderstand this simple point, and everything follows from that misunderstanding.

2019-06-06T14:10:09+00:00

https://twitter.com/_/status/1136636396209180672

@brax_whit @DavidJayB @ethan__tyson @skeptropolis @WBislin @jesse_kozlowski Which is why you included a straight edge next to the horizon. Thus proving the horizon curves.

2019-06-06T00:25:18+00:00

https://twitter.com/_/status/1136428817801654272

@PostDisclosure @Oswald1160 @__dregs__ @Juddlydoright @JeremyCorbell That photo is from 1971. That's 50 years ago.

2019-06-05T23:39:45+00:00

https://twitter.com/_/status/1136417353720246275

@JeremyCorbell @Juddlydoright @PostDisclosure With all these eyes on it (the various forms of it) for multiple minutes, you'd think there will be some great video and/or photos. Heck someone said "it" hovered somewhere for hours. So there must be AMAZING videos!
I'll wait.

2019-06-05T23:33:18+00:00

https://twitter.com/_/status/1136415732210626562

@CypressXMX @Juddlydoright @JeremyCorbell @PostDisclosure Why don't you write down side by side what actually correlates? Did the radar ever actually correlate with an actual movement that was witnessed? Pilots were being sent to check on returns. Often they saw nothing. Does that mean there was nothing?

2019-06-05T22:08:34+00:00

https://twitter.com/_/status/1136394407853285376

@Da_BuDMaN @skeptropolis The structures on the side of the bridge are all the same size. They want the road level, so it follows the curve of the earth.
And look at the BOTTOM of the structures, where they meet the water. You can still see the curve there even on this side of the horizon.

2019-06-05T21:38:15+00:00

https://twitter.com/_/status/1136386778208673792

@brax_whit @skeptropolis @WBislin @jesse_kozlowski Because it's curved. My countertops are very flat, but one still has about a 0.5mm dip in the middle.
Use a carpenter's level.

2019-06-05T21:36:10+00:00

https://twitter.com/_/status/1136386255288094720
@Da_BuDMaN @skeptropolis Harry, it's not visible everywhere as you need a long (10-20+ miles) exactly straight road on perfectly flat ground (or fixed height above water), a good zoom lens, and an unobstructed viewpoint at a shallow angle. None of those things are in your photo). But they exist.

2019-06-05T21:31:57+00:00
https://twitter.com/_/status/1136385193076379648
@Juddlydoright @PostDisclosure @JeremyCorbell Yet the last statement "at no time during the incident" refers to the whole incident. Maybe she clarified this on TV?

2019-06-05T21:29:05+00:00
https://twitter.com/_/status/1136384468795633666
@brax_whit @skeptropolis Not distortion, just perspective compression. Which does not make things curve if they are flat, it just exaggerates the curve.
So there's a curve on the surface of the water. Same curve on most of the bridge. Bigger curve on some bits of the bridge.

Example. Actual photo. http://pbs.twimg.com/media/D8U_Yh4VsAAfGzq.jpg

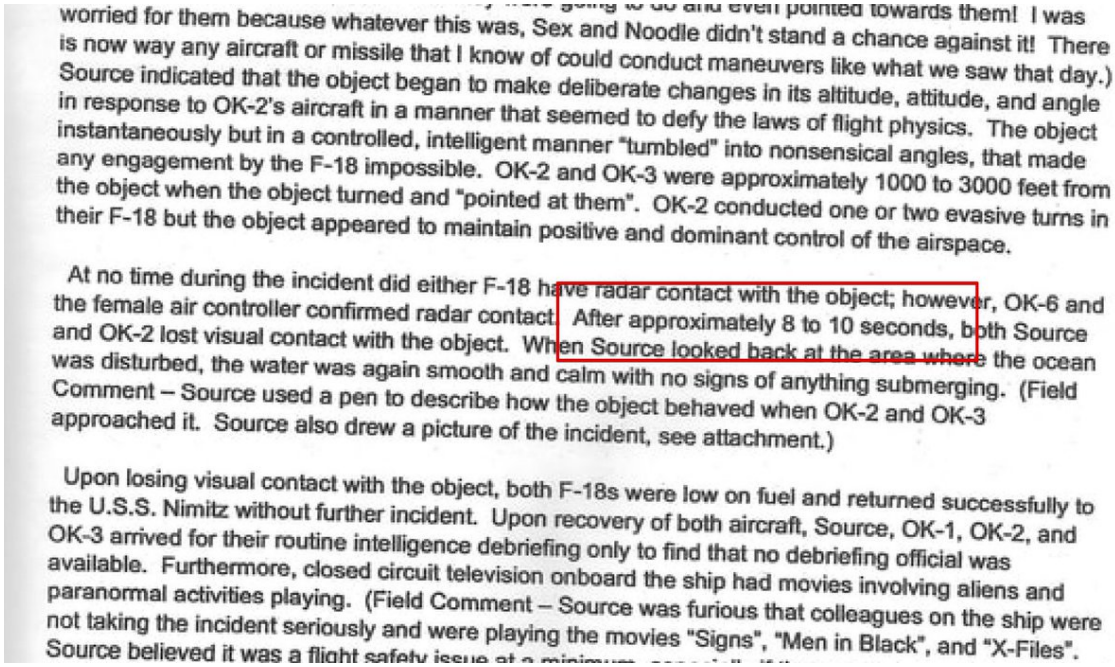
http://pbs.twimg.com/media/D8UPoAqUcAA7REA.jpg



worried for them because whatever this was, Sex and Noodle didn't stand a chance against it! There is now way any aircraft or missile that I know of could conduct maneuvers like what we saw that day.) Source indicated that the object began to make deliberate changes in its altitude, attitude, and angle in response to OK-2's aircraft in a manner that seemed to defy the laws of flight physics. The object instantaneously but in a controlled, intelligent manner "tumbled" into nonsensical angles, that made any engagement by the F-18 impossible. OK-2 and OK-3 were approximately 1000 to 3000 feet from the object when the object turned and "pointed at them". OK-2 conducted one or two evasive turns in their F-18 but the object appeared to maintain positive and dominant control of the airspace.

At no time during the incident did either F-18 have radar contact with the object; however, OK-6 and the female air controller confirmed radar contact. After approximately 8 to 10 seconds, both Source and OK-2 lost visual contact with the object. When Source looked back at the area where the ocean was disturbed, the water was again smooth and calm with no signs of anything submerging. (Field Comment – Source used a pen to describe how the object behaved when OK-2 and OK-3 approached it. Source also drew a picture of the incident, see attachment.)

Upon losing visual contact with the object, both F-18s were low on fuel and returned successfully to the U.S.S. Nimitz without further incident. Upon recovery of both aircraft, Source, OK-1, OK-2, and OK-3 arrived for their routine intelligence debriefing only to find that no debriefing official was available. Furthermore, closed circuit television onboard the ship had movies involving aliens and paranormal activities playing. (Field Comment – Source was furious that colleagues on the ship were not taking the incident seriously and were playing the movies "Signs", "Men in Black", and "X-Files". Source believed it was a flight safety issue at a minimum.

https://twitter.com/_/status/1136162969874681857

@Juddlydoright @PostDisclosure @JeremyCorbell Maybe thinking he was within 1,000 feet of something was part of a loss in situational awareness? How can we tell? Just trust Fravor because he's a stand-up guy and trained pilots never mess up?

It's a possibility that should remain on the list.

2019-06-05T06:42:05+00:00

https://twitter.com/_/status/1136161250516193280

@__dregs__ @Oswald1160 @PostDisclosure @Juddlydoright @JeremyCorbell What exactly do they say about the correlation?

2019-06-05T06:41:11+00:00

https://twitter.com/_/status/1136161024518774785

@Juddlydoright @PostDisclosure @JeremyCorbell Or perhaps in the two seconds after making a mental transition from intercepting drug runners, to a suicide mission preventing another 9/11, and then to search and rescue for a crashed plane, she was momentarily and understandably confused. http://pbs.twimg.com/media/D8Rzqn0UIAAQbu9.jpg

---

As both F-18s approached the new operating area, the female controller announced "approaching merge plot". At this time, the female controller asked "what is your load-out?" (Field Comment – the request for load-out refers to the quantity and type of ordinance the aircraft is armed with.) OK-2 responded to the female controller "none, practice rounds only". (Source Comment – At this point I was frightened due to the fact that we were being asked if we had any weapons available. I became concerned because we were in a situation that we may have to use our aircraft itself as weapon. I was thinking to myself that this could be another September 11th – style attack that were being asked to intercept.) As both F-18s approached the target location, the female controller began to count down the anticipated intercept time, "two minutes to merge plot", etc. Finally, the female controller indicated "merge plot" and announced "you should have visual."

As Source looked down at the ocean from the cockpit, she noticed a small patch of water, approximately 60 feet wide by 80 feet in length that appeared choppy and turbulent amongst a calm sea. The disturbance was unusual in that there was no apparent cause. The area was generally the shape of an oval and appeared to be "roiling". Towards the center of the disturbance, the water appeared lighter color and smooth again as if an unknown object had recently submerged beneath the surface. Source opined she thought she was be witnessing a crash, perhaps that of an unidentified aircraft, as she made the mental transition from intercept mission to search and rescue.

Approximately two seconds after noticing the unusual water disturbance, Source described witnessing a small, unidentified areal system (UAS) cross over the turbulent area of water. The unidentified object was elongated, approximately 30 to 40 feet in length, white in color, and described resembling a "tic-tac" candy mint. The object had no distinguishable control surfaces, was uniformly smooth, with no windows, doors, or lights visible. The object was opaque with a solid, definable edge. The object did not appear to emit any noticeable light or radiation from its surface nor did it have any noticeable exhaust trail. The object traveled from left to right over the disturbed water at an altitude of approximately 1000 to 3000 feet. The object appeared to travel at a speed of approximately 300 to 500 knots in a straight line. Source was unaware of the origin of the object or its destination but believed the disturbed water below could have been related in some way to the object. Source immediately became alarmed and initially thought that perhaps this was an

http://pbs.twimg.com/media/D8Rzqn0UIAAQbu9.jpg
2019-06-05T06:23:56+00:00
https://twitter.com/_/status/1136156682055180289
@Juddlydoright @PostDisclosure @JeremyCorbell The moon is rather noticeable because it's so bright. But that's not really the point. The issue was the description of the Tic-Tac's altitude, size, and speed - and it "crossing" the disturbance when parallax makes it impossible to tell.

2019-06-05T06:20:34+00:00
https://twitter.com/_/status/1136155834734374912
@__dregs__ @Oswald1160 @PostDisclosure @Juddlydoright @JeremyCorbell It does not correlate.

2019-06-05T00:53:39+00:00

@__dregs__ @PostDisclosure @Juddlydoright @JeremyCorbell They would astonishing, paradigm shifting, and epochal â□□ ushering in a new era of scientific progress and discovery.
So it's a real shame that all we have is some anecdotes from a decade ago and some blurry video of some things that resemble balloons and jets.

2019-06-05T00:02:18+00:00
https://twitter.com/_/status/1136060642715029506

@PostDisclosure @Juddlydoright @JeremyCorbell I'm sure there were radar returns of some sort. But I don't see any form of direct correlation with the described movement of the "tic-tac". And radar returns that break the laws of physics are automatically suspicious.

2019-06-04T23:58:52+00:00

https://twitter.com/_/status/1136059776033419265

@Juddlydoright @PostDisclosure @JeremyCorbell And the geometry of her account makes no sense. http://pbs.twimg.com/media/D8QYTDdUIAAUh1l.jpg

---

Then the sizes of things. 60 foot by 80 foot for the water disturbance, and half that (30 to 40 foot long) for the tic-tac. This is very small to see from "10,000 to 20,000 feet." And the tic-tac was at 1000 to 3000 feet above the tiny patch of water, and yet it "traveled from left to right **over the disturbed water at an altitude of approximately 1000 to 3000 feet ... at a speed of approximately 300 to 500 knots in a straight line.**"

300 knots is about 500 feet per second. This means it would have travelled over the 80 foot disturbance in 0.16 seconds.

However the jets themselves were also travelling at around 250 knots (422 feet per second) at 10,000 feet, looking down at a moving object at 1,000 feet. It's literally impossible to describe this at moving over the disturbed water. It could only possible have lined up for a fraction of a second. Here's a side view of the movements and relative positions for 1 second.

It makes no sense. You can't say it was going across the region if it only happened to be lined up for a fraction of a second - a fraction which is entirely depending on the position of the jet as well as the UFO.

Any sensible analysis would have involved a 3D recreation of the movement based on all available information. That would have shown that the description given is just nonsensical, and almost certainly the result of a loss of situational awareness.

https://twitter.com/_/status/1136005718958518272

@Juddlydoright @PostDisclosure @JeremyCorbell She gave TTSA a statement on the record in 2017. This new thing is the same, but on video.

https://coi.tothestarsacademy.com/nimitz-report

2019-06-04T19:26:42+00:00

https://twitter.com/_/status/1135991282667380736

@Juddlydoright @PostDisclosure From who? There's the same two people telling the same story they told years ago.

2019-06-04T16:23:54+00:00

https://twitter.com/_/status/1135945280514187264

@Juddlydoright @PostDisclosure Of course! But what's the new information? Fravor telling his story again? "Source" telling her story again?

2019-06-03T21:13:24+00:00

https://twitter.com/_/status/1135655746727636992

@AntonioSubi @SurferCosmic @NothingSirius @github @Mick @mck No, standard refraction has very little distortion because it has and essentially linear refractive index gradient. This is refraction caused by a temperature inversion (warm air over cool air)

2019-06-03T18:55:48+00:00

https://twitter.com/_/status/1135621122106437632

@diz_whit @PostDisclosure @dcwebster041 @Metabunk @RichDolan How do you know it went "deep black?"

2019-06-03T18:54:27+00:00

https://twitter.com/_/status/1135620778978816001

@RodrigoLVieira1 @PostDisclosure @MolotoVNKA @dcwebster041 @Metabunk See above.

2019-06-03T18:29:59+00:00

https://twitter.com/_/status/1135614623086927872

@PostDisclosure @dcwebster041 @Metabunk And yet the program ended.

2019-06-03T18:29:10+00:00

https://twitter.com/_/status/1135614417360437248

@PostDisclosure @MolotoVNKA @dcwebster041 @Metabunk Conjecture? I posted a quote from a Pentagon spokesperson.

2019-06-03T15:12:03+00:00

https://twitter.com/_/status/1135564813256470529

@AntonioSubi @SurferCosmic @NothingSirius @github @Mick See that distortion? Thatâ□□s refraction.

2019-06-03T12:16:44+00:00

https://twitter.com/_/status/1135520692550610944

@Juddlydoright @PostDisclosure It's essentially the same account that was published over a year ago. It discussed it starting here: https://www.metabunk.org/posts/216966/ (using "he" as her information was redacted)

2019-06-03T02:03:09+00:00

https://twitter.com/_/status/1135366276769955840

@AntonioSubi @SurferCosmic @NothingSirius @github And itâ□□s not to bad even for things like ships and lighthouses - the main misuse was for laser/light visibility where the light squeezes through in the compressed bit by the horizon.

2019-06-03T02:00:25+00:00

https://twitter.com/_/status/1135365588681801728

@AntonioSubi @SurferCosmic @NothingSirius @github It works fine for mountains, and in good atmospheric conditions.

2019-06-02T14:19:52+00:00

https://twitter.com/_/status/1135189293352095750

@dcwebster041 @Metabunk Can you provide any quotes to back that up?

2019-06-02T14:18:43+00:00

https://twitter.com/_/status/1135189002523332609

@FlatEartherMatt @ChristianPoet2 People noticing is the point. They have been ignoring this problem for far too long.

https://twitter.com/_/status/1133885577902796800
@naoehogui @Enttiis The conspiracy spectrum goes from 0 to 10. UFOs are on there because of the theorizing about some government cover-up. Being on the same spectrum as Flat Earth does not mean itâ□□s the same degree.

2019-05-29T22:58:37+00:00

https://twitter.com/_/status/1133870287504728065

@shepdizle Whoâ□□s paying?

2019-05-29T22:57:51+00:00

https://twitter.com/_/status/1133870093916672006

@RodrigoLVieira1 @mesolithicguy @PostDisclosure Why didnâ□□t they go take a photo?

2019-05-29T22:33:12+00:00

https://twitter.com/_/status/1133863893095239680

@shepdizle Why would I do that? Skinwalker ranch is very clearly bullshit. Transdimensionsal wolves?

2019-05-29T22:28:47+00:00

https://twitter.com/_/status/1133862777674555392

@Enttiis It's all part of the same spectrum.

2019-05-29T19:35:02+00:00

https://twitter.com/_/status/1133819054567747584

@MarkDRudningen No.

2019-05-29T19:00:43+00:00

https://twitter.com/_/status/1133810419175346176

@Juddlydoright @PostDisclosure I'll wait for the details of this corroboration.

2019-05-29T18:58:56+00:00

https://twitter.com/_/status/1133809969088720896

@Mikelynette "Giant hand" is an illusion where pilots feel like a giant invisible hand is pushing the plane in one direction. It has led pilots to eject when there is nothing wrong with the plane. As you can see from the above table, it's relatively common.

https://apps.dtic.mil/dtic/tr/fulltext/u2/a235654.pdf

2019-05-29T18:20:08+00:00

https://twitter.com/_/status/1133800202895208448

@buffcommacu @FreemanStahl Open to mystery? Exactly what happened in these various cases is a mystery.

I'm open to any explanation that fits the evidence. If you have two that fit, then ones that don't defy conventional physics obviously seem far more likely.

2019-05-29T18:17:48+00:00

https://twitter.com/_/status/1133799617835876352

@Juddlydoright @PostDisclosure Not put like that no, but I don't that's an accurate summary of the various accounts. Can you put four independent descriptions side by side?

2019-05-29T17:45:08+00:00

https://twitter.com/_/status/1133791395347480577

@Juddlydoright @PostDisclosure Why wouldn't I defend a position I think is correct? It's not like I'm saying "there are no alien visitors." I'm saying: "here are some reasonable explanations for the videos, and don't assume pilots never make mistakes"

I stand behind that 100%

2019-05-29T17:06:05+00:00

https://twitter.com/_/status/1133781569179492352

@gorskon The III there is a reference to the Three Percenters, a loose militia organization, some of whom think Trump is fighting a tyrannical deep state and might need them to take up arms to help him. It's like QAnon with less eating children, and more guns.

https://en.wikipedia.org/wiki/3_Percenters

2019-05-29T17:00:53+00:00

https://twitter.com/_/status/1133780259067682816

@mesolithicguy @PostDisclosure So what is the "them" they saw every day. There seem to be quite a variety of phenomena that people see.

2019-05-29T16:59:55+00:00

https://twitter.com/_/status/1133780018910248960

@PostDisclosure @mesolithicguy Sun = Glare.

2019-05-29T16:26:11+00:00

https://twitter.com/_/status/1133771527239790592

@PostDisclosure My point here is that we should not discount the possibility, on a per-case basis, that a pilot might not have seen an actual flying object. I get the sense that people are passionately defending Cmdr. Fravor's account as if he's some kind of precision instrument. He's human.

2022-06-19T15:56:06+00:00

https://twitter.com/_/status/1538551205214883840

@SumOfUs1 @TheDiddyBop @ITalkParanormal Where are these witnesses? Or even some direct quotes from them?

2022-06-19T15:54:59+00:00

https://twitter.com/_/status/1538550924267773952

@ARTUROSAND79 @__Nimitz @jaimemaussan1 The high birds are very large and slow. The low bird is small and fast.

2022-06-19T15:39:44+00:00

https://twitter.com/_/status/1538547085984772096

@TheDiddyBop Thanks!

But how was I wrong "early on"?

2022-06-19T15:11:37+00:00

https://twitter.com/_/status/1538540010562985984

@tdeeefc @JeremyCorbell @Condorman6 @PacificBasin @USNavCNO Nothing he has seen can make these stars actually be flying alien pyramids.

2022-06-19T15:10:50+00:00

https://twitter.com/_/status/1538539810683355136

@Falkyrs @JeremyCorbell @Condorman6 @PacificBasin @USNavCNO The triangles in this slide are stars.

The US Military seems to think they are drones.

Jeremy seems to think they are flying alien pyramids.

But they are stars.

So they should retract their statements.

2022-06-19T15:07:34+00:00
https://twitter.com/_/status/1538538989220614146
I wonder if this the replication experiment that Scott Bray was referring to in congressional committee testimony.

Here we see most of the elements of the "UFO" triangle video - including the shimmering of bright stars.

Video by Jesse.

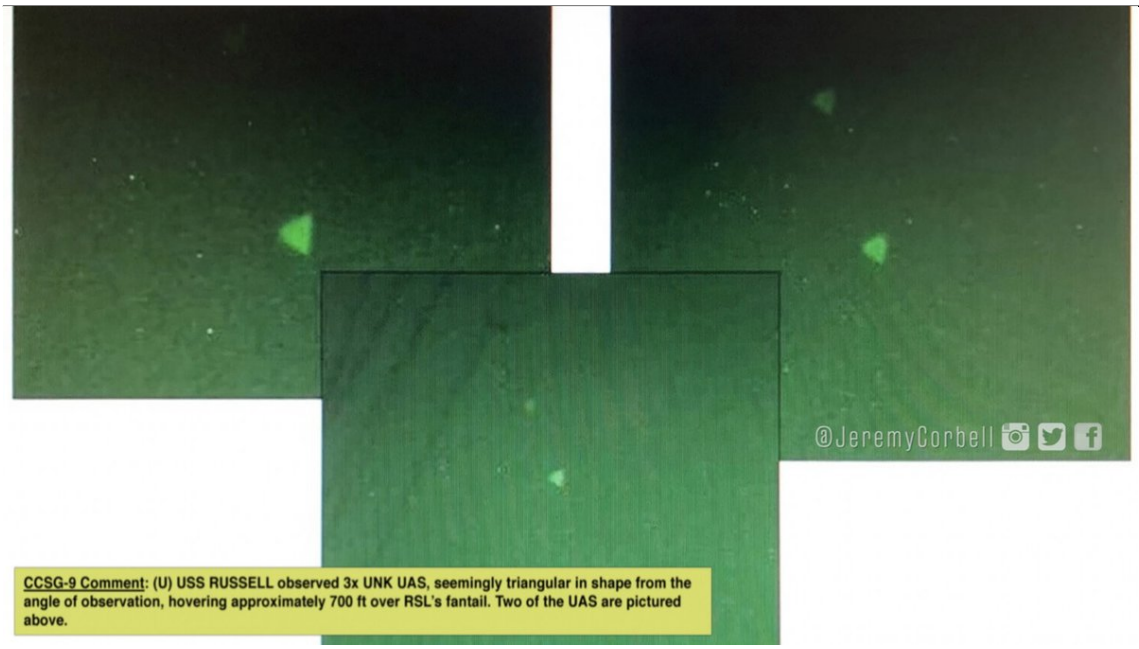
2022-06-19T08:25:41+00:00

https://twitter.com/_/status/1538437852580544512

@JeremyCorbell @Condorman6 @PacificBasin @USNavCNO Jeremy, are you going to address

the fact that this slide (and the video it came from) shows stars, and not drones? (and certainly not flying pyramids)
https://www.youtube.com/watch?v=pbxtTEWczRk
http://pbs.twimg.com/media/FVmg9iiUYAAY6qJ.jpg



http://pbs.twimg.com/media/FVmg9iiUYAAY6qJ.jpg
2022-06-19T08:20:10+00:00
https://twitter.com/_/status/1538436463573929986
@FrobertKinsey @AtticusFinch_JD @UnknownSekrets @uncertainvector @SilvaRecord @DietrichVFA41 That was an early hypothesis - part of an investigation is forming and testing hypotheses. That one was based on stills from the video. It went way down the list after some analysis of the actual video.

2022-06-19T07:36:46+00:00
https://twitter.com/_/status/1538425544215130113
@Serg_is_Vargas @OMApproach @WhatDaMath @nadiamdrake What has been "debunked" are the claims that they demonstrate extraordinary physics. We have not actually identified what the craft are, just that they are probably not anything incredible. GoFast is probably a balloon.

2022-06-19T07:35:28+00:00
https://twitter.com/_/status/1538425215146790913
@AtticusFinch_JD @UnknownSekrets @uncertainvector @SilvaRecord @DietrichVFA41 I do. I removed the word "debunker" from my profile after @uncertainvector told me that it put him off talking to me.

Debunking is finding things that are demonstrably wrong in claims. But a lot of what I do is simply investigate photos or videos to find out what they show.

2022-06-19T07:32:46+00:00
https://twitter.com/_/status/1538424537682874369
@encyclopath @cantillon17 @SawanPa77614095 Yes, it was the first game I worked on in the

US.

2022-06-19T07:26:25+00:00

https://twitter.com/_/status/1538422935848816640

@encyclopath @cantillon17 @SawanPa77614095 Aha indeed, I'd forgotten all about that. I only worked on the Genesis version. Looks like the SNES one was done by a different developer entirely.

2022-06-19T07:20:06+00:00

https://twitter.com/_/status/1538421346308214784

@_Toltecway_ All but one of them appear to be stars, so maybe that one. We don't know.

2022-06-19T06:58:13+00:00

Oh!

The images in this slide are taken from the newly released Navy video (1704...)

They show the stars Altair and Tarazed.

They are identified, apparently BY THE UAP TASK FORCE, as UNK UAS - Unknown Unmanned Aerial Systems, i.e. drones.

What is going on? http://pbs.twimg.com/media/FVk0UFgVsAAeNtk.jpg

2022-06-18T17:26:14+00:00

https://twitter.com/_/status/1538211497951698945

@KingM2021 Yeah, 100% ruling out a possibility when wh have low information is unnecessary, and often a mistake. Like in the Chilean case.

https://skepticalinquirer.org/newsletter/curated-crowdsourcing-in-ufo-investigations/

http://pbs.twimg.com/media/FVjTLUxVIAEFNhk.jpg

But on and off for about two years, CEFAA looked into this case without finding such an explanation. They studied the crew accounts, the video, and other data they thought relevant. They enlisted the help of French UFO analysts who concluded that it was probably a plane coming into land at Santiago airport dumping waste water before landing. The Chileans rejected this explanation because no planes were landing at that time.

They asked meteorologists if it was a weather balloon and were told no. An astrophysicist checked to see if it could be space junk and told them it could not be. A Navy admiral told them there were no Navy exercises or secret aircraft flying in the area. The DGAC officials confirmed it was not a drone. Air Force photo analysis determined that the object was not a bird. Numerous other experts ruled out numerous other explanations.

So CEFAA could not figure out what it was, and after two years they made an announcement declaring it a genuine unexplained phenomena. They released the video via writer Leslie Kean of the *Huffington Post*, who then wrote an article about the case, published on January 5, 2017.

The article and video went viral, quickly racking up over a million views. It caused great excitement—at last there was a "real" UFO video, certified unknown by the military, countless experts, and years of study.

Five days later, the case was solved. On January 6, Scott Brando from the *UFO of Interest* blog tweeted me a link and asked "Could this be a plane and its contrail?" I looked at the video and it

http://pbs.twimg.com/media/FVjTLUxVIAEFNhk.jpg

2022-06-18T17:23:09+00:00

https://twitter.com/_/status/1538210723448229888

@Spectre67904513 And where is the analysis of debrief viewing?

We don't have access to it, and we don't know what conclusion anyone reached.

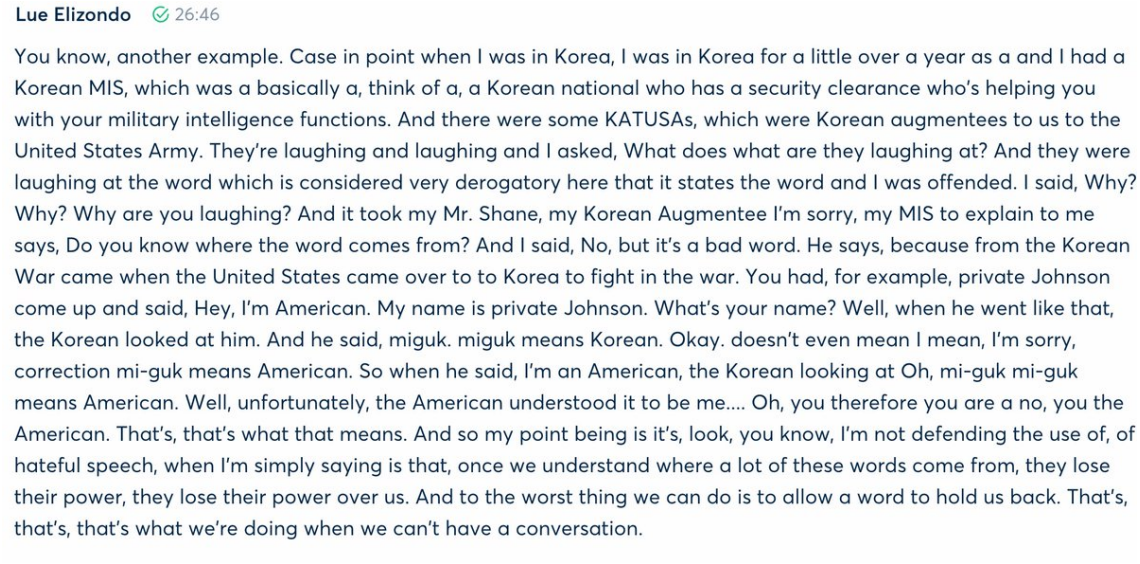
2022-06-18T17:12:51+00:00

https://twitter.com/_/status/1538208129149591552

@straub_tj @TheUFOTrail He then goes on to discuss how the words "spic" and "gook", while bad words, have benign linguist origins, so we should not let them have power over us.

But words DO have power, and you can't just choose to ignore that on a technicality. Joe Rogan found that out with the n-word. http://pbs.twimg.com/media/FVjPicYVUAEMws9.jpg

---



http://pbs.twimg.com/media/FVjPicYVUAEMws9.jpg

2022-06-17T21:59:19+00:00
https://twitter.com/_/status/1537917835829075968
Upscaling vs. original pixels

Upscaling has pros and cons. It can actually let you see perceive scale features - but it also creates false detail out of single pixels and lines, especially compression artifacts. So you always need to look at the original pixels.

I had an amusing experience during a live interview for a Russian-language show. The translation was barely audible over the presenter, so I had to infer the question from about three words and then wing it. One I them I just heard "...do you think?"

@dave_beaty @KilliK69 @MazzocchiRafael @DietrichVFA41 One thing you can tell - it's not Tic-Tac shaped. It has an irregular shape that appears to turn to the left. It's also significantly out of focus - which means the original was also out of focus.

2022-06-17T10:09:40+00:00

https://twitter.com/_/status/1537739243769933825

Viewing a low res video on most video players will smooth out the actual pixels. This hides things like compression artifacts, and can give the illusion of protrusions where it's just the boundaries between 8-pixel blocks.

Here the actual pixels are magnified, not smoothed.

@Muff96395190 @AE911Truth What would collapse look like?

2019-05-29T16:20:53+00:00
https://twitter.com/_/status/1133770195959369728
@mike18499668 No, but that's hard to verify unless you get independent accounts collected shortly after the incidents.
One thing about these illusions - they generally don't show up on video.

2019-05-29T16:18:57+00:00
https://twitter.com/_/status/1133769707696164864
@buffcommacu Depends on the degree of correlation. You look at the videos, and they are nothing at all like the eyewitness accounts. Similar with radar data. I think more likely they are unrelated.

2019-05-29T16:11:42+00:00
https://twitter.com/_/status/1133767884641935360
@aSkepticalHuman @rgage33 I think he's wrong.
Also people sometimes say "melted" when talking abut metal that is just bent, sometimes not even from heat. See this guy for example, talking utter nonsense:
https://youtu.be/M2YGFCeRfL4

2019-05-29T16:09:11+00:00
https://twitter.com/_/status/1133767249305657350
When discussing UFOs we are sometimes asked to ascribe god-like powers of observation, recollection, and immunity from illusions to military aviators. But nearly ALL USAF pilots report significant numbers of various illusions. Sometime leading to crashes.

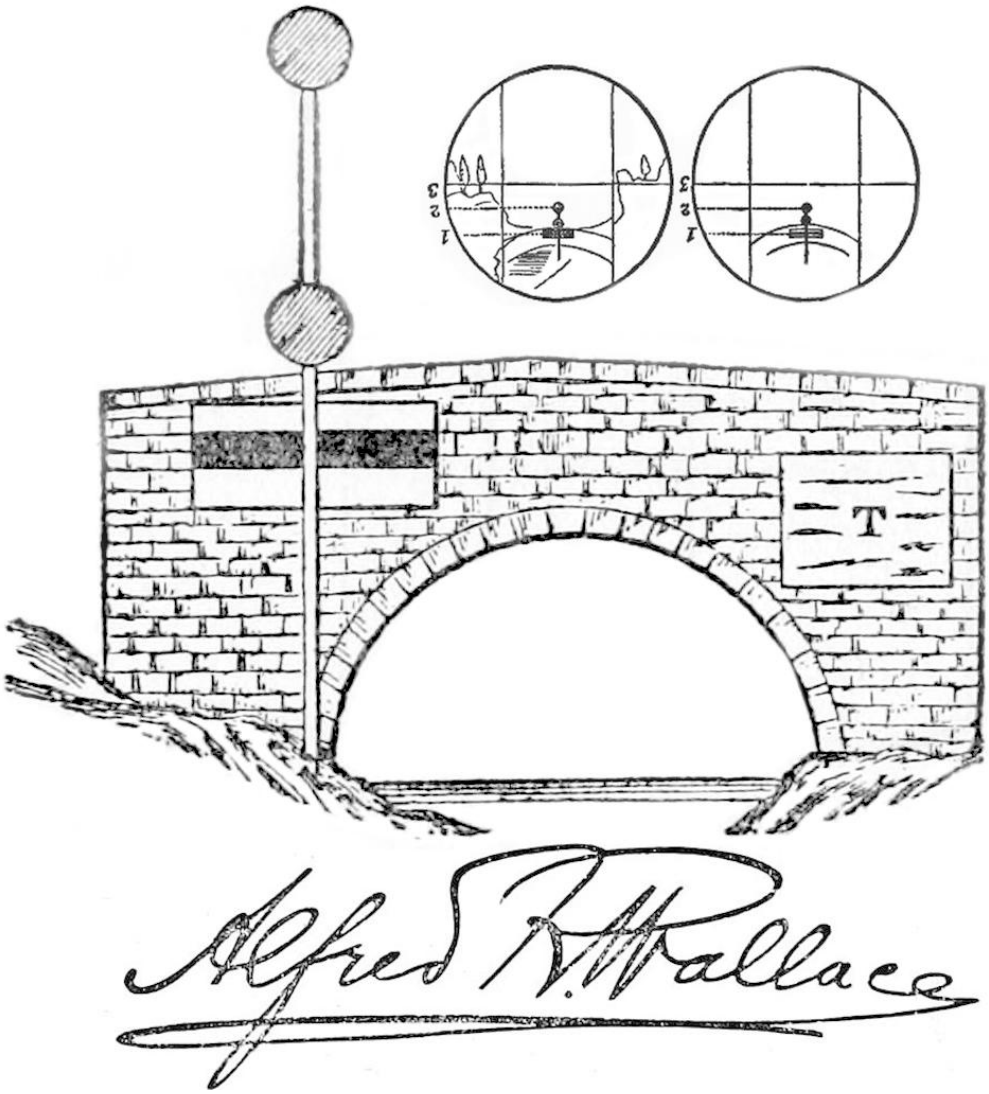
https://twitter.com/_/status/1133500889736499202

The shirt I wore for the Flat Earth debate has this design on it, showing a definitive Earth-curve demonstration by Alfred R. Wallace in 1870. Here's the transparent artwork if you want to make your own, @skeptropolis https://www.metabunk.org/f/Wallace.png

http://pbs.twimg.com/media/D7sAoISUwAAzkTf.jpg



http://pbs.twimg.com/media/D7sAoISUwAAzkTf.jpg

2019-05-28T22:16:14+00:00

https://twitter.com/_/status/1133497232861171712

@sinistrapublica @SimonGr41594862 @fullbredmartian It's clear to me. If the Earth were flat then you would see all of Catalina. You can only see the top 1/3, hence the Earth is not flat. Also, the amount hidden matches the amount predicted by the globe model. So it's probably a globe.

2019-05-28T22:03:20+00:00

https://twitter.com/_/status/1133493989166833664

@sinistrapublica @fullbredmartian And my back story is true.

2019-05-28T22:02:52+00:00

https://twitter.com/_/status/1133493871696965632

@sinistrapublica @fullbredmartian What more data do you need? And how much would that data change the result?

2019-05-28T21:36:24+00:00

https://twitter.com/_/status/1133487207652532230

@sinistrapublica @fullbredmartian The hidden part of the island is bigger than the visible part. How does "perspective" explain that?

2019-05-28T21:35:11+00:00

https://twitter.com/_/status/1133486904601501696

@sinistrapublica @fullbredmartian Sea level (tidal changes) would make no real difference here. You are not going to get back 400+ feet. That's another reason why using mountains is a lot better than using ships or buildings.

2019-05-28T21:05:43+00:00

https://twitter.com/_/status/1133479489009094656

I went to a Flat Earth conference and one of the attendees gave me five photos of Catalina Island and asked me to explain why it's visible if the Earth is a Globe.
So I did.
https://www.youtube.com/watch?v=qluJ2vAnNaw

2019-05-28T21:00:18+00:00

https://twitter.com/_/status/1133478125407334400

@richgel999 @NathanWailes @RichDolan "possibly a great unsolved mystery" â□□ or possibly tens of thousands of minor unsolved mysteries.

2019-05-28T20:58:51+00:00

https://twitter.com/_/status/1133477759672446977

@Eyes_Wide0pen @richgel999 @NathanWailes @RichDolan Which is why I don't make broad conclusions from my analyses. I just say it's a plausible explanation for that one video.

2019-05-28T20:51:14+00:00

https://twitter.com/_/status/1133475843357913088

@richgel999 @NathanWailes @RichDolan Hard to be an expert in hypotheticals.

[Hello from a fellow game programmer, BTW
https://www.mobygames.com/developer/sheet/view/developerId,14618/]

2019-05-28T20:46:00+00:00

https://twitter.com/_/status/1133474523712376832

@richgel999 @NathanWailes You've got to make some leaps and pretty wild assumptions to move that air out of the way. Even theoretically possible things like warp drives require resources of unknown availability, like negative mass matter, and don't actually work in an atmosphere (without kiloton booms)

2019-05-28T20:40:21+00:00

https://twitter.com/_/status/1133473102824783872

@richgel999 @NathanWailes But does it follow the currently known laws of physics? If an interpretation requires some NEW physics (like silently moving tons of air in a fraction of a second) then perhaps it might require more skepticism than one that does not (like a radar glitch, or losing camera lock)

2019-05-28T20:37:01+00:00

https://twitter.com/_/status/1133472265666826240

@druderadio It looks like a plane flying in a circuit, leaving contrails. They do that occasionally

because it's one of:
A) A high altitude hold for traffic or weather.
B) A surveying plane mapping or prospecting
C) A test plane, verifying aerodynamics
D) A research plane
E) A military plane

2019-05-28T20:32:21+00:00
https://twitter.com/_/status/1133471088627703808
@CallmeConor @kumailn Well it's a bit more complicated than that. But I think I've got some quite reasonable hypotheses for the three videos. Especially GIMBAL.
https://www.youtube.com/watch?v=Jr1cfpos6vo

2019-05-28T15:34:56+00:00
https://twitter.com/_/status/1133396243349041153
@J5_Project @SimonGr41594862 Thinking about contrails, and flight paths, and planes, might be related to a type of visuospatial mental abstraction that's also required for understanding perspective. So the understanding of one theory might lead to the rejection of the other.

2019-05-28T15:26:53+00:00
https://twitter.com/_/status/1133394217336791040
@SimonGr41594862 Some of them believe that. Part of the evidence being that jet fuel would be too heavy, so planes just fill up with compressed air instead.

2019-05-28T15:25:32+00:00
https://twitter.com/_/status/1133393877392678913
@TonyRush Of course this wasn't a scientific survey. It was people who attended a conference, and who were willing to talk to me, and then only a handful.
However some FE might exclude chemtrails due to the sky being under God's dome, which keeps it safe.

2019-05-28T05:55:06+00:00
https://twitter.com/_/status/1133250325190590464

2019-05-24T13:41:25+00:00

https://twitter.com/_/status/1131918124607975424

@SpiritWhirled Those are some of the mountains I just mentioned. All you are seeing is a small bit of the very top of the mountain, most of it is missing. Why?

2019-05-24T04:33:58+00:00

https://twitter.com/_/status/1131780352421244928

@SpiritWhirled No, some mountains are visible from other mountains over 200 miles away.

What are you driving at?

2019-05-23T23:27:16+00:00

https://twitter.com/_/status/1131703171091316736

@SpiritWhirled I'm just bemused as to why you can't just plug the numbers in to the calculator?

For a six foot person it's about 3 miles to the horizon. For the Burj Khalifa at 2722 feet it's 69 miles. So a total of 72 miles. Refraction varies though.

2019-05-23T18:29:45+00:00

https://twitter.com/_/status/1131628297706586112

@SpiritWhirled Depends how high the viewpoint is.

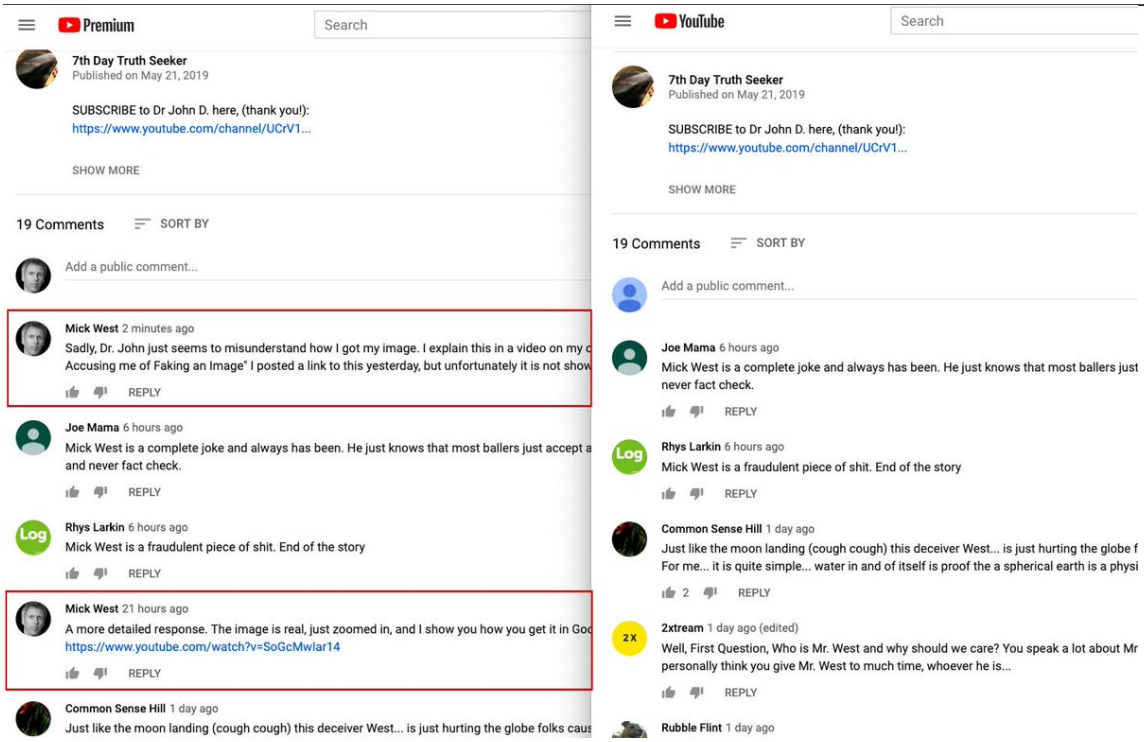
https://twitter.com/_/status/1131571798661783558

@4thAnon @RT_com Russia rolling out 5G is discussed in the NYT articles. That's part of the story. Russia knows it's safe tech, but they like fanning the flames of divisive issues in the US. Like 5G, Vaccines, and conspiracy theories.

2019-05-23T14:38:15+00:00

https://twitter.com/_/status/1131570040925384711

A video accusing me of faking an image is relatively popular in the Flat Earth community, and yet my video response explaining exactly how the image was obtained is blocked from that channel. A walled garden for "open" minds. http://pbs.twimg.com/media/D7QkR_VUYAA7X-P.jpg



http://pbs.twimg.com/media/D7QkR_VUYAA7X-P.jpg

2019-05-23T14:18:19+00:00

https://twitter.com/_/status/1131565022092546048

@SpiritWhirled That depends on how tall it is, and how high the observer is above sea level. It the sum of the distance to the horizon for both heights. So if both heights are 20 feet, then it's around 11 to 12 miles or more. http://pbs.twimg.com/media/D7QgVmQU8AA_7YE.jpg

---

Earth's Curve Horizon, Bulge, Drop, and Hidden Calculator

Distance in Miles: 4

Viewer height in Feet: 20

Planet Radius in Miles: 3959

Horizontal FOV in degrees: 60

Image Width in Pixels: 3264

Imperial Metric Advanced

Distance = 4 miles (21120 feet), View Height = 20 feet (240 inches) Actual Radius = 3959 miles (20903520 feet)

With "Standard" refraction adjustment of 7/6 radius (4618.83 miles)
Refracted Horizon = 5.92 miles (31232.96 feet)
Refracted Drop= 9.15 feet (109.74 inches)
Refracted Hidden= None, refracted horizon is beyond the target distance
Refracted Horizon Dip = 0.073 Degrees, (0.0013 Radians)

Geometric results (no refraction)
Geometric Horizon = 5.48 miles (28916.11 feet)
Geometric Drop = 10.67 feet (128.03 inches)
Geometric Hidden= None, horizon is beyond the target distance
Geometric Horizon Dip = 0.079 Degrees, (0.0014 Radians)

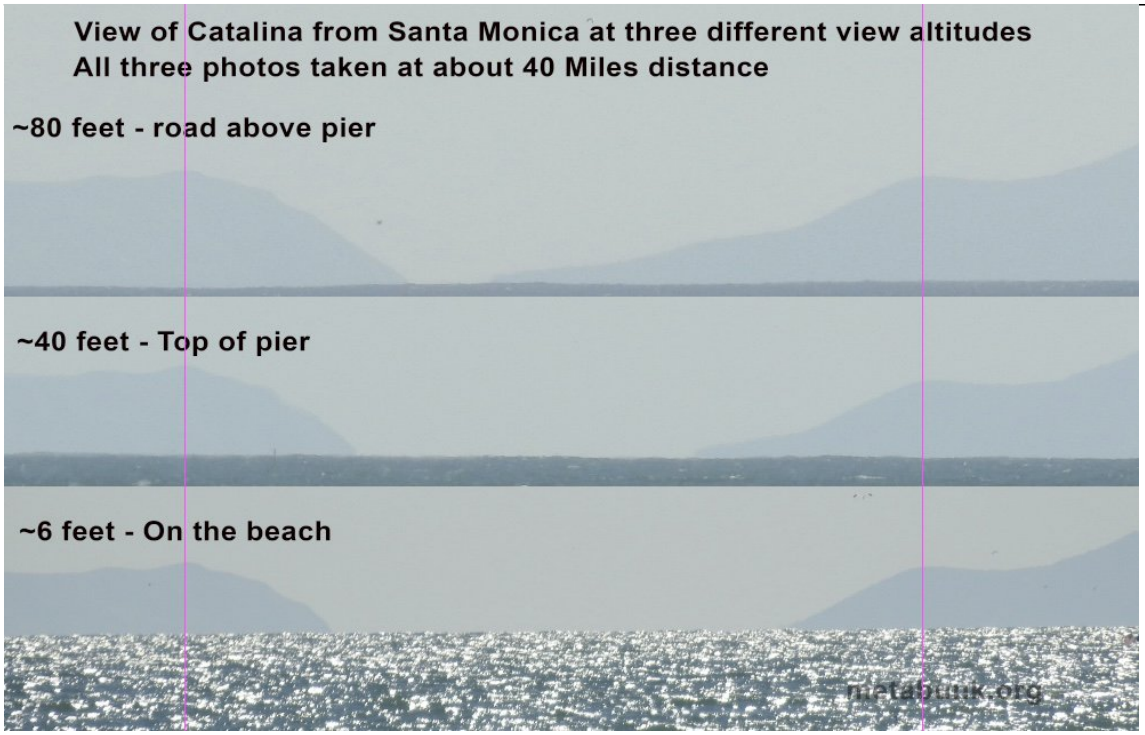
2019-05-22T21:15:29+00:00

https://twitter.com/_/status/1131307617999962112
@SpiritWhirled It a bit more complicated than Autocad can handle. Have a look at my ray-tracing refraction simulator.
https://youtu.be/8zzEWy5SGKg

2019-05-22T18:37:50+00:00
https://twitter.com/_/status/1131267945835794437
@SpiritWhirled With an atmosphere there no one number, as the atmosphere (the weather) varies.
However we can see that objects ARE obscured by the horizon. Catalina, for example.
http://pbs.twimg.com/media/D7MSLk2UIAAKtt2.jpg



http://pbs.twimg.com/media/D7MSLk2UIAAKtt2.jpg
2019-05-22T18:18:05+00:00
https://twitter.com/_/status/1131262972062384128
@SpiritWhirled So why do you think the Earth is flat?

2019-05-22T18:09:03+00:00
https://twitter.com/_/status/1131260702537109504
@SpiritWhirled If a simulation looks like reality, then that means it contains a reasonably good model of reality.

2019-05-22T18:00:19+00:00
https://twitter.com/_/status/1131258501559230465
@SpiritWhirled Perspective is based on light traveling in straight lines. Hence, you can do the math. Google Earth is not reality, it's a simulation of the globe model that looks like reality because it uses actual 3D projection perspective, like in nature, and not some made-up version.

2019-05-22T17:52:19+00:00
https://twitter.com/_/status/1131256488121421824

@SpiritWhirled I understand it. I spent 25 years as a video game physics programmer, using perspective pretty much every day. Light travels in a straight line from the object, to the camera. If there's nothing in the way, and the object is big or bright enough, then you will see it.

2019-05-22T17:50:08+00:00

https://twitter.com/_/status/1131255938248110080

@RealRBIlegend @TLCplMax Left one is prop contrails, right one is lit propellers.

https://twitter.com/_/status/1131249412506701824

@SpiritWhirled The cliffs are hidden behind the ocean. That's not perspective. That's them being behind the ocean.

Perspective makes things look smaller as they get further away. It does not hide one thing behind another. On a flat earth there's a direct line of sight to those cliffs.

2019-05-22T17:20:21+00:00

@MaxPlane_ Unfortunately what's happened there is Dr. John did not understand that in Google Earth you can zoom in over long distances using the photo overlay tool, so he moved his camera closer, and compared what he saw with my image. Also, he has comments disabled.

2019-05-21T20:27:59+00:00

https://twitter.com/_/status/1130933277735305216

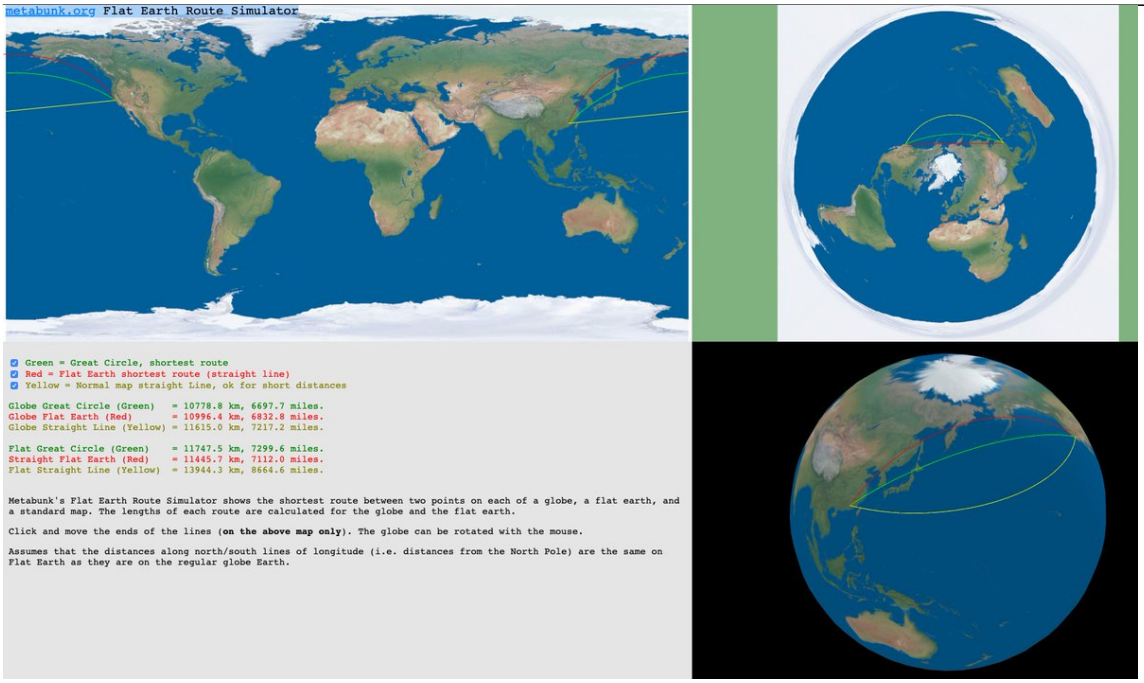
A quick debunking of the "sunset is like a coin on a tabletop moving away" model that's surprisingly popular in the Flat Earth community.

https://www.youtube.com/watch?v=9AgkaAibh58

2019-05-21T15:30:05+00:00

https://twitter.com/_/status/1130858306539405313

@benrothke @DanielW37136702 @dfreedman7 @KarenLKeeley1 @crackedscience @FlatEarthOrg @SingaporeAir Here's a tool I wrote that shows three different routes between any two points on the globe. There's the actual shorted route (a great circle, in green), then a flat earth AE straight line route (red), and a "normal" map straight line (yellow). https://www.metabunk.org/flat/ http://pbs.twimg.com/media/D7GdEaAUEAEUngv.jpg



http://pbs.twimg.com/media/D7GdEaAUEAEUngv.jpg
2019-05-21T15:27:08+00:00
https://twitter.com/_/status/1130857564994850817
@benrothke @DanielW37136702 @dfreedman7 @KarenLKeeley1 @crackedscience @FlatEarthOrg @SingaporeAir A good start in understanding what's wrong with that video is to note that the lines he drew on the globe were not actually great circle routes, they were more like straight lines on an equirectangular map. Actual routes vary with wind.

2019-05-19T21:09:38+00:00
https://twitter.com/_/status/1130218984421281792
@friendlyenp @LondonSkywatch Where is it linked in Metabunk?

2019-05-19T15:28:24+00:00
https://twitter.com/_/status/1130133106441113600
@Stephen37722821 @theyre_heeeere @EliaJ15 @FreemanStahl And I wasnâ□□t joking about the Flat Earth conference.

2019-05-19T05:02:13+00:00
https://twitter.com/_/status/1129975524892205056
@Real_StephenLaw @PostDisclosure @JonHNodge That's not a conspiracy theory. It's just a theory.

2019-05-19T04:18:11+00:00
https://twitter.com/_/status/1129964442970550273
@Real_StephenLaw @PostDisclosure @JonHNodge Well, then there mistaking a bunch of fish or

whales feeding for something unexplained, and then linking it to mistaking a canopy reflection for a flying oval, then later misremembering exactly what happened after hearing about odd radar returns ... maybe?

2019-05-19T04:13:03+00:00

https://twitter.com/_/status/1129963150755844096

@Stephen37722821 @theyre_heeeere @EliaJ15 @FreemanStahl http://Tftrh.com

---

2019-05-18T23:57:03+00:00

https://twitter.com/_/status/1129898727727030272

@Stephen37722821 @theyre_heeeere @EliaJ15 @FreemanStahl I'm not sure that Kevin is a reliable witness. He seems a bit eccentric.
Also, I AM a bit busy, with my Flat Earth conference coming up, and my podcast. But I'm sure I'll have stuff to talk about after the TTSA show.

2019-05-18T22:42:32+00:00

https://twitter.com/_/status/1129879974758903808

@SpiritWhirled That's not a flight with a refueling stop, it's two entirely different flights. Being unable to fly direct between two places is not uncommon. It's about economics.

2019-05-18T22:38:15+00:00

https://twitter.com/_/status/1129878895841275904

@Stephen37722821 @EliaJ15 @theyre_heeeere @FreemanStahl No, you said "MANY wingless tic tacs doing extreme maneuvers", however there's only 2 reports (Fravor and anon female pilot) of a SINGLE tic-tac, then multiple recollections of radar activity with multiple targets of UNKNOWN SHAPE, and one video of a SINGLE non-maneouvering blob.

2019-05-18T19:03:01+00:00

https://twitter.com/_/status/1129824731182452736

@theyre_heeeere @EliaJ15 @FreemanStahl We'll see.

2019-05-18T19:00:41+00:00

https://twitter.com/_/status/1129824142042157056

@theyre_heeeere @EliaJ15 @FreemanStahl What do you mean by "they"? How can I estimate a percentage if I've no idea what you are referring to. MUFON reports? TTSA videos? Youtube videos? Daily Star stories?

2019-05-18T18:57:17+00:00

https://twitter.com/_/status/1129823287737851904

@theyre_heeeere @EliaJ15 @FreemanStahl Percentage of what?

2019-05-18T18:46:20+00:00

https://twitter.com/_/status/1129820533451776000

@theyre_heeeere @EliaJ15 @FreemanStahl Also, nobody ever said there were "many wingless tic tacs doing extreme maneuvers". You are extrapolating.

2019-05-18T18:43:23+00:00

https://twitter.com/_/status/1129819787490553856

@theyre_heeeere @EliaJ15 @FreemanStahl No.

2019-05-18T18:04:07+00:00

https://twitter.com/_/status/1129809908902162432

@EliaJ15 @FreemanStahl Holmes would never argue you have to have ALL the data, he just needs some data. Most of his cases were solved by following what was indicated by incomplete data.

2019-05-18T18:02:55+00:00

https://twitter.com/_/status/1129809604055953408

@EliaJ15 @FreemanStahl No, we have data. So I'm "twisting my theories" to fit the data.

2019-05-18T18:01:49+00:00

https://twitter.com/_/status/1129809329534586880

@EliaJ15 @FreemanStahl One can argue anything.

2019-05-18T16:37:03+00:00

https://twitter.com/_/status/1129787996570435584

@FreemanStahl @EliaJ15 It's by RubÃ©n Lianza, Commodore (ret), Argentine Air Force, not me.

2019-05-18T16:35:49+00:00

https://twitter.com/_/status/1129787684694577153

@EliaJ15 @FreemanStahl No, but I think it's quite reasonable to make a list of possibilities, and try to order that list based on Occam's razor, so the more likely and simple explanations are at the top. There's no need to be forced into picking only one explanation when there's multiple possibilities.

2019-05-18T15:20:17+00:00

https://twitter.com/_/status/1129768678986264578

@FreemanStahl @EliaJ15 And yet you claim itâ□□s impossible to unbelieve. Sounds more like faith than science.

2019-05-18T14:15:46+00:00

https://twitter.com/_/status/1129752442546135042

@EliaJ15 @FreemanStahl Sounds a bit like a religion. Believe what?

2019-05-16T15:19:31+00:00

https://twitter.com/_/status/1129043706970083330

@morayross The vast majority of the weight of the building was in non-combustible material, steel and concrete. Only a few floors burnt.

2019-05-16T05:17:04+00:00

https://twitter.com/_/status/1128892098491502592

@travis_view Thanks! Iâ□□ll give my best shot. Should be ... interesting.

2019-05-16T05:03:02+00:00

https://twitter.com/_/status/1128888564568199169

@MuKaoKai @nazani14 @travis_view That seems a rather unlikely outcome here. :)

https://twitter.com/_/status/1128708804558766080
You don't need to go to 45,000 feet to see the curve of the earth. With care, you can do it from around 500 feet! A fun science experiment anyone can try (with a hill near the sea, a clear day, and a good camera.)
https://www.youtube.com/watch?v=tOCodgq1oM8

2019-05-15T16:52:51+00:00
https://twitter.com/_/status/1128704809018617856
@PressToDigitate @StevenM10657487 @Blablablablubl2 @PostDisclosure @DaveFalch We are discussing Gimbal. You appear to be discussing Nimitz/FLIR

2019-05-15T16:50:24+00:00
https://twitter.com/_/status/1128704194314006529
@PressToDigitate @StevenM10657487 @Blablablablubl2 @PostDisclosure @DaveFalch Yes I do. However, I don't think that everyone in the Navy knows where every drone is, at any moment in time. So it's entirely possible that in the 34 seconds of the Gimbal clip those pilots did not know what they were looking at, even if it was a drone.

2019-05-15T16:46:36+00:00
https://twitter.com/_/status/1128703237031206912
@EliaJ15 @etufodisclosure @Deepneuron @mesolithicguy @Max31562629 @buffcommacu @JuenoMT @theyre_heeeere @PostDisclosure @FreemanStahl @TTSAcademy No, because thatâ□□s not true. If they can demonstrate it is something else then thatâ□□s a good thing for the military. They like correct info.

2019-05-15T16:16:01+00:00

https://twitter.com/_/status/1128695538050682880
@mesolithicguy @Deepneuron @Max31562629 @buffcommacu @JuenoMT @theyre_heeeere @PostDisclosure @FreemanStahl @TTSAcademy I am neither pretending nor assuming any of those things. In fact I think, if they were doing their jobs, they must have studied the videos sufficiently to know what they show, otherwise they would not release them.

2019-05-15T16:13:18+00:00
https://twitter.com/_/status/1128694856182681601
@buffcommacu @Deepneuron @mesolithicguy @Max31562629 @JuenoMT @theyre_heeeere @PostDisclosure @FreemanStahl @TTSAcademy What did I miss from the pilots? "There's a whole fleet of them"? It not really clear what that means when the video shows one object.

2019-05-15T16:09:39+00:00
https://twitter.com/_/status/1128693936464093185
@Deepneuron @mesolithicguy @Max31562629 @buffcommacu @JuenoMT @theyre_heeeere @PostDisclosure @FreemanStahl @TTSAcademy So really the indication are that the Navy HAS examined these videos, and that they know what they are (drone, plane, balloon)
Why haven't they quashed the UFO rumors? Because they are a vast bureaucracy made up of people with more important things to do.

2019-05-15T16:06:18+00:00
https://twitter.com/_/status/1128693094126313473
@JonHNodge @PostDisclosure But I AM a nerd! :)

2019-05-15T16:05:44+00:00
https://twitter.com/_/status/1128692949942919168
@Deepneuron @mesolithicguy @Max31562629 @buffcommacu @JuenoMT @theyre_heeeere @PostDisclosure @FreemanStahl @TTSAcademy The "unknown" category
Consider, the explanation for the Gimbal video is that the rotation is an artifact of the gimbal system for the ATFLIR. The navy labeled it "GIMBAL". Pilot says it's a drone, Navy labels says "UAV" on 1910. Go-fast looks like a balloon, Navy says "BALLOON"

2019-05-15T15:58:35+00:00
https://twitter.com/_/status/1128691154126397440
@mesolithicguy @Deepneuron @Max31562629 @buffcommacu @JuenoMT @theyre_heeeere @PostDisclosure @FreemanStahl @TTSAcademy Why would they? Any operational video is not cleared for public release. That does not mean anyone has studied it in great depth. According to the Navy 1910 form they just lumped them in with UAV, Balloons, and UAS. (U = Unmanned)

2019-05-15T15:52:00+00:00
https://twitter.com/_/status/1128689494578716672

2019-05-15T15:42:05+00:00
https://twitter.com/_/status/1128686999773204480
@FreemanStahl @Deepneuron @Max31562629 @buffcommacu @JuenoMT @theyre_heeeere @PostDisclosure @TTSAcademy I'm totally open to it. I just don't see any good evidence, and I see a lot of wishful thinking.
I do like beer though.

2019-05-15T15:10:15+00:00
https://twitter.com/_/status/1128678989646589953
@Deepneuron @Max31562629 @buffcommacu @JuenoMT @theyre_heeeere @PostDisclosure @FreemanStahl @TTSAcademy It's nothing at all to do with me. Historically, people have been known to make mistakes that's all. But we're really discussing Gimbal here, for which there's just the video, so far.

2019-05-15T15:07:40+00:00
https://twitter.com/_/status/1128678340359901184
@JuenoMT @theyre_heeeere @Deepneuron @PostDisclosure @FreemanStahl @TTSAcademy Where? When they say "It's a fucking drone, bro." What exactly are you referring to? Please link and quote it.

2019-05-15T14:46:10+00:00
https://twitter.com/_/status/1128672926603960320
@FreemanStahl @TheOutThere2016 @EngagingThe @TTSAcademy ... or both, or some combination of truth, lies, bad memories, correct memories, correct interpretations, instrument error, out of context reports, conflations, synthesis, miscalculations, and/or mistakes ...

2019-05-15T14:36:51+00:00
https://twitter.com/_/status/1128670585582538752
@StevenM10657487 @PressToDigitate @Blablablablubl2 @PostDisclosure @DaveFalch And a drone IS a jet plane. http://pbs.twimg.com/media/D6nX5_JUcAAmaHX.jpg

---

http://pbs.twimg.com/media/D6nX5_JUcAAmaHX.jpg

2019-05-15T14:34:58+00:00

https://twitter.com/_/status/1128670108786647040

@StevenM10657487 @PressToDigitate @Blablablablubl2 @PostDisclosure @DaveFalch No, they were looking at their ATFLIR, it would have been too small to see visually, certainly too small to see "rotating". And I'm not suggesting at least two engines. One would suffice.

2019-05-15T14:33:05+00:00

https://twitter.com/_/status/1128669636872925184

@JuenoMT @TheOutThere2016 @EngagingThe @TTSAcademy My response here was to someone accusing me of saying I thought people were lying. I was correcting that, not setting up a dichotomy. I was telling him what I actually thought. Of course there are always other possibilities.

2019-05-15T14:28:55+00:00

https://twitter.com/_/status/1128668586656976896

@buffcommacu @JuenoMT @theyre_heeeere @Deepneuron @PostDisclosure @FreemanStahl @TTSAcademy Duh.

2019-05-15T14:21:46+00:00

https://twitter.com/_/status/1128666788135227393

@JuenoMT @theyre_heeeere @Deepneuron @PostDisclosure @FreemanStahl @TTSAcademy No, that fits too. People make mistakes. Even Navy pilots.

But in the case of the Gimbal video, the subject here, there really isn't any witness testimony available yet, so we really just have the video.

2019-05-15T13:27:49+00:00

https://twitter.com/_/status/1128653209197617152

@EngagingThe @TTSAcademy Of course.

But for a DoD expert his track record is not good. Like why did he say Go-Fast was close to the water when it was not (and not fast). Heâ□□s not demonstrated expertise, just claimed it.

2019-05-15T13:20:15+00:00

https://twitter.com/_/status/1128651306418065408

@TheOutThere2016 @EngagingThe @TTSAcademy That is an excessive generalization

---

2019-05-15T13:18:04+00:00

https://twitter.com/_/status/1128650755215257601

@PostDisclosure @UFOL3TA Yeah, you trust TTSA, and you are a Disclosure fan.

2019-05-15T13:17:03+00:00

https://twitter.com/_/status/1128650502642618368

@theyre_heeeere @PostDisclosure @UFOL3TA I think itâ□□s a mixture, and varies by individual. I generally assume good faith though. Very intelligent people make mistakes. Look at the Chilean Navy case. No lies there. Just mistakes.

2019-05-15T13:12:31+00:00

https://twitter.com/_/status/1128649360445661184

@PressToDigitate @Blablablablubl2 @PostDisclosure @StevenM10657487 @DaveFalch Actually they say â□□Itâ□□s a fucking drone broâ□□, and nothing about planes.

2019-05-15T13:07:07+00:00

https://twitter.com/_/status/1128648000815763457

@PostDisclosure @UFOL3TA So your counter argument is that Iâ□□m not thinking right?

2019-05-15T13:04:27+00:00

https://twitter.com/_/status/1128647331430031360

@Mikelynette @TTSAcademy In the case of Gimbal the footage and the word â□□gimbalâ□□ are all we have.

2019-05-15T13:03:36+00:00

https://twitter.com/_/status/1128647115553402881

@TheOutThere2016 @EngagingThe @TTSAcademy Did I say that? I speak plainly. Iâ□□ve no idea if people are lying or just mistaken.

2019-05-15T13:02:18+00:00

https://twitter.com/_/status/1128646790402543618

@EngagingThe @TTSAcademy No, I donâ□□t think weâ□□ve heard from the DoDâ□□s experts on this matter.

2019-05-15T06:30:11+00:00

https://twitter.com/_/status/1128548109221388288

@PressToDigitate @Blablablablubl2 @PostDisclosure @StevenM10657487 @DaveFalch We are talking about the Gimbal video, where there is no such testimony.
And what about the Gimbal video is "self-explanatory?" Does it explain what the object is? Does it explain that it's not a plane or a drone?

2019-05-15T06:28:03+00:00

https://twitter.com/_/status/1128547573919129600

@Blablablablubl2 @PressToDigitate @PostDisclosure @StevenM10657487 @DaveFalch So what is the context that tells us something about what the Gimbal object is here? What suggests it's

not a plane? Has the Navy said it's not a plane (or drone)

2019-05-15T06:17:10+00:00

https://twitter.com/_/status/1128544833583194113

@Blablablablubl2 @PressToDigitate @PostDisclosure @StevenM10657487 @DaveFalch And we have no context.

2019-05-15T06:16:09+00:00

https://twitter.com/_/status/1128544576422023168

@FreemanStahl @StevenM10657487 @PostDisclosure @DaveFalch We also have evidence that it looks very like the IR signature of a jet, and that it's not rotating.

But it's not a bold assertion to say we don't have something. Especially as that's what you just said. Where do we disagree?

2019-05-15T05:12:29+00:00

https://twitter.com/_/status/1128528557192335360

@Akam1129 @PostDisclosure @StevenM10657487 @DaveFalch I don't know what you mean. What is "the story of the UFOs hypothesis"?

2019-05-15T03:56:13+00:00

https://twitter.com/_/status/1128509364413714433

@TheOutThere2016 Anecdotes about radar.

2019-05-15T03:54:59+00:00

https://twitter.com/_/status/1128509053313806336

@PostDisclosure @fluffykitty27 We'll see :)

2019-05-15T03:54:29+00:00

https://twitter.com/_/status/1128508928713609216

@DaveFalch @PostDisclosure @JeremyCorbell Excellent! I look forward to seeing them.

2019-05-15T03:47:35+00:00

https://twitter.com/_/status/1128507192343031808

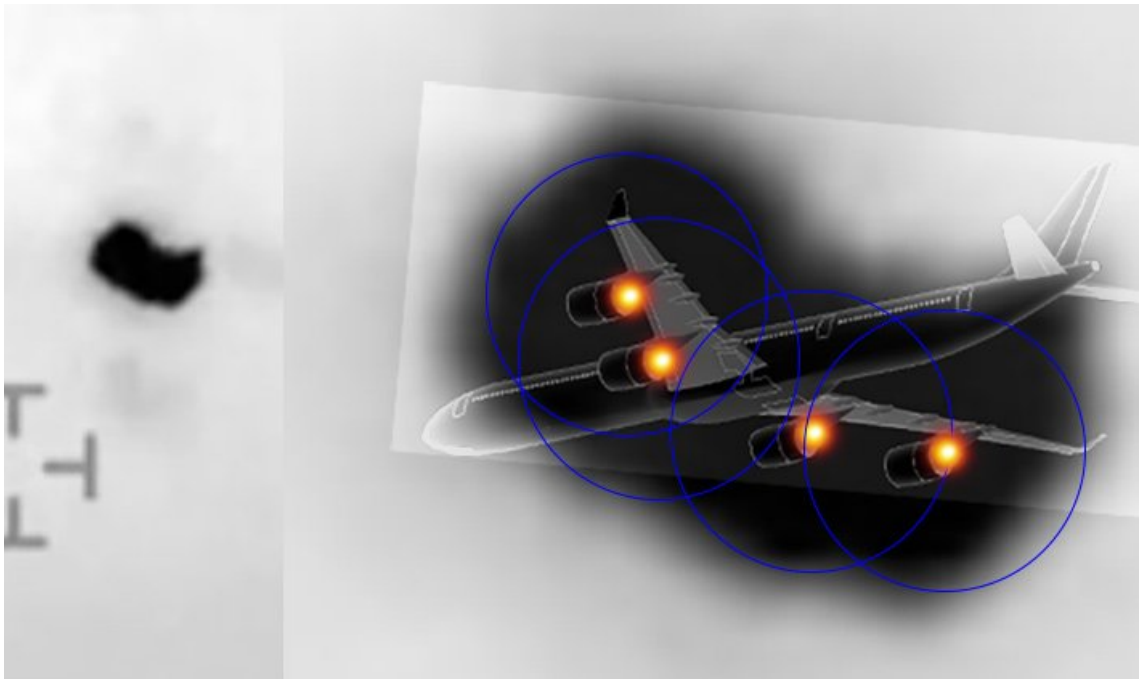
@PressToDigitate @PostDisclosure @StevenM10657487 @DaveFalch My angle is that all we have to go off for the Gimbal video is the video itself.

2019-05-15T03:17:38+00:00

https://twitter.com/_/status/1128499653178093568

@DaveFalch @PostDisclosure @JeremyCorbell Just to be clear though, I wouldn't have changed anything if I had seen that article. I don't think being unable to see the wings is compelling evidence against glare. Especially with how big glare can be relative to an engine.

http://pbs.twimg.com/media/D6k8cb7VUAA2KXq.jpg



http://pbs.twimg.com/media/D6k8cb7VUAA2KXq.jpg

2019-05-14T22:44:25+00:00

https://twitter.com/_/status/1128430896309198849

@PostDisclosure @StevenM10657487 @DaveFalch No PUBLIC testimony. Secret stuff is just speculation.

2019-05-14T22:42:41+00:00

https://twitter.com/_/status/1128430459463979008

@buffcommacu @StevenM10657487 @PostDisclosure @DaveFalch @JeremyCorbell Dave's main objection seems to be that in his video you can see a faint outline of wings. This seems like a spurious objection as the Gimbal video is lower resolution, and likely shows a plane much further away, so the wings would be behind the glare.

2019-05-14T22:35:11+00:00

https://twitter.com/_/status/1128428571280560129

@buffcommacu @StevenM10657487 @PostDisclosure @DaveFalch I disagree with his conclusion that it's not a jet. But when he says " I got an image that resembled the Gimbal footage. Not as much of an oval, but had a pointed end and a tilt to it." I agree.

2019-05-14T22:25:45+00:00

https://twitter.com/_/status/1128426198814478337

@DboardUfor @PostDisclosure @DaveFalch Erm, where are we supposed to be remembering that from?

2019-05-14T22:24:38+00:00

https://twitter.com/_/status/1128425917930328064

@StevenM10657487 @PostDisclosure @DaveFalch It's not. The testimony is all from the Nimitz/FLIR incident, not Gimbal. There's no testimony from anyone who actually took any video, and nothing at all from the day of the Gimbal and Go Fast videos.

2019-05-14T20:51:28+00:00

https://twitter.com/_/status/1128402470676250624

Does new footage of the infrared glare of a small plane help solve the mystery of the GIMBAL UFO video promoted by @TTSAcademy? All the pieces seem to fit. aura, rotation, parallax, spiky disk glare. Solved?

https://www.youtube.com/watch?v=Jr1cfpos6vo

https://twitter.com/_/status/1128047777450082304

@facebones777 @TakeThatGravity 8" per mile squares is easily close enough for the first 200 miles. Here's the calculations for 200 miles distance

http://pbs.twimg.com/media/D6ehS3qVUAAwjs6.jpg

Drop is the amount the curve of the earth drops away from level, it can be calculated in various ways
which are all *about the same* for under 100 miles distance

- Drop as r-sqrt(r^2-d^2) = **5.06 miles (26690.44 feet)** 5.055007969888605 Miles (26690.44208101183 Feet) (perpendicular to level line)
- Drop as sqrt(r^2+d^2)-r = **5.05 miles (26656.41 feet)** 5.048561761068942 Miles (26656.406098444015 Feet) (perpendicular to surface tangent)
- Drop calculated as 8 inches per mile squared = 8 * d*d / 12 = **5.05 miles (26666.67 feet)**
- Drop calculated with trig = r/cos(d/r) - r = **5.06 miles (26701.8 feet)** (perpendicular to target surface)

http://pbs.twimg.com/media/D6ehS3qVUAAwjs6.jpg

@rexhh @AzSkyWatcher @gcb910 @MollyGalt @MichaelBringsli @JoelleePeterson @jconnor19662 @Surfhempster @SilenceNotGold @KryptykConjurer @theTexan65 @POTUS Those are two different types of iridescence. The top one is thin film iridescence, cause by a thin film of oil on water. The second is particle iridescence cause by differences in cloud water particle sizes. Related, but very different physical mechanisms.

You said "clouds donâ□□t cause rainbow diffraction without precipitation â□□ chemtrails do" I think you are confusing terms there. Rainbows are a refraction phenomena, and diffraction colors (iridescence) generally comes from clouds that are not precipitating.

@hoaxeye @Alawy_Vlogs And by "close to the camera," I mean they were floating in the air, maybe 50 feet away (unlike the planes, which were 50,000 feet away)

2019-05-12T02:33:04+00:00
https://twitter.com/_/status/1127401275098689536
@EdPapworth New?

2019-05-11T18:01:10+00:00
https://twitter.com/_/status/1127272451904196608
@EdPapworth Actually, on review it more I'm pretty sure that what it is. ALL the white specs that are moving experience a change in direction and/or speed. The magnitude relates to the distance.

2019-05-11T17:56:44+00:00
https://twitter.com/_/status/1127271336559038464
@EdPapworth Some discussion of this effect here:
https://www.metabunk.org/need-debunking-video-claiming-zigzaggin-objects-and-movement-prove-eva-filmed-in-pool.t10424/

2019-05-11T17:54:51+00:00
https://twitter.com/_/status/1127270858794291200
@EdPapworth What the context? I'd suspect it is something that's small and close to the camera (like ice), so when the camera changes direction then the closest lit objects have a large apparent motion, but don't actually change direction.

2019-05-11T16:32:08+00:00

https://twitter.com/_/status/1127236137301331968

Not just conspiracy theories, you also get this conformity pressure in other fringe groups like UFOology, crop circles, paranormal sensitives, mystics, and other "experiencers". There's pressure to not rock the boat with inconvenient facts. Persistence leads to exclusion.

2019-05-11T15:30:02+00:00

https://twitter.com/_/status/1127234417011781632

Social conformity is something that crops up very often in the my Rabbit Hole interviews. People think at first they are rebelling against being a conforming sheeple, but instead rapidly become mired in a different kind of tribal groupthink - conspiracy theories.

2019-05-08T17:37:52+00:00

https://twitter.com/_/status/1126179422124462080

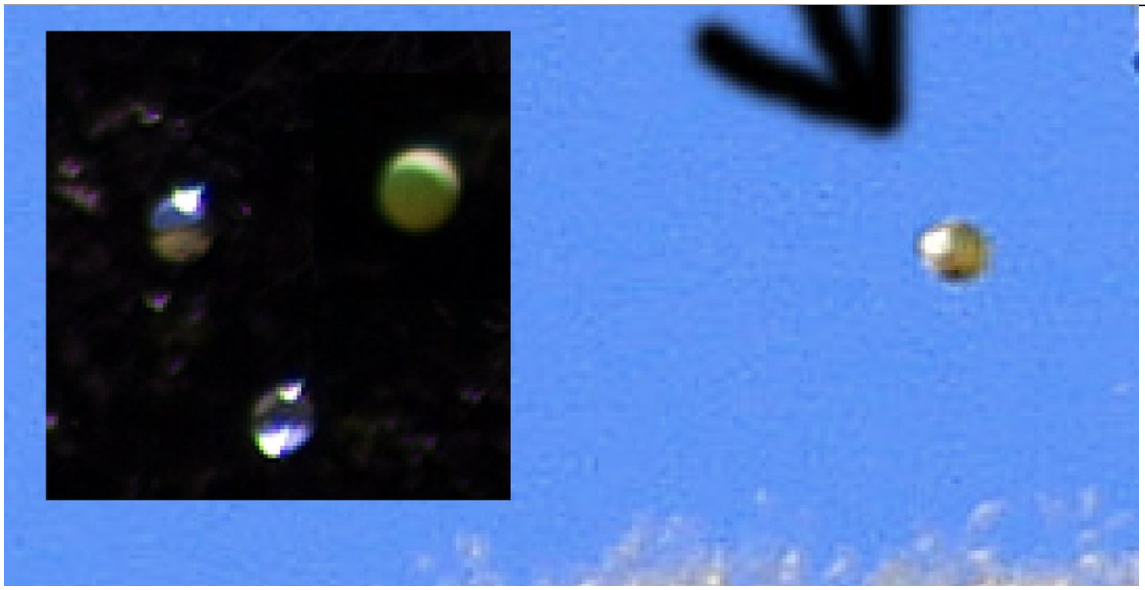
@TheOutThere2016 @UFOS_EXPOSED That's the transparent one. I think that's just darkness.

2019-05-08T17:25:27+00:00

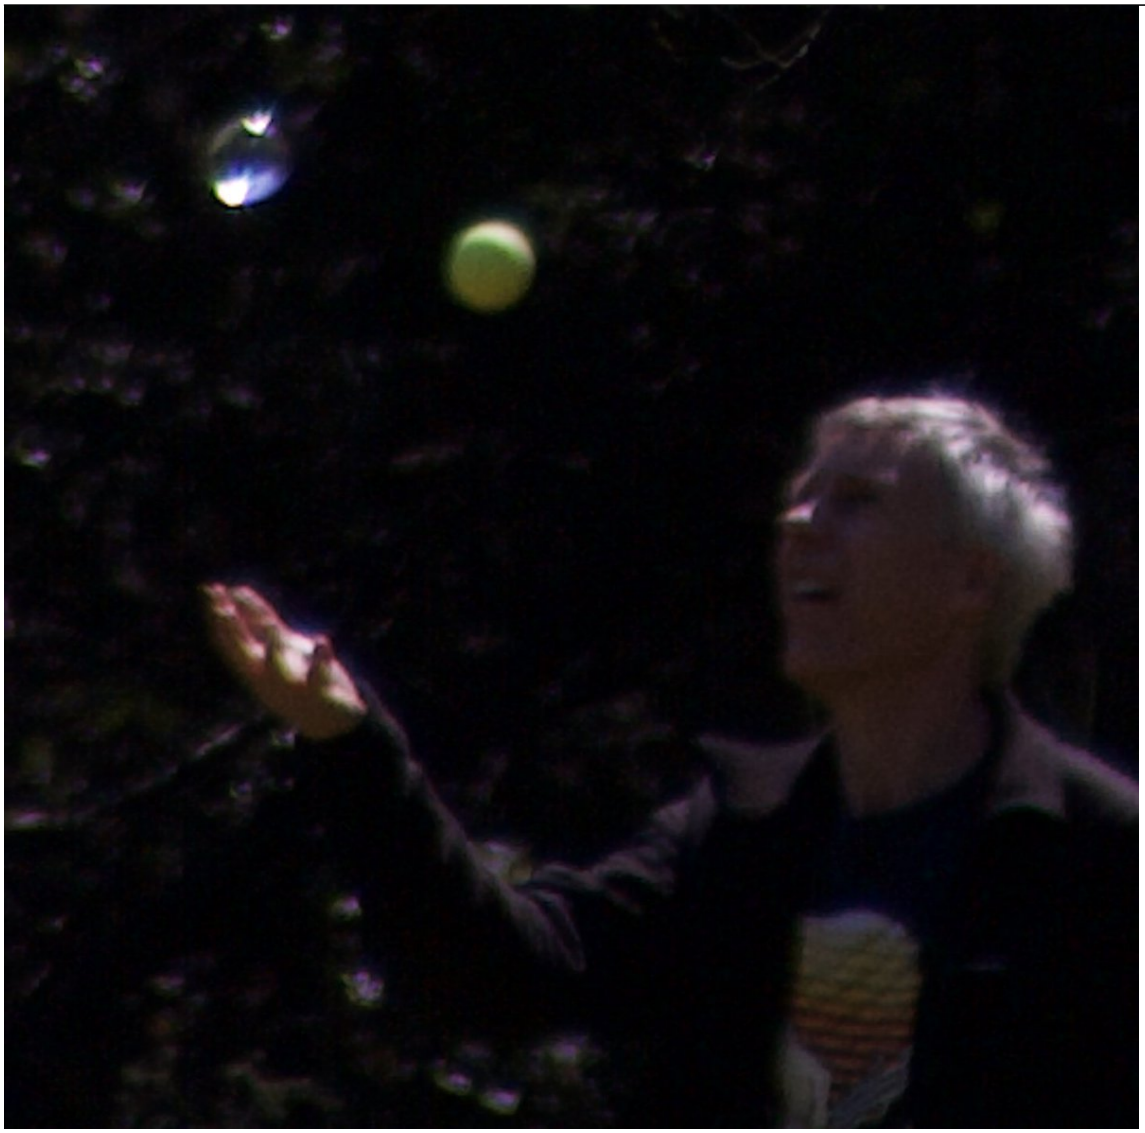
https://twitter.com/_/status/1126176299276324864

@TheOutThere2016 @UFOS_EXPOSED Shiny ball seems closest

http://pbs.twimg.com/media/D6D7MpmU8AA7aSG.jpg



http://pbs.twimg.com/media/D6D7MpmU8AA7aSG.jpg
2019-05-08T17:16:39+00:00
https://twitter.com/_/status/1126174084574793728
@TheOutThere2016 @UFOS_EXPOSED I happen to have a Canon 7D, a 200mm lens, and a sunny ridge. So I went over there and juggled three different balls (transparent, reflective, and solid yellow) with the same settings. http://pbs.twimg.com/media/D6D5L_2U8AAXdFB.jpg



http://pbs.twimg.com/media/D6D5L_2U8AAXdFB.jpg

http://pbs.twimg.com/media/D6D5FAkUcAA4lYP.jpg

http://pbs.twimg.com/media/D6D46qyVUAYBHo_.jpg

2019-05-08T16:56:10+00:00

https://twitter.com/_/status/1126168930005991427

@UFOS_EXPOSED @TheOutThere2016 I'm moving away from "drop of water" in any context here. I think the hikers image shows something that's near or beyond the hikers. Exif on Mufon

says 200mm, F/5, 1/500, Date and Time (original): 2015:10:25 13:17:09, Canon 7D, . A drop of water would be very out of focus.

2019-05-08T15:29:53+00:00

https://twitter.com/_/status/1126147213451640834

@TheOutThere2016 @UFOS_EXPOSED Actually no, I take that back, there's the same drop pattern in two different directions. Still, quite different to these "golden orb" photos.

2019-05-08T15:26:53+00:00

https://twitter.com/_/status/1126146461886861313

@TheOutThere2016 @UFOS_EXPOSED I suspect that water is on the car window, not the lens.

2019-05-08T15:10:21+00:00

https://twitter.com/_/status/1126142297941241856

@UFOS_EXPOSED @TheOutThere2016 I'll try replicating this later. It's really foggy here right now.

2019-05-08T15:09:29+00:00

https://twitter.com/_/status/1126142081611624449

@TheOutThere2016 There are no glassy domes on the Moon.

2019-05-08T14:53:54+00:00

https://twitter.com/_/status/1126138158012178432

@UFOS_EXPOSED @TheOutThere2016 Those look like small reflective spheres. So most likely are drops of water. Certainly not on the lens though. They are more-or-less in focus, so must be some distance away. It's kind of an artifact of the zoom. Drop of rain or something happens to be in the right place

---

2019-05-08T14:50:06+00:00

https://twitter.com/_/status/1126137203783020544

@Reinisceplis It does not LOOK flat.

2019-05-07T20:24:06+00:00

https://twitter.com/_/status/1125858867206705153

@mwbucher The depth of the craters does vary quite a bit. But there are physical limits to how deep a hole (or how high a ridge) you can have on a planet. While it might initially be deeper/higher it would very quickly collapse.

2019-05-07T20:14:07+00:00

https://twitter.com/_/status/1125856354873167872

@KenCaldeira @GhoatInsider It's possible it's a snafu caused by website restructuring. The original paper was linked via a pdf. i.e. you had to open a PDF then click on a link in that PDF. Maybe the odd link structure was difficult to archive.

https://web.archive.org/web/20161227213703/https://netl.doe.gov/publications/proceedings/03/

2019-05-06T22:20:03+00:00

https://twitter.com/_/status/1125525662146502656

Circular craters on the Moon is often cited by flat-earthers as evidence that the standard model of the solar system is wrong.

2019-05-06T22:19:17+00:00

https://twitter.com/_/status/1125525470101983232

The resultant shapes are somewhat complicated on Earth by the atmosphere, as some of the asteroid's mass can vaporize before it hits the ground. The Moon seemingly has neater craters.

2019-05-06T22:12:59+00:00

https://twitter.com/_/status/1125523882549493760

Why are the craters on the moon round, and not oval, if some meteors or asteroids come in at an angle? The reason is that when they hit the surface they vaporize and explode, and the spherical explosion it what makes the circular crater. Illustrated here with Denver.

@blackvaultcom @chasekuertz @EngagingThe Section 3 is to record the forum of open presentation or publication. It's to provide a justification for a public release. It asks for a Date, Place, Event. IN the case of these videos this was N/A as they didn't have plans. So they gave other justification.

2019-05-03T18:12:49+00:00

https://twitter.com/_/status/1124376277312393222
@blackvaultcom @chasekuertz @EngagingThe It does not say "Pursuant to disclaimers," it says "CLEARED For Open Publication". Which is clearly explained in multiple military guides as being "Information may be released to the public without restriction."
https://www.esd.whs.mil/Portals/54/Documents/DOPSR/Docs/DOPSR%20BROCHURE.PDF?ver=2017-07-05-142406-460&timestamp=1499279056278

STREAMLINING THE SECURITY AND POLICY REVIEW PROCESS

The Defense Office of Prepublication and Security Review (DOPSR) conducts a security and policy reviews on all documents that are submitted for official public release in accordance with DoD Directive 5230.09 and the ITAR. The average response times listed below are estimates upon receipt by DOPSR. Response times may vary based upon the document type and content. Additional time may be needed if the material is complex, voluminous, and/or requires review by DoD components or the Interagency.

1. Please allow **10-15 working days** for review of papers, articles, and briefings.

2. Please allow **15-20 working days** for review of technical papers and brochures.

3. Larger documents – books, reports, and manuscripts - may take longer to review - please allow **30-60 working days**.

Note: For additional information on the prepublication review process, please see DoDI 5230.29 at: http://www.dtic.mil/whs/directives/index.html

Please submit documents in a timely manner so that the review can be completed prior to the publication/presentation deadline.

WHAT ELSE DO I NEED TO KNOW ABOUT THE REVIEW?

1. All documents submitted for review must be legible and in font size appropriate for review purposes (no less than 8 pitch).

2. "Other media" (CDROMs, DVDs) should be in a format compatible with DoD approved software (MPEG-3 or MPEG-4) for video or Microsoft Office for documents.

3. Documents already in the public domain will not be reviewed.

4. Proprietary documents cannot be accepted by DOPSR for review.

5. ***Final versions only.*** Draft versions will not be accepted for review.

6. To expedite processing, send documents by fax or email.

7. Please send 3 unbound hard copies of the documents to be reviewed.

8. Requests to receive responses by fax or email should be noted in the "Remarks" section of DD Form 1910 or cover letter.

9. Provide complete contact information, including fax number, email address and date the review response is needed.

RESULTS OF REVIEWS

If no alternate method is indicated, responses will be sent via U.S. Mail or DoD courier.

Cleared - Information may be released to the public without restriction.

Cleared as amended - Amendments are mandatory due to deletions or additions. DoD clearance is contingent upon implementation of amendments. Information may be released without restriction upon incorporation of the amendments provided by DOPSR.

Recommended changes - Identifies non-binding suggested changes to clarify or amplify information in the document.

Not cleared - Information is not cleared and may not be publicly released.

Returned without action – DOPSR is unable to review due to insufficient time, material is already in the public domain or review was cancelled by the requester.

APPEALS

Denials and amendments may be administratively appealed. Any such appeal should offer justification to support reversal of the decision and should be forwarded in writing to DOPSR.

2019-05-03T18:00:39+00:00
https://twitter.com/_/status/1124373215222984704
@blackvaultcom @chasekuertz @EngagingThe Sorry, five possible outcomes. Same thing though. http://pbs.twimg.com/media/D5qTcxzV4AAHZDw.jpg

---

Possible Outcomes

Cleared: Information may be released to the public without restriction.

Cleared as Amended: Amendments are mandatory due to deletions or additions—DoD clearance is contingent upon the implementation of the noted amendments. The information may be released without restriction upon implementation of the amendments.

Recommended Changes: These are non-binding suggested changes to clarify or amplify information in the document.

Not Cleared: The information is not cleared and may not be publicly released.

Returned Without Action: This occurs when the reviewer is unable to review due to insufficient time, the material is already in the public domain, or the review may be cancelled upon request of submitter.

http://pbs.twimg.com/media/D5qTcxzV4AAHZDw.jpg
2019-05-03T17:59:30+00:00
https://twitter.com/_/status/1124372929465049088
@blackvaultcom @chasekuertz @EngagingThe And again, there are three outcomes of a 1910 submission. "Cleared" means "Information may be released to the public without restriction."
https://www.denix.osd.mil/cr/lrmp/home/reports/safeguarding-military-information-legacy-12-516/ http://pbs.twimg.com/media/D5qTBsiUcAA7fW-.jpg

Possible Outcomes

Cleared: Information may be released to the public without restriction.

Cleared as Amended: Amendments are mandatory due to deletions or additions—DoD clearance is contingent upon the implementation of the noted amendments. The information may be released without restriction upon implementation of the amendments.

Recommended Changes: These are non-binding suggested changes to clarify or amplify information in the document.

CLEARANCE REQUEST FOR PUBLIC RELEASE OF DEPARTMENT OF DEFENSE INFORMATION

(See Instructions on back.)

(This form is to be used in requesting review and clearance of DoD information proposed for public release in accordance with DoDD 5230.09.)

TO: *(See Note)* **Chief, Office of Security Review, 1155 Defense Pentagon, Washington, DC 20301-1155**

Note: Regular mail address shown above. For drop-off/next day delivery, use: Room 12047, 1777 North Kent Street, Rosslyn, VA 22209-2133

1. DOCUMENT DESCRIPTION

a. TYPE	b. TITLE "Best Practices for the Architecture, Design, and Modernization of Defense Models and Simulations" (Brief)
Brief	
c. PAGE COUNT	d. SUBJECT AREA
17 Pages	DoD Modeling & Simulation (M&S)

2. AUTHOR/SPEAKER

a. NAME *(Last, First, Middle Initial)*	b. RANK	c. TITLE
Citizen, Jesse J., Jr.	CIV	Director, DMSCO
d. OFFICE Defense Modeling & Simulation Coordination Office (DMSCO)		e. AGENCY USD(AT&L)/ASD(R&E)/SE/DMSCO

3. PRESENTATION/PUBLICATION DATA *(Date, Place, Event)*

Date of event: Oct 23-Oct 26, 2017
Place: Waterford at Springfield, 6715 Commerce Street, Springfield, VA 22150
Event: 20th Systems Engineering (SE) Conference (http://www.ndia.org/events/2017/10/23/20th-systems-engineering-conference)

4. POINT OF CONTACT

a. NAME *(Last, First, Middle Initial)*	b. TELEPHONE NO. *(Include Area Code)*
Mock, Sherrel W or Robinson, David A - Public Affairs Email address: osd.msco.pao@mail.mil	571-372-6787

5. PRIOR COORDINATION

a. NAME *(Last, First, Middle Initial)*	b. OFFICE/AGENCY	c. TELEPHONE NO. *(Include Area Code)*
SLIDES ONLY **NO SCRIPT PROVIDED**	CLEARED For Open Publication Oct 02, 2017 Department of Defense OFFICE OF PREPUBLICATION AND SECURITY REVIEW	

6. REMARKS This brief follows an abstract that supports a continuing effort to share M&S information with M&S practitioners attending the SE conference. DOPSR cleared the abstract on May 15, 2017 (Case #17-S-1721). Most slides have been previously cleared – respective case numbers are annotated. The USD(AT&L), by charter (paras 3 & 3.35 of DoDD 5134.01), is responsible for all matters relating to DoD modeling and simulation. The DMSCO is the OSD office responsible for supporting the USD(AT&L) in the execution of his M&S responsibilities. We believe the information is unclassified and that it is ready for public release. From DMSCO's perspective, this brief does not violate any security concerns.

NOTE: Request scanned .pdf copy of DOPSR-stamped DD Form 1910 be sent to email address in Block 4a, above. If the DOPSR-stamped hard copy is returned, please mail to POC in blocks 4a & 4b above at DMSCO, 4800 Mark Center Drive, Suite 16E08-08, Mailbox 46, Alexandria, VA 22350-3600.

7. RECOMMENDATION OF SUBMITTING OFFICE/AGENCY

a. THE ATTACHED MATERIAL HAS DEPARTMENT/OFFICE/AGENCY APPROVAL FOR PUBLIC RELEASE *(qualifications, if any, are indicated in Remarks section)* AND CLEARANCE FOR OPEN PUBLICATION IS RECOMMENDED UNDER PROVISIONS OF DODD 5230.09. I AM AUTHORIZED TO MAKE THIS RECOMMENDATION FOR RELEASE ON BEHALF OF:

http://pbs.twimg.com/media/D5qQxgWU0AA9Mmq.jpg

2019-05-03T17:45:12+00:00

https://twitter.com/_/status/1124369330605395968

@blackvaultcom @chasekuertz @EngagingThe So in the case of "Thermal Actively Controlled Sludge Treatment", that's only approved for "Posting on the SERDP web site"? Because that's what they say in section 3.

https://apps.dtic.mil/dtic/tr/fulltext/u2/a608403.pdf

2019-05-03T16:33:40+00:00

https://twitter.com/_/status/1124351325980938240

@blackvaultcom @EngagingThe So what do they stamp it with when it's cleared for public release?

2019-05-03T15:55:59+00:00

https://twitter.com/_/status/1124341843456450560

@blackvaultcom @RichNilsenPhd @TTSAcademy I'll go against it. DIAI 5400.300 is clear that "Cleared for open publication" means without restriction. That's why it's a form for PUBLIC release. Ask her for the governing documents regarding her interpretation.

2019-05-03T14:33:17+00:00

https://twitter.com/_/status/1124321030288183296

@blackvaultcom @RichNilsenPhd @TTSAcademy "Cleared for Open Publication" means "The information may be released without restriction"

https://www.dia.mil/FOIA/FOIA-Electronic-Reading-Room/FileId/39658/

http://pbs.twimg.com/media/D5pjyv-U0AAgJ-p.jpg

6.2.8. After all review of the material is completed, [redacted] notifies the submitter of the results of the review as follows:

- *Cleared for Open Publication*. The information may be released without restriction by the originating component. A disclaimer may be required to accompany the information. Additionally, "recommended" changes may be suggested. These changes are not binding on the author.

- *Cleared "as amended" for open publication*. Amendments are binding on the submitter. Amendments may be deletion of certain material or alternative wording of phrases and sentences.

- *Not cleared*. The information submitted for review may not be released.

http://pbs.twimg.com/media/D5pjyv-U0AAgJ-p.jpg

2019-05-03T14:22:14+00:00

https://twitter.com/_/status/1124318250760671238

@blackvaultcom @RichNilsenPhd @TTSAcademy The instructions for section 3 are "Record the forum of open presentation or publication"

This is a form to request public release. It grants public release.

http://pbs.twimg.com/media/D5phAzWUcAATwrk.jpg

---

3. PRESENTATION/PUBLICATION DATA. Record the forum of open presentation or publication.

http://pbs.twimg.com/media/D5phAzWUcAATwrk.jpg

2019-05-03T14:18:20+00:00

https://twitter.com/_/status/1124317267359965184

@blackvaultcom @RichNilsenPhd @TTSAcademy But section 7a says "qualifications, if any, are

indicated in Remarks section", which is section 6, not section 3.
Sections 3 appears to request a (Date, Place, Event), not limits on public release.

2019-05-03T14:13:29+00:00
https://twitter.com/_/status/1124316048457490438
@blackvaultcom @RichNilsenPhd @TTSAcademy I've looked at several of those forms. I agree that section 7 is filled out as part of the request. Yet it's still a broader request than section 3. The important outcome seems to be that it's stamped "CLEARED For Open Publication," without qualifications.

2019-05-03T14:03:11+00:00
https://twitter.com/_/status/1124313456063025152
@blackvaultcom @RichNilsenPhd @TTSAcademy My point here is that Gough's email is only referring to what was requested ("per block 3".) However I don't see anything that suggests that section 3 overrides section 7. Instead, there's specific provision for 7 to override 3 (via 6 - Remarks).

2019-05-03T13:24:11+00:00
https://twitter.com/_/status/1124303642759012353
@RichNilsenPhd @blackvaultcom @TTSAcademy The form appears to contain two parts, the request and the response. The request is what they asked for. The response is what they got. Gough's 5/2/19 email refers only to the request. Section 6 and 7 seems very clear in approving if for open public release with no qualifications
http://pbs.twimg.com/media/D5pUE5kU0AA1XE7.jpg

GS
Thu 5/2/2019 3:14 PM
Gough, Susan L (Sue) CIV OSD PA (USA) < @mail.mil>
RE: [Non-DoD Source] RE: Media Question about DD Forms 1910 (One additional question)
To john@greenewald.com

Hi, John,

You may attribute the following to me as a Pentagon spokesperson:

"I can confirm that the form DD1910 you asked about is a valid DD1910. The standard procedure is for blocks 1-7 on the form to be filled out by the submitter before sending to DOPSR; however, occasional exceptions have occurred.

The submitter is responsible for any disclaimers on the form as approved, and also abiding by any amendments that may be included in additional communications from DOPSR to the submitter as part of the approval process.

Per block 3 of this form DD1910, the submitter requested release of the videos solely for research and analysis purposes by U.S. government agencies and industry partners, and not for general public release."

http://pbs.twimg.com/media/D5pTVChVUAAFugx.jpg
2019-05-03T05:38:58+00:00
https://twitter.com/_/status/1124186564911742976
@blackvaultcom @TTSAcademy You seem to be conflating the request with what was granted.

They only requested research privileges. They were granted clearance for open publication.

@BelieversBeware The video is about Lindsey Graham saying that a president's refusal to comply with congressional oversight was an impeachable offense. Kristol agreeing with Graham does not make Graham wrong.

2019-04-27T17:52:29+00:00
https://twitter.com/_/status/1122196835236376576

@david_m_miller Because it's a relatively cheap camera with a very powerful zoom. It allows you to focus on distant objects that are partially hidden by the horizon. They tend to greatly misinterpret or misunderstand what they are seeing though. Kind of like this. https://blogs.scientificamerican.com/rosetta-stones/wallace-8217-s-woeful-wager-how-a-founder-of-modern-biology-got-suckered-by-flat-earthers/

2019-04-27T17:44:44+00:00

https://twitter.com/_/status/1122194885744836608

RT @BillKristol: Lindsey Graham explains that a president stonewalling Congressional oversight is an impeachable offense. https://t.co/tv88â□¦

2019-04-27T07:23:57+00:00

https://twitter.com/_/status/1122038660105326592

The International Space Station flying in front of the sun, recorded with a $1,000 camera that's very popular with the Flat Earth folk. https://twitter.com/MovieVertigo/status/1121843534972293123

2019-04-26T23:59:08+00:00

https://twitter.com/_/status/1121926717742784512

An illustration of the demarcation line: the best debunking of "no 757 hit the Pentagon on 9/11" is done by hard-core believers in the controlled demolition conspiracy theory of the World Trade Center collapses. Even organizing a debunking conference! http://www.scientistsfor911truth.com/

2019-04-26T23:48:44+00:00

https://twitter.com/_/status/1121924098290929664

In a great example of the demarcation line in unusual beliefs, the best debunking of a Bibilical exegetical basis for Flat Earth can be found in the Young Earth Creationist site "Answers in Genesis". Jesus rode dinosaurs, but flat Earth is over the line. https://answersingenesis.org/astronomy/earth/does-bible-teach-earth-flat/

2019-04-26T22:23:11+00:00

https://twitter.com/_/status/1121902569268236288

@BryanDBender But the statement does NOT cite "highly advanced aircraft intruding on Navy strike groups." That appears to be something you added from a different source?

2019-04-26T21:32:24+00:00

https://twitter.com/_/status/1121889789442056192

@BryanDBender Sure, but what prompted it? You say the Navy said it was "in response to a series of sightings of unknown, highly advanced aircraft intruding on Navy strike groups" But that's not what their statement says. So who said that?

2019-04-26T21:02:18+00:00

https://twitter.com/_/status/1121882215070097408

@BryanDBender When you say "the Navy said in a statement in response to questions from POLITICO" - can you say what these questions were, and what prompted them? Seems very specific.

2019-04-26T19:23:56+00:00

https://twitter.com/_/status/1121466025889808384

@stang289 It's not an optical viewfinder in the sense of looking through the lens. It's an electronic viewfinder. But that's ideal for not going blind when you 83x the sun.
Works great for us old types though, as it has adjustable diopter. I find it hard to focus on the back screen.

2019-04-25T16:45:20+00:00

https://twitter.com/_/status/1121455161019224064

@stang289 Yes it's a P900, I modified it to full spectrum and it's got a 760nm filter. It's a good camera, but the 83x zoom is really the only outstanding feature. So it depends on what you want (great for contrails :)). It's also a little dated with only 1080p video.

2019-04-25T16:09:13+00:00

https://twitter.com/_/status/1121446072813928448

Here's a closer view. Notice the red light only just touches the paragraph, but the infrared light covers four lines. http://pbs.twimg.com/media/D5As99DUwAAcfYx.jpg

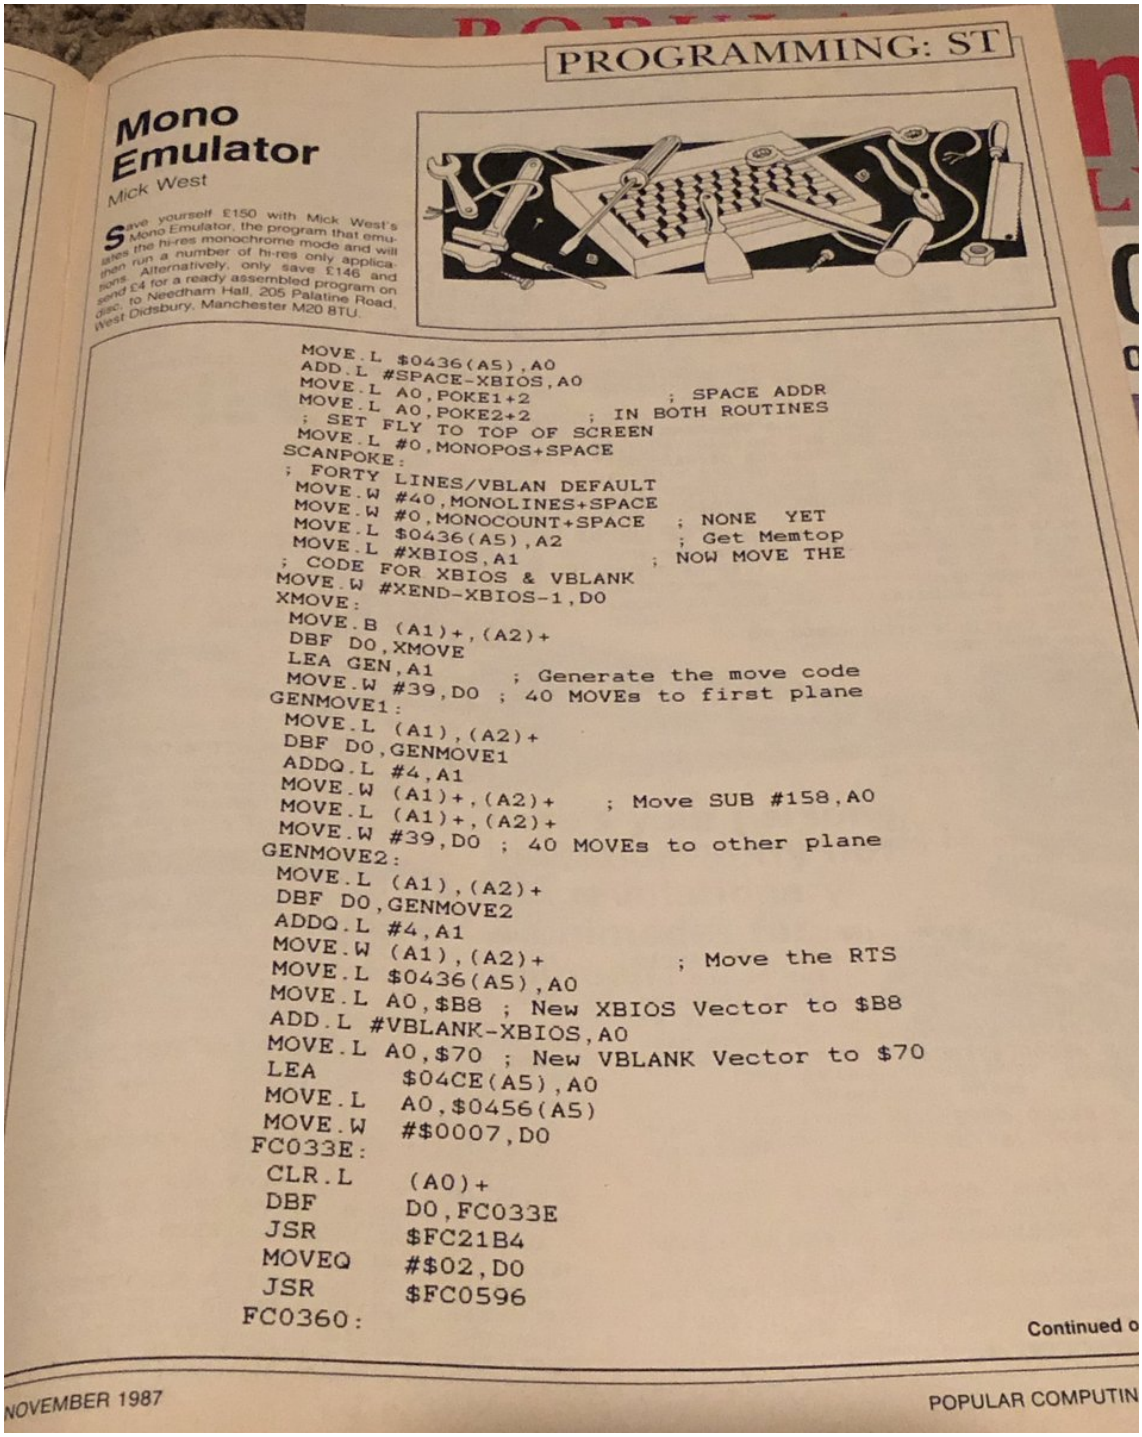
Back in 1987, I used to distribute programs I'd written by sending each one to a magazine, who would then print it out, a few weeks later people would buy the magazine, type it in, assemble it, and (hopefully) make a useable program. A kind of paper internet.

http://pbs.twimg.com/media/D4k3sE0UUAAW7rF.jpg



PROGRAMMING: ST

Mono Emulator

Mick West

Save yourself £150 with Mick West's Mono Emulator, the program that emulates the hi-res monochrome mode and will then run a number of hi-res only applications. Alternatively, only save £146 and send £4 for a ready assembled program on disc, to Needham Hall, 205 Palatine Road, West Didsbury, Manchester M20 8TU.

RAM

★☆☆☆☆ **Corrupt to the core of its very intention. Disingenuous. A complete fraud.**
April 8, 2019
Format: Kindle Edition

If you really want to understand why so many people venture into the rabbit hole and never come back, it's because they find something very rare buried there, something people like Mick West are desperately trying to hide. It's called the TRUTH. No, not just the truth about conspiracies like 9/11, but the truth about the utter evil and depravity of many who control our government and how easily they will murder American citizens without a second thought to promote their agenda.

It's clear to me that Mick West is a paid disinformation agent, and this book is a ridiculously transparent work of deception intended to further discredit those who are wide awake to the truths he wishes to hide.

Don't waste your money on books written by deceivers. The truth is free: 9-11WasTreason.org

2019-04-09T19:25:13+00:00
https://twitter.com/_/status/1115697191564144640
@brax_whit @ColinWigle Sure, you go spend tens of millions of dollars just for a meaningless record. We've been to to the Moon. Slightly higher orbits are a bit uninspiring by comparison. Apollo 11's record was all about the Moon. Read:

https://motherboard.vice.com/en_us/article/4xxbbg/the-gemini-that-almost-went-to-the-moon

---

2019-04-09T19:14:31+00:00

https://twitter.com/_/status/1115694497285861376

@ColinWigle @brax_whit Again, you either go into orbit, or you go to the Moon or Mars. There's practically zero point in putting people into medium or high earth orbit. It's not something anyone is pushing for because there's no net benefit.

2019-04-09T18:45:05+00:00

https://twitter.com/_/status/1115687092321902593

@brax_whit There's no point sending people beyond earth orbit unless they are going to the Moon. Because you NEED the Moon so you can orbit it to get back. There''s also nothing of interest between here and the moon. So orbit and Moon are your options.

2019-04-09T16:59:17+00:00

https://twitter.com/_/status/1115660467114897408

@brax_whit There's plenty of evidence. Just Google your question, and read the results. There's many articles. I'm not going to write a new one on Twitter.

2019-04-09T16:50:58+00:00

https://twitter.com/_/status/1115658372068413441

@brax_whit The live TV broadcasts. Impossible to fake with the technology back then. The whole world watching.

2019-04-09T16:49:49+00:00

https://twitter.com/_/status/1115658083076718592

@brax_whit No, this is actually really really tangible, it's also way easier than sticking a person in a vacuum chamber (which has nothing to do with the shape of the Earth) You've just got to think out why you actually see a curve of the horizon.

2019-04-09T16:30:12+00:00

https://twitter.com/_/status/1115653147081330688

@brax_whit @behindthecurve_ The middle guy in yellow here sees a curve at the edge of the rink. i.e. if he takes a photo, the curve will be measurable. If the rink was 100 miles wide then no curve would be measurable in photos taken from that position.
So the world is tiny, or a globe, and it's not tiny.
http://pbs.twimg.com/media/D3uYB6fUwAAZlhU.jpg

http://pbs.twimg.com/media/D3uYB6fUwAAZlhU.jpg
2019-04-09T16:26:31+00:00
https://twitter.com/_/status/1115652217040658432
@brax_whit Eventually. Expansion into the solar system is inevitable.

2019-04-09T16:24:07+00:00
https://twitter.com/_/status/1115651616168767488
@convair990BHX @AirFranceUK That's probably the APU. A small jet engine in the tail cone used for auxiliary power.

2019-04-09T16:20:01+00:00
https://twitter.com/_/status/1115650583472422912
@brax_whit @behindthecurve_ No, the horizon being:

A) A circle
B) Just 30 miles away from 500 feet
C) Visibly curved
D) Below eye level
E) in a world where things are often hundreds, even thousand of miles apart.

Proves it's a globe

2019-04-09T16:10:09+00:00
https://twitter.com/_/status/1115648099521683456
@brax_whit @behindthecurve_ The curve seen by Rory is the curve you see looking down at a 30 mile radius circle from 1000 feet above that circle (500 feet above sea level and about 500 feet drop).
It is UTTERLY UNLIKE anything you'd get on flat earth, unless the planet is s a 29 mile radius disk.

2019-04-09T16:02:23+00:00
https://twitter.com/_/status/1115646144074223617
@wisecrackalec @wisecrack Thank you! It really is a great video, and I think it will be quite helpful in prompting some critical thought in people who are not entirely stuck down the Flat

Earth rabbit hole.

Of course you've got to get them to watch it - but some of them will.

2019-04-09T15:52:30+00:00

https://twitter.com/_/status/1115643657674059778

I highly recommend this episode of @Wisecrack on how REAL science works, and why some people reject it. All set in the context of Flat Earth. Written by @wisecrackalec, it's insightful and very well communicated.

https://www.youtube.com/watch?v=umo6pMCkcXs

2019-04-09T14:45:15+00:00

https://twitter.com/_/status/1115626733229580289

@brax_whit @behindthecurve_ Why? On a plane the horizon appears flat and really hazy. Itâ□□s the same as an incredibly large globe.

2019-04-09T04:23:11+00:00

https://twitter.com/_/status/1115470185064828930

Shooting a laser across a lake close of the water is a popular way of demonstrating the curvature of the Earth (or non-curvature, if you think it's flat).

The problem is, it doesn't work.

2019-04-08T20:40:06+00:00
https://twitter.com/_/status/1115353647959777280
@TTSA_Agent_001 @__dregs__ Where did you hear that?

They probably meant weight, or something like "effective mass" But it's a pretty meaningless claim without details. I can reduce the weight of a piece of aluminum foil by blowing on it.

2019-04-08T20:31:27+00:00
https://twitter.com/_/status/1115351469148872704
@__dregs__ $20 is plenty. It reduces the incentive to argue semantics to wiggle out of it. Yet it's still a money bet, which nobody likes to lose. I'll do $100, but we have to mutually agree on the outcome.

2019-04-08T20:29:29+00:00
https://twitter.com/_/status/1115350974422441985
@brax_whit @behindthecurve_ There's no such thing as the "circular limits of vision" The curve of the horizon is the result of looking at the flat circle of the horizon from above. It would only happen on a globe.

2019-04-08T20:28:34+00:00
https://twitter.com/_/status/1115350746604625926
@brax_whit @behindthecurve_ What does he think will happen?

2019-04-08T18:48:53+00:00
https://twitter.com/_/status/1115325657091694592
@__dregs__ With the bet being that within three years, TTSA will demonstrate a material that is "revolutionary to our understanding of physics" and demonstrates that some kind of thrust-less high altitude flying craft is possible. I'm betting that does not happen.

2019-04-08T18:45:24+00:00
https://twitter.com/_/status/1115324783749550080

@__dregs__ How about $20, even money, and you get to decide.

2019-04-08T18:43:53+00:00

https://twitter.com/_/status/1115324402378235909

@__dregs__ What if we disagree? Like let's say TTSA announce that they have a material with an odd isotope mix, in layers, and that they demonstrate it on a scale getting 0.1g lighter when being next to a large humming machine. They claim this demonstrates anti-gravity. Like that?

2019-04-08T17:58:47+00:00

https://twitter.com/_/status/1115313052742590464

@__dregs__ So who gets to judge if it is "revolutionary to our understanding of physics?"

2019-04-08T17:23:54+00:00

https://twitter.com/_/status/1115304272026001408

@__dregs__ Revolutionary to what degree? Like how drones have revolutionized home videos? How Fortnite has revolutionized gaming? How mobile phones cameras have revolutionized UFOology.

How about a simple demo, like a thrust-less craft hovering 100 feet above the ground for 30 seconds.

2019-04-08T17:18:15+00:00

https://twitter.com/_/status/1115302852044308482

@TTSA_Agent_001 @TTSAcademy @tomdelonge I'd put money on "no," but I'd need some of those terms defined. Like "rules"

2019-04-08T14:31:46+00:00
https://twitter.com/_/status/1115260951798771712
@mikesara444 To debunk what, exactly?

2019-04-08T05:50:59+00:00
https://twitter.com/_/status/1115129893925167104
@Ghostmaster75 @TTSA_Agent_001 @diz_whit @Deepneuron @theyre_heeeere @JuenoMT @QuestForZen @HISTORY You could obviously attempt to use it attempt to assign some statistical probability to unidentified sightings being alien visitors. Seems like a fools game though. WAY too many assumptions to have any use.

2019-04-08T05:49:20+00:00
https://twitter.com/_/status/1115129479959998464
@__dregs__ How was it described?

2019-04-08T05:47:47+00:00
https://twitter.com/_/status/1115129090783055872
@Ghostmaster75 @TTSA_Agent_001 @diz_whit @Deepneuron @theyre_heeeere @JuenoMT @QuestForZen @HISTORY I don't know. The statistical Drake equation isn't really a hugely useful advance on the regular Drake equation. And Maccone presented his paper in 2008, so it's not really clear what its inclusion in the list means.

2019-04-08T05:04:46+00:00
https://twitter.com/_/status/1115118264839888896
@Cindea6 @ppalotay @OpChemtrails What if there were simply two different types of contrail?

2019-04-08T04:16:22+00:00
https://twitter.com/_/status/1115106081275912194
@TTSA_Agent_001 @Ghostmaster75 @diz_whit @Deepneuron @theyre_heeeere @JuenoMT

@QuestForZen @HISTORY Although the paper listed there is actually Maccone's "Statistical Drake Equation", a way of formulating the Drake equation using statistical distributions, which gives a slightly higher density of life in the Galaxy.

2019-04-08T03:40:05+00:00

https://twitter.com/_/status/1115096950271905792

@TTSA_Agent_001 @Ghostmaster75 @diz_whit @Deepneuron @theyre_heeeere @JuenoMT @QuestForZen @HISTORY You mean this? https://fas.org/irp/dia/aatip-list.pdf

The Drake equation would give you a ballpark guesstimate for the prevalence of radio-communicating life in the Galaxy. You could use to in determining how seriously one would take a visiting-aliens hypothesis of any nature.

2019-04-08T00:52:10+00:00

https://twitter.com/_/status/1115054693695123456

@Ghostmaster75 @TTSA_Agent_001 @diz_whit @Deepneuron @theyre_heeeere @JuenoMT @QuestForZen @HISTORY Why not?

2019-04-08T00:50:17+00:00

https://twitter.com/_/status/1115054222108573696

@__dregs__ What do you mean by "comes through"? I'm always happy to take a well-defined bet.

2019-04-07T21:14:37+00:00

https://twitter.com/_/status/1114999947059814402

@TTSA_Agent_001 @diz_whit @Deepneuron @theyre_heeeere @JuenoMT @QuestForZen @HISTORY They don't. And there's no good evidence that such a thing happened. And there's plenty of evidence it dit NOT happen (no atmospheric disturbance).

2019-04-07T21:10:21+00:00

https://twitter.com/_/status/1114998874119131136

@TTSA_Agent_001 @diz_whit @Deepneuron @theyre_heeeere @JuenoMT @QuestForZen @HISTORY But you seem to be suggesting that YOU know what it is they are spending money on. Maybe it's spending money on identifying novel aerial threats from Russia, China, terrorists, etc.

How do you know?

2019-04-07T21:08:45+00:00

https://twitter.com/_/status/1114998467745574912

@TTSA_Agent_001 @diz_whit @Deepneuron @theyre_heeeere @JuenoMT @QuestForZen @HISTORY How do you know what is soon to be disclosed?
And I'm unsure what your point is. The Pentagon spends money on tracking airborne objects regardless of what they are. If some are unidentified, it seems reasonable they might spend some money on figuring out what they are.

2019-04-07T21:04:48+00:00

https://twitter.com/_/status/1114997475599880192
@TTSA_Agent_001 @diz_whit @Deepneuron @theyre_heeeere @JuenoMT @QuestForZen @HISTORY I bet you $100 it will not.

2019-04-07T20:52:46+00:00
https://twitter.com/_/status/1114994445470986240
@diz_whit @Deepneuron @theyre_heeeere @JuenoMT @QuestForZen @TTSA_Agent_001 @HISTORY Yes, I've read about Skinwalker ranch. It's a bunch of nonsense.

2019-04-07T18:04:24+00:00
https://twitter.com/_/status/1114952076981702656
It's often thought that you need to be really high to detect the curve of the horizon, like 60,000 feet or more. But in fact it's relatively easy to see it from just 500 feet above sea level (if the weather cooperates). Hence proving the Earth is a globe. https://youtu.be/tOCodgq1oM8

2019-04-07T17:02:08+00:00
https://twitter.com/_/status/1114936408571932672
@Deepneuron @theyre_heeeere @JuenoMT @QuestForZen @TTSA_Agent_001 @HISTORY Which is actually a quote from Poltergeist. About ghosts. Not aliens.
https://youtu.be/P6Htti3EJ5g

2019-04-07T16:55:54+00:00
https://twitter.com/_/status/1114934836983021568
@theyre_heeeere @Deepneuron @JuenoMT @QuestForZen @TTSA_Agent_001 @HISTORY I donâ□□t know why youâ□□d think anyone thinks aliens are inconceivable when all they are doing is point out that aliens being HERE is not backed by good evidence.

2019-04-07T01:33:55+00:00
https://twitter.com/_/status/1114702813651587072
@mikesara444 You had that back then too. See this 1921 article. One contrail had a background of cirrus clouds.
And of course it was sometimes totally cloudy back then.
http://pbs.twimg.com/media/D3g4IyoUwAAsm_1.jpg

Cloud Formation by Supercharged Plane

An altitude flight was made in the morning at McCook Field, recently, by Lieut. J. A. Macready in a LePere with supercharged Liberty. When the airplane reached a height of 26–27,000 feet at 11.50 a. m., a long feathery white streamer was observed forming behind a rapidly moving dark speck. The cloud was of the cirrus variety, well defined at its edges and apparently ten to fifteen times the width of the plane. The sky behind the first portion was clear blue with no other clouds in the near neighborhood. The first streamer seemed perhaps two miles long. Then a gap of one-quarter mile. The second streamer formed with a background of light cirrus cloud and after two or three miles the plane seemed to go into the cirrus background for the streamer formation ceased while an apparent path of blue continued beyond for a way in the cirrus cloud. The whole streamer may have been three miles long. After twenty minutes the streamer had drifted and spread until it merged indistinguishably with the other cirrus clouds visible. The weather conditions at the time were generally very clear, warm, with perhaps 0.1 of the sky in cirrus clouds.

The observer reported as having observed nothing unusual; occasionally the motor would give a burst of black exhaust gas. The pilot thought he remembered having passed through a stratum that felt damp. Clouds at this altitude are necessarily ice crystals, or needles, and it is difficult to determine the cause of the cloud formation under consideration. Possible contributing causes are: Water in exhaust; dust and carbon particles in exhaust serving as cloud nuclei; convective currents due to disturbance caused by passage of plane. Conditions of humidity were undoubtedly ideal for the formation of cloud at that altitude.

http://pbs.twimg.com/media/D3g4IyoUwAAsm_1.jpg

2019-04-06T23:12:11+00:00

https://twitter.com/_/status/1114667145323925506

@theyre_heeeere @JuenoMT @Deepneuron @QuestForZen @TTSA_Agent_001 @HISTORY That seems the most likely explanation.

2019-04-06T21:26:44+00:00

https://twitter.com/_/status/1114640607559839744

@Patryan Natural selection. Anyone that's capable of doing something silly like that would probably already have done it, so what we have left are people who are all talk.

2019-04-06T21:25:01+00:00

https://twitter.com/_/status/1114640175177453569

@JuenoMT @theyre_heeeere @Deepneuron @QuestForZen @TTSA_Agent_001 @HISTORY Really? I should hold back on pointing out things that are factually wrong?

Why?

2019-04-06T21:24:12+00:00

https://twitter.com/_/status/1114639968612151297

@JuenoMT @Deepneuron @QuestForZen @TTSA_Agent_001 @HISTORY No. I'm saying that TTSA said that Go Fast was close to the water, and that they were wrong.

2019-04-06T18:57:34+00:00

https://twitter.com/_/status/1114603067381387264

@theyre_heeeere @Deepneuron @QuestForZen @JuenoMT @TTSA_Agent_001 @HISTORY I don't really see the relevance of ball lightning here.

2019-04-06T18:50:15+00:00

https://twitter.com/_/status/1114601226589499392

@Deepneuron @QuestForZen @JuenoMT @TTSA_Agent_001 @HISTORY No I mean I can use

trigonometry to figure out the altitude of the Go Fast object. But TTSA apparently could not.

2019-04-06T18:49:11+00:00

https://twitter.com/_/status/1114600957839437824

Contrails are just over 100 years old. In 1919, Scientific American published a letter on the subject of "Clouds Formed by Planes", based on observations from the WWI battlefields of the Argonne. It described "a plane writing in white upon the blue slate of the sky"

http://pbs.twimg.com/media/D3fbBRKUYAALLxs.jpg

Correspondence

Clouds Formed by Airplanes

To the Editor of the SCIENTIFIC AMERICAN:

In a recent letter from my brother, Capt. Ward S. Wells, M.C., 60th Infantry, 5th Division, A. E. F., he mentions the observance of rather strange and wonderful phenomena which I think worth passing on to you. They strike me as being quite unusual and perhaps worthy of record, so I am sending the following quotation from his letter.

"The first part of October last we spent several days in the Bois de Hess waiting to take over a part of the front line in the Argonne. The shell holes from the first great Verdun battle were so thick that there were no patches of ground large enough to accommodate even a pup tent and from any of the war pictures you can imagine what was left of the trees.

"There were two or three days of rain, when came a wonderfully clear and beautiful morning, with not a cloud in sight. At the time, some miles ahead, there was going on an especially terrific bombardment.

"Our attention was first drawn to the sky by the sudden appearance of several strange and startling clouds—long graceful, looping ribbons of white. These were tapering to a point at one end and at the other where they dissolved into nothingness 60 degrees across the sky, were about as broad as the width of a finger held arm's distance from the eye. On close observation we noticed some distance ahead of each cloud point the tiny speck of a chasse plane. Apparently the churning of the air was all that was needed to upset the delicately balanced meteorological conditions and precipitate this strange cloud formation. Before, I had seen ships leave their tracks in the clouds, similar to those of little sea animals in the wet sands at the shore, but never before had I seen a plane writing in white upon the blue slate of the sky.

"But that is not all that I have to tell you. From 9 until 12 that day it was our uncanny privilege to *see* sound waves. Great rings were continualy floating upward and across the sky from the north. It made you dizzy watching these arcs at times for they were very numerous, their centers were at different points along the northern horizon and of course their radii were of varying lengths. As they would meet and merge one would almost expect to see these big rings flatten out when they bumped into each other. They were absolutely definite affairs and were discernible by being darker than the rest of the sky. When they crossed one of the above described clouds there was apparently a refraction of light although this may have been an optical illusion. It was exactly like passing a piece of crooked window glass over the cloud.

"You may skeptically smile when you read this letter, but I assure you that we were all in our right minds at the time and I have not had enough New Year's egg-nog today to develop a creative imagination."

EVERETT D. WELL

Nashua, Iowa.

entrances of our harbors and get to sea at all. And in less stormy weather when they do get out are too small to tow in the vessel in distress, and also too small to take off but a very limited number of the passengers or crew.

In case it becomes necessary to go some distance from their station, the slow speed of these boats makes them very tardy in arriving at their destination.

On signing the Peace Treaty our Government will find itself with a great many 110-foot sub-chasers on its hands. These boats have been described as well built, fast and seaworthy. Why could they not be worked over somewhat, under the supervision of a competent naval architect and make excellent coast guard boats?

With decks fore and aft raised and heavily crowned, steel water-tight bulkheads, steel deck house and pilot house, large ventilating stack, to insure good ventilation when everything is battened down and a pair of heavy towing bits, these boats should be able to go anywhere, regardless of weather conditions and do real work in saving lives and property.

In putting these boats into this service the Government might receive the benefit many times of the expenditure of their cost, even at war-time prices.

Of this much I am positive; that we need just such a boat here at the entrance of Coos Bay, and I wish the picture on the front of your issue of the SCIENTIFIC AMERICAN of January 25th, 1919, showing one of these boats taking off wounded soldiers from the stranded "Northern Pacific" could be placed on the desk of every official of the Coast Guard Service at Washington.

It might cause them to awake to the fact that standard equipment of 50 years ago, even with a gasoline engine added is not sufficient for present necessities.

CLARENCE A. PENNOCK.

Marshfield, Ore.

An Absurd Figure

To the Editor of the SCIENTIFIC AMERICAN:

In your issue December 7th, 1918, I note an article entitled "The Saving Grace of War," dealing particularly with by-products of manufacturing industries. On the article, as a whole, I want to congratulate you, and hope it will be followed by other articles of similar tenor. In the distilling business what might be termed "by-products"—that is, the feed recovered, is now becoming the principal product, and I have no doubt same will apply to other lines of manufacture.

In the article above alluded to on page 464, you say:

"One company is distilling from this waste of the vats 500,000 gallons a day of alcohol, which is identical with that obtained from the best grain and which bears no resemblance to the ill-smelling wood spirits. This product releases cereals for food and provides a valuable fuel for the arts of peace and war. This cooking liquor can also be condensed to the consistency of molasses. The light brown compound which results is much in request by the foundries, which just now are overwhelmed by Government contracts. They are paying from 13 to 15 cents a gallon for it to mix with the sand of their molds. Its adhesive qualities insure the firmness of the impression and lower the percentage of defective castings. As a binder in core making it is unexcelled."

The quantity stated, namely, 500,000 gallons (presumably daily) must be a mistake on the part of your contributor, as there was not that much ethyl alcohol

@Deepneuron @QuestForZen @JuenoMT @TTSA_Agent_001 @HISTORY I'm an expert at sines, cosines, and tangents, and arithmetic. It often does not take very much to demonstrate errors in analysis. For example, you don't need quantum physics to show the "Go Fast" object is at 13,000 feet, and not near the ocean surface as was originally claimed.

2019-04-06T18:38:35+00:00

https://twitter.com/_/status/1114598289553350656

@theyre_heeeere @gav_gavnewman @TTSA_Agent_001 @HISTORY It's not actually rotating though. That's an artifact of the camera, IR glare and gimbals + derotation.

@Quality_Qontrol Have you noticed that sometimes clouds are different colors? Contrails are a type of cloud, so they too can be different colors depending on how dense they are, the type of ice crystals formed, how the sun hits them, and what's in the air in front of them and behind them.

2019-04-04T05:35:42+00:00

https://twitter.com/_/status/1113676495577210880

@JRockTigers Basically around under <40Â°, and >66-70% Relative Humidity (100% RH with respect to ice). Air in those conditions is known as an ice supersaturated region. I discussed a similar outbreak in depth here:
http://contrailscience.com/contrail-grids-are-not-chemtrail-grids/

2019-04-04T03:26:22+00:00
https://twitter.com/_/status/1113643946838650880
@JRockTigers Looks like a combination of contrails and cirrus clouds. Often contrails will develop into cirrus. That region is prone to occasional contrail outbreaks like that. It depends on the weather.

TRAIL OF ICE — Emitting a vapor trail is this Convair NB-36H bomber show in a test flight. The vapor trail is actually tiny pieces of ice formed in the cold air at high altitudes. (Unifax Photo)

★ ★ ★

Fluffy, White Vapor Trails Caused By Tiny Ice Crystals

By DONN GAYNOR

Long, fluffy white vapor trails, billowing out behind high-flying aircraft have long fascinated those who observe the phenomenon.

A popular question is: what causes these trails.

Most people have come to believe that vapor trails are caused only by jet aircraft. However, any airplane can cause these trails, but few aircraft that are not jet-propelled can reach the altitudes at which the trails occur.

Referred to by the weather bureau as condensation trails, or "contrails" for short, the phenomenon is caused by moisture in aircraft exhaust gasses condensing on contact with cold outside air.

There is considerable moisture in exhaust gas which at lower altitudes merely evaporates into the air, leaving no trace. At higher altitudes, in the cool thin air the water condenses, immediately freezes into ice crystals and becomes in fact a cirrus cloud.

★

Within the past few years, the weather bureau has begun to report the trails as actual cloud layers when there are sufficient trails to cover a portion of the sky.

Normally water will not condense and freeze below 20,000 feet. Since jets are the only planes that ordinarily fly at 20,000 feet or above, they are responsible for the greater part of contrails. Propeller-driven planes will leave trails at lower altitudes in the winter, when the lower regions are naturally extremely cold.

Such lower altitude trails are short-lived however, and evaporate quickly. Sometimes, when the air is saturated with moisture, the cooling effect of a whirling propeller can change the moisture from a gas to a liquid and cause a halo of fog at the propeller tip. This phenomnen is seldom seen as the moisture content and temperature must be just right.

During World War II, vapor trails were a common sight over the European battle areas. The B-17 and B-24 bombers and their fighter escorts were among the first to reach extremely high altitudes and to leave trails.

★

The long clouds extending behind our present day bombers would prove quite a menace in the event of war. Enemy interceptors and anti-aircraft gunners would have an easy time tracking jets on daylight flights. The Air Force has been working for a number of years, seeking a way to eliminate the give-away vapor trails.

It's a thrill for many to watch as a gleaming shaft of white cloud appears to come from nowhere and work it's way across the sky.

Vapor Trails Bane To Pilots, Former News-Post Photog Says

Vapor trails similar to the one which a high-flying airplane left over this city early in February are a bane to pilots since they are a "dead give-away for fighter aircraft and anti-aircraft gunners," Tech. Sergt. Robert L. Yinger, former News - Post photographer, writes from Muroc, Calif., where he is stationed with the 536th Bomber Squadron.

Sergt. Yinger said he read with interest the account of the long vapor trails left by the unidentified aircraft which passed over this city and which were viewed by many residents. The trails have appeared as a narrow ribbon of dense white smoke unwinding from the plane until it disappeared below the horizon.

He said the vapor trails are termed "contrail," a contraction for condensation trail, and "are not so much a rarity here in the west, possibly due to the dryness of the atmosphere."

"It is quite common to see several large trails every day, produced by high altitude bombers. The maneuvering of the aircraft results frequently in interesting patterns. Contrails are a headache to combat pilots and are very difficult to control. Apparently they result only when the atmosphere is at a certain temperature and humidity."

Sergt. Yinger then makes this interesting observation: "Contrails frequently have a tendency to cause a complete overcast and cause rain. In Idaho I have seen contrails formed in a perfectly clear sky and four hours later a complete overcast resulted.

"But one of the oddest effects I have even seen and which has never been satisfactorily explained to me is that when an aircraft producing a vapor trail enters a cloud formation, the vapor trail stops and a perfectly clear tunnel is bored through to the other side. As soon as the ship emerges, the trail begins again. This may be caused by precipitation of the water vapor in the cloud. While most trails persist for several hours, some are only of short duration, giving the appearance of the wake of a ship in water.

"The complete elimination or control of contrails would be a great advancement for aerial warfare, since they are a dead giveaway for fighter aircraft and anti-aircraft gunners.

"Notwithstanding the seriousness of contrails to high altitude flying, I saw one pilot over Los Angeles who was making good use of it. He was sky-writing with his P-39, to the amazement of onlookers."

@matthetube Wine drinkers don't generally need much of an excuse. :) I've not drunk wine with McDonalds, but I have with Jack-in-the-Box :)

2019-03-28T02:45:53+00:00

https://twitter.com/_/status/1111097045253677057

@matthetube I drink wine with every type of savory food. Certainly with pizza. Why not?

2019-03-27T18:52:09+00:00

https://twitter.com/_/status/1110977826797174784

@ColinWigle @PabloMusic Well yes, it very much depends on the weather, and weather can vary from year to year (wet years, dry years, hot years, cold years), so over the scale of human memory you can feel like it's something new when it's really just weather variability.

2019-03-27T18:46:13+00:00

https://twitter.com/_/status/1110976334761615360

@PabloMusic Seeing an increase in contrails can be due to a number of factors - like moving from one region to another, or new routes opening up over where you live. Of course there's an increase in jet traffic overall - especially with regional jets.

2019-03-24T23:01:39+00:00

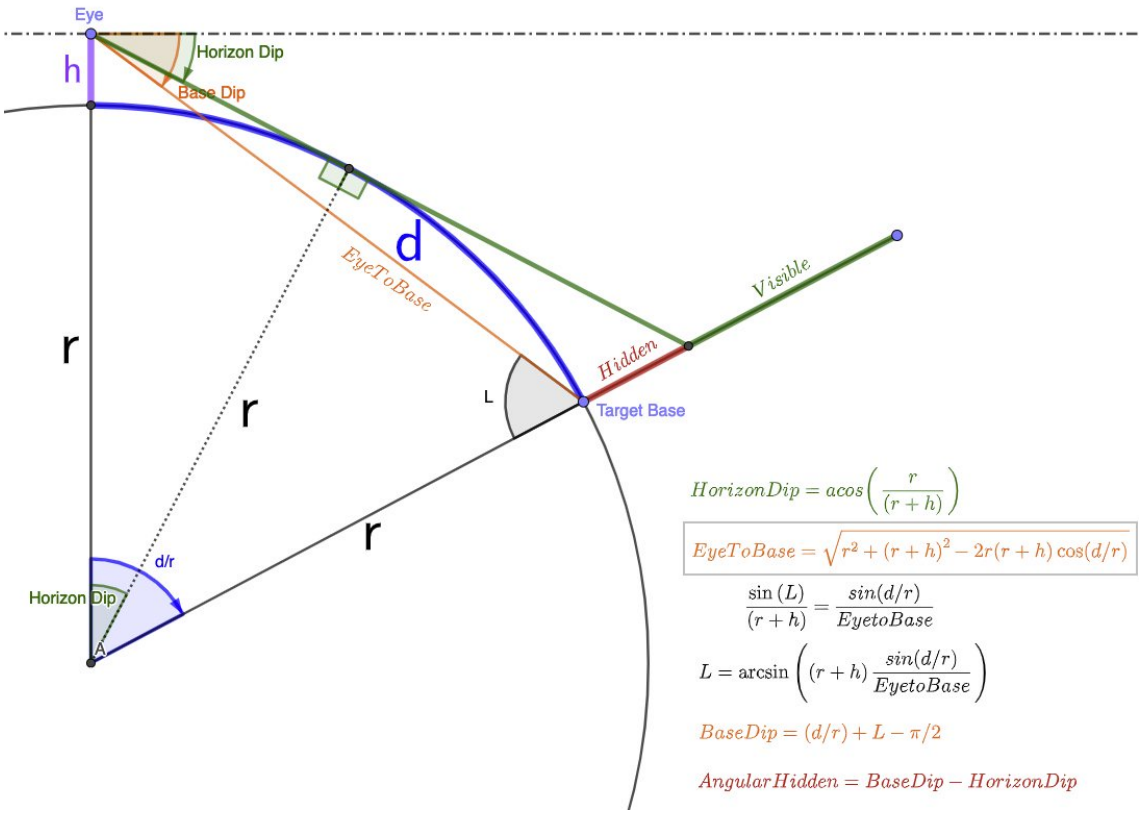
https://twitter.com/_/status/1108996802676559877
There's all kinds of issues around this question - the first being: "are they even serious?" Some of them seem to be - so then the question becomes: "is it even possible to explain in a timely manner?" Quite possibly not, so does the confusion remains permanent?

2019-03-22T07:37:59+00:00
https://twitter.com/_/status/1108996226773475328
Flat Earth folk complain that the calculations of the amount of something hidden by the horizon ignore angular size.
That's nonsensical, or course, but raises the challenge of how you explain why it's nonsensical.
The calculation in terms of angular size is slightly more complex
http://pbs.twimg.com/media/D2Pxg4XUcAEGtZF.jpg



http://pbs.twimg.com/media/D2Pxg4XUcAEGtZF.jpg

2019-03-21T18:22:17+00:00

https://twitter.com/_/status/1108795984790708226

@GalacticService @Oswald1160 @BreatheAgain777 It's because there ISN'T a massive outcry. There's a really small number of people bothered by contrails. There's a slightly larger number that thinks they are "chemtrails". Then there's most people, who really don't care.

Where exactly are you seeing this "massive outcry"?

2019-03-20T19:15:33+00:00

https://twitter.com/_/status/1108446998322016256

@GalacticService @BreatheAgain777 It's not massive. And it's just contrails, so what is there to cover? There's some science, but science isn't really interesting to most people.

2019-03-20T13:01:43+00:00

https://twitter.com/_/status/1108352923669389313

@GalacticService @BreatheAgain777 If you plant a tree, does that mean it was 100% man made?

Contrails are NOT being dismissed, there's lots of research into their effects. The problem has been discussed since the 1950s, with research going back to the 1980s

https://www.youtube.com/watch?v=L6X5QZDQ6mw

2019-03-19T22:43:33+00:00

https://twitter.com/_/status/1108136955466776576

@GalacticService @BreatheAgain777 Contrails are arguably man-made clouds, although 99.99% of their development is natural. Engine exhaust just triggers cloud growth.

2019-03-19T01:49:24+00:00

https://twitter.com/_/status/1107821340076048384

@TTSA_Agent_001 @Juddlydoright @EngagingThe @joerogan @TTSAcademy No, I think thereâ□□s no evidence itâ□□s true, and it seems very likely that if it was then people would demonstrate it it would be great if true, but thatâ□□s not evidence.

2019-03-19T00:34:39+00:00

https://twitter.com/_/status/1107802528941404160

@Juddlydoright @EngagingThe @joerogan @TTSAcademy I watched a bit of the video. Elizondo claimed that people had successfully done remote viewing, for spying.

Now y'all might think that's fine. But for most people that just makes him look silly.

So I wonder if it was taken down because of that, and other silly things.

2019-03-19T00:28:30+00:00

https://twitter.com/_/status/1107690097061691394
@EngagingThe @joerogan @TTSAcademy I always try to be serious, scientific, and unbiased. It's not like I'm just advocating one position. I look at the presented evidence, and I see what hypotheses fit it best.

2019-03-18T17:06:15+00:00
https://twitter.com/_/status/1107689683536863232

@stang289 @7NewsSydney I don't know. I suspect they don't have enough people to look at all the complaints, and this type of mass posting of a video was not something they are tooled up for yet.

2019-03-18T17:03:52+00:00

https://twitter.com/_/status/1107689084430872576

@EngagingThe @joerogan @TTSAcademy I made no error. Why don't you look at what I actually said: https://www.youtube.com/watch?v=nIl4peYb59E

2019-03-18T16:26:10+00:00

https://twitter.com/_/status/1107679596932005898

@USMCNoggin @TlohJ Slightly more, in that, if the planes were not flying there, then there would be less cloud there. The total effect is slight net warming when you account for night-time contrails. So it's a factor in the climate, but a relatively small one.

2019-03-18T16:23:52+00:00

https://twitter.com/_/status/1107679018864631808

@EngagingThe @joerogan @TTSAcademy What did I get wrong?

There are objects in the sky that are unidentified (which does not mean they are particularly interesting). There's a dearth of physical evidence that the UFO phenomenon is anything other than misidentifications, illusions, hoaxes, and wishful thinking.

Various different looking contrails http://pbs.twimg.com/media/D19CWPmU0AAE7zI.jpg

---

http://pbs.twimg.com/media/D19CWPmU0AAE7zI.jpg

2019-03-18T02:33:07+00:00

https://twitter.com/_/status/1107469954641625088

@GeoeWatchDebunk Think of it simplified. The sun is to the left, low. The exhaust contrail on the left starts low, at the engine. The Aerodynamic contrail starts higher, on the top of the wings. The EC rises up until it casts a shadow across the thin AC.

2019-03-18T02:23:38+00:00

https://twitter.com/_/status/1107467568078446592

@GeoeWatchDebunk 747 contrails swoop down, out, up and around in a fairly dramatic manner. There's perspective foreshortening here, and a low sun.

2019-03-17T19:19:55+00:00

https://twitter.com/_/status/1107360933666447360

@ivan_januskevic @TTSA_Agent_001 So you are using a "traditional understanding" AND "hypothesizing possible physics"?

It's a moot point anyway, obviously if something is silently accelerating at 1000g then it's either using exotic physics, new physics, or it didn't happen. So what's the evidence it did?

2019-03-17T19:15:55+00:00

https://twitter.com/_/status/1107359928841191424

@GeoeWatchDebunk The aerodynamic contrail does not end there, that's just where it's fully in shadow.

2019-03-17T15:31:13+00:00

https://twitter.com/_/status/1107303382107090945

@GeoeWatchDebunk Looks fine to me, just has the colors boosted.. The overall contrail shape looks like a normal four engine contrail. The aerodynamic portion seems to have sharp edges, I think that's just due to the shadows from the exhaust contrails.

2019-03-17T15:15:06+00:00

https://twitter.com/_/status/1107299327427264513

@TTSA_Agent_001 Why not just say they warped space without using any energy. Or used a tiny bit of energy? It makes just as much sense from a physics perspective. Why is the conventional amount of energy important.

If you can just make up physics then you don't get to use physics.

2019-03-17T14:45:26+00:00

https://twitter.com/_/status/1107291857732530182

@TTSA_Agent_001 That's only if the acceleration reported actually happened. So what's the evidence that it did?
There's MUCH MORE evidence it did NOT happen, like the lack any kind of nuclear-blast sized energy release (flash, boom, blast, condensation)

2019-03-17T06:42:48+00:00

https://twitter.com/_/status/1107170400620834817

https://twitter.com/_/status/1104819989733793792
@theyre_heeeere @BlueBookBelieve @FreemanStahl Except it would be blindingly obvious the

plane was shot down. But instead it looks exactly like it flew into the ground.

2019-03-10T18:38:53+00:00

https://twitter.com/_/status/1104813895640743936

@FreemanStahl @BlueBookBelieve Does that actually make sense to you?

2019-03-10T17:35:50+00:00

https://twitter.com/_/status/1104798025405231107

@BlueBookBelieve @FreemanStahl Yes. Planes that are shot down do not embed themselves in the ground. They break up in the air, and the now non-aerodynamic pieces fall to variosu locations. A classic example of a shot-down airliner is MH17.

http://pbs.twimg.com/media/D1UHyDAUcAAwbmS.jpg

http://pbs.twimg.com/media/D01m1_DU8AAHk4d.jpg

2019-03-03T14:36:00+00:00

https://twitter.com/_/status/1102216057329115136

@LondonSkywatch @VaesNico I said you need the humidity at fligh altitudes, at the right time, and location, not some average. The 300 - 200mb RH charts are usually the best, unless there RH instruments on the plane.

2019-03-02T03:32:03+00:00

https://twitter.com/_/status/1101686577795756033

@LondonSkywatch @Oswald1160 @robemarine Between 25,000 and 45,000 feet, generally. But it can vary.

2019-03-01T19:12:17+00:00

https://twitter.com/_/status/1101560808994029568

@cj980088 @LondonSkywatch Crow instability.

2019-03-01T19:10:39+00:00

https://twitter.com/_/status/1101560395876073472

@LondonSkywatch @Oswald1160 @robemarine Average is not the same as a specific measurement.

2019-02-28T23:57:53+00:00

https://twitter.com/_/status/1101270294201655297

@LondonSkywatch @robemarine The average is irrelevant to contrails. Itâ□□s the RH at exact flight altitude that you need.

2019-02-28T15:51:53+00:00

https://twitter.com/_/status/1101147987437223936

@LondonSkywatch @robemarine And there's a CONSIDERABLE variation over that range. You can't use a single number for 13,000-40,000 feet. You need the number at the location of the observed trails.

2019-02-28T15:47:22+00:00

https://twitter.com/_/status/1101146853150621696

@PerfektSpellller @joerogan It could probably be distilled down to an hour or two. He threw out a lot of bunk with certainty that really should have been fact checked. It might not seem important, but it should be winnowed down. At least Joe asked him for sources a few times on the big stuff.

2019-02-28T15:09:19+00:00

https://twitter.com/_/status/1101137275289661440

@LondonSkywatch @robemarine Again, check the RH at flight altitude, at the correct location, and at the correct time. There's a LOT of variation in RH over those three variables.

2019-02-28T05:47:56+00:00

https://twitter.com/_/status/1100995999496003584

@c0nan666 @UfoJoe11 @joerogan It encompasses a range of conspiracy extremeness in theory variants, for example:

0: Promoting drugs beyond their actual need.

1: Campaign contributions to induce a politician to pass pharma-favorable legislation

2: Falsifying clinical trails

3: Hiding a cure for cancer

2019-02-27T23:56:02+00:00

https://twitter.com/_/status/1100907439245807617

@KingBrennymma I think he's just obsessed with a false belief. and is doing everything he can to try to justify that belief.

2019-02-27T23:55:02+00:00

https://twitter.com/_/status/1100907189726670848

The Alex Jones episode of the @JoeRogan podcast made me realize my conspiracy spectrum needed to be extended up to 11. http://pbs.twimg.com/media/D0c06_LU8AA_pX_.jpg

@AMGarvey I'd imagine most of what they moderate in terms of conspiracy theories is where people are attacking the victims - particularly of school shootings like Parkland and Sandy Hook.

Also, anti-semitism is a quite common root in conspiracy theories, so those posts get reported.

2019-02-25T15:40:31+00:00

https://twitter.com/_/status/1100057966223405056

Forced to watch conspiracy theory videos for days, Facebook moderators found even the more outlandish theories insidiously creeping into their brains. Eventually, some of them became believers in the material they were supposed to be moderating.

https://www.theverge.com/2019/2/25/18229714/cognizant-facebook-content-moderator-interviews-trauma-working-conditions-arizona http://pbs.twimg.com/media/D0QwVGEV4AEOOfW.jpg

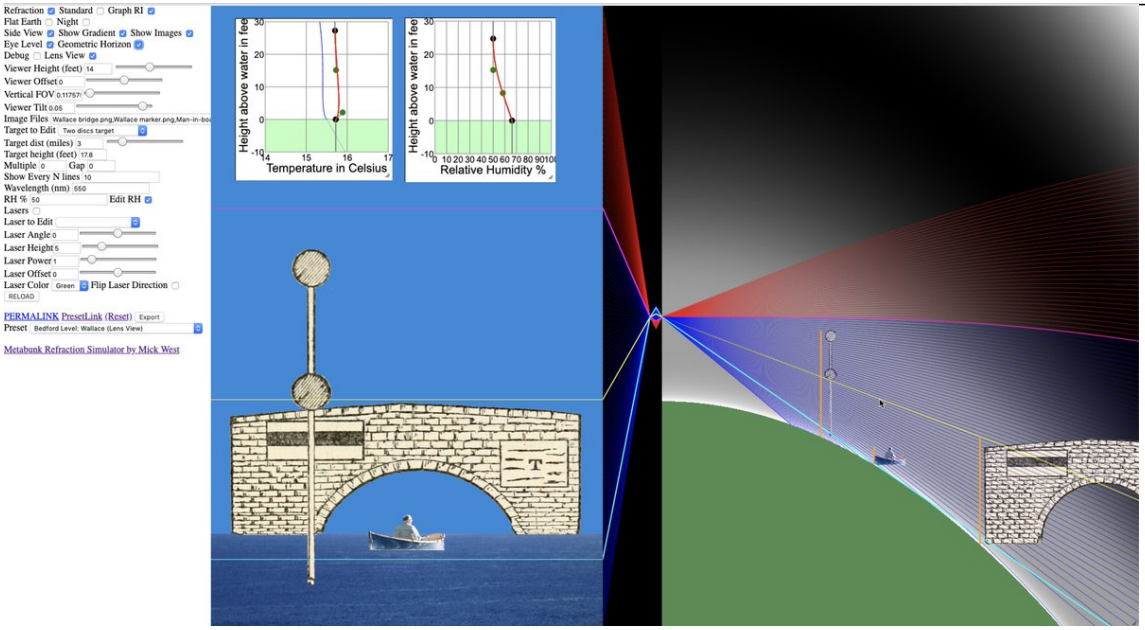
https://twitter.com/_/status/1099913912189894656

149 Years ago, Alfred Russel Wallace performed an experiment for a Flat Earther to demonstrate the Earth was round. Bizarrely they decided that it showed the Earth was flat.

https://en.wikipedia.org/wiki/Bedford_Level_experiment

http://pbs.twimg.com/media/D0OtW7zU8AA889f.jpg



http://pbs.twimg.com/media/D0OtW7zU8AA889f.jpg

2019-02-22T20:17:27+00:00

https://twitter.com/_/status/1099040495269888000

@LondonSkywatch High altitude aerodynamic contrails come from the wing surface, not the tips. They are much more susceptible to atmospheric conditions than exhaust contrails, so tend to be patchy.

The illusion is just that this segment stops where the contrails wrap around. Similar:

http://pbs.twimg.com/media/D0CTePcU0AAOisC.jpg

http://pbs.twimg.com/media/D0CTePcU0AAOisC.jpg

2019-02-22T14:55:13+00:00

https://twitter.com/_/status/1098959400876728320

@LondonSkywatch Itâ□□s an optical illusion. Thereâ□□s a short section of aerodynamics contrail in the middle that coincides with the nner exhaust trails curling outwards.

2019-02-21T18:34:59+00:00

https://twitter.com/_/status/1098652318835236864

@thatonetxginger Depending on how you measure it. It does not really have an edge, so you have to pick some fairly arbitrary criteria for where it stops. I would really call the hydrogen geocorona the "atmosphere"

2019-02-21T18:28:27+00:00

https://twitter.com/_/status/1098650674999394305

@AndyAndymcfadz I think the buildings collapsed due to the plane impacts and the fires. I don't think any explosives or incendiaries were used.

2019-02-21T17:16:14+00:00

https://twitter.com/_/status/1098632502053228544

A plane circling over the north of England a few weeks ago left an impressive set of circular contrails - leading many to speculate about the possibility of "chemtrails". It was just an AWACs

radar plane flying normal circuits in ideal contrail conditions.

https://www.metabunk.org/explained-video-of-concentric-circular-chemtrails-e-3-sentry-awacs-plane-feb-1-2019.t10497/ http://pbs.twimg.com/media/Dz8f6qGUcAAh7-J.png

2019-02-19T19:48:48+00:00

https://twitter.com/_/status/1097946121631084544

How do you you unbend a laser?

My tank of sugar water was starting to get a bit disgusting looking, so I did one final experiment with it - undoing refraction. https://www.youtube.com/watch?v=oGMkIqAidK4

2019-02-18T20:09:22+00:00

https://twitter.com/_/status/1097588907179311104

@Horn009 @AE911Truth There's actually quite a variety of possible sources. See: https://www.youtube.com/watch?v=hyFIHZwMm4w

---

2019-02-18T06:16:34+00:00

https://twitter.com/_/status/1097379326146695168

@AE911Truth Hardly a response though. It's more like getting annoyed that I mentioned NIST and then dredging up a bunch of old claims which I didn't mention.

Why don't you address some of the points I actually make, like the iron microspheres, or the angle cut columns, or my wooden model.

2019-02-15T19:30:50+00:00

https://twitter.com/_/status/1096492049015029761

@T__E__S__L__A @m101wagner In this example, what are you doing exactly when you "attempt to change the direction of fall"?

2019-02-15T17:47:36+00:00

https://twitter.com/_/status/1096466068577476608

@T__E__S__L__A @m101wagner If you were falling with the elevator, you can still push yourself from one side to the other, or from top to bottom.

2019-02-15T17:46:42+00:00

https://twitter.com/_/status/1096465841741127680

@limitedview I'm a little bemused by how you figure that? The radius of curvature of the lake is going to be the same as the radius of curvature of the Earth.

2019-02-15T14:15:32+00:00

https://twitter.com/_/status/1096412700437954561

@T__E__S__L__A @m101wagner Yes, you can move in any direction you like in a falling elevator, relative to that elevator. You'd need something to push off, of course. But essentially a falling elevator is like the ISS (except for the duration of the orbit).

2019-02-15T14:13:00+00:00

https://twitter.com/_/status/1096412060085153802

@T__E__S__L__A @m101wagner Probably.

HR2977 explained: http://contrailscience.com/kucinich-chemtrails-and-hr-2977/

Scientific papers talk about possible future geoengineering.

Contrails are not an illusion. We all see the same sky. Planes leave long clouds behind them sometimes.

2019-02-15T14:10:48+00:00

https://twitter.com/_/status/1096411509368938498

@muhammadekmal There's a variety of degrees of certified accuracy. My weight is M2, near the lowest. But that does not matter, as we are measuring relative change in weight, not true weight. https://laboratoryresource.com/?navaction=getitem&id=237

2019-02-15T13:57:37+00:00

https://twitter.com/_/status/1096408189694705664
@muhammadekmal Reference masses are calibrated by comparison to higher precision reference masses and are certified by various authorities. There's a fascinating look at the process here:
http://resource.npl.co.uk/docs/science_technology/mass_force_pressure/clubs_groups/instmc_weighing_panel/massnweight.pdf

---

2019-02-15T13:46:25+00:00
https://twitter.com/_/status/1096405370388373504
@T__E__S__L__A @m101wagner It's a bit like being on a train. On a train everyone is moving at 100mph down the tracks in the direction of the train's motion. But you can also get up and walk around. You can even throw things to each other.

2019-02-15T13:43:31+00:00
https://twitter.com/_/status/1096404640621506560
@T__E__S__L__A @m101wagner I look at the skies all the time. I was just in New Mexico, and saw some cool lenticular clouds, and fallstreaks. I think though you are possibly mistaking contrails for "chemtrails"?

2019-02-15T05:55:50+00:00
https://twitter.com/_/status/1096286944902795270
@T__E__S__L__A @m101wagner What did you notice, exactly?

2019-02-14T20:42:40+00:00
https://twitter.com/_/status/1096147734522982400
@CBaskaraca @razor0fOccam Airflow and temperate make very little difference. I repeated the test in a variety of conditions

2019-02-14T06:43:45+00:00

https://twitter.com/_/status/1095936614906220547

@T__E__S__L__A They move in the same direction. Free fall on the ISS is an orbit.

2019-02-14T06:15:34+00:00

https://twitter.com/_/status/1095929523034513409

@WGDykstra Yes it does, which is why it weighed even less in Albuquerque

---

2019-02-14T00:43:03+00:00

https://twitter.com/_/status/1095845844647960576

@Russianvids4 And updrafts, for cumulus, etc.

2019-02-14T00:42:37+00:00

https://twitter.com/_/status/1095845735977836545

@Russianvids4 Terminal velocity.

2019-02-14T00:22:53+00:00

https://twitter.com/_/status/1095840767493337091

@stang289 Mostly altitude, then latitude, then a tiny bit air pressure (which makes it heavier at higher altitudes)

2019-02-14T00:21:16+00:00

https://twitter.com/_/status/1095840362218672128

@ManneringJohn Not from different heights.

2019-02-13T21:29:22+00:00

https://twitter.com/_/status/1095797101122990081

@KEV1484947 Sort of. Itâ□□s fairly simple above ground. Lower means heavier. But as you go underground the ground above you is exerting an upwards pull, so you get lighter. Being close to a mountain also complicated things. You are heaviest at the beach.

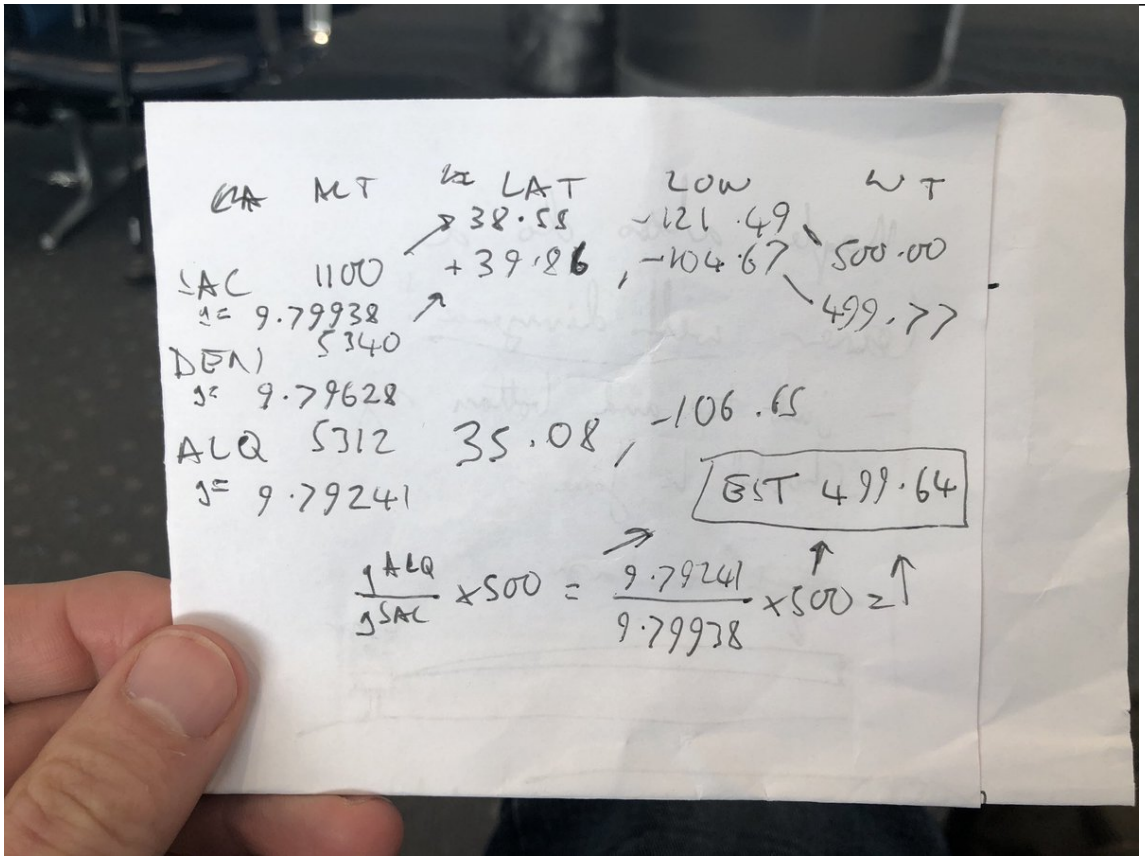
2019-02-13T20:44:41+00:00

https://twitter.com/_/status/1095785856772780041

Should be 499.64 in Albuquerque, according to my rough calculations. And this g calculator

https://www.sensorsone.com/local-gravity-calculator/

http://pbs.twimg.com/media/DzUDbKDUYAEDKSQ.jpg



http://pbs.twimg.com/media/DzUDbKDUYAEDKSQ.jpg

2019-02-13T20:30:46+00:00

https://twitter.com/_/status/1095782352540893186

I will now fly 5 degrees south, to Albuquerque, where, at the same altitude it will weigh even less.

2019-02-13T20:19:51+00:00

https://twitter.com/_/status/1095779606899159040

(Small g gravity, that is)

2019-02-13T20:13:54+00:00

https://twitter.com/_/status/1095778107720720386

First photo is a 500g reference weight and calibrated scale near Sacramento, about 1000ft. Second photo is the same weight and photo in Denver, at around 5500 ft. Thus demonstrating that gravity decreases with altitude. http://pbs.twimg.com/media/DzT8X3aUUAA6tfA.jpg

2019-02-08T19:50:18+00:00

https://twitter.com/_/status/1093960230021427201

@Jm4n @SteveMcRae_ I'm not sure what you point is. Do you think they have reached some kind of threshold that qualifies what they are doing as "geoengineering" in your mind? Or are you saying all Weather Modification is geoengineering?

Is there a reason why you want to use the label?

2019-02-08T19:44:11+00:00

https://twitter.com/_/status/1093958690711920640

@10foldtony Air: about 1.0003

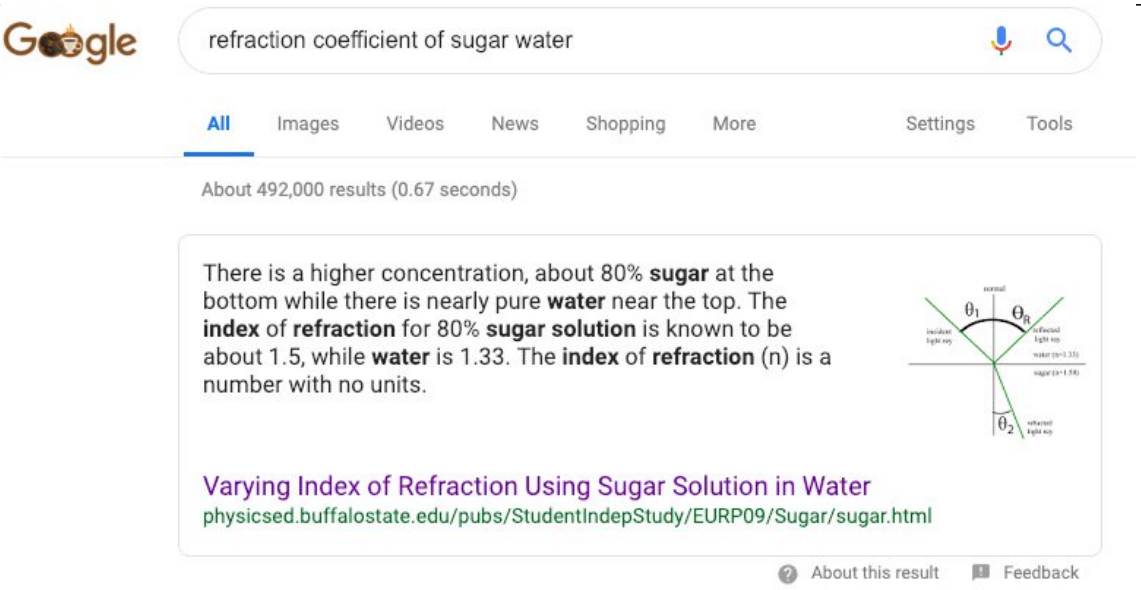
Water: 1.333

Sugar Water: about 1.35 (at 10%) to 1.5 (at 85%)

You can verify this with google.

http://www.refractometer.pl/refraction-datasheet-sucrose

http://pbs.twimg.com/media/Dy6E2UqU8AAuidT.jpg



http://pbs.twimg.com/media/Dy6E2UqU8AAuidT.jpg

2019-02-08T14:50:18+00:00

https://twitter.com/_/status/1093884733912543232

@10foldtony Similar to the length of an aquarium compared to the width of Lake Ontario.

2019-02-08T07:53:14+00:00

https://twitter.com/_/status/1093779774432894976

@Jm4n @SteveMcRae_ One day of record rainfall is weather, not climate. Nor is it even demonstrably cloud seeding, as the article says: "It is difficult to assess the impact of cloud seeding on levels of rain because there is no way of measuring how much would have fallen without it. "

2019-02-08T04:45:09+00:00

https://twitter.com/_/status/1093732443851575297

@Jm4n @SteveMcRae_ What was the measurable effect on the climate, in numbers?

2019-02-08T01:54:22+00:00

https://twitter.com/_/status/1093689464222769152

@Jm4n @SteveMcRae_ So has cloud seeding measurably changed the composite or generally prevailing weather conditions of a region, as temperature, air pressure, humidity, precipitation, sunshine, cloudiness, and winds, throughout the year, averaged over a series of years, anywhere?

2019-02-08T01:24:35+00:00

https://twitter.com/_/status/1093681968011771904

@FlatEarthCity @Georjakos Did you notice in the fourth photo you just posted you can see a bit of a curve?

2019-02-08T01:22:20+00:00

https://twitter.com/_/status/1093681401512177664

@Jm4n @SteveMcRae_ Weather is not climate. Local weather is not global climate.

I'm not the dictionary. I don't decide on the acceptable meaning of words. But I'm pretty sure that the scale of weather modification current practiced is vastly less than what would be considered geoengineering.

2019-02-08T00:57:26+00:00

https://twitter.com/_/status/1093675133770723328

@Jm4n @SteveMcRae_ Geoengineering modifies the climate of the planet. Cloud seeding just modifies a bit of local weather. It's like rubbing your hands together vs. adjusting the house thermostat.

2019-02-08T00:54:53+00:00

https://twitter.com/_/status/1093674492830703616

@DrJamesConnor What about it?

2019-02-07T19:49:36+00:00

https://twitter.com/_/status/1093597667165237248

@DrJamesConnor Snell's law only applies when there's an abrupt change in refractive index. That's not the case here - there's a gradient. Different math applies.

2019-02-07T16:32:47+00:00

https://twitter.com/_/status/1093548136121790464

@FlatEarthCity What fake?

2019-02-07T16:32:07+00:00

https://twitter.com/_/status/1093547968735502337

@Oswald1160 @ManneringJohn Water and glass can bend light at an interface (like air to glass, air to water, or glass to water). However that requires an angle, and here I hold the laser perpendicular to the interface.

What is being shown here is how a GRADIENT in the refractive index will bend light

@FlatEarthCity That's a good example of the problems of refraction in near horizon observations. You can see that in the simulator. Cold lower layers flattens out the apparent curve.

https://www.metabunk.org/refraction/?~(profile~(~12.35~0~15.847~0.733~15.552~69.552~15.405~42.403~15.497~266.146~15.52825232~250.362)~useRefraction~true~useStandard~false~useFlat~false~useNarrow~false~useNight~false~showSideView~true~showSideGradi

https://twitter.com/_/status/1093514283130867713

@FlatEarthCity What "lies" and "faking pictures" are you referring to? I don't lie. I don't fake pictures either, except as demonstrations of how things might be fakes. Please don't accuse without evidence.

2019-02-07T14:16:59+00:00

https://twitter.com/_/status/1093513962073673729

@ManneringJohn Lake temperature is pretty constant. And air temperature follows regular cycles.

2019-02-07T14:15:45+00:00

https://twitter.com/_/status/1093513651703566336

@Jm4n @SteveMcRae_ Cloud seeding isn't geoengineering (at least the way it's being done now). It's just local precipitation augmentation i.e., it attempts to makes particular regions of cloud rain or snow a bit more than they normally would. It's not secret, and does not leave trails.

2019-02-07T14:13:53+00:00

https://twitter.com/_/status/1093513180955893760

@SteveMcRae_ Sure, I'd be happy to be back on. Maybe in a couple of weeks.

2019-02-07T14:12:59+00:00

https://twitter.com/_/status/1093512955491053568

@alo_pumpa I think he exists. I don't think he's see aliens. He might think he has.

2019-02-07T14:12:13+00:00

https://twitter.com/_/status/1093512761328381952

@FlatEarthCity This demonstration does not rely on my credibility. It's something that people can replicate for themselves. Or just look at the video. Do you think there's something fake there? How would that even work?

2019-02-07T14:11:16+00:00

https://twitter.com/_/status/1093512521644818432

@ManneringJohn The tank is needed to hold the water. But you can observe the effect by looking at a city over a lake when A) the lake is colder than the air, and B) the lake is about the same temperature. The colder the lake, the larger the temperature gradient. Lots of variables thought.

2019-02-07T13:57:44+00:00

https://twitter.com/_/status/1093509114859114496

@ManneringJohn They are in a variable refractive medium (air). Same principles of physics apply.

2019-02-07T13:56:21+00:00

https://twitter.com/_/status/1093508768313204737

@alo_pumpa You don't.

2019-02-07T13:55:13+00:00

https://twitter.com/_/status/1093508483033362433

@ManneringJohn And the bent metal is just in there as an obstruction. It only covers part of the base of the tank, and the laser curves exactly the same in the other parts.

2019-02-07T13:54:20+00:00

https://twitter.com/_/status/1093508261267959809

@ManneringJohn The laser is perpendicular to the glass at times, and yet still curves. In a tank of homogenous water (or air) the glass has very little effect, and the laser does not curve. The curve of the laser is from the density gradient, just like in the atmosphere.

2019-02-07T08:39:47+00:00

https://twitter.com/_/status/1093429100423704576

@ManneringJohn You can observe the exact same compression, like in the Jenna Fredo video.

2019-02-07T08:26:30+00:00

https://twitter.com/_/status/1093425757194338304

@SimonGr41594862 I don't think different gasses bend enough over a short distance unless there's the huge temperature difference.

2019-02-07T05:58:44+00:00

https://twitter.com/_/status/1093388573389205504

@alo_pumpa What speed, specifically, are you referring to?

Boiling water does not instantly freeze when you throw it in the air. Most of what you see is actually from the opposite, hot water evaporating, and then re-condensing as a cloud. https://www.metabunk.org/debunked-boiling-water-freezing-when-you-throw-it-in-the-air-at-40-degrees.t2902/ http://pbs.twimg.com/media/DyKtsuhUcAApW_D.jpg

@GeoeWatchDebunk @JonExArmy My comment on that video. Dane is basically ignoring chemistry. http://pbs.twimg.com/media/DyGau4rU0AAZb8N.jpg

Mick West 1 second ago

I met Dane Wigington, back in 2012, at the "Consciousness Beyond Chemtrails" conference in Los Angeles. I knew back then that he was mistakenly thinking that his tests for aluminum were showing free aluminum (i.e. the metal). The test that he most commonly used was Inductively Coupled Plasma/Mass Spectrometry. This rips matter into plasma (charged atoms) during the testing process, so it does not distinguish between elements and compounds of those elements. So if you test dirt, you'll find aluminum. But that's just the aluminum found naturally in the ground.
I approached Dane and after some conversation, I tried to bring this up. "Did you know," I asked, "that the test you use is EPA 6010B, which..."
I didn't get to finish my sentence because Dane angrily cut in, and said, "OH, don't you start with that scientific-sounding nonsense!"
I tried to explain, but he was having none of it, and walked away.

It's sad that five years later, Dane *still* does not understand the test he is quoting. I'd encourage anyone interested in this topic to look up what EPA 6010B does, and what results it will find when you feed it aluminum oxide.

Dane's test results, the basis for this entire theory, are simply showing the elements you'd find in dirt.

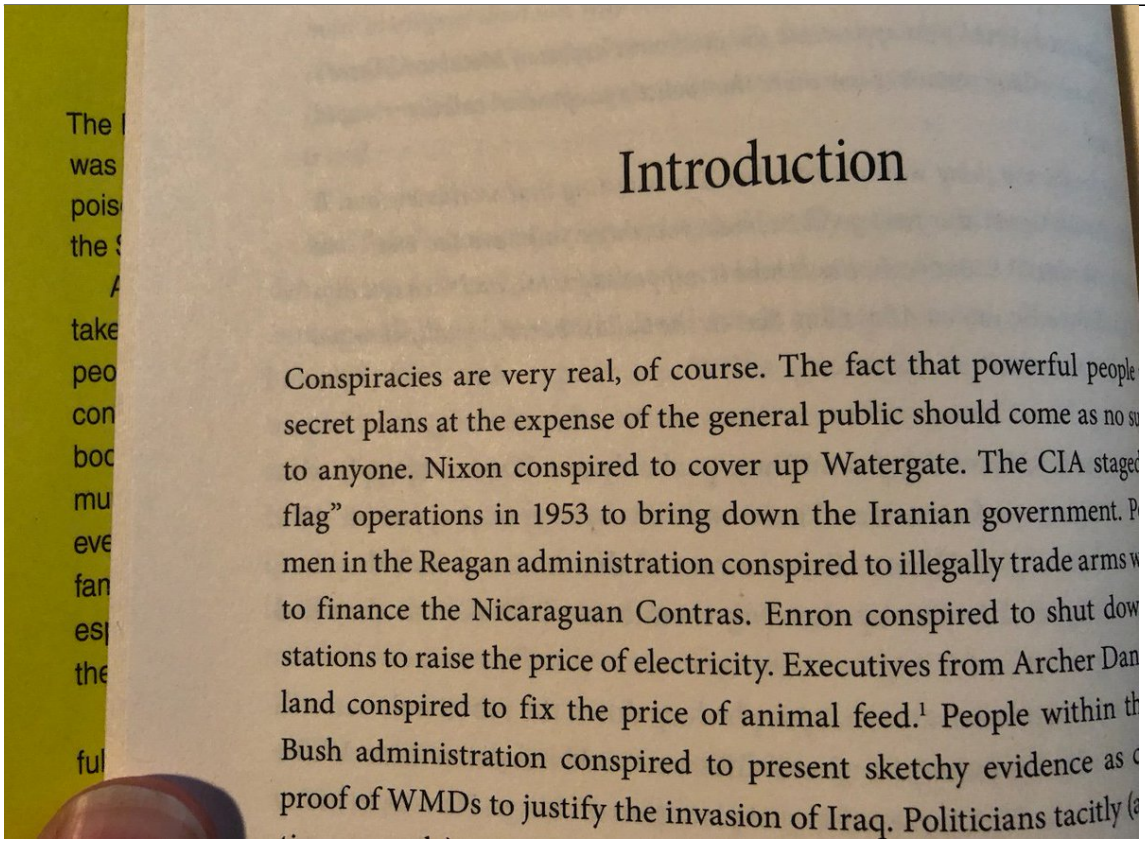
@IMHO__2017 @BlagenLogin The introduction of my book literally starts with "Conspiracies are very real, of course".

https://amzn.to/2Et0Cea http://pbs.twimg.com/media/Dxw-sK6X0AEUZxL.jpg

---



Introduction

Conspiracies are very real, of course. The fact that powerful people secret plans at the expense of the general public should come as no s to anyone. Nixon conspired to cover up Watergate. The CIA staged flag" operations in 1953 to bring down the Iranian government. P men in the Reagan administration conspired to illegally trade arms w to finance the Nicaraguan Contras. Enron conspired to shut dow stations to raise the price of electricity. Executives from Archer Dan land conspired to fix the price of animal feed.[1] People within th Bush administration conspired to present sketchy evidence as proof of WMDs to justify the invasion of Iraq. Politicians tacitly (

https://twitter.com/_/status/1083955804611391489

@Fibonacci222 Of course they do. But does this one?

2019-01-12T04:33:41+00:00

https://twitter.com/_/status/1083945084880474113

@Fibonacci222 Itâ□□s a common term for speculative theories about vast powerful nefarious conspiracies.

2019-01-12T02:55:25+00:00

https://twitter.com/_/status/1083920355721326593

@Fibonacci222 Sounds like an interesting conspiracy theory.

2019-01-12T01:42:06+00:00

https://twitter.com/_/status/1083901904256552961

@Fibonacci222 "humorously 'eugenic'" ??? . Obviously social change can affect birth rates. When women got more say in their reproductive rights they could chose to have fewer children. China obviously had the one-child policy. I don't think gay-rights changed birthrates much, if at all.

2019-01-12T01:38:22+00:00

https://twitter.com/_/status/1083900962966630400

@Fibonacci222 "Official?" There's nothing "official" here. I do think that the writer was a bit batty. I mean. the idea of reducing the world's population to 0.5B is pretty silly (unless we are talking hundreds or thousands of years).

2019-01-12T00:23:57+00:00

https://twitter.com/_/status/1083882237278310401

@Fibonacci222 I don't disregard them. The guidestones are the ramblings of a madman.

2019-01-12T00:23:07+00:00

https://twitter.com/_/status/1083882028200644608

@Fibonacci222 i don't think so. And I don't see anyone at the UN calling for population reduction - just curbs in population growth. Certainly nobody is calling for culls, and reducing birth rates creates big problems itself demographics (like in Japan).

2019-01-11T22:12:04+00:00

https://twitter.com/_/status/1083849048111497216

@GeoeWatchDebunk @GeoengWatch Yosemite is at a major air crossroad, mostly because of the traffic flying into SFO. Here's a @flightradar24 timelapse of the air traffic in just three hours passing over the park. Easy to see how you would get a contrail grid if conditions are right.

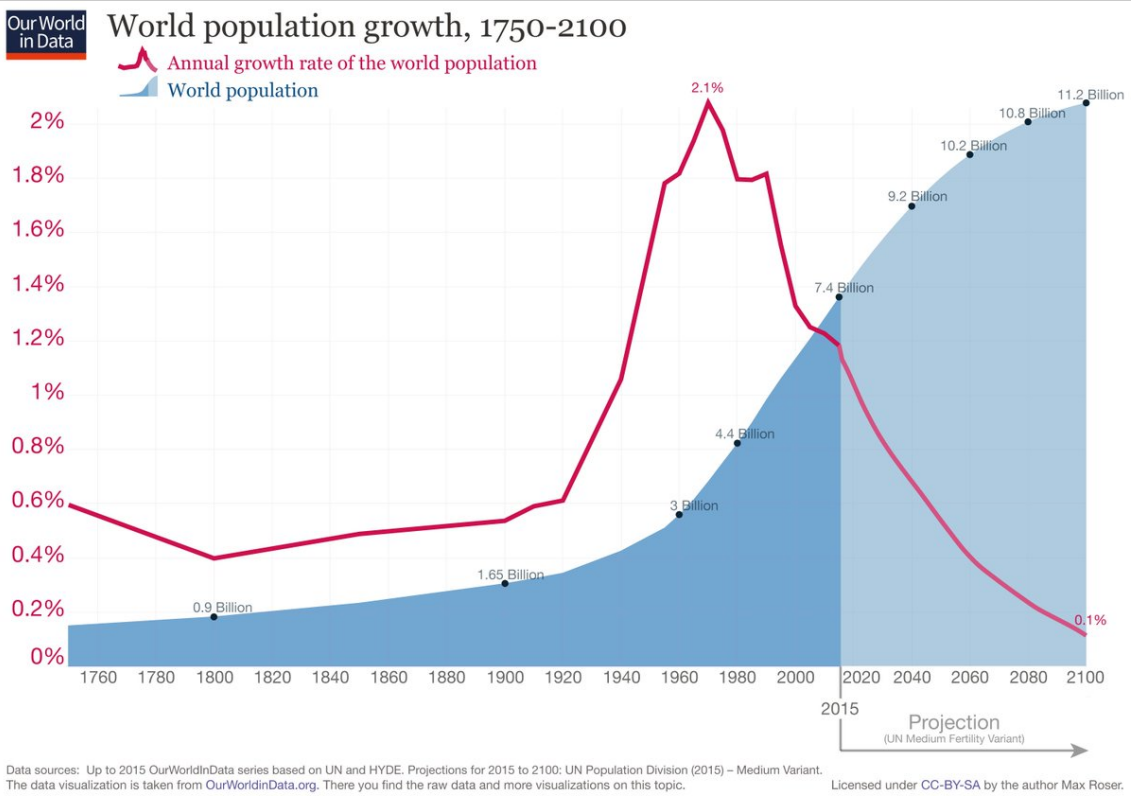
https://youtu.be/Je9bVV88x34

2019-01-11T21:14:21+00:00

https://twitter.com/_/status/1083834523962363905

@franklyteran Brown mentions Malthus several times, and discusses the problem of population growth. But this writing is from 1978. 40 years ago, when the population was 4.3 billion. Now it's 7.7 billion but the growth rate is declining. The situation has changed.

http://pbs.twimg.com/media/DwqNvoiV4AALdet.jpg



http://pbs.twimg.com/media/DwqNvoiV4AALdet.jpg

2019-01-11T21:02:32+00:00

https://twitter.com/_/status/1083831550376988672

@franklyteran @risingbluetide Obviously the more people there are, the more CO2 emissions there are, and there's more denuding of the natural environment as land gets converted to food or housing. I don't think there's a real need for (or possibility of) population reduction. Population growth is the problem.

2019-01-11T20:55:08+00:00

https://twitter.com/_/status/1083829686218588160

@Fibonacci222 It also says "fair laws and just courts". Is that a bad thing as well, because of the low population numbers on the stones?

What exactly is wrong with "harmony with nature" taken alone?

2019-01-11T20:52:58+00:00

https://twitter.com/_/status/1083829140120190976

@franklyteran @risingbluetide I don't think he assumed that.

The science of geoenginering is STILL in a nascent stage. They have not even done any field tests. Back in the 1970s they really had no idea.

2019-01-11T20:32:34+00:00

https://twitter.com/_/status/1083824008817037312

@Fibonacci222 What is it exactly about the "Harmony with Nature" draft resolution that you think is bad? http://undocs.org/A/C.2/70/L.70

2019-01-11T20:31:26+00:00

https://twitter.com/_/status/1083823723403128833

@Fibonacci222 But my tweet was about the map. That's what you were responding to.

2019-01-11T20:29:02+00:00

https://twitter.com/_/status/1083823117888176128

@franklyteran @risingbluetide Overpopulation is an actual problem for the environment. So of course environmentalists are going to talk about it.

2019-01-11T20:22:42+00:00

https://twitter.com/_/status/1083821522630762496

@franklyteran @risingbluetide I'm not sure what your point is. He referred to rain making by cloud seeding as the chief method under "deliberate attempts to alter the climate". Cloud seeding only affects the climate if done continually, and then only locally.

2019-01-11T20:17:14+00:00

https://twitter.com/_/status/1083820148157407232

2019-01-11T20:03:02+00:00

https://twitter.com/_/status/1083816576959184897

@franklyteran @risingbluetide It's not important, as he was clearly using it to refer to cloud seeding.

Do you think he was actually referring to some super secret geoengineering program in the 1970s?

2019-01-11T17:11:55+00:00

https://twitter.com/_/status/1083773511125032961

Conspiracy theorists in the US say forest fires were started by houses being zapped by DEW (Directed Energy Weapons) to clear the way for a United Nations wildlife reserve.

But in Australia, DEW puts out fires!

Who are you going to believe? https://twitter.com/CFSAlerts/status/1083607891528044550

2019-01-11T16:49:19+00:00

https://twitter.com/_/status/1083767825980747776

@franklyteran @risingbluetide Brown is talking about cloud seeding, which is weather modification. He calls it modifying the climate, but in modern usage that's incorrect (except in a limited local and temporary sense if done consistently). It's just cloud seeding.

https://files.eric.ed.gov/fulltext/ED153893.pdf

http://pbs.twimg.com/media/DwpQm7AVAAAV_rW.jpg

Another source of climatic change is thermal pollution, as weather forecasts for major cities remind us daily. Temperatures within the inner city commonly range from a few to several degrees higher than those of the adjacent countryside. So far, the clearly measurable thermal effects remain largely localized, but the continuing growth in fossil-fuel use could eventually lead to global temperature increases. A 1977 Ford Foundation–sponsored study, *Nuclear Power: Issues and Choices*, reports that electric power generation can both directly and indirectly contribute to a warming of the earth. "The most serious potential environmental impacts from greatly increased power generation are changes in global climate. The thermal output of both coal and nuclear power plants contributes directly to the long-term heating of the atmosphere. A much more immediate atmospheric heating problem, however, results from the carbon dioxide produced when coal is burned."[41]

Apart from the inadvertent modification of climate, deliberate attempts to alter the climate are becoming increasingly common. Chief among these are efforts to increase rainfall where water supplies are inadequate. Some rainmaking technologies have proven at least occasionally successful. In fact, cloud seeding was the issue behind a clash between the states of Washington and Idaho during the drought ridden early months of 1977. Washington officials, who had hired a rainmaking firm to seed clouds moving inland from the Pacific, were accused by Idaho's political leaders of "cloud rustling."[42] This relatively tame skirmish raises the prospect of meteorological warfare as countries that are hard-pressed to expand food supplies begin to compete for available rainfall.

That humans could inadvertently or intentionally alter global climatic patterns is now beyond doubt. That there are a number of possible counteracting influences that need investigating is also clear. However, whether the world would be

@superkyol This is the code used to scale the head in THPS2. Just a patch. Note it's 3x for x and z, but only 2x for y. http://pbs.twimg.com/media/Dwbx32QVYAA2L2_.jpg

```
if  (i == GHeadPart && !(pVertex->pad & (VERTEXFLAGS_GHOST|VERTEXFLAGS_ALWAYSFACING)))
{
    pVertex->vx *= 3;               // Expand head, not so tall though
    pVertex->vy *= 2;
    pVertex->vz *= 3;

    pVertex->vy += GHeadUp*16;      // shorten his neck
    if (GHeadUp<0)
        pVertex->vz -= 15*16;                   // Short skeleton guys, Move head forward, so neck is in better position

}
```

https://twitter.com/_/status/1082817898073079808

@superkyol Hmm, I think the kid mode might have come later...

2019-01-09T01:52:26+00:00

https://twitter.com/_/status/1082817340213886976

@superkyol As I remember, there was a "Kid" mode, we scaled the models to be more like kids (mostly big head, but reduced arms). I can't really remember what inspired the big head cheat mode.

2019-01-08T23:33:17+00:00

https://twitter.com/_/status/1082782322720628736

@matthewjustinnn Because the camera exposure is set for daylight.
Once you get out of the atmosphere you can see stars, but they are very faint, so they won't show up unless you use a longer exposure, and if you do that the ground would be bright white. Same in IR.

2019-01-08T18:59:12+00:00

https://twitter.com/_/status/1082713347257073664

@LondonSkywatch Perspective makes things look sharer than they are. But it's not clear if that dark region is actually a continuation of the trail. The bit at the top looks like a distrail with the ragged edges. The bottom dark region looks less so.

2019-01-08T18:57:43+00:00

https://twitter.com/_/status/1082712972726685697

November 7, 2018

BY MAIL

Mick G. Harrison, Esq.
Executive Director
The Lawyers' Committee
for 9/11 Inquiry, Inc.
426 River Mill Road
Jersey Shore, Pennsylvania 17740

Dear Mr. Harrison:

We have received and reviewed The Lawyers' Committee for 9/11 Inquiry, Inc.'s submissions of April 10 and July 30, 2018. We will comply with the provisions of 18 U.S.C. § 3332 as they relate to your submissions.

Very truly yours,

GEOFFREY S. BERMAN
United States Attorney

Q: Let me ask you specifically about **last week's scare here in Washington**, and what we might have learned from how prepared we are to deal with **that (inaudible), at B'nai Brith**.

A: Well, it points out **the nature of the threat**. It turned out to be **a false threat under the circumstances**. But as we've learned in the intelligence community, we had something called -- and we have James Woolsey here to perhaps even address this question about phantom moles. The **mere fear** that there is a mole within an agency can set off a chain reaction and a hunt for that particular mole which **can paralyze the agency for weeks and months and years even**, in a search. The same thing is true about **just the false scare of a threat** of using some kind of a chemical weapon or a biological one. There are some reports, for example, that some countries have been trying to construct something like an Ebola Virus, and that would be a very dangerous phenomenon, to say the least. **Alvin Toeffler has written about this** in terms of some scientists in their laboratories trying to devise certain types of pathogens that would be ethnic specific so that they could just eliminate certain ethnic groups and races; and others are designing some sort of engineering, some sort of insects that can destroy specific crops. **Others are engaging even in an eco- type of terrorism whereby they can alter the climate, set off earthquakes, volcanoes remotely through the use of electromagnetic waves.**

So there are plenty of ingenious minds out there that are at work finding ways in which they can wreak terror upon other nations. It's real, and that's the reason why we have to intensify our efforts, and that's why this is so important.

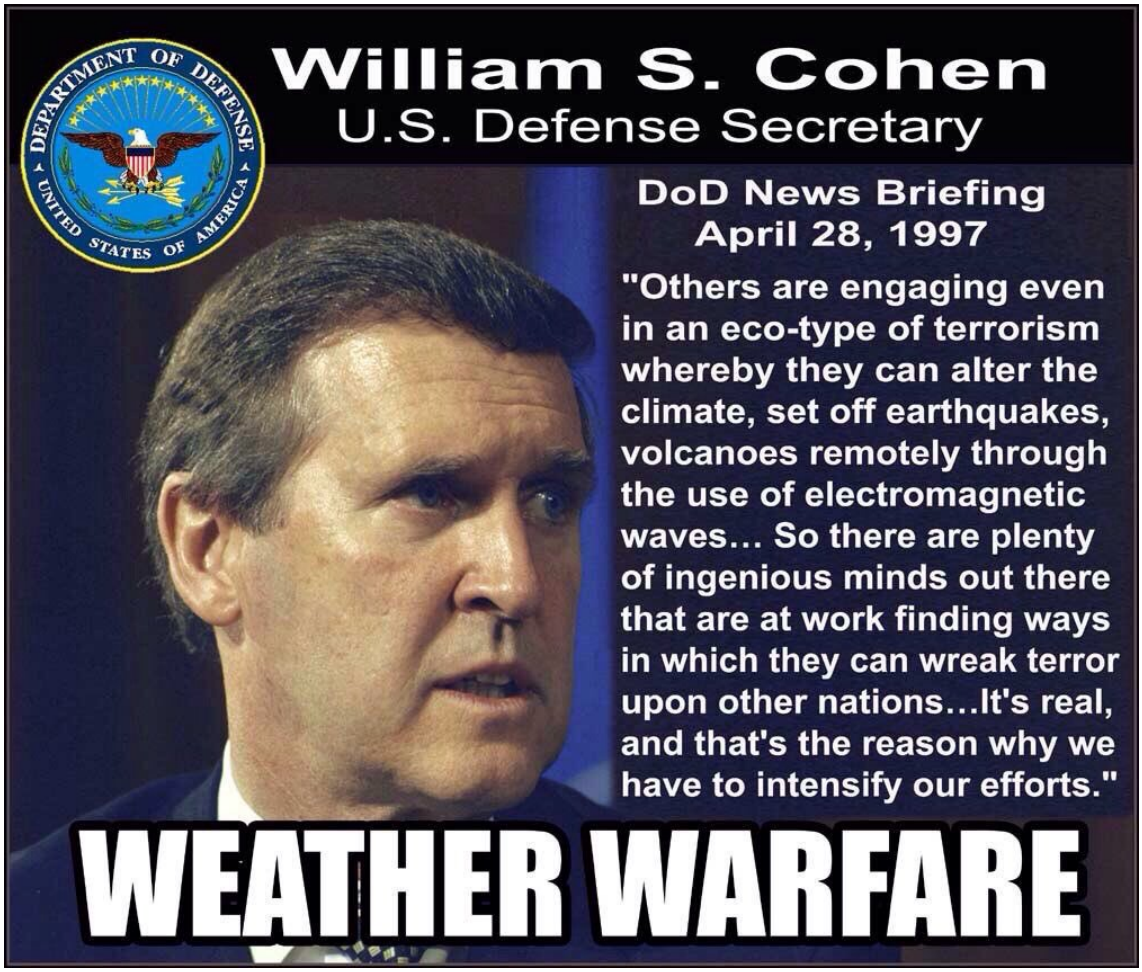
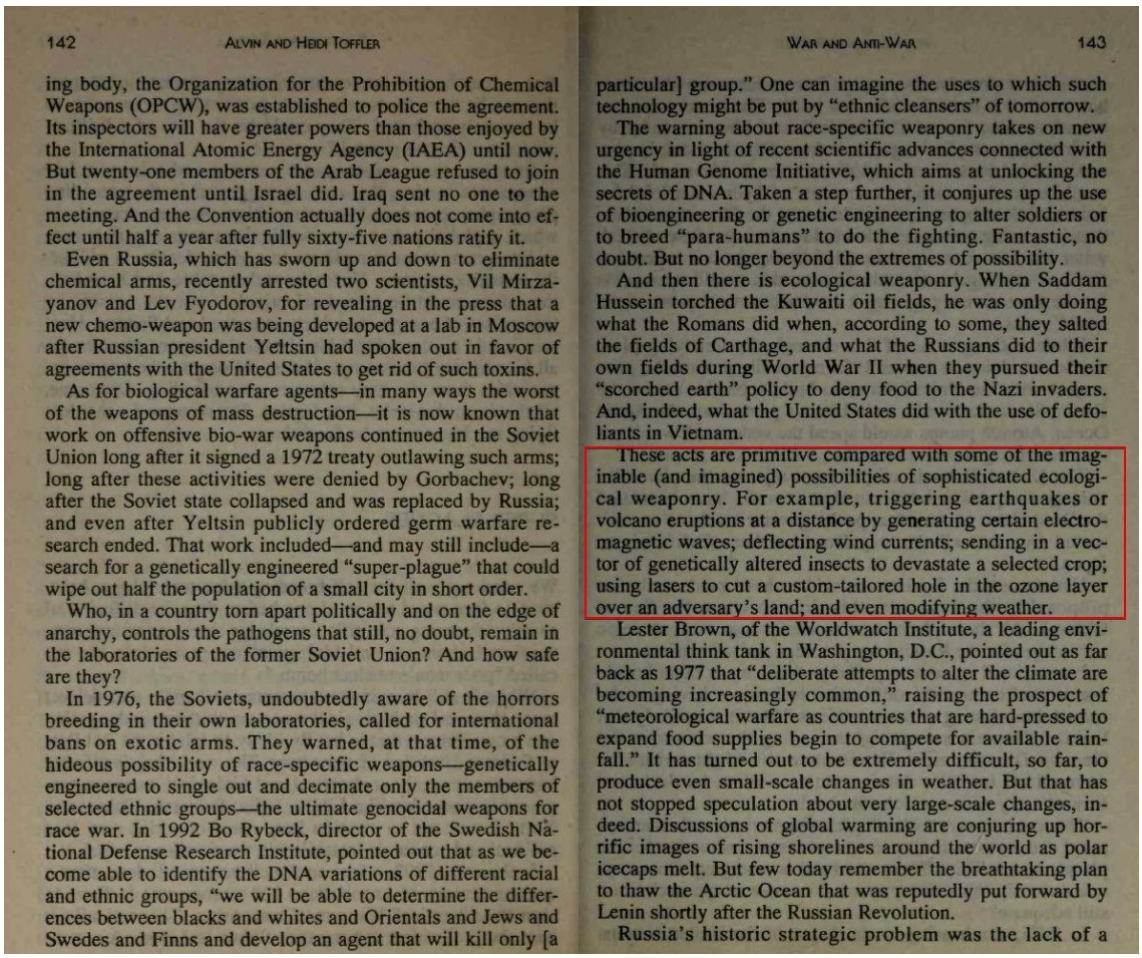
This meme about William S. Cohen "admitting" the government can set off earthquakes with radio waves has been around for years. But it turns out it was just Cohen discussing what he'd read in a book by Alvin Toffler about future war. Not anything real.
https://www.metabunk.org/debunked-others-are-engaging-even-in-an-eco-type-of-terrorism.t159/#post-732 http://pbs.twimg.com/media/Dv8lTrYVYAAEJ4O.jpg

---



http://pbs.twimg.com/media/Dv8lQp1UUAAOCbQ.jpg



142 ALVIN AND HEIDI TOFFLER

ing body, the Organization for the Prohibition of Chemical Weapons (OPCW), was established to police the agreement. Its inspectors will have greater powers than those enjoyed by the International Atomic Energy Agency (IAEA) until now. But twenty-one members of the Arab League refused to join in the agreement until Israel did. Iraq sent no one to the meeting. And the Convention actually does not come into effect until half a year after fully sixty-five nations ratify it.

Even Russia, which has sworn up and down to eliminate chemical arms, recently arrested two scientists, Vil Mirzayanov and Lev Fyodorov, for revealing in the press that a new chemo-weapon was being developed at a lab in Moscow after Russian president Yeltsin had spoken out in favor of agreements with the United States to get rid of such toxins.

As for biological warfare agents—in many ways the worst of the weapons of mass destruction—it is now known that work on offensive bio-war weapons continued in the Soviet Union long after it signed a 1972 treaty outlawing such arms; long after these activities were denied by Gorbachev; long after the Soviet state collapsed and was replaced by Russia; and even after Yeltsin publicly ordered germ warfare research ended. That work included—and may still include—a search for a genetically engineered "super-plague" that could wipe out half the population of a small city in short order.

Who, in a country torn apart politically and on the edge of anarchy, controls the pathogens that still, no doubt, remain in the laboratories of the former Soviet Union? And how safe are they?

In 1976, the Soviets, undoubtedly aware of the horrors breeding in their own laboratories, called for international bans on exotic arms. They warned, at that time, of the hideous possibility of race-specific weapons—genetically engineered to single out and decimate only the members of selected ethnic groups—the ultimate genocidal weapons for race war. In 1992 Bo Rybeck, director of the Swedish National Defense Research Institute, pointed out that as we become able to identify the DNA variations of different racial and ethnic groups, "we will be able to determine the differences between blacks and whites and Orientals and Jews and Swedes and Finns and develop an agent that will kill only [a

WAR AND ANTI-WAR 143

particular] group." One can imagine the uses to which such technology might be put by "ethnic cleansers" of tomorrow.

The warning about race-specific weaponry takes on new urgency in light of recent scientific advances connected with the Human Genome Initiative, which aims at unlocking the secrets of DNA. Taken a step further, it conjures up the use of bioengineering or genetic engineering to alter soldiers or to breed "para-humans" to do the fighting. Fantastic, no doubt. But no longer beyond the extremes of possibility.

And then there is ecological weaponry. When Saddam Hussein torched the Kuwaiti oil fields, he was only doing what the Romans did when, according to some, they salted the fields of Carthage, and what the Russians did to their own fields during World War II when they pursued their "scorched earth" policy to deny food to the Nazi invaders. And, indeed, what the United States did with the use of defoliants in Vietnam.

These acts are primitive compared with some of the imaginable (and imagined) possibilities of sophisticated ecological weaponry. For example, triggering earthquakes or volcano eruptions at a distance by generating certain electromagnetic waves; deflecting wind currents; sending in a vector of genetically altered insects to devastate a selected crop; using lasers to cut a custom-tailored hole in the ozone layer over an adversary's land; and even modifying weather.

Lester Brown, of the Worldwatch Institute, a leading environmental think tank in Washington, D.C., pointed out as far back as 1977 that "deliberate attempts to alter the climate are becoming increasingly common," raising the prospect of "meteorological warfare as countries that are hard-pressed to expand food supplies begin to compete for available rainfall." It has turned out to be extremely difficult, so far, to produce even small-scale changes in weather. But that has not stopped speculation about very large-scale changes, indeed. Discussions of global warming are conjuring up horrific images of rising shorelines around the world as polar icecaps melt. But few today remember the breathtaking plan to thaw the Arctic Ocean that was reputedly put forward by Lenin shortly after the Russian Revolution.

Russia's historic strategic problem was the lack of a

http://pbs.twimg.com/media/Dv8lTrYVYAAEJ4O.jpg

142 ALVIN AND HEIDI TOFFLER

ing body, the Organization for the Prohibition of Chemical Weapons (OPCW), was established to police the agreement. Its inspectors will have greater powers than those enjoyed by the International Atomic Energy Agency (IAEA) until now. But twenty-one members of the Arab League refused to join in the agreement until Israel did. Iraq sent no one to the meeting. And the Convention actually does not come into effect until half a year after fully sixty-five nations ratify it.

Even Russia, which has sworn up and down to eliminate chemical arms, recently arrested two scientists, Vil Mirzayanov and Lev Fyodorov, for revealing in the press that a new chemo-weapon was being developed at a lab in Moscow after Russian president Yeltsin had spoken out in favor of agreements with the United States to get rid of such toxins.

As for biological warfare agents—in many ways the worst of the weapons of mass destruction—it is now known that work on offensive bio-war weapons continued in the Soviet Union long after it signed a 1972 treaty outlawing such arms; long after these activities were denied by Gorbachev; long after the Soviet state collapsed and was replaced by Russia; and even after Yeltsin publicly ordered germ warfare research ended. That work included—and may still include—a search for a genetically engineered "super-plague" that could wipe out half the population of a small city in short order.

Who, in a country torn apart politically and on the edge of anarchy, controls the pathogens that still, no doubt, remain in the laboratories of the former Soviet Union? And how safe are they?

In 1976, the Soviets, undoubtedly aware of the horrors breeding in their own laboratories, called for international bans on exotic arms. They warned, at that time, of the hideous possibility of race-specific weapons—genetically engineered to single out and decimate only the members of selected ethnic groups—the ultimate genocidal weapons for race war. In 1992 Bo Rybeck, director of the Swedish National Defense Research Institute, pointed out that as we become able to identify the DNA variations of different racial and ethnic groups, "we will be able to determine the differences between blacks and whites and Orientals and Jews and Swedes and Finns and develop an agent that will kill only [a

WAR AND ANTI-WAR 143

particular] group." One can imagine the uses to which such technology might be put by "ethnic cleansers" of tomorrow.

The warning about race-specific weaponry takes on new urgency in light of recent scientific advances connected with the Human Genome Initiative, which aims at unlocking the secrets of DNA. Taken a step further, it conjures up the use of bioengineering or genetic engineering to alter soldiers or to breed "para-humans" to do the fighting. Fantastic, no doubt. But no longer beyond the extremes of possibility.

And then there is ecological weaponry. When Saddam Hussein torched the Kuwaiti oil fields, he was only doing what the Romans did when, according to some, they salted the fields of Carthage, and what the Russians did to their own fields during World War II when they pursued their "scorched earth" policy to deny food to the Nazi invaders. And, indeed, what the United States did with the use of defoliants in Vietnam.

These acts are primitive compared with some of the imaginable (and imagined) possibilities of sophisticated ecological weaponry. For example, triggering earthquakes or volcano eruptions at a distance by generating certain electromagnetic waves; deflecting wind currents; sending in a vector of genetically altered insects to devastate a selected crop; using lasers to cut a custom-tailored hole in the ozone layer over an adversary's land; and even modifying weather.

Lester Brown, of the Worldwatch Institute, a leading environmental think tank in Washington, D.C., pointed out as far back as 1977 that "deliberate attempts to alter the climate are becoming increasingly common," raising the prospect of "meteorological warfare as countries that are hard-pressed to expand food supplies begin to compete for available rainfall." It has turned out to be extremely difficult, so far, to produce even small-scale changes in weather. But that has not stopped speculation about very large-scale changes, indeed. Discussions of global warming are conjuring up horrific images of rising shorelines around the world as polar icecaps melt. But few today remember the breathtaking plan to thaw the Arctic Ocean that was reputedly put forward by Lenin shortly after the Russian Revolution.

Russia's historic strategic problem was the lack of a

https://twitter.com/_/status/1080614874344914944

@CalgaryPatty Metabunk isn't dedicated to 9/11, that's just one sub-forum.

Again though, I'm not claiming any particular authority, or expertise (expect for some practical knowledge of computers, physics, and flying.)

I don't just claim stuff it to be true, I want people to check.

http://pbs.twimg.com/media/Dv41tDiU8AANT-l.jpg

2019-01-02T06:53:55+00:00

https://twitter.com/_/status/1080356495982714880

@cuisineillum Do you have a link to info on the Chicago fire conspiracies? I'm interested. And here we are talking about the 1910 "Big Burn" fire. Are there suggestions that was deliberately set? Any evidence? There were over 1,000 fires as part of that complex.

https://en.wikipedia.org/wiki/Great_Fire_of_1910

2019-01-02T06:06:15+00:00

https://twitter.com/_/status/1080344499778404352

@cuisineillum Well sure, things were corrupt up the wazoo back then. But that does not mean the fires were intentional. Even if they were set there was no way of predicting or controlling them. They barely had telegraph service in those areas.

2019-01-02T05:50:43+00:00

https://twitter.com/_/status/1080340593706885120

@cuisineillum How exactly did the 1910 fire help the railroads? And how did they engineer all that dry weather, lightning, and high winds in 1910 - just seven years after the invention of powered flight.

2019-01-02T04:57:37+00:00

https://twitter.com/_/status/1080327227705778177

@TlohJ @davidconstable6 @cynthiamckinney No steel was found melted.

2019-01-02T04:56:01+00:00

https://twitter.com/_/status/1080326824024928256

@cuisineillum Iâ□□ve looked into it. Iâ□□ve read the Big Burn book and some of the source documents. Iâ□□m going to buy a Pulaski. It was just lightning sparking 1,000+ fire in hot dry windy conditions.

2019-01-02T01:17:10+00:00

https://twitter.com/_/status/1080271752020652033

@cuisineillum You think the 1910 Big Burn was deliberate? How would that even work? It was a perfect storm and weather and trees, almost entirely in untouched natural forest.

2019-01-02T01:14:39+00:00

https://twitter.com/_/status/1080271117770608640

@TlohJ @davidconstable6 @cynthiamckinney Passports are made of strong paper, like currency (dollar bills). They can't withstand fire, but they are very light and can survive an explosion by being blow out of the way. Paper is often recovered after plane crashes.

2019-01-02T00:18:31+00:00

https://twitter.com/_/status/1080256989379190784

@pyrescene @CphilpottCraig And 9/11 was certainly exploited as a pretext for war and domestic spying, but I don't think it was a deliberate false flag. The WMD spin was probably the closest thing there, similar to Tonkin in some ways.

2019-01-02T00:16:44+00:00

https://twitter.com/_/status/1080256542635524096

@pyrescene @CphilpottCraig Northwoods is one of the thousand reasons given do why "they" had JFK killed. Not a compelling one though, as it was long past and irrelevant after the Cuban missile crisis.

2019-01-01T21:26:55+00:00

https://twitter.com/_/status/1080213808096792576

@FlatSlugbrains @NickSoutter @inflatearth @bikinatroll @PeterValdo @jameswzegan85 @idebunkforme @d_deejay187 @CallMeEOnly @RegratNothing @doctorbuttons @LaikaAndYuri Because at night you can only see the results of one path of light - from one point (the laser). If you do it in daylight you get all of them, and you get an inarguable image, rather than some random flash of light.

Every pixel in this image represents a ray of light.

https://twitter.com/_/status/1080166995838959616

@CphilpottCraig It's not an unnatural thing. It's usually the result of normal tendencies and

biases that we all have, combined with being exposed to compelling one-sided info (usually YouTube nowadays) at a vulnerable point in their lives.

2019-01-01T18:18:29+00:00

https://twitter.com/_/status/1080166386545000448

@Diamond30802384 @drewblevins77 I'm open to possibilities. What I debunk are the incorrect claims of evidence. Like "contrails can't persist" or "aluminum should not be in soil." i.e. bunk.

2019-01-01T17:52:09+00:00

https://twitter.com/_/status/1080159758068273152

@Diamond30802384 @drewblevins77 Then what evidence do you have that they are doing it? Just a feeling?

2019-01-01T17:50:52+00:00

https://twitter.com/_/status/1080159433647218694

@JesusResurrect1 Not really. We went to the Moon. The NASA footage is all real.

2019-01-01T16:01:47+00:00

https://twitter.com/_/status/1080131984112857088

@TlohJ @drewblevins77 It temporarily modifies a cloud in a relatively small area. Cloud seeding is commonly refered to as "weather modification". Usually done by local water authorities. SMUD in these parts.

2019-01-01T15:58:20+00:00

https://twitter.com/_/status/1080131115820539904

@TlohJ @drewblevins77 Cloud seeding has been around since the 1950s. Never a secret. Still commonly used, especially in the US West.

2019-01-01T15:56:31+00:00

https://twitter.com/_/status/1080130656678469632

@Stephen37722821 @UfoSunday Which guys?

2019-01-01T14:59:10+00:00

https://twitter.com/_/status/1080116224032354306

@TlohJ @drewblevins77 How about those patents for teleportation devices and perpetual motion machines?

How about that patent for a birthing device that involves strapping a pregnant woman to a table and spinning it around until the baby pops out into a net?

Patents don't mean something works.

2019-01-01T14:49:59+00:00

https://twitter.com/_/status/1080113914921115648

@TlohJ @drewblevins77 I know that there's no good evidence that they are.
I know that the trails people point at look and act exactly like contrails.
I know that all public research on Geoengineering indicates we are not ready for deployment.
I know http://GeoengineeringWatch.org is full of false claims.

2019-01-01T14:36:33+00:00

https://twitter.com/_/status/1080110534731550722

@drewblevins77 It was never in dispute that scientists have been studying the POSSIBILITY of geoengineering, for decades.

Where we get into conspiracy theory is with the idea that it's already going on. People point at contrails and call them "chemtrails."

2019-01-01T14:32:28+00:00

https://twitter.com/_/status/1080109504610545666

Discovered a conspiracy theory that (seriously) says QAnon is an incorporeal angelic reincarnation of JFK using Pleiadian technology to prepare the world for a wave of light with Trump via info drops on 4Chan.

I think I might need to extend the conspiracy spectrum to 11.

2019-01-01T05:09:56+00:00

https://twitter.com/_/status/1079967940089278464

@fullbredmartian @TlohJ @debunker Not really. Why donâ□□t you try experimenting with a old passport. Challenge your preconceptions.

2019-01-01T01:48:19+00:00

https://twitter.com/_/status/1079917200754917377

@CalebOnTwatter Sure!

2018-12-31T23:34:52+00:00

https://twitter.com/_/status/1079883616564342784

Friendly chat with Flat Earth Debunker "Soundly," covering a variety of conspiracy topics, and the differences between our approaches. Also Neversoft and Tony Hawk's Pro Skater!

https://www.youtube.com/watch?v=60_ewflnl5o

2018-12-31T21:43:41+00:00

https://twitter.com/_/status/1079855639021539328

@TlohJ @falseflagjerry I don't think it's an illness. In fact I think it's perfectly normal.

2018-12-31T21:42:47+00:00

https://twitter.com/_/status/1079855411941916672

@TlohJ @Prophecy_106 I only "deny" theories that I think (after investigating) are wrong. I certainly don't want to make people look bad, but unfortunately it's hard to do when pointing our errors. That's the sort of communication issue I discuss in the book.

2018-12-31T19:33:31+00:00

https://twitter.com/_/status/1079822882438504449

@ToGtmo The patents are real enough. That does not mean they are bing used, or that they work. There are lots of patents for manned travel to Mars and houses on the moon, even teleportation. It just means there's a patent.

2018-12-31T19:10:20+00:00

https://twitter.com/_/status/1079817046584582144

@ToGtmo Who is pretending they don't exist? I've written about patents many times, investigated many of them, and there's several pages in my book about them. https://www.metabunk.org/debunked-patents-as-evidence-of-chemtrails-geoengineering-existence-operability-or-intent.t3704/

2018-12-31T19:09:03+00:00

https://twitter.com/_/status/1079816722461249536

@TlohJ @debunker They are wider than the average runway, and pilots seem to manage landing on those just fine, dead center too, unlike the towers.

Try it in a simulator. I have. It's incredibly hard to miss.

2018-12-31T18:47:47+00:00

https://twitter.com/_/status/1079811371825389570

@ToGtmo What do your eyes tell you about contrails in the 1950s?

2018-12-31T17:18:41+00:00

https://twitter.com/_/status/1079788949516705793

@paul_sailer Excellent! Let me know what you think of it.

2018-12-31T16:42:31+00:00

https://twitter.com/_/status/1079779847415549953

@debunker Didn't melt. :)

2018-12-31T16:30:15+00:00

https://twitter.com/_/status/1079776758805651456

@kanuchronicles I'd ask them about the 70 years of books on clouds that all say contrails can persist and spread.

2018-12-31T16:15:50+00:00

https://twitter.com/_/status/1079773131177250817

Wallace Idaho, 1910. The "Big Burn" swept through town destroying nearly all the buildings. Curiously it did this without burning the trees on the hillside, the wooden sidewalks, or the telegraph poles! Was this 1910 fire started with lasers as part of UN Agenda 21? http://pbs.twimg.com/media/DvwflAeV4AU-WNS.jpg

Aerodynamic formation of condensation trails

Klaus Gierens, Bernd Kärcher,
Hermann Mannstein, Bernhard Mayer

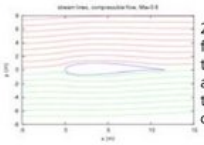
Institut
für
Physik der
Atmosphäre

DLR

Introduction

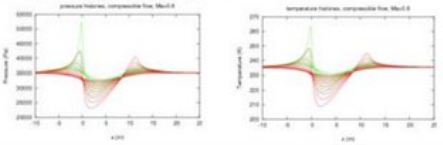
Photographs taken by pilot Jeff Well out of his cockpit show that condensation sometimes starts right above the wings of cruising aircraft. This demonstrates the existence of contrails different from the well studied jet exhaust contrails.
The present study is a first investigation of the conditions that lead to the appearance of aerodynamic contrails. Studies of aerodynamic contrails require interdisciplinary research on compressible gas flow over airfoils, ice and aerosol microphysics, and optics of ice crystals, such as presented on this poster.

Aerodynamics

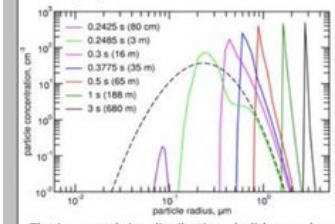


2-dimensional potential flow field (compressible flow) around a Joukowski airfoil, calculated with the method of singularities. Effective angle of attack: 1°. Mach number: 0.8. The dimensions of the aerofoil are typical of a wide-body aircraft close to the fuselage.

Calculation of pressure and temperature along streamlines with generalised Bernoulli equation. $p_\infty = 350$ hPa, $T_\infty = 235$ K.



Microphysics

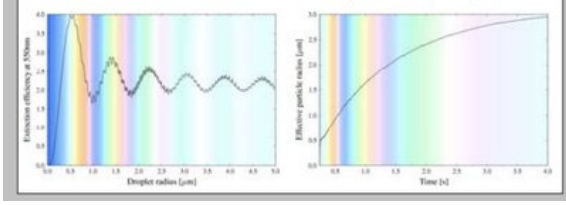


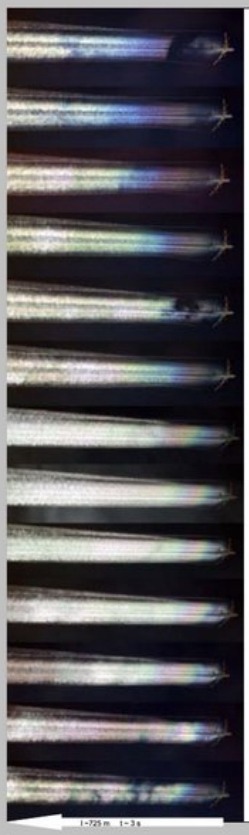
The figure shows results of microphysical calculations using a comprehensive gas-aerosol-ice trajectory model. Water condensation on liquid aerosol droplets, ice nucleation, and depositional growth of the ice crystals have been simulated, driven by one of the T- and p-trajectories close to the wing as shown above. The legend denotes distances behind the leading wing edge and times.

The ice crystal size distributions (solid curves) are generated from homogeneous freezing of liquid aerosol droplets (dashed). The smallest droplets freeze first, followed by freezing of larger droplets, until all available aerosol particles are depleted. Nucleation is finished as the air parcel moves across the wing (after ~16 m). In the subsequent growth phase in highly supersaturated air (RHI=140%), mean crystal sizes increase to ~2.8 µm after ~680 m.

Optics

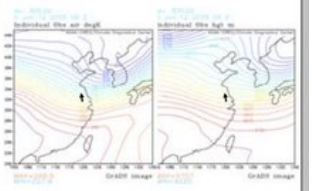
Mie theory was used to calculate optical properties from the size distributions, assuming spherical ice particles. Spectral radiance was calculated in single-scattering approximation and converted to colour. For a mono-disperse distribution, the colour changes with the effective radius, due to the wavelength-dependence of the scattering efficiency (left image). The right image shows the colours for the actual size distributions which nicely match the photograph.





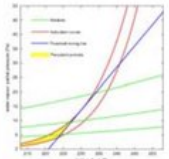
On June 12 2005 from 14:59 to 15:06 Bejing time (~07:00 UTC) pilot and photographer Jeff Well took a series of 45 photos of an exceptionally colourful iridescent contrail produced by an A340-313X aircraft in 9600 m altitude, just 1200 m higher as his position on the same route over eastern China. Both aircraft were heading to North-West (329°) from 32° 14.8′ N, 119° 46.7′ E to 32° 56.8′ N, 119° 10.1′ E.

From NCEP reanalysis data we estimate a temperature of -40 °C, the aircraft altitude is close to the 300 hPa pressure level shown below.



The series of photos on the left shows the development of contrails that cannot be explained by the Schmidt-Appleman criterion. Jet contrails produced from the mixing of exhaust gases with the ambient air would show up as 4 separate lines and start later. The onset of the aerodynamic contrails occurs directly above the wings and is stronger close to the body of the aircraft. Thin vortex lines originate from the wing tips and get mixed into the wake vortices

Conclusions, outlook, open questions



The aerodynamic formation of condensation trails is independent of the Schmidt-Appleman criterion. Aerodynamic contrails can appear and persist whenever the ambient air is ice-supersaturated. The adiabatic cooling in the flow leads to higher supersaturation the warmer and moister is the air. To produce a visible aerodynamic contrail, the numerous ice crystals must grow sufficiently rapid, requiring warm temperatures.

Photographs demonstrate that the effect occurs preferentially on the inner parts of the wings where lift is largest. Hence, aerodynamic contrails may become more relevant for a potential future fleet of blended wing-body aircraft with their large wing depths.

Future work will investigate the properties of the small ice crystals produced in the adiabatic air flow over wings of airliners, the impact of ambient conditions and background aerosol properties on aerodynamic contrail formation and evolution, and how common this process occurs relative to the formation of jet contrails.

Acknowledgement

The photographs shown here are all taken by pilot Jeff Well. We thank him for allowing us to use them and for having kept his eyes open not only for the instruments in his cockpit but also for the beauty of optical phenomena. Many other photographs of aerodynamic contrails can be found on www.airliners.net.

https://twitter.com/_/status/1079518144455012352
@VartanianAlbert @Zacharronni Thereâ□□s lots of research into those question.

2018-12-30T21:03:55+00:00
https://twitter.com/_/status/1079483240837132289
@Zacharronni Contrails are a type of cloud. So it has EVERYTHING to do with clouds.
Do clouds instantly vanish? No. So why would contrails always instantly vanish?
Do clouds form at all altitudes simultaneously? No. So why would contrails act the same at every altitude?

2018-12-30T17:25:55+00:00
https://twitter.com/_/status/1079428379508584449
@Zacharronni Or, more likely, one plane is a bit higher than the other, in a different layer of the atmosphere.

The question is essentially the same as "why are there clouds at one altitude but not at another" or, more to the point, "why are clouds in layers"

Practice notes

Geraint has been a partner since 2003. He specialises in Retail Finance.

Geraint's particular expertise is in Consumer Credit, Mortgage Regulation and savings/deposit products. Geraint has settled standard documents under FCA, CCA and other regimes for clients such as HSBC, Barclays, Ikano, Lloyds Banking Group, Nationwide, Morgan Stanley, Aldermore Bank, Aviva, Principality Building Society and others. Product experience includes first and second charge residential mortgages, buy to let and commercial mortgages, lifetime mortgages, home reversion plans, unsecured loans, credit and store cards and savings products.

He also advises on sale and purchases of loan portfolios and securitisations.

Brexit

The impact of Brexit will not be the same for all businesses. Our Brexit lawyers are working with a number of clients to help them with Brexit planning. We are helping them take steps to put themselves in the best possible position. For some clients, we have analysed the implications of Brexit on their business based on the different potential models of Brexit. We would be happy to discuss the potential implications of Brexit for your business too.

Contact Geraint for more information on how Brexit may affect your business.

View our Brexit hub for our full range of Brexit resources.

http://pbs.twimg.com/media/DujZXBLU8AAd6Wo.jpg

LEVELLING.

Plate XIII. fig. 2.

LEVELLING is the art of ascertaining the perpendicular ascent or descent of one place (or more) above or below the horizontal level of another, for various intentions; and of marking out courses for the conveyance of water, &c.

The *true level* is a curve conforming to the surface of the earth; as ABG.

The *apparent level* is a tangent to that curve; as ADE.

http://pbs.twimg.com/media/DujZXBGUYAErUub.jpg

LIBRARY OF THE UNIVERSITY OF CALIFORNIA

CHAPTER VIII.

LEVELING.

Two or more points are said to be on a level, when they are equally distant from the center of the earth, or when they are equally distant from a tranquil fluid, situated immediately below them. A level surface on the earth, is nearly spherical, *and is not a plane;* it is everywhere *perpendicular to a plumb line.*

Any small portion of a true level surface, cannot be distinguished from a plane; and, therefore, when observations are taken in respect to level, within short distances of each other, the spherical form of the earth is disregarded, and the level treated as a plane. But when any considerable portion of surface is taken into account, the curvature of the earth's surface must be considered.

The apparent level, at any point on the earth, is a tangent plane, touching the earth at that point only, and the true level is below this, and the distance below, depends on the distance from the tangent point.

http://pbs.twimg.com/media/DujZXBNU0AEuM0d.jpg

https://twitter.com/_/status/1073392759401115649
@BlagenLogin @BlueEarthThing @maxheadroom1983 @ItsFlatFolks Like with Sussex Heights though, it's not entirely clear if the floors are all the same height, but you can see the change before the change in balcony type.

2018-12-14T01:38:52+00:00

https://twitter.com/_/status/1073391840911478784

@BlagenLogin @BlueEarthThing @maxheadroom1983 @ItsFlatFolks Here's the source image.

http://pbs.twimg.com/media/DuV0IqOV4AAYWVP.jpg

http://pbs.twimg.com/media/DuV0IqOV4AAYWVP.jpg

2018-12-14T01:38:22+00:00

https://twitter.com/_/status/1073391716009275392

@BlagenLogin @BlueEarthThing @maxheadroom1983 @ItsFlatFolks The other building is a bit better. Here are exactly spaced lines, you can see it's a near perfect match for the top 6 floors, then you start the see the compression below that.

http://pbs.twimg.com/media/DuV0Cf2UcAA1L1A.jpg

http://pbs.twimg.com/media/DuV0Cf2UcAA1L1A.jpg

2018-12-14T01:13:05+00:00

https://twitter.com/_/status/1073385355535998976

@BlagenLogin @BlueEarthThing @maxheadroom1983 @ItsFlatFolks It does. Just hard to see that that resolution.

2018-12-13T21:27:35+00:00

https://twitter.com/_/status/1073328604170186752

@BlagenLogin @BlueEarthThing @maxheadroom1983 @ItsFlatFolks It's correct in the raytracing sim though. https://www.metabunk.org/mirage/

2018-12-13T21:25:40+00:00

https://twitter.com/_/status/1073328122617974785

@BlagenLogin @BlueEarthThing @maxheadroom1983 @ItsFlatFolks Oops, I'd doubled it in GE by linking the path back to the start. But same thing, 50,000 feet vs. 22 feet.

2018-12-13T21:20:33+00:00

https://twitter.com/_/status/1073326834945642496

@BlagenLogin @BlueEarthThing @maxheadroom1983 @ItsFlatFolks I'm not really sure what your point is. I was demonstrating the presence of downward refraction in the image. The 22 feet elevation in the GE recreation does not affect that aspect.

For "hidden" height, you have to measure everything relative to actual water level.

2018-12-13T20:16:31+00:00

https://twitter.com/_/status/1073310722086494208

@BlagenLogin @BlueEarthThing @maxheadroom1983 @ItsFlatFolks Yes, 22 feet. But that does not make a measurable difference to images taken 100,000 feet away (19.2 miles). The angles are all basically the same.

2018-12-13T20:03:05+00:00

https://twitter.com/_/status/1073307339288018946

@climateviewer @PaulFox13 @lbox327 @franklyteran @GeoeWatchDebunk @DRSingletary2 @ctfallen @wanderinganimal @DanPeacock12 @RaeVasho @AzSkyWatcher @JFlemingHistory @deplorable_pooh @WeatheredHype @weezmgk @faketonysewell @Er_Nope @naomirwolf @ETC_Group Photo is not of chaff. It's just flares. Chaff does not leave trails, it's basically invisible (except to radar).

2018-12-13T19:52:49+00:00

https://twitter.com/_/status/1073304754141376512

@BlagenLogin @BlueEarthThing @maxheadroom1983 @ItsFlatFolks And the issue he really seems to gloss over there is the fact that the horizon obscures some of the distant shore. Which means that's there's a curve.

2018-12-13T19:51:46+00:00

https://twitter.com/_/status/1073304493045895168

@BlagenLogin @BlueEarthThing @maxheadroom1983 @ItsFlatFolks It's there though. https://www.metabunk.org/observations-of-brighton-from-worthington-pier.t10259/

Abstract. The uptake of water by contrails in ice-supersaturated air and the release of water after ice particle advection and sedimentation dehydrates the atmosphere at flight levels and redistributes humidity mainly to lower levels. The dehydration is investigated by coupling a plume-scale contrail model with a global aerosol–climate model. The contrail model simulates all the individual contrails forming from global air traffic for meteorological conditions as defined by the climate model. The computed contrail cirrus properties compare reasonably with theoretical concepts and observations. The mass of water in aged contrails may exceed 10^6 times the mass of water emitted from aircraft. Many of the ice particles sediment and release water in the troposphere, on average 700 m below the mean flight levels. Simulations with and without coupling are compared. The drying at contrail levels causes thinner and longer-lived contrails with about 15 % reduced contrail radiative forcing (RF). The reduced RF from contrails is on the order of 0.06 W m^{-2}, slightly larger than estimated earlier because of higher soot emissions. For normal traffic, the RF from dehydration is small compared to interannual variability. A case with emissions increased by 100 times is used to overcome statistical uncertainty. The contrails impact the entire hydrological cycle in the atmosphere by reducing the total water column and the cover by high- and low-level clouds. For normal traffic, the dehydration changes contrail RF by positive shortwave and negative longwave contributions on the order of 0.04 W m^{-2}, with a small negative net RF. The total net RF from contrails and dehydration remains within the range of previous estimates.

1 Introduction

Contrail ice particles grow by the uptake of humidity from ambient ice-supersaturated air masses and release their water content after sedimentation or advection with the wind into regions with lower relative humidity. Knollenberg (1972) derived the ice mass inventory in a contrail for a single aircraft from measurements and found that the water present as ice in the contrail exceeds that in the original aircraft exhaust by at least 4 orders of magnitude. Hence, contrails dry or dehydrate the atmosphere at places where they form, and redistribute humidity to places in the atmosphere where they sublimate (Fahey and Schumann, 1999). Small relative changes of humidity in the troposphere and small absolute changes in the tropopause region have large effects on radiative forcing (Riese et al., 2012). Ice is far more efficient in radiative forcing than water vapor (Meerkötter et al., 1999; Chen et al., 2000; Fusina et al., 2007; Wilcox et al., 2012). The redistribution of humidity may make contrails thinner. In regions with heavy air traffic, contrail cirrus persistence can modify or even suppress natural cirrus formation (Unterstrasser, 2014), with consequences for radiative forcing (Burkhardt and Kärcher, 2011). Falling ice particles may enhance precipitation from mixed-phase or warm clouds at lower altitudes by increasing humidity and thus the liquid water content or by the Wegener–Findeisen–Bergeron process, both of which are thought to increase the likelihood of precipitation (Murcray, 1970; Korolev and Mazin, 2003; Yun and Penner, 2012). Dehydration from contrails may follow similar processes as dehydration by thin cirrus at the tropical tropopause (Jensen et al., 1996; Fueglistaler et al., 2009).

Contrails have been investigated in many observational and numerical studies (Schumann, 2002; Mannstein and

@climateviewer @Kal1_Furies @BayleeB79 @Adolftwittler8 @SteerMark @OpChemtrails @trishadishes2 @RealGeoEngWatch I think it's open to misinterpretation. The dehydration is at contrail level. "Many of the ice particles sediment and release water in the troposphere, on average 700 m below the mean flight levels." Moving some water a bit lower down, not "drying the sky"

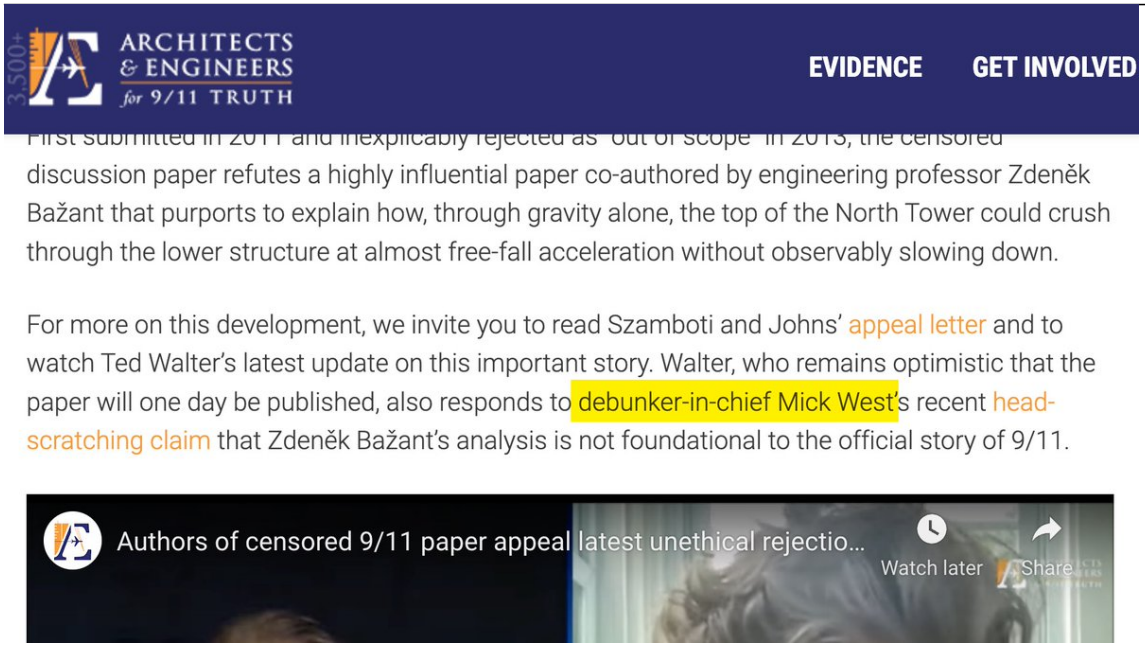
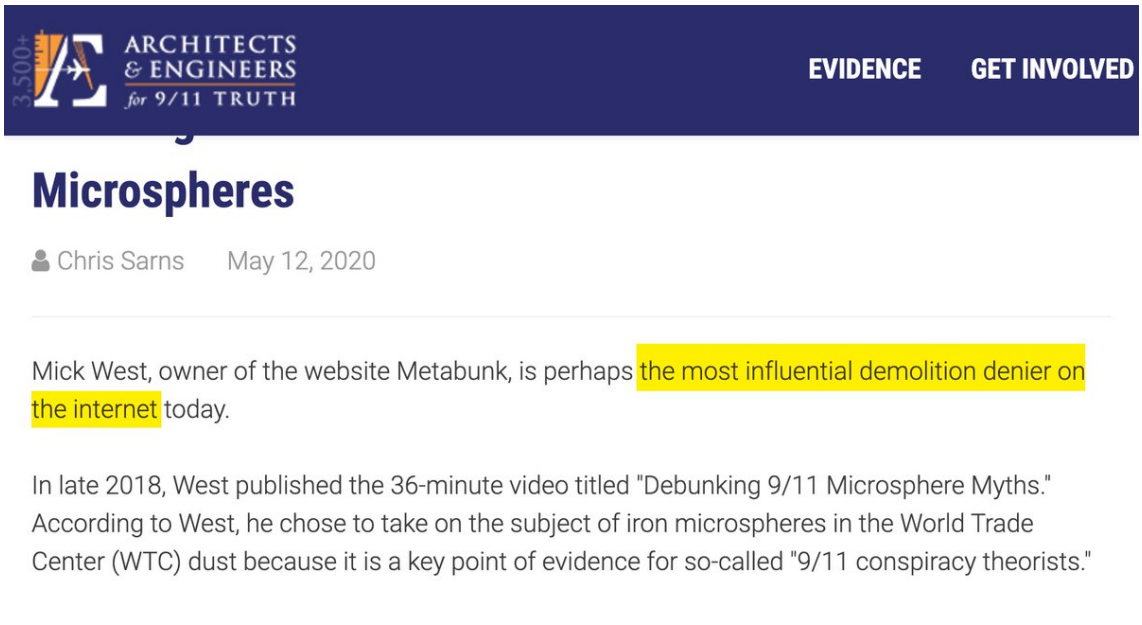
AE911"Truth" calls me "the most influential demolition denier on the internet", "the Pope of demolition denial", and "debunker-in-chief."

They mean well, but if I can push their buttons so easily then perhaps their theories are not as

rock solid as they think. http://pbs.twimg.com/media/FVaMal4UUAALvwZ.jpg



http://pbs.twimg.com/media/FVaMal4UUAALvwZ.jpg



http://pbs.twimg.com/media/FVaMZvXUEAAykBp.jpg

But back to Weinberg's conundrum: Even more important to demolition deniers than their newfound ability to claim *one* fire-induced collapse is the severe damage that would be done to their ideology if they had to accept the Plasco incident as a demolition.

Perhaps a few demolition deniers saw the videos of explosions shooting out of the Plasco Building and thought to themselves, "Hmm, maybe this one *was* demolished." But, if they did, they kept quiet and decided not to go against the orthodoxy being written by people like the Pope of Demolition Denial, Mick West. The very same day we released our initial statement, West published the article "AE911Truth Forced to Claim Plasco Collapse is an Inside Job." A rational person would be able to separate the World Trade Center from the Plasco incident, but apparently demolition deniers saw Plasco as a threat to their ideology and couldn't entertain the possibility that it was a controlled demolition.

https://twitter.com/_/status/1537554403678269440

@mcbosies @blackvaultcom @dave_beaty My position on what exactly? There are lots of things out there. Scott Bray supports my position on bokeh (but that's about it). But unfortunately qualified people don't like to talk about classified stuff.

2022-06-16T21:45:16+00:00

https://twitter.com/_/status/1537551910898528256

@blackvaultcom @dave_beaty I agree it's weird. But the audio seems like SNOOPIE though they were filming drones. I'd take that as an honest mistake that then got propagated up to the UAPTF (and whatever drone task force) because nobody thought to question it.

Until: @Dylan_DTV

https://twitter.com/Dylan_DTV/status/1382067585059999744

2022-06-16T21:40:43+00:00

https://twitter.com/_/status/1537550765132161024

@Channa_Sr I agree it makes little sense, and yet here are these videos where the team leader is talking about drones while filming stars.

2022-06-16T21:09:36+00:00

https://twitter.com/_/status/1537542934177849344

@blackvaultcom The 1704 video. See:

https://twitter.com/MickWest/status/1537542576919568384

Hard to see all the stars in stills, but you can see them when scrubbing the video.

2022-06-16T21:08:11+00:00

https://twitter.com/_/status/1537542576919568384

In the longer, official, Green UAP video, there are SEVEN identifiable stars at the end.

In the (official) 1704 video we see four of those stars.

The SNOOPIE team leader on the Russell seems to think they are drones.

What's going on? http://pbs.twimg.com/media/FVZyMPJUAAEWJEh.jpg

https://twitter.com/_/status/1537526062103797760

@MiddleOfMayhem @blackvaultcom So do you think they had a specific unacknowledged reason for releasing a video of stars and implying it's a video of drones?

2022-06-16T20:00:30+00:00

https://twitter.com/_/status/1537525545860141056

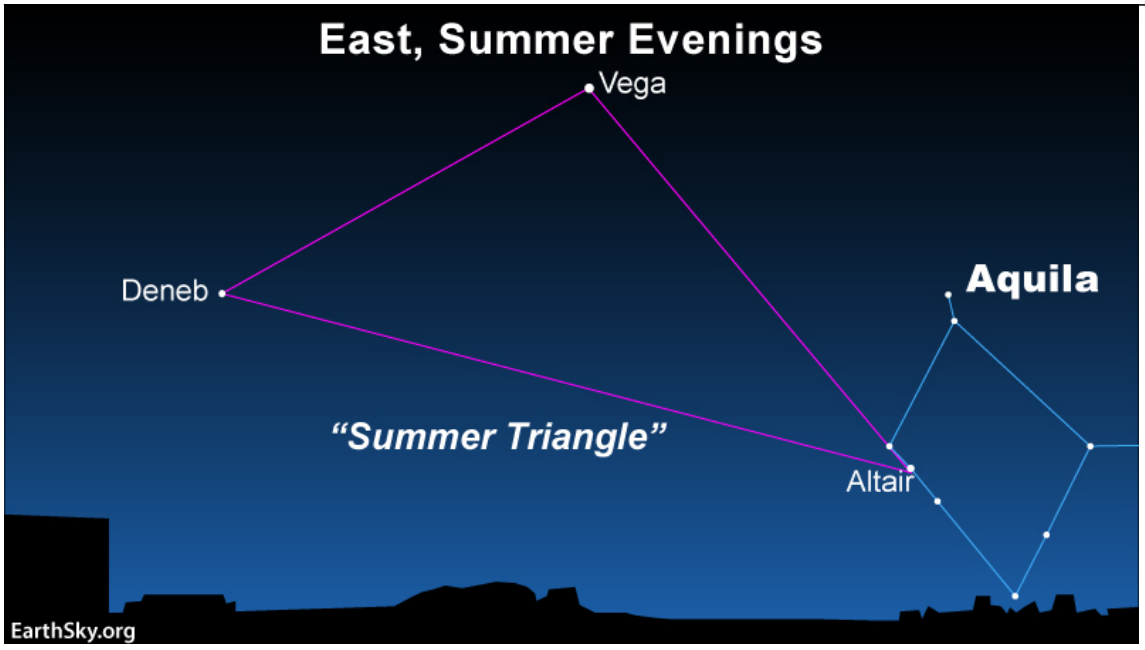
@drugbunnytwit That's a bug. The white things are mostly seeds.

2022-06-16T19:55:48+00:00

https://twitter.com/_/status/1537524362278219776

@BriarRichard1 @Travis_Tritten A different constellation. It's Altair and two minor stars.

http://pbs.twimg.com/media/FVZiKvMUsAAKjeu.jpg



http://pbs.twimg.com/media/FVZiKvMUsAAKjeu.jpg

2022-06-16T19:53:22+00:00

https://twitter.com/_/status/1537523751650091008

@UAPorSAP @RiotSeeds @de_varse @blackvaultcom Of course, it's possible. But it would be ridiculously blatant.

If they are competent then they would realize that the fact that video shows stars would be pointed out soon after the release.

So what is the ruse? Pretending to be terrible at spotting drones?

2022-06-16T19:51:42+00:00

https://twitter.com/_/status/1537523330336452608

@BrentlyLee @6diego32 @the_cholla @moranlerner @DavidFieldSculp @Spectre67904513 @bradjohansson21 @DavidJayB @BrainwashSyka @MiddleOfMayhem @michiokaku Dietrich has said, both in her original 7 sept 2017 "Source" interview, and in 2021 Tweets, that the 8-10 second was from Merge Plot. Fravor says the 5 minutes was from Merge Plot.

This has never been adequately explained. http://pbs.twimg.com/media/FVZgxm0VIAApsxT.jpg

---

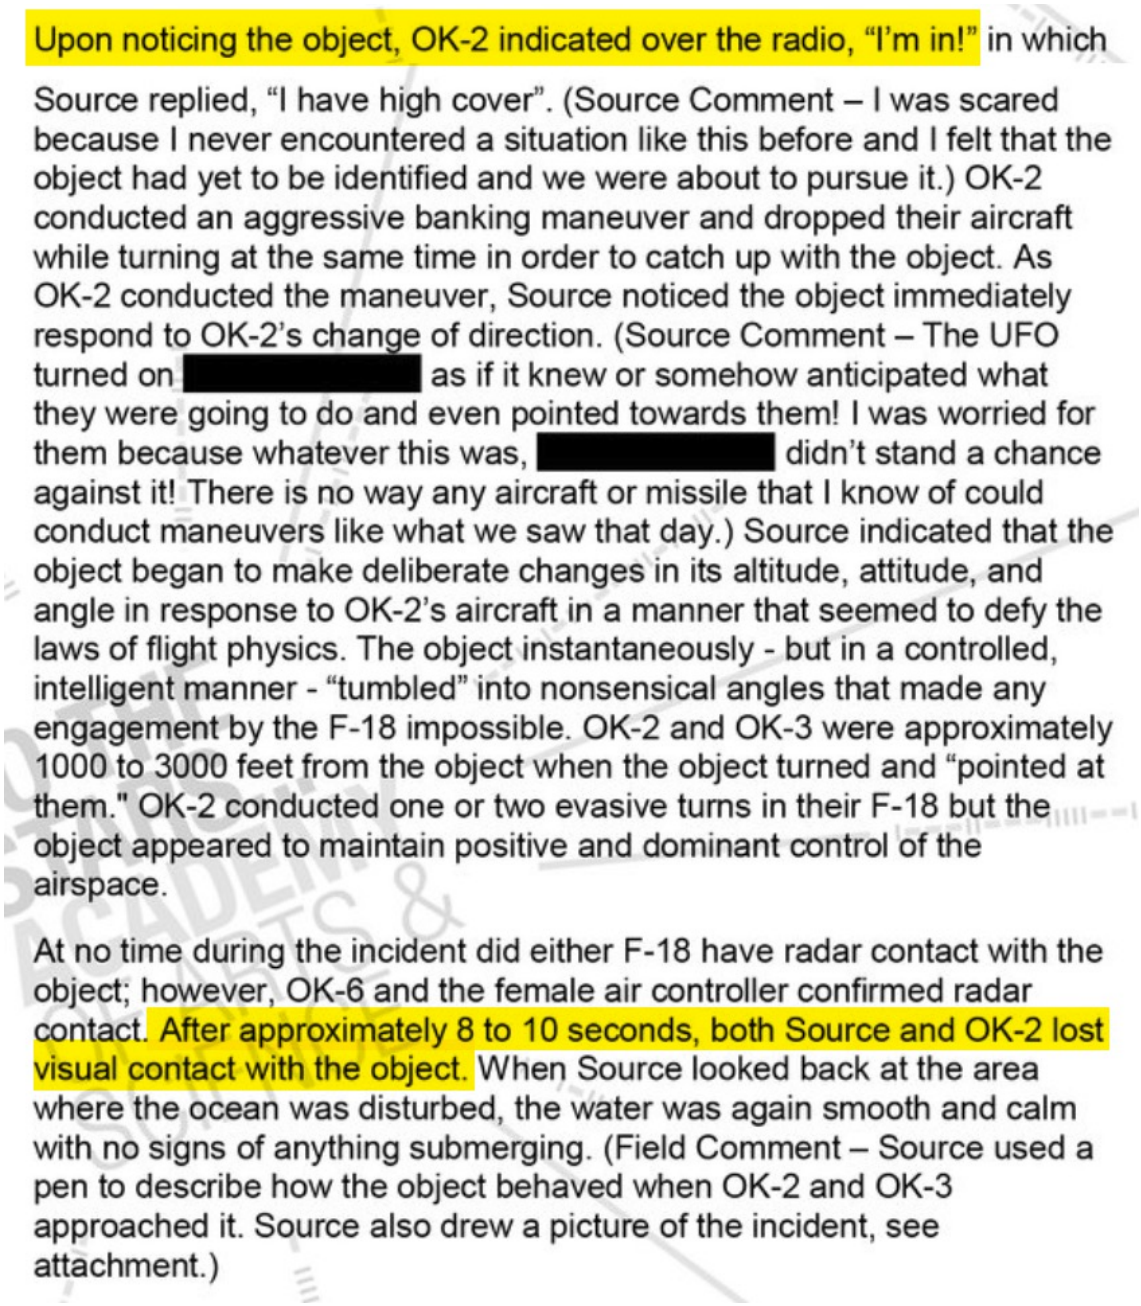
http://pbs.twimg.com/media/FVZgxm0VIAApsxT.jpg

controller began to count down the anticipated intercept time, “Two minutes to merge plot,” etc. Finally, the female controller indicated "merge plot" and announced, “You should have visual.”

As Source looked down at the ocean from the cockpit, they noticed a small patch of water, approximately 60 feet wide by 80 feet in length that appeared choppy and turbulent amongst a calm sea. The disturbance was unusual in that there was no apparent cause. The area was generally the shape of an oval and appeared to be “roiling". Towards the center of the disturbance, the water appeared lighter color and smooth again as if an unknown object had recently submerged beneath the surface. Source opined they thought they were witnessing a crash, perhaps that of an unidentified aircraft, as they made the mental transition from intercept mission to search and rescue.

Approximately two seconds after noticing the unusual water disturbance, Source described witnessing a small, unidentified aerial system (UAS) cross over the turbulent area of water. The unidentified object was elongated, approximately 30 to 40 feet in length, white in color, and described resembling a “tic-tac” candy mint. The object had no distinguishable control surfaces, was uniformly smooth, with no windows, doors, or lights visible. The object was opaque with a solid, definable edge. The object did not appear to emit any noticeable light or radiation from its surface nor did it have any noticeable exhaust trail. The object traveled from left to right over the disturbed water at an altitude of approximately 1000 to 3000 feet. The object appeared to travel at a speed of approximately 300 to 500 knots in a straight line. Source was unaware of the origin of the object or its destination but believed the disturbed water below could have been related in some way to the object. Source immediately became alarmed and initially thought that perhaps this was an unannounced, classified missile test by a U.S. Navy submarine. As such, they were concerned that the object could pose a threat, especially given the fact both F-18s were unarmed.

http://pbs.twimg.com/media/FVZgKoLVIAEUoqE.jpg



Upon noticing the object, OK-2 indicated over the radio, “I’m in!” in which Source replied, “I have high cover”. (Source Comment – I was scared because I never encountered a situation like this before and I felt that the object had yet to be identified and we were about to pursue it.) OK-2 conducted an aggressive banking maneuver and dropped their aircraft while turning at the same time in order to catch up with the object. As OK-2 conducted the maneuver, Source noticed the object immediately respond to OK-2’s change of direction. (Source Comment – The UFO turned on [redacted] as if it knew or somehow anticipated what they were going to do and even pointed towards them! I was worried for them because whatever this was, [redacted] didn’t stand a chance against it! There is no way any aircraft or missile that I know of could conduct maneuvers like what we saw that day.) Source indicated that the object began to make deliberate changes in its altitude, attitude, and angle in response to OK-2’s aircraft in a manner that seemed to defy the laws of flight physics. The object instantaneously - but in a controlled, intelligent manner - “tumbled” into nonsensical angles that made any engagement by the F-18 impossible. OK-2 and OK-3 were approximately 1000 to 3000 feet from the object when the object turned and “pointed at them." OK-2 conducted one or two evasive turns in their F-18 but the object appeared to maintain positive and dominant control of the airspace.

At no time during the incident did either F-18 have radar contact with the object; however, OK-6 and the female air controller confirmed radar contact. After approximately 8 to 10 seconds, both Source and OK-2 lost visual contact with the object. When Source looked back at the area where the ocean was disturbed, the water was again smooth and calm with no signs of anything submerging. (Field Comment – Source used a pen to describe how the object behaved when OK-2 and OK-3 approached it. Source also drew a picture of the incident, see attachment.)

2022-06-15T22:58:21+00:00

https://twitter.com/_/status/1537207915789963264

@BostonsBuddha @MiddleOfMayhem Flickering stars, like sirius https://twitter.com/MickWest/status/1487660534124011523

2022-06-15T22:48:18+00:00

https://twitter.com/_/status/1537205385483808768

@BostonsBuddha @MiddleOfMayhem Which? The one that looks like a flickering star, or the one that looks like a plane?

2022-06-15T22:31:23+00:00

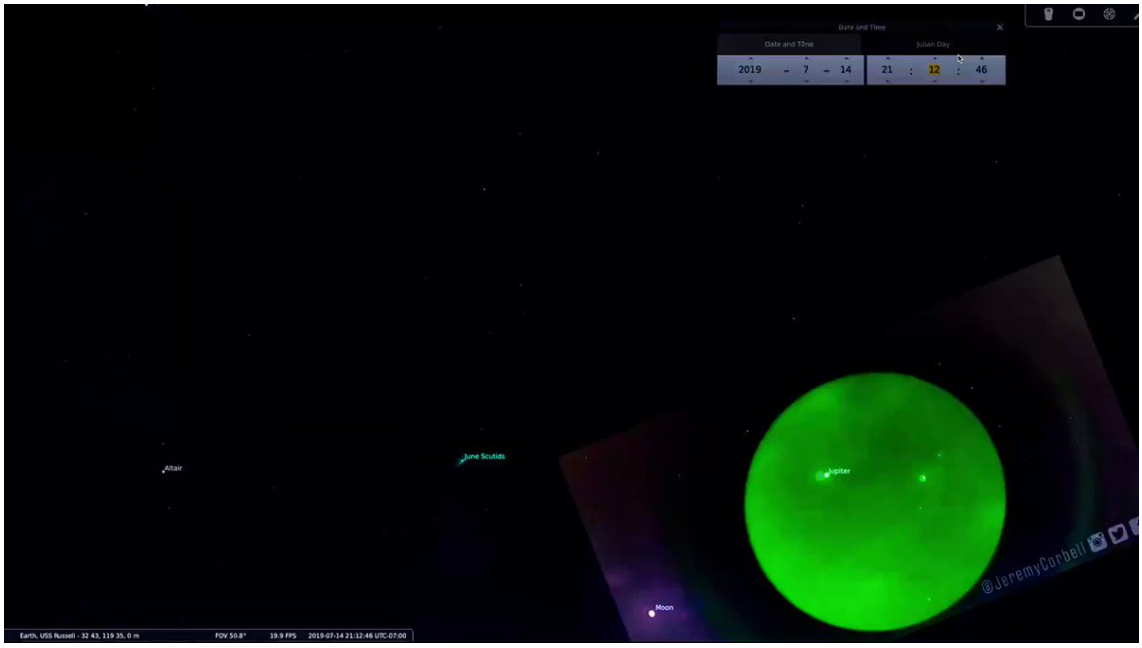
https://twitter.com/_/status/1537201128470761472

@BostonsBuddha @MiddleOfMayhem With reference to each other. That's how it works.

Tarazed and Altair had already been identified with references starting back to Jupiter. The other two just fit perfect.

http://pbs.twimg.com/ext_tw_video_thumb/1537201063949807616/pu/img/HZ3C14vgTFL7lrUy.jpg

---



http://pbs.twimg.com/ext_tw_video_thumb/1537201063949807616/pu/img/HZ3C14vgTFL7lrUy.jpg
2022-06-15T22:22:38+00:00
https://twitter.com/_/status/1537198926532530176
@BostonsBuddha @MiddleOfMayhem I'm both sober and serious.

These are, unequivocally, the identified stars. The angles match, and the magnitudes match.

2022-06-15T22:20:54+00:00
https://twitter.com/_/status/1537198488416489472
@MiddleOfMayhem The 170411Z video shows only stars. Not planes.

300757Z shows two non-moving (or barely moving, not entirely clear) lights. Not planes.

DOD_108981161 shows Jupiter, multiple stars, and what looks like a plane, possibly a drone. No clear audio.

2022-06-15T22:15:54+00:00
https://twitter.com/_/status/1537197232595734528
@MiddleOfMayhem Neither of these two new bokeh videos show planes.

2022-06-15T22:14:44+00:00
https://twitter.com/_/status/1537196936901513217
@BostonsBuddha @MiddleOfMayhem Well, if the snoopy team leader can't tell he's looking at stars, then maybe he can't tell he's looking at a plane. So why would he check?

2022-06-15T22:13:55+00:00
https://twitter.com/_/status/1537196734631145472
@PstarmanUa No, because it's 100% consistent with being a fly.

2022-06-15T22:11:27+00:00
https://twitter.com/_/status/1537196113983201280
@BostonsBuddha @stringythings No, those have always been stars. There's only one moving

and flashing light in the original - and that might well be a plane.

2022-06-15T22:10:36+00:00

https://twitter.com/_/status/1537195898106589184

@Uaphunter2022 @uncertainvector Don't ask me. Although I'd love to see it. Both before AND after the 30 seconds we have.

Lots of questions could be answered (and some new ones will arise)

2022-06-15T22:09:04+00:00

https://twitter.com/_/status/1537195511714721792

@Travis_Tritten Most of them are not even drones.

2018-12-06T21:27:02+00:00

https://twitter.com/_/status/1070791752720637952

@TlohJ @Ryan_inNC @YouTube Like clouds sometimes do?

Sure, you should be a little bit concerned. Contrails are one of a number of factors that affect the climate. They are not a huge one though. If you are concerned about contrails you should be a lot more concerned about CO2 emissions.

2018-12-05T23:15:38+00:00

https://twitter.com/_/status/1070456692347830272

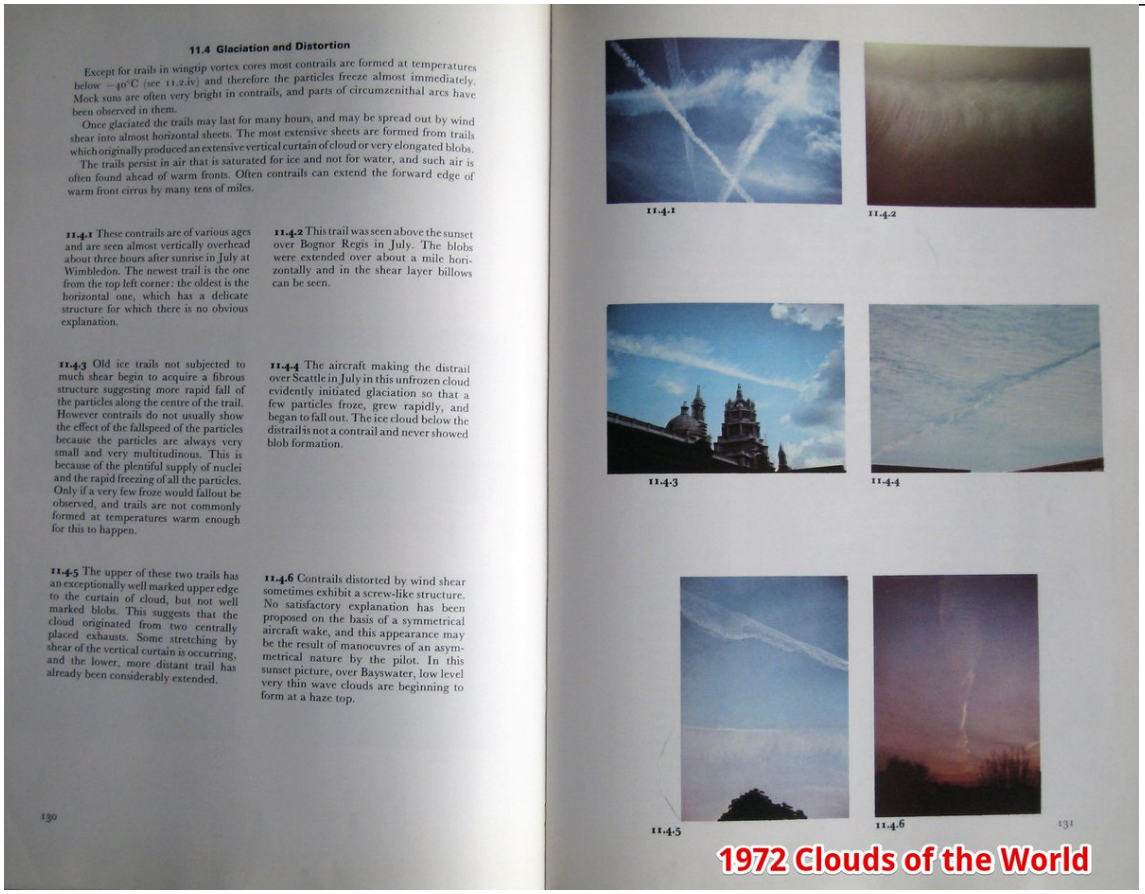
https://twitter.com/_/status/1070040232005783553

@Warrior_4Truth @R_Tehubijuluw @LionelMedia Yes, they look like photos of contrails in all the old books of clouds I've ever looked at. For example:

http://pbs.twimg.com/media/DtmL5OAUwAo8fjZ.jpg



11.4 Glaciation and Distortion

Except for trails in wingtip vortex cores most contrails are formed at temperatures below −40°C (see 11.2.iv) and therefore the particles freeze almost immediately. Mock suns are often very bright in contrails, and parts of circumzenithal arcs have been observed in them.

Once glaciated the trails may last for many hours, and may be spread out by wind shear into almost horizontal sheets. The most extensive sheets are formed from trails which originally produced an extensive vertical curtain of cloud or very elongated blobs.

The trails persist in air that is saturated for ice and not for water, and such air is often found ahead of warm fronts. Often contrails can extend the forward edge of warm front cirrus by many tens of miles.

11.4.1 These contrails are of various ages and are seen almost vertically overhead about three hours after sunrise in July at Wimbledon. The newest trail is the one from the top left corner: the oldest is the horizontal one, which has a delicate structure for which there is no obvious explanation.

11.4.2 This trail was seen above the sunset over Bognor Regis in July. The blobs were extended over about a mile horizontally and in the shear layer billows can be seen.

11.4.3 Old ice trails not subjected to much shear begin to acquire a fibrous structure suggesting more rapid fall of the particles along the centre of the trail. However contrails do not usually show the effect of the fallspeed of the particles because the particles are always very small and very multitudinous. This is because of the plentiful supply of nuclei and the rapid freezing of all the particles. Only if a very few froze would fallout be observed, and trails are not commonly formed at temperatures warm enough for this to happen.

11.4.4 The aircraft making the distrail over Seattle in July in this unfrozen cloud evidently initiated glaciation so that a few particles froze, grew rapidly, and began to fall out. The ice cloud below the distrail is not a contrail and never showed blob formation.

11.4.5 The upper of these two trails has an exceptionally well marked upper edge to the curtain of cloud, but not well marked blobs. This suggests that the cloud originated from two centrally placed exhausts. Some stretching by shear of the vertical curtain is occurring, and the lower, more distant trail has already been considerably extended.

11.4.6 Contrails distorted by wind shear sometimes exhibit a screw-like structure. No satisfactory explanation has been proposed on the basis of a symmetrical aircraft wake, and this appearance may be the result of manoeuvres of an asymmetrical nature by the pilot. In this sunset picture, over Bayswater, low level very thin wave clouds are beginning to form at a haze top.

Explained: Flashes of Light During the World Trade Center Collapse

A minor bit of "evidence" in the 9/11 pantheon. But if you don't debunk a claim, then people can think that claim is solid.

The flashes are probably falling glass, reflecting the sun.

https://www.youtube.com/watch?v=-dzNW7Hcmhw

2018-12-03T17:30:44+00:00
https://twitter.com/_/status/1069645120683761664
@thedrunkinmonk @Panzerbrecher Planes have exhaust. But the contrails seen in the photos that I posted are not from the exhaust, they are from the drop in pressure over the wing.

Most contrails are formed from the exhaust, but these ones are not. These are AERODYNAMIC contrails, not EXHAUST contrails.

2018-12-03T16:50:39+00:00
https://twitter.com/_/status/1069635033818775555
@Panzerbrecher This is not exhaust. Aerodynamic contrails, unlike exhaust contrails, are a purely physical effect. Reduced pressure over the wing cools the air very briefly below its dew point, forming clouds â□□ aerodynamic contrails. No exhaust is involved. Look at the photos.

2018-12-03T16:23:29+00:00
https://twitter.com/_/status/1069628195194851328
@Gridlock Those would persist longer if it were foggy. I wonder what the longest car contrail recorded looks like. Although local turbulence would probably be more of an issue for the cars contrails, compared to planes. https://www.youtube.com/watch?v=Fnds4VYislU

2018-12-03T16:18:53+00:00
https://twitter.com/_/status/1069627038871388160
Aerodynamic contrails often exhibit a spectrum of colors. Unlike an actual rainbow this comes from diffraction of light, not refraction. The growing water particles in the contrails interfere with different wavelengths of light as they grow.
https://www.youtube.com/watch?v=wKwQ_Rf9k9U

2018-12-03T16:14:56+00:00
https://twitter.com/_/status/1069626045609861120
In-air refueling gives a unique perspective on the formation of over-wing aerodynamic contrails. Often these are mistaken for exhaust contrails, or sometimes for covert geoengineering "chemtrails"

Every winter we get a recycling of the "fake snow" hoax. People will take some snow and hold a butane lighter close to it. Soot will form on the snow, and people will say that it "burns". But it's just soot. The snow is just ordinary fluffy frozen water.

https://www.metabunk.org/debunked-fake-snow-burning-snow.t3026/

https://twitter.com/DogStompers/status/1068625879318781952

2018-11-30T20:55:04+00:00

https://twitter.com/_/status/1068609379136491522

@GrandArch104 @Beneloben @JoeBusa333 Commercial planes use jet turbines, which have a combustion chamber. It's the exhaust from this combustion that is responsible for exhaust contrails. But the exhaust from a prop plane would do the same (it it flew high enough)

https://www.youtube.com/watch?v=x8DK4rM6Y90

2018-11-30T19:45:52+00:00

https://twitter.com/_/status/1068591963253821446

@Beneloben @GrandArch104 @JoeBusa333 Indeed, and planes go a lot faster and have much bigger wings than an F1 car. A significant difference though is that the plane is in sub-zero temperatures, so the contrail gets fixed by freezing into an ice cloud. F1 trails are narrow and short lived. http://pbs.twimg.com/media/DtRmg6xVsAArXL3.jpg

https://twitter.com/_/status/1068100961313292289
@realdanielruff @Condor_Law @mikaOnPoint @realDonaldTrump Aluminum melts in the *immediate* proximity of an intense fire. Like it has to be practically touching it. In a car fire this happens because the rims are surrounded by tires, which burn very hot. Houses collapse after the wood is burned away. Stone is not dustified.

2018-11-28T21:58:51+00:00
https://twitter.com/_/status/1067900656306941953
@realdanielruff @Condor_Law @mikaOnPoint @realDonaldTrump Whatâ□□s the scorched radius around your camp fire?

2018-11-28T20:58:19+00:00
https://twitter.com/_/status/1067885420820615168
@Rainfeather1 The ignition comes from the ember storm, not a wall of fire sweeping over everything.

2018-11-28T20:57:32+00:00
https://twitter.com/_/status/1067885224820826112
@realdanielruff @Condor_Law @mikaOnPoint @realDonaldTrump You can melt aluminum and glass on a small campfire.

https://twitter.com/_/status/1067793845809758208

@GeoeWatchDebunk Yes. I think it's not quite as thick as it seems, the sun is nearly edge on, which makes the lighting seem like it's going through more cloud, plus it's a bit blurred on the video. But still very interesting. Probably only just above the plane.

2018-11-28T05:10:52+00:00

https://twitter.com/_/status/1067646986382303232

@Rainfeather1 Since there were houses made of dead wood in a forest made of live wood.

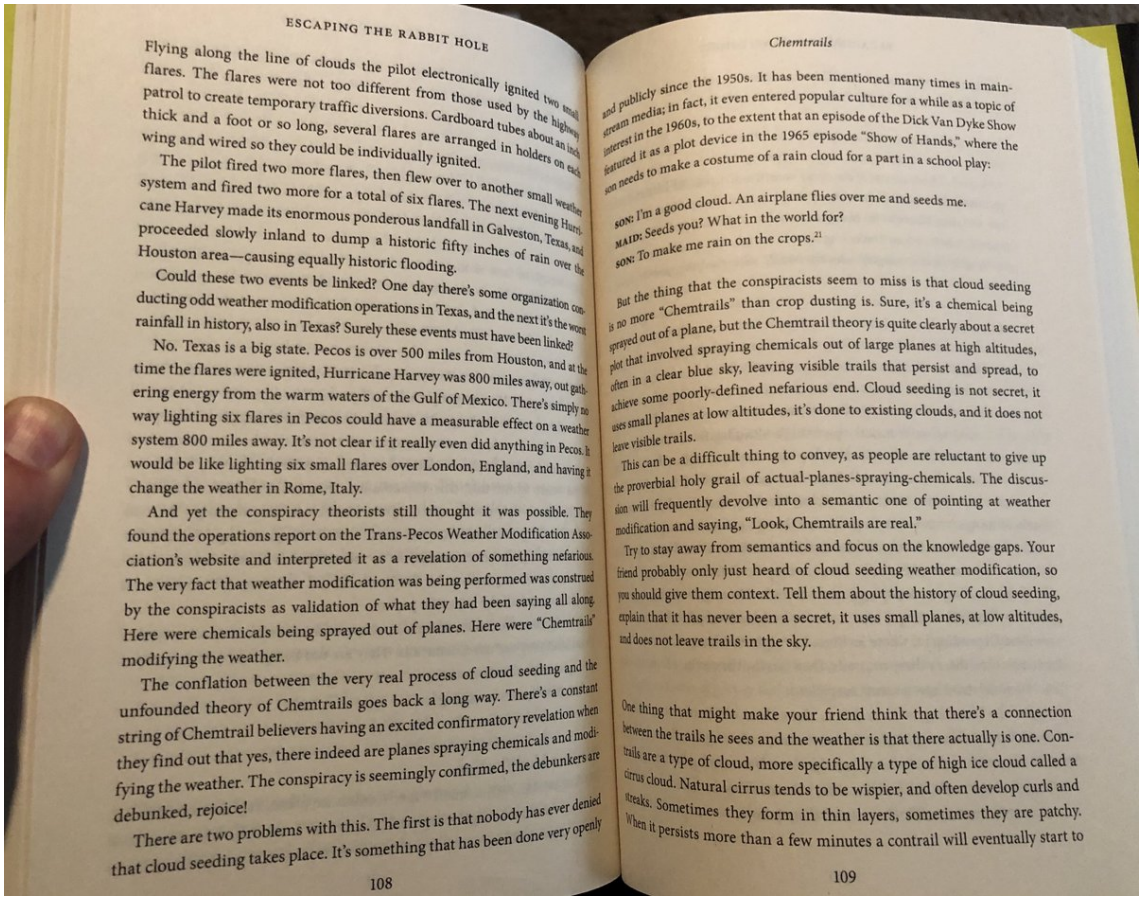
https://twitter.com/_/status/1067452040211623937

@earlofawesome @Panzerbrecher @BayleeB79 I have an extensive discussion of weather modification in relation to "chemtrails" in my book, Escaping the Rabbit Hole. https://amzn.to/2wkVsKF http://pbs.twimg.com/media/DtBZpYfVsAEKOST.jpg

---



ESCAPING THE RABBIT HOLE

Flying along the line of clouds the pilot electronically ignited two small flares. The flares were not too different from those used by the highway patrol to create temporary traffic diversions. Cardboard tubes about an inch thick and a foot or so long, several flares are arranged in holders on each wing and wired so they could be individually ignited.

The pilot fired two more flares, then flew over to another small weather system and fired two more for a total of six flares. The next evening Hurricane Harvey made its enormous ponderous landfall in Galveston, Texas, and proceeded slowly inland to dump a historic fifty inches of rain over the Houston area—causing equally historic flooding.

Could these two events be linked? One day there's some organization conducting odd weather modification operations in Texas, and the next it's the worst rainfall in history, also in Texas? Surely these events must have been linked?

No. Texas is a big state. Pecos is over 500 miles from Houston, and at the time the flares were ignited, Hurricane Harvey was 800 miles away, out gathering energy from the warm waters of the Gulf of Mexico. There's simply no way lighting six flares in Pecos could have a measurable effect on a weather system 800 miles away. It's not clear if it really even did anything in Pecos. It would be like lighting six small flares over London, England, and having it change the weather in Rome, Italy.

And yet the conspiracy theorists still thought it was possible. They found the operations report on the Trans-Pecos Weather Modification Association's website and interpreted it as a revelation of something nefarious. The very fact that weather modification was being performed was construed by the conspiracists as validation of what they had been saying all along. Here were chemicals being sprayed out of planes. Here were "Chemtrails" modifying the weather.

The conflation between the very real process of cloud seeding and the unfounded theory of Chemtrails goes back a long way. There's a constant string of Chemtrail believers having an excited confirmatory revelation when they find out that yes, there indeed are planes spraying chemicals and modifying the weather. The conspiracy is seemingly confirmed, the debunkers are debunked, rejoice!

There are two problems with this. The first is that nobody has ever denied that cloud seeding takes place. It's something that has been done very openly

108

Chemtrails

and publicly since the 1950s. It has been mentioned many times in mainstream media; in fact, it even entered popular culture for a while as a topic of interest in the 1960s, to the extent that an episode of the Dick Van Dyke Show featured it as a plot device in the 1965 episode "Show of Hands," where the son needs to make a costume of a rain cloud for a part in a school play:

SON: I'm a good cloud. An airplane flies over me and seeds me.
MAID: Seeds you? What in the world for?
SON: To make me rain on the crops.[21]

But the thing that the conspiracists seem to miss is that cloud seeding is no more "Chemtrails" than crop dusting is. Sure, it's a chemical being sprayed out of a plane, but the Chemtrail theory is quite clearly about a secret plot that involved spraying chemicals out of large planes at high altitudes, often in a clear blue sky, leaving visible trails that persist and spread, to achieve some poorly-defined nefarious end. Cloud seeding is not secret, it uses small planes at low altitudes, it's done to existing clouds, and it does not leave visible trails.

This can be a difficult thing to convey, as people are reluctant to give up the proverbial holy grail of actual-planes-spraying-chemicals. The discussion will frequently devolve into a semantic one of pointing at weather modification and saying, "Look, Chemtrails are real."

Try to stay away from semantics and focus on the knowledge gaps. Your friend probably only just heard of cloud seeding weather modification, so you should give them context. Tell them about the history of cloud seeding, explain that it has never been a secret, it uses small planes, at low altitudes, and does not leave trails in the sky.

One thing that might make your friend think that there's a connection between the trails he sees and the weather is that there actually is one. Contrails are a type of cloud, more specifically a type of high ice cloud called a cirrus cloud. Natural cirrus tends to be wispier, and often develop curls and streaks. Sometimes they form in thin layers, sometimes they are patchy. When it persists more than a few minutes a contrail will eventually start to

109

http://pbs.twimg.com/media/DtBZpYfVsAEKOST.jpg
2018-11-27T11:13:24+00:00
https://twitter.com/_/status/1067375835634634752
@4thAnon That's what happens when you take ANYTHING away from a baby.

2018-11-27T11:10:22+00:00
https://twitter.com/_/status/1067375071134543872
@Panzerbrecher @BayleeB79 How do you know this?

How do you know that "the contrails should not be there?"

Your belief seems contradicted by every book on cloud for the last 70 years. If you know better than 70 years of books then you must have an amazing source of information.

How do you know?

2018-11-27T05:44:03+00:00
https://twitter.com/_/status/1067292951464701952
@WhiteEagle1927 Did they have "DEW" in 1983?
http://pbs.twimg.com/media/Ds_JNXSVsAAIJFN.jpg

http://pbs.twimg.com/media/Ds_JNXSVsAAIJFN.jpg
2018-11-27T02:53:54+00:00

@John_Qanon @LionelMedia Lots of them.

2018-11-27T02:39:06+00:00
https://twitter.com/_/status/1067246407193513986
@John_Qanon @LionelMedia It's a variant on "devil theory". Gained popularity in the early 1960s, after JFK, but was used before that.

2018-11-27T02:18:39+00:00
https://twitter.com/_/status/1067241258257539073
@John_Qanon @LionelMedia Have you read my book? It explains why I do what I do. You might find it interesting.

2018-11-27T02:18:01+00:00
https://twitter.com/_/status/1067241099993874432
@John_Qanon @LionelMedia It's a car fire. It caught fire from wind and firebrands.

2018-11-27T02:01:34+00:00
https://twitter.com/_/status/1067236959087521792
@regisjack @LionelMedia Yes. Firebrands and high winds. Ember storm. Live wood does not burn easily. Dead wood does. Houses are made of dead wood.

2018-11-27T02:00:29+00:00
https://twitter.com/_/status/1067236687934189569
@BlueBookBelieve Sorry, I find it hard to get interested in old UFO cases. I like to look at individual cases and try to figure them them out, but photos and video are far more tangible than eyewitness accounts.

2018-11-27T01:50:56+00:00
https://twitter.com/_/status/1067234284644126720
@John_Qanon Tires burn hot.
Fire came from over the road. See the field burnt. Also the trees up the road on the same side are burnt. Irrigated field is not. http://pbs.twimg.com/media/Ds-Tn4PV4AAl8Ct.jpg

---

http://pbs.twimg.com/media/Ds-Tn4PV4AAl8Ct.jpg

2018-11-27T01:42:42+00:00

https://twitter.com/_/status/1067232215166119936

@BlueBookBelieve Well they have secret programs that watch for novel airspace intrusion methods by the Russians, Chinese, or other hostiles. So yes, of course they have things to hide. Military secrets. It does not mean they are hiding UFO sightings.

2018-11-27T01:34:42+00:00

https://twitter.com/_/status/1067230200725942272

@LamoreauxDevon The theory is that it is part of some kind of land grab. Like the Government wants Paradise, CA, (which is basically the middle of nowhere) for some unspecified reason.

It's a nonsensical theory.

2018-11-27T01:32:40+00:00

https://twitter.com/_/status/1067229686458019840

@BlueBookBelieve "... because they donâ□□t want to respond to people like you,â□□ former Air Force Captain Robert Salas told The Huffington Post.

2018-11-27T01:23:59+00:00

https://twitter.com/_/status/1067227501733208064

@John_Qanon Engine blocks did not liquify. Aluminum rims did. But aluminum rims were not that popular back in 1983.

And that asphalt bridge in the Woolsey fire had a wood deck.

2018-11-27T01:21:49+00:00

https://twitter.com/_/status/1067226956289073152

@BlueBookBelieve Why wouldn't you study unexplained sightings?

2018-11-27T01:20:57+00:00

https://twitter.com/_/status/1067226738193661952

@BlueBookBelieve @hoaxeye Just an old false belief that some people fell for. Unfortunately the explanation is technical and people naturally have difficulty with it. Once you accept "fetuses in Pepsi" as true it's hard work to understand why it is not.
Discussed in 2012
https://www.metabunk.org/debunked-pepsi-uses-aborted-fetus-cells-in-their-drinks.t752/

2018-11-27T01:16:54+00:00
https://twitter.com/_/status/1067225720819089409
@BlueBookBelieve And I don't think that believing in conspiracy theories makes you a "nutter" any more more than believing in the supernatural does. It's a natural outcome of the human mind to fall for (and passionately defend) seductive yet ultimately unfounded beliefs.

2018-11-27T01:13:58+00:00
https://twitter.com/_/status/1067224983267504128
@BlueBookBelieve I think modern media platforms allow these theories to take root and spread more than they would otherwise. So you get odd theories exploding in popularity whereas before it was more naturally limited.

2018-11-27T00:55:43+00:00
https://twitter.com/_/status/1067220388176777216
More coverage of the 1983 fire. Just the same as modern fires. Not started by lasers.
https://www.youtube.com/watch?v=nVquGTpK9Ik

2018-11-27T00:49:52+00:00
https://twitter.com/_/status/1067218918924644352
The Ash Wednesday fires of 1983 are very reminiscent of the California fires of 2018. Houses destroyed while trees remain standing. Cars burnt in the street. This isn't some "directed energy weapon" conspiracy. It's just how fire works.
https://www.youtube.com/watch?v=g7e7NQvQbNc

2018-11-27T00:45:08+00:00
https://twitter.com/_/status/1067217727142604800
"Be specific. And brave" directs @LionelMedia when asking "see anything wrong with this picture." He's promoting the DEW conspiracy theory, but the picture he's showing looks EXACTLY like other fires, like this one from 35 years ago.
Being new to you does not a conspiracy make.
http://pbs.twimg.com/media/Ds-ChJVVYAARi3T.jpg

http://pbs.twimg.com/media/Ds-ChJVVYAARi3T.jpg

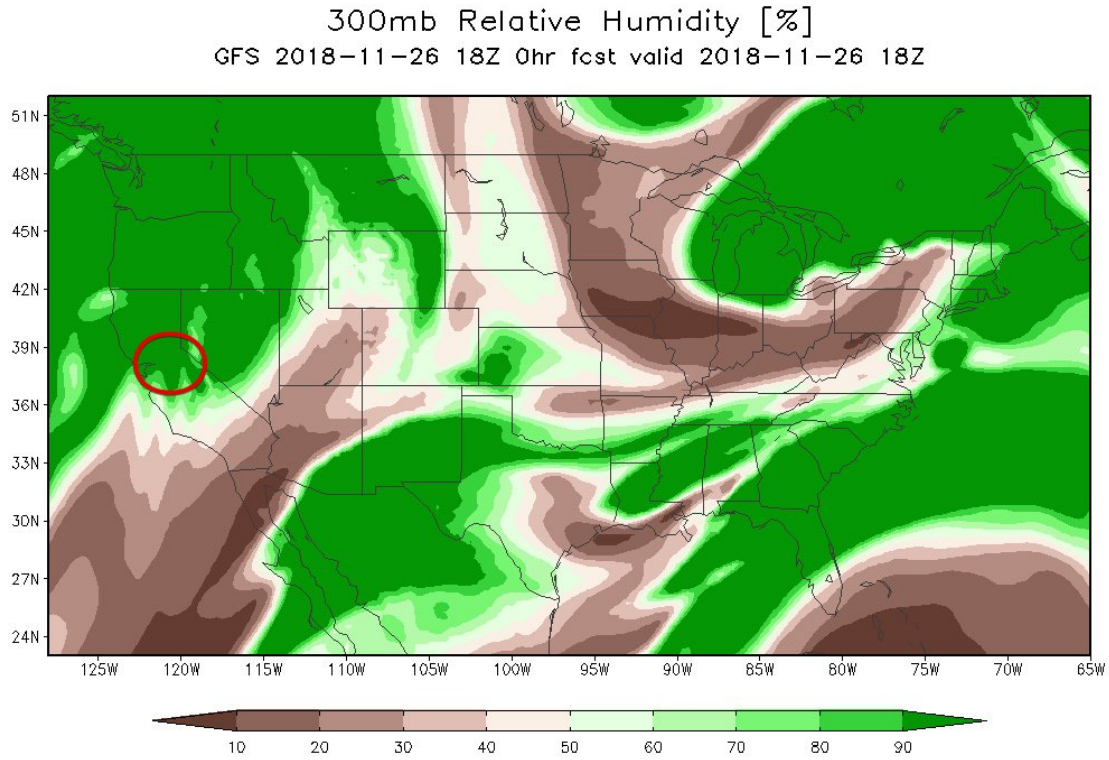
2018-11-27T00:06:38+00:00

https://twitter.com/_/status/1067208036794560512

@Panzerbrecher @BayleeB79 Fact? If the air is ice supersaturated (which it was) then it's literally IMPOSSIBLE for contrails not to form. Halos are also common sights in these conditions. It just rained in California, the air is humid.

Green = high clouds and contrails http://pbs.twimg.com/media/Ds975rIUwAArjZK.jpg

---



http://pbs.twimg.com/media/Ds975rIUwAArjZK.jpg

2018-11-26T18:57:40+00:00

https://twitter.com/_/status/1067130282577321984

@TlohJ Have you looked at any of the old books on clouds? Of the thousands of older photos and videos of contrails?

2018-11-26T15:34:01+00:00

https://twitter.com/_/status/1067079033651847168

@TlohJ I compared them to historical photos of contrails from the 1940s and 1950s, and they match. They also match the written descriptions in all the books on clouds for the last 70 years. That's how I know. How about you?

2018-11-26T14:29:54+00:00

https://twitter.com/_/status/1067062898889908224

@TlohJ If "chemtrails" look like contrails then how do you know they are NOT contrails? What's the actual difference, and how do you know?

2018-11-26T03:41:20+00:00

https://twitter.com/_/status/1066899678921277442

@TlohJ Because they looked like contrails and acted like contrails.

2018-11-25T19:05:35+00:00

https://twitter.com/_/status/1066769888864129024

@EndtimeApostasy @taoeffect @Alien_Scientist Scale is a tricky thing.

2018-11-25T15:05:44+00:00

https://twitter.com/_/status/1066709528534630401

@BayleeB79 No, just contrails and a halo.

2018-11-25T14:38:13+00:00

https://twitter.com/_/status/1066702601943580673

@MGoedblick "Handle" it? What do you think would happen, would my head explode from cognitive dissonance?

I'm very open to new information. However the technical and scientific Russians are quite sensible and pragmatic people. They know what's up.

2018-11-25T06:42:24+00:00

https://twitter.com/_/status/1066582858255425537

Contrails crossing the haloed Moon. http://pbs.twimg.com/media/Ds1DXBIUcAAUiZb.jpg

2018-11-22T18:20:56+00:00

https://twitter.com/_/status/1065671489314115584

@paulreilly @findtruthQ @snopes @Metabunk @RationalWiki @honeywell Sounds fun. Unfortunately I don't have a ring laser gyroscope. What does yours say in the manual about setting local Earth's rate correction?

https://books.google.com/books?id=a4Q-AAAAYAAJ&lpg=SA2-PA20&ots=Y9zyDjx8Rn&dq=%22earth's%20rate%20correction%22&pg=SA2-PA17#v=onepage&q&f=false

http://pbs.twimg.com/media/DsoGflIUUAA3zDX.jpg

---

(4) Compute the observed heading change (the difference between successive headings recorded in table 2–5).

(5) Compute the time change and observed heading drift per hour. (See table 2–5 and the note below.)

Note. If readings are taken on the very first positive swing, or after the exact second for measurement, an even 30-minute interval may be assumed. In this case, the heading drift per hour may be obtained by multiplying the heading change by 2; otherwise, exact times must be used, and the heading change must be divided by the time change and the change per hour calculated as shown below.

Heading Change 5° 20′ ÷ Time Change 30′ 40″

or: 320′ ÷ 1840″

Or: The rate of change is $\frac{320 \text{ angular}}{1{,}840 \text{ minutes per second}}$

Or: The rate of change is $\frac{320}{1{,}840 \times 60 \text{ angular degrees per hour}}$

Or: 10.434 angular degrees per hour,
Or: 10 angular degrees and 0.434 x 60,
Or: 26.04 angular minutes per hour.

Note. If a reading is taken at an off time, adjust the following reading time to bring back an even 30-minute interval.

(6) Determine the earth's rate correction for the latitude at which the test is conducted.

Notes.
1. In the northern hemisphere, the latitude correction is +15 sine (latitude in degrees) per hour.
2. In the southern hemisphere, the latitude correction is –15 sine (latitude in degrees) per hour.

(7) Algebraically add the earth's rate correction to each calculated observed heading drift to determine the free drift rate. (Refer to table 2–5.)

(8) Compute the spread between the most positive and most negative hourly rates.

Note. The average of the three hourly drift rates should not exceed 0.500 per hour. Also, the spread between the most positive and the most negative hourly rates should not exceed 1° per hour.

d. Vertical Drift Rate Test.

(1) Check to see that the heading established by procedures given in *b* above still pertains.

(2) Complete all steps listed in the chart below. (This test includes timed steps.)

Step	Time (min)	Procedure
		Note. Take all readings when the MX–4042A/ASW–12(V) is turning clockwise, and the ID–1450/ASN readout is increasing in a positive direction.
1	----	Set the motion control switch on the MX–4042A/ASW–12 (V) to OSC.
2	0	Record the PITCH attitude on the ID–1450/ASN.
3	0	Set PITCH ERECT switch S9 on the AN/ASM–298 to OFF.
4	0	Start the stopwatch.
5	15	Record the PITCH attitude on the ID–1450/ASN.

(3) Set PITCH ERECT switch S9 on the AN/ASM–298 to N.

(4) Compute the attitude change, the time change, and the drift in degrees and minutes per hour.

Note. A typical format for recording and calculating for this test is shown in table 2–6.

Table 2–6. Typical Pitch Drift Rate Calculation

Reading	Recorded attitude		Time of readings		Attitude change		Time change		Drift deg hr	
	Deg	Min	Min	Sec	Deg	Min	Min	Sec	Deg	Min
Initial	1	12	0	0						
15 minute	359	40	15	0	–1	32	15	0	–6	8

Notes:
1. If readings are taken on the very first positive swing, or after the exact second for measurement, an even 15-minute interval may be assumed. In this case, the drift in degrees and minutes per hour can be obtained by multiplying the attitude change by 4; otherwise, the exact time change must be used, and a computation similar to that given for heading (Note in paragraph *c*(5) above) must be made.
2. The free drift rate should not exceed 12° per hour.

https://twitter.com/_/status/1064684096385802240

@taoeffect @Alien_Scientist Floors offered negligible resistance to a large falling mass, (getting faster and increase in mass each floor). Hence if much of the building fell through the floors (not the columns) then A) it would fall fast, 2/3 free fall? B) some of the core would not fall with the main wave

---

2018-11-20T00:41:51+00:00

https://twitter.com/_/status/1064680185079881728

@taoeffect @Alien_Scientist Well you can't really refute my hypotheses if you don't understand it, right? That why I was trying to come to some baseline understanding, so there could be constructive dialog.

2018-11-20T00:20:23+00:00

https://twitter.com/_/status/1064674782514315266

@taoeffect @Alien_Scientist More technically, the Euler buckling critical load is inversely proportional to the square of the unsupported length. So removing even one floor can have a significant effect. Removing six would be catastrophic in a dynamic load situation.

https://en.wikipedia.org/wiki/Buckling#Columns

http://pbs.twimg.com/media/DsZ70igU8AA9CAS.jpg

$$F = \frac{\pi^2 EI}{(KL)^2}$$

To get the mathematical demonstration read: Euler's critical load

where

F = maximum or critical force (vertical load on column),

E = modulus of elasticity,

I = smallest area moment of inertia of the cross section of the column,

L = unsupported length of column,

K = column effective length factor, whose value depends on the conditions of end support of the column, as follows.

For both ends pinned (hinged, free to rotate), K = 1.0.

For both ends fixed, K = 0.50.

For one end fixed and the other end pinned, $K = \sqrt{2}/2 \approx 0.7071$.

For one end fixed and the other end free to move laterally, K = 2.0.

KL is the effective length of the column.

http://pbs.twimg.com/media/DsZ70igU8AA9CAS.jpg

2018-11-20T00:15:26+00:00

https://twitter.com/_/status/1064673535581274112

@taoeffect @Alien_Scientist Okay: If floors were stripped from columns then the columns would lose a lot of strength, and would more easily fail Hence the (hypothetical) stripping of the floors from the columns explains why they failed. I think we can agree this would happen on the exterior at least?

2018-11-20T00:03:26+00:00

https://twitter.com/_/status/1064670516206698496

@taoeffect @Alien_Scientist Do you understand that a column with lateral bracing (i.e. floors) is much stronger than one without them?

2018-11-19T23:59:38+00:00

https://twitter.com/_/status/1064669561251815424

@taoeffect @Alien_Scientist Well let's ignore all my models then. Do you understand that a column with lateral bracing (i.e. floors) is much stronger than one without them?

2018-11-19T23:54:16+00:00

https://twitter.com/_/status/1064668211679916032

@taoeffect @Alien_Scientist I'm fully aware that my models is not a simulation of the buildings. It's illustrating one small but important point. Floor stripping leading to unbraced column lengths. I want you know if you understand the role of lateral bracing in the vertical strength of a column.

2018-11-19T23:17:14+00:00

https://twitter.com/_/status/1064658890137075712

@taoeffect @Alien_Scientist In the WTC, the columns require bracing with floors in order to have full strength, right?

2018-11-19T23:12:25+00:00

https://twitter.com/_/status/1064657678260101120

@taoeffect @SoberHootOwl @Alien_Scientist A response to WHAT? I don't see any outstanding questions from you. I've explained that I understand Newton's laws of motion. I've explained scale. I've explained models illustrating limited principles. You don't seem to be raising any points. Don't debate with puzzles. Ask!

2018-11-19T23:09:16+00:00

https://twitter.com/_/status/1064656883326144513

@taoeffect @SoberHootOwl @Alien_Scientist Well here I am, responding. Sorry but I don't find Twitter the best forum for long detailed discussions.

2018-11-19T23:06:56+00:00

https://twitter.com/_/status/1064656297755205633

@taoeffect @SoberHootOwl @Alien_Scientist I'd be happy to discuss any physics aspect with you.

2018-11-19T23:06:04+00:00

https://twitter.com/_/status/1064656081341734912

@Van60444079 What about the Thomas fire last year?

There's plenty in older fires of course. If you wanted to get a full historical overview you could start with the great fires of London. http://pbs.twimg.com/media/DsZq3CkVsAEMgDB.jpg

---

http://pbs.twimg.com/media/DsZq3CkVsAEMgDB.jpg

2018-11-19T23:00:15+00:00

https://twitter.com/_/status/1064654615814135809

@taoeffect @The911FalseFlag @Alien_Scientist So why did you want to debate me?

2018-11-19T22:59:21+00:00

https://twitter.com/_/status/1064654389556633600

@taoeffect @SoberHootOwl @Alien_Scientist 9/11 is just one subject I've been writing about since 2010 on Metabunk. I started writing the book in 2017. There's 300+ threads on 9/11 on Metabunk that I've participated in, with about 280 predating starting the book. There's over 1,000 threads on chemtrails and over 150 on FE

2018-11-19T22:55:08+00:00

https://twitter.com/_/status/1064653326879342592

@SoberHootOwl @taoeffect @Alien_Scientist Well much of the lower half of the core did actually remain standing for a few seconds after everything else had hit the ground.

http://pbs.twimg.com/media/DsZogKZUwAAmIyV.jpg

http://pbs.twimg.com/media/DsZogKZUwAAmIyV.jpg

2018-11-19T22:50:54+00:00

https://twitter.com/_/status/1064652264504090624

@taoeffect @SoberHootOwl @Alien_Scientist Why don't you go, explain your ideas to them. See how it goes.

2018-11-19T18:06:59+00:00

https://twitter.com/_/status/1064580814921322496

@taoeffect @SoberHootOwl @Alien_Scientist Maybe you and I could start with a chat on skype to try to narrow down the disagreement?

2018-11-19T17:27:48+00:00

https://twitter.com/_/status/1064570952795615236

@Van60444079 Sho how does the modern fire path differ?

2018-11-19T17:27:14+00:00

https://twitter.com/_/status/1064570811112022016

@taoeffect @SoberHootOwl @Alien_Scientist Also my childhood fears mostly vanished with childhood. I'm not afraid of chemtrails, or flat earth, or 9/11 controlled demolition theories. I just find them interesting. Like I said, I shifted from fear to fascination.

2018-11-19T17:25:21+00:00

https://twitter.com/_/status/1064570337055010819

@taoeffect @SoberHootOwl @Alien_Scientist No, I actually do understand Newtonian mechanics. I'm not pretending to misunderstand anything. I genuinely think my understanding is correct.

I did program physics for 20 years, so I do have some experience.

2018-11-19T15:46:12+00:00

https://twitter.com/_/status/1064545382863011840

@Van60444079 I look forward to your thoughts on the 1961 fires.

2018-11-19T15:45:14+00:00

https://twitter.com/_/status/1064545139790512128

@taoeffect @SoberHootOwl @Alien_Scientist My real story is in my book. Chapter 3: The Shill Card. It's a much longer version of this post:

@Van60444079 What about the Bel Air fire?

2018-11-19T15:33:43+00:00

https://twitter.com/_/status/1064542243535564800

@Van60444079 Cars have changed in the last 45 years. Aluminum rims in particular used to be expensive, but are more commonly the default.

2018-11-19T15:17:46+00:00

https://twitter.com/_/status/1064538228487856128

@Van60444079 None of this is new. Here's a report from 1894. No "DEWs" back then.

http://pbs.twimg.com/media/DsX_v45U8AAY0bH.jpg

REPORT OF THE STATE COMMISSION.

FOR THE RELIEF OF THE FOREST FIRE SUFFERERS.

To His Excellency, Knute Nelson, Governor of Minnesota:

On Saturday, Sept. 1, 1894, occurred one of the most dreadful calamities which this country has ever seen. Owing to the long protracted drought, forest fires had prevailed in different localities for several weeks, but on that day the wind suddenly rose to a tornado, and a small fire which was burning near Brown's Hill spread with frightful rapidity, and was carried on the wings of the tornado over a district covering, probably, from three hundred and fifty to four hundred square miles. Almost without warning, the fire swept over the villages of Mission Creek, Hinckley, Pokegama, Sandstone, Finlayson and Miller. A furnace blast swept over the fated district and left behind it absolute devastation. Every building in Hinckley and Sandstone, with one or two unimportant exceptions, was completely destroyed. Nearly every farmhouse was destroyed, with barns, crops and supplies, and in most cases, live stock. The material loss will probably approximate $750,000, in addition to the timber destroyed, but this is a small matter compared with the dreadful loss of life. So sudden was the onset of the flames that the people could only rush from their houses and seek a place of refuge, without even an effort to save their household goods and personal effects. Four hundred and eighteen persons, comprising about one-sixth of the entire population of the burnt district, are known to have perished by a most frightful death in the flames. A great many families lost one or more members, and some families were wiped entirely out of existence. The charred bodies, in most cases unrecognizable, were gathered up and buried by tender hands after the fire.

The full record of the heroic and unselfish endeavors of the people to rescue one another from threatening death can never be fully written. Some perished while striving to save the lives of others. The charred and shriveled hands of others testify to their endeavors to save their friends. A few cool headed men at Hinckley saved many lives by urging the people to abandon everything and hasten to the gravel pit. At Pokegama, a little group of people, who lay stifling in a pool of water, were preserved largely by the efforts of

http://pbs.twimg.com/media/DsX_v45U8AAY0bH.jpg

2018-11-19T15:12:19+00:00

https://twitter.com/_/status/1064536857151565829

@Van60444079 Of course "firenados" are natural. It's just air movement. Fires have always done that if they get big enough, with some wind.

2018-11-19T15:09:29+00:00

https://twitter.com/_/status/1064536143591497728

@Van60444079 Car fires melt rims. That't really what you should focus on. But even a small fire will do it. https://www.youtube.com/watch?v=oTH-afrORlI

2018-11-19T15:02:51+00:00

https://twitter.com/_/status/1064534476162625537

@SoberHootOwl @taoeffect @Alien_Scientist The FLOORS were not designed to support the upper portion of the building. That was done by the columns. So when the upper mass broke up and fell though the (relatively fragile) floors, the columns were stripped of their lateral support.

2018-11-19T15:01:21+00:00

https://twitter.com/_/status/1064534095072378880

@LondonSkywatch @zhoumamma @TheTrueFamasss @twistedcomputer Wind-driven wildfires can get hotter than a pile of wood burning by itself. Also, aluminum regularly melts in car fires.

2018-11-19T06:06:17+00:00

https://twitter.com/_/status/1064399443569532928

@taoeffect @The911FalseFlag @Alien_Scientist No, that's just life.

2018-11-19T06:05:36+00:00

https://twitter.com/_/status/1064399271175184384

@taoeffect @The911FalseFlag @Alien_Scientist I made the animation - it's replays of a recreation in X-Plane.

Debunking is more of a hobby than a job. I'm not sure that I "suck", but I'd imagine there's a lot of room for improvement - like with everything. So I appreciate any constructive feedback.

2018-11-19T06:03:14+00:00

https://twitter.com/_/status/1064398673935650816

@Van60444079 Why wouldn't aluminum rims melt? They melt all the time in car fires.

2018-11-19T06:00:10+00:00

https://twitter.com/_/status/1064397902343094273

@taoeffect @The911FalseFlag @Alien_Scientist That much is true. It's increasingly going to recede into the panoply of history.

2018-11-19T05:58:52+00:00

https://twitter.com/_/status/1064397575749431296

@The911FalseFlag @taoeffect @Alien_Scientist Lots of people talk about it. I've piloted a plane, it's not something you can do surreptitiously with a knife to your throat. The transponder is a basic instrument the hijackers would have been familiar with. The pilot needs to dial in four numbers and press a button.

2018-11-19T05:51:50+00:00

https://twitter.com/_/status/1064395806151663616

@Van60444079 Well, houses are dry wood, live forests are wet wood. Is this not true?

2018-11-19T05:48:52+00:00

https://twitter.com/_/status/1064395059162898432

@The911FalseFlag @taoeffect @Alien_Scientist What do you think the light poles would do in the 0.8 seconds between hitting them, and hitting the Pentagon.

https://www.youtube.com/watch?v=WdKjO1j0-64

2018-11-19T02:24:30+00:00

https://twitter.com/_/status/1064343630679166977

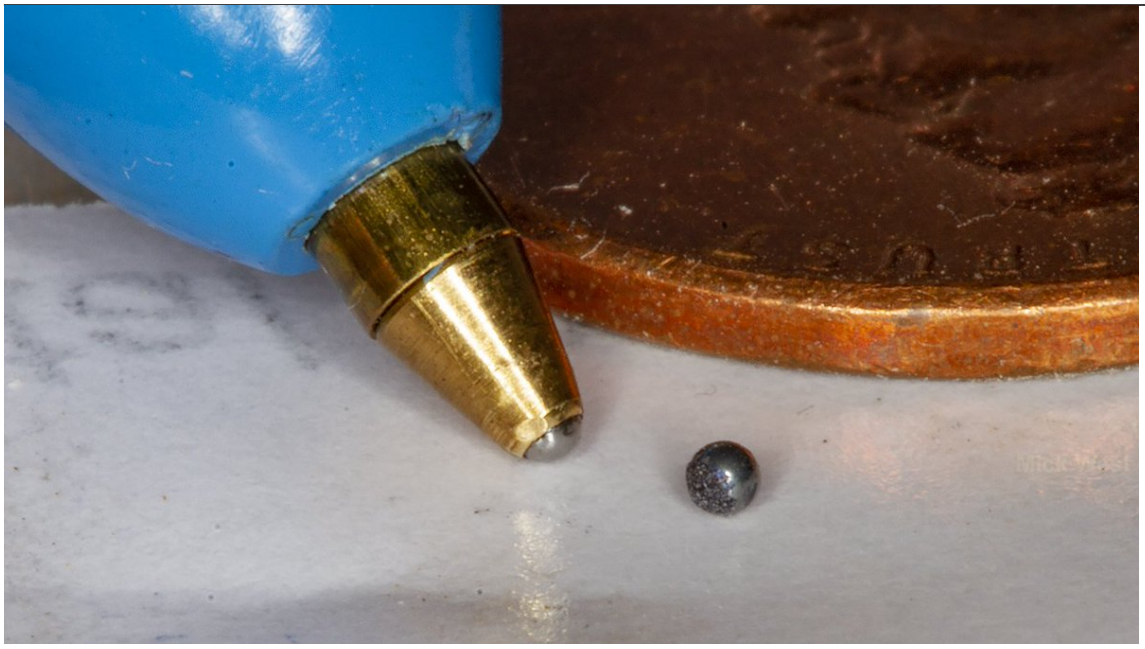
@LondonSkywatch @zhoumamma @TheTrueFamasss @twistedcomputer Oak. It had reached the charcoal burning stage, which is hotter than just dry wood.

2018-11-18T17:43:39+00:00

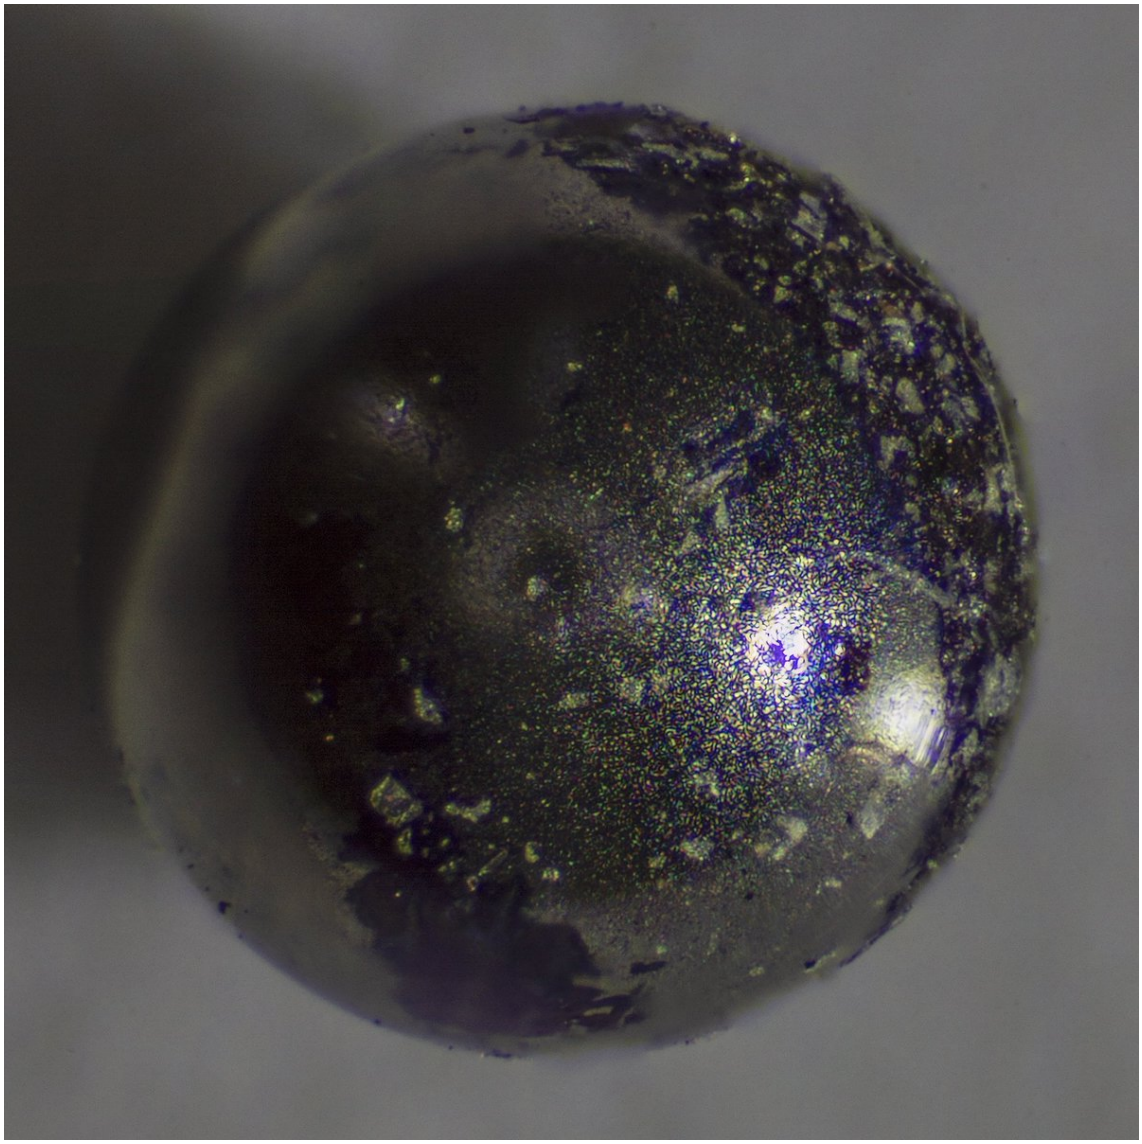
https://twitter.com/_/status/1064212551595024384

This microsphere is the ball of an old ballpoint pen. The dark is dried ink, speckled with dust. Cheap balls are made of steel, others are made of tungsten carbide coated with hard alloys like aluminum chrome molybdenum steel. http://pbs.twimg.com/media/DsTViJJVYAATEZF.jpg

---



http://pbs.twimg.com/media/DsTViJJVYAATEZF.jpg



http://pbs.twimg.com/media/DsTQB4FUwAEe8qB.jpg

2018-11-18T05:14:54+00:00

https://twitter.com/_/status/1064024124564004864

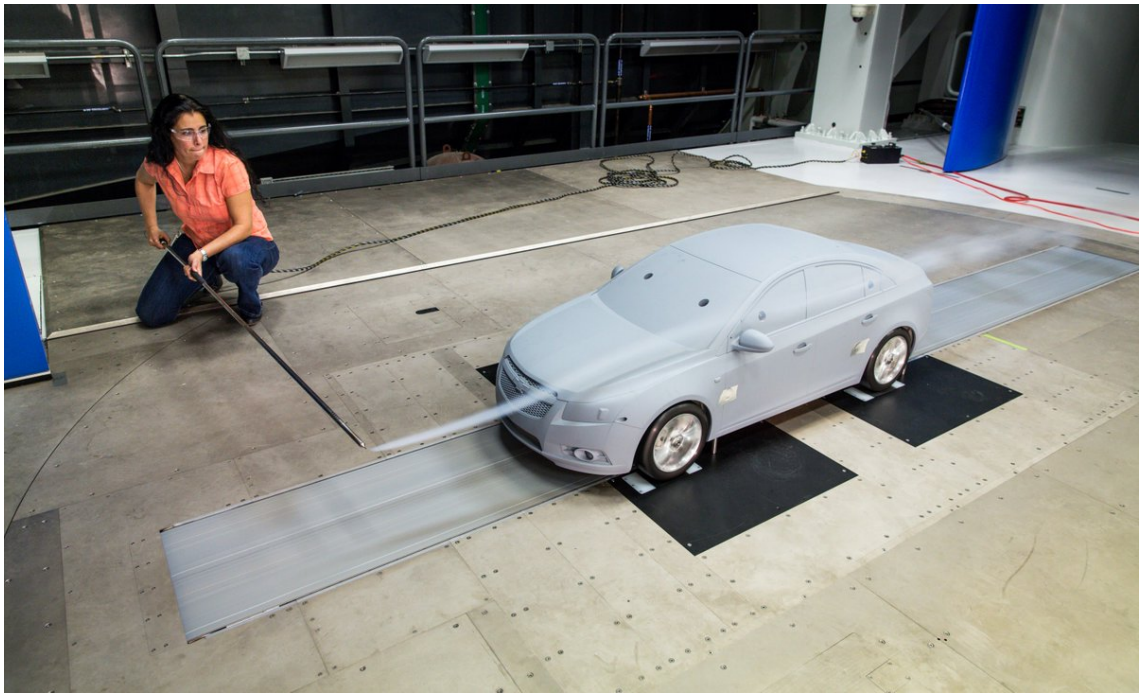
@taoeffect @Alien_Scientist Also, my model is clearly not trying to scale every aspect of the WTC. The key thing it is simulating is a floor that can hold 6-12 times it's own weight of static load. And that floors laterally brace the columns.

2018-11-18T05:12:30+00:00

https://twitter.com/_/status/1064023520697442305

@taoeffect @Alien_Scientist Because scale models are actually a thing. Even with cars.

http://pbs.twimg.com/media/DsQrtNpV4AAJq6T.jpg



http://pbs.twimg.com/media/DsQrtNpV4AAJq6T.jpg

2018-11-18T05:11:07+00:00

https://twitter.com/_/status/1064023172280811521

@taoeffect @Alien_Scientist Is your question really: "Do you really not understand that: That is not how physics or Newtonian Mechanics works. That would be like masturbating with a banana in order to crash test a car for a safety test. There is a reason they use real cars!"?

2018-11-18T02:29:27+00:00

https://twitter.com/_/status/1063982486844100608

@taoeffect @Alien_Scientist I'm off to dinner. Maybe we can Skype sometime next week.

2018-11-18T02:28:37+00:00

https://twitter.com/_/status/1063982277275701249

@taoeffect @Alien_Scientist It was a rhetorical question.

2018-11-18T02:27:50+00:00

https://twitter.com/_/status/1063982079388479495

@taoeffect @Alien_Scientist Not that hanging the top 20% of WTC1 from a crane is possible - another way in which my model is vastly stronger than WTC1.

Scale is everything here. Square cube, etc. Using a real building would be good, but to illustrate an isolated point, small models suffice. Tradeoffs.

2018-11-18T02:25:12+00:00

https://twitter.com/_/status/1063981418034847744

@taoeffect @Alien_Scientist Regarding "playing with cards." Imagine for a second you had the top 20% of WTC1 dangling from a very large crane. Would you just swing it into place and drop it? Or would it be very carefully moved a fraction of an inch at a time. Scaled to that my move are gigantic and rapid.

2018-11-18T02:21:15+00:00

https://twitter.com/_/status/1063980423112359936

@taoeffect @Alien_Scientist No, it was not supposed to be a building. It's illustrating a general principle, abstracted to this model.

2018-11-18T02:01:04+00:00

https://twitter.com/_/status/1063975342983901185

@taoeffect @Alien_Scientist We probably could. You just need to understand why they don't apply in a simple manner to large rigid bodies, and certainly not to inelastic bodies, and absolutely not to complex breakably connected assemblies of inelastic bodies.

2018-11-18T01:54:52+00:00

https://twitter.com/_/status/1063973783696957443

@taoeffect @Alien_Scientist And which real physics did you want to discuss? Euler buckling?

2018-11-18T01:53:50+00:00

https://twitter.com/_/status/1063973525675925504

@taoeffect @Alien_Scientist If the question is "Do you believe Israel is justified in how it treats Palestinians?" then the answer is "I'm not that familiar with the situation, but I'd guess frequently it is not justified"

2018-11-18T01:41:29+00:00

https://twitter.com/_/status/1063970414307594241

@taoeffect @Alien_Scientist I don't see how my feelings about Israel apply to things like Iron Microspheres.

I imagine you think Israel is responsible, and you want to figure out if I think they are bad or if I will defend them?

I though you wanted to debate physics, and now you have slid into Israel.

2018-11-18T01:15:23+00:00

https://twitter.com/_/status/1063963846270828544

@taoeffect @Alien_Scientist Complicated questions that do not yield to a simple answer. Can you explain WHY you are asking? What exactly is it that you want to learn?

2018-11-18T01:08:01+00:00

https://twitter.com/_/status/1063961994259161089

@zhoumamma @LondonSkywatch @TheTrueFamasss @twistedcomputer I know because I've heated steel to yellow hot in my fire. That's over 1100Â°C

2018-11-18T00:37:31+00:00

https://twitter.com/_/status/1063954318397599745

@LondonSkywatch Where is WHAT?

2018-11-18T00:36:35+00:00

https://twitter.com/_/status/1063954083206193153

@LondonSkywatch Where is what?

2018-11-18T00:35:53+00:00

https://twitter.com/_/status/1063953907662020608

@taoeffect @Alien_Scientist Seems poor. I'd go for a two state solution. However I'm no expert in the middle east.

2018-11-18T00:27:56+00:00

https://twitter.com/_/status/1063951907784290304

@LondonSkywatch @zhoumamma @TheTrueFamasss @twistedcomputer You think there's a big conspiracy to edit all the science books to hide how hot fires burn, so people won't get suspicious about Agenda 21 when they see car's aluminum wheels melt in a forest fire?

2018-11-18T00:25:23+00:00

https://twitter.com/_/status/1063951265464369152

@taoeffect @Alien_Scientist No.

2018-11-18T00:19:47+00:00

https://twitter.com/_/status/1063949854232072192

@LondonSkywatch @zhoumamma @TheTrueFamasss @twistedcomputer And really you might want to ask "how hot does a tire burn in a wind-driven wildfire?" As that's the closest thing to the wheel.

2018-11-18T00:17:58+00:00

https://twitter.com/_/status/1063949397371707392

@LondonSkywatch @zhoumamma @TheTrueFamasss @twistedcomputer Temperature varies at different points in a fire, and under different conditions. High winds and lots of fuel can make it much hotter.

2018-11-18T00:15:27+00:00

https://twitter.com/_/status/1063948765977964544

@zhoumamma @LondonSkywatch @TheTrueFamasss @twistedcomputer All which green trees? Were they green?
Depends how much fire there is, if there's a long lasting 1000Â°C going on then a tree is going to burn even with maximum water load.

2018-11-18T00:04:07+00:00

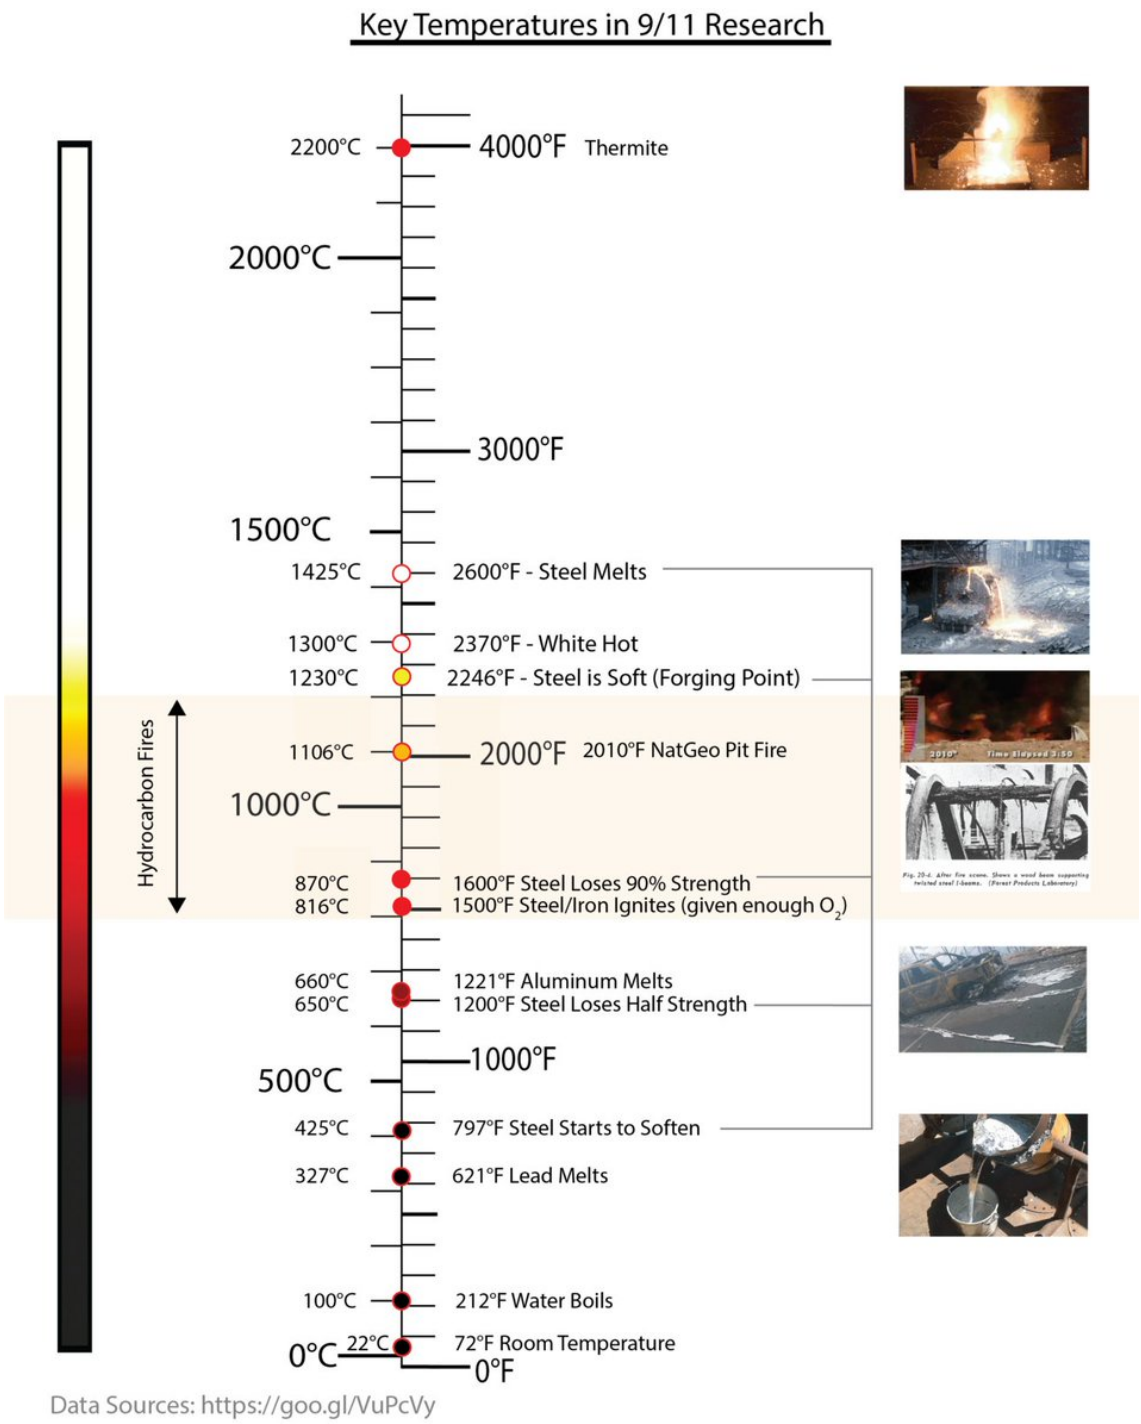
https://twitter.com/_/status/1063945914618789888

@LondonSkywatch @zhoumamma @TheTrueFamasss @twistedcomputer Even this fairly ordinary forest fire reached 850Â°C https://www.youtube.com/watch?v=zvPa_yEEd4E
Your article says 1.100Â°C

2018-11-17T23:58:38+00:00

https://twitter.com/_/status/1063944533908451329

@LondonSkywatch @zhoumamma @TheTrueFamasss @twistedcomputer Aluminum, usually from wheels. Hydrocarbon fires can burn a lot hotter than that.
http://pbs.twimg.com/media/DsPjzTWU8AAu-VM.jpg



http://pbs.twimg.com/media/DsPjzTWU8AAu-VM.jpg

2018-11-17T23:27:52+00:00

https://twitter.com/_/status/1063936790183141377

https://www.metabunk.org/explained-unburned-trees-next-to-burned-down-structures-as-evidence-of-secret-energy-weapons.t9168/ https://www.youtube.com/watch?v=mkH5I0lXiFs

---

2018-11-16T23:38:37+00:00

https://twitter.com/_/status/1063577107186429952

@taoeffect @PollManFEC @Bollyn_CL What physics thing is that?

2018-11-16T23:37:09+00:00

https://twitter.com/_/status/1063576740830662656

@taoeffect @Alien_Scientist Consider. But to continue to consider it is odd. Is it not obvious that planes flew into the twin towers? Is it not obvious that scores of people would be videoing after the first impact? Isn't it obvious you can't fake 10,000 eyewitnesses? What exactly are you still

considering?

2018-11-16T22:39:37+00:00

https://twitter.com/_/status/1063562260616929281

@taoeffect @Alien_Scientist I consider the no-plane theory to be obviously false, and I'm surprised you even consider it. There were literally tens of thousands of eyewitnesses. There are hundreds of millions of people who know someone they trust who was an eyewitness. Their recollections match the videos.

2018-11-16T22:31:35+00:00

https://twitter.com/_/status/1063560237615992833

@taoeffect @PollManFEC @Bollyn_CL I pick things to debunk based on A) if they are wrong (either obviously, or after some investigation), and B) if nobody else has debunked it sufficiently.

I enjoy the investigation, but the challenge of communicating is fascinating. Hence the book.

2018-11-16T22:26:19+00:00

https://twitter.com/_/status/1063558914141114368

@taoeffect @PollManFEC @Bollyn_CL I just like figuring things out, and fixing things that are broken. I was always very good at debugging code, so debunking was a natural extension. After I retired I took flying lessons, which led me to the chemtrail theory, and I started blogging.

2018-11-16T22:24:21+00:00

https://twitter.com/_/status/1063558419116748800

@taoeffect @PollManFEC @Bollyn_CL My High School Physic Teacher was Frank A. Ford (aka FAF). But I actually learned a lot more in Maths (UK, 1980s), where we focussed on Mechanics and 3D coordinate geometry. Sadly I forget the names of my Maths teachers. But here's a photo! http://pbs.twimg.com/media/DsKEmPhUcAE-MpC.jpg

@taoeffect @Alien_Scientist Which no-plane theory?

2018-11-16T15:03:01+00:00

https://twitter.com/_/status/1063447352260902912

@PollManFEC @Bollyn_CL Because he'd just want to talk about zionist conspiracies, and I'm interested in physics.

2018-11-16T12:05:41+00:00

https://twitter.com/_/status/1063402724153126914

@Alien_Scientist The problem with this theory is that thermite "weakens" structural steel by melting it. This leaves very obvious evidence - ragged melted steel, slag,and a patina of aluminum oxide. But no, there was nothing like this.

https://twitter.com/_/status/1063400627101827072

@Alien_Scientist So your theory is that it was CD that just looked and acted like an impact/fire/gravity collapse?

This reminds me of other theories, like how chemtrails are poison spraying that just looks and acts exactly like contrails. Or how the Earth is flat, but just looks and acts round.

---

These iron-rich spherical particles—or "spherules," as they are sometimes called—can only come about if iron is melted and then "sprayed into the air so that surface tension draws the molten droplets into near-spherical shapes."[72]

Accordingly, the USGS report mentioned (without explaining) the existence of particles in the dust that should not have been there, according to the NIST explanation of the collapses.

I-D. Report by the Steven Jones Group

NIST also ignored another scientific report describing phenomena in the WTC dust that could have been produced only by extremely high temperatures. Entitled, in fact, "Extremely High Temperatures During the World Trade Center Destruction," this report, written by Steven E. Jones and seven other scientists, pointed out the existence of particles in the dust that required even higher temperatures than those implied by the RJ Lee and USGS reports.

Jones and his colleagues performed tests using their own samples of WTC dust, which had been collected shortly after the destruction of the WTC—either very shortly afterward or from the inside of nearby buildings (which means that the dust could not have been contaminated by cleanup operations at Ground Zero). They reported finding "an abundance of tiny solidified droplets roughly spherical in shape (spherules)," which were primarily "iron-rich . . . and silicates." The iron-rich spherules would have required a temperature of 1,538°C (2,800°F). The silicates often contained aluminum, and aluminosilicate spherules, which were found in abundance in the dust, would have required a temperature of 1,450°C (2,652°F).[73]

Iron could not have arisen from the steel alone and should not have been found in the rubble. The iron, which needs to be accounted for, is a byproduct of the thermite reaction.

Still more remarkable, the Jones group reported, was a spherule found in the dust that was not mentioned in USGS's "Particle Atlas," and which was obtained only through an FOIA request, namely, "a molybdenum-rich spherule," which had been observed and studied by the USGS team. This information is remarkable, because molybdenum (Mo) is "known for its extremely high

https://twitter.com/_/status/1062852840731754496

@LondonSkywatch @zhoumamma @twistedcomputer I recommend you ask a scientist. But the ionosphere really has nothing at all to do with what happens on the ground.

There a lot of burnt stuff in the fire because it's a big fire. That's all.

2018-11-14T23:36:23+00:00

https://twitter.com/_/status/1062851769955364864

@zhoumamma @twistedcomputer @LondonSkywatch Many people are asking this. The answer is that brick faced structures usually have wood framing, and the melted metal is usually aluminum. Live (green) trees are very hard to burn because of their moisture content, bark, and density. See: https://www.youtube.com/watch?v=mkH5I0lXiFs

5. The Framers of our Constitution embraced a "profound national commitment to the principle that debate on public issues should be uninhibited, robust, and wide-open, and that it may well include vehement, caustic, and sometimes unpleasantly sharp attacks on government and public officials." *N.Y. Times v. Sullivan*, 376 U.S. 254, 270 (1964). The President lacks the authority to quash "[t]he sort of robust political debate encouraged by the First Amendment"—debate that is "bound to produce speech that is critical of those who hold public office." *Hustler Magazine, Inc. v. Falwell*, 485 U.S. 46, 51 (1988). That is why the D.C. Circuit has been clear that "the protection afforded newsgathering under the first amendment guarantee of freedom of the press requires that . . . access [to White House press facilities] not be denied arbitrarily or for less than compelling reasons." *Sherrill v. Knight*, 569 F.2d 124, 129 (D.C. Cir. 1977). And "notice . . . of the factual bases for denial [of access to White House press facilities] with an opportunity to rebut is a minimum prerequisite for ensuring that the denial is . . . [not] based on arbitrary or less than compelling reasons." *Id.* at 131.

@taoeffect @Alien_Scientist It is. I've been investigating chemtrails for quite a bit longer. It's also a smaller subject.

2018-11-13T15:59:03+00:00

https://twitter.com/_/status/1062374288982859776

@taoeffect @Alien_Scientist How about the Chemtrails section?

2018-11-13T15:58:18+00:00

https://twitter.com/_/status/1062374103242301440

@Alien_Scientist @taoeffect If itâ□□s a fallacy then itâ□□s certainly one that AE911 are guilty of. And more so, as they represent an extreme minority position - asserting absolute proof of CD.

2018-11-13T03:26:43+00:00

https://twitter.com/_/status/1062184960516214784

@AHome4Electrons @Alien_Scientist Sure I can.

2018-11-12T19:49:37+00:00

https://twitter.com/_/status/1062069928751067136

@_lets_do_it_ @MarkuzOcampo Then how do you know that "level" always means "planar?"

2018-11-12T16:26:36+00:00

https://twitter.com/_/status/1062018837657214982

@_lets_do_it_ @MarkuzOcampo

https://www.metabunk.org/curvature-and-refraction-in-surveying-and-leveling-through-history-old-books-etc.t8856/

2018-11-12T16:19:42+00:00

https://twitter.com/_/status/1062017098778533888

@taoeffect @Alien_Scientist I did not claim to have polls. â□□Numerousâ□□ is not the same thing as a high perecentage.

2018-11-12T11:37:02+00:00

https://twitter.com/_/status/1061945963231686656

@1sosublimeM @Marfoogle And seriously, are you entirely lacking in imagination? You can't think of a single reason why someone would change storage locations?

2018-11-12T11:35:53+00:00

https://twitter.com/_/status/1061945673191313410

@1sosublimeM @Marfoogle What does moving them have to do with anything? They are grave liners. They get used a lot as millions of people die every year. They store them somewhere.

2018-11-12T11:34:24+00:00

https://twitter.com/_/status/1061945299978006528

@Alien_Scientist How many active high-rise structural engineers? Zero.

2018-11-12T11:32:26+00:00

https://twitter.com/_/status/1061944805628928005

@Alien_Scientist @stephenfry None of those connections are at all surprising. NIST is a big scientific organization. The article is just dot connecting predicated on "the substantial evidence for the use of explosives at the WTC" which does not actually exist.

2018-11-12T11:23:03+00:00

https://twitter.com/_/status/1061942445196247040

@Alien_Scientist Perhaps start by explaining why "they" needed nanothermite, when they already flew planes into the buildings and set them on fire. And all of mainstream, engineering agrees that's would cause the collapse.

2018-11-12T11:20:26+00:00

https://twitter.com/_/status/1061941786828922880

@Alien_Scientist So what is your next step? How can you effectively proceed from here? Perhaps focus on making a better case?

2018-11-12T10:37:29+00:00

https://twitter.com/_/status/1061930979328122880

@Marfoogle @1sosublimeM Would you believe it if I checked my grammar?

2018-11-12T10:36:10+00:00

https://twitter.com/_/status/1061930645096554496

@Alien_Scientist No, pretty much entirely unlike that.

2018-11-11T21:53:28+00:00

https://twitter.com/_/status/1061738704857849856

@MarkuzOcampo Look it up.

2018-11-11T16:44:27+00:00

https://twitter.com/_/status/1061660939651436550

@Alien_Scientist Regardless of the truth of your "who did 9/11" inforgraphic's claims, the issue of if WT7 and Towers were destroyed by controlled demolition is very important. It's like investigating a murder assuming someone was shot, when they were actually poisoned.

2018-11-11T04:25:40+00:00

https://twitter.com/_/status/1061475018830278657

@wehadalaugh @taoeffect #12

https://www.nist.gov/topics/disaster-failure-studies/faqs-nist-wtc-towers-investigation

---

2018-11-11T04:06:03+00:00

https://twitter.com/_/status/1061470083468292096

@wehadalaugh @taoeffect But they did provide an explanation. How do you feel it's lacking?

2018-11-11T03:16:02+00:00

https://twitter.com/_/status/1061457495720288257

@briansolis @alexisohanian Or as we called it at Neversoft: "Hardcore Week".

Occasionally you might have to work a bit more, but it should not be default behavior.

2018-11-11T02:47:01+00:00

https://twitter.com/_/status/1061450191994159104

@taoeffect @WTC7Evaluation @truthandshadows Well, I've still not seen a specific and correct objection from you as to the content. Could you possibly focus on one, so we could resolve it?

2018-11-11T02:43:19+00:00

https://twitter.com/_/status/1061449263010406400

@taoeffect @WTC7Evaluation @truthandshadows I feel just fine thank you. I even cry at the movies. But I think I am (generally) correct. And when I'm wrong I hurry to correct my mistakes.

2018-11-11T02:41:52+00:00

https://twitter.com/_/status/1061448896503701504

@taoeffect @WTC7Evaluation Well I like to focus on individual claims of evidence. There's aways going to be someone who says "you did not debunk 9/11".

With Hulsey though, I'm waiting for him to actually produce some data.

2018-11-11T02:38:34+00:00

https://twitter.com/_/status/1061448066866139136

@taoeffect Hmm, I use TweetDeck. Didn't realize this was a problem. Sorry, I'll try to avoid it. So I suppose I should reply to my reply if I want to reply twice?

2018-11-11T02:36:38+00:00

https://twitter.com/_/status/1061447580712759302

@taoeffect @WTC7Evaluation It has not finished. They have not even submitted a paper for peer-review yet. My debunking was about their premature claim from last year.

2018-11-11T02:35:08+00:00

https://twitter.com/_/status/1061447202915020800

@taoeffect Sorry, I'm unclear what you mean by "branch threads". I'm just having one conversation with you here.

2018-11-11T02:32:41+00:00

https://twitter.com/_/status/1061446585320525824

@taoeffect Well, you'd have to convince me I'm wrong first. What did you think of the microspheres thing? https://www.youtube.com/watch?v=hyFIHZwMm4w

2018-11-11T02:29:58+00:00

https://twitter.com/_/status/1061445901833490432

@taoeffect Well what would you prefer that I do? Keep introducing people to 9/11 Truth, or stop debunking the bits I think are false?

2018-11-11T02:21:48+00:00

https://twitter.com/_/status/1061443847002107906

@taoeffect Earlier your were thanking me for introducing people to 9/11. But now you think I should go to jail?

What effect do you think my debunking is having? Do you want to encourage me or stop me?

2018-11-11T02:19:34+00:00

https://twitter.com/_/status/1061443284348821504

@taoeffect How is that a lie? At worst I'm bad at physics. But I genuinely believe that my experiment is ILLUSTRATIVE of ONE ASPECT of the collapse of the Twin Towers. And I've fully engaged in extensive conversation those who think otherwise (or who misunderstand what I was doing)

2018-11-11T02:11:57+00:00

https://twitter.com/_/status/1061441370177425408

@taoeffect Example?

2018-11-11T02:11:37+00:00

https://twitter.com/_/status/1061441286392111104

@taoeffect You seem like a smart chap. PKI isn't trivial (I did my CS degree final year project on it, implementing an RSA protocol.) So I'm curious as to what route got you into believing 9/11 controlled demolition was proven. Did you actually do any of the math involved?

2018-11-11T02:09:00+00:00

https://twitter.com/_/status/1061440627353649152

@taoeffect Well, you are wrong.

But suppose I was, wouldn't the easiest way to expose me be to point out lies in my book, or on my web site?

Why do you think nobody does this?

2018-11-11T02:01:03+00:00

https://twitter.com/_/status/1061438626850959361

@taoeffect There's actually a quite long section on Northwood, and another on Tonkin. You might find it interesting - even if you think I'm a shill.

2018-11-11T01:29:39+00:00

https://twitter.com/_/status/1061430722999705600

@taoeffect No, Iâ□□m focusing on the â□□Controlled Demolitionâ□□ theory, because itâ□□s a HUGE distraction from what actually happened.

2018-11-11T01:24:28+00:00

https://twitter.com/_/status/1061429419355529217

@taoeffect Itâ□□s true. Iâ□□m a retired video game programmer. I did Tony Hawkâ□□s Pro Skater.

2018-11-11T01:11:09+00:00

https://twitter.com/_/status/1061426066445594625

@taoeffect Nobody pays me, so I guess you will have to thank me directly.

2018-11-10T00:34:08+00:00

https://twitter.com/_/status/1061054362393296896

Fixed! Also added the steel forging point, and grouped the various steel temps.

@Alien_Scientist @vernon911truth @AHome4Electrons @Metabunk @911truthnews @911news @AE911Truth @911TruthBurnout And that link is NOT any kind of official HTA investigation manual. It's an investigation report that Steven Carman wrote in 1994 into some unique fires in Seattle in the 1980s. It's an interesting read though:

http://pbs.twimg.com/media/DrQX4iBU8AMOO0c.jpg

To fully appreciate the complexities of these fires, investigators will not be able to rely solely on conventional wisdom of fire behavior, but must gain a full understanding of scientific principles intrinsic to combustion. A reliance on experience gained only at regular fires may not provide the rational basis upon which an HTA fire cause must be established. Investigators must be able to appreciate concepts such as HTA-like damage being natural to accidental fires, rapid fire growth being inherent to certain scenarios, and melted metals indicating nothing more than a substantial draft.

Carman, p 149

http://pbs.twimg.com/media/DrQX4iBU8AMOO0c.jpg

https://twitter.com/_/status/1057313747381837825

@GalacticService Everything is made of chemicals, but you don't put "chem" in front of everything, do you?

The point of calling something a "chemtrail" is to distinguish it from a contrail. i.e. it's saying it is not water condensation, but some other chemical.

2018-10-30T14:49:16+00:00

https://twitter.com/_/status/1057283299184263168

@richierigg1 Those are photos of ballast barrels. Used during testing of new aircraft to simulate passengers. Like these: http://pbs.twimg.com/media/Dqsme4eV4AQ9gNk.jpg

---

Water tanks provided ballast to simulate passenger and cargo loads for flight testing. Not only could the tanks simulate various amounts of weight, they could also shift the weight fore and aft in flight through connecting pipes to test different center-of-gravity configurations. *Boeing*

http://pbs.twimg.com/media/Dqsme4eV4AQ9gNk.jpg

During flight tests in 1994, the cabin interior of the prototype *777* was filled with what at first glance looked like aluminum beer kegs. In fact, these 55-gallon barrels contained water. The contents of two dozen barrels in the forward cabin and a like number of barrels in the aft section were pumped back and forth to simulate shifts in center of gravity that would result from passengers moving about. The top photo shows the cabin as it is when the *777* is delivered.

@__dregs__ @JoeUscinski Yeah, over time the political context is lost, and the conspiracy believers are less politically polarized. Like with 9/11, where it was more anti-Republican at the time. Now it's just anti-establishment.

Before conspiracy theories were called "conspiracy theories" they were called "devil theories". Blame all your problem on a "mysterious clique".

The Salt Lake Tribune

Page 16A Saturday Morning, June 20, 1964

Marquis Childs

Goldwaterites Have Scapegoat Ready

WASHINGTON—Will a Goldwater ticket offer a true test of the Goldwaterites' claim that the country has been waiting for a chance to vote for a real conservative?

Until recently moderates and liberals in both parties were saying that it might be well to let the senator have it and show by his overwhelming rejection that there was no substance to this claim. Partly this was in the conviction that President Johnson was in any event unbeatable.

Mr. Childs

But there are doubts as to whether the hard-core Goldwater followers would accept the results of such a test. In fact, if the senator fails of the nomination, or if nominated he is defeated, they will find a scapegoat to blame.

Their suspicions are already centering on the likely scapegoat — the press and the other media of communication.

Otherwise quite rational-seeming Republicans are saying that the press has distorted Goldwater's views. Ignoring the great bulk of the senator's own writings in two books, innumerable speeches and interviews making plain his all-out stands on both foreign and domestic policy, they see the press deliberately presenting him as an extremist. It is only a short step to the conclusion that a secret conspiracy is at work to frustrate the senator and keep him from the presidency.

The conspiracy or devil theory of politics simplifies life for those who embrace it. Any setback can be blamed on the devils conspiring against you.

THE DEVIL for the Goldwaterites is something variously called "the eastern establishment" or "the eastern conspiracy," and at its heart are press, radio and television.

At times the senator himself has seemed to lean on the conspiracy theory. One of the strangest episodes in his California primary campaign was the private press conference he held in the offices of the San Diego Union, a newspaper favorable to his cause. Only six reporters were personally invited by Goldwater to this conference.

They quoted him as talking about a "mysterious clique" of eastern Republicans.

This "mysterious clique" had tried to get General Eisenhower to join the stop-Goldwater movement. They had failed. The press was distorting what he had said about the possibility of using low-yield nuclear weapons to defoliate the trees in Viet Nam and making it sound as though he had advocated the use of nuclear bombs which he had not done.

In its farthest-out form, the "mysterious clique" or conspiracy theory was seen in a leaflet distributed by the thousands in the hotel lobby at the Cleveland governors' conference and presumably being circulated throughout the country.

IN EFFECT an attack on New York as the center of the conspiracy, it opens with a quotation from Senator Robert A. Taft explaining why he was defeated for the nomination by General Eisenhower in 1952:

"First it was the power of of the New York financial interests and a large number of businessmen subject to New York influence . . . second, four-fifths of the influential newspapers in the country were opposed to me continuously and vociferously and many turned themselves into propaganda sheets for my opponent . . ."

BUT ASSAILING New York as a center "alien" to America, the leaflet goes on to the easy logic of the conspiracy view: ". . . In the past 12 presidential elections, 12 of the nominees of the two major political parties were New Yorkers, some by birth and some by adoption. During this time, Communist domination in the world has grown from 40,000 to more than one billion people."

Today most of the influential newspapers oppose Senator Goldwater. There is no secret about their opposition. They are for the most part Republican in orientation and on the practical side they do not believe Goldwater has a chance to carry the big-city states essential to win.

Furthermore, they are fearful that if he heads the ticket many congressmen and state legislatures will be lost.

On the side of ideas, the Goldwater views in recent years on the United Nations, the federal income tax, Social Security and the Tennessee Valley Authority raise grave doubts about the senator's judgment if he were to become president. These doubts have been expressed in editorials in newspapers across the country and not just in the east. Many of these same newspapers opposed Senator Taft and favored General Eisenhower for much the same reasons.

The devil theory — the conspiracy of a "mysterious clique" — is consoling because it puts the hero beyond any judgment of his acts or his ideas. But it automatically rules out any real test of voter sentiment.

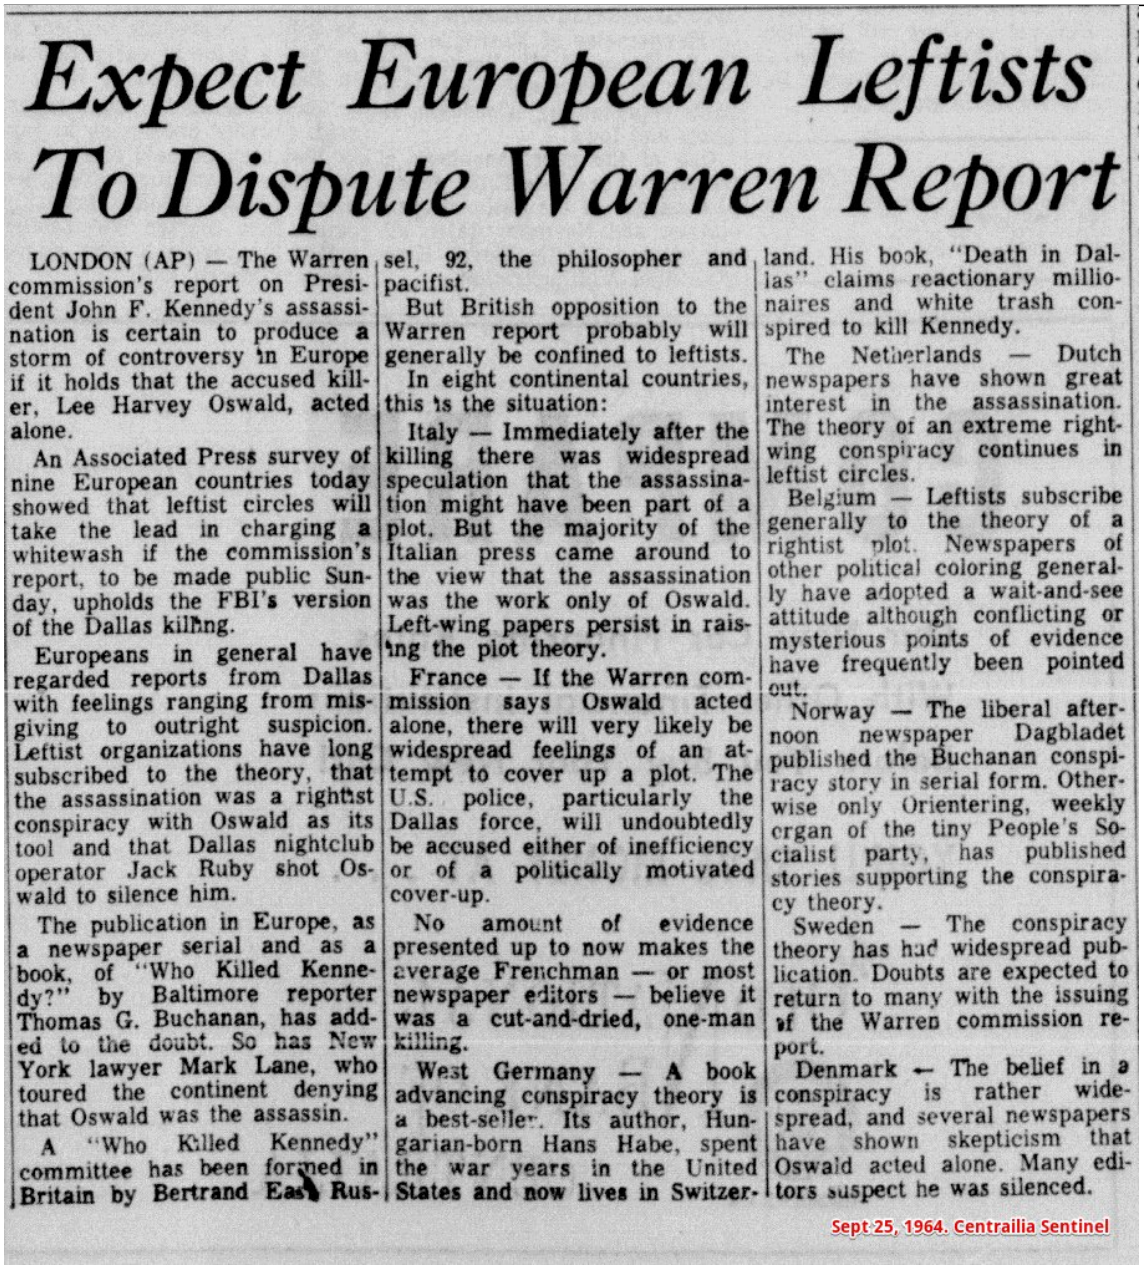
A fascinating 1964 article on the prevalence of JFK assassination conspiracy theories in Europe.

Just a year after the event, just before the release of the Warren commission report. As now, belief in political conspiracies was strongly influence by ideology.
@JoeUscinski http://pbs.twimg.com/media/Dqmz3DzUUAA1VYA.jpg



Expect European Leftists To Dispute Warren Report

LONDON (AP) — The Warren commission's report on President John F. Kennedy's assassination is certain to produce a storm of controversy in Europe if it holds that the accused killer, Lee Harvey Oswald, acted alone.

An Associated Press survey of nine European countries today showed that leftist circles will take the lead in charging a whitewash if the commission's report, to be made public Sunday, upholds the FBI's version of the Dallas killing.

Europeans in general have regarded reports from Dallas with feelings ranging from misgiving to outright suspicion. Leftist organizations have long subscribed to the theory, that the assassination was a rightist conspiracy with Oswald as its tool and that Dallas nightclub operator Jack Ruby shot Oswald to silence him.

The publication in Europe, as a newspaper serial and as a book, of "Who Killed Kennedy?" by Baltimore reporter Thomas G. Buchanan, has added to the doubt. So has New York lawyer Mark Lane, who toured the continent denying that Oswald was the assassin.

A "Who Killed Kennedy" committee has been formed in Britain by Bertrand Russel, 92, the philosopher and pacifist.

But British opposition to the Warren report probably will generally be confined to leftists.

In eight continental countries, this is the situation:

Italy — Immediately after the killing there was widespread speculation that the assassination might have been part of a plot. But the majority of the Italian press came around to the view that the assassination was the work only of Oswald. Left-wing papers persist in raising the plot theory.

France — If the Warren commission says Oswald acted alone, there will very likely be widespread feelings of an attempt to cover up a plot. The U.S. police, particularly the Dallas force, will undoubtedly be accused either of inefficiency or of a politically motivated cover-up.

No amount of evidence presented up to now makes the average Frenchman — or most newspaper editors — believe it was a cut-and-dried, one-man killing.

West Germany — A book advancing conspiracy theory is a best-seller. Its author, Hungarian-born Hans Habe, spent the war years in the United States and now lives in Switzerland. His book, "Death in Dallas" claims reactionary millionaires and white trash conspired to kill Kennedy.

The Netherlands — Dutch newspapers have shown great interest in the assassination. The theory of an extreme right-wing conspiracy continues in leftist circles.

Belgium — Leftists subscribe generally to the theory of a rightist plot. Newspapers of other political coloring generally have adopted a wait-and-see attitude although conflicting or mysterious points of evidence have frequently been pointed out.

Norway — The liberal afternoon newspaper Dagbladet published the Buchanan conspiracy story in serial form. Otherwise only Orientering, weekly organ of the tiny People's Socialist party, has published stories supporting the conspiracy theory.

Sweden — The conspiracy theory has had widespread publication. Doubts are expected to return to many with the issuing of the Warren commission report.

Denmark — The belief in a conspiracy is rather widespread, and several newspapers have shown skepticism that Oswald acted alone. Many editors suspect he was silenced.

I did not say there was no evidence for it. The simple fact that the calculator matches reality is evidence the value is correct.

2018-10-23T17:39:57+00:00

https://twitter.com/_/status/1054789538172686336

@ASpinOfTheWheel So essentially you get a shower of sparks that are individually incredibly hot, but don't, in total, contain a lot of heat.

2018-10-23T17:38:07+00:00

https://twitter.com/_/status/1054789078346956800

@ASpinOfTheWheel No. Iron in air only burns in small (or very thin) pieces, so the amount of energy is small. You can't really ignite a pile of fine iron powder, it needs to be in suspension (in air)

2018-10-23T17:09:44+00:00

https://twitter.com/_/status/1054781935388581889

@ASpinOfTheWheel If passed through a flame it would ignite the smaller particles. This

mechanism would probably be a significant source of both iron microspheres, and small paint chips with a layer of iron-rich material on the back.

2018-10-23T17:06:37+00:00

https://twitter.com/_/status/1054781148599996422

@devgru1980mi For example? What's the best bit of new evidence?

2018-10-23T16:07:10+00:00

https://twitter.com/_/status/1054766189719638017

When steel fails under tension, the shock wave blows off the entire surface in a fine dust of iron-rich flakes. https://youtu.be/vPBM0g9usMs?t=184

http://pbs.twimg.com/tweet_video_thumb/DqNG5kEU8AA8zat.jpg

http://pbs.twimg.com/tweet_video_thumb/DqNG5kEU8AA8zat.jpg

2018-10-23T15:52:23+00:00

https://twitter.com/_/status/1054762465790029826

@devgru1980mi Why, is there some new video? Some other new evidence?

2018-10-21T20:59:25+00:00

https://twitter.com/_/status/1054114959322312704

Gave a copy of my book to @stephenfry as some small thanks for giving it such a good blurb.

@adampfinch Who always believes the official narrative? Nobody I know.
That does not mean you have to automatically believe the opposite though.

2018-10-15T20:46:30+00:00
https://twitter.com/_/status/1051937383363403776
@adampfinch Why, so we can murder firemen?

What could possibly be the reason?

2018-10-15T19:10:07+00:00

https://twitter.com/_/status/1051913127267168256

@adampfinch So, they wanted to demolish the Plasco building, so they secretly rigged it with silent nanothermite, then lit the building on fire, waited until a lot had burnt, then blew it up carefully in sequence to make it look like a progressive collapse, killing 20 firefighters. Why? How?

2018-10-15T19:08:33+00:00

https://twitter.com/_/status/1051912733610790912

@adampfinch Okay then let's just go with "Lots of firemen died."

2018-10-15T18:11:50+00:00

https://twitter.com/_/status/1051898458234212352

@adampfinch The Iranians did an investigation. It was just a fire. Lots of firemen died.

2018-10-15T18:05:29+00:00

https://twitter.com/_/status/1051896861819166720

2018-10-15T01:24:15+00:00

https://twitter.com/_/status/1051644891627835392

@ziyadnoo @iM_SMS @AAldoraihem @Joyce_Karam Just one Instagram post As far as I know. What else?

2018-10-14T20:33:20+00:00

https://twitter.com/_/status/1051571681238573056

@Abdullahsaad_50 @Joyce_Karam Got a link to him saying this?

2018-10-14T20:02:06+00:00

https://twitter.com/_/status/1051563821800677377

@Abdullahsaad_50 @Joyce_Karam So says Saudi media. Which family members have spoken publicly on this?

They only met in May.

2018-10-14T19:40:02+00:00

https://twitter.com/_/status/1051558265371279361

@Abdullahsaad_50 @Joyce_Karam At least according to Google Translate.

2018-10-14T19:29:52+00:00

https://twitter.com/_/status/1051555708787773440

@Abdullahsaad_50 @Joyce_Karam Yes, it says "With my wife, children and grandchildren I celebrated my 54th birthday in Jeddah."

2018-10-14T19:20:57+00:00

https://twitter.com/_/status/1051553465678217216

@Joyce_Karam Multiple sources also say that the "official" January date is not the real birthdate. It's a consequence of all pre-1975 births being listed as 1/7 (1st day of Rajab).

2018-10-14T18:49:15+00:00

https://twitter.com/_/status/1051545485364858880

@iM_SMS @AAldoraihem @Joyce_Karam 1-7-1440 is 22 Jan 1958. But 1-7 is a placeholder used for all Saudi's born before 1975, due to bad government records. It's not his birthday.

2018-10-14T17:05:08+00:00

https://twitter.com/_/status/1051519285703540737

@iM_SMS @Joyce_Karam Depends which calendar you use. 1-7-1440 (his "Hijri birthday") is September 18, 2018

2018-10-14T16:55:57+00:00

https://twitter.com/_/status/1051516972104437760

@MashhourII Well she said that's when the party was. The Hijrah calendar might account for this.

Where's the passport photo from?

https://www.metabunk.org/when-was-jamal-khashoggi-born-and-when-was-his-birthday.t10047/#

2018-10-14T16:53:33+00:00

https://twitter.com/_/status/1051516371471818752

@Joyce_Karam Hijri calandar may account for differences. Kashogi's birthdate on the passport is 1-7-1477 in Hijrha, 22 Jan 1958 in Grecorian. This year is 1440, and 1-7-1440 (his "Hijri birthday") is September 18, 2018, a few weeks ago.

https://www.metabunk.org/when-was-jamal-khashoggi-born-and-when-was-his-birthday.t10047/

2018-10-10T22:07:21+00:00

https://twitter.com/_/status/1050145789891080192

@brucebanner5280 Here's a straight red line and a curved black line. Can you do a vertical stretch on this and see if the red line bulges. http://pbs.twimg.com/media/DpLd4hUUYAAgrtr.jpg

---

http://pbs.twimg.com/media/DpLd4hUUYAAgrtr.jpg

2018-10-10T21:13:07+00:00

https://twitter.com/_/status/1050132141202268160

@Earths_a_Plane @jaredvc @princecrocoduck @ZZerker @Astro_Alex You would thing people would have noticed. If the Earth was actually flat. Why do you think they did not?

2018-10-10T16:24:45+00:00

https://twitter.com/_/status/1050059572759605248

@brucebanner5280 Can vertical stretching make a straight line appear curved?

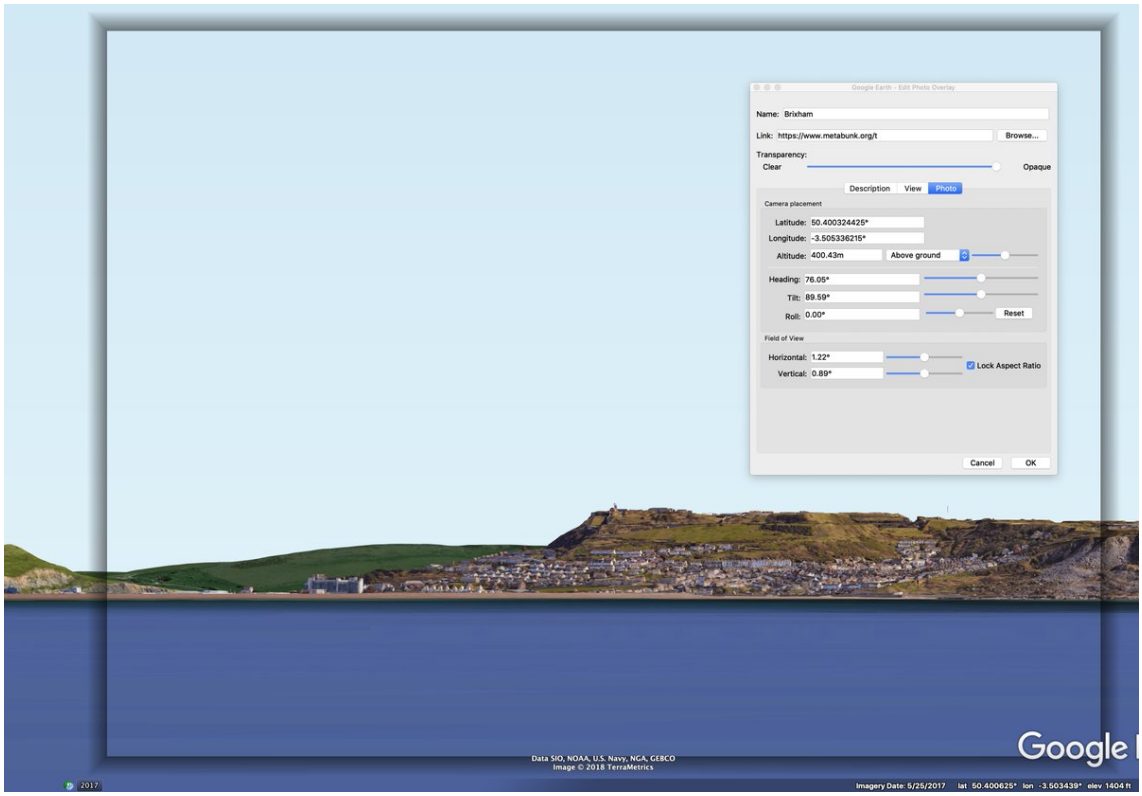
Try it.

2018-10-10T16:23:37+00:00

https://twitter.com/_/status/1050059287593017344

@Earths_a_Plane @jaredvc @princecrocoduck @ZZerker @Astro_Alex Can you see this? This is what The Isle of Portland would look like on a Flat Earth from Brixham Harbour.

http://pbs.twimg.com/media/DpKO39hVsAEFk-Z.jpg



http://pbs.twimg.com/media/DpKO39hVsAEFk-Z.jpg

2018-10-10T16:17:00+00:00

https://twitter.com/_/status/1050057618796904448

@Earths_a_Plane @jaredvc @princecrocoduck @ZZerker @Astro_Alex Can you see Weston?

2018-10-10T16:16:09+00:00

https://twitter.com/_/status/1050057405214511104

@Earths_a_Plane @jaredvc @princecrocoduck @ZZerker @Astro_Alex So you often get a bunch of stuff compressed into the space right at the horizon. You need to be measuring where the tops of things are relative to the horizon. Compare against GE view.

Also, how do you know what you are looking at? Maybe closer.

2018-10-10T16:07:40+00:00

https://twitter.com/_/status/1050055271190413314

@Earths_a_Plane @jaredvc @princecrocoduck @ZZerker @Astro_Alex That's a cool location. But observations right at the horizon are notoriously variable due to the steep temperature gradient in the few meters just above the ocean â□□ which can go either way. You can see things, usually very distorted though.

2018-10-10T15:56:15+00:00

https://twitter.com/_/status/1050052399312728064

@brucebanner5280 Now try vertically stretching it. Notice the STRAIGHT lines remain straight. Notice the curve of the horizon is magnified.

2018-10-10T15:32:53+00:00

https://twitter.com/_/status/1050046518198034432

@brucebanner5280 @NASA Okay, take this image I gave you. Vertically stretch it. Notice the straight lines I added neither bulge nor distort. But the curve of the horizon becomes more

apparent. http://pbs.twimg.com/media/DpKDep1U8AIAljU.jpg

http://pbs.twimg.com/media/DpKDep1U8AIAljU.jpg

2018-10-10T15:29:39+00:00

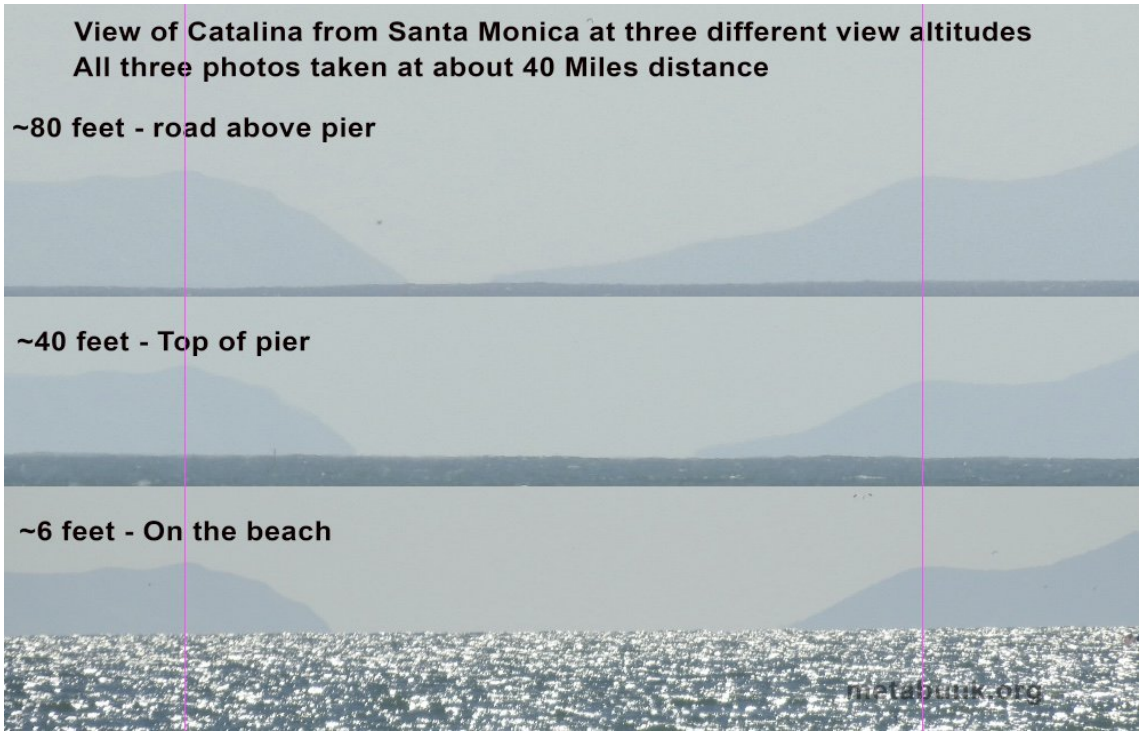
https://twitter.com/_/status/1050045703299330048

@bassninjas @fullbredmartian Iron microspheres are common. They are not difficult to make. Yet AE911 claims they can only be evidence of thermite. They did not do any research into other sources of them. I've made millions of them. I made some just now. https://www.metabunk.org/making-iron-microspheres-grinding-impacts-welding-burning.t9533/

2018-10-10T15:26:19+00:00

https://twitter.com/_/status/1050044864119812096

@Earths_a_Plane @jaredvc @princecrocoduck @ZZerker @Astro_Alex Refraction varies. At low levels it can bend so much it matches the curve of the earth. That's why low altitude observations are problematic. Use larger targets from multiple altitudes where you can see the actual shape of the target. http://pbs.twimg.com/media/DpKCJ1HU8AEeVJk.jpg



http://pbs.twimg.com/media/DpKCJ1HU8AEeVJk.jpg

2018-10-10T15:23:06+00:00

https://twitter.com/_/status/1050044054463864832

@bassninjas @fullbredmartian While you think this is a serious issue, for most people it's akin to the theory that the moon landings were faked. If you want people to look into a theory you need to provide sufficient evidence. Personal incredulity is not evidence.

2018-10-10T15:21:44+00:00

https://twitter.com/_/status/1050043713626431488

@bassninjas @fullbredmartian AE911T push the controlled demolition theory. There's no evidence to support that beyond "the collapses look weird to me, and I'm an engineer". What should the MSM look into?

2018-10-10T15:16:41+00:00

https://twitter.com/_/status/1050042441942818816

@Earths_a_Plane @jaredvc @princecrocoduck @ZZerker @Astro_Alex What are you observing?

2018-10-10T15:16:05+00:00

https://twitter.com/_/status/1050042289467183104

@bassninjas @fullbredmartian And they fail because they are very fixed in their positions. They are LESS open-minded than your average engineer, because they are 100% convinced they are right, even though their evidence is nonsense like iron microspheres, angle cut columns, or pyroclastic flows.

2018-10-10T15:14:12+00:00

https://twitter.com/_/status/1050041816874024960

@bassninjas @fullbredmartian No, but that does not automatically make them correct. Fringe positions are usually wrong. If they are correct they will be able to win people over by demonstrating they are correct. AE911T has consistent failed to do this.

2018-10-10T15:08:30+00:00

https://twitter.com/_/status/1050040383592255488

@Earths_a_Plane @jaredvc @princecrocoduck @ZZerker @Astro_Alex Of course not. But it DOES prove that there's a curve in that image.

2018-10-10T15:06:09+00:00

https://twitter.com/_/status/1050039789951442944

@Earths_a_Plane @jaredvc @princecrocoduck @ZZerker The curve is visible in the original. All stretching does is magnify it. If it were flat, then magnifying it would make it stay flat.
Here I have added some straight lines, so you can see the curve on the horizon and the cloud layers. http://pbs.twimg.com/media/DpJ9gDtU0AAH1Ch.jpg

---

http://pbs.twimg.com/media/DpJ9gDtU0AAH1Ch.jpg

@fullbredmartian Most of the hijackers were Saudi, and that's where the money came from. You can speculate beyond that. But I like to go with actual evidence.

https://twitter.com/_/status/1049437274033639425

@AnotherSapien @BadAstronomer I think good skeptical content like Phil's helps more people than the content creators realize. There's lots of people who get helped, avoid a deeper rabbit hole, and just go on with their lives. It's great to hear from them sometimes though!

2018-10-08T23:08:51+00:00

https://twitter.com/_/status/1049436489275256839

@fullbredmartian Hijacked planes hit the buildings, which caught fire and later collapsed. No explosives were used, or needed.

Just my theory though. I'd be open to new evidence, but I've already looked at quite a lot.

2018-10-08T23:07:09+00:00

https://twitter.com/_/status/1049436060512473088

@stang289 Thanks! Glad you like it. And I think our past conversations have contributed to it in some ways.

2018-10-08T23:04:20+00:00

https://twitter.com/_/status/1049435352883060736

@tykobrian @loudestsubtext Not really, no. It focusses on false conspiracy theories. There's plenty of other books on religion, so I don't think there's much I could add.

2018-10-08T18:35:47+00:00

https://twitter.com/_/status/1049367769710379008

@Moltisanti10 Excellent! Hope you find it useful.

https://twitter.com/_/status/1048348085200416768

@Stick_Pins @crackedscience It's on Amazon UK.

I don't dwell much on personality traits. Variations can make people more or less likely to become conspiracists, and can be useful for broad understand. But really anyone can fall down the rabbit hole, knowing their big-5 profile probably won't help.

2018-10-05T12:59:36+00:00

https://twitter.com/_/status/1045732199658450944

@bikerstustu It didn't all come out of an aircraft. Most of the water in a contrail comes from the atmosphere. The aircraft exhaust (99.9% CO2 and water) just raises the humidity enough to trigger the formation of a cloud (the contrail).

2018-09-28T17:31:43+00:00

https://twitter.com/_/status/1045727769584263168

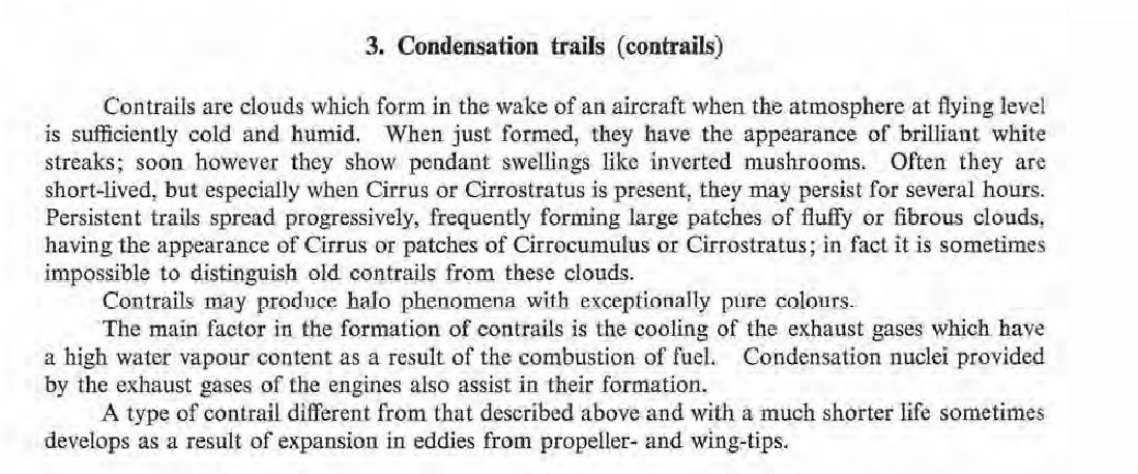
http://pbs.twimg.com/media/DoKGgUHVsAA3e0C.jpg



3. Condensation trails (contrails)

Contrails are clouds which form in the wake of an aircraft when the atmosphere at flying level is sufficiently cold and humid. When just formed, they have the appearance of brilliant white streaks; soon however they show pendant swellings like inverted mushrooms. Often they are short-lived, but especially when Cirrus or Cirrostratus is present, they may persist for several hours. Persistent trails spread progressively, frequently forming large patches of fluffy or fibrous clouds, having the appearance of Cirrus or patches of Cirrocumulus or Cirrostratus; in fact it is sometimes impossible to distinguish old contrails from these clouds.

Contrails may produce halo phenomena with exceptionally pure colours.

The main factor in the formation of contrails is the cooling of the exhaust gases which have a high water vapour content as a result of the combustion of fuel. Condensation nuclei provided by the exhaust gases of the engines also assist in their formation.

A type of contrail different from that described above and with a much shorter life sometimes develops as a result of expansion in eddies from propeller- and wing-tips.

http://pbs.twimg.com/media/DoKGp6TUcAAXZV-.jpg

https://twitter.com/_/status/1045400450445373440

@LondonSkywatch It's probably the downwash from the plane that left the left-right contrail. It was a bit higher, so out outside of that layer of humidity. Downwash pushed down less-humid air into the older contrail. There's a variety of examples of downwash doing this: http://pbs.twimg.com/media/DoICKe3VAAASH3o.jpg

http://pbs.twimg.com/media/DoIB9KSVAAEOUk9.jpg

http://pbs.twimg.com/media/DoIBuOTU0AAcoNh.jpg

3. Condensation trails (contrails)

Contrails are clouds which form in the wake of an aircraft when the atmosphere at flying level is sufficiently cold and humid. When just formed, they have the appearance of brilliant white streaks; soon however they show pendant swellings like inverted mushrooms. Often they are short-lived, but especially when Cirrus or Cirrostratus is present, they may persist for several hours. Persistent trails spread progressively, frequently forming large patches of fluffy or fibrous clouds, having the appearance of Cirrus or patches of Cirrocumulus or Cirrostratus; in fact it is sometimes impossible to distinguish old contrails from these clouds.

Contrails may produce halo phenomena with exceptionally pure colours.

The main factor in the formation of contrails is the cooling of the exhaust gases which have a high water vapour content as a result of the combustion of fuel. Condensation nuclei provided by the exhaust gases of the engines also assist in their formation.

A type of contrail different from that described above and with a much shorter life sometimes develops as a result of expansion in eddies from propeller- and wing-tips.

4. Clouds from waterfalls

High waterfalls produce spray which virtually saturates the air. The down-drafts caused by the falling water are often compensated by upward currents in their vicinity, lifting the saturated air and forming, above the waterfall, a cloud resembling a Cumulus.

The spray itself may cause brilliant rainbows.

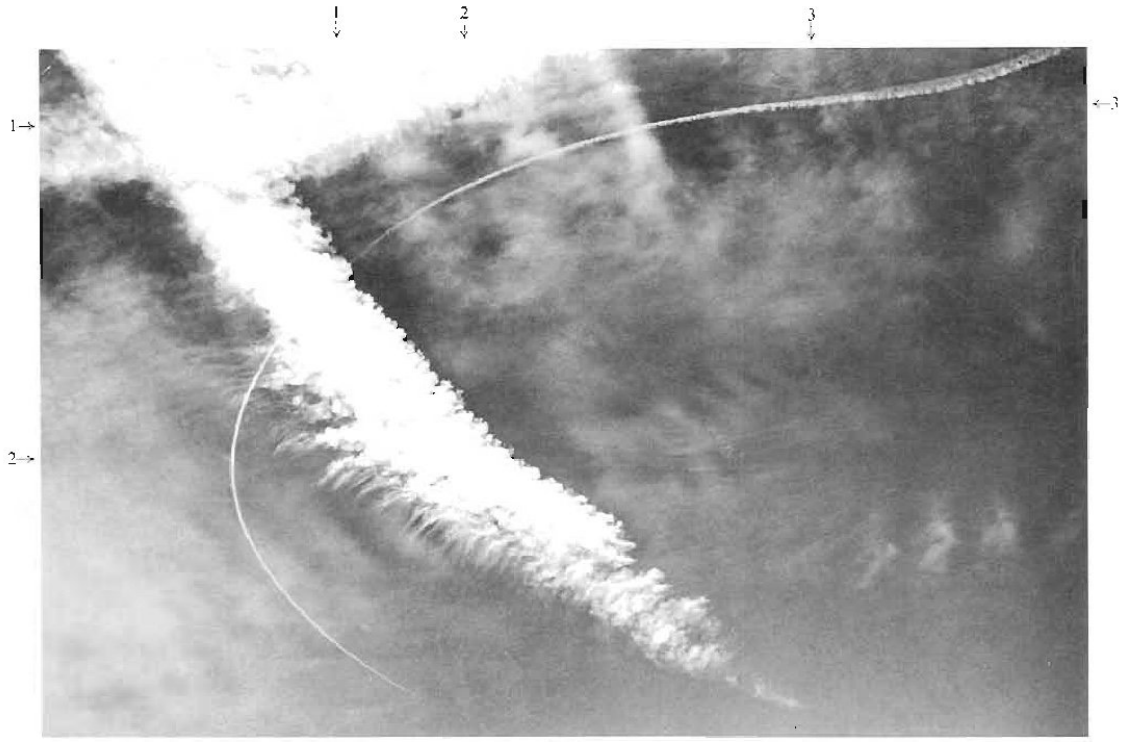
@cybernoelie The WMO has included contrails as clouds for decades. This is from the 1987 WMO International Cloud Atlas, Volume II http://pbs.twimg.com/media/DoHaYP2U0AELdzE.jpg



Royal Air Force, Farnborough (Hampshire, U.K.), 9 August 1944

Condensation trails (contrails)

Three condensation trails (1, 2, 3) can be seen. They expand with time. The two older trails (1, 2), probably made 15-30 minutes before the picture was taken, have assumed a fleecy aspect, while the most recent one (3), which is just being produced, merely looks like a white streak in the sky. Numerous Cirrus clouds can also be seen; they may have developed out of contrails formed earlier.
A weak trough associated with a low near Iceland was passing over southern England. Rather humid and warm air, associated with a weak warm front at about 700 km distance, was invading the higher layers of the troposphere from the north-west.

http://pbs.twimg.com/media/DoHaYP2U0AELdzE.jpg

https://twitter.com/_/status/1045355694331899904

@cybernoelie But I don't think most people are really interested in the microphysics and fluid mechanics of cloud growth. Contrails have been spreading into cirrus since the 1920s without much public interest. http://pbs.twimg.com/media/DoHZYoYU8AATTnQ.jpg

Cloud Formation by Supercharged Plane

An altitude flight was made in the morning at McCook Field, recently, by Lieut. J. A. Macready in a LePere with supercharged Liberty. When the airplane reached a height of 26–27,000 feet at 11.50 a. m., a long feathery white streamer was observed forming behind a rapidly moving dark speck. The cloud was of the cirrus variety, well defined at its edges and apparently ten to fifteen times the width of the plane. The sky behind the first portion was clear blue with no other clouds in the near neighborhood. The first streamer seemed perhaps two miles long. Then a gap of one-quarter mile. The second streamer formed with a background of light cirrus cloud and after two or three miles the plane seemed to go into the cirrus background for the streamer formation ceased while an apparent path of blue continued beyond for a way in the cirrus cloud. The whole streamer may have been three miles long. After twenty minutes the streamer had drifted and spread until it merged indistinguishably with the other cirrus clouds visible. The weather conditions at the time were generally very clear, warm, with perhaps 0.1 of the sky in cirrus clouds.

The observer reported as having observed nothing unusual; occasionally the motor would give a burst of black exhaust gas. The pilot thought he remembered having passed through a stratum that felt damp. Clouds at this altitude are necessarily ice crystals, or needles, and it is difficult to determine the cause of the cloud formation under consideration. Possible contributing causes are: Water in exhaust; dust and carbon particles in exhaust serving as cloud nuclei; convective currents due to disturbance caused by passage of plane. Conditions of humidity were undoubtedly ideal for the formation of cloud at that altitude.

2018-09-27T16:41:58+00:00

https://twitter.com/_/status/1045352860731375618

@OrgPhysics Here's a video showing wider context of a low pass with smoke.

https://www.youtube.com/watch?v=_mEYQUfEbHk

2018-09-27T16:37:47+00:00

https://twitter.com/_/status/1045351807134838785

@OrgPhysics That is smoke, not condensation. Wingtip mounted smoke generators for an airshow. The vortices are real though.

2018-09-27T16:35:10+00:00

https://twitter.com/_/status/1045351148364787712

@letullett Sure they do. http://pbs.twimg.com/media/DoHVSXdUwAAjlvb.jpg

where the temperatures range from −30°C to −65°C (−22°F to −85°F). This is the region of the high troposphere or the low stratosphere. It takes very little water at these temperatures to produce a condition of saturation or supersaturation. Between these extremes lie all the possibilities for the many variations in pattern that occur. Moisture at high elevations often advances through the sky in tongues or uneven patterns, both large and small. Thus contrails may be seen in uneven segments of growth and dissipation.

Sometimes the multiple contrails that persist will break into a series of swirled loops, with the loops joining into ovals. When these loops and connected vortices develop, they ordinarily do not last more than a minute or so. When trails last for longer periods, they may break into a series of pendules or fingers. The pendule is a form of ring vortex, indicating the presence of locally stable moist air. Sometimes pendules are pulled away into long streamers by a zone of faster moving air. The resulting shear motion may result in such an extensive cloud sheet that the sky becomes completely overcast.

Contrails are spectacular in early morning and evening, and even in the light of the full moon. When the air to the west is clear and the sun has set, a jet aircraft at 12 km (about 40,000 ft.) will still be illuminated by the sun. Sometimes the white contrail will assume a brilliant red or orange color. To the uninformed, the moving trail, produced by a plane that is invisible or appears only as a rapidly moving spot in the sky, may seem to be an out-of-this-world apparition — more than one such case has subsequently been headlined in the papers as a UFO with a fiery tail.

Under most conditions a contrail is made of ice crystals. Though it initially consists of liquid water droplets in the warm exhaust air, these soon change to ice particles in the frigid temperatures of the high atmosphere. The presence of ice is best illustrated when the contrail is located between the observer and the sun. Bright areas called parhelia (see Color Plate 11) are visible at an angle of 22° on either side of the sun. This angle can easily be checked with a built-in device possessed by every human. With arm and fingers outstretched, let the thumb obscure the sun. The little finger, stretched to the maximum, then subtends an angle of about 22°. The bright spots observed are a portion of the well-known 22° halo (see p. 158).

The jet aircraft disturbs its environment in 2 important ways. First, a jet engine consumes large quantities of fuel, and substantial amounts of water vapor, a major by-product of combustion, leave the engine as one component of the exhaust gases. Second, the rapid movement of the air over the wings and body of the aircraft generates vortices that persist for a time until their internal energy is dissipated.

The particular contrail pattern will be determined by several

interacting factors. These are: (1) the moisture content of the air, (2) the temperature of the air, (3) the moisture introduced into the air by the engines, (4) the vertical stability of the air below, at, and above the aircraft, (5) the cloud condensation and ice nuclei count when the air is warmer than −40°C (−40°F), and (6) the mixing that takes place between the environmental air and the exhaust.

At one extreme, the air through which the jet is flying might be gently sinking over a large area, and thus have a very low relative humidity. In this case, the addition of moisture might be insufficient to produce anything but a very short-lived contrail, quickly destroyed by mixing with the dry surrounding air. When a jet passes and leaves no contrails in the sky, or contrails that quickly disappear, this is a good prognosticator of fair weather.

At the other extreme, the jet flies through air that is gradually rising and becoming cool, and so may be nearly saturated. The addition of moisture from the jet exhaust may then be enough to produce saturation and consequent water drops or ice crystals. A persistent trail is an indicator of moist air, which may be the first sign of an extensive storm area moving into the region. This is particularly true when cirrus clouds are also present.

Pl.151 IV$_H$ Classic example of jet stream cirrus covering whole sky. Strong jet stream winds in upper portion of photograph leave behind nearly horizontal streams of falling ice crystals.

https://twitter.com/_/status/1044352034281943040
@dukat291 @flightradar24 It's not a trijet, there's only two contrails at the start. The middle bit

probably comes from some interaction of the wake vortices that's not always visible, depending on temp/humidity and power/climb setting. http://pbs.twimg.com/media/Dn5IT4EUUAAKB5Z.jpg

http://pbs.twimg.com/media/Dn5IT4EUUAAKB5Z.jpg

https://twitter.com/_/status/1044347423252836352
@Kal1_Furies @OpChemtrails Essentially, you need relative humidity >100% with respect to the water phase of the contrail. Since that's generally ice you also need freezing temperatures. For exhaust contrails to FORM you also need lower than the homogenous freezing temp (around -40Â°C), aerodynamic is higher

"Why were there small iron spheres in the dust found on 9/11?"

An oft asked question was lacking an answer on Quora, so I supplied one. There's actually a variety of reasons.

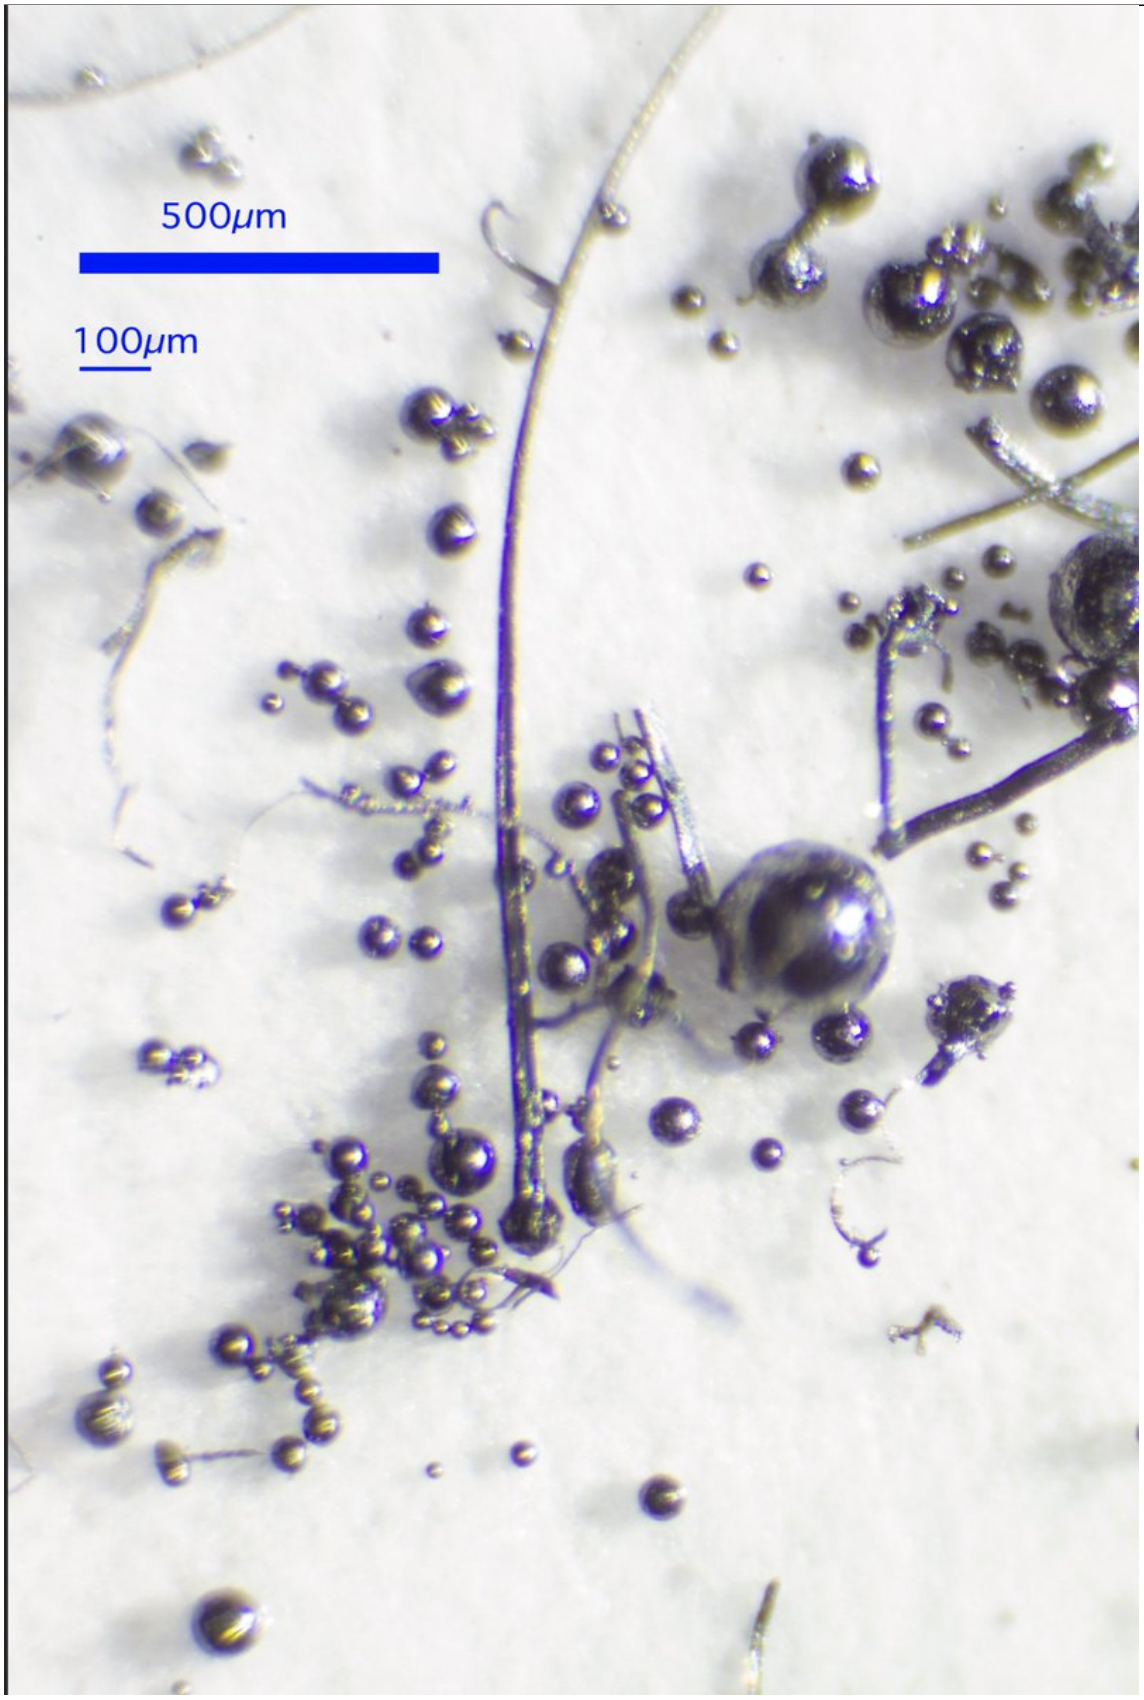
https://www.quora.com/Why-were-there-small-iron-spheres-in-the-dust-found-on-9-11/answer/Mick-West-8?srid=htigs http://pbs.twimg.com/media/Dn4OJ9OV4AAIEnM.jpg

http://pbs.twimg.com/media/Dn4OJ9OV4AAIEnM.jpg

2018-09-22T19:44:52+00:00

https://twitter.com/_/status/1043586948667924480

@Professor_Hal @jrwyke Fascinating. I've been doing some experiments burning steel wool and collecting what falls off it with a magnet. These are some the spheres I got, lots are <100Âµm, I think formed in sparks. http://pbs.twimg.com/media/DnuQW0uUUAAm_I8.jpg



http://pbs.twimg.com/media/DnuQW0uUUAAm_I8.jpg

2018-09-22T19:37:02+00:00

https://twitter.com/_/status/1043584981002477568

@Professor_Hal @jrwyke So do you think the spheres that form are mostly iron? There's a common classroom experiment of measuring the mass before and after combustion of steel wool, and finding it's increased in mass. That suggest some oxide remains.

2018-09-22T19:21:16+00:00

https://twitter.com/_/status/1043581009692786688

@yablowme Burning is rapid oxidation. Then only thing that can oxidize here is the steel (mostly iron)

2018-09-22T19:20:24+00:00

https://twitter.com/_/status/1043580791714766848

@jrwyke @Professor_Hal but why is it molten at all? When it burns, what's happening to the iron oxide that is the product of combustion? Does it burn off and melt the steel underneath because of the geometry and small cross-section? Or is it all molten Fe2O3? Or a mixture of Fe and Fe2O3

2018-09-22T19:12:07+00:00

https://twitter.com/_/status/1043578706726346752

@yablowme Oxide burning? Surely it's the iron itself that's burning.

2018-09-22T19:04:44+00:00

https://twitter.com/_/status/1043576851996717058

Steel wool burning in slow motion. No flames, wires just get hot and sometimes melt forming tiny spheres. What's the actual physics of this?

2018-09-21T20:14:20+00:00

https://twitter.com/_/status/1043231976537260032

@OrbisCast @jbbridges731 @PostDisclosure I could make a list of plausible hypotheses. Advanced technology would be on that list, but low.

2018-09-21T19:31:25+00:00

https://twitter.com/_/status/1043221178674905088

@PostDisclosure @Xavi52397609 @LamoreauxDevon @jbbridges731 Well I'll wait for history then. In the meantime I'll keep occasionally analyzing UFOs to try to figure out individual cases.

2018-09-21T19:27:36+00:00

https://twitter.com/_/status/1043220219068477441

@PostDisclosure @Xavi52397609 @LamoreauxDevon @jbbridges731 I can wait. It's all hypothetical.

2018-09-21T19:26:26+00:00

https://twitter.com/_/status/1043219923789537280

@PostDisclosure @Xavi52397609 @LamoreauxDevon @jbbridges731 That's always the question. Science and our understanding of the universe upended, or someone made a mistake. Which is most likely.

2018-09-21T19:24:39+00:00

https://twitter.com/_/status/1043219475258957825

@PostDisclosure @Xavi52397609 @LamoreauxDevon @jbbridges731 No, why did you think I might be?

2018-09-21T19:22:37+00:00

https://twitter.com/_/status/1043218964325650432

@PostDisclosure @Xavi52397609 @LamoreauxDevon @jbbridges731 Would you agree though that if an object in the sky cannot be identified but we still canâ□□t rule out the possibility that it could be if we had more data, then it is not a true unknown?

2018-09-21T19:21:26+00:00

https://twitter.com/_/status/1043218666756628480

@PostDisclosure @Xavi52397609 @LamoreauxDevon @jbbridges731 Wait, what do you think "post disclosure" will consist of? I'd assumed it meant lots of compelling new evidence. Do you mean something different, like just someone saying "UFOs are real"?

2018-09-21T19:19:16+00:00

https://twitter.com/_/status/1043218118602944513

@PostDisclosure @Xavi52397609 @LamoreauxDevon @jbbridges731 BS on what? I look at evidence. I see if claims are right or wrong. If there's new evidence I look at that.

2018-09-21T19:15:35+00:00

https://twitter.com/_/status/1043217194937532416

@PostDisclosure @Xavi52397609 @LamoreauxDevon @jbbridges731 If you passage into a post disclosure world then I'm sure that making skeptics eat their hats would be one of the least interesting things you could do with your time. Why would you even care?
Personally I'd be super excited if if were proven any case I'd looked at was ET/AT

2018-09-21T19:08:01+00:00

https://twitter.com/_/status/1043206556215439360

@Xavi52397609 @PostDisclosure @LamoreauxDevon @jbbridges731 I evaluate UFO sighting all the time. Sometimes I spend many days on one sighting.

2018-09-21T18:32:34+00:00

https://twitter.com/_/status/1043206367178158080

@PostDisclosure @Xavi52397609 @LamoreauxDevon @jbbridges731 I'm interested in evidence, and in trying to identify unknown objects. I'm not particularly interested in UFO culture. So it's relevant to me, and my decision to read the book or not.

2018-09-21T18:30:32+00:00

https://twitter.com/_/status/1043205855020113920

@jbbridges731 @Xavi52397609 @LamoreauxDevon @PostDisclosure Well, UFOs are real of course. It's impossible for there not to be some unidentified flying objects.

http://pbs.twimg.com/media/Dno2GCUUwAA-jHw.jpg

A second fundamentally important point is that roughly 90 to 95 percent of UFO sightings *can* be explained. Within the remaining 5 to 10 percent, once an object has been determined to be a genuine UFO by the proper standards, then all we know is what it is *not*: something man-made or natural, or an outright hoax, of which there are unfortunately too many. Examples of phenomena sometimes mistaken for UFOs are weather balloons, flares, sky lanterns, planes flying in formation, secret military aircraft, birds reflecting the sun, planes reflecting the sun, blimps, helicopters, the planet Venus or Mars, meteors or meteorites, space junk, satellites, sundogs, ball lightning, ice crystals, reflected light off clouds, lights on the ground or lights reflected on a cockpit window, temperature inversions, hole-punch clouds, and the list goes on! Yes, the vast majority of reports can usually be explained by one of the above, but of course it's only the ones that can't that we're interested in.

It follows, therefore, that the often asked question "Do you believe in UFOs?" is actually baseless, but it's frequently asked and creates endless problems in communication. It really doesn't make sense,

http://pbs.twimg.com/media/Dno2GCUUwAA-jHw.jpg

2018-09-21T18:28:40+00:00

https://twitter.com/_/status/1043205384238841857

@PostDisclosure @Xavi52397609 @LamoreauxDevon @jbbridges731 Which chapter do you think contained the strongest evidence?

2018-09-21T18:26:50+00:00

https://twitter.com/_/status/1043204926485086208

@Xavi52397609 @LamoreauxDevon @jbbridges731 @PostDisclosure Well of course their conclusion are that they are real, she interviewed people who thought UFOs were real. Did she conduct proportionate interviews with people who did not?

2018-09-21T18:25:27+00:00

https://twitter.com/_/status/1043204574893359105

@PostDisclosure @Xavi52397609 @LamoreauxDevon @jbbridges731 I'm not saying people shouldn't read it. I'm saying I personally have no desire to read it. It's more of a UFO culture book, not a solid evidence book.

2018-09-21T18:02:31+00:00

https://twitter.com/_/status/1043198803640168448

@Xavi52397609 @LamoreauxDevon @jbbridges731 @PostDisclosure Her handling of the Chilean Navy case (quickly found to be a plane) does not make me want to read the book. How does it differ from this type of thing?

★★★★★ **A Message of Hope**

By Dee Arr Top Contributor: Harry Potter TOP 50 REVIEWER on September 20, 2018

Format: Hardcover

From the title alone, one may deem the thrust of this book to be an attack on those who believe in what are commonly referred to as conspiracy theories. Right from the start, author Mick West explains the book advocates respect and discussion, and is not presenting a hard-nosed offense against different viewpoints. This theme is reiterated throughout each chapter. The term “rabbit hole” describes what happens when a person begins researching different theories, and how easy it can be to become lost inside its depths.

It is refreshing to read a book that educates without the shrillness I’ve come to expect when venturing on websites that debate topics discussed in “Escaping the Rabbit Hole.” While touching on other theories, Mr. West addresses four of the most prominent: chemtrails, 9/11 (controlled detonations), flat earth, and false flags. He presents the points brought up by the conspiracy theory sites and moves on to debunk them, all the while advising readers how to talk with friends (or family) in an effort to guide them out of their personal rabbit holes.

My own history, which does not involve actively reviewing the sites and proponents of these theories, is that I have entertained questions concerning some of them. For instance, I do see contrails and have witnessed them spread over the skies; thus, I wonder if there is chemical spraying going on and are my food and garden safe. The book gave me a ton of information, more than I could hope for. In fact, I found myself researching both sides of the discussions, my Kindle propped up next to my computer as I cross-referenced data.

I also gained many insights on how to help friends and family members who have fallen down their own rabbit holes. I have already used some of these recommendations, and even though the author warns the turnaround could take a long time, I am encouraged by the initial results.

This book has value for just about anyone, but especially people like me looking for ideas to help others, and those who are beginning to question the beliefs they have formed. There are hundreds of links to information supporting Mr. West’s book, and it is a thoughtful as well as helpful resource. Five stars.

https://twitter.com/_/status/1041897186705862656

@DaveFalch @PostDisclosure So UFOologly is like a less productive cryptozoology? Skywatching has produced meteorology, astronomy, and some ornithology. I guess you could say UFOology is part of that, just yet to go anywhere?

2018-09-18T01:27:42+00:00

https://twitter.com/_/status/1041861285984395264

@jbbridges731 @SauceRegime @PostDisclosure Show it.

2018-09-18T00:44:22+00:00

https://twitter.com/_/status/1041850384124338176

@GalacticWorld @BlueBookBelieve @PostDisclosure They do not always move fast. They don't always show up at night. Yet no photos.

2018-09-17T22:27:22+00:00

https://twitter.com/_/status/1041815903963242496

@BlueBookBelieve @GalacticWorld @PostDisclosure It counts less, because memory fades and people die, and other information is lost. But really that's not the issue - the issue is more the lack of good photos and videos. Eyewitness accounts are notoriously unreliable, and people inevitable eventually make mistakes.

2018-09-17T20:56:55+00:00

https://twitter.com/_/status/1041793143706857472

@BlueBookBelieve @GalacticWorld @PostDisclosure Why are you citing things from 66+ years ago?

2018-09-17T20:41:37+00:00

https://twitter.com/_/status/1041789293302145024

@GROUNDZERO1984 @PostDisclosure UFO witnesses are almost never lying. However they very frequently make mistakes.

2018-09-17T19:50:33+00:00

https://twitter.com/_/status/1041776441111674880

@GalacticWorld @PostDisclosure I don't think there is good evidence that they made "sick turns and unexplained maneuvers"

2018-09-17T19:16:32+00:00

https://twitter.com/_/status/1041767881707405312

@GalacticWorld @PostDisclosure I think itâ□□s unlikely the unexplained ones will be explained as advanced tech.

2018-09-17T18:44:27+00:00

https://twitter.com/_/status/1041759805222731776

@GalacticWorld @PostDisclosure I don't ignore it. I spend lots of time looking into UFOs. I've written articles about, been on TV talking about it.
https://www.youtube.com/watch?v=Is8zl7FDX9w

2018-09-17T18:30:03+00:00

https://twitter.com/_/status/1041756182199717888

@PostDisclosure @AdvisorUap Some 9/11 guys get annoyed that I have UFO stuff on Metabunk because they think I'm trying to discredit them by associating them with aliens.

2018-09-17T18:26:39+00:00

https://twitter.com/_/status/1041755329040510977

@GalacticWorld @PostDisclosure I don't see any good evidence than anyone is behind it.

2018-09-17T18:26:09+00:00

https://twitter.com/_/status/1041755200212557824

@jbbridges731 @PostDisclosure There's about 100 million iPhoneXs. They all shoot 4K. And that's last year's model.

2018-09-17T18:23:13+00:00
https://twitter.com/_/status/1041754461264179200
@JATPSNPharoe Thanks!

2018-09-17T18:20:54+00:00
https://twitter.com/_/status/1041753880613142528
@GalacticWorld @PostDisclosure I don't think it's cryptozoology - I think it's as harmless as a belief in cryptozoology.

2018-09-17T18:19:54+00:00
https://twitter.com/_/status/1041753626358628352
@jbbridges731 @PostDisclosure The one with three angles? Fake.

2018-09-17T18:19:35+00:00
https://twitter.com/_/status/1041753548067758080
@jbbridges731 @PostDisclosure Nearly all new phones now shoot 4K video. You've got cameras like the Nikon P1000 with 3000mm equivalent zoom shooting 4K video, capable of seeing cars five miles away, planes 20+ mies away. And you've got accounts of people saying the UFO was 50 feet away. A curious disconnect

---

2018-09-17T18:16:15+00:00
https://twitter.com/_/status/1041752709613838336
@jbbridges731 @PostDisclosure The footage of blobs in the distance is not compelling. You get video like this, and it ends up just being a plane.
https://www.youtube.com/watch?v=gOLpeBp9m1Y

2018-09-17T18:14:18+00:00
https://twitter.com/_/status/1041752218943143936
@jbbridges731 @PostDisclosure Some good video or photos would be a start. There's like a half a billion 4K cameras out there now.

2018-09-17T18:10:18+00:00
https://twitter.com/_/status/1041751213409153024
@jbbridges731 @PostDisclosure I have background knowledge. I've looking into several cases in depth. I like the aspect of identifying things in the sky - it ties in with the whole "chemtrail" thing.

2018-09-17T18:08:47+00:00
https://twitter.com/_/status/1041750829810692096
@GalacticWorld It's Venus, I just moved it inside the Moon to see who was paying attention.

2018-09-17T18:06:38+00:00
https://twitter.com/_/status/1041750290498633728
@jbbridges731 @PostDisclosure I have done extensive research yes, including the TTSA footage.

2018-09-17T18:06:05+00:00
https://twitter.com/_/status/1041750149775601666
@RokStarrMom @PostDisclosure You mean it isn't a conspiracy theory, it's just a conspiracy. I'd

agree, as would most people.

2018-09-17T18:04:54+00:00

https://twitter.com/_/status/1041749855499051008

@PostDisclosure UFO theories are mostly harmless fun, like cryptozoology. The conspiracy aspect of UFOs is a very minor one with no real impact on the world. 9/11 and chemtrails on the other hand are serious distractions from real issues.

2018-09-17T17:55:35+00:00

https://twitter.com/_/status/1041747509725474816

@KingBrennymma I think that the evidence indicates that Adam Lanza killed 26 people and himself at the school, and that he acted alone. I think there's a lot of baseless speculation about "False Flags".

2018-09-17T17:52:12+00:00

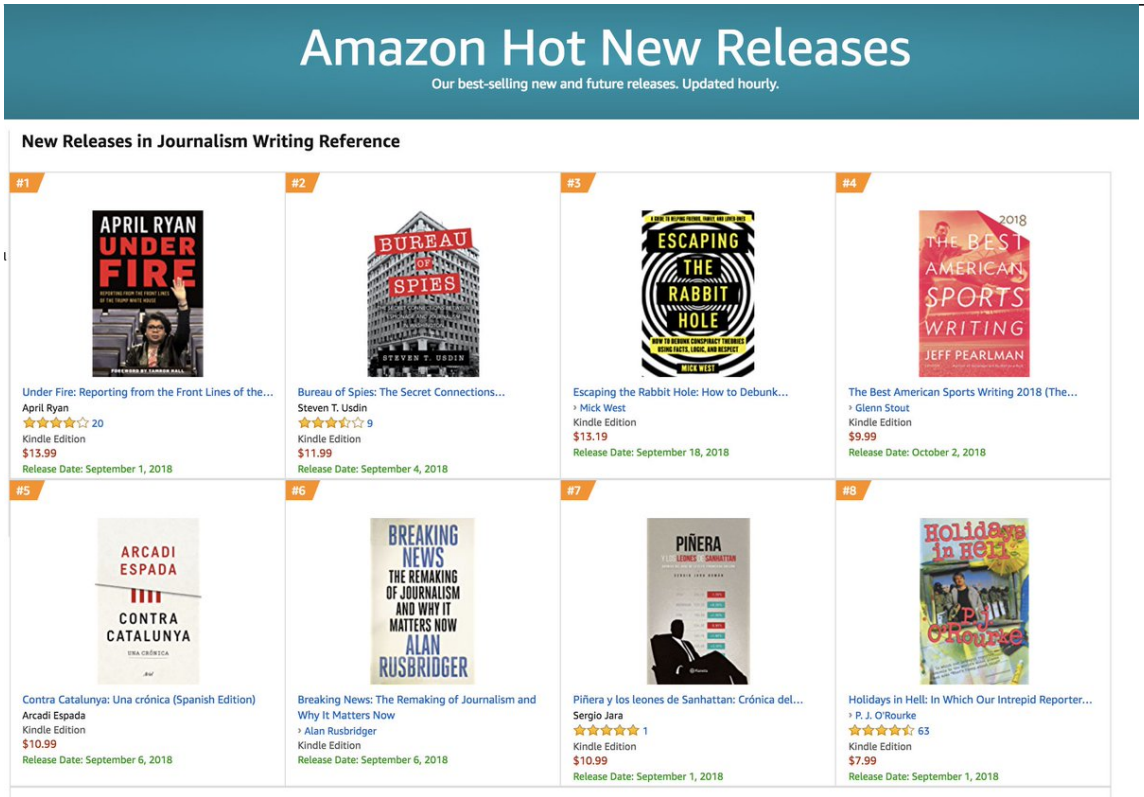
https://twitter.com/_/status/1041746657941975041

@PostDisclosure Industry lobbyists giving politicians money in exchange for legislation favorable to their industry.

2018-09-17T17:50:47+00:00

https://twitter.com/_/status/1041746301635899395

Escaping the Rabbit Hole is #3. Sure it's only #3 in "Amazon, Hot New Releases, Kindle, Reference, Journalism," but it's a start, and it's not out until tomorrow! https://amzn.to/2NnbaRb http://pbs.twimg.com/media/DnUGTX7U4AAUQCL.jpg



http://pbs.twimg.com/media/DnUGTX7U4AAUQCL.jpg

2018-09-17T17:48:44+00:00

https://twitter.com/_/status/1041745783169548288

@PostDisclosure Write one yourself. What can I write that you cannot?

2018-09-17T17:45:00+00:00

https://twitter.com/_/status/1041744847097348096

@PostDisclosure I doubt I'll be writing a UFO related book, unless it's something like photo and video identification techniques. The whole UFO culture is not that interesting as it really does not currently impact the real world very much.

2018-09-17T17:06:00+00:00

https://twitter.com/_/status/1041735030840582146

@loudestsubtext Thanks! I wish I'd written more about QAnon, but the basic techniques should still be useful. My next book will cover QAnon and deep state theories in more detail.

https://twitter.com/_/status/1040650626248523776
@radiormnpodcast @SteerMark
https://www.metabunk.org/debunked-chemtrail-plane-interior-ballast-barrels.t661/
http://pbs.twimg.com/media/DnEiKuKVYAAwk6_.jpg

During flight tests in 1994, the cabin interior of the prototype *777* was filled with what at first glance looked like aluminum beer kegs. In fact, these 55-gallon barrels contained water. The contents of two dozen barrels in the forward cabin and a like number of barrels in the aft section were pumped back and forth to simulate shifts in center of gravity that would result from passengers moving about. The top photo shows the cabin as it is when the *777* is delivered.

http://pbs.twimg.com/media/DnEiJckVsAAclh5.jpg

Water tanks provided ballast to simulate passenger and cargo loads for flight testing. Not only could the tanks simulate various amounts of weight, they could also shift the weight fore and aft in flight through connecting pipes to test different center-of-gravity configurations. *Boeing*

http://pbs.twimg.com/media/DnEiKuKVYAAwk6_.jpg

2018-09-14T15:58:16+00:00

https://twitter.com/_/status/1040630821009256449

@jessiesimpson04 @chemrt Show me those six.

All of the "town" of Sunspot was closed, but it's not really a town, just the observatory, a camp site, and 40 houses. One road in and out, perched on a ridge.

http://pbs.twimg.com/media/DnEP8SRU0AIvFvK.jpg

http://pbs.twimg.com/media/DnEP8SRU0AIvFvK.jpg

2018-09-14T05:14:34+00:00

https://twitter.com/_/status/1040468828528885760

@chemrt They didn't close all the observatories. Just this one. There's hundreds more, plus the the SDO and other satellites, and tens of thousands of individuals, and millions of people with long zoom lenses and solar filters.

2018-09-14T04:54:00+00:00

https://twitter.com/_/status/1040463651520442368

Moon appears to change direction, crossing the sun and then back again a few hours later.

@ASpinOfTheWheel RT has now broken out the "gay" aspect into an entire sub-story.

https://www.rt.com/news/438367-awkward-interview-skripal-suspects/

http://pbs.twimg.com/media/Dm_HUJwVAAAT6De.jpg

Arguably the most awkward moments in the interview, which the two men named by Britain as suspects in the Skripal affair gave to RT's editor-in-chief, came when their straightness came into question.

Alexander Petrov and Ruslan Boshirov are suspected by the UK of being Russian military intelligence agents, who were sent to Britain to assassinate former double agent Sergei Skripal. They came to RT to deny the claim. But apparently being perceived as a gay couple seemed to them at least as dreadful as being suspected of having used a chemical weapon, killing one person.

Read more

'We're not agents': UK's suspects in Skripal case talk exclusively with RT's editor-in-chief (VIDEO)

When asked by RT's editor-in-chief Margarita Simonyan about whether they had a Nina Ricci perfume bottle when they arrived in London, Boshirov objected the very idea that he or his friend would carry one.

"Don't you think that it's kind of stupid for two [straight men] to carry perfume for ladies?" he said, adding that such a possession would have been found by the British customs officers, who would see it as *"suspicious"*.

"Even an ordinary person would have questions. Why would a man need perfume for women?" agreed Petrov.

Simonyan jumped on the awkward vibe and pressed forward: *"Speaking of straight men, all footage features you two together … What do you have in common that you spend so much time together?"*

The only thing Boshirov came up with in response was *"let's not breach anyone's privacy"* and complained that instead of protection the two were expecting from RT they get an *"interrogation"*.

The nature of the relationship between Boshirov and Petrov came up again, when the former launched a tirade about how normal it is for two straight men to stay in the same hotel room.

"The British say many things. They say we lived in a room with a single bed," he said. *"It's a normal thing for tourists to stay together in the same hotel apartment with two rooms. It saves money living like that. It's more comfortable and more fun. This is a normal thing for any normal man."*

The outburst was finally cut short by Simonyan, who said whether the two shared a bed in the London hotel was *"the last thing the world cares about now."*

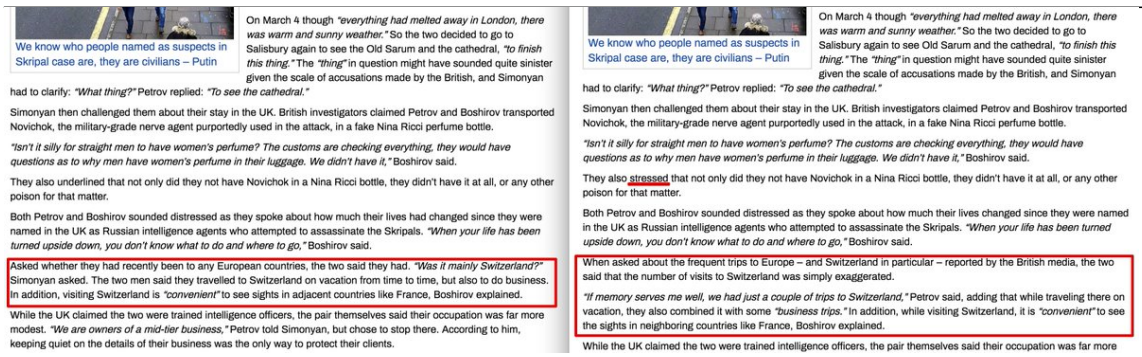
In the same 15:17 update, RT explain why they are talking about trips to Switzerland.

RT's stories are truly living works of journalism, changing from hour to hour.

http://pbs.twimg.com/media/Dm_AuX9VAAAmC1f.jpg



We know who people named as suspects in Skripal case are, they are civilians – Putin

On March 4 though *"everything had melted away in London, there was warm and sunny weather."* So the two decided to go to Salisbury again to see the Old Sarum and the cathedral, *"to finish this thing."* The *"thing"* in question might have sounded quite sinister given the scale of accusations made by the British, and Simonyan had to clarify: *"What thing?"* Petrov replied: *"To see the cathedral."*

Simonyan then challenged them about their stay in the UK. British investigators claimed Petrov and Boshirov transported Novichok, the military-grade nerve agent purportedly used in the attack, in a fake Nina Ricci perfume bottle.

"Isn't it silly for straight men to have women's perfume? The customs are checking everything, they would have questions as to why men have women's perfume in their luggage. We didn't have it," Boshirov said.

They also underlined that not only did they not have Novichok in a Nina Ricci bottle, they didn't have it at all, or any other poison for that matter.

Both Petrov and Boshirov sounded distressed as they spoke about how much their lives had changed since they were named in the UK as Russian intelligence agents who attempted to assassinate the Skripals. *"When your life has been turned upside down, you don't know what to do and where to go,"* Boshirov said.

Asked whether they had recently been to any European countries, the two said they had. *"Was it mainly Switzerland?"* Simonyan asked. The two men said they travelled to Switzerland on vacation from time to time, but also to do business. In addition, visiting Switzerland is *"convenient"* to see sights in adjacent countries like France, Boshirov explained.

While the UK claimed the two were trained intelligence officers, the pair themselves said their occupation was far more modest. *"We are owners of a mid-tier business,"* Petrov told Simonyan, but chose to stop there. According to him, keeping quiet on the details of their business was the only way to protect their clients.

We know who people named as suspects in Skripal case are, they are civilians – Putin

Salisbury plot thickens, questions without answers multiply

currently wearing."

"Are these clothes currently in Russia?" Simonyan asked.

"Yes, of course, we can show them."

'I don't know if they are gay or not'

Simonyan later released a series of tweets about the interview. She said her impression was that the men *"were nervous and were sweating much."* At one point in the interview, she suggested turning on the air conditioning, and Petrov said, *"yes, it's hot in here."* She also said she poured them some cognac to *"give them courage."*

Trying to provoke them into telling more, Simonyan said all CCTV videos released by the British showed Petrov and Boshirov living together and walking together. *"What is in common between you?"* she asked. Anticipating further questions on this, she wrote on Twitter: *"Guys, I don't know if they are gay or not."*

RT's editor-in-chief revealed other behind-the-scenes details, including her perception of Petrov's and Boshirov's personalities. The two were *"sporty men with quite trendy haircuts."* She said one of them smoked, the other didn't.

They demanded that only one camera run during the interview and refused to show their IDs. But in the end a second camera was present, filming Simonyan asking the questions. They said they would not go to the studio and only agreed to do the interview in her office.

Simonyan stressed that the two men's answers are their own responsibility, and everyone can decide for themselves whether to believe them or not. She has chosen to not comment on her own perception.

@GknBtg @Ei1299Erin "Silver" isn't really a color - it's a reflective state. So if it was carrying orange embers, then it would partially reflect the light from those orange embers, or it would reflect the surroundings. You would not expect "silver" to show up in the video.

http://pbs.twimg.com/media/Dm-yFviU0AMW5ei.jpg

---

21. Why does NIST state that a yellow stream of molten metal seen in some photographs pouring down the side of WTC2 was aluminum from the crashed plane, even though aluminum burns with a white glow?

NIST reported (NIST NCSTAR 1-5A) that just before 9:52 a.m., a bright spot appeared at the top of a window on the 80th floor of WTC 2, four windows removed from the east edge on the north face, followed by the flow of a glowing liquid. This flow lasted approximately four seconds before subsiding. Many such liquid flows were observed from near this location in the seven minutes leading up to the collapse of this tower. There is no evidence of similar molten liquid pouring out from another location in WTC 2 or from anywhere within WTC 1.

Photographs, as well as NIST simulations of the aircraft impact, show large piles of debris in the 80th and 81st floors of WTC 2 near the site where the glowing liquid eventually appeared. Much of this debris came from the aircraft itself and from the office furnishings that the aircraft pushed forward as it tunneled to this far end of the building. Large fires developed on these piles shortly after the aircraft impact and continued to burn in the area until the tower collapsed.

NIST concluded that the source of the molten material was aluminum alloys from the aircraft, since these are known to melt between 475 degrees Celsius (900 degrees Fahrenheit) and 640 degrees Celsius (1,200 degrees Fahrenheit)—depending on the particular alloy—well below the expected temperatures (about 1,000 degrees Celsius or 1,800 degrees Fahrenheit) in the vicinity of the fires. Aluminum is not expected to ignite at normal fire temperatures and there is no visual indication that the material flowing from the tower was burning.

Pure liquid aluminum would be expected to appear silvery. However, the molten metal was very likely mixed with large amounts of hot, partially burned, solid organic materials (e.g., furniture, carpets, partitions and computers) which can display an orange glow, much like logs burning in a fireplace. The apparent color also would have been affected by slag formation on the surface.

http://pbs.twimg.com/media/Dm-yFviU0AMW5ei.jpg

2018-09-13T14:26:49+00:00

https://twitter.com/_/status/1040245417693171712

@GknBtg @Ei1299Erin But what you are seeing is the burning material being carried out by a flow of molten metal, like aluminum. The metal being silver is irrelevant. What you are seeing is a bunch of flaring embers from the fire, carried out with the aluminum.

2018-09-13T13:59:22+00:00

https://twitter.com/_/status/1040238512237211648

@GknBtg @Ei1299Erin Well yes, that's what I (and NIST) said. The stream of aluminum is silver, with burning stuff on top providing the yellow flame color.

2018-09-13T13:57:49+00:00

https://twitter.com/_/status/1040238120808022016

@GknBtg No, but molten aluminum or lead does.

Edited time: 13 Sep, 2018 12:25

THE FOURTH PART OF THE VIDEO TO FOLLOW SOON.

The two men reached out to RT Editor-in-Chief Margarita Simonyan, as they wanted to tell their story. The first thing she asked them was to confirm their names, and they said that they were indeed Alexander Petrov and Ruslan Boshirov, and that those were their real names.

She then asked them whether they worked for the GRU – Russian intelligence. They immediately denied it.

"You honestly look very tense," Simonyan noted.

"And how would you look after all of that?" Petrov responded, before Boshirov said the British investigation *"ruined their lives."*

"Well, we came there [to the UK] on March 2, then went to a railway station to see the timetable. We arrived in Salisbury on March 3 and tried to walk through the town, but we lasted for only half an hour because it was covered in snow," Petrov said.

Read more

We know who people named as suspects in Skripal case are, they are civilians – Putin

"Of course, we went there to see Stonehenge, Old Sarum, but we couldn't do it because there was muddy slush everywhere. The town was covered by this slush. We got wet, took the nearest train and came back [to London]."

"We spent no more than an hour in Salisbury, mainly because of the lags between trains," Boshirov said. *"Maybe we did [approach] Skripal's house, but we don't know where is it located."*

"On March 4 we returned [to Salisbury] because everything had melted away in London, there was warm and sunny weather. We specifically went there [again] to see the Old Sarum and the cathedral and decided to finish this thing on March 4," said Petrov.

Simonyan clarified: *"What thing?"*

"To see the cathedral," Petrov replied.

When Margarita Simonyan asked the two men whether they had Novichok or any poison with them, they emphatically said no. Then she asked whether they had the Nina Ricci perfume bottle that has been shown as evidence.

"Isn't it silly for decent lads to have women's perfume? The customs are checking everything, they would have questions as to why men have women's perfume in their luggage. We didn't have it," Boshirov said.

Both Petrov and Boshirov sounded distressed as they spoke about how their lives had changed since they were named in the UK as Russian intelligence agents, who attempted to poison the Skripals.

"When your life turned upside down, you don't know what to do and where to go. We're afraid of going out, we fear for ourselves, our lives and lives of our loved ones," Boshirov said.

Asked whether they had recently been to any European state, the two said they were.

"Sure... in Switzerland we were for a couple of times... we spent New year in Switzerland." The journey was part of their vacation, however the two have also been in Europe to do business that is related to sports nutrition.

THE FOURTH PART OF THE VIDEO TO FOLLOW SOON.

UK prosecutors claimed their names were not real, but Alexander Petrov and Ruslan Boshirov have confirmed their identities in an interview with RT's Editor-in-Chief Margarita Simonyan.

Both men said emphatically that they were not Russian intelligence agents and were merely sightseeing in Salisbury. They said they wanted to visit the *"wonderful town"* of Salisbury but realized they came at a bad time – and not just because of the muddy English weather.

The subsequent accusations caught them completely by surprise.

The pair told Simonyan they went to London to *"hang out,"* and decided to also visit Salisbury upon the advice of their friends. The town, situated close to the world-famous Stonehenge, also attracted them because of the Cathedral Church of the Blessed Virgin Mary, *"famous not just in Europe, but in the whole world."*

We know who people named as suspects in Skripal case are, they are civilians – Putin

Its 123-meter spire and clock, the first one of its kind anywhere in the world, was a reason solid enough to jump on a train from London to Salisbury, Boshirov and Petrov explained. But then the weather interfered with their travel plans.

They tried to walk through the town when they arrived there by train on March 3, but that *"lasted for only half an hour because it was covered in snow,"* Petrov told Simonyan. There was *"muddy slush everywhere."*

On March 4 though *"everything had melted away in London, there was warm and sunny weather."* So the two decided to go there again to see the Old Sarum and the cathedral, *"to finish this thing."* The *"thing"* in question might have sounded quite sinister given the scale of accusations made by the British, and Simonyan had to clarify: *"What thing?"* Petrov replied: *"To see the cathedral."*

Simonyan then challenged them about their stay in the UK. British investigators claimed Petrov and Boshirov transported Novichok, the military-grade nerve agent purportedly used in the attack, in a fake Nina Ricci perfume bottle.

"Isn't it silly for straight men to have women's perfume? The customs are checking everything, they would have questions as to why men have women's perfume in their luggage. We didn't have it," Boshirov said.

They also underlined that not only did they not have Novichok in a Nina Ricci bottle, they didn't have it at all, or any other poison for that matter.

Both Petrov and Boshirov sounded distressed as they spoke about how much their lives had changed since they were named in the UK as Russian intelligence agents who attempted to assassinate the Skripals. *"When your life has been turned upside down, you don't know what to do and where to go,"* Boshirov said.

Asked whether they had recently been to any European state, the two said they were.

"Sure... in Switzerland we were for a couple of times... we spent New year in Switzerland." The journey was part of their vacation, however the two have also been in Europe to do business that is related to sports nutrition.

Salisbury plot thickens, questions without answers multiply

"We examine the market, look if there is something new – some biologically active additives, amino acids, vitamins, microelements. We pick up the most necessary, come here and decide how to deliver the new products from this market here."

After asked if they were people on the screenshots released by the UK, the men said they indeed were.

"Yes. We have these clothes, this jacket is hanging in my wardrobe. The shoes are bought in England...This is the clothes were are currently wearing."

"Are these clothes currently in Russia?" Simonyan asked.

"Yes, of course, we can show it."

The RT editor-in-chief also touched upon the most puzzling picture of the two, the photo from the Gatwick airport.

"Here is the picture that puzzled the whole world, Gatwick airport, you are leaving through a gate literally in the same times, almost the same second. How did it happen?" she asked.

"We always go together through the same corridor and the same custom service officer or a policeman. One goes, the other waits. We went through the corridor together, we always [do it] together. How did it happen? It's better to ask them [UK police]," Boshirov replied.

https://twitter.com/_/status/1039887351940493312

@TheObserverEff1 I'm a big fan of truth. I've been debunking things that are wrong for ten years, and not made any money yet. But I do have a book coming out next week :)

2018-09-12T05:22:20+00:00

https://twitter.com/_/status/1039746009251885056

@JeremyCorbell @FreemanStahl I'm asking you, the director of the film, if there's substantive evidence in it. I'm asking this because I'm all about evidence, and don't want to waste time watching a film that's just people telling ghost stories, and some cow things. So correct that misapprehension.

2018-09-12T05:13:50+00:00

https://twitter.com/_/status/1039743869125058561

@JeremyCorbell @FreemanStahl Well, does it present something other than eyewitness testimony and cow shenanigans? I'm trying to determine if there's a reason to watch it.

2018-09-12T05:12:48+00:00

https://twitter.com/_/status/1039743607090110465

@JeremyCorbell @FreemanStahl Why would I watch it? Does it actually present any evidence? Can't you at least describe very roughly that evidence so I have an actual reason to watch it?

2018-09-12T05:11:05+00:00

https://twitter.com/_/status/1039743174770667525

@JeremyCorbell @FreemanStahl I'd watch the film if it presented something other than eyewitness testimony and cow shenanigans, but I've yet to hear that it does.

2018-09-12T05:09:55+00:00

https://twitter.com/_/status/1039742881433612288

@JeremyCorbell @FreemanStahl I'm not really your target audience. You didn't make the film to convince scientists that there was something there. You made it to entertain fans of the paranormal. You've probably succeeded, but don't have unrealistic expectations. The primary problem is you lack hard evidence.

2018-09-12T05:06:20+00:00

https://twitter.com/_/status/1039741982363533313

@JeremyCorbell @FreemanStahl This review is more positive, but essentially boils down to the same thing. Eyewitness accounts, cows moved, no evidence.

http://cinema-crazed.com/blog/2018/09/04/hunt-for-the-skinwalker-2018/

2018-09-12T04:59:22+00:00

https://twitter.com/_/status/1039740228003614720

@JeremyCorbell @FreemanStahl Right or wrong, that was the picture that was painted by the review. Now if you forced me decide I'd guess it's probably accurate, but would read other reviews, as one alone is rarely accurate. That why we have rotten tomatoes.

2018-09-12T04:57:51+00:00

https://twitter.com/_/status/1039739845252403201

@JeremyCorbell @FreemanStahl I was:
"Jason Colavito's review of "Hunt for the Skinwalker" paints a picture of a group of people who really want to believe and have resorted to "scaring themselves in the dark" to sharpen their evidenced-free beliefs of monsters, ghosts, and trans-dimensional portals."

2018-09-12T04:46:57+00:00

https://twitter.com/_/status/1039737104983617536

@JeremyCorbell @FreemanStahl No, but I was writing about the review, not the movie. Can you perhaps give a concrete example in which the review is incorrect?

2018-09-12T04:44:38+00:00

https://twitter.com/_/status/1039736522180911104

@DaveFalch Hmm, maybe not, wing shape is wrong. But this type of thing

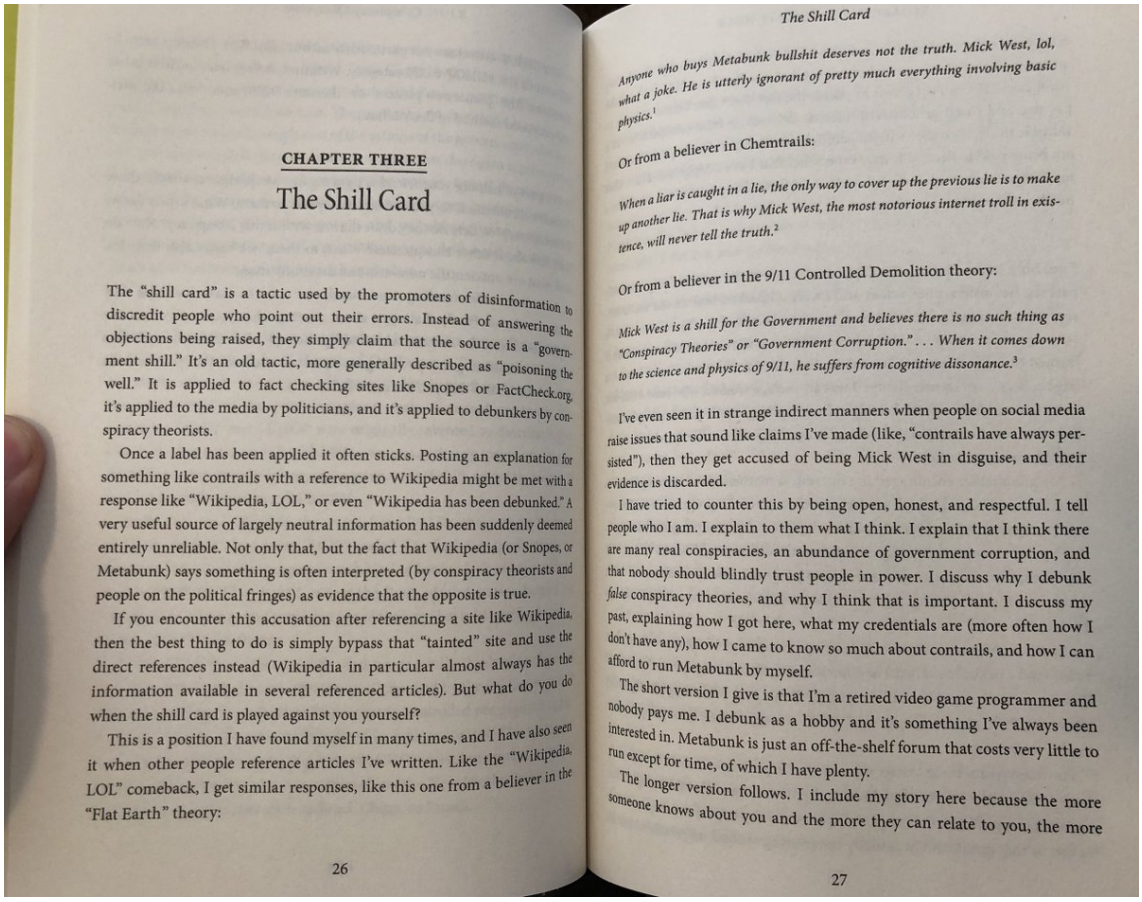
@vandman777 @Goofamatic @PaulineSandwich Opening pages of chapter 2, "The Shill Card", where I discuss the problem of how to establish constructive communication when the person you are talking to thinks you are a government shill.
http://pbs.twimg.com/media/Dm1WeOHUcAApbNr.jpg



CHAPTER THREE

The Shill Card

The "shill card" is a tactic used by the promoters of disinformation to discredit people who point out their errors. Instead of answering the objections being raised, they simply claim that the source is a "government shill." It's an old tactic, more generally described as "poisoning the well." It is applied to fact checking sites like Snopes or FactCheck.org, it's applied to the media by politicians, and it's applied to debunkers by conspiracy theorists.

Once a label has been applied it often sticks. Posting an explanation for something like contrails with a reference to Wikipedia might be met with a response like "Wikipedia, LOL," or even "Wikipedia has been debunked." A very useful source of largely neutral information has been suddenly deemed entirely unreliable. Not only that, but the fact that Wikipedia (or Snopes, or Metabunk) says something is often interpreted (by conspiracy theorists and people on the political fringes) as evidence that the opposite is true.

If you encounter this accusation after referencing a site like Wikipedia, then the best thing to do is simply bypass that "tainted" site and use the direct references instead (Wikipedia in particular almost always has the information available in several referenced articles). But what do you do when the shill card is played against you yourself?

This is a position I have found myself in many times, and I have also seen it when other people reference articles I've written. Like the "Wikipedia LOL" comeback, I get similar responses, like this one from a believer in the "Flat Earth" theory:

Anyone who buys Metabunk bullshit deserves not the truth. Mick West, lol, what a joke. He is utterly ignorant of pretty much everything involving basic physics.[1]

Or from a believer in Chemtrails:

When a liar is caught in a lie, the only way to cover up the previous lie is to make up another lie. That is why Mick West, the most notorious internet troll in existence, will never tell the truth.[2]

Or from a believer in the 9/11 Controlled Demolition theory:

Mick West is a shill for the Government and believes there is no such thing as "Conspiracy Theories" or "Government Corruption." . . . When it comes down to the science and physics of 9/11, he suffers from cognitive dissonance.[3]

I've even seen it in strange indirect manners when people on social media raise issues that sound like claims I've made (like, "contrails have always persisted"), then they get accused of being Mick West in disguise, and their evidence is discarded.

I have tried to counter this by being open, honest, and respectful. I tell people who I am. I explain to them what I think. I explain that I think there are many real conspiracies, an abundance of government corruption, and that nobody should blindly trust people in power. I discuss why I debunk *false* conspiracy theories, and why I think that is important. I discuss my past, explaining how I got here, what my credentials are (more often how I don't have any), how I came to know so much about contrails, and how I can afford to run Metabunk by myself.

The short version I give is that I'm a retired video game programmer and nobody pays me. I debunk as a hobby and it's something I've always been interested in. Metabunk is just an off-the-shelf forum that costs very little to run except for time, of which I have plenty.

The longer version follows. I include my story here because the more someone knows about you and the more they can relate to you, the more

http://pbs.twimg.com/media/Dm1WeOHUcAApbNr.jpg
2018-09-11T18:27:16+00:00
https://twitter.com/_/status/1039581153928212480
@vandman777 @Goofamatic @PaulineSandwich No problem. It's easy to get angry at people in the abstract when you think they represent something deceptive. It's a problem I talk about in my book, Escaping the Rabbit Hole. My solution is just to be be as open and honest as possible and hope it comes through.

2018-09-11T18:21:48+00:00
https://twitter.com/_/status/1039579778112663553
@vandman777 @Goofamatic @PaulineSandwich I'm always happy to respond to constructive criticism. I want people to point out mistakes in what I write. I also think it's important to listen to different perspectives.

2018-09-11T18:19:55+00:00
https://twitter.com/_/status/1039579305800421377
@JohnSmi43907640 I have flown planes. I'm not at NASA.

2018-09-11T18:19:15+00:00
https://twitter.com/_/status/1039579139408191488
@Revolution4Love The idea that HAARP can control the weather is just wrong. It only affects the ionosphere, and then just a bit of it over Alaska. That has no downward coupling to the troposphere, so cannot affect the weather. Like dropping rocks in the Nile to make a splash in lake Victoria.

2018-09-11T18:06:31+00:00

https://twitter.com/_/status/1039575931952619520
@vandman777 @Goofamatic @PaulineSandwich I say it all the time. It's hard to prove a negative. I just focus on individual claims of evidence. Weeding out things that are wrong. Then people can make a better informed decision with things that are factual.

2018-09-11T18:04:11+00:00
https://twitter.com/_/status/1039575344129294342
@vandman777 @Goofamatic @PaulineSandwich Well I feel like I'm part of the solution. I think false conspiracy theories are a distraction from real conspiracies, like political corruption and revolving door careers with the military industrial complex, finance, etc.

2018-09-11T18:01:36+00:00
https://twitter.com/_/status/1039574696499376128
@JohnSmi43907640 Here's the WMO page showing where they fit in the classification, basically as sub-variety of various forms of cirrus.
https://cloudatlas.wmo.int/explanatory-remarks-and-special-clouds-cirrus.html

---

2018-09-11T17:59:59+00:00
https://twitter.com/_/status/1039574289916121088
@JohnSmi43907640 They are essentially cirrus clouds. They form in long lines because their formation is triggered by the water in the aircraft exhaust which pushes the local relative humidity over 100%. Sometime called "aviation induced cirrus", "cirrus aviaticus", or Cirrus Homogenitus.

2018-09-11T17:56:13+00:00
https://twitter.com/_/status/1039573342099988480
@vandman777 @Goofamatic @PaulineSandwich I debunk things that are false. So less falsehood = more truth.

2018-09-11T17:42:42+00:00
https://twitter.com/_/status/1039569938044710912
@vandman777 @Goofamatic @PaulineSandwich Yes, I debunk the things that can be debunked. What exactly is wrong with that?
This column cut for example, has been proven to be cut six weeks after the collapse. That does not prove it was not CD, however it proves this long-standing bit of evidence for CD was wrong.

https://twitter.com/_/status/1039304243516067840
@Brian_D_Roberts @MitchBallard_ @RyanAFournier I'm not getting your point. You understand the $2.3 Trillion does not refer to actual missing money, right?
You understand that there are ALSO actual cases of missing money in government, sometimes in the billions?
So what exactly is your issue here?

2018-09-11T00:00:51+00:00
https://twitter.com/_/status/1039302715891826688
@Brian_D_Roberts @MitchBallard_ @RyanAFournier Minnery was talking about millions, not trillions, as the next sentence reveals.

"Minnery, a former Marine turned whistle-blower, is risking his job by speaking out for the first time about the millions he noticed were missing from one defense agency's balance sheets. "

2018-09-10T23:53:38+00:00

https://twitter.com/_/status/1039300898088861696

@Brian_D_Roberts @MitchBallard_ @RyanAFournier What do they say exactly?

2018-09-10T23:53:06+00:00

https://twitter.com/_/status/1039300766605795329

@MitchBallard_ Missing billions are a significant problem that should be addressed. But missing trillions would be a thousand times more significant, it would be the biggest story ever if it actually happened. It didn't

1 Trillion = 1,000 Billion

2018-09-10T23:28:05+00:00

https://twitter.com/_/status/1039294469097418752

@Brian_D_Roberts @MitchBallard_ @RyanAFournier I don't think it's fake news, just bad reporting. I don't think they deliberately misunderstood.

2018-09-10T23:26:13+00:00

https://twitter.com/_/status/1039293998572101632

@Brian_D_Roberts @MitchBallard_ @RyanAFournier The follow-up was that the earthquake was too deep to do any damage. Not really an earthquake in the sense most people understand it.

2018-09-10T23:04:57+00:00

https://twitter.com/_/status/1039288647697059841

@Brian_D_Roberts @MitchBallard_ @RyanAFournier And of course we should care about missing billions, even missing millions. But nothing much gets done because the military industrial complex would not benefit from closer scrutiny. So the response is slow. Things DO get done sometimes despite this. https://www.newsweek.com/pentagon-800-million-799740

2018-09-10T23:01:19+00:00

https://twitter.com/_/status/1039287734207008768

@Brian_D_Roberts @MitchBallard_ @RyanAFournier That's really a different topic though. The original claim was that $2.3 TRILLION was missing, (and then $6.5 Trillion, then $21 Trillion). It was not. Now billions probably are, but a billion is a thousand times smaller than a trillion. So the response is proportionate.

2018-09-10T22:44:43+00:00

https://twitter.com/_/status/1039283557670170625

@Brian_D_Roberts @MitchBallard_ @RyanAFournier There was no follow-up because they figured out there was no story. It's like when there's an 8.2 magnitude earthquake in Fiji, like there was last month. Initial media response was OMG MASSIVE 8.2 EQ! But once it was explained it was a harmless 8.2 no follow-up was needed

Someone called me a government shill. What's that? This 1958 article says it's "a casino

employee who poses as a customer to drum up trade". But I'm really not very enthusiastic about the government. http://pbs.twimg.com/media/DmRgfxjU8AAYkMp.jpg

Darn Sky Riders

Jet Trails Dim Sun, Palm Springs Gripes

WASHINGTON, Dec. 6. (UPI)—The air force is long since resigned to the fuss about noise from its jets. Now comes Palm Springs, Calif., with a new complaint—that jet trails overhead are so thick they are beginning to blot out the sun.

Jimmy Cooper, manager of the Palm Springs Chamber of Commerce, outlined this "most serious and urgent problem" in a telegram to Representative D. S. (Judge) Saund (D-Calif.), who has asked the air force what can be done.

"As you know," Cooper wired Saund, "our entire economy is dependent upon the tourist trade, which is predicated on our bright sunshine and warm climate. Recently our sky has resembled a mob of exuberant sky riders performing an aerial circus.

"The 'contrails' are not disappearing but are breaking down into a haze and creating a cloud-like appearance in the sky.

"With the unlimited expanse of barren, uninhabited land in the west, does such activity have to be centered over a resort area, which is offering the visitor cloudless skies and unlimited sunshine?"

The air force, so far, is flabbergasted. No doubt in time it will recover its aplomb sufficiently to give Saund the usual answer to all congressional inquiries—that the matter will be investigated.

The air force figures its jets couldn't blot out the sun short of a wing-to-wing mass flight like the European bombing raids of World war II. If anything like that is going on out of March air force base at Riverside, Calif., the nearest jet base to Palm Springs, air force officials here want to know all about it.

Shill Ousted by Minister

TOPEKA, Kan., Dec. 6. (AP)—Maurice D. Tulloch, who gave up the life of a Baptist minister to become a shill in a Las Vegas gambling casino, was stripped of his ministerial standing yesterday.

The action was taken by the executive committee of the Kansas Baptist convention.

Tulloch, a graying, spectacled man with crew-cut hair who looks closer to 40 than his 50 years, was pastor of the First Baptist church of Sabetha, Kan. Last September 29, he walked out of a meeting of Baptist pastors in Hutchinson, Kan., and disappeared.

On November 26 he was located in Las Vegas, working as a shill—a gambling casino employee who poses as a customer to drum up trade.

"aerosol" or "spray." Here are some of the actual patents listed as "evidence":

1631753–An electric water heater
2097581–A steam generator for sterilizing lab equipment
2591988–A method for making white paint pigment
3174150–A self-focusing antenna
3300721–A radio for spaceships
3564253–A giant space mirror for reflecting sunlight onto the Earth
3899144–A towed aerial target that leaves a powder trail for visibility
3940060–A ground-based smoke ring generator for punching holes in clouds
3992628–A temporary laser shield
4347284–A snow camouflage blanket to hide tanks under
4415265–A spectrometer for analyzing chemicals
5056357–An ultrasound measuring device for liquids
5327222–A flow speed sensor
5631414–A device for measuring radiation from the ocean
6110590–A method of making silk
5486900–A device for measuring how much toner is left in a photocopier

We might forgive the compiler of the list for initially being a little over-enthusiastic, but the persistence of this list after at least five years of people pointing out the mistakes is a testament to the resistance of the list compiler to any form of correction. The last one in particular, a device for measuring how much toner is left in a photocopier, is something I have attempted to tell the Chemtrails folk about several times. I've written a detailed explanation on Metabunk[34] which I share every time it comes

https://twitter.com/_/status/1034127344636547072

@WileGenius @TheOutThere2016 More from that paper. Essentially what I said. Energy is used to turn the fan, so the exhaust is cooler, so the contrail factor is higher.

http://pbs.twimg.com/media/Dln0-5tUwAQ_juZ.jpg

thalpy. If the total enthalpy of the exhaust is computed in the frame of reference of the air through which the engine is being carried by the aircraft, then propulsion efficiency is implicitly accounted for in the estimate of contrail factor. Contrail factors computed in this way are equal to or greater than the contrail factor of $0.030\ g \cdot \mathrm{kg}^{-1\circ}\mathrm{C}^{-1}$ computed assuming all water and enthalpy generated during combustion exit the exhaust nozzle. Contrail factors are typically greater than this because some of the energy generated by combustion is used to propel the aircraft and some is lost in parasitic flows. When exhaust gases have high exit speeds relative to the airspeed of the aircraft, when fan and core streams are well mixed, and when there is little energy extracted in the form of parasitic flows, the contrail factor should approach $0.030\ g \cdot \mathrm{kg}^{-1}\mathrm{K}^{-1}$. For high-bypass engines, which move more air more slowly than low-bypass engines for a given net thrust, contrail factors generally are higher.

http://pbs.twimg.com/media/Dln0-5tUwAQ_juZ.jpg

2018-08-27T17:09:55+00:00

https://twitter.com/_/status/1034125873127944192

@WileGenius @TheOutThere2016 But you did claim: "High bypass JE incapable of creating any contrail except under the rarest and most extreme circumstances." What were you basing that on?

Check out the "contrail factor" of an engine. It's a more complex measure of what I describe.

https://arc.aiaa.org/doi/abs/10.2514/2.2976?journalCode=ja

http://pbs.twimg.com/media/Dlnz38ZUwAEmdIo.jpg

Contrail Formation and Propulsion Efficiency

Andrew G. Detwiler*
South Dakota School of Mines and Technology, Rapid City, South Dakota 57701-3995
Arthur Jackson†
U.S. Air Force Research Laboratory VSBL, Hanscom Air Force Base, Massachusetts 01731

The contrail factor is the ratio of water vapor to enthalpy added by combustion to the exhaust plume from an aircraft engine. It is the key parameter determining the highest temperature at which contrails will form behind a particular engine on a particular aircraft. Cycle calculations are used to estimate contrail factors for a range of flight environments at a range of power settings, for generic low-bypass and high-bypass turbofan gas-turbine engines. It is found that, contrary to assumptions made in current methods of contrail forecasting, the contrail factor is not constant for a given engine type. The contrail factor varies even for the same engine at different power settings and flight conditions. Results are shown for a range of conditions, including flight levels between 25,000 and 50,000 ft in a standard atmosphere, flight Mach numbers ranging from 0.4 to 0.9, and power settings from idle (low) to military (high). The computed contrail factors range from 0.030 to 0.053 $g \cdot \mathrm{kg}^{-1}{}^{\circ}\mathrm{C}^{-1}$ for the low-bypass engine and from 0.038 to 0.090 $g \cdot \mathrm{kg}^{-1}{}^{\circ}\mathrm{C}^{-1}$ for the high-bypass engine. Changes in contrail factor can be roughly related to changes in the threshold environmental temperature for contrail formation by the relationship that a 10% increase in contrail factor results in a 1°C higher threshold temperature in a typical upper tropospheric environment for threshold temperatures near −50°C. These calculations do not yield precise estimates of contrail factors for specific engines, but demonstrate that contrail factors for a given engine are generally higher at lower power settings at a given Mach number, higher at higher Mach numbers at a given power setting, and higher at higher altitudes in general.

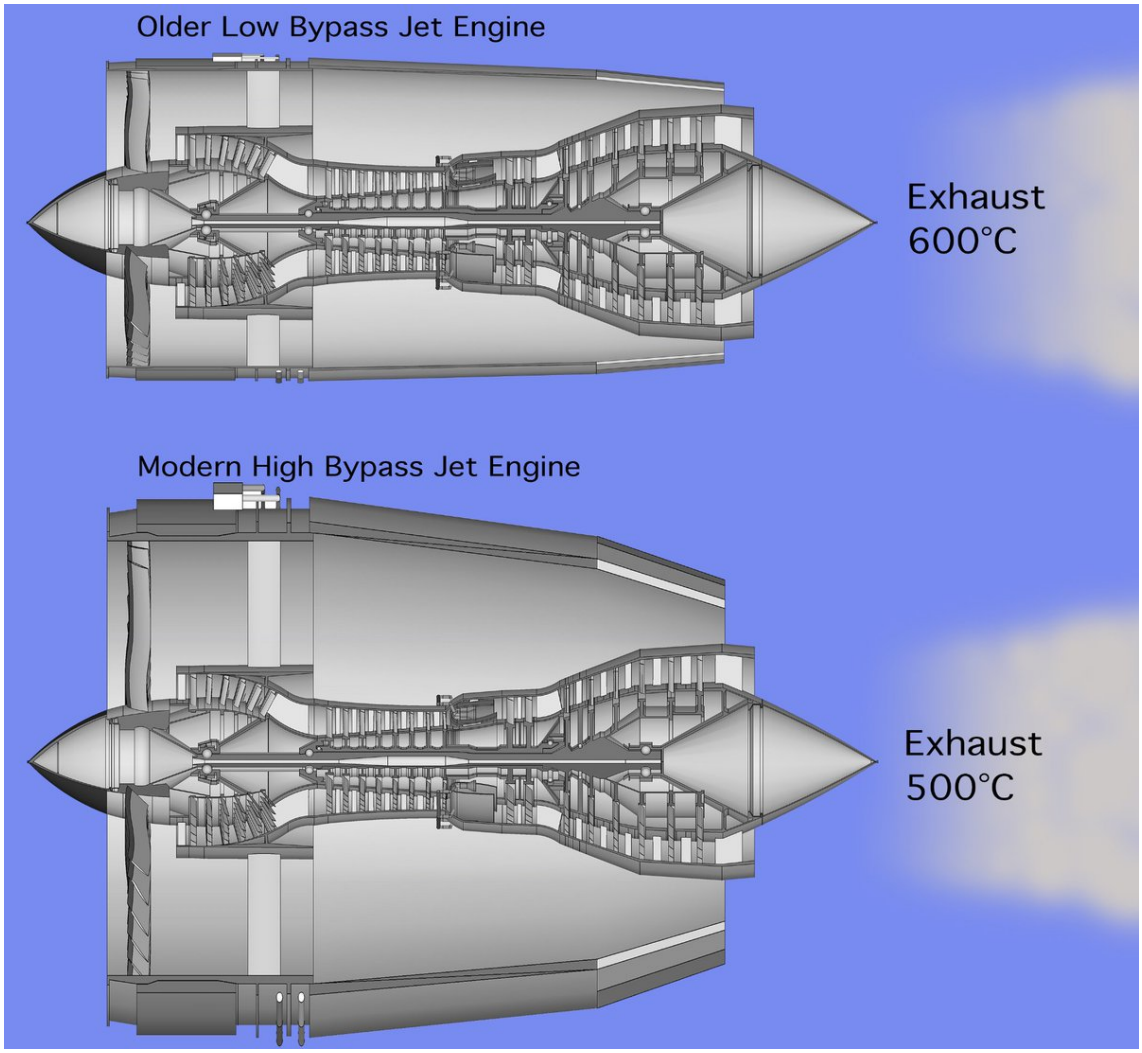
https://twitter.com/_/status/1034110367096496129

@WileGenius @TheOutThere2016 And you are still not explaining why high bypass would make a difference. In low bypass there's highly turbulent mixing with ambient air. Why is high bypass different exactly? They both produce exhaust, which mixes with air.

http://pbs.twimg.com/media/Dlnly6-UwAA0jv9.jpg



http://pbs.twimg.com/media/Dlnly6-UwAA0jv9.jpg

2018-08-27T16:03:54+00:00

2018-08-27T15:56:21+00:00

https://twitter.com/_/status/1034107359151382529

@WileGenius @TheOutThere2016 How do cirrus clouds form? These larger particle don't just spring in existence - they start as nano sized particles, just like contrails do.

You know what ice supersaturation is? If it's ice supersaturated then it cannot sublimate, it grows.

2018-08-27T06:00:35+00:00

https://twitter.com/_/status/1033957429266903040

@wanderinganimal @BornongMj @naomirwolf I'm not sure you can claim both:

"300 years of cloud history and research with all cloud names already been identified long ago"
AND
"these scientists have been lying for hundreds of years also"

2018-08-27T05:57:12+00:00

https://twitter.com/_/status/1033956577709940736

@WileGenius @TheOutThere2016 Ice does not sublimate in higher humidities. That's when you get a persistent contrail.

Note that cirrus clouds are also made of tiny ice crystals. They do not instantly vanish.

Same thing.

2018-08-27T00:37:09+00:00

https://twitter.com/_/status/1033876035102633984

@WileGenius @TheOutThere2016 â□□Sufficiently distributesâ□□ = mixing = how contrails form.

Does not really matter if itâ□□s ambient or bypass air.

2018-08-27T00:35:30+00:00

https://twitter.com/_/status/1033875619866533888

@WileGenius @TheOutThere2016 Heat and temperature are different things.

2018-08-26T19:30:59+00:00

https://twitter.com/_/status/1033798983120900097

@WileGenius @TheOutThere2016 I understand how a jet engine works. It burns fuel, and the exhaust comes out the back. The exhaust contains water. It mixes with the air and can trigger the formation of a cloud. The amount of bypass air is largely irrelevant. Dane Wigington unfortunately misunderstands.

2018-08-26T19:28:36+00:00

https://twitter.com/_/status/1033798382190440448

@WileGenius @TheOutThere2016 Well the difference between 30Â°F and 34Â°F is ice and liquid water.

The difference is actually not that much, maybe 5% more contrails. It just lets them form in a wider range of conditions.

2018-08-26T18:12:47+00:00

https://twitter.com/_/status/1033779304415473664

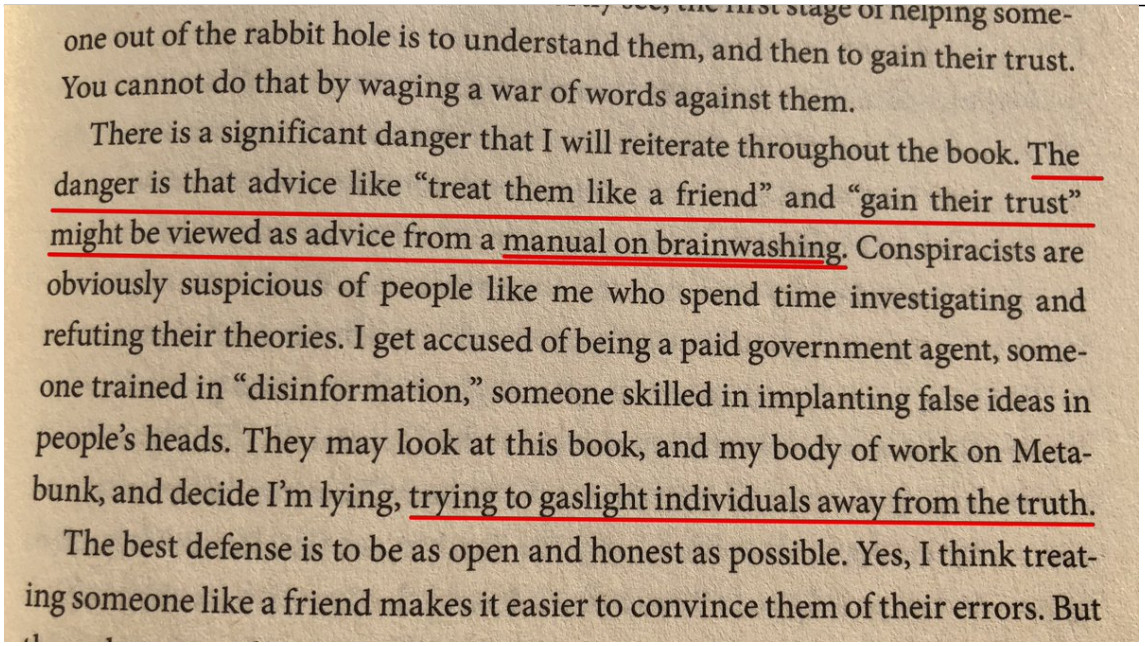
2018-08-24T15:29:01+00:00
https://twitter.com/_/status/1033013314308042753
@4thAnon I discuss this viewpoint in the book.
http://pbs.twimg.com/media/DlYABK7VAAY7QrR.jpg



one out of the rabbit hole is to understand them, and then to gain their trust. You cannot do that by waging a war of words against them.

There is a significant danger that I will reiterate throughout the book. The danger is that advice like "treat them like a friend" and "gain their trust" might be viewed as advice from a manual on brainwashing. Conspiracists are obviously suspicious of people like me who spend time investigating and refuting their theories. I get accused of being a paid government agent, someone trained in "disinformation," someone skilled in implanting false ideas in people's heads. They may look at this book, and my body of work on Metabunk, and decide I'm lying, trying to gaslight individuals away from the truth.

The best defense is to be as open and honest as possible. Yes, I think treating someone like a friend makes it easier to convince them of their errors. But

http://pbs.twimg.com/media/DlYABK7VAAY7QrR.jpg

https://twitter.com/_/status/1032760563640631297

@tmasson There's two things of conspiracy interest here. A descending 360Â° turn is suspicious to the 9/11 crowd (as they think it says something about the Pentagon attack) and non-straight flight paths seem suspicious to the "chemtrail" crowd.

So I was pointing out they are both normal.

2018-08-23T20:17:37+00:00

@BelieversBeware @BenSwann_ And the referenced law in (b)(iii) gives more clarification in how the jurisdiction of a special counsel can be expanded.

https://www.law.cornell.edu/cfr/text/28/600.4

http://pbs.twimg.com/media/DlTcydAUcAUVeRT.jpg

CFR › Title 28 › Chapter VI › Part 600 › Section 600.4

28 CFR 600.4 - Jurisdiction.

eCFR | Authorities (U.S. Code)

prev | next

§ 600.4 Jurisdiction.

(a) ***Original jurisdiction.*** The jurisdiction of a Special Counsel shall be established by the Attorney General. The Special Counsel will be provided with a specific factual statement of the matter to be investigated. The jurisdiction of a Special Counsel shall also include the authority to investigate and prosecute federal crimes committed in the course of, and with intent to interfere with, the Special Counsel's investigation, such as perjury, obstruction of justice, destruction of evidence, and intimidation of witnesses; and to conduct appeals arising out of the matter being investigated and/or prosecuted.

(b) ***Additional jurisdiction.*** If in the course of his or her investigation the Special Counsel concludes that additional jurisdiction beyond that specified in his or her original jurisdiction is necessary in order to fully investigate and resolve the matters assigned, or to investigate new matters that come to light in the course of his or her investigation, he or she shall consult with the Attorney General, who will determine whether to include the additional matters within the Special Counsel's jurisdiction or assign them elsewhere.

(c) ***Civil and administrative jurisdiction.*** If in the course of his or her investigation the Special Counsel determines that administrative remedies, civil sanctions or other governmental action outside the criminal justice system might be appropriate, he or she shall consult with the Attorney General with respect to the appropriate component to take any necessary action. A Special Counsel shall not have civil or administrative authority unless specifically granted such jurisdiction by the Attorney General.

https://twitter.com/_/status/1032692560521703424

@BelieversBeware No that's not true. Notice @BenSwann_ gives no examples of this supposed media conflation. In fact the special counsel VERY SPECIFICALLY is authorized by the AG to investigate "any matters that arose or may arise from the investigation"

http://pbs.twimg.com/media/DlTcGFlUUAIiCrB.jpg

Office of the Deputy Attorney General
Washington, D.C. 20530

ORDER NO. 3915-2017

APPOINTMENT OF SPECIAL COUNSEL
TO INVESTIGATE RUSSIAN INTERFERENCE WITH THE
2016 PRESIDENTIAL ELECTION AND RELATED MATTERS

By virtue of the authority vested in me as Acting Attorney General, including 28 U.S.C. §§ 509, 510, and 515, in order to discharge my responsibility to provide supervision and management of the Department of Justice, and to ensure a full and thorough investigation of the Russian government's efforts to interfere in the 2016 presidential election, I hereby order as follows:

(a) Robert S. Mueller III is appointed to serve as Special Counsel for the United States Department of Justice.

(b) The Special Counsel is authorized to conduct the investigation confirmed by then-FBI Director James B. Comey in testimony before the House Permanent Select Committee on Intelligence on March 20, 2017, including:

(i) any links and/or coordination between the Russian government and individuals associated with the campaign of President Donald Trump; and

(ii) any matters that arose or may arise directly from the investigation; and

(iii) any other matters within the scope of 28 C.F.R. § 600.4(a).

(c) If the Special Counsel believes it is necessary and appropriate, the Special Counsel is authorized to prosecute federal crimes arising from the investigation of these matters.

(d) Sections 600.4 through 600.10 of Title 28 of the Code of Federal Regulations are applicable to the Special Counsel.

2018-08-22T14:55:27+00:00

https://twitter.com/_/status/1032280091219226625

@Jerminator33 Witch hunts end up with innocent people convicted and executed.

This investigation has GUILTY people convicted and jailed.

Vast difference.

2018-08-22T14:53:04+00:00

https://twitter.com/_/status/1032279491454746625

@MolotoVNKA Why are you convinced they were? Pause for a minute here and think back to the start. You made some assertions, and they turned out to be flat wrong. Maybe instead of jumping around you should research a bit more in depth. Let's resume in a week.

2018-08-22T14:45:32+00:00

https://twitter.com/_/status/1032277595688132610

@MolotoVNKA Yes, you said "Maria neighbour heard the first plane crash at 8.46 and immediately phoned Maria." and that's nothing at all like what the document you linked says. They were NOT there at the time of first impact.

2018-08-22T14:42:20+00:00

https://twitter.com/_/status/1032276793284153344

@MolotoVNKA There's video of people smiling, laughing, drinking beer. I just showed it to you.

2018-08-22T14:36:49+00:00

https://twitter.com/_/status/1032275401916047361

@MolotoVNKA And why is it odd that they would be filming? Wouldn't you want to document such an amazing event? Lots of people were filming. The woman in the apartment drinking beer

and joking with her friends was filming.

2018-08-22T14:34:32+00:00

https://twitter.com/_/status/1032274826579259393

@MolotoVNKA Also, your timeline and description does not match the document you linked. You said "Maria neighbour heard the first plane crash at 8.46 and immediately phoned Maria." FBI says neighbor saw smoke shortly before 9:00

http://pbs.twimg.com/media/DlNgV4mUwAAAopy.jpg

[redacted] was in the kitchen of her apartment shortly before 9:00am on 09/11/2001. She received a telephone call from [redacted] a friend who lives in apartment [redacted] in the building. [redacted] told [redacted] that there was smoke coming from the World Trade Center (WTC). [redacted] looked out her window and saw smoke coming from the towers. [redacted] ended the call and [redacted] took a pair of binoculars and walked over to the window. When she looked out, she also noticed a white van parked in the parking lot for her building, approximately five or six parking spaces from the south end of the lot, in a direct line between her and the WTC. There were young three men on top of the van, which was parked at an angle pointing directly at the WTC. She saw one of the males holding a small video camera. One of the men had his hand on the shoulder of the other and they appeared to be happy and "joking around."

http://pbs.twimg.com/media/DlNgV4mUwAAAopy.jpg

2018-08-22T14:28:50+00:00

https://twitter.com/_/status/1032273392559251457

@MolotoVNKA Perhaps you should investigate these people drinking beer, laughing and joking. This is AFTER the second plane hit. People are just people.

https://youtu.be/_qiVBOqNiOs?t=1m44s

2018-08-22T14:24:39+00:00

https://twitter.com/_/status/1032272339633766401

@MolotoVNKA Why is that odd? Lots of people we laughing and joking and videoing the first tower. People thought it was an accident. They were watching the spectacle.

2018-08-22T14:13:25+00:00

https://twitter.com/_/status/1032269514245779456

@MolotoVNKA Perhaps you should read them and then quote the relevant part, as you got it wrong before.

You think it's suspicious that someone was laughing between the first impact and the second? Remember the first impact was widely thought to be an accident. People went on with life.

2018-08-22T14:11:08+00:00

https://twitter.com/_/status/1032268938300743680

@Jerminator33 Non-Russia matters are within the scope of the investigation. Cohen's lawyers says he will testify about Russia. We'll see. Hardly a witch hunt if people are actually guilty, like Manafort, and Cohen, and several others. http://pbs.twimg.com/media/DlNaXI8U0AADCsA.jpg

@TTSA_Agent_001 There's "no reason why it can't be" aliens, or the Chinese, or time travelers, or glitches in the matrix.

The point being that there's no actual evidence of any of these things. There's a huge amount of evidence that the fires are just fires. Hot, dry, windy, and then a spark.

@RegimeChangeBC Building codes are partly to blame for the buildings burning down. Communities that implemented shelter-in-place compliant buildings did not burn.

https://twitter.com/_/status/1031961574519361536

@RegimeChangeBC Not nothing. There's a variety of reasons for the fires and destruction. Over 100Â°F, high winds, lots of dry brush, houses built in unwise places with poor building codes.

2018-08-21T17:46:59+00:00

https://twitter.com/_/status/1031960870304198656

Beam of energy from space starting forest fires? Nope, it's just a symptom of a bit of grease on the lens, and a rather poor cleaning technique. Full explanation here:

Chapter 5
STEEL INVENTORY AND IDENTIFICATION

5.1 THE RECOVERY OF WORLD TRADE CENTER STRUCTURAL STEEL

Beginning in October of 2001, nearly a year prior to the start of the National Institute of Standards and Technology (NIST) investigation, members of the Federal Emergency Management Agency (FEMA) – American Society of Civil Engineers (ASCE) Building Performance Assessment Team (BPAT), members of the Structural Engineers Association of New York (SEAoNY), and Professor A. Astaneh-Asl of the University of California, Berkeley (with support from the National Science Foundation), began work to identify and collect World Trade Center (WTC) structural steel from the various recovery yards where debris, including the steel, was taken during the WTC site clean-up effort. Dr. J. Gross, a research structural engineer at NIST and a member of the FEMA/ASCE Building Performance Study, was involved in these early efforts.

There were four major sites where debris from the WTC buildings was shipped during the clean-up effort:

- Hugo Neu Schnitzer, Inc., Fresh Kills Landfill in Staten Island, New Jersey,
- Hugo Neu Schnitzer East, Inc., Claremont Terminal in Jersey City, New Jersey,
- Metal Management, Inc., in Newark, New Jersey, and
- Blanford and Co. in Keasbey, New Jersey.

The volunteers searched through enormous unsorted piles of steel and other debris for pieces from the WTC buildings, specifically searching for (McAllister 2002):

- Exterior column panels and interior core columns from WTC 1 and WTC 2 that were exposed to fire and/or impacted by the aircraft,
- Exterior column panels and interior core columns from WTC 1 and WTC 2 directly above and below the impact zones,
- Badly burned pieces from WTC 7,
- Connections from WTC 1, 2, and 7 (e.g., seat connections, single shear plates, and column splices),
- Bolts in all conditions,
- Floor trusses including stiffeners, seats, and other components,
- Any pieces that in the engineers' professional opinion might be useful.

Once selected for recovery, the samples were marked as "SAVE" and given an alphanumeric code that identified the recovery yard where they were located and an accession number. Some pieces were not saved in their entirety, but instead, small portions were removed, hereafter called coupons and held at Gilsanz Murray Steficek, LLP (GMS). Coupons were also removed in the field for WTC 7 and held at GMS (all coupons were later sent to NIST).

Facing concern that the selected steel may not be properly preserved in the recovery yards, NIST arranged for the steel to be shipped to its campus located in Gaithersburg, MD, starting in February of 2002, about six months before launching its investigation.

Before the samples were shipped to the NIST campus, environmental testing for asbestos and analysis of the paint for lead was conducted. SEAoNY volunteers and NIST personnel continued to select and ship steel specimens to NIST through October 2002. Mr. S. Cauffman of NIST coordinated all environmental testing, transportation, and delivery of the recovered steel to NIST. The recovered structural components constituted the material base for analysis in the NIST Investigation.

Structural steel elements were also collected and held by the Port Authority of New York and New Jersey (PANYNJ or Port Authority) in Hangar 17 of John F. Kennedy International Airport. The main goal of the Port Authority project was to decontaminate and preserve the steel, as well as other WTC artifacts, for future exhibits and memorials. A complete listing of the pieces held by PANYNJ can be found in the *Preservation and Inventory Report* prepared by Voorsanger and Associates Architects, PC (Voorsanger 2002). NIST personnel visited the hangar and identified 12 pieces considered important to the investigation. Six whole pieces were moved to the NIST campus in Gaithersburg, Maryland, as well as portions of six additional pieces.

5.2 STRUCTURAL ELEMENTS RECOVERED FROM WTC BUILDINGS

5.2.1 Location and Labeling of Structural Steel Elements

NIST obtained 236 samples from the WTC buildings. The report *Steel Inventory and Identification* (NIST NCSTAR 1-3B) gives a complete list of each sample with a brief description and characteristic photographs. The samples ranged from full exterior column panels to pieces of bolts and bags of glass and other debris fragments. The pieces were classified into one of eight categories:

Classification	# of Pieces
Exterior column panel sections (flat wall or corner)	94
"How-tie" pieces	2
Rectangular built-up box column (not perimeter column)	11
Wide flange sections	44
Floor trusses	23
Channels	25
Coupons from WTC 5	7
Miscellaneous (isolated bolts, floor hanger components, other)	30

5.2.2 Identification Methods of WTC Structural Steel Elements

Information from Leslie E. Roberts Associates (LERA) indicated that all structural steel pieces in WTC 1 and WTC 2 were uniquely identified by stampings (recessed letters and numbers) and/or painted stencils (Faschan 2002). NIST was successful in finding these markings on many of the perimeter panel sections, core columns, and other wide flange members, thereby identifying the original, as-built location of the pieces. (Based on identification of damaged panels in precollapse photographs, NIST believes that the as-built locations were correctly identified; for the majority of identified pieces, however, it is the *intended* location within the building that was identified.)

The positive identification of the structural elements was made possible by deciphering the stampings and/or stencils found on them. During fabrication, the exterior panel sections were stamped at the bottom of the center column on the inside face. These stampings indicated the building, center column line number, and floors spanned by the columns. The core columns were stamped at the lower end of the component. The building was typically represented as "A" for WTC 1 and "B" for WTC 2. An example of a stamping found on an exterior column is shown in Fig. 5–1, where the stamping indicates that the piece was from WTC 2 with center column line number of 206, spanning floors 83–86. Core columns were found to have similar markings as seen in Fig. 5–2. Other stampings found on the flanges of the perimeter columns indicated the column type (individual plate dimensions) as well as the specified minimum yield strength of the column. Additional stampings were sometimes located on the flanges, although NIST, PANYNJ, and LERA were unable to determine the significance of these codes. All stampings were typically located within one meter of the bottom of the column.

The perimeter panels and core columns were often additionally stenciled in white or yellow lettering with similar building information. For the exterior panel sections, the stenciling was located on or near the lowest spandrel on the interior face. Figure 5–3a shows typical stenciling found on a perimeter panel, indicating this piece was in WTC 1 with center column line number of 130, spanning floors 93 to 96. For the core columns, both stenciling and hand written codes were observed on the recovered pieces. Figure 5–3b shows one of these stencilings from a core column located in WTC 1.

Also seen in Fig. 5–3a are two other markings, "51" and "<83>", found on the exterior panel sections. These markings are the estimated piece tonnage (1 ton equals 2,000 lbs, or approximately 907 kg) and erector's derrick division number, respectively. This information was also stamped on some of the core column pieces, see Fig. 5–2. The erector, Karl Koch Erecting Co., Inc., assigned derrick divisions 47 through 70 for WTC 1 and derrick divisions 547 through 570 for WTC 2 (PONYA 1967). Each division was assigned to a specific area of the building and shared one of four cranes with other nearby derrick divisions. For example, a single crane may have lifted pieces from derrick divisions 65, 67, and 69. Several derrick divisions that hoisted the specific columns for both buildings have been identified, based on derrick numbers found on structural elements with positive identification, providing additional information to help identify partially identified panels (NIST NCSTAR 1-3B).

Figure 5–1. Example of stampings on the interior base of the middle column for each panel. Shown here on panel M-10b are the stampings "B206 86 83," indicating that it is from WTC 2, column number 206, spanning floors 83 to 86.

Source: NIST.

Figure 5–2. Example of stampings placed on one end of a core column. Shown here on sample C-90 are the stampings "18 TON, 701 B 12 – 16, 549 WEST," indicating that it is from WTC 2, core column number 701, and spans floors 12 to 16. Also indicated are the approximate weight of the piece (18 tons) and the derrick division <549> that was to lift it into place.

Figure 6–26. Photographs of recovered end plate connections from sample M-2 (A127: 97-100). The upper end plate experienced bolt hole failure. The bottom end plate of column 129 was also ripped out upon impact of the airplane. Failure was found to be a mixture of fracture in the base plates (portion of the flange/web still attached to the end plate) and clean separation of the end plate from the flange/web (complete flange/web recovered with internal weld bead visible) (continued).

occurrence was most likely a result of the overloading of the lower floors ("pancaking" mechanism) during collapse of the building.

Missing seats were typically a result of fracture near a welded joint associated with the standoff plates. Inspection of the failures associated with the floor truss connectors showed that failure typically occurred in the component with the lowest cross-sectional area with respect to the high loading forces of the collapse. This was usually located near a welded joint. However, there was no evidence to indicate that the type of joining method chosen was improper, that the materials chosen were inadequate, or that inappropriate welding procedures were used.

6.4 PHYSICAL DAMAGE OF CORE ELEMENTS (COLUMNS AND CHANNELS)

Damage surveys were conducted on the core elements to identify and inventory the various failure modes. The identified core columns, channel material that connected the trusses to the core, and floor truss connectors (truss seats welded to the channels) were examined. A full discussion of these results can be found in NIST NCSTAR 1-3C.

6.4.1 Core Columns

Table 6–2 lists the 12 identified core columns, including as-built locations and possible conditions to which they may have been exposed prior to the collapse of the buildings. Due to the small number of samples, statistical data analysis of the damage features and failure modes would be of little use. Therefore, in-depth descriptions of the four significant pieces (C-80, C-88a, C-88b, and 103) that were located within the fire zone floors are provided below. For reference, Fig. 6–29 displays the position of the columns within the core and with respect to the perimeter panel damage.

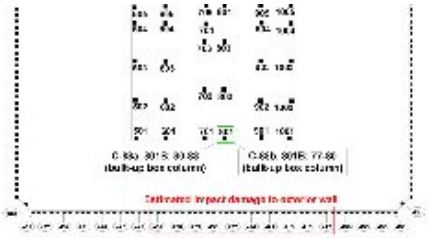

Figure 6–29b. Positioning of the recovered core columns with the core area for WTC 2.

Sample C-80 (Fig. 6–30a), from WTC 1, was a 36 ksi wide-flange located in the middle of the second row of core columns along the north face. Only the lower third of the column was recovered (approximately 13 ft). The location of the column indicated that it did not sustain impact damage. Consistent with the column's position, modeling results indicated that this column was not in the path of the aircraft debris (NIST NCSTAR 1-2). Different failure modes were observed for each end (Figs. 6–30b and 6–30c). Bolt fracture occurred at the lower portion of the column (92nd floor region), while the upper portion of the wide-flange was torn through its section (near the 93rd floor region). No visible necking (localized reduction in area) was observed in the immediate vicinity of the fracture.

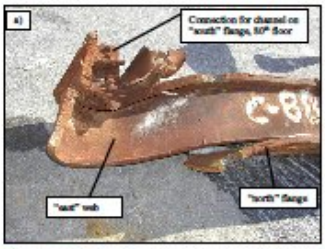
Source: NIST.

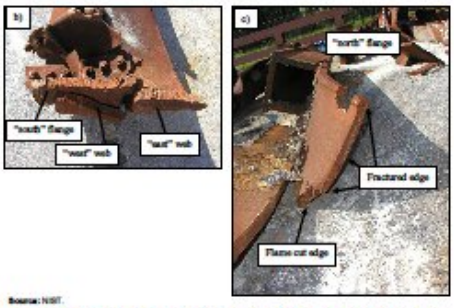
Figure 6–30. Core column C-80 (603A: 92-95). a) Overall view of recovered column, b) view of connection in the 92nd floor region, failure as a result of bolt fracture, and c) torn end of column near the 94th floor region.

Core columns C-88a and C-88b, from WTC 2, were unique among the recovered core elements in that the columns were still connected at the welded column splice, Fig. 6–31. Both columns were 42 ksi built-up box columns with their shared splice in the 80th floor level. The lower 16 ft of C-88a was recovered (floors 80 through 82), whereas the upper 8 ft of C-88b was still attached (primarily within the 80th floor). The location of the column C-88b suggested that impact damage may have been sustained. Both webs and the "south" flange were severely bent to the east and had flame cut ends, Fig. 6–32. The bends occurred just below the connector for the channel associated with the 80th floor. The "north"

Source: NIST.

Figure 6–31. Overall view of recovered core columns C-88a (801B: 80-83) and C-88b (801B: 77-80).





Source: NIST.

Figure 6–32. Damage associated with core column C-88b (801B: 77-80). a) Overall view of failed end, b) bottoms of "south" flange and both webs bent towards the east just below the 80th floor level, ends were flame cut, and c) "north" flange bent towards the north, majority of plate was fractured with some flame cutting.

flange had a less significant bend toward the north, with approximately 80 percent of the failed end of the plate as a fracture. There was no visible necking of the plate in the area of failure, with the remaining portion of the plate having been flame cut during the recovery effort. This flange was fractured roughly 2 ft below the splice in the 80th floor level. The fracture surfaces were too corroded for analysis. It was believed that the damage of the south flange and the two webs occurred during collapse of the building as the direction of bending was not consistent with the travel of the airplane. However, the damage to the north flange may have been a result of impact damage, as the severity and location of the plate failure was different from the other three plates of the column, and the direction of the bend was consistent with the travel of the airplane. The baseline analysis of the damage model indicated that this core column was not damaged as a result of the impact (NIST NCSTAR 1-2). However, another analysis with parameters set to increase the amount of damage indicated that impact damage was sustained. Core column C-88a did not sustain impact damage as (1) the damage (81st floor level) was above the floors of impact in this region (79th floor level), (2) the columns were bent downward indicating overloading of the column from above, and (3) the bending direction of the plates was opposite to the direction of the travel of the plane. This is also consistent with the modeling results (NIST NCSTAR 1-2).

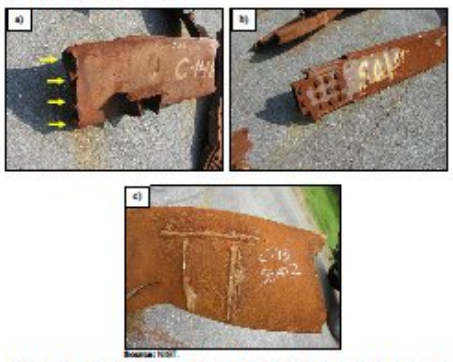
Aside from the three columns discussed above, only one other core column was recovered from within the fire region. Sample HH from WTC 1, Fig. 6–33, was a 42 ksi wide-flange positioned near the middle of the second row of core columns along the north face. The bottom half of the column was recovered (approximately 16 ft). The location of the column was such that damage could not have occurred during the impact. This was corroborated by the modeling results that indicated the core column was not hit during the impact (NIST NCSTAR 1-2). The failure mode of each end was different (Fig. 6–33a). Fracture of the plates used in the bolted connection occurred at the lower portion of the column (99th floor region), while the upper portion was torn through the material (100th floor region). Additionally, the sample was nearly bent in half (99th floor region), with complete fracture of one flange. Figure 6–33b shows that the flanges have become separated from the web in the region of the bend.

Source: NIST.

Figure 6–33. Core column HH (603A: 98-101). a) Fracture at both ends and b) separation between flange and web in the 99th floor region.

6.4.2 Core Channels and Truss Seats

An analysis was conducted to evaluate the failure modes of the recovered channel material and the condition of the core truss seats. Of the 24 channels used to support the floor trusses, half failed at both ends within the channel itself, Fig. 6–34a, while the others failed at one or both of the end connectors, Fig. 6–34b. Twenty-one pieces of channel had seats or remnants of seats attached. Over 90 percent of the seats (31 total) were still intact with the majority of these somewhat deformed. Only two seats had been ripped completely from the channel at the welded joint between the seat and the channel, as shown in Fig. 6–34c. Half of the retained seats were observed to have both bolt holes still intact, while the other half had at least one bolt hole ripped out.



Source: NIST.

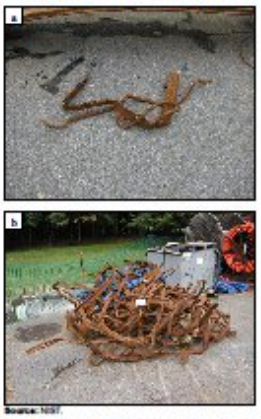
Figure 6–34. Failure modes of core channels. a) Fracture through channel as indicated by arrows, b) failure associated with end connector, and c) seat ripped off at welded connection to channel.

http://pbs.twimg.com/media/DlIfwCbUcAA0bf2.jpg

6.5 PHYSICAL DAMAGE OF FLOOR TRUSS MATERIAL

A damage survey was conducted of the floor truss material to identify and inventory the various failure modes. A full discussion of these results can be found in NIST NCSTAR 1-3C.

Samples received at NIST were either small sections (less than 3 ft to 4 ft in length) of chord and rod material (Fig. 6–35a) or large, entangled masses in the form seen in Fig. 6–35b. According to Structural Engineers Association of New York (SEAoNY) volunteer members involved in the recovery effort, it was necessary to "ball up" any truss pieces of significant size to facilitate removal from the WTC site and subsequent handling in the recovery yards. This was necessary since the primary and bridging trusses for a given floor were welded together into huge grids. During the collapse, these lightweight floor sections were severely damaged and could not be easily removed. Thus, it is unknown when specific damage features occurred. Further, it is likely that sections of multiple trusses were "balled" together and labeled as a single unit rather than that NIST labeled samples consisting of just one pre-fabricated truss unit.



Source: NIST.

Figure 6–35. Examples of recovered floor truss material. a) Small sections of rod and chord (sample C-53) and b) "balled-up" sections of rod and chord (C-137f).

Attempts were made to identify the as-built location of the truss material, but unlike the other major structural elements, identifying marks could not be found on the trusses. Difficulty was also encountered in trying to measure the length of the truss members to determine if they were of the 35 ft or 60 ft variety. It appears that no whole length sections were recovered. A large majority of the compressive resistance welds between the chords and rods were observed to have failed. This was evident from the large amount of chord material recovered without rods attached and vice versa. It is unknown when these failures occurred or what caused them.

6.6 FIRE EXPOSURE OF THE STRUCTURAL ELEMENTS

Examination of the structural steel components for indications of fire damage is important to provide an indication of the location and intensity of the pre-collapse fires in the towers, as well as the effect of the fires on mechanical properties of the structural steel. This portion of the analysis attempts to (1) determine the temperature excursions experienced by the steel components, (2) determine when the excursion occurred (pre- or post-collapse), (3) determine if pre-collapse fires significantly affected the mechanical properties of the structural elements such that the structural integrity (load bearing capabilities) of the component may have been compromised, and (4) provide this information for input/validation of the fire and thermal models of the reconstruction of thermal and tenability environment (NIST NCSTAR 1-5). Analytical techniques used to carry out these tasks involved assessment of the condition of the primer paint, microstructure, chemistry, and hardness of the steel. A full discussion of these results can be found in Chapter 6 of NIST NCSTAR 1-3C.

6.6.1 Visual Inspection of Recovered Structural Components

NIST has developed a novel approach to evaluating the primer paint on the structural components for evidence of exposure to high-temperature excursions (see Appendix D of NIST NCSTAR 1-3C). This method was found to be relatively easy to implement and robust enough to examine an entire component in the field. Calibration tests in the laboratory showed that, although there was little or no change in color, the primer paint used on the WTC steels that reached temperatures over 250 °C cracked (similar to a "mud cracking" pattern) from the difference in thermal expansion between the paint and the steel. Since deformation and environmental effects can also cause mud-cracking, the absence of mud-cracking indicates the steel has not exceeded 250 °C, but the presence of mud cracks cannot be assumed to be caused by high temperature.

Visual inspection for the fire effects on recovered steel was conducted solely on the perimeter panels and core columns, as these were the only structural elements that had known as-built locations. Twenty-one panels were selected with numerous locations on the inner webs, flanges, spandrels, and floor truss connectors for each floor level analyzed, providing that sufficient paint was available for the analysis. Core columns C-80 and 101 from WTC 1 were examined while C-68a and C-81b were tested from WTC 2; these columns resided within the fire floors for their respective buildings. The entire length of each core column was examined, and evaluations of the primer paint were made when sufficient paint was available for inspection.

Over 170 areas associated with the 21 exterior panels were analyzed, and the results may be found in Appendix E of NIST NCSTAR 1-3C. These 21 panels represent only 3 percent of the panels on floors

involved with fire and cannot be considered representative of other columns on these floors. Only three locations showed evidence of paint mud cracking:

1. Panel K-1, WTC 1, column 210, flange and inner web of 98th floor region. Prior to the collapse of WTC 1, the panel was observed to have experienced varying degrees of fire exposure for a minimum of 31 cumulative minutes in this area. A unique feature of this panel is that the upper portion of the column was crushed while generally maintaining concentric axial alignment with the lower portion of the column, Fig. 6–36. This suggests that deformation occurred at the onset of collapse, while the lower portion of the column was still constrained due to the bolted splice (endplates).
2. Panel K-2, WTC 1, column 236, 93rd floor spandrel. This area was observed to have fire exposure for nine cumulative minutes prior to collapse, Fig. 6–13. A positive reading was made directly below the truss seat while above the seat in the same location a negative result was obtained, Fig. 6–37. This suggests that the concrete floor may have shielded the upper portion of the column from the high-temperature exposure experienced by the lower portion.
3. Panel N-8, WTC 1, column 143, seat and standoff plates of the 99th floor. This seat (Fig. 6–38) was exposed to fire for a minimum of 18 cumulative minutes before collapse. Mud cracking was not observed on the spandrel plate to which the seat was welded.

6.6.2 Core Columns Exposed to Fire

Four of the core columns with known as-built locations were examined for mud cracking of the paint. For columns C-68a and C-81b, sufficient paint for analysis was not available. For columns 101 and C-80, five areas of paint were observed (three to five spots per column) with no indication of temperatures over 250 °C. Note that these core columns represent less than 1 percent of the core columns on floors involved with fire and cannot be considered representative of any other core columns.

6.6.3 Metallographic Analysis of Elements Exposed to Fire

Some aspects of the thermo-mechanical history of a structural steel element may be revealed through a careful assessment of the component's microstructure. Identification of phases, whether stable or metastable, and their characteristics (e.g., size, morphology, distribution) can help lead to an understanding of the possible rolling conditions and/or cooling rates used during fabrication. These factors are directly related to the room temperature mechanical properties of the component. Likewise, high-temperature excursions due to fire can also alter the microstructure and the mechanical properties. Therefore, if knowledge of the as-fabricated microstructure is available, then a review of the "affected" microstructure may give an indication of the level of elevated temperature exposure while in service. Thus, an assessment was made to determine if information could be compiled on the extent and effect of fire exposure through changes in the microstructure. When appropriate, chemical analysis and hardness evaluations were used to supplement the results. A full discussion of these results can be found in NIST NCSTAR 1-3C.

Samples for analysis were chosen based upon the panel exposure to pre-collapse fires. These included floor truss connectors (seats) and the lower portion of spandrels where external framing was observed in

the window directly beneath the location of sample removal. The microstructural results were compared with the paint mapping analysis, to confirm the apparent dissonance between the results of the paint mapping study and those from the pre-collapse fire exposure results reported in Sec. 1.2.5.

@MolotoVNKA WTC1 had the antenna. A plane hit it. Then there was a big fire. There were some local collapses and failures, but loads were redistributed, in large part by the hat truss. Eventually the core failed as there was not enough remaining capacity to hold everything up.

@MolotoVNKA Again, reach chapter 5 (specifically 5.6, but it's all good). There's far more source, and a DETAILED description of the time and locations of the observed fire clues.

How did the World Trade Center Towers collapse? A primary problem with 9/11 conspiracy theories is explaining how the smaller top of a building can destroy the much larger bottom of that building. Here's a model I made two years ago to explain this.

@MolotoVNKA More importantly, check out section 5.6 "DEVELOPMENT AND SPREAD OF FIRES IN WTC 7" many pages of detailed analysis of where fire and smoke was seem which floor, what time, how long. Here's a sample. http://pbs.twimg.com/media/DlFN0EbVsAAuSN7.jpg

---

it is possible to identify a dull red glow through these open windows. The smoke patterns visible above these windows indicate that a more intense fire had burned there earlier and had subsequently died down. The floor plan for the 11th floor (Chapter 3) was similar to that for the 12th floor, and interior walls were present on either side of these two windows. Apparently, these walls slowed the fire spread into enclosed spaces on either side.

Over the next several minutes, the fire on the 12th floor broke additional window glass. Between 2:13:04 p.m. and 2:14:09 p.m., windows 12-28A and 12-28B opened at the south edge of the face, and flames were observed through these windows shortly afterward. Figure 5–116 is a frame taken from a video showing the fires on the east face of WTC 7. The exact time when it was shot is unknown, but it was during a 12 min period starting at 2:15 p.m., based on the appearance of the face compared to photographs for which times were accurately determined. Intense flames were coming from multiple windows on the 12th floor. The arrow indicates a large section of window pane that suddenly fell out of the frame for window 12-37. Heavy smoke poured from the window after it opened, but flames were not immediately evident.

Several video clips showing the east face of WTC 7 are available between 2:15 p.m. and 2:29 p.m. The exact times for these clips are not known. In the clip shot immediately after the one shown in Figure 5–116, window 11-32 on the 11th floor had already broken, and the glass in window 11-33 suddenly fell outward. Low intensity flames appeared in window 11-32 shortly afterwards. By the time the next clip started, windows 11-31 and 11-34 were open, and growing flames were visible through windows 11-31 to 11-34. In this clip, heavy smoke appeared, and flames erupted from window 11-34, likely an indication that flashover occurred at that time. Heavy smoke and flames continued to come from these four windows over the next several minutes.

Figure 5–115. Cropped photograph showing fires on the east face of WTC 7 at 2:11:09 p.m. ± 1 s.
The intensity levels have been adjusted, and column and floor numbers have been added.

Figure 5–116. Frame from a video showing a portion of the east face of WTC 7 between 2:15 p.m. and 2:27 p.m.
The intensity levels have been adjusted, and column numbers are indicated. The arrow indicates a large piece of glass falling from window 12-37.

Figure 5–117 is another photograph of the east face, taken at 2:28:43 p.m. On the 12th floor, flames are visible in windows 12-28 to 12-36, with flame extension present from several windows. Heavy smoke was coming from window 12-37 at this time, but flames were not evident. In general, the fire intensity appeared to have declined since the image in Figure 5–116 was recorded. Note that no additional windows had opened on this floor since the time of Figure 5–116. The glass in window 12-38 has a different appearance than other intact windows to the north and appears to be deformed by smoke.

At 2:28:43 p.m., the number of open windows on the 11th floor had increased by one, since window 11-35 was now open. A check showed that the glass was still in place in this window when the last video clip of this face was recorded by the photographer. Interior flames were still visible in windows 11-31 to 11-34, but neither smoke nor flames were evident in open window 11-35. Windows 11-28A and 11-28B at the south edge still had glass in place.

The latest full view of the lower floors on the east face in the Investigation database is shown in Figure 5–118. The time for this image is not known, but it was likely several minutes later than the photograph reproduced in Figure 5–117. On the 12th floor, window 12-37, which was open with a heavy smoke flow at 2:28:43 p.m., now has long extended flames, while window 12-38, which had darkened glass in place at 2:28:43 p.m., is now open with a heavy smoke flow. The glass in the four windows between window 12-38 and the north edge of the face appears to have been intact at this time. On the 11th floor, intense flames are jetting out of window 11-35. In Figure 5–117, this window was open, and interior fire was visible as an orange glow. At the later time, the glass in window 11-36, which was in place at 2:28:43 p.m., has been broken, and an interior fire can be seen through the open window.

The fires observed on the east sides of the 11th and 12th floors slowly spread to the north. The floor diagrams in Chapter 3 indicate that these fires were spreading through a series of enclosed offices located along the face.

Closer inspection of Figure 5–118 reveals that three windows appear to be open on the 13th floor. The glass in window 13-31 is missing, while there appears to be fire visible in windows 13-33 and 13-34. These are the first indications that a fire may be growing on the east side of the 13th floor, in addition to

those evident on the 11th and 12th floors. Since windows 13-28A to 13-30 seem to be intact, it is possible that these fires spread in the interior from fires on the south side of the building or that the window breakage and fire ignitions on the 13th floor were due to heat transfer from flames extending upward from open windows on the 12th floor.

In Figure 5–118, no smoke or fire is evident on floors below the 11th floor. This includes the 5th and 6th floors, where intake and exhaust louvers were located. (See floor diagrams in Chapter 3.) It is possible to see windows along the south edge of the building up to the 22nd floor. There are no indications of open windows between the 14th and 22nd floors.

Figure 5–117. Photograph showing fires on the east face of WTC 7 at 2:28:43 p.m. ± 1 s.
The intensity levels have been adjusted, and column and floor numbers have been added.

Only partial and long distance views of the east face were available after the time when the photograph in Figure 5–118 was taken. While not known definitely, it seems likely that the immediate area around WTC 7 was more securely cordoned off by security personnel starting around 2:30 p.m. due to the growth of large fires on the east face and later on the north face. If so, potential photographers and videographers would have had a more difficult time reaching locations where this face could be observed.

Figure 5–118. Photograph of the east face of WTC 7 taken at some time after 2:28:43 p.m. from near the corner of West Broadway and Barclay Street.
The building to the left is the U.S. Post Office. The intensity levels have been adjusted, and column numbers have been added.

Summary: Fires on or below the 13th Floor, 1:30 p.m. to 2:30 p.m.

The discussion thus far has shown that around 2:30 p.m. in the afternoon, fires were burning toward the north on the east and west faces of WTC 7 and were approaching the north face. On the west side, fire had been observed on the 7th floor, while on the east side, actively spreading fires were present on the 11th and 12th floors, and there were indications that fire had appeared on the 13th floor toward the south side of

the east face. Imagery recorded near the end of this period provided no indication of fire or additional broken windows on the north face.

Fires below the 14th Floor on the North Face, 2:57 p.m. to 3:42 p.m.

There is a substantial time gap in available imagery between the times when Figure 5–113 and Figure 5–118 were taken and the next available image (Figure 5–119) that provides useful information about the fire distribution. The photograph in Figure 5–119 was shot on film, and it was difficult to determine exactly when it was taken. Fortunately, a series of time-stamped digital photographs shot from high on a building to the north on Greenwich Street around the same time provided a view of sunlight and shadows on the roof of the building at 70 Murray Street. (See Figure 5–2.) This roof was also visible in photographs from the same film roll shot prior to and after the image reproduced in Figure 5–119. Using changes in these light and shadow patterns, it was possible to determine that the photograph was taken around 2:57 p.m. The uncertainty in this time is estimated as ± 5 min.

The photograph in Figure 5–119 provides a great deal of detail. For instance, it is possible to discern the open windows 8-42A and 8-47B. During the time from roughly 2:30 p.m. to 3:00 p.m. fires had moved to the north face of WTC 7 on both the 7th and 12th floors. The fire on the 12th floor seemed to be just beginning to grow. There is one area of relatively intense orange flame visible through open window 12-45C, and smaller, more reddish flames are visible in windows 12-44C, 12-44D, and 12-45A.

Fire on the north side of the 12th floor first appeared at locations well removed from the eastern edge. Fires had been observed earlier spreading along the east side of the building. The floor diagram in Chapter 3 indicates that there were a series of small offices on the north face that opened onto a corridor that ran from the east side to the west side. The fact that the fires appeared in offices located about 1/3 of the way across from the east edge suggests that the fire took an internal pathway, perhaps along this corridor, to reach these offices.

The fires spreading on the 7th floor displayed a different behavior than those on the 12th floor. By the time Figure 5–119 was taken, this fire had spread over at least 18 windows running from windows 7-50B to 7-54C. All of these windows appeared to be open, with the possible exception of window 7-51A, which was adjacent to Column 51. Note that windows to the west of 7-54C are hidden from view by the building at 123 Barclay Street, and it is not possible to determine where these fires first reached the north side. Several small spot fires are visible through the open windows. The most intense burning area was at windows 7-50C and 7-50D.

A much closer view of the windows near Column 51 on the 7th floor is shown in Figure 5–120. This image is taken from a video clip that was recorded shortly after the photograph in Figure 5–119. The fire visible through window 7-50B had grown somewhat. The flames in this area appear to fill the volume.

Consistent with this, the apparent low fire intensities suggest that the fuel load or burning rate was insufficient to induce flashover in this large space.

Figure 5–119. Photograph showing the north face of WTC 7 taken from a helicopter around 2:57 p.m. ± 5 min.
The intensities have been adjusted, and column and floor numbers have been added.

Only very light smoke can be seen coming from the open windows on the 7th and 12th floors. Even though the fires were relatively small, they would be expected to release much more smoke than was observed. It is likely that this smoke was being varied elsewhere from the building, perhaps at locations on the east or south faces. This would be the expected behavior if internal flow pathways were available to these faces due to the positive pressure created at the open windows on the north side by the ambient wind flowing over this face and the corresponding low pressure areas created on the leeward faces.

Figure 5–121 shows another aerial view of the north face taken several minutes after Figure 5–119. The time for this photograph was estimated to be 3:05 p.m. ± 5 min in the same way as for Figure 5–119. During the approximately 8 min between the two images, the fire distributions on the 7th and 12th floors

http://pbs.twimg.com/media/DlFNtZ8U0AAxMBI.jpg

this close up it is easy to identify Column 14 through window 23-13B on the 23rd floor and Column 14A through windows 21-14 and 21-14A on the 21st floor.

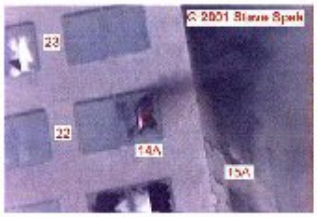

Figure 5–109. Frame from a video clip showing the southwest corner of WTC 7 around the 22nd floor.
The clip was recorded from West Street near its corner with Vesey Street between 12:10 p.m. and 12:25 p.m. Intensity levels have been adjusted, and floor and window numbers have been added.

Figure 5–110. Cropped photograph showing a portion of the west face of WTC 7 near the south edge at 12:27:30 p.m. ± 1 s from near the corner of Vesey and West Streets.
The Verizon Building is in the foreground. The intensity levels were adjusted, and floor numbers have been added.

A larger area of the west face near the south edge is visible in the photograph shown in Figure 5–110, which was taken shortly after Figure 5–109 at 12:27:30 p.m. At this time flames were not evident in window 22-14A, but light smoke continued to flow from the window. Higher up on the face, smoke was coming from the six adjacent open windows 29-11 to 29-14A on the 29th floor, with heavy flames filling windows 29-11 and 29-12. As discussed in Section 5.5.2, the condition of windows 29-13A to 29-14A immediately following the collapse of WTC 1 could not be determined, while the glass was intact in windows 29-11 and 29-12. This suggests that the fire burning on this floor had opened windows 29-11 and 29-12 by 12:27:30 p.m.

Heavy smoke was also coming from open windows 30-13A to 30-14A on the 30th floor at this time. This suggests that a fire was also burning on this floor, but flames are not apparent in Figure 5–110. In a long distance view from the same short video clip from which Figure 5–109 was taken, these windows appeared to be intact. This indicates that the fire burning on this floor broke the glass from these windows during the short time period between the times when Figure 5–109 and Figure 5–110 were taken.

The appearance of the smoke on the south side of WTC 7 in Figure 5–110 demonstrates a difficulty that plagued attempts to use smoke to provide qualitative information about fire behavior. There appears to be relatively light-colored smoke on the south face at all of the floors visible in the image, while much denser and darker, rapidly rising smoke appeared to be flowing from windows near the west edge of the 30th floor. Due to the wind direction, it was common for smoke to "bank up" against the south face. For this reason, it was usually not possible to differentiate different types of smoke or to identify smoke source locations on the south face. Viewing difficulties resulting from the large amount of smoke on the south face were discussed earlier.

Figure 5–111 shows another view of the fires at the southwest corner on the 29th and 30th floors taken within a few minutes of Figure 5–110. At this time flames were visible on both floors. The appearance of the fires on the 29th floor is similar in both images. However, unlike in Figure 5–110, intense flames are visible on the 30th floor. Flames are apparent in windows 30-14, 30-14A, 30-15, and 30-16A to 30-16C. In the video it is clear that flames were coming from multiple windows on the south face. This is an indication that a fully developed flashed over fire was present in the corner of this floor at this time.

Figure 5–111. Frame from a video clip showing fires near the southwest corner of WTC 7 on the 29th and 30th floors around 12:28 a.m. ± 3 min.
The clip was recorded from West Street near its corner with Vesey Street. Intensity levels have been adjusted, and floor numbers have been added.

Photographs show that by 12:47 p.m., flames were no longer evident inside any of the open windows on the 29th or 30th floors, and the fires had apparently not progressed further north on the west face, since no additional windows had been broken out. Taken together, these observations suggest that intense fires which grew in the southwest corners of these floors starting around noon had died down by 12:45 a.m. after burning intensely for a short period of time.

Photographs taken around 12:47 showed that the smaller fire seen earlier in window 22-14A had also died down, as can be seen in Figure 5–66. This fire had not grown sufficiently large to break additional windows along the west face. Interestingly, in a video clip shot just before 1:30 p.m. smoke is visible flowing from window 22-14. Apparently, a dormant fire had eventually grown large enough to break the glass in this window. Figure 5–67 shows a view of the west face taken from above much later, between 2:30 p.m. and 3:00 p.m. It appears that the four windows, 22-13A to 22-14A, near the south edge were open at that time. Apparently, the fire on this floor spread very slowly to the north before dying out. Distinct smoke marks are visible above windows 19-14 and 19-14A in Figure 5–66, which was taken at 12:47:40, indicating that a fire had been present in the southwest corner of this floor prior to this time.

There are no images showing flames or other evidence of active fires above the 14th floor after about 1:00 p.m. No images showing flames on the south face or near the south edge of the west face of any floor of WTC 7 are available at times after 1:30 p.m.

Fires on or below the 13th Floor prior to 1:30 p.m.

There are no photographs or videos of any fires on the lower floors of WTC 7 before 1:30 p.m., although a witness saw a fire on the southwest corner of the 7th floor at about 12:15 p.m., before being rescued (Chapter 6). In the videos and photographs of WTC 7 taken from West Street between 12:00 p.m. and 1:30 p.m., smoke can often be seen flowing along the outer walls of lower floors of the west face at the south edge. Since the wind was blowing from the north and the visual evidence indicates no substantial fires were burning on or near Washington Street, this suggests that fires were burning on lower floors of the west face during this time, but it was not possible to identify windows where the smoke originated.

Fires on or below the 13th Floor on the West Face, 1:30 p.m. to 2:30 p.m.

Images showing the initial spread of fire across floors on the west side of WTC 7 are very limited. Figure 5–112 shows a view of the west face taken in the early afternoon. Based on shadows apparent on the face the time is estimated to be between 1:30 p.m. and 2:30 p.m. This photograph should be compared with Figure 5–88, which shows the same area of the face at an earlier time.

In Figure 5–112 smoke is visible coming from open windows 7-5 and 7-7 on the 7th floor, and windows 7-6 and 7-8 appear to be open as well. In the earlier photograph, no smoke was evident coming from windows on this floor, and glass was in place in each of the open windows mentioned above. Light smoke is also visible coming from the louvers in window 7-2 in Figure 5–112. The glass in windows 7-1A, 7-1B, 7-3 and 7-4 was still intact when the photograph was taken. The presence of smoke and additional broken windows indicates that a fire had progressed toward the north edge of the west face on the 7th floor by the time the photograph in Figure 5–112 was taken. Even though a fire was present that was capable of breaking out window glass, no flames are visible. It is possible that flames were present

earlier and had died away or that the prevailing wind on the face pushed the flames into the building and that the smoke and possibly flames exited primarily through openings on the south face.

Smoke is also visible coming from open windows at a few other locations on the west face in Figure 5–112. Relatively heavy smoke appears to be coming from an open window on the 8th floor near the southwest

Figure 5–112. Cropped photograph shot from near the corner of Washington and Barclay Streets shows lower floors on the west side of WTC 7 between 1:30 p.m. and 2:30 p.m. The intensity levels have been adjusted, and floor numbers have been added.

corner. This window was likely 8-10 or 8-11. Smoke is also coming from a window on the 12th floor near the same corner. There does not appear to be significant smoke flow from other open windows at this time.

Figure 5–113 shows a portion of the aerial photograph in Figure 5–64, enlarged to emphasize the areas on lower floors near the northwest corner of WTC 7. This image was estimated to have been taken between 2:15 p.m. and 2:45 p.m. by relating it to other photographs taken earlier that show fires on the east side of WTC 7 and the south side of WTC 5 and by using shadows at various locations around the site.

Figure 5–113. Enlargement of a portion of the photograph shown in Figure 5–64 emphasizing areas on the lower floors of WTC 7 near the northwest corner.
The time is estimated as being between 2:15 p.m. and 2:45 p.m. The roof line of the building in the lower left hand corner is 123 Barclay Street.

Heavy smoke is visible passing over the west face, starting at a point close to the north edge of the building. This smoke appears to be coming from windows on the 7th or 8th floor. It likely was coming from windows on the 7th floor, since fire appeared on the north side of this floor shortly after Figure 5–113 was taken, and there were indications of earlier burning to the south of this location on this floor. Note that there were no visual signs of fire or broken windows on the north face at that time.

Chapter 3 reports that the area between the west face and the core on the 7th floor was not partitioned and

earliest photograph in the database with fire on the east face. It was taken at 2:08:28 p.m. Flames are present on the 12th floor, and windows appear to be open on the 11th floor. Due to the steep angle, it is difficult to identify exactly in which windows the fires were located.

Figure 5–115 shows a less oblique view of the fires on the east face taken at 2:11:09 p.m. An intense fire with external flaming covers windows 12-29 to 12-34 on the 12th floor. Videos taken from the same location indicated that these fires grew substantially in the roughly 2½ min period between Figure 5–114 and Figure 5–115. Windows 12-35 and 12-36 are open, but no flames are apparent. The remaining windows, including 12-27A and 12-27B at the south end of the floor, still have glass in place.

The heavy smoke coming from the windows on the 12th floor rose rapidly and was pulled toward the north. This movement was due to the wind flow over the north face of the building, which created a low pressure region near the northeast corner.

The floor plan for the 12th floor (Chapter 3) indicates that this area was divided into a number of walled offices, including one in the southeast corner with partitioned walls between Columns 27 and 28 and near Column 29. It is likely that these office walls slowed fire spread into the southeast corner. The floor plan suggests that fire may have spread onto the east face from the south by moving along a corridor.

Figure 5–114. Oblique view of the east face of WTC 7, taken at 2:08:28 p.m. ± 1 s from West Broadway near its corner with Park Place.
Floor numbers have been added.

http://pbs.twimg.com/media/DlFNqGsUwAA1tL3.jpg

Figure 5–120. Frame taken from a video clip shot looking down on WTC 7 from a building to the northwest showing the fires along a length of the north side of the 7th floor of WTC 7.
The video clip was recorded shortly after the photograph in Figure 5–119 was taken. The intensities have been adjusted and window numbers added.

A closer view of the fires burning on the 12th floor around this time is shown in Figure 5–122. The flames appear to fill the space over the several windows that are visible. Some details are evident inside the building. There appears to be a large file cabinet visible against a wall through window 12-45B. Flames are visible behind window 12-45E, but only a small section of glass seems to have broken out.

Reference to the floor plan in Chapter 3 indicates that the fires on the 12th floor extended over at least four different offices at this time. The fires appeared to be fully developed, completely filling the open windows, suggesting that they were flashed over. Even so, relatively little smoke and flames were coming from the open windows. This behavior can be contrasted with the large flame extensions observed earlier from open windows on the east face of this floor. As discussed above, these differences are likely due to the ambient wind field.

An aerial view of the north face of WTC 7 taken from a much longer distance than Figure 5–119 and Figure 5–121 is shown in Figure 5–123. The time of this photograph was estimated in the same way as the earlier aerial shots as 3:10 p.m. with a ± 5 min uncertainty. Flames were only visible on the 12th floor from this distance and angle. The fire had spread to the east and west in the roughly 5 min period following the photograph in Figure 5–121. The flames had spread all the way to the east face.

Figure 5–121. Cropped photograph of the north face of WTC 7, taken from a helicopter around 3:05 p.m. ± 5 min.
The image was rotated 6° counterclockwise and the intensities were adjusted. Column and floor numbers have been added.

Figure 5–122. Frame taken from a video clip shot looking down on WTC 7 from a building to the northwest shows the fires along a length of the north side of the 12th floor of WTC 7.
The video clip was recorded around the same time as the photograph in Figure 5–121 was taken. The intensities have been modified and window identification added.

Figure 5–123. Enlarged section of a long distance aerial shot of the north face of WTC 7 taken around 3:10 p.m. ± 5 min.
The contrast has been enhanced and the intensity levels adjusted. Floor numbers have been added.

Flames were also visible from at least the two windows on the east face adjacent to the northeast corner, indicating that the flames had engulfed the small unburned island in this corner of the floor. On the west side the flames had moved beyond Column 46. This was the first substantial apparent fire spread in this direction since fire first appeared on the face shortly before 3:00 p.m. (See Figure 5–119.)

The fires on the north side of the 12th floor were extensive, covering a length running approximately from window 12-41A to 12-46C, and intense. Close inspection of Figure 5–123 shows that the fire in the vicinity of windows 12-44C to 12-44E had begun to die down. This area is close to where the fires first appeared just before 3:00 p.m., indicating that, for this location, the period of intense burning lasted for roughly 15 min.

Figure 5–124 provides a view of the north face of WTC 7 taken from the northwest at 3:10:46 p.m. It shows an example of the shadow and sunlight distributions on the roof of the building at 70 Murray Street (the stepped white building at the lower left of the photograph) used for timing the aerial photographs described earlier. Flames are visible on the 7th and 12th floors of the north face of WTC 7. Light smoke or dust is visible on the north side of the building. Heavy smoke is also visible rising from the east face, indicating that fires were burning near by or that the effluent from more distant fires was being vented through the face.

A much closer view of the fires visible on the north face in Figure 5–124 is provided by the photograph reproduced in Figure 5–125, which was taken within a few minutes of Figure 5–124. The north face is partially obscured by smoke or dust, but it is possible to make out fires in individual windows on the 7th and 12th floors. Columns are visible inside the windows, and these have been identified on the image. On the 7th floor, windows are open, and flames are visible from windows 7-47B to 7-49C. In Figure 5–121, which was taken at roughly 3:05 p.m., fires on this floor had reached only as far east as window 7-49A. Longer distance photographs indicate that the extended area of intense fire to the east of Column 49 became visible between 3:09:42 p.m. and 3:10:46 p.m. Clearly, fire was continuing to spread toward the east on the 7th floor at this time.

Figure 5–124. Cropped photograph of the north face of WTC 7 taken from a building located to the northwest looking down Greenwich Street at 3:10:46 p.m. ± 3 s.
The intensities were adjusted.

On the 12th floor, intense flames are visible in Figure 5–125 as far west as window 12-47C, indicating that this image was taken shortly after the photograph shown in Figure 5–123, in which flames were not yet evident to the west of Column 47. The flames completely fill the open windows, suggesting that flashover had taken place within the offices at these locations. As noted earlier, very little smoke or flames are coming from the open windows on this floor, again suggesting that the smoke was venting elsewhere from the building due to the ambient wind direction.

Another close up view of the north face taken from a building to the northwest between 3:11:15 p.m. and 3:16:51 p.m. is shown in Figure 5–126. The fires on the 12th floor are visible, but the image did not extend low enough to show the 7th floor. During the short period between when the images in Figure 5–125 and Figure 5–126 were taken, the fires on the 12th floor broke windows 12-48A to 12-48D, and heavy flames appeared. This indicates that the fires on this floor were continuing to spread toward the west.

A close-up ground shot of the north face of WTC 7 taken from near the corner of Greenwich and Murray Streets is shown in Figure 5–127. Even though the photograph was digital, its timestamp information had been lost by the time the image was provided to the Investigation. The assigned time of 3:12:50 p.m. ± 5 min is based on known times for other photographs from the same camera taken shortly before and afterward. Comparison of Figure 5–127 with Figure 5–126 indicates that Figure 5–127 was taken shortly before Figure 5–126, since windows 12-47D and 12-48A were open in Figure 5–126 and glass was still in place in Figure 5–127. In both figures, windows 12-48B to 12-48D are open, but a larger section of glass was missing from window 12-48D in the later photograph.

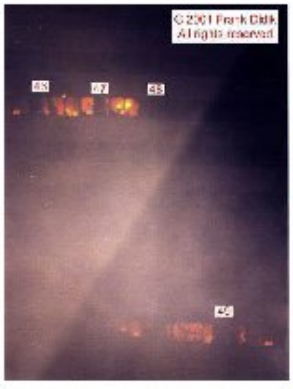

Figure 5–125. Cropped close-up photograph of the north face of WTC 7 taken within a few minutes of the image in Figure 5–124.
Fires are visible on the 7th and 12th floors. Column numbers are indicated, and the intensity levels were adjusted.

Figure 5–126. Cropped close-up photograph of the north face of WTC 7 taken between 3:11:15 p.m. and

In Figure 5–127, the fires observed earlier on the 12th floor between Columns 44 and 46 have died down substantially. Only small flames are visible near windows 12-44B and 12-45E. On the other hand, the flames further to the west are more intense at this time and appear to fill the open windows, indicating that flashover had occurred. As observed earlier, very little smoke and flame are coming from the open windows, likely indicating that the effluent is being vented elsewhere.

http://pbs.twimg.com/media/DlFNv_IUUAAprke.jpg

Figure 5–127 provides a good view of the fires on the 7th floor around 3:13 p.m. As noted previously, these fires appear to be less intense than those observed on the 12th floor. There are indications of low intensity flames through windows between Columns 50 and 51. Further west, the fire appears to have gone out. The most visible flames extend from windows 7-47B to 7-49B. Window 7-47A appears to be broken, while the glass in windows 7-49C and 7-49D appears to be intact. Comparison with Figure 5–125 indicates that, during the few minutes between the two photographs, the fires on the 7th floor had died down somewhat, while not spreading further to the east.

No flames or newly opened windows were present on other floors at this time on the visible portion of the north face. In Figure 5–127 there appears to be light smoke or dust rising from near the ground. There is no evidence to indicate whether this was coming from WTC 7 or from locations outside the building. Several FDNY and NYPD uniformed personnel are visible in Figure 5–127 near Murray Street. Their presence is consistent with the suggestion that the area around WTC 7 had been cordoned off somewhat earlier.

A long distance view of the north face of WTC 7, similar to Figure 5–124, that was shot at 3:22:00 p.m. shows that the fires visible on the 7th and 12th floors about 30 min earlier had died down somewhat and had not spread noticeably. No fires were visible elsewhere on the face.

An overhead view of the north face looking down Greenwich Street from a building to the northwest is shown in Figure 5–128. It was taken around 3:42:30 p.m. ± 2 min. Fires are visible on the 8th floor between Columns 47 and 52, with the most intense burning toward the east, on the 12th floor between Columns 50 and 52, and on the 13th floor between Columns 44 and 46, with intense burning visible between Columns 44 and 45. The greatest length of fire is on the 8th floor. An earlier frame from the same video shows fire present on this floor at least one minute earlier. This was the earliest observation of a fire present on the 8th floor.

A view of the north face of WTC 7 shot from Greenwich Street is shown in Figure 5–129. Fires are visible on the lower part of WTC 7. This area is enlarged in Figure 5–130. Even though the image is grainy, it provides useful information about the fire distribution at this time. Comparison of the fire distribution with that visible in Figure 5–128 suggests that this photograph was taken just prior to the time when the video frame was recorded. The time of this photograph is estimated to be 3:41:00 p.m., with an uncertainty of 3 min. Flames cover at least a length from windows 8-47C to 8-53D, even though it appears that the glass in these windows had not yet broken. There could be fires further to the west, but these windows are hidden by the building in the foreground. The large extent of the fire suggests that flames must have appeared in this area earlier since some time would be required for the fire to spread, but no indication of fire on this floor was apparent in a photograph taken from the northwest at 3:22:00 p.m., suggesting that fire spread rapidly on this floor. Where visible, the flames on the 8th floor appear to fill the windows, providing an indication that the fires in the area were flashed over. As observed previously on the north face, relatively little smoke and flames were coming from open windows, suggesting that the fires were likely vented on the south and/or east faces.

Flames are also visible through open windows on the 12th floor. At around 3:14 p.m., fires on this floor were observed as far west as window 12-48D, and the distribution was little changed roughly 5 min later. In Figure 5–130, fire had spread at least as far west as window 12-53C during the roughly 20 min between close up images. At the later time, flames are only visible as far east as window 12-48D, indicating that the fires visible earlier had mostly died down. The flames visible on the 12th floor around

3:41 p.m. seem to fill the open windows, suggesting flashover conditions, but several windows still appear to have glass in place. This may be an indication that the fire on the north face was not spreading systematically to the west, but at times jumped over adjacent offices which then ignited somewhat later.

Close inspection shows that a dull red glow is visible in windows 13-45C to 13-45E on the 13th floor. These windows can just be seen at the side of the building at 30 West Broadway, which hides windows further to the east. This image provides the earliest visual evidence that fires on the 13th floor, which were identified much earlier on the east face, had spread to the north side of WTC 7. Based on Figure 5–128, it is likely that fire was present to the east between Columns 44 and 45 at this time.

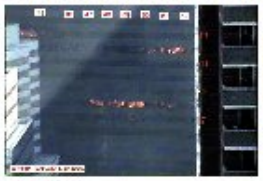

Figure 5–128. This frame from a video shot from a building to the northwest of WTC 7 was taken around 3:42:30 p.m. with an uncertainty of ± 2 min.
The intensities have been adjusted and column and floor numbers added.

Figure 5–129. Photograph showing the north face of WTC 7 shot looking down Greenwich Street from near the corner of Greenwich and Warren Streets at around 3:41 p.m.
The estimated time uncertainty is ± 3 min.

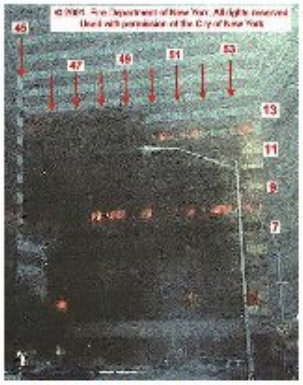

Figure 5–130. View of the north face of WTC 7 taken around 3:41 p.m. ± 3 min, enlarged from Figure 5–129.
The intensities have been adjusted, and column and floor numbers have been added.

While difficult to discern in Figure 5–130, a number of windows are open on the 7th floor. Most, if not all, of the windows between window 7-47A and 7-53D are open. There is no indication of fire on the floor in this photograph. Apparently, fire present in this area around 3:13 p.m. had stopped spreading and had died down by 3:41 p.m.

There are no indications of fires on other floors in this time interval, between 2:57 p.m. and 3:42 p.m. With the exception of Figure 5–123, which indicates that fire was present on the north edge of the east face around 3:10 p.m., there are no images available during this time period that show the fire distributions on the east, west, or south face of WTC 7.

Fires below the 14th Floor, 3:47 p.m. to 4:40 p.m.

Figure 5–131 shows a view of the central region of the north face taken from the video shot from a building to the northwest of the site looking down Greenwich Street at a time estimated as 3:50:13 p.m. with an uncertainty of ± 3 min. During the approximate 7 min 45 s period between the time when Figure 5–128 and Figure 5–131 were taken, the fire on the 8th floor had spread towards the east and was burning vigorously between Columns 46 and 47 at the later time. Windows on this floor around Column

50 also appear to have opened. On the 12th floor additional windows around Column 51 have opened, and fire has appeared in window 12-52A. On the 13th floor the fire between Columns 44 and 45 has become less intense at the same time that the fire to the west of Column 45 appears more intense.

Around the time when the photograph in Figure 5–130 was taken, a news crew managed to reach Barclay Street by way of the building at 123 Barclay Street and filmed the fires in WTC 7 from several vantage points. This video was not time stamped, so it proved difficult to obtain accurate times for all of the clips. However, as discussed below, by comparison with other images taken at relatively well known times, it was possible to estimate times for this video.

Even though 123 Barclay Street was a full block north of the south face of WTC 7 and was nearly completely shielded from the WTC site by WTC 7 and the Verizon Building (see Figure 5–2), all of the windows in the main lobby facing Barclay Street were broken, and the lobby was covered by a thick layer of dust. This observation provides another example of the potential of the dust clouds created by the collapse of the towers to break windows and distribute material. There was no indication that fires ignited in the lobby. Initial views of WTC 7 shot by this news crew were taken through the broken windows in the lobby. Figure 5–132 shows a view of the northwest corner of WTC 7 taken from a video clip shot through the open windows. The time assigned for this video clip is estimated relative to that for Figure 5–134 provided below. Figure 5–132 reveals a great deal about the recent fire behavior. Consider the west face. Flames are visible coming from window 8-6 on the 8th floor, and heavy smoke is flowing from multiple windows starting at the northwest corner and extending at least as far south as window 8-8. Several video clips were shot from near the same location as Figure 5–132. A frame from one of the clips recorded slightly earlier showing a much closer view of the west face is reproduced in Figure 5–133. In this image, flames are visible in windows 8-3 to 8-5, with heavy flames coming from window 8-3. In a longer distance view from the same clip, flames can also be seen coming from windows 8-1A, 8-1B, and 8-2.

Taken together, these video clips indicate that an intense fire spanning at least half the west side of the 8th floor was burning at this time. Conversely, even though there was heavy blackening of the façade above open windows 7-1A, 7-1B, 7-3, and 7-4 visible in the clips, indicating the earlier presence of a fire, no

Figure 5–131. This frame from a video shot from a building to the northwest of WTC 7 was taken around 3:50:13 p.m. with an uncertainty of ± 3 min.
The intensities have been adjusted and column and floor numbers added.

Figure 5–132. View of the northwest corner of WTC 7 from a video recorded from inside the lobby of 123 Barclay Street around 3:42 p.m. ± 5 min.
The intensities have been adjusted, and column and floor numbers have been added.

Figure 5–133. View of the west face of WTC 7 taken from a video recorded from inside the lobby of 123

fire was visible, and no smoke was coming from these windows at this time. Recall that window 7-5 was already open by the time Figure 5–112 was taken between 2:15 p.m. and 2:30 p.m. A part of the blackened façade above these windows can be seen in Figure 5–133, where it is also apparent that the louver in window 7-2 is still in place. Apparently, the smoke flow from the louvered window was less than from the nearby open windows, since the façade is less deformed immediately above.

The presence of an earlier fire on the 7th floor that released substantial smoke near the northwest corner is consistent with the smoke seen in the area in Figure 5–113 (see associated discussion), which was estimated to have been taken between 2:15 p.m. and 2:45 p.m. The observation of heavy burning on the 8th floor much later supports the conclusion that the earlier smoke was coming from the 7th floor. The fact that heavy smoke flowed from windows 7-1A to 7-4 suggests that when this area burned, there was no direct pathway to openings on the south or west walls, since the fire would have vented there, as observed elsewhere. This hypothesis is not supported by the floor diagram shown in Chapter 3, which indicates that windows 7-1A to 7-4 were open to the same common area as windows further south. The same conclusion concerning pathways to the south or east face applies for the 8th floor, since heavy smoke and flames were coming from the open windows on the west face.

On the north face, every window on the 7th and 8th floors to the west of Column 51, with the exception of window 8-56A, was open at the time Figure 5–132 was taken. This is the first visual evidence that fires had burned on these floors between Column 54 and the west edge of the face. The only locations where flames can be seen are near Column 51 on the 8th floor. Other clips shot around the same time show fire in windows 8-57B and 8-57C. In Figure 5–130, intense burning was present between Columns 51 and 54. The fact that these fires had died down by the time of the later video clip indicates that many minutes separate the images in Figure 5–130 and Figure 5–132. This is consistent with the assigned times.

The open windows and fire distributions on the 7th and 8th floors provide clues concerning fire movement.

- On the 7th floor, the evidence indicates that an earlier fire spread up the western edge of the building. Later fires were observed near the center of the north face moving toward the east. The fact that fires had burned earlier on the west side suggests that the fire moving along the west side of the building turned at the northwest corner and began to spread toward the east.
- A different movement is implied by the observations on the 8th floor. A rapidly developing intense fire was first observed near the center of the north face. By the time the western side of the north face was observed, fires in this area had already died down, but intense burning was

@MolotoVNKA Did you notice that there were raging fires?

2018-08-20T22:58:05+00:00

https://twitter.com/_/status/1031676773908377600

@MolotoVNKA Read chapter 9 of NCSTAR 1-9 to see how they calculated the fire spread and temperatures. It's quite detailed, and based on extensive observations.

http://pbs.twimg.com/media/DlFAejSUYAAZpAC.jpg

Chapter 9
FIRE SIMULATIONS

9.1 OVERVIEW

9.1.1 Approach

The major fires in WTC 7 were simulated using the Fire Dynamics Simulator, version 4 (McGrattan 2004), the same software that NIST used to simulate the fires in the World Trade Center towers (NIST NCSTAR 1-5F). These simulations were part of a sequence of estimates that included the debris damage from WTC 1, the subsequent fires, the heating of the structural elements, the structural response, and the eventual collapse. Temperature predictions from the fire model were passed to the structural model via the Fire Structure Interface, again using the same process as in the reconstruction of the collapse of the World Trade Center towers (NIST NCSTAR 1-5G).

As described in Chapter 5, sustained and/or late fires were observed on Floors 7 through 9 and 11 through 13 of WTC 7. There was a single observation of a late, small fire on Floor 14. In addition, there might have been concealed fires in the mechanical spaces on Floors 5 and 6. No fire was observed on the 10th floor. The fires on the upper floors (19, 22, 29, and 30) died out well before the collapse of WTC 7.

The fire simulations for WTC 7 were conducted for each floor individually. Section 5.6 showed that there were no externally visible observations of flames passing from one floor to another, aside from what might have remained hidden in the debris-damaged area in the southwest of the building. The only floor-to-floor connection within the tenant spaces was a flight of convenience stairs connecting the 11th and 12th floors. It was located near the southwest corner of the building, near the multi-floor debris damage zone, and essentially acted as an enlargement of the debris damage zone. The stairs were thus not included in the FDS simulations. The analysis described in Section 9.1.2 found that any late developing floor breaches would not have had a major effect on the structural heating.

It would have been difficult to observe fires on the 5th and 6th floors, due to the partitions just behind the various windows or louvers (Chapter 3). Thus, the Investigation Team simulated a variety of fire scenarios and examined the outcome of each to determine whether it would have produced a visible telltale or whether it would have been severe enough to weaken any structural elements on those floors.

The actual fires on Floors 7 through 9 and 11 through 13 were likely initiated when WTC 1 collapsed (Section 5.6). However, there was limited photographic evidence or on-site personal observation upon which to base simulation of the early development of these fires. While use was made of the appearance of flames and window breakage in photographs and videos in formulating the simulations, the Investigation Team realized that the absolute timing of the simulations might not align exactly with the timing of the fires on September 11, 2001.

Using a timeline reconstructed from the limited photographic evidence and eyewitness testimony, fire simulations were conducted for Floors 7 and 8. For the simulations, the fires on these two floors were assumed to have initiated at a time designated as noon. There was no evidence of visible fire growth on

https://twitter.com/_/status/1031634935650500609

@MolotoVNKA But 7 seconds in, column 79 buckles, because it now has no support from the sides. This makes it a lot weaker, so it can't support itself + the floors + the roof + the penthouse, so it buckles. http://pbs.twimg.com/media/DlEaQWwVsAUi5En.jpg

https://twitter.com/_/status/1031634194345078785

@MolotoVNKA All the columns go all the way up and are on every floor (above the bottom 8 or so). They are not like individual columns per floor. The columns are the main structure of the building, the floors are attached the the columns, and give them sideways support.

http://pbs.twimg.com/media/DkwjrxKUcAA9Ajd.jpg

CONCLUSIONS

We began this article by noting that extreme anti-Israel sentiment has been interpreted by some as anti-Semitic in effect if not intent. It is therefore important to consider the competing motivations behind such sentiment. There are certainly critics of Israel on specific policy grounds, but there are also anti-Semitic individuals for whom attacks on Israel are manifestations of prejudice. Given this mix, what is one to think when presented with accusations such as "Israel is just like apartheid South Africa," "Israel is responsible for the violence in the Middle East," or "Israel deliberately targets Palestinian civilians"?

Our research directly addresses this issue. From a large survey of 5,000 citizens of ten European countries, we showed that the prevalence of those harboring (self-reported) anti-Semitic views consistently increases with respondents' degree of anti-Israel sentiment (see Figures 2 and 3 and Table 3), even after controlling for other factors. It is noteworthy that fewer than one-quarter of those with anti-Israel index scores of only 1 or 2 harbor anti-Semitic views (as defined by anti-Semitic index scores exceeding 5), which supports the contention that one certainly can be critical of Israeli policies without being anti-Semitic. However, among those with the most extreme anti-Israel sentiments in our survey (anti-Israel index scores of 4), 56 percent report anti-Semitic leanings. Based on this analysis, when an individual's criticism of Israel becomes sufficiently severe, it does become reasonable to ask whether such criticism is a mask for underlying anti-Semitism.

https://twitter.com/_/status/1568048611170320386

@its_only_Gaz I think the opinion of the person in charge of the Air Force is what is relevant here. But you are somehow making this about me.

2022-09-09T01:23:43+00:00

https://twitter.com/_/status/1568047466641240064

@likeitmatters3 And pretty much what the Navy spokespersons have been saying about their investigations. It covers stuff (sensors) they don't want to talk about. So they won't talk about it.

Gradisher in 2019: http://pbs.twimg.com/media/FcLSsBvacAAxh-x.jpg

---

> “Military aviation safety organizations always retain reporting of hazards to aviation as privileged information in order to preserve the free and honest prioritization and discussion of safety among aircrew,” Gradisher said. “Furthermore, any report generated as a result of these investigations will, by necessity, include classified information on military operations. Therefore, no release of information to the general public is expected.”

http://pbs.twimg.com/media/FcLSsBvacAAxh-x.jpg

2022-09-09T01:19:08+00:00

https://twitter.com/_/status/1568046311198556160

@HaydenCalnin Head of the Air Force said that.

2022-09-09T01:17:49+00:00

https://twitter.com/_/status/1568045979710148609

@keithkloor @MiddleOfMayhem @nickpopemod Well, the DoD don't specify *how much* national security was damaged. Just that they don't want it damaged further.

It's not like "damage to national security" is a binary thing.

Nor do they assign blame for the (possible, implied) initial damage.

2022-09-09T01:13:36+00:00

https://twitter.com/_/status/1568044920623222785

@its_only_Gaz I'm sure he'd be worried about it if there was good evidence it was happening.

2022-09-09T01:12:20+00:00

https://twitter.com/_/status/1568044602296512514

@ufotua1 @MiddleOfMayhem He's not saying that UAP are from China.

He's saying he's not worried that much about UAP, because he's got real threats to worry about, specifically China.

2022-09-09T01:11:02+00:00

https://twitter.com/_/status/1568044275103059968

https://twitter.com/_/status/1567941880708734978
@tgflynn314 There really are not a lot of ATFLIR videos out there. The two videos "Gimbal" and "GoFast" are BY FAR the highest quality and most information-dense ATFLIR videos in the public sphere. There's nothing even close.

Try to post a better ATFLIR video than Gimbal.

2022-09-08T18:05:28+00:00
https://twitter.com/_/status/1567937176922640385
@dutchess_boxer "not supposed to be released" does not necessarily mean "a federal crime."

2022-09-08T17:53:55+00:00
https://twitter.com/_/status/1567934270035066880
An implication here is that Gimbal, GoFast, and FLIR1 were not supposed to be released and that releasing them potentially harmed national security - maybe by demonstrating the limits of the ATFLIR system?

Probably not a huge deal, but "better safe than sorry" is understandable.

2022-09-08T17:51:04+00:00
https://twitter.com/_/status/1567933551575986176
It seems unlikely we will get any good US Military UFO videos

But I don't think this is because they show non-human craft zipping around - but rather that the videos
"may provide adversaries valuable information regarding [DoD] operations, vulnerabilities, and/or capabilities." https://twitter.com/blackvaultcom/status/1567897752184713216

https://twitter.com/_/status/1566512281067737088
@JulesUrbach @analyticpaul If the camera is not moving, then all motion blur comes from the motion of the object.

2022-09-04T15:44:52+00:00
https://twitter.com/_/status/1566452241048805377

@TedTinfoil Motion blur is just a function of exposure time and motion within the frame. The motion can be the object, the camera, or b both.

You can see motion blur without a camera. The classic example is a sparkler.

2022-09-04T14:34:05+00:00
https://twitter.com/_/status/1566434429525827585

2022-06-14T16:38:56+00:00

https://twitter.com/_/status/1536750045282062343

@ram0l There are no adults telling them Santa is real. Nor were kids quizzed by the media about their experiences with Santa.

There are (and were) many adults that strongly believe the Ariel story was real.

2022-06-14T16:23:02+00:00

https://twitter.com/_/status/1536746042879713280

@Ben1jammin @ori_volfo Yes, some children described wetsuit-like clothing. And the big eyes described are suggestive of large goggles.

However, it's impossible to know what actually prompted the descriptions.

2022-06-14T16:21:12+00:00

https://twitter.com/_/status/1536745580201791488

There are several UFO cases that reply on the testimony of children. Children are seen as honest witnesses. But studies show they often make mistakes, and their testimony can be shaped by questions that assume a more full developed mind.

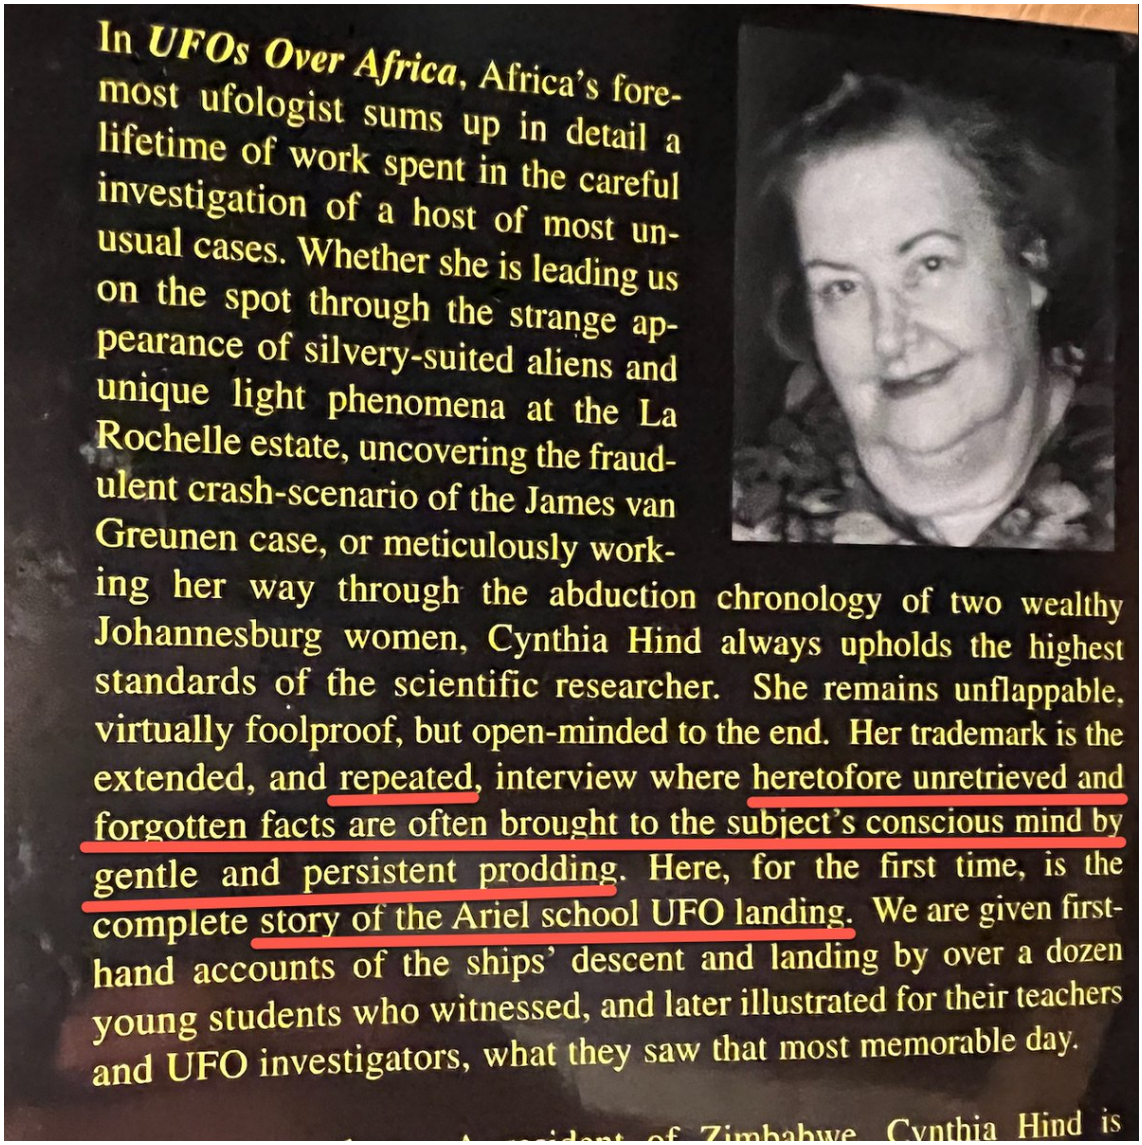
https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4640896/

http://pbs.twimg.com/media/FVOd9QDUYAI2O-p.jpg

The second study, a survey of Canadian judges about their perceptions of child witnesses, reveals that judges believe that compared to adults, children are generally more likely when testifying to make errors due to limitations of their memory or communication skills and due to the effects of suggestive questions. However, children are perceived to generally be more honest than adult witnesses. The survey also revealed that judges believe that children are often asked developmentally inappropriate questions in court, especially by defence counsel.

http://pbs.twimg.com/media/FVOci1OUAAEsfWk.jpg

http://pbs.twimg.com/media/FVOd9QDUYAI2O-p.jpg



http://pbs.twimg.com/media/FVOdvGTVIAAYpSq.jpg

A major concern with child witnesses is their potential suggestibility. As a result of repeated or misleading questions, the memory of a witness may become distorted. It is possible for a person who has been subjected to repeated, suggestive questioning to develop "memories" of events that did not in fact occur. While children, especially young children, are more suggestible than adults, there is great variation between individuals of the same age in suggestibility and in resistance to suggestion. There is a large body of experimental research about the suggestibility of children,[15] as well as some research about the suggestibility of adults.

Another fake aliens school encounter:

https://www.bbc.co.uk/news/uk-england-leicestershire-13472655.amp

http://pbs.twimg.com/media/FVOSFLhUsAAc6kJ.jpg

> Some of the four-year-old children described the aliens as "skinny, brown, big and strong"

Pupils have been investigating an "alien" spacecraft which crash landed on their school field in Leicester.

About 325 children at Scraptoft Valley Primary School were made to believe by teachers that aliens had landed.

http://pbs.twimg.com/media/FVOSFLhUsAAc6kJ.jpg

2022-06-14T15:27:23+00:00

https://twitter.com/_/status/1536732036160839681

@EndUAPSecrecy Do you think if I didn't exist then people would take it seriously?

2022-06-14T15:26:40+00:00

https://twitter.com/_/status/1536731857844305920

Here's one more impressive example:

https://www.independent.co.uk/news/shock-and-awww-ufo-crashes-into-london-primary-school-playground-8858451.html http://pbs.twimg.com/media/FVOReNpVUAELVrD.jpg

---

Shock and awww... 'UFO crashes' into London primary school playground

Officer guards crash site as forensics take samples

Felicity Morse • Friday 04 October 2013 11:59 • Comments

http://pbs.twimg.com/media/FVOReNpVUAELVrD.jpg

Pupils at a London primary school were shocked after a UFO appeared to have crashed into their playground.

An officer guarded the 'crash site; at North Harringay Primary School while an apparent forensics officer took samples behind a police cordon.

Only half the craft was visible after apparently smashing into the tarmac and children were allowed closer to inspect the UFO after samples had been collected.

http://pbs.twimg.com/media/FVORbd1VsAA5omv.jpg
2022-06-14T15:25:30+00:00
https://twitter.com/_/status/1536731564385611776
After I suggested that teachers might have kids roleplay seeing aliens to see how their memories of events evolve, I was quite surprised to learn this was a relative common exercise in the UK.

(I'm not saying the Ariel incident was staged by teachers)
https://twitter.com/MickWest/status/1536353086695825410

2022-06-14T15:21:54+00:00
https://twitter.com/_/status/1536730659577688065
@KirbysCrackle @Dwightc621 Of course all those things are possible.

2022-06-14T15:17:50+00:00
https://twitter.com/_/status/1536729635840331776
@BostonsBuddha @Robin081564 @MurMouche Having clear memories does not mean those memories are accurate.

Studies have shown that false memories feel just as clear as real memories.

2022-06-14T15:16:08+00:00
https://twitter.com/_/status/1536729207350235136
@fin365 https://www.midjourney.com/

Took them a while to send me the invite, but might be faster now. They are going to have a paid service.

2022-06-14T14:35:22+00:00
https://twitter.com/_/status/1536718947868811265
@Dwightc621 @KirbysCrackle It would not be recreating the event, as we will never know what that actually was.

It would be creating SOMETHING that might have a similar effect, at least in the short term.

2022-06-14T14:30:53+00:00
https://twitter.com/_/status/1536717817927438338
@SincerelyCosmic @Artie_jandashow There's no shame in believing something you thought you saw as a child - it's a perfectly natural and understandable thing that has probably happened to all of us to some degree.

2022-06-14T14:24:26+00:00
https://twitter.com/_/status/1536716197248479233
@BrianSzy_PF What happens then is people's cameras stop working.

2022-06-14T14:23:40+00:00
https://twitter.com/_/status/1536716004302000128

@TheoryQed I'm not suggesting recreating the initiating incident, as we have no way of knowing what that was. I'm suggesting seeing how easy it is for children to (at least briefly) form false memories.

2022-06-14T14:22:04+00:00

https://twitter.com/_/status/1536715600981962752

@bazoocchini It took like 30 seconds.

2022-06-14T14:21:25+00:00

https://twitter.com/_/status/1536715435202097158

@JohnSam10418239 @giddierone The same consistency that you'd expect from storytelling in groups.

2022-06-14T14:20:27+00:00

https://twitter.com/_/status/1536715192297345024

@Robin081564 YMMV

2022-06-14T14:20:11+00:00

https://twitter.com/_/status/1536715126883028993

@Robin081564 @MurMouche Traumatic memories are not the only memories that last from childhood.

2022-06-14T14:17:57+00:00

https://twitter.com/_/status/1536714563944448000

@Robin081564 I disagree. One can learn a lot simply from non-traumatic false memories.

You would probably not get any long-term effect though, as the continuation of the memories would rely on adults continually affirming their validity.

Kids remember seeing Santa, but not as adults.

2022-06-14T14:16:04+00:00

https://twitter.com/_/status/1536714088381706240

@CaulfieldTim @AmyEGardner @iarnsdorf @VoiceOfFranky Most "evidence-informed counter measures" exist in a world where there isn't a substantial power structure fighting against them. Believing in Trump's lies is currently necessary for those primary winners to win. If it was not necessary, fewer would believe.

2022-06-14T13:17:22+00:00

https://twitter.com/_/status/1536577553061670913
Any three points make a triangle. The brain is primed to make illusory contours, like with Kanizsa's triangle.

So you'd expect triangles to be a relatively common sighting.

@davpea2 @skyumpix Birds and balloons are the first things that the DNI list as possible explanations of some of the cases.

https://www.dni.gov/files/ODNI/documents/assessments/Prelimary-Assessment-UAP-20210625.pdf http://pbs.twimg.com/media/FVKQhhuUcAAOWNJ.jpg

---

UAP PROBABLY LACK A SINGLE EXPLANATION

The UAP documented in this limited dataset demonstrate an array of aerial behaviors, reinforcing the possibility there are multiple types of UAP requiring different explanations. Our analysis of the data supports the construct that if and when individual UAP incidents are resolved they will fall into one of five potential explanatory categories: airborne clutter, natural atmospheric phenomena, USG or industry developmental programs, foreign adversary systems, and a catchall "other" bin. With the exception of the one instance where we determined with high confidence that the reported UAP was airborne clutter, specifically a deflating balloon, we currently lack sufficient information in our dataset to attribute incidents to specific explanations.

Airborne Clutter: These objects include birds, balloons, recreational unmanned aerial vehicles (UAV), or airborne debris like plastic bags that muddle a scene and affect an operator's ability to identify true targets, such as enemy aircraft.

Natural Atmospheric Phenomena: Natural atmospheric phenomena includes ice crystals, moisture, and thermal fluctuations that may register on some infrared and radar systems.

USG or Industry Developmental Programs: Some UAP observations could be attributable to developments and classified programs by U.S. entities. We were unable to confirm, however, that these systems accounted for any of the UAP reports we collected.

Foreign Adversary Systems: Some UAP may be technologies deployed by China, Russia, another nation, or a non-governmental entity.

I never knew that H.P. Lovecraft was a debunker. Or that even back in 1909 (113 years ago), fire balloons were a cause of UFO sightings.

https://en.wikipedia.org/wiki/Wallace_Tillinghast
http://pbs.twimg.com/media/FVKKZ7IVEAAiR6F.jpg

Between December 12, 1909, and February 1910, New England newspapers were filled with "sightings" of the aircraft purportedly designed by Tillinghast and two unnamed mechanics.[2] A sighting over Worcester, Massachusetts on the night of December 22 was reported nationwide.[3] The sighting followed claims by inventor Wallace Tillinghast that he had invented an airplane that could fly 120 miles per hour.

The author H. P. Lovecraft witnessed a mass sighting of Tillinghast in Providence, Rhode Island on December 24, 1909. While the crowds of people on the street believed they were viewing Tillinghast's airship, Lovecraft identified the object as the planet Venus.[4]

Tillinghast never offered his craft for public viewing or inspection, and the media grew more skeptical, explaining the sightings were most likely Venus or fire balloons.[1]

@BayleeB79 @BenSwann_ @Masschemtrails @Chuck46435913 @SteerMark @climateviewer @rezn8d @Kal1_Furies @PamJonesLiberty @Uniocracy @OpChemtrails Nobody is paying me though. So what does that make it?

2018-08-14T19:50:37+00:00

https://twitter.com/_/status/1029455272094314496

@2ndfor1st @BenSwann_ Yes I did. He refers to the 2013 Thornberry amendment which, as my link explains, does NOT make it legal to propagandize in the US. It's still illegal.

2018-08-14T18:41:36+00:00

https://twitter.com/_/status/1029437899844988928

@BenSwann_ False. Domestic propaganda is still illegal. The law change relaxed controls on US propaganda aimed at foreign countries, allowing them to use social media. The law EXPLICITLY FORBIDS using funds to influence public opinion in the US. https://www.metabunk.org/debunked-2013-ndaa-thornberry-amendment-domestic-propaganda-disinformation.t592/

2018-08-14T17:09:49+00:00

https://twitter.com/_/status/1029414804883009537

@ERICSORENSEN These trails were aerodynamic trails, not exhaust trails. They formed at 25,000 feet. Two planes out of SFO. Aerodynamic contrails look flatter near the plane, ribbon-like. http://pbs.twimg.com/media/Dkk2y7oUYAE5Vsp.jpg

http://pbs.twimg.com/media/Dkk2y7oUYAE5Vsp.jpg
2018-08-14T17:05:28+00:00
https://twitter.com/_/status/1029413707581812736
@ERICSORENSEN And don't neglect aerodynamic contrails. Some days a significant portion of contrails are aerodynamic, forming off the wings, and very little to do with the exhaust at all. They look very similar from the ground. http://pbs.twimg.com/media/Dkk2CXUV4AAwHx3.jpg

http://pbs.twimg.com/media/Dkk19k9U0AAsgnt.jpg

http://pbs.twimg.com/media/Dkk13yQU0AAD8Ce.jpg

2018-08-14T16:50:20+00:00

https://twitter.com/_/status/1029409900370128896

Why do we call recordings "tapes?" It's not complicated folks. Most recordings used to be on tapes, and now "tapes" is a generic word for recording. Usage is meaning.

2018-08-14T16:40:12+00:00

https://twitter.com/_/status/1029407351944564737

@ERICSORENSEN Minor quibble, your bit makes it look like contrails are formed from equal parts water and exhaust particles. This make it seem like they are far dirtier than they actually are, being >99.99% water. Contrails would form without exhaust particles, as there's CCN in the air.

2018-08-14T02:06:17+00:00

https://twitter.com/_/status/1029187420762193920

@WTFUProductions I donâ□□t HAVE to do it. I see FE as an opportunity for some fun science experiments now and then.

@JasonBermas @DewsNewz @ihatematt @ShepardAmbellas @FluorescentGrey @ImperatorTruth @trebillion What's this magic bullet you are referring to? New to me.

2018-08-12T18:00:24+00:00
https://twitter.com/_/status/1028702759627833345
@JasonBermas @DewsNewz @ihatematt @ShepardAmbellas @FluorescentGrey @ImperatorTruth We are discussing this email, and the fact that you think it warrants an investigation. There were 20 people in that email chain.
And why are you not asking for an investigation of the submachine gun terrorist attack that was mentioned?
https://wikileaks.org/podesta-emails/emailid/49435

2018-08-12T17:51:39+00:00
https://twitter.com/_/status/1028700556485844992
@JasonBermas @DewsNewz @ihatematt @ShepardAmbellas @FluorescentGrey @ImperatorTruth And the other 17 people. Can you get me descriptions of them?
Because that's a GROUP EMAIL It's not something he wrote. It's not something directed at him. It's an email sent out to some family and friends about a party.

2018-08-12T17:46:19+00:00
https://twitter.com/_/status/1028699215092826112
@JasonBermas @DewsNewz @ihatematt @ShepardAmbellas @FluorescentGrey

@ImperatorTruth Why don't you write a brief description I can use.

2018-08-12T17:34:26+00:00

https://twitter.com/_/status/1028696222381428736

@JasonBermas @johnpodesta @DewsNewz @ihatematt @ShepardAmbellas @FluorescentGrey @ImperatorTruth Who is "interested?" If anything I think the email is simply warning them that it's going to be a bit loud with all the kids in the pool. It's an 18 person group email giving details of a party. It's amazing and sad that so many people read what they want into these banal emails

---

2018-08-12T15:45:53+00:00

https://twitter.com/_/status/1028668904665542657

@SimonGr41594862 They (Flat Earth folk) pretty much have to ignore the sun, the moon, the planets, and the stars.

2018-08-12T15:44:26+00:00

https://twitter.com/_/status/1028668539333357568

@JasonBermas @nytimes @RealAlexJones @johnpodesta @PrisonPlanet @ActivistPost @eddiebravo @DewsNewz @ihatematt @ShepardAmbellas @FluorescentGrey @ImperatorTruth It's ridiculous to take this email as evidence of anything other than the fact that the writer is letting people know her kids would be playing in the pool. Have you never been to a family oriented party where there was a pool? Kids play in pools. They have fun. Not weird.

2018-08-12T15:26:48+00:00

https://twitter.com/_/status/1028664103022129153

@JasonBermas @nytimes @RealAlexJones @johnpodesta @PrisonPlanet @ActivistPost @eddiebravo @DewsNewz @ihatematt @ShepardAmbellas @FluorescentGrey @ImperatorTruth What do you mean by "addressed?" What if they came back and said "It doesn't look like anything to me"? Would you try to argue with them.
Because it doesn't look like anything to most people. Some woman saying her kids are coming to the pool party.

2018-08-11T23:16:29+00:00

https://twitter.com/_/status/1028419915529695232

@thedrunkinmonk He likes tippy-top https://youtu.be/CFz51NcVBhQ?t=1h1m26s

---

2018-08-11T22:23:13+00:00

https://twitter.com/_/status/1028406511750414336

Trump used "tip top" several times in the past to describe nukes. Trying to legitimize QAnon, 4Chan gambled that he'd do it again when talking about nukes at SOTU. He didn't, but randomly said "tip top" 3 months later. So they grasped that as "proof"

https://www.metabunk.org/debunked-tip-top-as-a-qanon-clue-from-trump-hes-said-it-before.t9921/ http://pbs.twimg.com/media/DkWhQcRV4AAYmyY.jpg

@rothschildmd That chart is from 2016. Imagine how complicated it must be now!

2018-08-10T18:48:21+00:00

https://twitter.com/_/status/1027990050015858689

@RichardDawkins It's got a pretty specific meaning. "a set of 19th- and 20th-century philosophical traditions from mainland Europe."

https://en.wikipedia.org/wiki/Continental_philosophy

2018-08-09T19:17:00+00:00

https://twitter.com/_/status/1027634871345147905

@JasonBermas And it's Peter, not James.

2018-08-09T19:10:34+00:00

https://twitter.com/_/status/1027633250712182785

@JasonBermas He's just pulled a number out of thin air, there is no context. Crematoriums operate at around 1700Â°F, so maybe he was thinking of that. A passing mention of a temperature is not evidence of that temperature.

2018-08-09T15:01:56+00:00

https://twitter.com/_/status/1027570679573504000

@JasonBermas And, just for context, no judging, what do you think hit the Pentagon?

2018-08-09T14:59:41+00:00

https://twitter.com/_/status/1027570114193842176

@JasonBermas So I'm not really sure there's a point going over claims that were made and then explained over ten years ago. I guess if they still get traction there might be some use in explaining them to people, but I doubt Joe would be interested in such old stuff.

2018-08-09T14:57:40+00:00

https://twitter.com/_/status/1027569609379987458

@JasonBermas And of course there was molten metal, why would there not be? You get molten

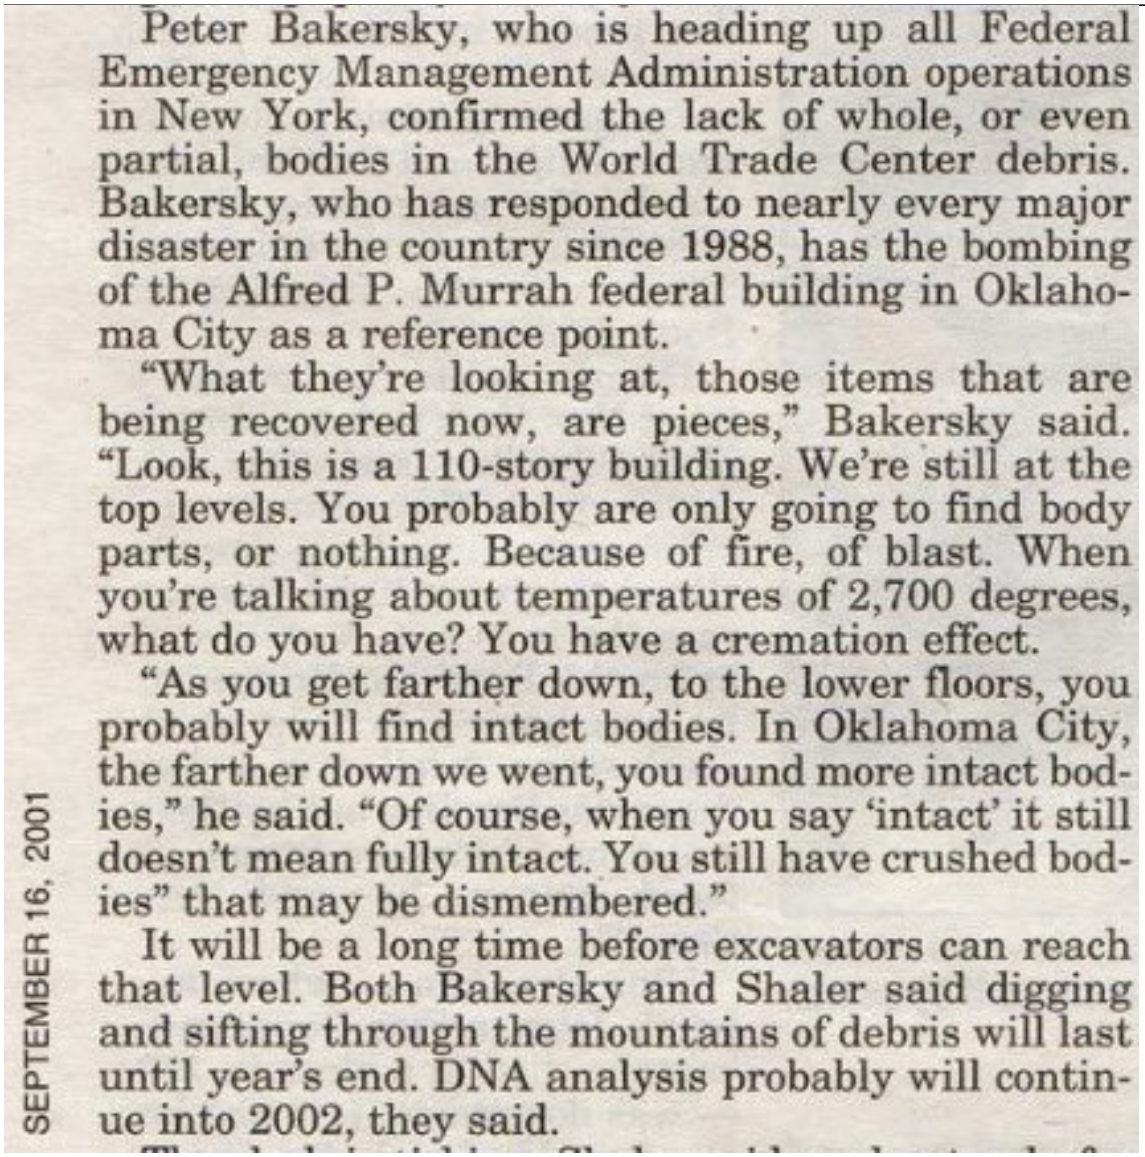
metal in a house fire. I've melted metal (into liquid) in my fireplace without forced air.

2018-08-09T14:48:06+00:00

https://twitter.com/_/status/1027567202407309312

@JasonBermas "Reported"? Methinks you might be reading a bit much into that.

http://pbs.twimg.com/media/DkKm2QpUYAA6DGu.jpg



Peter Bakersky, who is heading up all Federal Emergency Management Administration operations in New York, confirmed the lack of whole, or even partial, bodies in the World Trade Center debris. Bakersky, who has responded to nearly every major disaster in the country since 1988, has the bombing of the Alfred P. Murrah federal building in Oklahoma City as a reference point.

"What they're looking at, those items that are being recovered now, are pieces," Bakersky said. "Look, this is a 110-story building. We're still at the top levels. You probably are only going to find body parts, or nothing. Because of fire, of blast. When you're talking about temperatures of 2,700 degrees, what do you have? You have a cremation effect.

"As you get farther down, to the lower floors, you probably will find intact bodies. In Oklahoma City, the farther down we went, you found more intact bodies," he said. "Of course, when you say 'intact' it still doesn't mean fully intact. You still have crushed bodies" that may be dismembered."

It will be a long time before excavators can reach that level. Both Bakersky and Shaler said digging and sifting through the mountains of debris will last until year's end. DNA analysis probably will continue into 2002, they said.

https://twitter.com/_/status/1024067161172496384
Conspriacists think that CA wildfires are caused by energy beams from satellites. They forget that we had exactly the same fires before we had satellites. Here's the Bel-Air fire of 1961. The same scenes of burnt houses next to unburnt trees we see today.
https://www.youtube.com/watch?v=hRIIeFYp2Nc

2018-07-30T22:55:18+00:00
https://twitter.com/_/status/1024065929095741440
@shoahbiz @weareontoyou @BlueballsNina @CplBart @endcomputed These are just fires. Very dry conditions, but still just fires. Houses have VERY DRY wood in them, that's why they burn when trees do not. Often from blown embers in high winds. Compare with fires decades ago.

2018-07-30T22:28:35+00:00
https://twitter.com/_/status/1024059205773225984
@weareontoyou @shoahbiz @BlueballsNina @CplBart @endcomputed I live in California, in a high fire danger zone. I've seen the fires. When I walk in the field behind my house the golden grass crunches under my feet, tinder dry. But the oak trees still have green leaves and if you cut a branch it's alive and damp inside.

2018-07-30T22:25:40+00:00
https://twitter.com/_/status/1024058473913282560
@weareontoyou @shoahbiz @BlueballsNina @CplBart @endcomputed California wildfire spread via grass and brush, not so much by trees. Live trees are quite hard to burn and wildfires will often just scorch them. It varies.

2018-07-30T18:25:11+00:00
https://twitter.com/_/status/1023997952937754624
@petitsanimaux It''s all to do with a combination of the underlying geology, the topology, and the weather. Mostly the bedrock type though.

2018-07-30T14:58:51+00:00
https://twitter.com/_/status/1023946027479457792
@petitsanimaux 1. Because it's a common element in the Earth's crust.
2. Probably not, https://en.wikipedia.org/wiki/List_of_impact_craters_in_North_America

2018-07-28T15:01:21+00:00

https://twitter.com/_/status/1023221882005348358

@msimmons872 It's not wrong, it's just one of two ways of specifying the distance. The Metabunk calculator gives you the result of both methods, so you can compare. Click on "advanced".

https://www.metabunk.org/curve/?d=100&h=6&r=3959&u=i&a=a&fd=60&fp=3264

http://pbs.twimg.com/media/DjM2zDgUcAAo8Kv.jpg

Distance d = 100 Miles (528000 Feet)
Radius of Earth r = 3959 Miles (20903520 Feet)
Distance to horizon, a = sqrt((r+h)*(r+h) - r*r), a = **3 Miles (15838 Feet)**

Hidden is the amount of the distant object hidden by the curve of the Earth
Hidden = sqrt(a*a - 2*a*d + d*d + r*r)-r = **1.19 Miles (6273.36 Feet)**
1.188136117762152 Miles (6273.358701784164 Feet)

The following is the hidden amount calculated using slightly more complex trig
And assuming the 'distance' is the distance across the surface of the earth
This is more accurate for large distances and heights
But essentially the same for distances under 100 miles
True hidden = r/cos(d/r - asin(sqrt(h*(2*r+h)) / (r+h))) - r = 1.19 Miles (6275.87 Feet)

http://pbs.twimg.com/media/DjM2zDgUcAAo8Kv.jpg

2018-07-28T04:21:43+00:00

https://twitter.com/_/status/1023060910196178945

@msimmons872 @hopegirl587 You can measure the distance to object as a straight line or measure it as an arc. Over 100 miles the difference in the amount hidden hidden is about 2.5 feet out of 6275 feet. Nothing, for all practical purposes over actual distances.

2018-07-28T01:00:03+00:00

https://twitter.com/_/status/1023010161890189312

https://twitter.com/_/status/1021082961456738306

@keigh_see If you do it again, I'd:

1) try getting your view points all pefectly lined up with the CN Tower. This allows you to use

horizontal scale to better demonstrate vertical distortions.

2) Try to get a few different altitudes

3) Do a zoom-back & then pan video to show context

2018-07-22T17:18:42+00:00

https://twitter.com/_/status/1021082118133145600

@keigh_see Excellent example. I've added it to this thread discussing that view.

https://www.metabunk.org/explained-the-view-of-toronto-from-hamilton-600-feet-up.t7798/

2018-07-22T17:17:05+00:00

https://twitter.com/_/status/1021081713420611584

A great example of how best to observe the curve of the Earth. View large distant objects from near the water level, and then from higher up. And do it in the morning, when the air and water are similar temperatures, to avoid excessive refraction.

https://twitter.com/keigh_see/status/1020880833337544704

2018-07-21T17:32:08+00:00

https://twitter.com/_/status/1020723110549442561

@zetetic_tech @yarknarf You can make rough estimate on the scale of the secrets though. Take 9/11. Half of all FBI agents were tasked with investigating it for several years. That alone should give some perspective on how hard it would be to cover up. If Youtube detectives can solve it, why not the FBI?

2018-07-21T13:45:19+00:00

https://twitter.com/_/status/1020666029834289152

@BenMS Well the planes look like little white specks from the ground. But yes, contrails get pretty wide. It varies a lot with atmospheric conditions.

2018-07-21T13:37:34+00:00

https://twitter.com/_/status/1020664081806606336

@Dan_James_kek The main reason now is Youtube. People get into conspiracy theories after watching compelling videos.

They get angry because they think people are being unreasonable and stupid in not seeing what they are seeing. It's partly an expression of their frustration.

2018-07-21T13:35:02+00:00

https://twitter.com/_/status/1020663444893155330

@Oswald1160 @AugmentedRyan Also there's a huge difference between keeping a wartime project (mostly) secret for a bit, and faking a huge event that the entire world is watching live on television and following and recording in multiple other ways, and being studied and discussed by millions of scientists.

2018-07-21T13:29:16+00:00

https://twitter.com/_/status/1020661993320022018

Excellent example showing the effect of even small differences in altitude on the formation (or not) of contrails. One plane leaves a trail, but one separated by only 2,000 feet does not.

https://twitter.com/ArtoftheSkies/status/1020373551856037890

2018-07-21T13:26:09+00:00

https://twitter.com/_/status/1020661207617830912

@zetetic_tech So how many people do you think managed to pull off this perfect hoax that fooled the world? (Including the Russians tracking the entire thing, and the live freed)

2018-07-21T03:50:51+00:00

https://twitter.com/_/status/1020516429160898561

@4thAnon In wartime, and it did not remain secret long.

2018-07-20T22:51:02+00:00

https://twitter.com/_/status/1020440975347290113

@4thAnon Hey, are you into the whole QAnon/Storm thing?

2018-07-20T22:50:29+00:00

https://twitter.com/_/status/1020440838722080768

@4thAnon Why? Is there some fascinating new theory you think I'd be interested in?

2018-07-20T22:22:24+00:00

https://twitter.com/_/status/1020433770044723200

@W3lIy They either claim it could have been done with far fewer people, or they claim it's very easy to put pressure on people by threatening their jobs and families. It's a strange world-view that seems at odds with reality. A lot of people escape the rabbit hole by gaining perspective

---

2018-07-20T22:15:36+00:00

https://twitter.com/_/status/1020432060765298688

@W3lIy That too.

I suppose the ultimate one would be Flat Earth â□□ you'd have to have about a billion people to cover than one up.

2018-07-20T22:11:56+00:00

https://twitter.com/_/status/1020431135715647488

Most conspiracies can be debunked (or at least demonstrated to be highly implausible) by considering the number of people needed to cover them up. The Moon landings are an extreme example of this. (But 9/11 and chemtrails are certainly up there)

http://pbs.twimg.com/media/DilMPqlV4AE4VoE.jpg

2018-07-20T17:12:31+00:00

https://twitter.com/_/status/1020355788135575552

@4thAnon Natural News? Really? Come on guys.

2018-07-20T16:09:05+00:00

https://twitter.com/_/status/1020339823515598849

@spentronik And no "It's not something I've looked at" is not something I can say about anything. I've looked at many things. This does not happen to be one of them.

2018-07-20T16:08:06+00:00

https://twitter.com/_/status/1020339576907296768

@spentronik Have you ever considered you might just be looking at the evidence as presented from one point of view? Like the jury at a trial only getting to hear the case set out by the prosecution?

Documentaries can be very persuasive, but are they neutral sources of information?

2018-07-20T00:01:24+00:00

https://twitter.com/_/status/1020096296852467712

@Billmazzacca @mtaibbi @nomiprins It's it the Fed's job to manipulate interest rates?

2018-07-19T23:54:34+00:00

https://twitter.com/_/status/1020094579477921792

@4thAnon $80 Billion out of the $20,000 Billion total US debt.

2018-07-19T18:58:04+00:00

https://twitter.com/_/status/1020019961828335617

@spentronik It's not something I've looked at. I'm sure other people have though.

2018-07-19T15:14:41+00:00

https://twitter.com/_/status/1019963743604637696

@erinbiba Probably, but the paper did leave open that: "it remains possible that gender differences in STEM involvement emerge later in development from maturation, in other cognitive skills, or from interactions between cultural stereotypes, training, and sexually dimorphic behaviors"

2018-07-19T03:34:32+00:00

https://twitter.com/_/status/1019787546849447936

@Marko_BC @wanderinganimal @lorenzosghost @DanPeacock12 @PaulFox13 @lbox327 @monarchbus @naomirwolf @Devinator23bear @JohnJay18034096 @Jannamamma @OpChemtrails @RealGeoEngWatch @Kal1_Furies @AzSkyWatcher @foe_us No, itâ□□s because there are more planes and more routes and more smaller jets.

2018-07-19T00:30:58+00:00

https://twitter.com/_/status/1019741349765976064

@PostDisclosure @FreemanStahl @KikPlenty @gigathought @g_knapp How about intelligently controlled flying craft of non-human origin?

2018-07-19T00:30:25+00:00

https://twitter.com/_/status/1019741212687753216

@PostDisclosure @FreemanStahl @KikPlenty @gigathought @g_knapp How about any human inventory? Because I'm pretty sure the Billionaires are going to be flying stuff around. Also a kid with a drone would meet your criteria as written.

2018-07-19T00:12:39+00:00

https://twitter.com/_/status/1019736740318175232

@PostDisclosure @FreemanStahl @KikPlenty @gigathought @g_knapp So how about you bet that in the next five years there will be an official US Military announcement that there are artificial craft in the solar system that do not come from earth.

2018-07-19T00:10:26+00:00

https://twitter.com/_/status/1019736184145100801

@PostDisclosure @FreemanStahl @KikPlenty @gigathought @g_knapp Oh I want to bet. I just don't want to bet on something that's open to interpretation. E.T. is specific, "beyond what we have now" is not.

2018-07-19T00:09:26+00:00

https://twitter.com/_/status/1019735931526320128

@PostDisclosure @FreemanStahl @KikPlenty @gigathought @g_knapp So what does "beyond" mean? The military is always coming up with new things that are beyond everything that was before. So that would fulfill your terms next time someone flew a new fighter or drone secretly.

2018-07-19T00:06:55+00:00

https://twitter.com/_/status/1019735296521396224

@wanderinganimal @Marko_BC @lorenzosghost @DanPeacock12 @PaulFox13 @lbox327 @monarchbus @naomirwolf @Devinator23bear @JohnJay18034096 @Vomit911 @Jannamamma @PamJonesLiberty @OpChemtrails @RealGeoEngWatch @Kal1_Furies @AzSkyWatcher @foe_us The planet will be fine. It's the people that will have the problems.

2018-07-19T00:05:22+00:00

https://twitter.com/_/status/1019734910125289472

@PostDisclosure @FreemanStahl @KikPlenty @gigathought @g_knapp What if the craft was autonomously piloted that was way beyond anything the US had?

I think you are hinting at "breaking the laws of physics", so why don't you just go there. Let's say a craft proven to both hover and pull more than 100g?

2018-07-19T00:03:14+00:00

https://twitter.com/_/status/1019734371928924160

@PostDisclosure @FreemanStahl @KikPlenty @gigathought @g_knapp It's obvious the military would study reported UFOs, because they might be enemy craft. It's a moot point. You are positing some vague program with some vague objective that's just an extension of that.

2018-07-19T00:01:25+00:00

https://twitter.com/_/status/1019733912174542849

@PostDisclosure @FreemanStahl @KikPlenty @gigathought @g_knapp E.T. Is what I'm interested in, not some argument about what "beyond" means.

2018-07-18T23:58:11+00:00

https://twitter.com/_/status/1019733099205160960

@PostDisclosure @FreemanStahl @KikPlenty @gigathought @g_knapp You Russian and China are incapable of having something that the US doesn't?

2018-07-18T23:55:24+00:00

https://twitter.com/_/status/1019732399448444928

@PostDisclosure @FreemanStahl @KikPlenty @gigathought @g_knapp Isn't disclosure about ET?

2018-07-18T23:54:14+00:00

https://twitter.com/_/status/1019732108330356741

@PostDisclosure @FreemanStahl @KikPlenty @gigathought @g_knapp I care. ET is vastly more interesting that some advanced drone.

2018-07-18T23:53:00+00:00

https://twitter.com/_/status/1019731794097156096

@PostDisclosure @FreemanStahl @KikPlenty @gigathought @g_knapp Too subjective. Could cover an impressive new secret drone by a foreign power.

2018-07-18T23:47:19+00:00

https://twitter.com/_/status/1019730365617860609

@PostDisclosure @FreemanStahl @KikPlenty @gigathought @g_knapp I'd bet that the US military does not "understand" (i.e. know) there to be ET technology flying around the world.

2018-07-18T23:46:22+00:00

https://twitter.com/_/status/1019730125875580928

@PostDisclosure @FreemanStahl @KikPlenty @gigathought @g_knapp No, seeing as it's too vague. What does "understood" mean? "Known", "thought", "suspected"?

And seeing as the military has had UFO research before, why not again?

If something is "understood" (known) to be ET, then that's plenty for me.

2018-07-18T23:43:35+00:00

https://twitter.com/_/status/1019729424873222145

@wanderinganimal @Marko_BC @lorenzosghost @DanPeacock12 @PaulFox13 @lbox327 @monarchbus @naomirwolf @Devinator23bear @JohnJay18034096 @Jannamamma @OpChemtrails @RealGeoEngWatch @Kal1_Furies @AzSkyWatcher @foe_us Facts, like: There's no actual evidence of high altitude spraying. There's no evidence that the trails look like anything other than contrails. High bypass engines make more contrails than low bypass. Contrails can persist and turn into cloud layers.

2018-07-18T23:19:08+00:00

And since it's just a few pounds you are not going to see anything.

2018-07-15T05:17:00+00:00

https://twitter.com/_/status/1018363782333005825

@lbox327 @Marko_BC @monarchbus @wanderinganimal @naomirwolf @DanPeacock12 @Devinator23bear @JohnJay18034096 @DaLeftHook @Vomit911 @Jannamamma @PamJonesLiberty @OpChemtrails @BayleeB79 @kanyewest @HealthRanger @RealGeoEngWatch @Kal1_Furies @LionelMedia @SteerMark @AzSkyWatcher @mike_Zollo We are testing because we don't know how to do it, or if it will work, or if it's a good idea.
Look into the science of geoengineering. Nobody really knows exactly what it will do.

2018-07-15T05:03:15+00:00

https://twitter.com/_/status/1018360323466616832

To communicate effectively with someone you have to comprehend their world (or at least the bits of it you are talking about). Talking effectively with conspiracy theorists requires a bit of effort, but they are not lions. https://twitter.com/existentialcoms/status/1016741387729924096

2018-07-15T04:22:38+00:00

https://twitter.com/_/status/1018350099858984960

@BayleeB79 @lbox327 @monarchbus @wanderinganimal @naomirwolf @Marko_BC @DanPeacock12 @Devinator23bear @JohnJay18034096 @DaLeftHook @Vomit911 @Jannamamma @PamJonesLiberty @OpChemtrails @kanyewest @HealthRanger

@RealGeoEngWatch @Kal1_Furies @LionelMedia @SteerMark @AzSkyWatcher @mike_Zollo Have you looked at the books?

2018-07-15T04:14:00+00:00

https://twitter.com/_/status/1018347925590511616

@lbox327 @monarchbus @wanderinganimal @naomirwolf @Marko_BC @DanPeacock12 @Devinator23bear @JohnJay18034096 @DaLeftHook @Vomit911 @Jannamamma @PamJonesLiberty @OpChemtrails @BayleeB79 @kanyewest @HealthRanger @RealGeoEngWatch @Kal1_Furies @LionelMedia @SteerMark @AzSkyWatcher @mike_Zollo Yes he plans to put a few pounds of various things in the air later this year. Or maybe next year. It's a test, to study how it might work.

2018-07-15T03:58:14+00:00

https://twitter.com/_/status/1018343960622743552

@BayleeB79 @lbox327 @monarchbus @wanderinganimal @naomirwolf @Marko_BC @DanPeacock12 @Devinator23bear @JohnJay18034096 @DaLeftHook @Vomit911 @Jannamamma @PamJonesLiberty @OpChemtrails @kanyewest @HealthRanger @RealGeoEngWatch @Kal1_Furies @LionelMedia @SteerMark @AzSkyWatcher @mike_Zollo The difference is that my agenda is fact based. Contrails can persist, they often do. They have done since planes flew high enough.

2018-07-15T03:56:13+00:00

https://twitter.com/_/status/1018343450087862273

@Marko_BC Who says it's natural? Contrails are essentially artificial clouds. They impact both weather and climate.

2018-07-15T03:51:09+00:00

https://twitter.com/_/status/1018342177141768192

@Marko_BC That's technically possible, but not really relevant. It would be trace amounts only. Contrails are almost entirely water.

2018-07-15T03:47:03+00:00

https://twitter.com/_/status/1018341145858850817

@Marko_BC That sounds roughly correct.

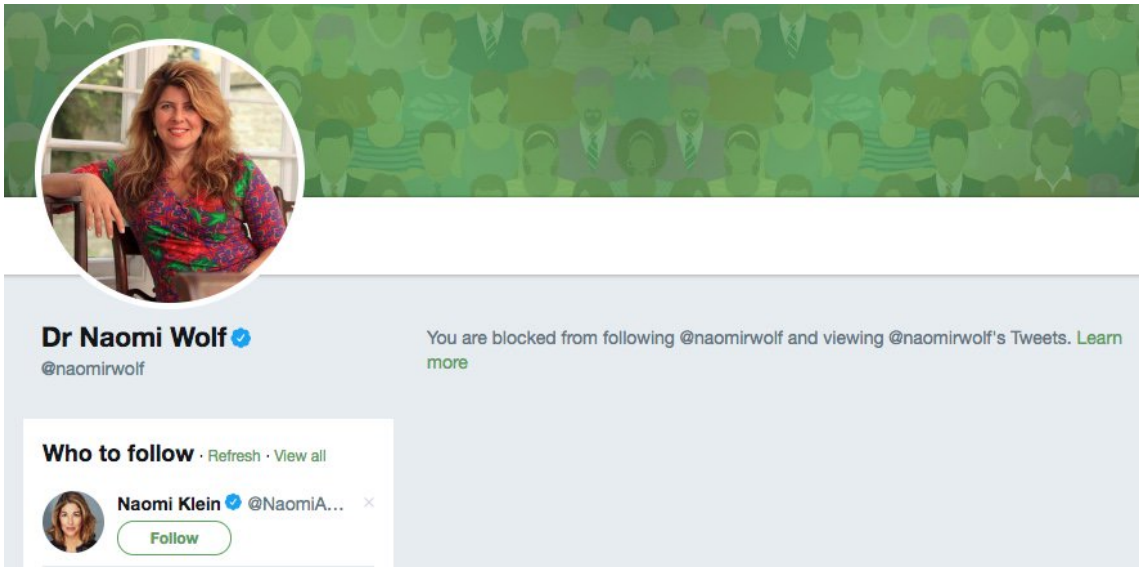
2018-07-15T03:42:52+00:00

https://twitter.com/_/status/1018340091809239040

@naomirwolf blocked me (for explaining contrails), so Twitter recommended @NaomiAKlein as a replacement.

I'm sure they are interchangeable, right? http://pbs.twimg.com/media/DiHeheLVAAA7bvs.jpg

---



http://pbs.twimg.com/media/DiHeheLVAAA7bvs.jpg
2018-07-15T03:40:39+00:00

@lbox327 @monarchbus @wanderinganimal @naomirwolf @Marko_BC @DanPeacock12 @Devinator23bear @JohnJay18034096 @DaLeftHook @Vomit911 @Jannamamma @PamJonesLiberty @OpChemtrails @BayleeB79 @kanyewest @HealthRanger @RealGeoEngWatch @Kal1_Furies @LionelMedia @SteerMark @AzSkyWatcher @mike_Zollo @naomirwolf blocked me.
I said: "Actually a LOT of people are still stuck on "contrails can't persist". So if you want to get then to look at a more nuanced interpretation you're going to have to help them past that misunderstanding. "

2018-07-15T03:20:29+00:00
https://twitter.com/_/status/1018334457873367040
@lbox327 @monarchbus @wanderinganimal @naomirwolf @Marko_BC @DanPeacock12 @Devinator23bear @JohnJay18034096 @DaLeftHook @Vomit911 @Jannamamma @PamJonesLiberty @OpChemtrails @BayleeB79 @kanyewest @HealthRanger @RealGeoEngWatch @Kal1_Furies @LionelMedia @SteerMark @AzSkyWatcher @mike_Zollo
And this gag order did not apply to ANY of the scientist in the study. Just weather service employees. And again, on unrelated administrative subjects.

2018-07-15T03:19:32+00:00
https://twitter.com/_/status/1018334221637640192

2015. The topics of the gag order are Organizational planning, Grievance settlements, and Collective bargaining. Nothing about geoengineering.
https://www.peer.org/news/news-releases/weather-service-employees-tethered-by-illegal-gag-orders.html http://pbs.twimg.com/media/DiHZWmHVAAAF6nt.jpg

---

The complaint cites three gag orders issued in recent weeks by the National Weather Service and its parent agencies, the National Oceanic & Atmospheric Administration and the Department of Commerce. These orders forbid disclosure of information arising out of –

- Organizational planning. This confidentiality order forbids disclosure of anything about the Weather Service Organization Workforce Analysis, which has the effect of muzzling any revelations about agency planning and the rationale for planned actions;

- Grievance settlements. In July, the Commerce General Counsel instituted a policy that any settlement of grievances must include a nondisclosure clause. While it has an exception for "whistleblower cases" that exception comes nowhere close to meeting requirements of the WPEA and would block release of grievances involving actions by agency managers that constitute violations of law or regulation, waste of funds, mismanagement or abuse of authority; and

- Collective Bargaining. The National Weather Service has just added a confidentiality clause to its ground rules for Collective Bargaining Agreement negotiations which requires that all information about the CBA bargaining process must be held "confidential."

It's something to be aware of. However it's the same exhaust if the theres no contrails. So if you point at contrails, you also need to point at no contrails on the less humid days. Same thing.

2018-07-15T01:05:45+00:00

https://twitter.com/_/status/1018300553963585536

@TammyJParadis That's for sounding rockets. Entirely different. Essentially that's just a big single firework in space. Zero to do with geoengineering - and not even really in the atmosphere. It's used in the ionosphere, the edge of space.

2018-07-05T14:06:41+00:00

https://twitter.com/_/status/1014873200776261632

@TammyJParadis Correct. And nobody would EVER spray strontium. Itâ□□s never even been suggested. Someone made that up.

2018-07-04T22:03:05+00:00

https://twitter.com/_/status/1014630706339647488

@NathanOakley80 @YouTube You can actually validate it with observations of things hidden by the horizon, like Catalina Island, or the Isle of Wight. That's the point - it's verifiable independent of what science tells us. But also matches that science. Give it a go, but watch out for refraction!

2018-07-04T20:43:56+00:00

https://twitter.com/_/status/1014610784175812609

@hugh_bothwell It's the ethanol that's the problem.

It's a global issue, as geoengineering affects the entire globe.

2018-07-03T21:56:19+00:00

https://twitter.com/_/status/1014266612579352576

@KatieSimmons_17 @rothschildmd @Kolyin @rjblaskiewicz Origin story:

"While Trump, a known bullshitter, was clearly just pulling generic vaguely-intimidating phrases ["The Storm", "You'll see"] from his ass to sound cool, this moment resonated with Q, clearly inspiring his initial /pol post a couple of weeks later. "

2018-07-03T21:53:42+00:00

https://twitter.com/_/status/1014265956850229248

@KatieSimmons_17 @rothschildmd @Kolyin @rjblaskiewicz A bit of a rabbit hole. Basically Trump is a genius orchestrating a a purge of the deep state and dropping lots of clues about the coming "storm" via Twitter as (or using) QAnon.

Nonsense, best ignored unless you like that type of thing.

Good explainer:

https://www.vice.com/en_us/article/ywex8v/what-is-qanon-conspiracy-theory

https://twitter.com/_/status/1014223357204549632

@Kolyin The trope of "disclosure" exists in most conspiracy cultures. UFO is the most obvious, but there were a lot of people who got their hopes up that Trump was going to spill the beans on 9/11, Chemtrails, Pizzagate, and probably even Flat Earth. Qanon is partly to explain the delay

---

2018-07-03T19:00:26+00:00

https://twitter.com/_/status/1014222350978433024

@Kolyin The older theorists towards the more extreme end of the spectrum (chemtrails, 9/11 Controlled demolition) seem to have no problem incorporating it into their belief system. Like this one five minutes ago. https://twitter.com/weatherwarsinfo/status/1014220634417745920

2018-07-02T21:50:37+00:00

https://twitter.com/_/status/1013902792488964096

@Joshphi23040839 @FreemanStahl @PostDisclosure @Keithmayoh @TTSAcademy Want to bet? $20?

2018-07-02T21:47:24+00:00

https://twitter.com/_/status/1013901981004357632

@Keithmayoh @PostDisclosure @FreemanStahl Improbable because of the difficulties of incognito interstellar travel, and the lack of evidence.

Good evidence = close up photos/video. Actual radar data. Physical objects of actually impossible human manufacture.

Radar returns are only by witness testimony, both unverifiable.

2018-07-02T21:39:37+00:00

https://twitter.com/_/status/1013900021656219648

@Joshphi23040839 @FreemanStahl @PostDisclosure @Keithmayoh @TTSAcademy Did you even consider that UFO enthusiasts might have a higher degree of pareidolia than the general population?

2018-07-02T21:38:17+00:00

https://twitter.com/_/status/1013899686984347648

@Keithmayoh @PostDisclosure @FreemanStahl "something" is a bit all-encompassing. Can you be more specific? I think visiting aliens are improbable and not supported by good evidence.

2018-07-02T21:26:41+00:00

https://twitter.com/_/status/1013896769585811457

@Joshphi23040839 @FreemanStahl @PostDisclosure @Keithmayoh @TTSAcademy There's nothing in his hand.

2018-07-02T21:25:42+00:00

https://twitter.com/_/status/1013896519462731776

@Keithmayoh @PostDisclosure @FreemanStahl It's not really about UFOs. I mention it to show I'm a fan of respect. Hard to communicate with someone you are mocking.

2018-07-02T21:24:34+00:00

https://twitter.com/_/status/1013896234812108802

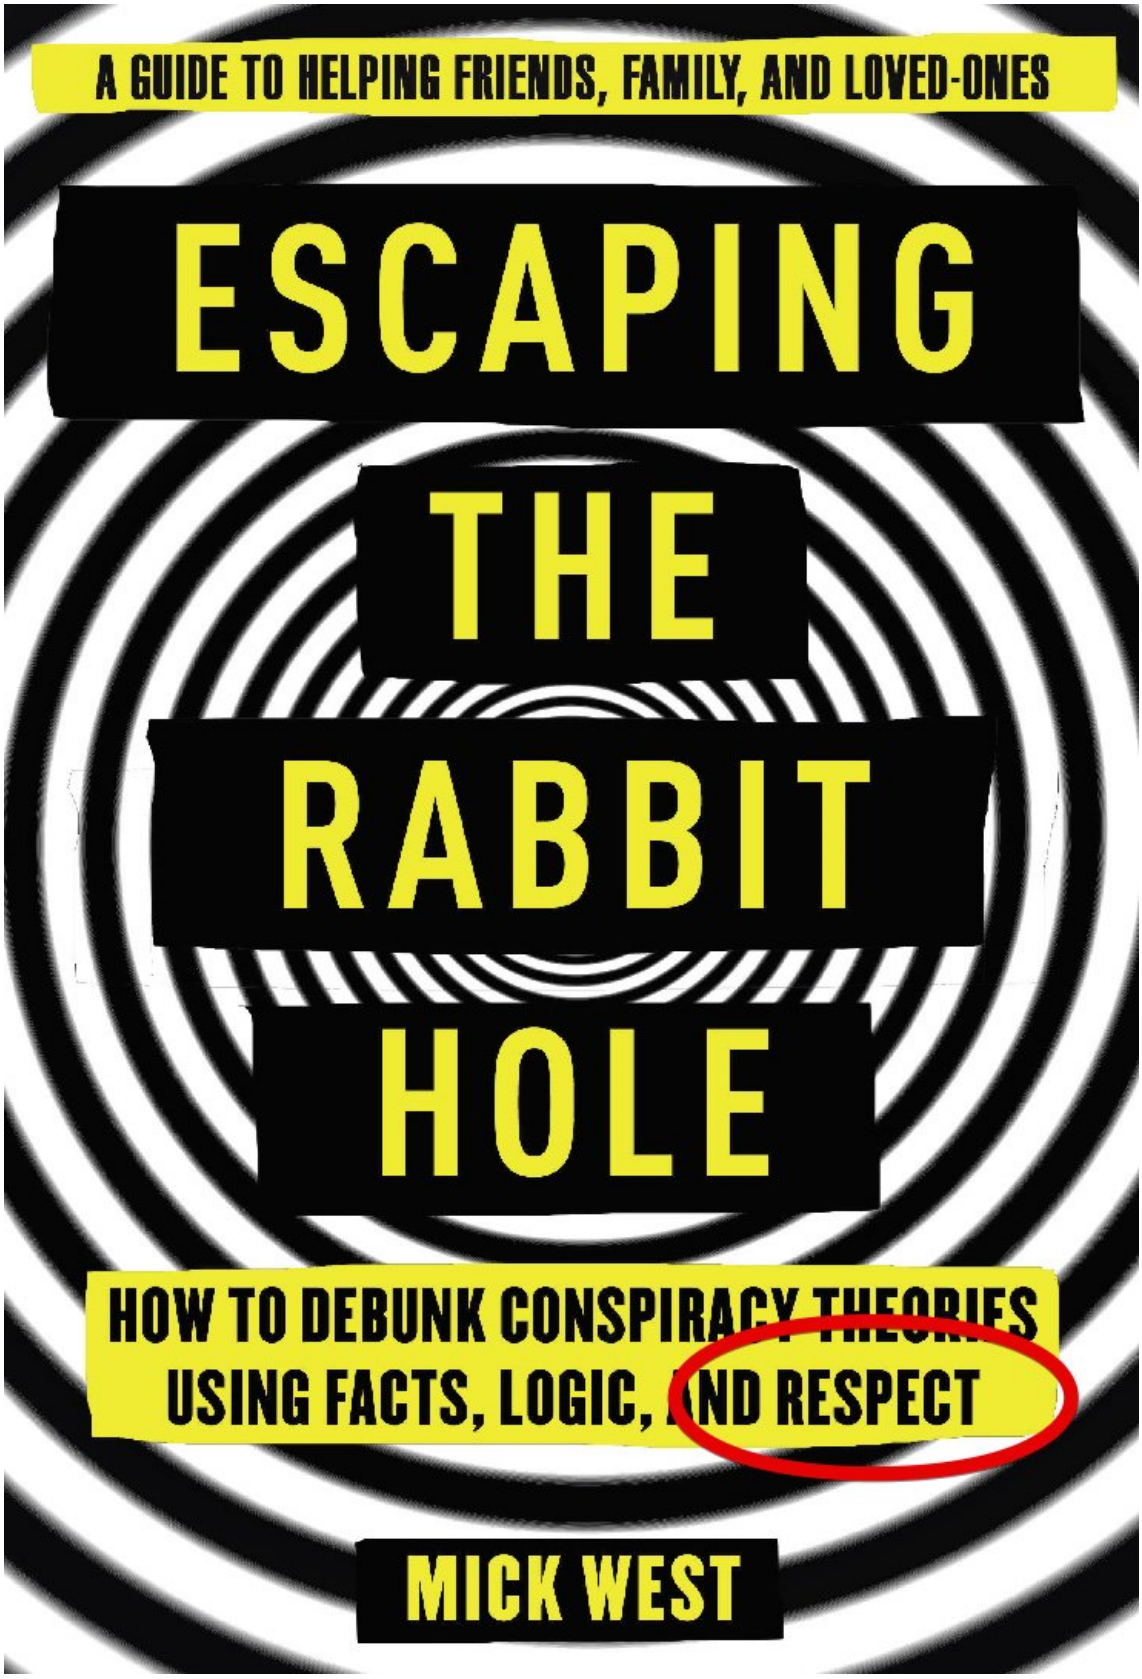
@FreemanStahl @Keithmayoh @PostDisclosure They evaluated it poorly. For example in the GO FAST footage they said the object was close to the sea. Trigonometry proved it was not. Trig also proved it was not moving particularly fast.

2018-07-02T21:22:41+00:00

https://twitter.com/_/status/1013895762717970432

@Keithmayoh @PostDisclosure @FreemanStahl Respect is the the third ingredient of my book.

http://pbs.twimg.com/media/DhIUzmbVMAEbWYK.jpg



http://pbs.twimg.com/media/DhIUzmbVMAEbWYK.jpg

2018-07-02T20:41:04+00:00

https://twitter.com/_/status/1013885289922609152

@PostDisclosure @FreemanStahl @Keithmayoh Well when the evidences is mostly "look at all these totally different things that might all be caused by aliens if they don't have a prosaic explanation" then it's kind of hard to analyze. You need to find something that demonstrably has no other plausible explanation.

2018-07-02T20:37:23+00:00

https://twitter.com/_/status/1013884360137719809

@Keithmayoh @PostDisclosure @FreemanStahl Nobody is stopping you from forming hypotheses based on limited evidence. Just don't be surprised when people subject those hypotheses to scrutiny.

2018-07-02T19:17:43+00:00

https://twitter.com/_/status/1013864313205841927

@GazPyrotechnics @g_knapp Yes, but what was the size subtended at the eye? What did it ACTUALLY look like. Can we rule out this for a start?

http://pbs.twimg.com/media/DhH4LaGVMAAaQF2.jpg

---

http://pbs.twimg.com/media/DhH4LaGVMAAaQF2.jpg

2018-07-02T19:08:08+00:00

https://twitter.com/_/status/1013861902571565056

@PostDisclosure @FreemanStahl @Keithmayoh Science is a dusting of finely refined hypotheses that made the grade sprinkled on a mile high mountain composed of the withered corpses of those that did not.

2018-07-02T18:31:17+00:00

https://twitter.com/_/status/1013852626885070848

@FreemanStahl @Keithmayoh @PostDisclosure That's also what the 9/11 Folk say, and the Chemtrailer, and the Flat Earthers.

Of course YOU think I "know", because you see I'm not entirely stupid, and you think the evidence, despite being rejected by mainstream science, is incontrovertible.

But I disagree.

2018-07-02T18:28:06+00:00

https://twitter.com/_/status/1013851828318961666

@GazPyrotechnics @g_knapp And I though i could imagine what a Tic-Tac looks like, but then I bought a pack and they look stubbier and curvier than I remember. So I'd like Fravor to draw a picture of the exact proportions as he remembers them. Like which of these shapes is closest?

http://pbs.twimg.com/media/DhHsr_OVAAEPWgb.png

Sun reflections off water seem smaller in photos sometimes because they are darker, so there's less glare. Like how the sun appears smaller as it sets - it's just darker.

2018-07-02T06:01:39+00:00
https://twitter.com/_/status/1013663974993289216
Someone gave me this detailed explanation of 9/11 on YouTube. I'm not sure if they are serious. http://pbs.twimg.com/media/DhFBszjU8AAuE60.jpg

---

Mick West ... well what would be the point of not doing a proper investigation with 0 stones left unturned..not even attempting to explain how the building could could fall at the speed of gravity with a single columns failure (79) to initiate the 100+ft of freefall... saying that there was no evidence of explosives (sorry but total bullshit) you have all of the firefighters saying that there was explosions and videos with audio of explosions..there is no god damn excuse for that...find me just 5 architects or engineers that will put their name and reputation on the line and back the non investigations that received less money to investigate then the Monica Lewinsky scandal...the only people left on the planet that believe 9/11 was real..is people who have participated... benefited... and fucking idiots that have to put a helmet on when they walk anywhere... the people who are responsible for 9/11 and every single other deception is not Jewish International bankers like Rothschilds and Rockefellers... London is directly responsible... and Rothschilds are fake identities being used by those European Royals who established the United States and Israel to get control of the entire world by using deception...all Israeli elements in the story of 9 11 is bullshit and can be easily proven bullshit because the planes were CGI...that is why parts of the wings on the planes disappeared behind buildings that we're behind the WTC buildings and then came back once they passed the buildings they disappeared behind...so there were no planes for the Israeli mossad agents on the van to celebrate when the fake plane hit the tower... and since planes were CGI...the media was part of the whole thing..they were interviewing people (royals) in front of a green screen in a Hollywood studio so they could control the narrative.. each of those Royals have many identities each they use and this is how they give citizens the illusion of voting... Hollywood is those Royals... which is the exact reason for fake news... Benjamin Franklin came up with the idea to give the United States freedom of speech.. religion.. and press... and then use fake news and events to fear monger citizens into voluntarily giving up rights while at the same time giving the illusion that the government is protecting the citizens...but it has been them faking everything.. Obama's birth certificate prooves they have many identities each... and they are attempting to blame and sacrifice their fake identities ...so they created YouTube so they could build that up for when they sacrifice Hollywood...all YouTube channels with tons of subs are extensions of Hollywood by those Royals... that is why they all cross promote each other and appear on each other channels and they have professionally done videos... and many channels each with tons of subs using different identities each one

2018-07-01T14:55:05+00:00

https://twitter.com/_/status/1013435830801534976

@UfoSunday @PostDisclosure Scientists don't assume some things are something. They entertain a range of hypotheses, and they test them. I keep ET on my list, but other hypotheses are much better fits, in the Occamic sense.

2018-07-01T04:57:36+00:00

https://twitter.com/_/status/1013285471063977984

@GreenTeamBC @joerogan @bchydro @CityofVancouver @CityofDeltaBC No, those meters just detect alternating electromagnetic fields. I.e. Alternating current, or regular electricity. I use mine to test for live wires. Hold it near any outlet.

2018-07-01T04:21:30+00:00

https://twitter.com/_/status/1013276386348285953

@GreenTeamBC Might want to check your meter works. Try it in smoke.

2018-06-30T23:03:44+00:00

https://twitter.com/_/status/1013196414938017792

@GreenTeamBC It would matter yes. But rain water is generally pretty pure. We are talking about parts per million or even parts per billion. It can vary a lot depending on how dusty the air is.

2018-06-30T23:02:22+00:00

https://twitter.com/_/status/1013196071412031488

@GreenTeamBC Very few, and the FAA.

2018-06-30T22:19:57+00:00

https://twitter.com/_/status/1013185395952005120

@GreenTeamBC Contrails are mostly water - like a cloud. But they form on tiny condensation nuclei - some of those are just regular cloud nuclei from the air, like dust. But sometimes it's soot and stuff from the exhaust.

Basically 99.99% of what you see is water, just like a natural cloud.

2018-06-30T21:38:36+00:00

Public Notices

NOTICE OF INTENTION TO MODIFY NATURAL PRECIPITATION BY ARTIFICIAL MEANS

TO WHOM IT MAY CONCERN:

Notice is hereby given that it is the intent of the Water Resources Development Corporation of 460 South Broadway, Denver 9, Colorado, which holds License No. 54 of the State of Oregon, to engage in operations to modify natural precipitation by artificial means, for and on behalf of MORROW COUNTY WEATHER RESEARCH ASSOCIATION, located at Echo. Oregon. The object of the above program will be to increase natural rainfall.

1. The area to be affected is described as lying within Morrow County and Northwestern Umatilla County, State of Oregon.
2. The Operation will be conducted through the use of ground-based silver iodide generators and located within the Counties of Grant, Wheeler, Wasco, Gilliam, Morrow, Umatilla and Sher-

2018-06-30T15:52:38+00:00

https://twitter.com/_/status/1013087927436394496

@supernick71 @CornwallLive Those are solar halos, not sundogs. 70 days a year sounds about right, based on historical observations since the 1500s.

https://www.metabunk.org/how-rare-or-common-are-haloes-sun-dogs-etc-a-review-of-the-literature.t6742/ http://pbs.twimg.com/media/Dg82EQhV4AAkGCU.jpg

---

the outermost circle was a bright red. In 1728, one was seen of a pale red outwardly, then followed yellow, and then green, terminated by a white. Corona.

These coronas are very frequent. In Holland, M. Muschenbroeck says, 50 may be seen in the day-time, almost every year; but they are difficult to be observed, except the eye be so situated, that not the body of the sun, but only the neighbouring parts of the heavens, can be seen. Mr Middleton says, that this phenomenon is very frequent in North America; for that there is generally one or two about the sun every week, and as many about the moon every month. Halos round the sun are very frequent in Russia. M. Æpinus says, that from the 23d of April 1758, to the 20th of September, he himself had observed no less than 26, and that he has sometimes seen twice as many in the same space of time.

https://twitter.com/_/status/1012430451686817793

@jboat1992 @JeremyCorbell I analyze things based on available information. What's wrong with that?

2018-06-28T17:11:26+00:00

https://twitter.com/_/status/1012382979132252162

@devgru1980mi @MergeReport1 Did anyone ever draw a diagram of these hundred of tic-tacs?

2018-06-28T15:46:38+00:00

https://twitter.com/_/status/1012361641579565061

@jboat1992 UFO's clearly exist. I see UFOs all the time. The question is what are they.
The ones I see are probably planes and birds, sometimes balloons, or spider silk, or seed. But it's hard to be sure, so they remain unidentified.

2018-06-28T07:54:29+00:00

https://twitter.com/_/status/1012242819837091840

@jboat1992 That's impossible. You can't prove something doesn't exist.

2018-06-27T22:06:45+00:00

https://twitter.com/_/status/1012094913662496768

@StevenM10657487 @PostDisclosure @MergeReport1 @AnunnakiAwake Nice, thanks!

2018-06-27T22:06:29+00:00

https://twitter.com/_/status/1012094846465540096

@StevenM10657487 @PostDisclosure @MergeReport1 @AnunnakiAwake but a hecka lot of gamma ray energy...

2018-06-27T19:19:58+00:00

https://twitter.com/_/status/1012052939324645376

@StevenM10657487 @PostDisclosure @MergeReport1 @AnunnakiAwake Minor? Do the math. What's the KE required to move a parcel of air out of the way of a 20 foot diameter object doing 10,000 mph over 60,000 feet? Consider the speed the air has to move at each point on the path.
Draw a diagram, introduce suitable notation.

2018-06-27T19:15:47+00:00

https://twitter.com/_/status/1012051888617893888

@UAPinfo Sure sounds like radar glitches to me. And to the NIMITZ folk as well, at least initially, as they didn't seen anyone to investigate this for a while. The lack of follow up also seems to indicate they continued to think it was radar glitches.

2018-06-27T19:02:28+00:00

https://twitter.com/_/status/1012048534130941952

@StevenM10657487 @PostDisclosure @MergeReport1 @AnunnakiAwake The molecules still have to move, and later stop moving. Both require energy.

2018-06-27T18:44:42+00:00

https://twitter.com/_/status/1012044065519517696

@StevenM10657487 @PostDisclosure @MergeReport1 @AnunnakiAwake Even if you can bend spacetime, how can you get through the atmosphere? If you compress it, then that just makes it denser. Near instant displacement of mass through air results in huge energy releases, even under optimistic theoretical interpretations of spacetime.

2018-06-27T18:42:37+00:00

https://twitter.com/_/status/1012043538786160641

@StevenM10657487 @PostDisclosure @MergeReport1 @AnunnakiAwake Physics is not necessarily a never ending stream of more and more impressive possibilities. It's entirely possible, for example, that FTL travel is literally impossible in the this universe. In this example we've got the more mundane problem of Krakatoa level sonic booms.

2018-06-27T18:11:38+00:00

https://twitter.com/_/status/1012035743525437441

@MergeReport1 @PostDisclosure @AnunnakiAwake No craft, according to conventional physics. So your explanation requires new physics which is a pretty big thing to hinge an explanation on.

New physics vs. some unlikely coincidences ....

2018-06-27T17:57:58+00:00

https://twitter.com/_/status/1012032302975672321

@GazPyrotechnics @PostDisclosure How do you know what he saw was what the ship radar saw? It did not show up on his radar.

2018-06-27T17:42:06+00:00

https://twitter.com/_/status/1012028310891577344

@PostDisclosure @AnunnakiAwake so take the Chilean case, and add a couple more coincidences/mistakes.

Is that IMPOSSIBLE?

2018-06-27T17:41:00+00:00

https://twitter.com/_/status/1012028032234602497

@PostDisclosure @GazPyrotechnics Which pretty much means aliens, right? I mean if it's something that US government can't buy.
You think aliens buzzing the fleet are more likely than some pilots making mistakes and some dodgy radar returns.
Would you deny that?

2018-06-27T17:37:14+00:00

https://twitter.com/_/status/1012027085731217409

@PostDisclosure @AnunnakiAwake How have you determined he did not make a mistake? Eyewitnesses mess things up all the time. Remember the Chilean Navy UFO case that Leslie Keane was all excited about? People said the same thin about military pilots there. It was a plane.

2018-06-27T17:35:23+00:00

https://twitter.com/_/status/1012026619567861760
@GazPyrotechnics @PostDisclosure How do you figure? And how are you figuring they are consistent? There's discrepancies in the accounts, and there's nothing to show the radar was pinging the same thing Fravor saw, or what the far distant object was in the FLIR video. Could all have been different.

2018-06-27T17:23:56+00:00
https://twitter.com/_/status/1012023736860471296
@PostDisclosure @AnunnakiAwake Your near-deification of Fravor might be a problem here. Everyone makes mistakes.

Why has he never drawn a picture of what he saw? Why has nobody drawn a picture?

2018-06-27T17:21:12+00:00
https://twitter.com/_/status/1012023052119359488
While we can educate people to investigate the claims of viral videos more carefully, we are clearly not going to educate everyone at once, or even soon. Other technological measures need to be put in place by social media providers to fight the rise of dangerous fake news.
https://twitter.com/DisinfoEU/status/1011994607637401601

2018-06-27T17:15:33+00:00
https://twitter.com/_/status/1012021630887837696
@GazPyrotechnics @PostDisclosure Not defective, just subject to to occasional faulty returns, like all radar is. Clutter, wave reflections, and target disambiguation are all ongoing issues for shipborne radar.
And statistically speaking, rare coincidences occasionally happen.

2018-06-27T17:05:54+00:00
https://twitter.com/_/status/1012019202591297536
@GazPyrotechnics @PostDisclosure I'm not suggesting that. I'm suggesting it's less likely than human error and equipment problems.

2018-06-27T17:05:03+00:00
https://twitter.com/_/status/1012018988635717632
@PostDisclosure You are conflating two different things. There's zero evidence that the FLIR video is of the same thing that the pilots saw. You can't see it visually at that distance with a 1Â° FOV on the FLIR

2018-06-27T17:03:37+00:00
https://twitter.com/_/status/1012018626717614081
@PostDisclosure @GazPyrotechnics But you think it's more likely it was ALIEN TECHNOLOGY than some mistakes? Rank these:
A) Mistakes and equipment problems
B) Advanced physics defying human technology
C) Advanced physics defying alien technology.
I'd say A > B > C

2018-06-27T16:50:11+00:00

@PostDisclosure @AnunnakiAwake Pics?

2018-06-27T16:06:59+00:00
https://twitter.com/_/status/1012004373667274752
@PostDisclosure @AnunnakiAwake Did they see the same thing? Why did they never, in the years since, draw a picture of what they saw? Verbal account of "a tic-tac" are easy to match with no actual context. Half the planes I see in the sky look like tic-tacs at some point.

2018-06-27T16:02:55+00:00
https://twitter.com/_/status/1012003349296631809
@aquajane50 @UFOvet @Aviation_Intel What do you mean by the "the totality of the evidence?" TTSA evidence? Certainly not proof of some advanced technology. Can't say exactly what the videos and events were, but there are several mundane possibilities that cannot be ruled out unless you feel pilots are infallible.

2018-06-27T02:17:11+00:00
https://twitter.com/_/status/1011795546300805121
@JasonColavito I should probably read it then :)

2018-06-27T01:11:52+00:00
https://twitter.com/_/status/1011779111688130560
@JasonColavito True, also they didn't actually get the money.
I think your article is great, I was especially interested in the historical part, scientology, and science fiction.
I'm also not a fan of philosophical waffling. For me skepticism is about science, not semantics.

2018-06-27T00:54:53+00:00
https://twitter.com/_/status/1011774836148875265
@JasonColavito Sure, and I find both things very interesting, just not particularly important.

There's lots of graft on a much large scale, and DeLonge's dubious fundraising is arguable no worse than many Indigogo campaigns/scams like the Skarp Laser Razor. https://www.kickstarter.com/projects/skarp/the-skarp-laser-razor-21st-century-shaving?ref=category_newest

---

2018-06-26T22:10:27+00:00

https://twitter.com/_/status/1011733454025736192

@JasonColavito I think a lot of skeptics consider investigating UFO's as fruitless "Bigfoot skepticism". Even when there's real public money involved, it's perhaps hard for them to care from a skeptical perspective. And from a political perspective it's just a minor bit of pork.

2018-06-26T21:58:48+00:00

https://twitter.com/_/status/1011730522332991488

An excellent summary of the current state of affairs with Bigelow Aerospace and Tom DeLonge's UFO "investigations". They have apparently gone "full paranormal." https://twitter.com/JasonColavito/status/1011587834610843648

2018-06-26T17:12:33+00:00

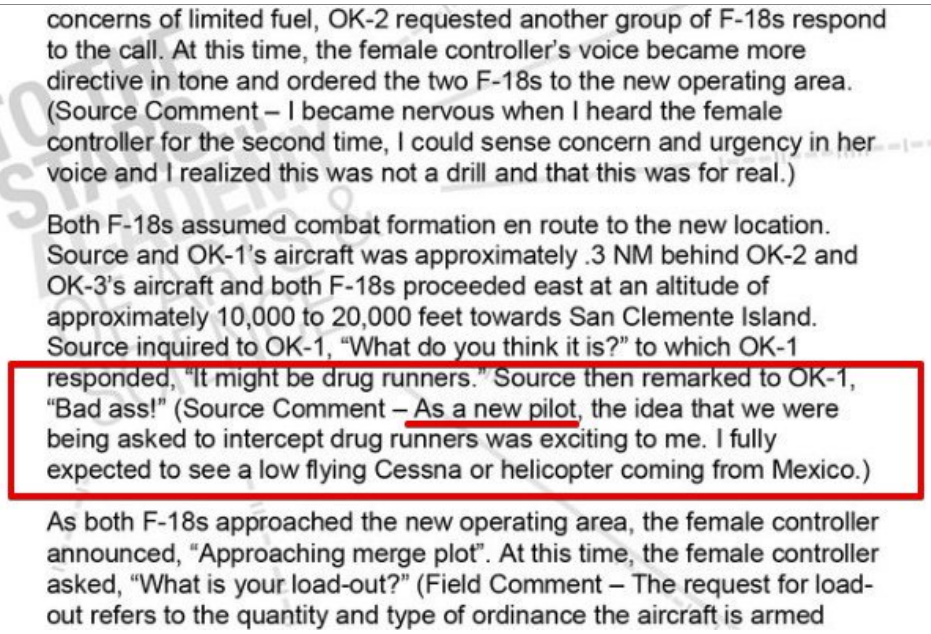
@__dregs__ @JeremyCorbell @paulsanderson @gigathought @SvenKolbow @Joshphi23040839 @devgru1980mi @PostDisclosure It's hard to know if they saw the same thing. Did they given independent accounts before they discussed it with each other? How soon after the incident did they each write down what they saw? What happened before that? What do those account say that differs?

2018-06-23T05:15:06+00:00
https://twitter.com/_/status/1010390770807762944
@__dregs__ @JeremyCorbell @paulsanderson @gigathought @SvenKolbow @Joshphi23040839 @devgru1980mi @PostDisclosure I'm referring to the excitable "source"
http://pbs.twimg.com/media/DgWhC-nVAAApJp6.jpg



concerns of limited fuel, OK-2 requested another group of F-18s respond to the call. At this time, the female controller's voice became more directive in tone and ordered the two F-18s to the new operating area. (Source Comment – I became nervous when I heard the female controller for the second time, I could sense concern and urgency in her voice and I realized this was not a drill and that this was for real.)

Both F-18s assumed combat formation en route to the new location. Source and OK-1's aircraft was approximately .3 NM behind OK-2 and OK-3's aircraft and both F-18s proceeded east at an altitude of approximately 10,000 to 20,000 feet towards San Clemente Island. Source inquired to OK-1, "What do you think it is?" to which OK-1 responded, "It might be drug runners." Source then remarked to OK-1, "Bad ass!" (Source Comment – As a new pilot, the idea that we were being asked to intercept drug runners was exciting to me. I fully expected to see a low flying Cessna or helicopter coming from Mexico.)

As both F-18s approached the new operating area, the female controller announced, "Approaching merge plot". At this time, the female controller asked, "What is your load-out?" (Field Comment – The request for load-out refers to the quantity and type of ordinance the aircraft is armed

2018-06-22T04:28:55+00:00

https://twitter.com/_/status/1010016760249049094

@PostDisclosure That's rather subjective. If UFO's are proven then we'd have vastly more interesting things to talk about.

2018-06-22T04:27:47+00:00

https://twitter.com/_/status/1010016476927889408

@devgru1980mi @paulsanderson @PostDisclosure More witnesses is always good. Especially if they independently give the same story. It's also good if elements of their story can be verified.

2018-06-22T04:25:56+00:00

https://twitter.com/_/status/1010016007845367808

@PostDisclosure New evidence arriving does not mean that the old evidence was good evidence. If my calculations were wrong then I'd admit that. If my conclusions were wrong because of incomplete information then I'd admit that. I'm all about the facts.

2018-06-22T04:23:11+00:00

https://twitter.com/_/status/1010015316229816320

@PostDisclosure It's a rhetorical question. What am I going to do, deny irrefutable evidence? I always admit when I am wrong - it's part of the debunker code. Nothing better than debunking yourself.

2018-06-22T04:20:42+00:00

https://twitter.com/_/status/1010014690385072130

@devgru1980mi @paulsanderson @gigathought @SvenKolbow @Joshphi23040839 @JeremyCorbell @__dregs__ @PostDisclosure Why would he say something new now? Has he

just remembered something?

2018-06-22T04:19:46+00:00

https://twitter.com/_/status/1010014459618721793

@PostDisclosure What exactly could possibly demonstrate to you that you were wrong? Say if the Nimitz video was 100% shown to be a plane? GO-FAST was a ballon, and GIMBAL a plane and glare. Then what? What would it take?

2018-06-22T04:16:20+00:00

https://twitter.com/_/status/1010013595122274304

@paulsanderson @gigathought @SvenKolbow @Joshphi23040839 @JeremyCorbell @__dregs__ @devgru1980mi @PostDisclosure Well given the lack of interest show in them over most of that time, it still sounds like they thought it was clutter.

2018-06-22T04:15:00+00:00

https://twitter.com/_/status/1010013258646880260

@PostDisclosure And there's always going to be UFOs, simply because it's impossible to conclusively identify everything. The existence of exotic technologies or alien is not falsifiable. Their non-existence IS falsifiable (i.e. you can't prove something doesn't exists, but you can prove it does.

2018-06-22T04:11:22+00:00

https://twitter.com/_/status/1010012343768477696

@PostDisclosure Most skeptics/debunkers are SF nerds. We'd LOVE to see unequivocal evident of exotic technologies â especially if of extraterrestrial origin! It would be awesome!

2018-06-22T02:09:05+00:00

https://twitter.com/_/status/1009981570596237312

@JeremyCorbell @FreemanStahl @SvenKolbow @__dregs__ @PostDisclosure @gigathought @Joshphi23040839 @devgru1980mi They WOULD be. If only someone could spot one, and get a good photo or video.

2018-06-21T23:20:13+00:00

https://twitter.com/_/status/1009939074226851841

@FreemanStahl @SvenKolbow @JeremyCorbell @__dregs__ @PostDisclosure @gigathought @Joshphi23040839 @devgru1980mi I always doubt the government - who doesn't? But the government isn't actually saying anything here.

2018-06-21T21:19:46+00:00

https://twitter.com/_/status/1009908762243575808

@FreemanStahl @SvenKolbow @JeremyCorbell @__dregs__ @PostDisclosure @gigathought @Joshphi23040839 @devgru1980mi Doubt that the program found anything. That's why it was shut down, and nobody seems really interested in the UFO story.
Either that, or there's a conspiracy to cover it. Because genuine UFOs would be the most interesting thing in the world.

2018-06-21T21:16:34+00:00

https://twitter.com/_/status/1009907956995874816

@SvenKolbow @FreemanStahl @JeremyCorbell @__dregs__ @PostDisclosure @gigathought @Joshphi23040839 @devgru1980mi Well lots of people in the military seem to doubt it.

2018-06-21T18:31:49+00:00

https://twitter.com/_/status/1009866495537524736

@JeremyCorbell @__dregs__ @PostDisclosure @gigathought @SvenKolbow @Joshphi23040839 @devgru1980mi Ask him to draw some pictures of what he saw.

2018-06-21T17:09:35+00:00

https://twitter.com/_/status/1009845798476046336

@weatherwarsinfo @whytheliesuk Just photos?

2018-06-21T17:09:14+00:00

https://twitter.com/_/status/1009845714325630978

@weatherwarsinfo @whytheliesuk I mean can you demonstrate that by showing the ADS-B tracks of the planes in 3D, from multiple angles, and with the timelapse.
Just looking and confirming your beliefs to yourself is not helping get your message out.

And I have several cameras.

2018-06-21T17:07:02+00:00

https://twitter.com/_/status/1009845157003268096

@__dregs__ @PostDisclosure @gigathought @SvenKolbow @Joshphi23040839 @JeremyCorbell @devgru1980mi Both seem plausible. Also he might simply be exaggerating, or misremembering. he says he saw a flying saucer, not a caplet.

2018-06-21T17:00:31+00:00

https://twitter.com/_/status/1009843519706394625

@weatherwarsinfo @whytheliesuk Timelapse would also be highly illustrative of what is happening.

2018-06-21T16:59:52+00:00

https://twitter.com/_/status/1009843354597593089

@weatherwarsinfo @whytheliesuk Can you demonstrate this?

2018-06-21T16:56:21+00:00

https://twitter.com/_/status/1009842468617981952

@Joshphi23040839 @PostDisclosure @gigathought @SvenKolbow @JeremyCorbell @__dregs__ @devgru1980mi Not without evidence I don't.

2018-06-21T16:55:52+00:00

https://twitter.com/_/status/1009842347796905984

@weatherwarsinfo @whytheliesuk You should download the tracks of those planes from FlightAware and plot them in Google Earth. See if they are actually anywhere near each other.

2018-06-21T16:49:59+00:00

https://twitter.com/_/status/1009840868826611718

@PostDisclosure @gigathought @SvenKolbow @Joshphi23040839 @JeremyCorbell @__dregs__ @devgru1980mi Of maybe it was just radar clutter.

Radar clutter and rare disorientation.

vs.

Decades-long conspiracy to cover up joy-riding aliens buzzing the military and the public with physics defying-craft, and no photos or videos clearer than a blob.

Which seems the most probable?

2018-06-21T16:43:23+00:00

https://twitter.com/_/status/1009839205868945408

@SvenKolbow @gigathought @StephenVerona20 @Joshphi23040839 @JeremyCorbell @__dregs__ @devgru1980mi @PostDisclosure And yet apparently not - as most of the crew just joked about it. They saw these odd radar returns for days.

2018-06-21T16:37:19+00:00

https://twitter.com/_/status/1009837680824238080

@vernon911truth @hoaxeye @Metabunk Where does it show this? It's obvious from looking at the penthouses that the core of WTC7 failed from east to west over several seconds.

2018-06-21T16:36:17+00:00

https://twitter.com/_/status/1009837419426820096

@gigathought @SvenKolbow @StephenVerona20 @Joshphi23040839 @JeremyCorbell @__dregs__ @devgru1980mi @PostDisclosure "around 100" strongly suggests he was looking at radar clutter or birds. 100 high tech craft flying around would be a rather significant event.,

2018-06-20T15:41:17+00:00
https://twitter.com/_/status/1009461192870453248
@devgru1980mi @PostDisclosure @mesolithicguy Navy radar (and radar operators) also makes mistakes, sometimes quite serious mistakes. For example:
https://www.stripes.com/fitzgerald-collision-hearing-brings-ship-s-ongoing-radar-problems-into-focus-1.526518 http://pbs.twimg.com/media/DgJTle_U8AANFY6.jpg

> Rear Adm. Brian Fort, who conducted a Navy investigation of the crash, testified for the prosecution that the SPS 67 radar in the CIC was set to the wrong pulse, which added what is known as clutter, or fuzziness, to the picture. He said that through his interviews with dozens of sailors on the Fitzgerald that night, the CIC had learned to live with it.
>
> "Quite frankly, they accepted the clutter on the radar and did absolutely nothing about it," he said in testimony by telephone.
>
> Defense witnesses testified that the pulse setting was controlled in a separate room by engineers, and that those in the CIC would not have known it was on the wrong setting. Clutter is also created by weather and atmospheric conditions.
>
> Similarly, Fort said the AIS – which identifies the name and location of every ship on the system -- would frequently go down because of a loose cable, and neither Woodley nor Combs complained.

http://pbs.twimg.com/media/DgJTle_U8AANFY6.jpg
2018-06-20T15:32:50+00:00
https://twitter.com/_/status/1009459062717624321
@devgru1980mi @PostDisclosure @mesolithicguy Navy pilots also occasionally make mistakes, even much more serious ones:
https://www.wearethemighty.com/articles/that-time-a-navy-f-14-accidentally-on-purpose-shot-down-an-air-force-f-4-during-an-exercise http://pbs.twimg.com/media/DgJRh92VMAAK7Mz.jpg

---

That time a Navy F-14 accidentally-on-purpose shot down an Air Force F-4 during an exercise

Hint: U.S. Navy pilots aren't supposed to do this to U.S. Air Force pilots. (Photo: Public Domain)

There are a couple things that everyone going into a military exercise absolutely has to get right. First, get good training and look for ways to improve both personal and unit performance. Second, and perhaps more importantly, don't really shoot anyone.

Guess which thing Navy Lt. (j.g.) Timothy Dorsey, an F-14 pilot, messed up while shadowing an Air Force RF-4C Phantom over the Mediterranean on Sep. 22, 1987?

http://pbs.twimg.com/media/DgJRh92VMAAK7Mz.jpg

2018-06-20T15:27:26+00:00

https://twitter.com/_/status/1009457707659583493

@devgru1980mi @mesolithicguy @PostDisclosure I like identifying flying objects.

2018-06-20T15:26:40+00:00

https://twitter.com/_/status/1009457513715023872

@devgru1980mi @PostDisclosure @mesolithicguy Of course Navy Seals make mistakes. Everyone makes mistakes, at least occasionally. They are not gods. They can even make MAJOR mistakes. For example:

https://www.cbsnews.com/news/navy-seal-dies-after-accidentally-shooting-self/

http://pbs.twimg.com/media/DgJQK1yV4AAyn25.jpg

SAN DIEGO - Navy officials have confirmed that a Navy SEAL who accidentally shot himself in the head has died.

Navy spokesman Lt. Cmdr. Frank Magallon tells the U-T San Diego that Petty Officer 3rd Class Gene "Geno" Clayton, Jr. was taken off life support on Saturday. He is survived by his parents and three sisters.

Navy SEAL shoots self with gun believed unloaded

San Diego police were called on Thursday after the accident. Police say Clayton had gone to a bar and brought a woman back to his apartment and was showing her guns when he put a pistol to his head, believing it was unloaded, and pulled the trigger.

http://pbs.twimg.com/media/DgJQK1yV4AAyn25.jpg

2018-06-20T15:14:41+00:00

https://twitter.com/_/status/1009454498471862272

@devgru1980mi @mesolithicguy @PostDisclosure "a new pilot" (and an excited one at that) New pilots make more mistakes than old pilots. But they both CAN make mistakes.

http://pbs.twimg.com/media/DgJNV6DVQAQnkAK.jpg

---

concerns of limited fuel, OK-2 requested another group of F-18s respond to the call. At this time, the female controller's voice became more directive in tone and ordered the two F-18s to the new operating area. (Source Comment – I became nervous when I heard the female controller for the second time, I could sense concern and urgency in her voice and I realized this was not a drill and that this was for real.)

Both F-18s assumed combat formation en route to the new location. Source and OK-1's aircraft was approximately .3 NM behind OK-2 and OK-3's aircraft and both F-18s proceeded east at an altitude of approximately 10,000 to 20,000 feet towards San Clemente Island. Source inquired to OK-1, "What do you think it is?" to which OK-1 responded, "It might be drug runners." Source then remarked to OK-1, "Bad ass!" (Source Comment – As a new pilot, the idea that we were being asked to intercept drug runners was exciting to me. I fully expected to see a low flying Cessna or helicopter coming from Mexico.)

As both F-18s approached the new operating area, the female controller announced, "Approaching merge plot". At this time, the female controller asked, "What is your load-out?" (Field Comment – The request for load-out refers to the quantity and type of ordinance the aircraft is armed

http://pbs.twimg.com/media/DgJNV6DVQAQnkAK.jpg

2018-06-20T15:11:13+00:00

https://twitter.com/_/status/1009453624819240960

@PostDisclosure @mesolithicguy @devgru1980mi I see dots in the sky literally EVERY DAY that I can't immediately identify with certainty (and sometimes I never identify them). There's always something just beyond the limit of your senses, augmented or otherwise.

2018-06-20T15:08:17+00:00

https://twitter.com/_/status/1009452885745139712

@PostDisclosure @mesolithicguy @devgru1980mi And how do you know how much experience they had? Here's a paraphrasing of the account of one source. Is this inaccurate at all? (via: https://coi.tothestarsacademy.com/nimitz-report/)

http://pbs.twimg.com/media/DgJMAPVU0AIvmWe.jpg

So breaking that down, firstly he's nervous because it's "not a drill", then he's excited because he thinks it drug runners, then he's frightened because he thinks it's a 9/11 attack and he's going to have to ram an airline with his plane, then he thinks there a plane just crashed, and then literally two seconds later thinks that it's a missile test, and is worried that he will die because he won't be able to shoot it down, then he thinks he sees something moving so rapidly that he'd not have a chance, so he's scared of that. Then he loses sight of it, and when he gets back to the ship he's angry that nobody is taking him seriously, and thinks he may have been deliberately sent into the path of a US missile test and now everyone is making fun of him. After three different UFO theme films have been played, which he and his friends sees as mocking, they go into the ready room, slam the door shut, one of them makes a copy of of the video, and "Source" write a letter to his Aunt.

http://pbs.twimg.com/media/DgJMAPVU0AIvmWe.jpg
2018-06-20T15:06:07+00:00
https://twitter.com/_/status/1009452339692908544
@PostDisclosure @mesolithicguy @devgru1980mi Why do they train all the time if they never make mistakes?

2018-06-20T15:03:06+00:00
https://twitter.com/_/status/1009451581991866368
@devgru1980mi @mesolithicguy @PostDisclosure Yes I'm serious. Are you?

2018-06-20T15:00:50+00:00
https://twitter.com/_/status/1009451010249707520
@vernon911truth @hoaxeye @Metabunk Well I'm looking forward to it because it will confirm that the outer columns did not need to be destroyed with explosives in order to see the collapse we observed. Szamboti has already stated as much.

2018-06-20T14:59:07+00:00
https://twitter.com/_/status/1009450579414769664
@mesolithicguy @devgru1980mi @PostDisclosure And if they were "he most well trained pilots on the planet" then why were they on a training mission? Surely training means they are still learning things, still making mistakes (that's why they only had dummy missiles on the jets, in case they fired them by accident)

2018-06-20T14:56:21+00:00
https://twitter.com/_/status/1009449884049551361
@mesolithicguy @devgru1980mi @PostDisclosure I think it's more like: weather conditions were causing anomalous returns, some jets went out to see if there was anything there. They latched onto a few different unrelated things, from fish shoals to seagulls and distant planes, but ultimately nothing concrete was discovered.

2018-06-19T22:43:09+00:00
https://twitter.com/_/status/1009204967712776192
@wanderinganimal @Oswald1160 @mikejacobsen99 @naomirwolf So why have they been described in books since the 1940s?
Think about it, if all the books were describing things that you never saw, then why didn't people notice all the books were wrong?

2018-06-19T22:38:11+00:00
https://twitter.com/_/status/1009203717801848832
@webbery Cool.

2018-06-19T22:11:27+00:00
https://twitter.com/_/status/1009196992856092672
@wanderinganimal @Oswald1160 @mikejacobsen99 @naomirwolf Sometimes there are clouds in some regions of the sky, but not in others.
Sometimes contrails form in some regions of the sky but not in others.
Same thing.

2018-06-19T22:06:17+00:00

https://twitter.com/_/status/1009195692609302528

@webbery Why is this still on your site?

2018-06-19T14:03:37+00:00

https://twitter.com/_/status/1009074225284505600

@devgru1980mi @PostDisclosure No that would be incredibly significant, if true.

2018-06-19T13:59:00+00:00

https://twitter.com/_/status/1009073064686936064

@devgru1980mi @PostDisclosure No, I've read about the nuke thing before. Didn't look interesting. No real evidence, just some recollections, tales, and possible coincidences.

2018-06-19T13:57:35+00:00

https://twitter.com/_/status/1009072705667125258

@devgru1980mi @PostDisclosure And what are you basing this on? None of the witnesses say there were fire orders. Nobody said it was assessed as a threat. Trevor says his supervisors ignored it. Sound to me like they though it was radar glitches.

2018-06-19T13:50:49+00:00

https://twitter.com/_/status/1009071002410672128

@devgru1980mi @PostDisclosure What? Why would they fire on something if they did not know what it was?

2018-06-19T13:50:05+00:00

https://twitter.com/_/status/1009070818326790144

@devgru1980mi @PostDisclosure No, I'm not willing to do that.

2018-06-19T13:46:36+00:00

https://twitter.com/_/status/1009069940538654720

@devgru1980mi @PostDisclosure Surely actual evidence, like multiple HD videos of the same event, would be the best tool?

2018-06-19T13:44:50+00:00

https://twitter.com/_/status/1009069496374419457

@PostDisclosure @devgru1980mi I'd expect them to go battle stations, scramble everything they've got, alert the President, prep the nukes.
Good grief, if they though it WASN'T just a glitch, that's an incredibly serious event. At the very least it's foreign aircraft of stunningly new capabilities

---

2018-06-19T13:40:54+00:00

https://twitter.com/_/status/1009068509320474624

@devgru1980mi @PostDisclosure Not at all, one just needs to consider that witnesses make mistakes. So it's always a probability.

2018-06-19T13:39:47+00:00

https://twitter.com/_/status/1009068228176297984

@PostDisclosure @devgru1980mi "Mimic" is perhaps a poor choice of word :)

2018-06-19T13:38:43+00:00

https://twitter.com/_/status/1009067956590952448
@PostDisclosure @devgru1980mi He said "[my supervisors] said, okay, it's no big deal" and "they basically ignored it".
Does that sound like they thought there was an actual craft teleporting from spot to spot?
https://www.youtube.com/watch?v=-VWVzaww1eU&feature=youtu.be&t=5m40s

---

2018-06-19T13:35:10+00:00
https://twitter.com/_/status/1009067065913700352
@devgru1980mi @PostDisclosure Things "might" anything. I don't hate witnesses, however it's well known that witnesses stories vary greatly. It's also well known that memories change over time. One should not ignore these facts.

2018-06-19T13:33:07+00:00
https://twitter.com/_/status/1009066550278549504
@PostDisclosure @devgru1980mi You'd think Trevor would at least have sketched some diagrams of what he saw. Verbal descriptions are open to misinterpretation.
However his account of radar blips does sound like fairly banal glitches. His supervisors were unconcerned.

2018-06-19T13:30:17+00:00
https://twitter.com/_/status/1009065837766967297
@devgru1980mi @PostDisclosure Delete the word "alien" then - physics defying is the key thing.

2018-06-19T13:29:19+00:00
https://twitter.com/_/status/1009065591909388288
@PostDisclosure @devgru1980mi Which tweet?

2018-06-19T13:28:39+00:00
https://twitter.com/_/status/1009065423092871169
@devgru1980mi @PostDisclosure Yes I'm serious. One guys says it's a caplet shape, the other says it's a saucer shape. What does this difference suggest to you?

2018-06-19T13:26:51+00:00
https://twitter.com/_/status/1009064974075871232
@vernon911truth @hoaxeye @Metabunk I look forward to examining the results of the Hulsey study.

https://twitter.com/_/status/1009064574467784704
@devgru1980mi @PostDisclosure Why would two witnesses reporting DIFFERENT THINGS make the event more credible? Surely that simply illustrates the problems with eyewitness observations and memories.

2018-06-19T13:23:40+00:00
https://twitter.com/_/status/1009064171168624640
@PostDisclosure @devgru1980mi Really? Like what? Requiring that humans are fallible?

2018-06-19T13:23:12+00:00

https://twitter.com/_/status/1009064052172046336

@PostDisclosure @devgru1980mi I think it's fascinating that you consider mistaken interpretations to be a huge reach, but physics-defying alien spacecraft to be less of a reach. It's like saying the simplest explanation for Criss Angels' tricks is that he's using actual magic instead of difficult illusions.

2018-06-19T13:20:17+00:00

https://twitter.com/_/status/1009063318542139392

@devgru1980mi @PostDisclosure "Fake" is always somewhere on the list of possibilities, depending on what the footage looks like. However "mistaken interpretation" is generally at the top. "Advanced technology, maybe aliens" is generally at the bottom, as it requires so much.

2018-06-19T12:44:15+00:00

https://twitter.com/_/status/1009054251056680961

@vernon911truth @hoaxeye @Metabunk What if it was just a few tons of resistance? Would there be a visible difference? If it's normally a few hundred tons, then a few tons is just 1%.

2018-06-19T05:32:31+00:00

https://twitter.com/_/status/1008945600040132608

@wanderinganimal @naomirwolf @mikejacobsen99 Modern high bypass engines make more contrails that older engines, as they have cooler exhaust.

Water in exhaust gases are what makes contrails. Burn hydrocarbons (HxCy) and you get CO2 and H20. Regardless of engine type.

Even burning pure hydrogen (H2) would make contrails

2018-06-19T04:50:34+00:00

https://twitter.com/_/status/1008935045963268096

@ikingjosh All paint?

2018-06-18T17:32:40+00:00

https://twitter.com/_/status/1008764444510339073

@mikejacobsen99 @naomirwolf Both false. Water injection was first investigated in the 1930s, and not used until the 1940s (then still experimentally). High bypass engines actually make MORE contrails that low bypass, as the exhaust (otherwise identical) is cooler.

https://www.snowperformance.eu/en/water-injection/boost-cooler-history

---

2018-06-18T16:02:06+00:00

https://twitter.com/_/status/1008741653182418944

@mikejacobsen99 @naomirwolf What's misleading there is the idea that they "persist and form

cloud cover now". They have ALWAYS done this. The very first observations of contrails in the 1920 describe this. It's not new. It's certainly an issue, but not a new one.
http://pbs.twimg.com/media/Df_FIugVMAAOU2P.jpg

Cloud Formation by Supercharged Plane

An altitude flight was made in the morning at McCook Field, recently, by Lieut. J. A. Macready in a LePere with supercharged Liberty. When the airplane reached a height of 26–27,000 feet at 11.50 a. m., a long feathery white streamer was observed forming behind a rapidly moving dark speck. The cloud was of the cirrus variety, well defined at its edges and apparently ten to fifteen times the width of the plane. The sky behind the first portion was clear blue with no other clouds in the near neighborhood. The first streamer seemed perhaps two miles long. Then a gap of one-quarter mile. The second streamer formed with a background of light cirrus cloud and after two or three miles the plane seemed to go into the cirrus background for the streamer formation ceased while an apparent path of blue continued beyond for a way in the cirrus cloud. The whole streamer may have been three miles long. After twenty minutes the streamer had drifted and spread until it merged indistinguishably with the other cirrus clouds visible. The weather conditions at the time were generally very clear, warm, with perhaps 0.1 of the sky in cirrus clouds.

The observer reported as having observed nothing unusual; occasionally the motor would give a burst of black exhaust gas. The pilot thought he remembered having passed through a stratum that felt damp. Clouds at this altitude are necessarily ice crystals, or needles, and it is difficult to determine the cause of the cloud formation under consideration. Possible contributing causes are: Water in exhaust; dust and carbon particles in exhaust serving as cloud nuclei; convective currents due to disturbance caused by passage of plane. Conditions of humidity were undoubtedly ideal for the formation of cloud at that altitude.

@MarcMcD @SkepticsGuide @SkepticalDDS @gorskon @crackedscience @skepticpedi @NECSS @PrismPodcast @FinchLydia @MrMMarsh @QEDcon At the last two CSICons Richard Dawkins arrived at the Saturday party with an entourage of friends, then he spend a good chunk of the time wandering around by himself. He was quite happy to chat, but people seemed afraid of him.
Fostering social interaction is tricky and varies.

2018-06-08T16:40:22+00:00
https://twitter.com/_/status/1005127404631699456
@FinchLydia @SkepticalDDS @MarcMcD @SkepticsGuide @gorskon @crackedscience @skepticpedi @NECSS @PrismPodcast @MrMMarsh @QEDcon I doubt there's more than 20% - especially at large conferences. CSICon had problems with a small bar. But even back at TAM with that lounge area. Compare that with the audience at a keynote.
I think this calls for a scientific study. :)

2018-06-08T16:14:22+00:00
https://twitter.com/_/status/1005120862012375040
@SkepticalDDS @MarcMcD @SkepticsGuide @gorskon @crackedscience @skepticpedi @NECSS @PrismPodcast @FinchLydia @MrMMarsh @QEDcon Why do so many attendees "retreat" in the evening. You can't fit the entire convention in the bar.

2018-06-08T16:12:05+00:00
https://twitter.com/_/status/1005120288055427072
@MarcMcD @SkepticsGuide @SkepticalDDS @gorskon @crackedscience @skepticpedi @NECSS @PrismPodcast @FinchLydia @MrMMarsh @QEDcon Ideally yes - but unfortunately the "celebs" are celebs because they work a lot and have lots of connections, and so are often either very busy or are catching up with their vast existing social network. That said I've always had nice chats with people I've approached.

2018-06-08T16:04:25+00:00
https://twitter.com/_/status/1005118356591075328
@MarcMcD @SkepticsGuide @SkepticalDDS @gorskon @crackedscience @skepticpedi @NECSS @PrismPodcast @FinchLydia @MrMMarsh @QEDcon I think a good chunk of the perceived "standoffishness" is simply that people tend to socialize largely with people they know at conferences. This is true both for "celebs" and everyone else. There's lonely chaps wondering around, benign cliques, and normal social interactions.

2018-06-08T04:02:30+00:00
https://twitter.com/_/status/1004936682523656192
@DewellConsult Contrails do not (always) evaporate because A) they freeze and B) the ambient

humidity is high enough to support the existence of an ice cloud (and generally high for that cloud to grow).

2018-06-08T04:01:18+00:00

https://twitter.com/_/status/1004936381968183296

@DewellConsult Your breath evaporates because A) it does not freeze, and B) the ambient temperature and humidity are too low to support the existence of a cloud. Initial mixing creates favorable conditions so a (liquid water) cloud forms. Continued mixing results in dryer air, so it evaporates.

2018-06-08T03:54:11+00:00

https://twitter.com/_/status/1004934588521594882

@DewellConsult It does at -40 and >100 RHI, any book on clouds confirms this. Heck CLOUDS confirm this. Clouds grow and spread in sunlight. Cirrus clouds are ice.

2018-06-07T22:47:09+00:00

https://twitter.com/_/status/1004857322894585857

@tonesofhome26 @miketmbt It's not about changing minds. It's about sharing information. I hope I've at least told you about some things that you did not know before. Increasing knowledge is generally a good thing.

2018-06-07T22:32:04+00:00

https://twitter.com/_/status/1004853525300445185

@tonesofhome26 @miketmbt So why do you think that contrails should not persist?

2018-06-07T22:31:28+00:00

https://twitter.com/_/status/1004853374888468480

@tonesofhome26 @miketmbt You have hundred of photos of contrails. Look here, there's hundreds of photos of contrails from before 1955:
https://www.metabunk.org/pre-1995-persistent-contrail-archive.t487/

2018-06-07T22:29:37+00:00

https://twitter.com/_/status/1004852910637789184

@tonesofhome26 @miketmbt You also see them in old TV shows, like The Rat Patrol, 1959 @22:25

https://twitter.com/_/status/1004400317776056320
@tonesofhome26 How do you know what a "chemtrail" looks like? How do you know you've not just been looking at a variety of contrails all along. Because everything you've showed my so far looks like some form of contrail.

2018-06-06T16:11:47+00:00
https://twitter.com/_/status/1004395434759086081
@miketmbt @tonesofhome26 Thousands of tons. Most of the moisture in a spreading contrail comes from the atmosphere, not the exhaust. The moisture added by the exhaust just tips the local humidity over 100% letting a cloud start to grow. Contrails are a type of cloud.

2018-06-06T16:09:12+00:00
https://twitter.com/_/status/1004394786734784512
@IncoherentTweet @intellihubnews @Metabunk @infowars Sure, but he's not doing his podcast just for you.

https://twitter.com/_/status/1004394505066274816
@tonesofhome26 This is an aerodynamic contrail, not an exhaust contrail. Different things, and different formation conditions. How does it differ from this?
https://www.youtube.com/watch?v=ViKYFsN3p24
http://pbs.twimg.com/media/DfBTdWnUwAAN1Jv.jpg

http://pbs.twimg.com/media/DfBTdWnUwAAN1Jv.jpg

2018-06-06T14:49:41+00:00

https://twitter.com/_/status/1004374775282610176

@adamgoldsack And renaming something does not give it more credibility. It just makes it more obscure. It's the nature of the thing itself that lacks credibility (something else I discuss in ETRH)

2018-06-06T14:48:24+00:00

https://twitter.com/_/status/1004374450844983297

@adamgoldsack Video would be a good start. Radar data that's been independently examined by radar data experts (rather than just paraphrased) would be another.

2018-06-06T14:34:15+00:00

https://twitter.com/_/status/1004370890128125953

@adamgoldsack Secret physics defying crafts made by humans is also a remote possibility for which there's no good evidence. Again, very different to Flat Earth.

2018-06-06T14:32:35+00:00

https://twitter.com/_/status/1004370471020720128

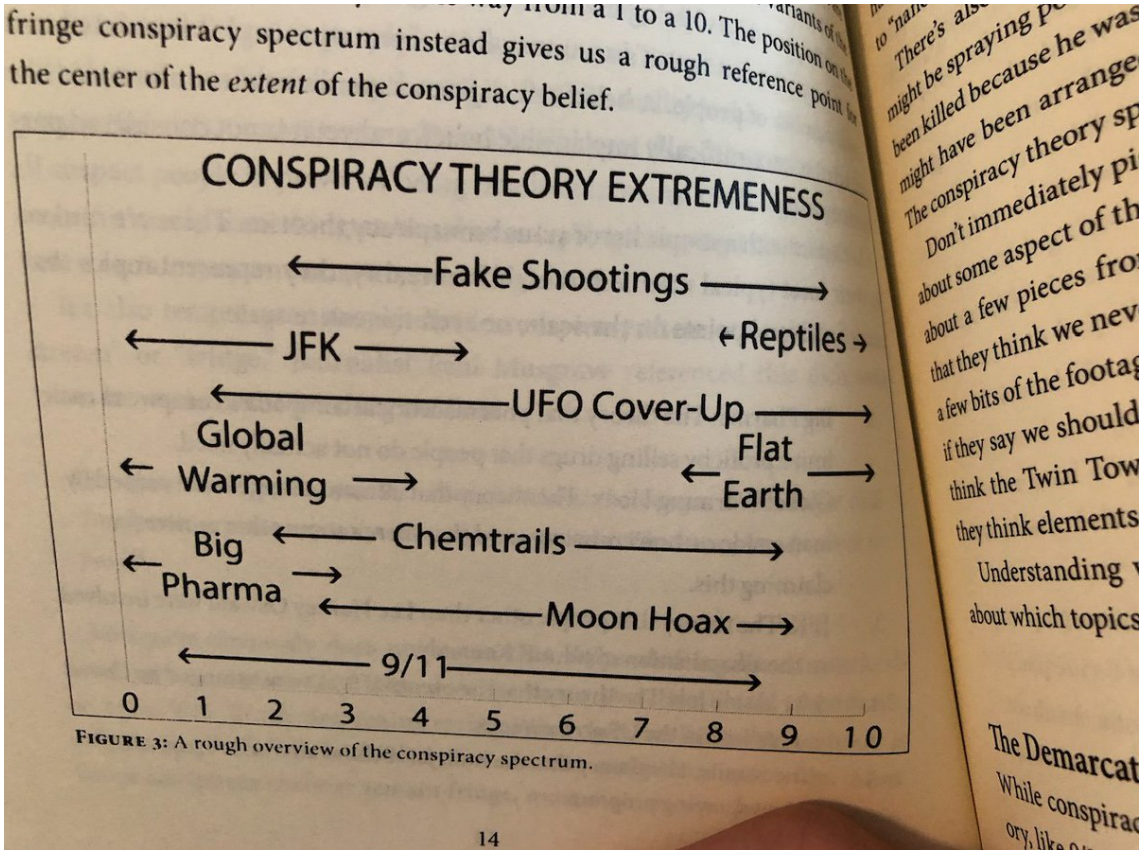
@IncoherentTweet @intellihubnews @joerogan @YouTube @Metabunk @infowars He doesn't really do debates, he does interesting discussions. But there's this one. The problem with most expert debates is they degenerate into in-speak and unexplained allusions, so have limited appeal to a general audience. https://www.youtube.com/watch?v=tFlAFo78xoQ

2018-06-06T14:27:46+00:00

https://twitter.com/_/status/1004369261622521856

@adamgoldsack In my book "Escaping the Rabbit Hole" I talk about an "extremeness" spectrum of conspiracy theories. Notice the relative ranges of UFO cover-up and Flat Earth. There's overlap at one end but I do not equate the two things. Flat Earth is EXTREME. https://amzn.to/2Jtwaz8 http://pbs.twimg.com/media/DfA8R9YUEAADwsl.jpg

---



http://pbs.twimg.com/media/DfA8R9YUEAADwsl.jpg

2018-06-06T14:20:35+00:00

https://twitter.com/_/status/1004367452287799297

@adamgoldsack I'm not sure why you are making these comparisons. Flat Earth is demonstrably wrong. Alien visitors is a remote possibility lacking good evidence. Apples and oranges.

2018-06-06T13:51:30+00:00

https://twitter.com/_/status/1004360131914502145

@adamgoldsack Apples and oranges. One is a solid hypothesis which can be disproven, the other is an amorphous hypothesis that can't even really be pinned down. What exactly IS "the unidentified aerial phenomena issue?" that you give merit to. I mean the Earth LOOKS flat from a plane. Merit?

2018-06-06T13:16:29+00:00

https://twitter.com/_/status/1004351321749614592

@adamgoldsack Well one is a binary option (either flat or round) which is provably round, and the other is lacking in solid evidence and contains some observations which violate the known laws of physics, and some which do not, with many potential explanations for both.

2018-06-06T07:10:24+00:00

https://twitter.com/_/status/1004259191748362241

@tonesofhome26 Kinda like this: https://youtu.be/ViKYFsN3p24
No spraying involved, just aerodynamics, and condensation.

2018-06-06T07:09:35+00:00

https://twitter.com/_/status/1004258988236476416

@tonesofhome26 That's a plane landing in fog at LAX.
https://www.metabunk.org/debunked-pilot-forgets-to-turn-off-chemtrails-while-landing-aerodynamic-contrail-wake-vortex.t3551/ http://pbs.twimg.com/media/De_YMUAU0AAkWJd.jpg

https://twitter.com/_/status/1004235073586020352
@tonesofhome26 Weather modification does not leave trails. It's done by small planes into existing clouds. http://pbs.twimg.com/media/De_CdZTUYAA5ZA2.jpg

http://pbs.twimg.com/media/De_CdZTUYAA5ZA2.jpg

2018-06-06T05:16:19+00:00

https://twitter.com/_/status/1004230484803514368

You can roughly calculate the radius of the Earth simply by observing how much of a distant island is obscured by the horizon from a given altitude. The math is a bit complicated, so I made a calculator. https://www.metabunk.org/radius/

http://pbs.twimg.com/media/De-95D5UYAAPf24.jpg

$$r = \frac{d^2\,h + d^2\,x - 2\sqrt{d^4\,h\,x - d^2\,h^3\,x + 2\,d^2\,h^2 - d^2\,h\,x^3}\; - h^3 + h^2\,x + h\,x^2 - x^3}{2\left(h^2 - 2\,h\,x + x^2\right)}$$

http://pbs.twimg.com/media/De-95D5UYAAPf24.jpg

2018-06-06T04:08:12+00:00

https://twitter.com/_/status/1004213342129422336

@tonesofhome26 Weather modification has never been secret.

2018-06-06T01:23:15+00:00

https://twitter.com/_/status/1004171829865472000

@char_stokely @linuxfiend Contrails are clouds that planes sometimes make.
Chemtrails are imaginary secret spraying that people sometimes mistake contrails for.

2018-06-06T01:21:55+00:00

https://twitter.com/_/status/1004171495017312257

@tonesofhome26 Why would they patent stuff if they wanted it to remain secret? Patent's don't even mean something works.

2018-06-06T00:56:17+00:00

https://twitter.com/_/status/1004165041485053952

@IronRealmMedia @YouTube All models are based on assumptions - that's why they are called models. The assumption could just be that your measurements are correct. The good thing is you can verify your assumptions, which is what I suggested they try.

2018-06-06T00:54:33+00:00

https://twitter.com/_/status/1004164607139766272

@tonesofhome26 Again, Kaku was talking about the future with geoengineering. Weather modification has been done openly since the 1950s.

2018-06-06T00:53:38+00:00

https://twitter.com/_/status/1004164377073745920

@tonesofhome26 This is a contrail. You can tell because there's a gap between the engines and the trail. So it's condensing water. This gap is sometimes shorter, but it's always there. http://pbs.twimg.com/media/De-B-G7UcAEqT33.jpg

---

http://pbs.twimg.com/media/De-B-G7UcAEqT33.jpg

2018-06-05T23:29:41+00:00

https://twitter.com/_/status/1004143248007299072

@tonesofhome26 Clouds are often at different altitudes. NASA has not lied about this. Brennan was talking about the future, not now. It MIGHT help climate change. They are not reflecting the sun off clouds yet, and hopefully will not do so in the future.

2018-06-05T23:28:05+00:00

https://twitter.com/_/status/1004142845358297088

@tonesofhome26 That photo shows a plane leaving a contrail. The article is about occasional very tiny releases of chemicals like lithium INTO SPACE. From rockets. NASA have not admitted chemtrails, in fact they find the whole thing rather annoying.

2018-06-05T21:36:15+00:00

https://twitter.com/_/status/1004114704376070144

@tonesofhome26 Contrails form when the upper air has a high relative humidity. There's a detailed explanation here, with links to resources on forecasting this humidity. And some older examples.

https://www.metabunk.org/why-were-there-contrails-today-but-not-yesterday-its-the-weather.t8003/ http://pbs.twimg.com/media/De9U8qWUcAAnd5Q.jpg

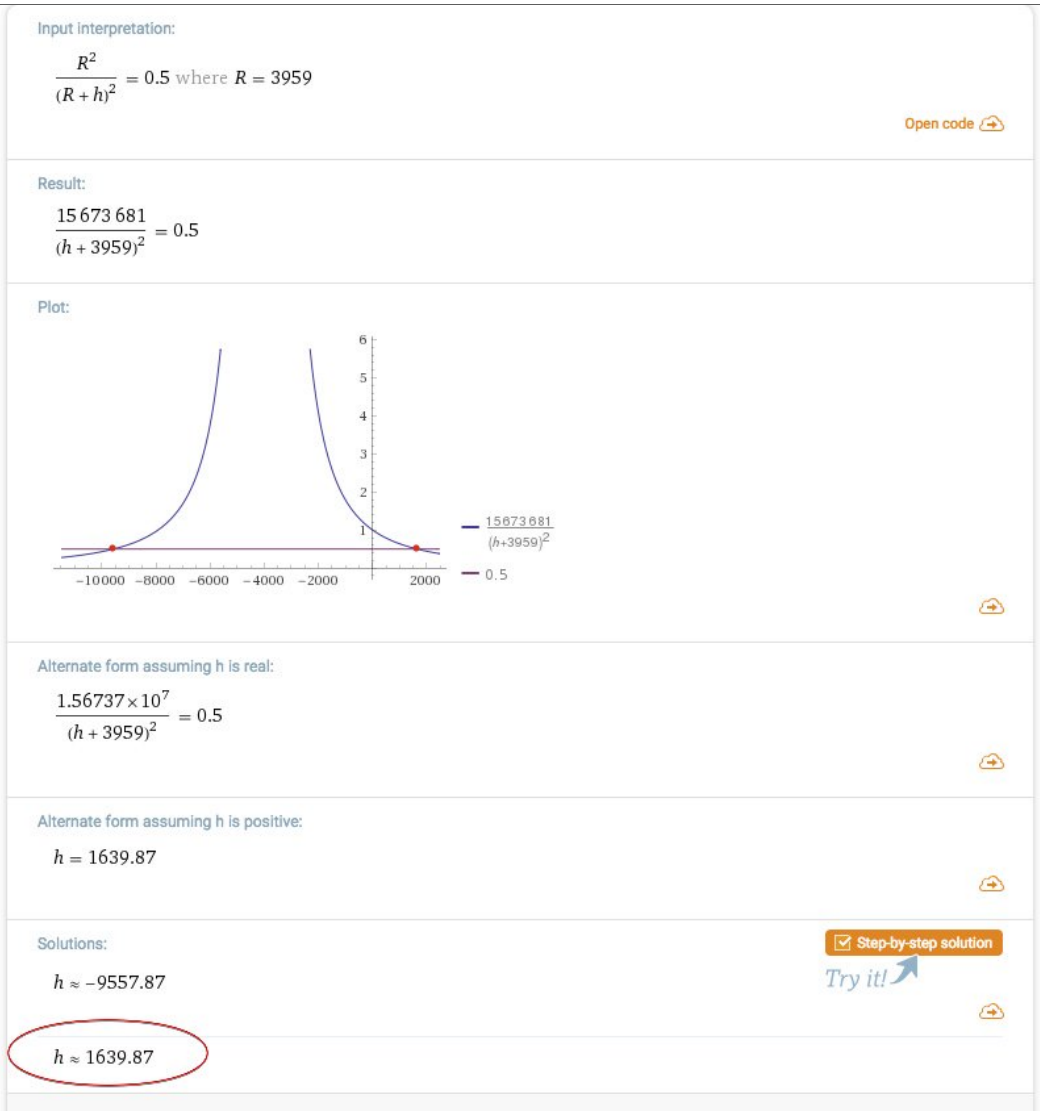
https://twitter.com/_/status/1001511906111193089

@Flat_E_Prophet So with R = 3959 miles, solve for h (use Wolfram Alpha for help)

http://www.wolframalpha.com/input/?i=solve+(R%5E2)%2F((R%2Bh)%5E2)%3D0.5+where+R%3D3959

Gives h = about 1640 miles, for your weight to be halved. Of course there's nowhere to stand, so hard to measure it. That's why we use mountains.

http://pbs.twimg.com/media/DeYVidcUQAA7srY.jpg



http://pbs.twimg.com/media/DeYVidcUQAA7srY.jpg

2018-05-29T17:09:02+00:00

https://twitter.com/_/status/1001510741726216194

@Flat_E_Prophet Your weight is inversely proportional to the square of the distance from the center of the earth. So the your weight at height h as a fraction of your surface weight is R^2/((R+h)^2) so set that equal to 1/2 and solve for h.

2018-05-29T16:49:56+00:00

https://twitter.com/_/status/1001505935112654848

@Flat_E_Prophet I've posted the chart and the link to the wikipedia article. I've also posted links of the experiment being performed, and given you a link to a cheap scale you can use to repeat the experiment.

https://twitter.com/_/status/1001505605196988416

@Flat_E_Prophet The Earth is moving at 1000 mph at the equator, but linear velocity does not create any force. When you are on a plane cruising at 500mph you feel no force. Acceleration from the rotation rate involves force, but that rate is very low one per day. A REALLY slow turn in a plane.

2018-05-29T16:44:21+00:00

https://twitter.com/_/status/1001504530108837888

@MarkSykes15 The same thing doesn't happen exactly, the ground that is ABOVE you exerts a gravitational pull, which counteracts some of the effect of getting closer to the center. The core of the planet is denser though, so you'll initially weight more. But at the middle you'd be weightless

https://twitter.com/_/status/1001501384741539840

You can test the variable nature of gravity by driving up a mountain with an accurate scale. The higher you go, the smaller the force of gravity.

https://www.metabunk.org/codys-lab-how-weight-changes-with-location-and-velocity.t8783/

2018-05-29T16:15:02+00:00

https://twitter.com/_/status/1001497151975780352

@bobbycolada73 Sure, but he still broke the law, violated the terms of his previous suspended sentence, and disrupted a trial, possibly allowing an unnecessary retrial. Hence his sentence is justified.

2018-05-29T16:12:42+00:00

https://twitter.com/_/status/1001496563053613056
@bobbycolada73 @Peter_Nater It's a long article. And in part the details are not discussed precisely because of the reporting restrictions you mentioned.
http://pbs.twimg.com/media/DeYHpYPUQAAUvUY.jpg

7. So what you're saying is that Tommy Robinson was given a suspended sentence simply for trying to report on a case? Free speech is truly dead.

No, ye of little brain. He was found to be in contempt of court and given a suspended sentence because his actions put a serious criminal trial in jeopardy. Running around a court building shouting "paedophile" at defendants during a live trial, or live-streaming defendants and members of the public – potentially including jurors – entering and exiting a court building against a tub thumping narration of "Muslim paedophile gangs", is hardly conducive to ensuring a fair trial. And if there can't be a fair trial, nobody gets justice. Not the accused, not the complainants, not the public. This is not theoretical – serious criminal trials have nearly collapsed because of the actions of people like Yaxley-Lennon.

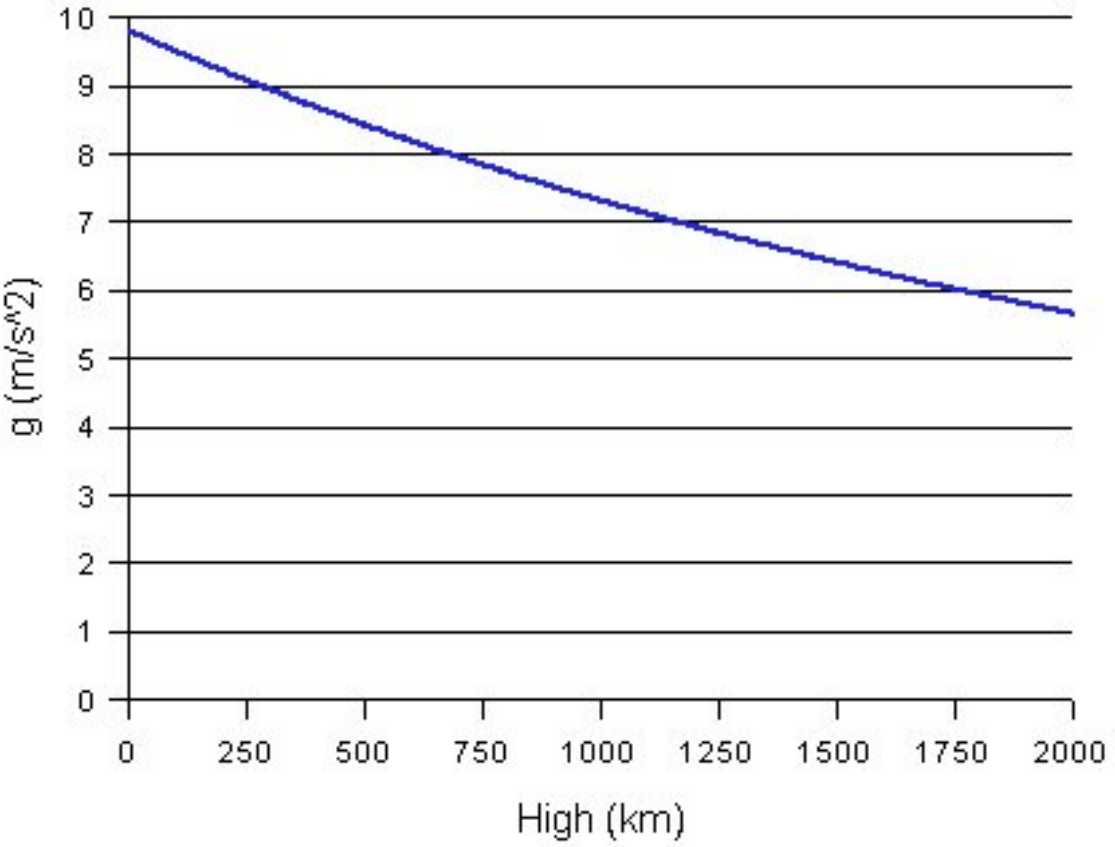
We have a quaint tradition in England and Wales that trial by media should be avoided, and that trial on evidence heard in court is the fairest way to determine a person's guilt. Therefore while criminal courts are open to the public, and it is absolutely fine to report soberly and accurately about ongoing criminal trials, anything which might prejudice or intimidate the jury is strictly forbidden. And this makes sense. It would be a nonsense, for example, to have strict laws preventing individuals from walking up to a juror to say, "The defendant you are trying is plainly a dirty paedophile", but to allow broadcasters or tabloid columnists to trumpet that message to jurors through the media. Self-defined "free-speech advocates" – particularly a number on the other side of the Atlantic – have difficulty understanding this, so it's worth pasting in full what HHJ Norton said:

http://pbs.twimg.com/media/DeYHpYPUQAAUvUY.jpg
2018-05-29T16:10:37+00:00
https://twitter.com/_/status/1001496040078372864
@Peter_Nater @bobbycolada73 No, you have to give them a trial.

2018-05-29T15:54:00+00:00
https://twitter.com/_/status/1001491859523256320
@bobbycolada73 It's in the article. He's anti-immigration, so he was trying to draw attention to some muslim immigrants being tried for sexual assault of a child. Basically an attempt to foment more hatred of immigrants, gain sympathy for his own cause, and discredit the legal system.

2018-05-29T15:49:30+00:00
https://twitter.com/_/status/1001490723793846272
@Flat_E_Prophet How does the high pressure ocean exist in the low pressure atmosphere? It's the same thing. Gravity pulls gasses towards a planet, and the creates air pressure.

2018-05-29T15:45:55+00:00
https://twitter.com/_/status/1001489824333774848
@Flat_E_Prophet Right here: https://en.wikipedia.org/wiki/Gravity_of_Earth
You have to combine the graph with the geoid and local topography and geology. You can actually measure it with a 0.01g scale though.
http://pbs.twimg.com/media/DeYBXgmU8AAuJFI.jpg



http://pbs.twimg.com/media/DeYBXgmU8AAuJFI.jpg

2018-05-29T15:30:46+00:00

https://twitter.com/_/status/1001486010499317761

@BayleeB79 @AdolfTwittler8 @Kal1_Furies @SteerMark @OpChemtrails @Masschemtrails @trishadishes2 @RealGeoEngWatch @climateviewer @LionelMedia Good example. A missile could not have caused the damage seen at the Pentagon - specifically the damage caused by the wings. So this video is fake.

2018-05-29T15:27:49+00:00

https://twitter.com/_/status/1001485270842146816

A great overview of the manufactured controversy surrounding nationalist Tommy Robinson - who was arrested for contempt of court for disrupting a trial in the UK - which has a different legal system to the US, hence some confusion.

https://thesecretbarrister.com/2018/05/25/what-has-happened-to-poor-tommy-robinson/

2018-05-29T15:03:34+00:00

https://twitter.com/_/status/1001479167253168130

@BayleeB79 @AdolfTwittler8 @Kal1_Furies @SteerMark @OpChemtrails @Masschemtrails @trishadishes2 @RealGeoEngWatch @climateviewer The egg test was for a different topic. It was demonstrating that the end result of a "crash" varies based on circumstances like speed. So comparing the 9/11 impact sites to low speed crash sites was not valid.

https://www.youtube.com/watch?v=w057C_2ippc

2018-05-29T15:01:39+00:00

https://twitter.com/_/status/1001478683633172481

@AdolfTwittler8 @Kal1_Furies @BayleeB79 @SteerMark @OpChemtrails @Masschemtrails

@trishadishes2 @RealGeoEngWatch @climateviewer But factual, and true. It's a very significant difference for 9/11 Truthers.
I focus on supposedly factual claims. So that's where I make most of my errors and then corrections.
Point out something I got wrong, and I will correct it.

2018-05-29T14:41:13+00:00
https://twitter.com/_/status/1001473540544065536
@Flat_E_Prophet That would be a combination of the Earth's geoid, and the altitude. There's also some minor differences with mountains. It's all pretty small variations though. Details here: https://en.wikipedia.org/wiki/Gravity_of_Earth

---

2018-05-29T14:36:36+00:00
https://twitter.com/_/status/1001472381959880704
@AdolfTwittler8 @Kal1_Furies @BayleeB79 @SteerMark @OpChemtrails @Masschemtrails @trishadishes2 @RealGeoEngWatch @climateviewer A recent example is the building that collapsed in Brazil. I originally thought he columns were steel, but they turned out to be steel-reinforced concrete (important in the context of 9/11 controlled demolition theories). So I updated my post. http://pbs.twimg.com/media/DeXxsmgV0AA6mn-.jpg

---

https://twitter.com/_/status/1000975074533433344

@KurtRennels I'm not sure what you are asking. Obviously there's all kinds of conspiracies all the time, all round the world. Can you give an example of what you mean?

2018-05-28T05:38:47+00:00

https://twitter.com/_/status/1000974647502884864

@Kal1_Furies @BayleeB79 @AdolfTwittler8 @SteerMark @OpChemtrails @Masschemtrails @trishadishes2 @RealGeoEngWatch @climateviewer There's a section where I explain my history, and why I ended up doing what I do, and why I think it's important. And I also relate my personal experiences in talking to a variety of people.

2018-05-28T05:36:42+00:00

https://twitter.com/_/status/1000974120958345216

@WearKilluminati Well that's the topic of the book. If you've got a friend who is too far down the rabbit hole, the how do you help them get out?

2018-05-28T05:35:19+00:00

https://twitter.com/_/status/1000973772239843328

@Kal1_Furies @WhinyWhiner @BayleeB79 @AdolfTwittler8 @SteerMark @OpChemtrails @Masschemtrails @trishadishes2 @RealGeoEngWatch @climateviewer There's a section on Weather Modification in ETRH, in the chemtrails chapter.

2018-05-27T22:34:25+00:00

https://twitter.com/_/status/1000867851387912193

@Kal1_Furies @BayleeB79 @AdolfTwittler8 @SteerMark @OpChemtrails @Masschemtrails @trishadishes2 @RealGeoEngWatch @climateviewer You would find it interesting. I think it would give you a much clearer understanding of where I am coming from, and why I do what I do. It's a pretty personal book.

2018-05-27T22:24:57+00:00

https://twitter.com/_/status/1000865466783490048

@Kal1_Furies @BayleeB79 @AdolfTwittler8 @SteerMark @OpChemtrails @Masschemtrails @trishadishes2 @RealGeoEngWatch @climateviewer About six months from whenI signed the contract back in July 2017, but I'd done some work on it before then. Finished in Jan 2018, but then there's a few rounds of editing.

Sorry about the price, it's set by the publisher.

2018-05-27T22:16:18+00:00

https://twitter.com/_/status/1000863290396852224

@Kal1_Furies @BayleeB79 @AdolfTwittler8 @SteerMark @OpChemtrails @Masschemtrails @trishadishes2 @RealGeoEngWatch @climateviewer $22 for hardcover initially. You can check it out at the publisher's site:

http://skyhorsepublishing.com/titles/13843-9781510735804-escaping-the-rabbit-hole

@powerm1985 Thatâ□□s actually somewhat promising - 85% of your stuff is getting across.

2018-05-27T05:57:47+00:00

https://twitter.com/_/status/1000617040489496576

@1StopMortgageTN So if the numbers are meangless. Why I does $21T have meaning?

2018-05-27T01:38:47+00:00

https://twitter.com/_/status/1000551860288176128

@dmill187 @AndeyTheFellow @pocketsizedhero But how do you find this evidence compelling if you've not checked it. Maybe it's just the videos that are compelling. Maybe they are just good at making compelling videos.

2018-05-27T01:37:57+00:00

https://twitter.com/_/status/1000551650283569152

@dmill187 @AndeyTheFellow @pocketsizedhero The faked evidence for WMDs in Iraq.

2018-05-27T01:36:59+00:00

https://twitter.com/_/status/1000551405554315264

@Frank87270541 @RichDolan Some of the UFO community - it's a broad community, some science based, some wishful thinking, and some mysticism.

2018-05-27T01:32:42+00:00

https://twitter.com/_/status/1000550330021498881

@dmill187 @AndeyTheFellow @pocketsizedhero It's a real deep hole for sure. You can get out if you want. Just keep an open mind. And go measure the disc of the sun. https://amzn.to/2Jtwaz8

2018-05-27T01:31:02+00:00

https://twitter.com/_/status/1000549907868991488

@dmill187 @AndeyTheFellow @pocketsizedhero I've observed the disk of the sun not changing size and seen stars rotate around the southern celestial pole. Seen Catalina island rise over the curve from low to high ground. Zoomed in on distant boats that get no more visible. Used a level at 35,000 to show the horizon dips.

2018-05-27T01:05:59+00:00

https://twitter.com/_/status/1000543605868478465

@dmill187 @AndeyTheFellow @pocketsizedhero I've doe them. I detected curvature. What did you do?

2018-05-27T00:59:24+00:00

https://twitter.com/_/status/1000541950066372608

@ThinkAboutItOnl They are contrails.

2018-05-27T00:58:54+00:00

https://twitter.com/_/status/1000541823163551745

@dmill187 @pocketsizedhero @AndeyTheFellow Have you checked any of this yourself? Actually gone out and looked at mountains over the horizon?

2018-05-27T00:58:07+00:00

https://twitter.com/_/status/1000541624697438211

@dmill187 @pocketsizedhero @AndeyTheFellow All demonstrably wrong. Start with perspective - how does that make things go out of view? It doesn't. It it did then zooming it would not make things re-appear because all zooming in does is magnify the exact same image.

2018-05-27T00:50:11+00:00

https://twitter.com/_/status/1000539629412499456

@dmill187 @pocketsizedhero @AndeyTheFellow I mean people are not seeing things they should not. They see exactly what we we should see based on the laws of physics. Refraction isn't just a number. It's more complicated. But regardless - things STILL GET HIDDEN by the horizon. Big things. Mountains.

2018-05-27T00:48:02+00:00

https://twitter.com/_/status/1000539088234020865

@Frank87270541 @RichDolan If there actually WAS conclusive evidence of a breaks-the-laws-of-physics craft, then that's an EPOCHAL event. Not just something Tom DeLonge will leverage to get a better Netflix deal. Not even something that Bigelow would use to get gov contracts. It would change everything.

2018-05-27T00:35:21+00:00
https://twitter.com/_/status/1000535896418996224
@pocketsizedhero @AndeyTheFellow @dmill187 Nope.

2018-05-27T00:34:26+00:00
https://twitter.com/_/status/1000535665199595521
@Frank87270541 @RichDolan Irrelevant rumors and speculation without seeing these videos. And it seems ridiculous. So the military has evidence of UFO's that congress is unaware of, and TTSA and BAASS is leaking secret military videos of UFOs to congress to get contracts. Makes no sense.

2018-05-26T20:20:42+00:00
https://twitter.com/_/status/1000471813653082112
@3DTruth The pentagon did not "lose" $21 Trillion. No did they find it. It's not even representing an amount of money. See: https://www.metabunk.org/debunked-missing-21-trillion-6-5-trillion-2-3-trillion-journal-vouchers.t9718/ https://www.youtube.com/watch?v=NoOFhjDjGqU

2018-05-26T20:02:47+00:00
https://twitter.com/_/status/1000467302934958080
@ReidTymcio @davidVdegraw Where did I say that?

2018-05-26T19:46:15+00:00
https://twitter.com/_/status/1000463144387399680
@davidVdegraw @WaveOfAction The claims of $21 Trillion Missing are what is a distraction. The problems with accounting do obscure real problems. But the $21T story is bogus. Listen to the DoD comptroller explain. https://www.youtube.com/watch?v=NoOFhjDjGqU

2018-05-26T19:44:37+00:00
https://twitter.com/_/status/1000462732498419712
@Greg_Palast @RedactedTonight @LeeCamp It's not missing money though. Ask an accountant, or the DoD comptroller David Norquist. https://www.youtube.com/watch?v=NoOFhjDjGqU

2018-05-26T19:33:59+00:00
https://twitter.com/_/status/1000460055618113536
@HealthRanger @FightingMonarch Clouds seeding is weather modification, not geoengineering. It has been done OPENLY since the 1950s with no problems.

2018-05-26T19:33:01+00:00
https://twitter.com/_/status/1000459812474273792
@WaveOfAction @davidVdegraw Nobody like war profiteers. I think the Pentagon should be audited. But this $21T number is bogus, and a distraction from REAL waste and fraud in the military.

2018-05-26T19:31:52+00:00
https://twitter.com/_/status/1000459523885219840
@ReidTymcio @davidVdegraw It's simple arithmetic. They can't lose more money than they

have. How much room for waste and fraud would you say is in there. 10%? Is 10% of the military budget $21 Trillion? Is it $6.5 Trillion in one year? No, it's backwards. Mil budgets are around $0.6T. What's 10% of 0.6T?

2018-05-26T19:22:54+00:00

https://twitter.com/_/status/1000457266774999040

@ReidTymcio @davidVdegraw Well we know it can't be $$21T, as that's more than ALL OF THEIR SPENDING. Think about it. How do they mange to pay everyone, maintain their equipment, buy aircraft carriers, etc, and still lose more money than they get?
Military waste is in $B, not $T

2018-05-26T19:10:42+00:00

https://twitter.com/_/status/1000454193872695297

@ReidTymcio @davidVdegraw Did you read what Norquist said?

2018-05-26T19:09:57+00:00

https://twitter.com/_/status/1000454007645650945

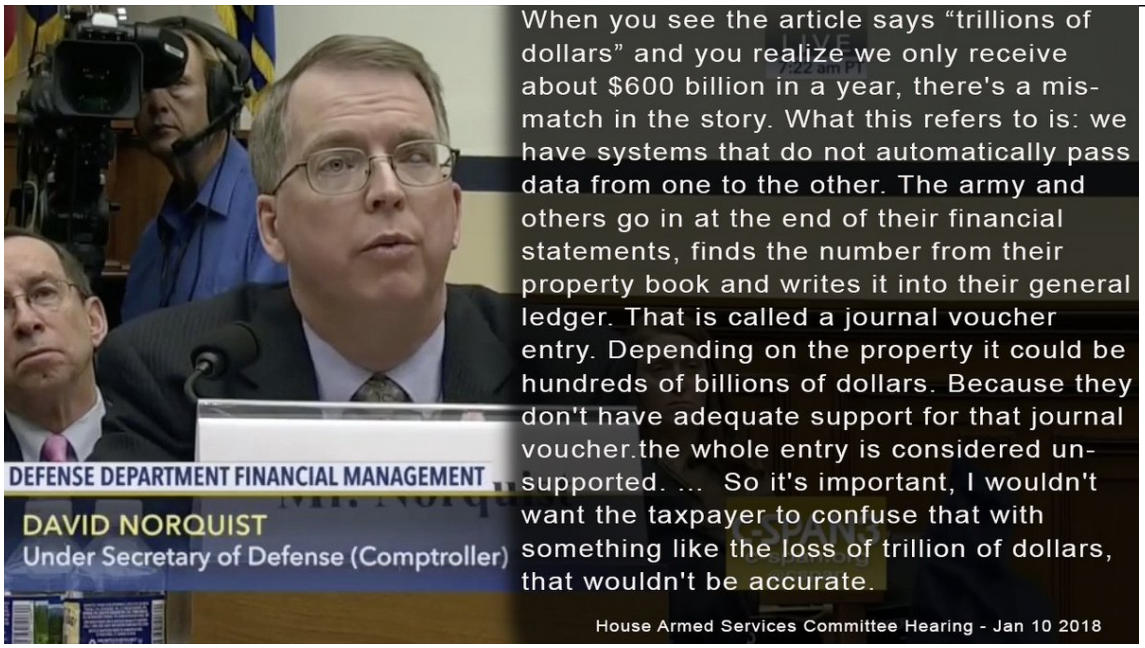
@ReidTymcio @davidVdegraw We know (mostly) where the money went. That's not what this $21 Trillion number is about. It does not represent an amount of money.

2018-05-26T19:02:18+00:00

https://twitter.com/_/status/1000452080782360577

@davidVdegraw @ReidTymcio Because they explained what the numbers represented, and they were not spending, and not missing money. Of course there's waste and fraud. But the $21 Trillion number is nonsense. http://pbs.twimg.com/media/DeJR2cwVwAAX1cG.jpg

---



http://pbs.twimg.com/media/DeJR2cwVwAAX1cG.jpg

2018-05-26T19:00:19+00:00

https://twitter.com/_/status/1000451582834585600

@davidVdegraw @ReidTymcio He's talking about MUCH smaller amounts of money, try to save money within offices with a budget of just $64 billion. Not $21 trillion ($21,000 billion). http://www.americanrhetoric.com/speeches/robertgatesamericanenterpriseinstitute.htm

http://pbs.twimg.com/media/DeJQumsU0AAta_D.jpg

Then there was the effort to pare down the overhead costs of DoD components outside the military services -- in particular, the Office of Secretary of Defense, the Joint Staff, the defense agencies and field activities, plus the major regional and functional military headquarters -- referred to as Combatant Commands -- apart from Iraq and Afghanistan.

With respect to these components, known internally as the 4th Estate, the efficiencies experience was something akin to an Easter egg hunt. My staff and I learned that it was nearly impossible to get accurate information and answers to questions such as, "How much money did you spend?" and "How many people do you have?" For example, when I launched the efficiencies effort in August 2010 we projected the savings from closing Joint Forces Command to be about 250 million dollars. That number doubled over the next four months as more details trickled in out about how this organization was funded and staffed from dozens of sources across the department.

Overall, the 4th Estate savings were disappointing -- less than a billion dollars in annual projected savings from a group of organizations that consume at least 64 billion dollars a year by our latest estimate. I believe we can and should do much better. There are still too many headquarters, offices, and agencies employing too many high ranking personnel and contractors consuming too many resources relative to real military missions and measurable results.

http://pbs.twimg.com/media/DeJQumsU0AAta_D.jpg
2018-05-26T18:52:03+00:00
https://twitter.com/_/status/1000449503114158081
@ChangemakerM @PentagonAudit @davidVdegraw What unappropriated money, exactly? Do you think that $700 billion represents unappropriated money? FBWT is available budget spending authority. i.e. appropriated spending authority. It's not a transfer.

2018-05-26T18:45:50+00:00
https://twitter.com/_/status/1000447937321684992
@ReidTymcio @davidVdegraw You brought up "spending".
Of course it should be audited - they waste billions. But this $21 trillion figure is nonsense. It's also being deliberately spread by RT.

2018-05-26T18:39:44+00:00
https://twitter.com/_/status/1000446404148449280
@ReidTymcio @davidVdegraw The DoD does not say "spending". It's "accounting transactions". They explained exactly what that was back in 2001. It''s when a total is copied from one system to another system. it's not spending. It is complicated. It's actual fake news.

2018-05-26T18:05:53+00:00
https://twitter.com/_/status/1000437882870362112

@PentagonAudit @davidVdegraw That's a great goal, there's a lot of waste and fraud in military spending. billions probably. However you need to be looking at the right numbers. It's literally impossible to steal trillions if you only have billions. FBWT is not a transfer of money.

2018-05-26T17:57:21+00:00

https://twitter.com/_/status/1000435737756557312

@PentagonAudit @davidVdegraw And nobody pays me. Who pays you?

2018-05-26T17:55:30+00:00

https://twitter.com/_/status/1000435272302055427

@PentagonAudit @davidVdegraw That's not a transfer though, is it. Explain the $700 billion number to people. What is it actually?

2018-05-26T17:54:11+00:00

https://twitter.com/_/status/1000434939865718784

@NoeRangel @KeithDaly4 @AbbyMartin @LeeCamp @Truthdig The point here is that $21 Trillion is not missing. Now if you want to talk about waste and fraud that's great. But this $21 Trillion number is a totally different thing, as it's not from spending. It's assets and liabilities, recorded multiple times.

2018-05-26T17:37:08+00:00

https://twitter.com/_/status/1000430649226899457

@ChangemakerM @davidVdegraw I've been researching this for years. I first wrote about it in 2011, and there's a section in my book about it. I've read multiple DoD documents regarding the issue and talked to Mark Skidmore about it.
https://www.metabunk.org/debunked-rumsfeld-says-2-3-trillion-missing-from-the-pentagon.t165/

2018-05-26T17:31:38+00:00

https://twitter.com/_/status/1000429265723142144

@NoeRangel @KeithDaly4 @AbbyMartin @LeeCamp @Truthdig You might as we say "The Pentagon can't account for $21 Trillion in free money", as that would be equally inaccurate.

2018-05-26T17:30:16+00:00

https://twitter.com/_/status/1000428921068765184

@NoeRangel @KeithDaly4 @AbbyMartin @LeeCamp @Truthdig Look into it. The story gets repeated because accounting is complicated. The DoD explained the problem back in 2001. It's not spending. It's mostly estimates on the dollar amount of assets and liabilities.
http://archive.defense.gov/news/Jul2001/d20010710finmngt.pdf
http://pbs.twimg.com/media/DeI8pBgVQAAjDOH.jpg

While DoD may debate some of the criticisms of its financial statements and the size and components of the $2.3 trillion issue, we think that corrective action requires radical financial management transformation. For the FY 1999 financial statements, the auditors concluded that $2.3 trillion transactions of the $7.6 trillion entries to the financial statements were "unsupported". DoD notes that many of these entries included end-of-period estimates for such items as military pension actuarial liabilities and contingent liabilities, and manual entries for such items as contract accounts payable and property and equipment values. DoD would further note that the "unsupported" entries are "not necessarily improper" and that documentation does exist in many cases, albeit, not adequate for the auditing standards imposed.

http://pbs.twimg.com/media/DeI8pBgVQAAjDOH.jpg

2018-05-26T17:26:18+00:00

https://twitter.com/_/status/1000427920911884289

@davidVdegraw It's not $21 Trillion of MISSING money.

Of course there IS missing money, waste, fraud, quasi-legal black-ops. But it's not trillions, and it's not in these number which ARE NOT SPENDING. You are hiding the real story by focussing on this fake one

---

2018-05-26T17:06:24+00:00

https://twitter.com/_/status/1000422915047702528

@davidVdegraw It's not unaccounted-for spending. It's stuff like end-of- period estimates for items like military pension actuarial liabilities and contingent liabilities. The Pentagon needs an audit, but $21 Trillion "missing" is nonsense. Flat wrong.

https://www.metabunk.org/debunked-missing-21-trillion-6-5-trillion-2-3-trillion-journal-vouchers.t9718/ http://pbs.twimg.com/media/DeI2_ZLVAAA80gk.jpg

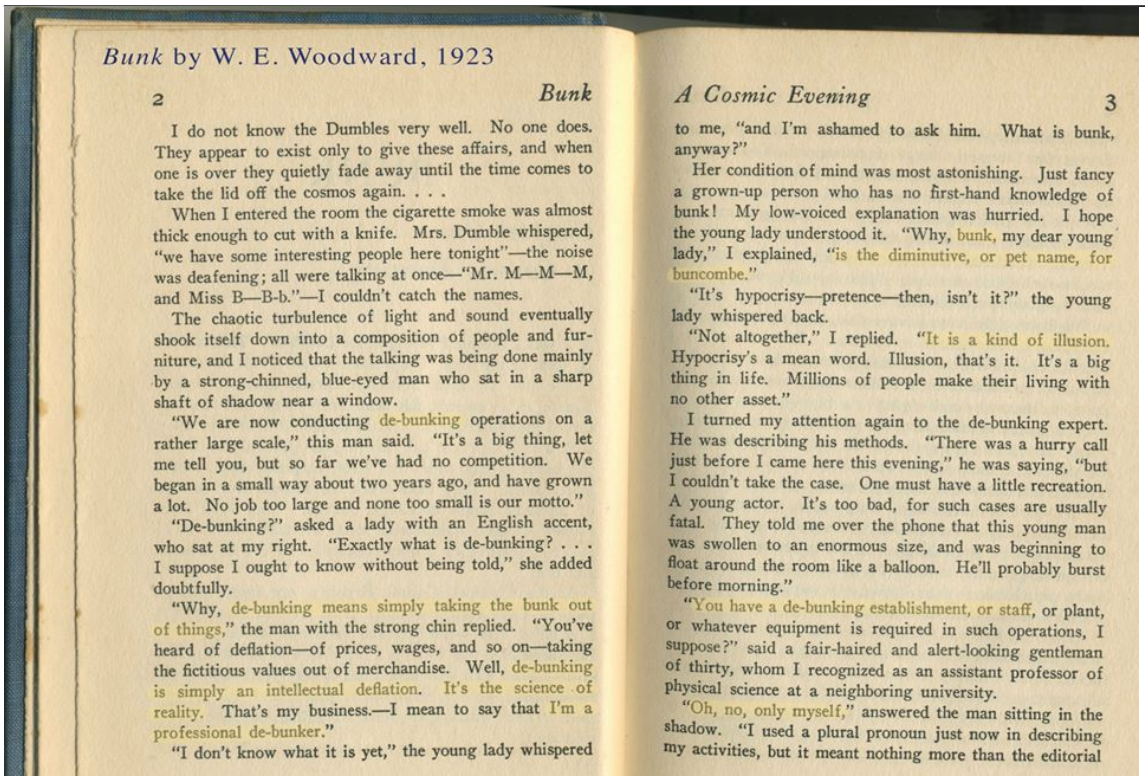
The first recorded use of the word "debunker" is thought to be 95 years ago in the 1923 book "Bunk" by W. E. Woodward, which follows the adventures of a self-styled "professional debunker" called Michael Webb. ... M. W. ... Mick West. Coincidence? Yes.

http://pbs.twimg.com/media/DeGUYSWV0AIIVV5.jpg



Bunk by W. E. Woodward, 1923

2 *Bunk*

I do not know the Dumbles very well. No one does. They appear to exist only to give these affairs, and when one is over they quietly fade away until the time comes to take the lid off the cosmos again. . . .

When I entered the room the cigarette smoke was almost thick enough to cut with a knife. Mrs. Dumble whispered, "we have some interesting people here tonight"—the noise was deafening; all were talking at once—"Mr. M—M—M, and Miss B—B-b."—I couldn't catch the names.

The chaotic turbulence of light and sound eventually shook itself down into a composition of people and furniture, and I noticed that the talking was being done mainly by a strong-chinned, blue-eyed man who sat in a sharp shaft of shadow near a window.

"We are now conducting de-bunking operations on a rather large scale," this man said. "It's a big thing, let me tell you, but so far we've had no competition. We began in a small way about two years ago, and have grown a lot. No job too large and none too small is our motto."

"De-bunking?" asked a lady with an English accent, who sat at my right. "Exactly what is de-bunking? . . . I suppose I ought to know without being told," she added doubtfully.

"Why, de-bunking means simply taking the bunk out of things," the man with the strong chin replied. "You've heard of deflation—of prices, wages, and so on—taking the fictitious values out of merchandise. Well, de-bunking is simply an intellectual deflation. It's the science of reality. That's my business.—I mean to say that I'm a professional de-bunker."

"I don't know what it is yet," the young lady whispered

A Cosmic Evening 3

to me, "and I'm ashamed to ask him. What is bunk, anyway?"

Her condition of mind was most astonishing. Just fancy a grown-up person who has no first-hand knowledge of bunk! My low-voiced explanation was hurried. I hope the young lady understood it. "Why, bunk, my dear young lady," I explained, "is the diminutive, or pet name, for buncombe."

"It's hypocrisy—pretence—then, isn't it?" the young lady whispered back.

"Not altogether," I replied. "It is a kind of illusion. Hypocrisy's a mean word. Illusion, that's it. It's a big thing in life. Millions of people make their living with no other asset."

I turned my attention again to the de-bunking expert. He was describing his methods. "There was a hurry call just before I came here this evening," he was saying, "but I couldn't take the case. One must have a little recreation. A young actor. It's too bad, for such cases are usually fatal. They told me over the phone that this young man was swollen to an enormous size, and was beginning to float around the room like a balloon. He'll probably burst before morning."

"You have a de-bunking establishment, or staff, or plant, or whatever equipment is required in such operations, I suppose?" said a fair-haired and alert-looking gentleman of thirty, whom I recognized as an assistant professor of physical science at a neighboring university.

"Oh, no, only myself," answered the man sitting in the shadow. "I used a plural pronoun just now in describing my activities, but it meant nothing more than the editorial

http://pbs.twimg.com/media/DeGUYSWV0AIIVV5.jpg

2018-05-25T22:51:04+00:00

https://twitter.com/_/status/1000147264289959936

@charliefoxkit @PandorasArtbox It's condensation. The water vapor is actually a combination of water from the air, and added water from the engine exhaust. Hydrocarbons burning in oxygen

make CO2 (carbon dioxide) and H2O (Water). Later growth of a contrail all comes from the air.

2018-05-25T22:48:52+00:00

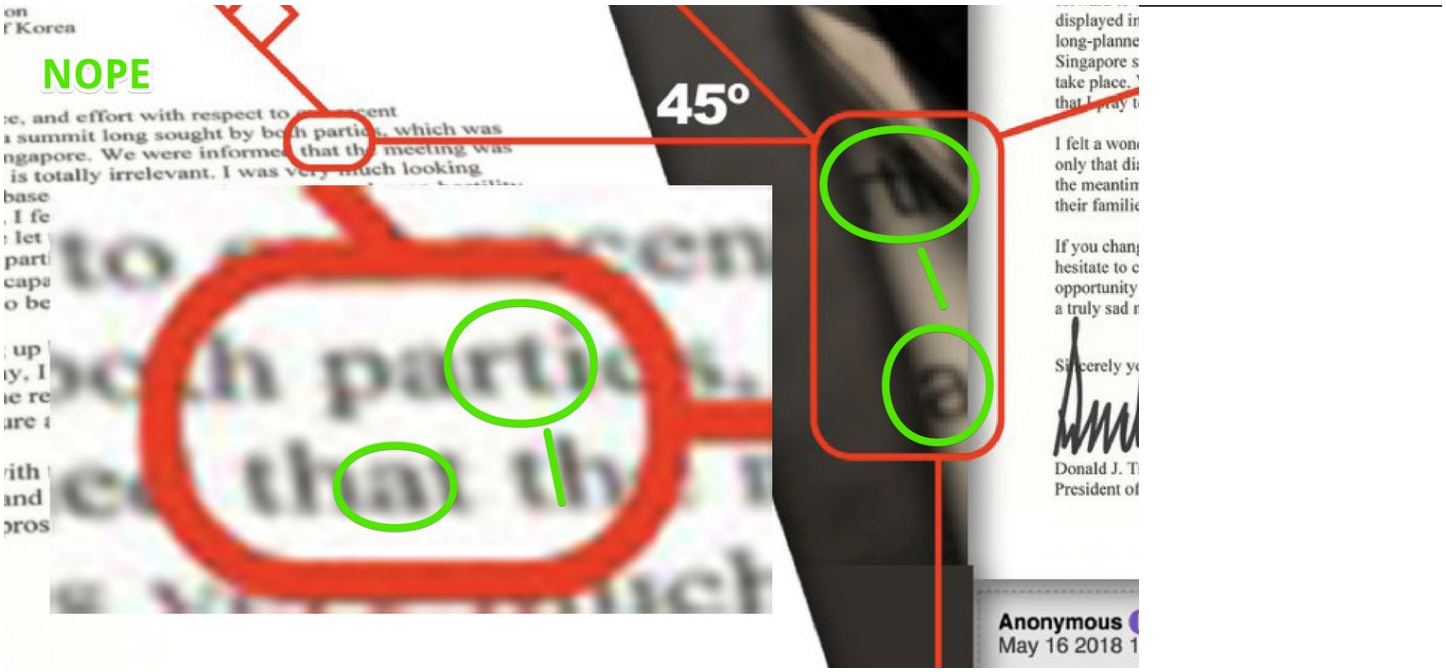
https://twitter.com/_/status/1000146711270993920

@RonaldVermeij Perhaps it's simply a symbol of his travels? A plane with ordinary contrails?

2018-05-25T20:21:37+00:00

https://twitter.com/_/status/1000109653974368256

@Lagonda_Blogger You can debunk it by looking at it. The letters don't actually line up, and the line spacing is different. http://pbs.twimg.com/media/DeEaTp0U0AA9vRA.jpg



http://pbs.twimg.com/media/DeEaTp0U0AA9vRA.jpg

2018-05-23T23:48:33+00:00

https://twitter.com/_/status/999436955375910912

@ItsgunYTNews It's a test flight. The KC-46A is still under development. Boeing is in Seattle.

2018-05-23T23:40:16+00:00

https://twitter.com/_/status/999434870639112192

@KurtRennels Well I'm watching the Netflix video now, it's a bit simple, but pretty interesting. Shows pretty much that it must have been a single bullet.

2018-05-23T23:24:45+00:00

https://twitter.com/_/status/999430966270509056

@KurtRennels I can't find where it's from. There's another NOVA film on Netflix that looks newer, were you thinking of this? They do different test on the bullet. Concluded SBT is correct. https://www.netflix.com/watch/80003182

2018-05-23T22:37:37+00:00

https://twitter.com/_/status/999419104804069377

@KurtRennels What show? I've no idea what you are talking about.

2018-05-23T22:31:08+00:00

https://twitter.com/_/status/999417473433681923

@KurtRennels You're welcome, although I don't understand what you mean.

2018-05-23T22:23:15+00:00

https://twitter.com/_/status/999415488701595649

@KurtRennels I'm also not sure what Netflix has to do with anything.

2018-05-23T22:22:22+00:00

https://twitter.com/_/status/999415266156068864

@KurtRennels Like you contend that Meyer's model of the car, JFK, and Connally is wrong, and yet it seems to match the Zapruder footage exactly, and you just posted some image and said " Notice JFKâ□□s feet computer." which was unclear.

2018-05-23T22:18:26+00:00

https://twitter.com/_/status/999414275134316544

@KurtRennels Not really, as there's not enough detail. It's a bit hard to debunk things on Twitter for that reason. I see you making claims, and some images, but it all lacks verifiable context, and accurate diagrams with math.

2018-05-23T21:52:57+00:00

https://twitter.com/_/status/999407864870391808

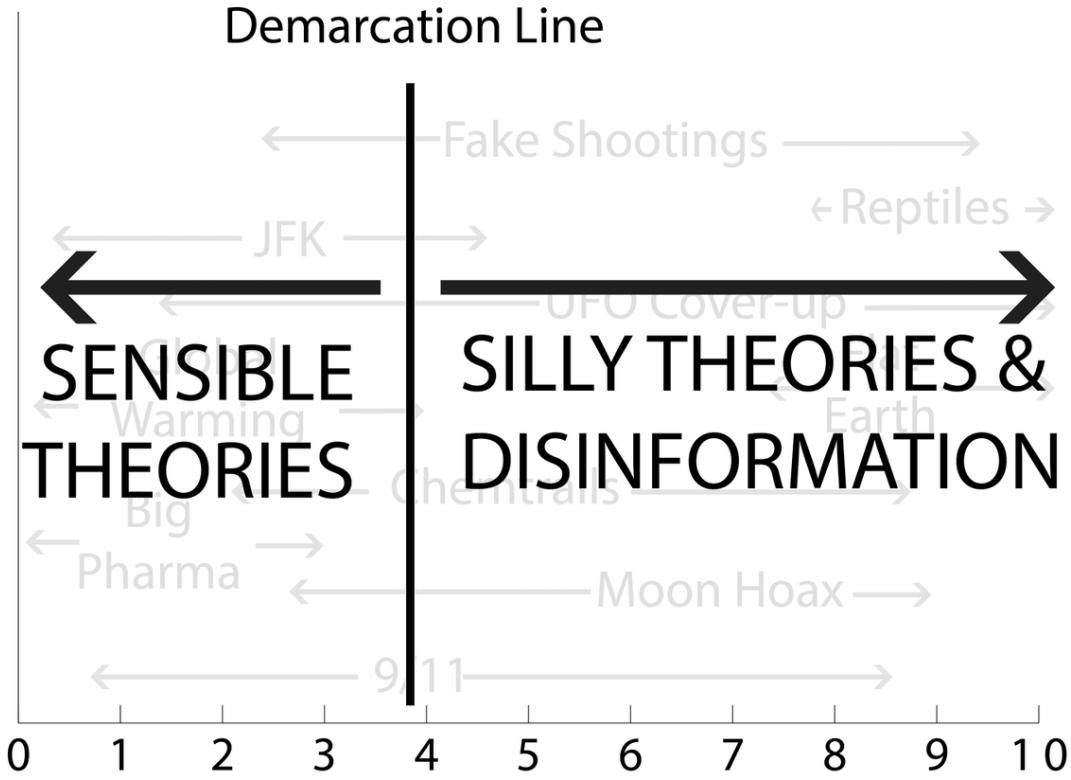
@KurtRennels Isn't what bunk?

2018-05-23T21:02:25+00:00

https://twitter.com/_/status/999395145136066560

@KurtRennels Sure, but one would obviously not put "more than one JFK shooter" in the same ballpark as "The Earth is Flat". The spectrum arises from your current information set, and experiences. Everyone thinks things on their side of the line are sound, evidence based, near irrefutable. http://pbs.twimg.com/media/Dd6QcC8U8AAVYG9.png

---



http://pbs.twimg.com/media/Dd6QcC8U8AAVYG9.png

2018-05-23T20:06:29+00:00

https://twitter.com/_/status/999381071023095809

@KurtRennels There's no JFK in it, I mostly look at things further along the spectrum.

2018-05-23T18:14:53+00:00

https://twitter.com/_/status/999352985644744710

@KurtRennels No. I think this page explains it quite well.

http://www.jfkfiles.com/jfk/html/concl2.htm

2018-05-23T17:54:43+00:00

https://twitter.com/_/status/999347909542858752

@KurtRennels But those lines can move when we learn new information. I'm quite open to shifting my line, but I think the SBT is pretty solid. What's new? Shirt hole a bit lower than expected? Doesn't really do much. Shirts move.

2018-05-23T17:53:07+00:00

https://twitter.com/_/status/999347507732725762

@KurtRennels And regarding bias - in my book I talk about a demarcation line people draw on the conspiracy spectrum. You think of some 9/11 theories in the same way I think of some JFK theories. We have different lines.

2018-05-23T17:51:17+00:00

https://twitter.com/_/status/999347047051362304

@KurtRennels Surely you should be looking at the wound locations, not the shirt hole?

2018-05-23T17:19:46+00:00

https://twitter.com/_/status/999339115777683456

@KurtRennels You're beating a dead horse. And probably the wrong horse.

2018-05-23T17:19:04+00:00

https://twitter.com/_/status/999338937494601728

@matthetube Of course in both cases it's still a significant event, especially for locals. But media focus tends to amplify public estimates of extent.

2018-05-23T16:32:04+00:00

https://twitter.com/_/status/999327109850972160

Perspective is everything https://twitter.com/SamLMontano/status/999269234755690497

2018-05-23T13:44:49+00:00

https://twitter.com/_/status/999285022040322049

@juliagalef "The Algorithmic Beauty of Sea Shells" is a great book on this, although perhaps a bit nerdy. https://amzn.to/2J1UuLH

2018-05-23T13:18:47+00:00

https://twitter.com/_/status/999278470432669697

@KurtRennels That's not his shirt.

2018-05-22T23:37:02+00:00

https://twitter.com/_/status/999071668445134848

@KurtRennels Have you check this with a 3D model?

2018-05-22T20:00:42+00:00

https://twitter.com/_/status/999017226538663936

@KurtRennels Is this description wrong? https://en.wikipedia.org/wiki/Single-bullet_theory

---

2018-05-22T19:54:08+00:00

https://twitter.com/_/status/999015575182393344

@KurtRennels They explained that. The bullet hit two ribs not one, that changed things quite a bit.

Given the number of variables I'd say that's close enough. It demonstrates that something like what happened is actually possible.

2018-05-22T19:31:42+00:00

https://twitter.com/_/status/999009928248414208

@KurtRennels Perhaps you could look it up? I'd imagine there was quite a variety, depending on what exactly it hit. Since it tumbled after hitting JFK it's impossible to replicate exactly, just get a range of results. The real bullet fits in this range.

http://pbs.twimg.com/media/Dd0yJknVMAAaAKo.jpg

http://pbs.twimg.com/media/Dd0yJknVMAAaAKo.jpg

2018-05-22T18:52:11+00:00

https://twitter.com/_/status/998999982626631680

@KurtRennels yes, and here's a more modern recreation. In this test it struct another rib, but the results are essentailly the same. https://www.youtube.com/watch?v=PZRUNYZY71g

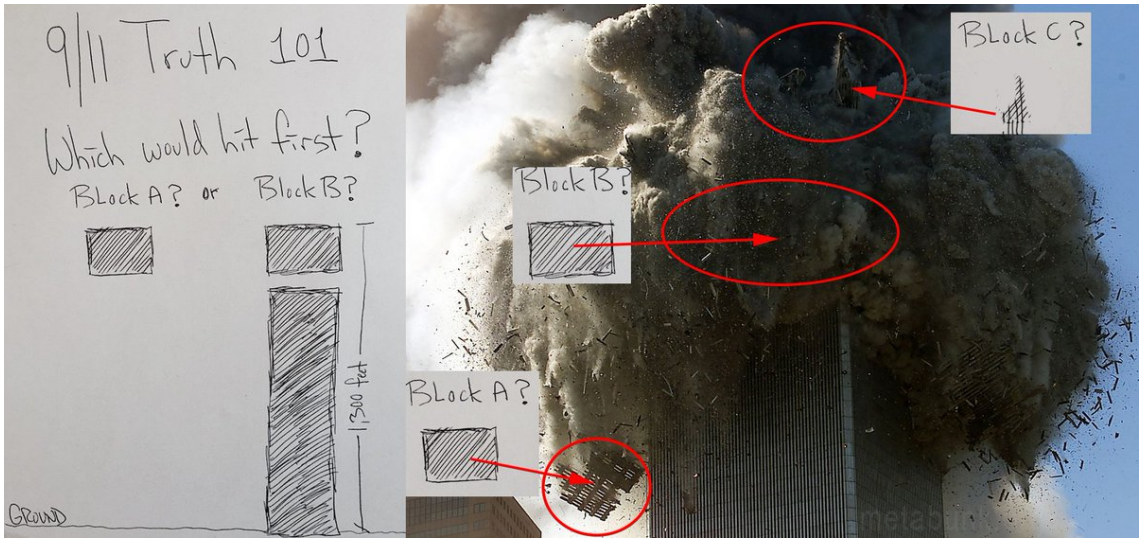
---

2018-05-22T15:15:54+00:00

https://twitter.com/_/status/998945555999899648

9/11 Truthers like to use the "Block A or Block B" comparison to explain their suspicions about the World Trade Center (often with cardboard boxes). They miss how there was more than one box in the disintegrating building, including a "block" C, which DID NOT FALL until later.

http://pbs.twimg.com/media/Ddz3GueU0AE3DSe.jpg



http://pbs.twimg.com/media/Ddz3GueU0AE3DSe.jpg

2018-05-22T05:57:15+00:00

https://twitter.com/_/status/998804965492637696

@jackie_greene Do you have a favorite?

2018-05-21T22:27:42+00:00

https://twitter.com/_/status/998691831993942016

@AuralLoom Perhaps he needs better titles then.

2018-05-21T22:25:42+00:00

https://twitter.com/_/status/998691329583366144

@AuralLoom Anyway, my Peterson lesson is done for the day. Thanks for the conversation.

2018-05-21T22:24:49+00:00

https://twitter.com/_/status/998691108929519617

@AuralLoom Yeah, he want's men to be authoritarian with their children, carve them into something they like.

What's the skateboarding thing about. What if you don't like "skateboarding". Conflict?

2018-05-21T22:23:13+00:00

https://twitter.com/_/status/998690705823289344

@AuralLoom You have three brothers and no sisters, right? That might be an interesting demographic to look into.

2018-05-21T22:22:01+00:00

https://twitter.com/_/status/998690402524778496

@AuralLoom Who knows, it depends which bits they love, and which bits they have read. Some women like more traditional gender roles.

2018-05-21T22:20:37+00:00

https://twitter.com/_/status/998690049096015873

@AuralLoom As opposed to men helping raise the babies women being heroes

---

2018-05-21T22:18:02+00:00

https://twitter.com/_/status/998689402183237632

@AuralLoom We don't need to get semantic here. We've both seen the same video, and we

know what he said. It was 3 hours well spent as I now know understand more what the fuss is about. He speaks to men, women don't like that, he's anti-SJW, he likes fun psycho-mythology and Jung. That's it.

2018-05-21T22:15:14+00:00

https://twitter.com/_/status/998688695883476995

@AuralLoom Noting that there are less adult women interested in STEM is not the same as saying women should have all babies and let men be heroes.

2018-05-21T22:14:11+00:00

https://twitter.com/_/status/998688431487107072

@AuralLoom "prejudice, stereotyping, or discrimination, typically against women, on the basis of sex" to which I'd add "beyond the obvious physical different, and demographic trends"

2018-05-21T22:07:52+00:00

https://twitter.com/_/status/998686842944864257

@AuralLoom Harsher, if those are my only choices. I can see he's entertaining and sometime interesting. But I think it's mostly pop-psychology and pop-philosophy. Fun, but not incredibly useful. Then there's the obvious sexism.

2018-05-21T22:05:55+00:00

https://twitter.com/_/status/998686352957820928

@AuralLoom What I don't like is the rather extreme division he described. Men have evolved to be combative hierarchy-climbing heroes, women have evolved to have babies, unless they have genius level IQ.

2018-05-21T22:01:35+00:00

https://twitter.com/_/status/998685261792882688

@AuralLoom Joe's audience is increasingly diverse, but his base is young males. But really it's that he has a BIG audience. A slice of that fit Peterson.

2018-05-21T21:59:05+00:00

https://twitter.com/_/status/998684633020551170

@AuralLoom Counterargument to what?

I've listened to the whole thing. I got some nice self-improvement tips, and some fun Jungian philosophy, and a very strong sense that he's only concerned with men.

2018-05-21T21:56:05+00:00

https://twitter.com/_/status/998683877240594432

@AuralLoom 2:57:15: Peterson: "You have provided a tremendous boost to my presence, so whatever comes of that is to be blamed partly on you".

2018-05-21T21:51:34+00:00

https://twitter.com/_/status/998682739669848064

@AuralLoom 2h53m28s Joe mentions me to Peterson.

https://youtu.be/USg3NR76XpQ?t=2h53m28s

2018-05-21T21:49:53+00:00

https://twitter.com/_/status/998682318192570368

@AuralLoom I'd imagine there are surveys out there that can answer than.

2018-05-21T21:47:36+00:00

https://twitter.com/_/status/998681743577137152

@AuralLoom Not really. I'd say his interests quite specifically exclude and belittle women.

2018-05-21T21:46:01+00:00

https://twitter.com/_/status/998681343566344192

@AuralLoom People regret their decision either way, but are generally happy with where they are.

2018-05-21T21:44:47+00:00

https://twitter.com/_/status/998681033137520640

@AuralLoom Both.

2018-05-21T21:43:27+00:00

https://twitter.com/_/status/998680698578812929

@AuralLoom I'd suspect it's more male for the younger crowd, and then more evenly distributed as you get older.

2018-05-21T21:41:12+00:00

https://twitter.com/_/status/998680132335251458

@AuralLoom Sure they can. But the point here is that Peterson seems to largely ignore women, saying they are too busy having babies, and that they SHOULD have babies.

2018-05-21T21:39:51+00:00

https://twitter.com/_/status/998679790138802176

@AuralLoom 2:40 They are just chatting now.

2018-05-21T21:38:24+00:00

https://twitter.com/_/status/998679426840674304

@AuralLoom I have a technical focus. So the demographics are similar to adult interest in STEM topics.

2018-05-21T21:36:22+00:00

https://twitter.com/_/status/998678916008062976

@AuralLoom 75% male

2018-05-21T21:35:57+00:00

https://twitter.com/_/status/998678808025645057

@AuralLoom It varies by individual, and the obvious physical differences and social traditions and constraints.

Women have to carry babies. They can be raised by two people, who can both be warrior gods, or not.

2018-05-21T21:32:03+00:00

https://twitter.com/_/status/998677827519004673

@AuralLoom 2:30:00 I agree with Joe on the problem of video games.

2018-05-21T21:29:29+00:00

https://twitter.com/_/status/998677183823470592

@AuralLoom I was on Joe Rogan the day after this talk.

2018-05-21T21:28:05+00:00

https://twitter.com/_/status/998676828888813568

@AuralLoom His message appears to be largely for men. Not the "stand up straight and clean your room stuff", but the "go out and be a warrior hero god while the women have fulfilling lives raising babies" part.

2018-05-21T21:23:06+00:00

https://twitter.com/_/status/998675574951366657

@AuralLoom Most people do it as a team.

2018-05-21T21:22:21+00:00

https://twitter.com/_/status/998675388791382016

@AuralLoom 2:16:36, this does not apply to women with genius level IQ, they will step outside the norm, "they are shapeshifters".

You can see Joe is a bit wary of where this is going.

2018-05-21T21:20:27+00:00

https://twitter.com/_/status/998674910267428864

@AuralLoom Dude, he's totally coming across as "women should just have babies, because that the incredible thing they evolved to do, and it's great".

2018-05-21T21:19:50+00:00

https://twitter.com/_/status/998674752754499584

@AuralLoom No, he states the demographics in the podcasts. 90% male youtube, nearly all at the lectures.

2018-05-21T21:18:28+00:00

https://twitter.com/_/status/998674411208101889

@AuralLoom 2:14:25 "Men need a purpose, women have a purpose". Riiiiiight, so men get to be heroes and gods, but women have to have babies and that should be enough.

2018-05-21T21:14:28+00:00

https://twitter.com/_/status/998673401488142336

@AuralLoom I'm two hours in to this Peterson video and I think I can understand why women don't go to his talks. And it's not because they are busy having kids. It's because he's talking about men to men.

2018-05-21T21:12:04+00:00

https://twitter.com/_/status/998672799265837056

@AuralLoom 2:07:50 on why no women: "Maybe women have enough to do, ...maybe men have to take this on voluntarily...You (a man) can screw around until you are 50 (and still procreate)". So basically no women at his talks because they are all busy having babies.

2018-05-21T21:08:47+00:00

https://twitter.com/_/status/998671975055638528

@AuralLoom 2:05:50, superhero movies are the return of polytheism. hmm....

2018-05-21T21:07:42+00:00

https://twitter.com/_/status/998671699942948866

@AuralLoom 2:05 talking about how his talk audiences are all men, and "that what women do", and how it boggles his mind.

2018-05-21T21:04:54+00:00

https://twitter.com/_/status/998670996998471681

@AuralLoom 2:02 he's getting angry!

2018-05-21T20:59:48+00:00

https://twitter.com/_/status/998669712488726528

@AuralLoom He's getting into the the "be a fighter" thing now. This is something where he says men fight, but women do not, is that right?

2018-05-21T20:58:14+00:00

https://twitter.com/_/status/998669318236733445

@erinbiba Internet says it's just an occasional check built into Android https://www.reddit.com/r/GalaxyS8/comments/8abple/phone_still_keeps_on_asking_for_password_instead/

2018-05-21T20:55:58+00:00

https://twitter.com/_/status/998668746876112896

@AuralLoom People will go look at his YouTube channel because of the anti-SJW stuff, and just end up with a tidy room and a fear of snake.

2018-05-21T20:53:26+00:00

https://twitter.com/_/status/998668109123760128

@erinbiba Happen after a reboot on iPhone. Maybe similar.

2018-05-21T20:52:53+00:00

https://twitter.com/_/status/998667970732736512

@AuralLoom Hopefully a generation of young men will have tidier rooms because of him. :)

2018-05-21T20:50:51+00:00

https://twitter.com/_/status/998667460130754560

@AuralLoom 1:42 "Clean your room", also good advice :)

2018-05-21T20:49:30+00:00

https://twitter.com/_/status/998667120199122944

@AuralLoom Sounds semantic. However complex language is unique to humans.

2018-05-21T20:48:17+00:00

https://twitter.com/_/status/998666812886695936

@AuralLoom 1:37:30 "tell the truth" - I'm with him there.

2018-05-21T20:42:46+00:00

https://twitter.com/_/status/998665425096294401

@AuralLoom Jaynes does not think it's god-given. He thinks gods are a mental framework that evolved consciousness.

2018-05-21T20:41:31+00:00

https://twitter.com/_/status/998665109634351104

@AuralLoom 1h27m This evolutionary hero archetype stuff is fun, but I don't see if how it's useful. He does seem like it's very male-specific too. Where do women fit in?

2018-05-21T20:35:38+00:00

https://twitter.com/_/status/998663629279969280

@AuralLoom Have you read Julian Jaynes, Bicameral Mind. Some of this reminds me of that.

2018-05-21T20:32:34+00:00

https://twitter.com/_/status/998662859255988224

@AuralLoom So now he's basically saying how there are evolutionary psychological reasons for social anxiety. Which (I think) is both true, and probably an appealing piece of information for people who blamed themselves for their failures.

2018-05-21T20:28:08+00:00

https://twitter.com/_/status/998661745072730112

@AuralLoom You seemed to suggest SJWs were inherently more aggressive than the average person. But as evidence you referenced video of the aggressive ones. Since video exists of people in other groups that are aggressive, then are SJWs MORE aggressive? Examples don't make a trend

---

2018-05-21T20:23:58+00:00

https://twitter.com/_/status/998660694101803008

@AuralLoom 1:12:00 he's saying that idea of morality arose (evolved) from people thinking bad people had snakes inside of them. Interesting, but rather speculative.

2018-05-21T20:22:04+00:00

https://twitter.com/_/status/998660216093732865

@AuralLoom Surely "videos of aggressive SJWs" is a rather restrictive sample. Have you not look at all those videos of aggressive Trump supporters? Or aggressive Hillary supporters? Or aggressive men with beards?

2018-05-21T20:19:46+00:00

https://twitter.com/_/status/998659637892206592

@AuralLoom Of course they have. It's a valid point. It's not valid to extrapolate it to a single group as an explanation of their different political views.

2018-05-21T20:19:02+00:00

https://twitter.com/_/status/998659453699293184

@AuralLoom I thought he said it did, was it an inverse correlation?

2018-05-21T20:18:27+00:00

https://twitter.com/_/status/998659305392914433

@AuralLoom What's he saying about burning and killing here, if not that he thinks that's what underlies the actions of SJWs, and is possible what they are leading towards on a broader level (genocide). https://youtu.be/USg3NR76XpQ?t=1h8m46s

---

2018-05-21T20:16:36+00:00

https://twitter.com/_/status/998658839057596416

@AuralLoom And perhaps a poor one for people with whom you disagree. He seems to say

SJWs (primally) want to destroy people who fall into the "snake" category.

2018-05-21T20:15:14+00:00

https://twitter.com/_/status/998658496819150849

@AuralLoom I mean that agreeableness is not something you can measure and then extrapolate to see how much of an SJW asshole someone is going to become. There some correlation, but there's also lots of counterexamples. It's tarring everyone with the same brush.

2018-05-21T20:13:23+00:00

https://twitter.com/_/status/998658031654060032

@AuralLoom He's using the snake as an evolutionary sensitized threat, like Shermer uses wolves.

2018-05-21T20:12:27+00:00

https://twitter.com/_/status/998657794592026624

@AuralLoom I wrestled a Rattlesnake once. The feeling was unlike any feeling I ever got from human conflict.

2018-05-21T20:10:37+00:00

https://twitter.com/_/status/998657334233546752

@AuralLoom Huh, he's the one that suggested it.

2018-05-21T20:08:49+00:00

https://twitter.com/_/status/998656880783253509

@AuralLoom All traits are minor unless pathologised.

2018-05-21T20:08:08+00:00

https://twitter.com/_/status/998656708892213248

@AuralLoom Ohh, disgust! (1hr) I like this as I've read "Purity and Danger" by Mary Douglas.

2018-05-21T20:07:16+00:00

https://twitter.com/_/status/998656492852076555

@AuralLoom 57:40 he's explaining more about the snake. Wait, now it heirarchies. erm, exploring, er, limits of knowledge, er learning by mistake, snake detectors. DRAGON DETECTORS, ...

2018-05-21T20:04:46+00:00

https://twitter.com/_/status/998655864876625920

@AuralLoom But I don't think the SJWs punching Nazis is the first step to genocide.

2018-05-21T20:04:11+00:00

https://twitter.com/_/status/998655716129849344

@AuralLoom I'm against punching Nazis for their words, so there's probably some agreement with Peterson there. (55m)

2018-05-21T20:02:59+00:00

https://twitter.com/_/status/998655415490498560

@AuralLoom Yes, it's a vast and over-simplistic generalization for someone who promotes the importance of the individual. Agreeableness is a variable trait everyone has. He's taking a minor correlation and making it into a straw-man irrational friend-protecting snake-bashing SJW.

2018-05-21T19:58:43+00:00

https://twitter.com/_/status/998654341773910023

@AuralLoom Mansplaining does actually happen though. And it's not always just a man clearly thinking and a woman being mad at him because of his regressively independent brain.

2018-05-21T19:56:16+00:00

https://twitter.com/_/status/998653724435275779

@AuralLoom Dogma, really. I'd agree that's a bad thing.

2018-05-21T19:55:05+00:00

https://twitter.com/_/status/998653427990257664

@AuralLoom (wasn't sure if you were being sarcastic with "fair summary", so there's the quote)

2018-05-21T19:54:25+00:00

https://twitter.com/_/status/998653256980094976

@AuralLoom He said (54m) "The maternal viewpoint is something like anyone that is part of my in-group is an infant in trouble and anyone outside it is a predatory snake .. and so you are seeing that manifest itself in a political doctrine"

2018-05-21T19:51:15+00:00

https://twitter.com/_/status/998652461396123648

@AuralLoom "ideology" is a very broad brush. What if your ideology is scientific skepticism?

2018-05-21T19:50:16+00:00

https://twitter.com/_/status/998652213919604736

@AuralLoom Yes, the "clear intellect" is what SJWs say is anti-post-modernist. (according to Peterson)

2018-05-21T19:48:11+00:00

https://twitter.com/_/status/998651689828737025

@AuralLoom Now (54m) SJWs are expressing maternal characteristics, people who agree with them are infants who need protecting, people who disagree are snakes that should be destroyed.

2018-05-21T19:46:04+00:00

https://twitter.com/_/status/998651156946608130

@AuralLoom Now the SJW movement is "a hatred of clear intellect" because it's anti-post-modernist, or "mansplaining". (50m)

2018-05-21T19:43:29+00:00

https://twitter.com/_/status/998650508435800064

@AuralLoom Now he's saying to treat PTSD you need to teach the philosophy of good and evil. Not sure what to make of that. But he seems to be connecting this to SJWs

---

2018-05-21T19:42:36+00:00

https://twitter.com/_/status/998650284657205249

@AuralLoom He dismissed the entire book by saying it was obvious that mental illness had a social component.

2018-05-21T19:41:04+00:00

https://twitter.com/_/status/998649900173684737

@AuralLoom What mentality? I'm listenting to what he says, and then giving my impression of it.

2018-05-21T19:40:22+00:00

https://twitter.com/_/status/998649723354398720

2018-05-21T19:36:09+00:00

https://twitter.com/_/status/998648659511197696

@AuralLoom He's now asserting that people not wanting to talk to him is a rejection of the enlightenment (39m).

2018-05-21T19:34:41+00:00

https://twitter.com/_/status/998648294082469888

2018-05-21T19:32:54+00:00

https://twitter.com/_/status/998647843257704448

@AuralLoom Now he's going on about pop-philosophy and AI. Hope he has a point. (35m)

2018-05-21T19:30:32+00:00

https://twitter.com/_/status/998647245854597121

@AuralLoom Far right? He does not really talk about politics (that I've paid to attention to). He seems (now in the video, 30 min) to agree with Peterson that there's a chilling effect in academia with an excessive SJW mentality.

2018-05-21T19:22:52+00:00

https://twitter.com/_/status/998645320354488321

@AuralLoom Well that's how it came across. Anyway, I'm watching it (at 1.5x). Seems to be largely railing against SJWs so far (20 min)

2018-05-21T19:19:59+00:00

https://twitter.com/_/status/998644591535390721

@AuralLoom I'm sure he says many things that are both sensible and inspirational, and that he's helped many people feel better about themselves. But you can say that about all kinds of people you disagree with on other topics.

2018-05-21T19:14:56+00:00

https://twitter.com/_/status/998643321407922176

@AuralLoom Listening to the JRE958 podcast. He just accused men who support feminists of doing it for "social and sexual points", and that "there's something seriously creepy about it." This does not bode well https://youtu.be/USg3NR76XpQ?t=8m36s

---

2018-05-21T19:05:46+00:00

https://twitter.com/_/status/998641016625291264

@AuralLoom @FintanHennessy This one? https://www.youtube.com/watch?v=USg3NR76XpQ

2018-05-21T19:05:00+00:00

https://twitter.com/_/status/998640820596101121

@AuralLoom @FintanHennessy I though you said Peterson was puzzled as to why his audience was mostly men.

2018-05-21T19:01:10+00:00

https://twitter.com/_/status/998639856266788864

@AuralLoom @FintanHennessy What would you say is one of his best, most insightful talks or interviews that's online? I'll check it out.

2018-05-21T18:56:10+00:00

https://twitter.com/_/status/998638597120049152

@AuralLoom @FintanHennessy Do his teachings resemble patriarchy?

2018-05-21T18:54:27+00:00

https://twitter.com/_/status/998638167547723776

@AuralLoom @FintanHennessy My impression is he's a quirky self help guy with some conservative ideas about individual responsibility and gender. Studied fascism so sees the world through that lens. Likes mythology, Jungian archetypes and stuff. Went viral at right time to ride anti-SJW wave to fame. Dudes.

2018-05-21T18:51:02+00:00

https://twitter.com/_/status/998637305656061952

@AuralLoom @FintanHennessy So why did men give his book a chance? Why don't men end it at "alt-right professor"?

2018-05-21T18:50:10+00:00

https://twitter.com/_/status/998637090966421504

@AuralLoom @FintanHennessy I'm basing my impression on what I've read about him, some excerpts of his work, and a few YouTube videos. I've not found a compelling reason to read any of his books. Maybe I'm too old.

2018-05-21T18:47:40+00:00

https://twitter.com/_/status/998636458763169792

@AuralLoom @FintanHennessy It's like you are blaming women for not understanding what Peterson is saying.

2018-05-21T18:46:53+00:00

https://twitter.com/_/status/998636261047844865

@AuralLoom @FintanHennessy That seems like a bit of a backwards question. Obviously his book does not speak to women, otherwise more would buy it and more would got to his talks.

2018-05-21T18:25:07+00:00

https://twitter.com/_/status/998630787221045248

@AuralLoom @FintanHennessy Hmm, the reminds me of books I read as a teenager in the 1980s. I was a big fan of "Begin it Now" by Susan Hayward. Peterson just sounds like a pseduo-mystical gloss on self-improvement for men. "Individual responsibility", great, but what else?

2018-05-21T18:05:50+00:00

https://twitter.com/_/status/998625930653253632

@AuralLoom @FintanHennessy If it's not too personal a question, what were the flaws in yourself that Peterson helped you identify and fix?

2018-05-21T18:03:28+00:00

https://twitter.com/_/status/998625338023264257

@AuralLoom @FintanHennessy The young women I know don't seem to be particularly more angry with society than the young men. What about your female friends, are they angrier than you at the state of society?

2018-05-21T18:02:14+00:00

https://twitter.com/_/status/998625026654916608

@AuralLoom @FintanHennessy But Peterson did not figure this out?

2018-05-21T18:01:31+00:00

https://twitter.com/_/status/998624847742681089

@AuralLoom @FintanHennessy So it's a mystery? He does talk about differences between men an women, like he says women don't have physical combat as a backdrop to their discourses like men do. One would think he would have looked into why they don't like him.

2018-05-21T17:50:27+00:00

https://twitter.com/_/status/998622061684649990

@AuralLoom @FintanHennessy No, it's a question for you. Why do you think that if Peterson, as you claim, appeals to people who are "at the cusp of adulthood, a time of great confusion and fear", then why does he not appeal to young women?

2018-05-21T17:45:25+00:00

https://twitter.com/_/status/998620793083805696

@erinbiba With instructions here:
https://help.twitter.com/en/using-twitter/advanced-twitter-mute-options
YMMV, I've never used it myself.

2018-05-21T17:44:53+00:00

https://twitter.com/_/status/998620658811654144

@erinbiba https://twitter.com/settings/muted_keywords

2018-05-21T17:42:44+00:00

https://twitter.com/_/status/998620120070041600

@AuralLoom @FintanHennessy Are you in "a time of great confusion and fear?" You seem very self-confident. What then is the appeal of Peterson to you?

2018-05-21T17:41:17+00:00

https://twitter.com/_/status/998619755773739009

@AuralLoom @FintanHennessy Why not young women?

2018-05-21T17:40:49+00:00

https://twitter.com/_/status/998619637116878858

@AuralLoom @FintanHennessy Are you saying the alt-right liked Obama as much as they now like Peterson?

2018-05-21T17:37:01+00:00

https://twitter.com/_/status/998618681977462785
@AuralLoom @FintanHennessy I presume he'd strongly reject this, but Incels also find his idea appealing. Are they seriously misunderstanding him?

http://www.wehuntedthemammoth.com/2018/05/20/incels-embrace-jordan-peterson-after-he-calls-for-enforced-monogamy/

2018-05-21T17:33:07+00:00
https://twitter.com/_/status/998617698455072768
@AuralLoom @FintanHennessy And yet his words seem to most strongly resonate with a particular audience - young men. Why is that?

2018-05-21T17:29:33+00:00
https://twitter.com/_/status/998616801939341314
@AuralLoom @FintanHennessy Suggesting of what? He has ideas the alt-right IN PARTICULAR find appealing. So what? That just means lots of alt-right folk like what he says. They like him and his ideas more than the typical liberal likes him. It's a chunk of his base.

2018-05-21T17:27:42+00:00
https://twitter.com/_/status/998616337172725760
@AuralLoom @FintanHennessy And Peterson rejecting a label does not mean that all the alt-righters stop liking him. The original point was simply that he appeals to the alt-right. This does not mean he deliberately appeals to them, it mean that they find him appealing, they like him. Different things.

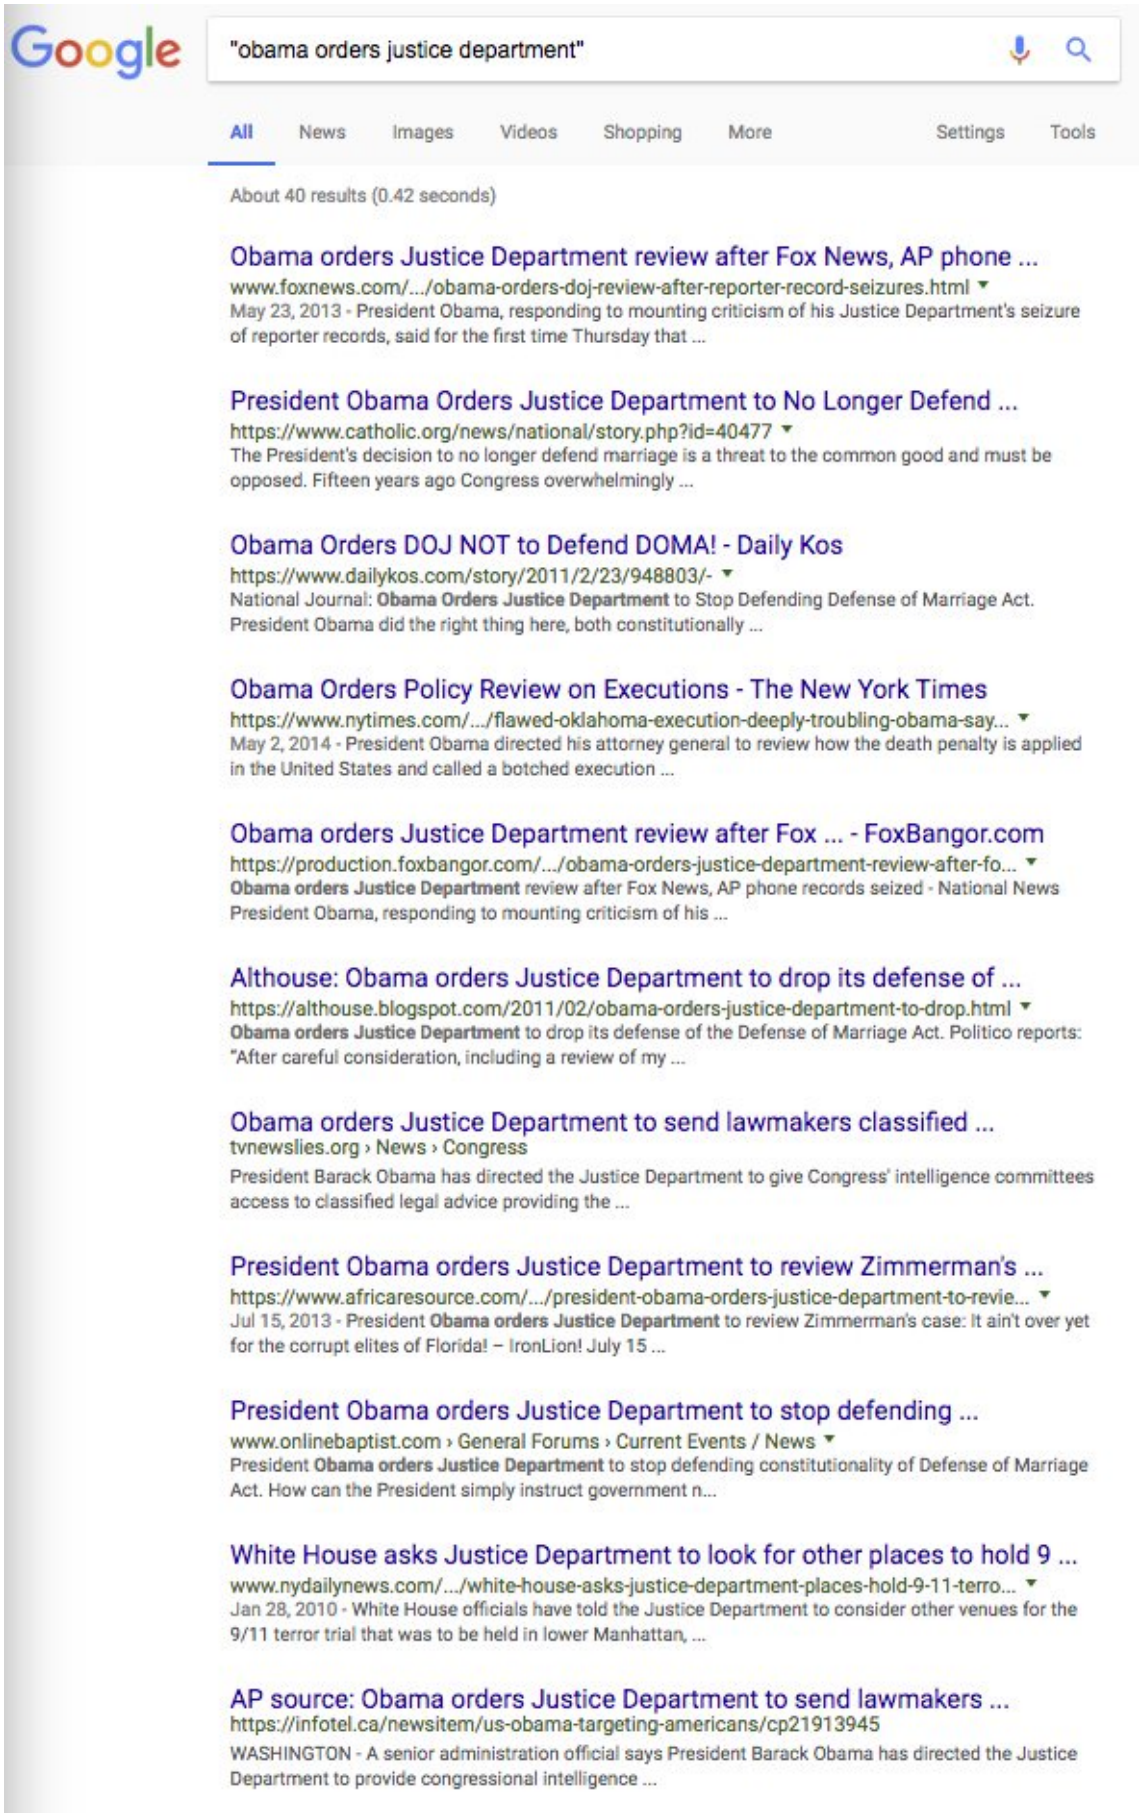
2018-05-21T17:24:40+00:00
https://twitter.com/_/status/998615573574500354
@AuralLoom @FintanHennessy Alt-right is a complex movement, white pride is hardly their only defining characteristic. See the "frequently overlapping" list in the first paragraph here - it includes antifeminism. https://en.wikipedia.org/wiki/Alt-right

---

2018-05-21T16:05:27+00:00
https://twitter.com/_/status/998595637774962688
@AuralLoom @FintanHennessy Silly? It's a direct connection. Men's rights activists feel that feminism has gone too far. Alt-right folk feel the same. His fans are not the full spectrum of humanity, they are some fairly specific groups, and mostly young men.

2018-05-21T16:01:45+00:00
https://twitter.com/_/status/998594707172220928
@DBHnBuckhead2 @PrisonPlanet http://pbs.twimg.com/media/Ddu4fm2VwAAnrNG.jpg

---



http://pbs.twimg.com/media/Ddu4fm2VwAAnrNG.jpg

2018-05-21T15:54:54+00:00

https://twitter.com/_/status/998592980742123520

@AuralLoom @FintanHennessy Well, "individual responsibility" (not that there's anything wrong

with that) is very much a favorite of the right. He appeals to MRAs, and there's some intersection with the alt-right there, who generally favor traditional interpretations of gender.

2018-05-21T05:20:55+00:00

https://twitter.com/_/status/998433434757300224

9/11 folk, not all plane crashes look alike! Despite them all being planes falling out of the sky, there's a huge amount of variation in what happens. Mostly due to speed and angle - but also due to what they hit. I try to illustrate this with some eggs.

https://www.youtube.com/watch?v=w057C_2ippc

2018-05-21T00:59:17+00:00

https://twitter.com/_/status/998367590639587328

@PostDisclosure @UfoSunday @__dregs__ @Jasongoldthorpe @adamgoldsack I never said otherwise. The point is we can't look at the data, so we can only go by indirect accounts of it.

2018-05-21T00:55:44+00:00

https://twitter.com/_/status/998366701145112576

@UfoSunday @__dregs__ @Jasongoldthorpe @PostDisclosure @adamgoldsack I can still point out that the recordings have not been verified to match Fravor's description.

2018-05-21T00:54:26+00:00

https://twitter.com/_/status/998366369996394497

@PostDisclosure @__dregs__ @UfoSunday @Jasongoldthorpe @adamgoldsack As far as I know there's none that's publicly available, or that has really been officially and unambiguously described. What the military has, I have no idea.

2018-05-21T00:39:53+00:00

https://twitter.com/_/status/998362709656653825

@__dregs__ @UfoSunday @Jasongoldthorpe @PostDisclosure @adamgoldsack What hard data? It's essentially ALL based on eyewitnesses and other accounts. If there were AAVs then the military would have recordings.

2018-05-20T22:28:07+00:00

https://twitter.com/_/status/998329549803765760

@UfoSunday @adamgoldsack @__dregs__ @PostDisclosure @rpowell2u @PaulJamesDean So you are saying there is none that everyone can check? Have you ever seen any actual data?

2018-05-20T22:26:19+00:00

https://twitter.com/_/status/998329095246069760

@UfoSunday @__dregs__ @PostDisclosure @adamgoldsack

2018-05-18T00:53:51+00:00

https://twitter.com/_/status/997279061037600768

@bosma2002 @LeeCamp I think the story has legs because many people don't really understand large numbers, or the money supply, or the vast complexity of the military as an organization.

2018-05-18T00:52:16+00:00

https://twitter.com/_/status/997278661840531456

@bosma2002 @LeeCamp Still rather misses the point - where were they stealing $6.5 trillion from? Where did it go? You can't double the US money supply without people noticing. And nothing indicates money was created. The whole thing is both baseless and impossible.

2018-05-18T00:43:38+00:00

https://twitter.com/_/status/997276489786671104

@rokro11 Explained here:
https://www.metabunk.org/debunked-blue-marble-photos-show-a-changing-earth.t6616/

2018-05-18T00:40:22+00:00

https://twitter.com/_/status/997275667019411456

@bosma2002 @LeeCamp I've looked into it in some depth, read many DoD reports, corresponded with Mark Sizemore, and done the math. Not only is it literally impossible, it's not what the evidence shows. Everything there just points to accounting. Nothing suggests loss of trillions. It's complicated.

2018-05-18T00:06:44+00:00

https://twitter.com/_/status/997267205048840192

@bosma2002 @LeeCamp What exactly is wrong with the story? Do you think it's possible to lose $6.5 trillion when your budget is only $0.6 trillion? Why do you think there's a loss at all?

Did they say they lost the money?

2018-05-17T07:14:49+00:00

https://twitter.com/_/status/997012548623912960

@TheOutThere2016 @samtripoli That's why I said: "Nobody is saying that the defense department does not waste money. It very obviously does. Hundreds of millions, possibly even billions of dollars are wasted through inefficiencies, incompetence, and corruption."
https://www.metabunk.org/debunked-missing-21-trillion-6-5-trillion-2-3-trillion-journal-vouchers.t9718/

2018-05-17T06:00:07+00:00

https://twitter.com/_/status/996993748205629440

@samtripoli Sure, I'm always up for a good podcast!

https://twitter.com/_/status/996189986574680064

@KeremGo3D @ufoofinterest @mufon Itâ□□s a single long exposure tracking the stars. The red images are a strobe light flashing, so do not move. Thin lines are always-on nav lights.

2018-05-12T16:54:08+00:00

https://twitter.com/_/status/995346397535748096

@nickmyer @Helicop_seats @AmyMichelleSel2 So why is there such a variation in weight? I breath the same air as you, and yet I'm really skinny.

2018-05-12T15:10:29+00:00

https://twitter.com/_/status/995320313519865856

@Paulxxxxx @KikPlenty @alienufovideos Have these 70 years of cases not already been investigated? Where is the radar data?

2018-05-11T20:59:21+00:00

https://twitter.com/_/status/995045721781952513

@Paulxxxxx @KikPlenty @alienufovideos Confirmation that some flying objects have not been identified is simply stating the obvious.

2018-05-11T18:21:37+00:00

https://twitter.com/_/status/995006023600500741

@nickmyer @RennyStrong Looks like a solar halo.

2018-05-11T16:48:48+00:00

https://twitter.com/_/status/994982668885377024

@STVS_Belgium @nickmyer And that's not a spraying system. It's a speculative system of REMOVING things (pollution) from the atmosphere.

2018-05-11T16:46:51+00:00

https://twitter.com/_/status/994982176654422016

@STVS_Belgium @nickmyer You know a lot of patents are speculative. Many don't even work. There are patents for space warping spaceships. Does that mean they exist?

2018-05-11T16:44:56+00:00

https://twitter.com/_/status/994981693256691712

@STVS_Belgium @nickmyer Wait, so the things they use are NOT patented? What are patents evidence of then? Crop dusting?

2018-05-11T15:53:54+00:00

https://twitter.com/_/status/994968852113969152

@Twimom09 I like how #2 on his list has already been debunked, by him.

2018-05-11T15:51:24+00:00

https://twitter.com/_/status/994968223152881665

@STVS_Belgium @nickmyer That appears to be a HAARP style device. They affect the ionosphere, which is far too high to affect the weather or climate. Plus they only had a minuscular fraction of the effect the sun has.

2018-05-11T15:47:19+00:00

https://twitter.com/_/status/994967194898284545

@STVS_Belgium @nickmyer I don't see the 5486900 patent referenced there. Where is it used?

2018-05-11T15:44:28+00:00

https://twitter.com/_/status/994966476455985152

@STVS_Belgium @nickmyer Look it up where? Can you give a link for where this photocopier toner measurement system is used in the spray systems of planes? Perhaps it's just listed as a reference in some other patent?

2018-05-11T15:39:57+00:00

https://twitter.com/_/status/994965339015299072

@Globe_Ripper @BallDropped @stewart_doe @AnonDRGN @whoopsbuni @exiledbytruth @RecipehMaker @DeanKo @rokro11 @JWontObey @ForeverFlatErth @BillNyeActorGuy @NASA It's not unaffected, just affected a lot less (assuming the moon is high in the sky. If you draw a diagram it should be apparent why.

2018-05-11T15:38:41+00:00

https://twitter.com/_/status/994965024031453184

@STVS_Belgium @nickmyer If someone is trying to keep this program secret, then why did they patent it? Patents are all publicly available. Perhaps A) patents are for non-secret things, like cloud seeding, or B) patents are speculative, for things that MIGHT be done in the future, or C) both.?

2018-05-11T15:35:08+00:00

https://twitter.com/_/status/994964127071158272

@STVS_Belgium @nickmyer It's for a photocopier.
https://patents.google.com/patent/US5486900

2018-05-11T15:32:36+00:00

https://twitter.com/_/status/994963492368072704

@STVS_Belgium @nickmyer There's lots of patents for cloud seeding and for geoengineering. But there's also a lot of patents on the list that are not for either. I think if the list is going to be

used, it should be fixed.

2018-05-11T15:31:18+00:00

https://twitter.com/_/status/994963166068011009

@STVS_Belgium @nickmyer I want the truth. That's why I'm always grateful when people point out mistakes I have made. I ask only for fair consideration.

2018-05-11T15:29:47+00:00

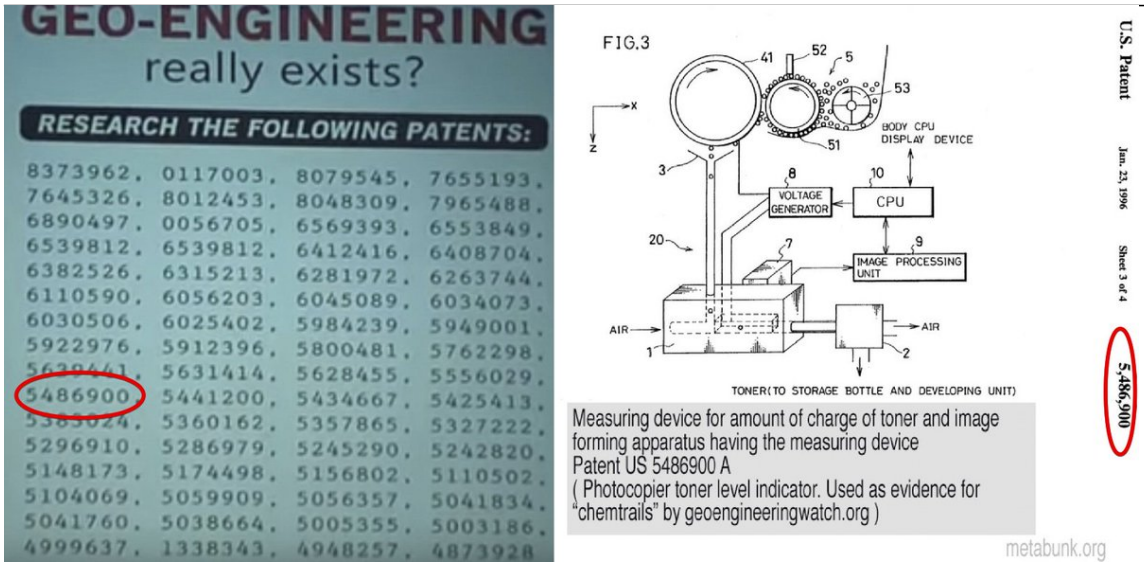
https://twitter.com/_/status/994962784013058048

@STVS_Belgium @nickmyer It is. Read it.

2018-05-11T14:56:39+00:00

https://twitter.com/_/status/994954444088397824

@STVS_Belgium @nickmyer Example of a mistake. One of those patents is for a photocopier toner level indicator. http://pbs.twimg.com/media/Dc7JsvVVQAA8_ZL.jpg



http://pbs.twimg.com/media/Dc7JsvVVQAA8_ZL.jpg

2018-05-11T14:46:49+00:00

https://twitter.com/_/status/994951968958238720

@STVS_Belgium @nickmyer I'll correct any mistake I'd made with facts. Please point out the specific mistakes. Thanks.

2018-05-10T22:55:53+00:00

https://twitter.com/_/status/994712660431155200

---

2018-05-10T21:04:20+00:00

https://twitter.com/_/status/994684587597942784

@KikPlenty @alienufovideos Not proven to be advanced tech though, there generally several other possibilities.

2018-05-10T21:02:01+00:00

https://twitter.com/_/status/994684002362519552

@TxUFOSightings See my list.

2018-05-10T18:37:58+00:00

https://twitter.com/_/status/994647753987796992

@KikPlenty @alienufovideos It's impossible to know what everything flying around is. Things are often far away and hard to see. Things are often observed only for limited periods of time. Sometimes people fake things. People sometimes fall for visual illusions. They will ALWAYS be UFOs, even if no aliens.

2018-05-10T18:35:39+00:00

https://twitter.com/_/status/994647171298312194

@KikPlenty @alienufovideos But greatly overstated the significance of this. Of course the military would be interested in unidentified craft - they might belong to enemies of the US.

2018-05-10T18:21:53+00:00

https://twitter.com/_/status/994643705863684098

@KikPlenty @alienufovideos One can be both. She eagerly accepted and trumpeted the Chilean UFO as being a "genuine" UFO based on years of research, Then it was debunked in a few days.

2018-05-10T17:45:03+00:00

https://twitter.com/_/status/994634434304327680

@matthetube Quit blubbering!

2018-05-10T17:43:11+00:00

https://twitter.com/_/status/994633963934134272

@KikPlenty @alienufovideos I'd put money on that being false too. Your list takes trivial things and makes then seem significant. NYT & WaPo just published Leslie Keane pieces. She's a UFO fan with an excessive trust in eyewitnesses. Look at the actual evidence, not the parade.

2018-05-10T17:37:37+00:00

https://twitter.com/_/status/994632564789755904

@TxUFOSightings The connection is that people point webcams at volcanoes because they do interesting things. Angled up to catch any plume. Then planes, birds, insects, drones, cars, and hikers get seen on the webcam footage and are called UFOs.

2018-05-10T17:34:15+00:00

https://twitter.com/_/status/994631718836432896

@KikPlenty @alienufovideos I'd put money on them not finding anything. Except they will probably find some statistically insignificant random variation and claim that it means something, so I'd never collect.

2018-05-10T17:02:55+00:00

https://twitter.com/_/status/994623834069188608

@KikPlenty @alienufovideos Well one out of three ain't bad.
Seriously though, didn't he just do some DNA work? He's not really a UFO guy.

2018-05-10T17:00:49+00:00

https://twitter.com/_/status/994623302839615489

The shadow that the Earth casts on the Moon during an eclipse is one of the classic clues of the shape of the Earth. Since the sun is so far away it also gives us a rough indication of the size of the Moon relative to the Earth. http://pbs.twimg.com/media/Dc2chY_UQAEsHSW.jpg

---

http://pbs.twimg.com/media/Dc2chY_UQAEsHSW.jpg

@thedrunkinmonk Bring it. :)

2018-05-10T15:38:37+00:00
https://twitter.com/_/status/994602617975144448
@strait328 @_kellimagine It's certainly an unusual amount of contrails, but it's just something that happened occasionally if the weather is just right - and if you live near an intersection of multiple air routes, like in the south of England.
https://www.youtube.com/watch?v=ZytXSawjFVU

2018-05-10T15:34:51+00:00
https://twitter.com/_/status/994601668036640768
@naomirwolf People have observed contrails creating cirrus clouds since the 1920s. They have been known to be a component in the climate (radiative forcing) since at least the 1960s.
https://journals.ametsoc.org/doi/pdf/10.1175/1520-0469%281971%29028%3C1513%3ACCATC%3E2.0.CO%3B2
Those "weird" emissions look like contrails.

@nickmyer @naomirwolf You think there are actually flesh eating robots roaming the world?

2018-05-10T15:22:35+00:00
https://twitter.com/_/status/994598581351825408
@KikPlenty @alienufovideos Article? It's a video from "Attack of the Show". Putoff and Davis both seem like they are rather on the fringe. If they have something interesting to say they don't need me to ask the questions. They can publish it.
UFOology is littered with treasured crumbs.

2018-05-09T19:29:04+00:00
https://twitter.com/_/status/994298223018704897

@MarkDice Well Dude Perfect has thirty million subscribers vs. your one million. There's a difference between entertainment and news.

2018-05-09T06:11:02+00:00

https://twitter.com/_/status/994097394353569792

@__dregs__ @KikPlenty @Joshphi23040839 @JeremyCorbell We'll see if they produce anything. In the meantime I'll just examine individual claims of evidence, like the videos.

2018-05-09T05:19:50+00:00

https://twitter.com/_/status/994084506050187266

@KikPlenty @Joshphi23040839 @__dregs__ @JeremyCorbell You'd think that if there actually was a material that defied human science then it would be easier to find info about it. The lack of forthcoming information after so long tends to indicate there's nothing of real interest.

2018-05-09T05:15:43+00:00

https://twitter.com/_/status/994083473542537216

@KikPlenty @Joshphi23040839 @__dregs__ @joerogan Finding evidence of aliens would be insanely cool. But it does not follow that one should then advocate for that interpretation. Science is not about what is cool, it's about where the evidence leads - even if that's something rather mundane. Motivated reasoning leads astray.

2018-05-09T05:13:00+00:00

https://twitter.com/_/status/994082787866144768

@KikPlenty @Joshphi23040839 @__dregs__ @joerogan It's not that I'm avoiding the opportunity. I just think I AM on the right side of science. I'm going by what the available evidence is. I've done deep analysis of several UFO videos and either figured them out, or found plausible hypotheses. Nothing that needs aliens.

2018-05-09T01:54:05+00:00

https://twitter.com/_/status/994032731150413825

@KikPlenty @Joshphi23040839 @__dregs__ Show it.

2018-05-09T00:59:22+00:00

https://twitter.com/_/status/994018957949452289

@KikPlenty @Joshphi23040839 @__dregs__ I love sci-fi , I love forteana, Iâ□□d love for aliens to be discovered. But I just donâ□□t see good evidence.

2018-05-09T00:56:55+00:00

https://twitter.com/_/status/994018341990756352

@KikPlenty @Joshphi23040839 @__dregs__ Metamaterials, which? They are just odd materials, nothing beyond current science demonstrated

---

2018-05-09T00:53:56+00:00

https://twitter.com/_/status/994017591373873153

@__dregs__ @KikPlenty @Joshphi23040839 â□□Helpedâ□□, according to Tom. Could cover a range of things.

2018-05-09T00:22:58+00:00

https://twitter.com/_/status/994009798881329152

@KikPlenty @Joshphi23040839 @__dregs__ "Backed"? What does that mean? Podesta is just another UFO fan. Nothing has been "backed" other than there was this program that had no results and was shut down. The NYT and Wapo pieces were by UFO fans (Keane)

2018-05-08T23:33:42+00:00

https://twitter.com/_/status/993997402091634688

@KikPlenty @Joshphi23040839 @__dregs__ It's only the story of century if there's actual disclosure or other evidence. Characterizing where we are now as "post-disclosure" is setting the bar rather low.

2018-05-08T23:31:48+00:00

https://twitter.com/_/status/993996921181163520

@KikPlenty @Joshphi23040839 @__dregs__ Convincing of what? I mean there's clearly some dots and lights in the sky that have not been conclusively identified. But I don't know of anything that's clear evidence of unknown advanced technology.

2018-05-08T20:42:48+00:00

https://twitter.com/_/status/993954392792432640

@__dregs__ @Joshphi23040839 Look at the advances Skunkworks made. It's all just advancements on existing tech. Reducing radar and IR signatures, a better STOVL fighter, variations on jet engines. They have no history of revolutionizing physics, just using it well. It's a different kettle of fish.

2018-05-08T20:08:17+00:00

https://twitter.com/_/status/993945707580030977

@Joshphi23040839 @__dregs__ Look at the list, it's a bunch of hand waving.

2018-05-08T20:07:31+00:00

https://twitter.com/_/status/993945510992990210

@Joshphi23040839 @__dregs__ @TTSAcademy I think he enjoyed his work at Skunkworks, and

he wants to build a spaceship. This was simply his only option to try something like that.

2018-05-08T20:05:09+00:00

https://twitter.com/_/status/993944915980705792

@Joshphi23040839 @__dregs__ Pretty much. What do you think is the most viable thing they are working on?

2018-05-08T20:04:07+00:00

https://twitter.com/_/status/993944658559430656

@__dregs__ @Joshphi23040839 @TTSAcademy I don;'t think he runs the podcast, if you mean this: https://lockheedmartin.com/insideskunkworks It's just a PR historical thing he's been on couple of times.

2018-05-08T20:00:38+00:00

https://twitter.com/_/status/993943782117670912

@__dregs__ @Joshphi23040839 @TTSAcademy They are essentially just managers though, somewhat insulated from the realities of science and engineering. What has Justice told us? That he's going to make an essentially magical spacetime-warping craft by leveraging science and talent. Why did nobody think of this before!

2022-06-13T15:47:45+00:00

https://twitter.com/_/status/1536374774615576577

@giddierone Really? Is there any documentation of this event - like kids drawing? Written or verbal accounts?

Sounds just like what I was thinking.

2022-06-13T15:43:52+00:00

https://twitter.com/_/status/1536373799230181378

@ArielPhenomenon @GrantCameron @disclosureteam_ Can they ask him when he'll release all the raw video he has?

2022-06-13T15:35:18+00:00

https://twitter.com/_/status/1536371641478918146

@AliensOnEarth_ @zorbonk Which one is the best one?

2022-06-13T15:34:10+00:00

https://twitter.com/_/status/1536371358141063168

@ChilliFowler The kids, now grown, think their memories are real. Memories seem real regardless of if they are or not.

2022-06-13T15:33:21+00:00

https://twitter.com/_/status/1536371150850142209

@darkman00861132 @hoaxeye No. I'm saying their "UFO" videos are too low quality to determine what the objects look like. Small, glares, out of focus, low resolution.

2022-06-13T15:32:05+00:00

https://twitter.com/_/status/1536370834033455104

@JohnSam10418239 @beta_sid @dan44269820 They are attempting to tell the same story and

they were interviewed TOGETHER. Obviously, their stories would converge. It's not a coincidence.

2022-06-13T15:14:48+00:00

https://twitter.com/_/status/1536366482103316482

@ChilliFowler "little men who looked a bit like Michael Jackson"

2022-06-13T15:09:27+00:00

https://twitter.com/_/status/1536365138424434689

@A__White__Raven @PThegermandude @h43z There are variations in what they said on video over the first few weeks.

That's why Nickerson really needs to release all the data he has - so the extent of the shifting stories can be assessed.

2022-06-13T15:07:22+00:00

https://twitter.com/_/status/1536364614123892736

@smiths617 I still dabble in 9/11, chemtrails, etc. But I find UFOlogy really fascinating.

There's some crossover. Like with Med Beds and JFK (supposedly derived from Roswell - similar to @Alien_Scientist's group's theory of modern technology)

https://www.thedailybeast.com/new-qanon-conspiracy-involves-a-magical-bed-for-zombie-jfk

---

2022-06-13T15:02:54+00:00

https://twitter.com/_/status/1536363486711648256

@A__White__Raven @PThegermandude @h43z Their stories changed at the start, even in the curated clips that are out there.

False memories are not something you recant. They seem as real as genuine memories.

Nickerson has a lot more data that he's not releasing.

2022-06-13T15:00:43+00:00

https://twitter.com/_/status/1536362938117738496

@KirbysCrackle Mack interviewed them six weeks later. The damage was largely done by then, although he did get them to start talking about telepathy.

2022-06-13T14:59:09+00:00

https://twitter.com/_/status/1536362543144243200

@JohnSam10418239 @beta_sid @dan44269820 The consistency you describe does not even exist in the available data. Going "out into the world" is not going to change that.

You would think, at the very least, there would be a spreadsheet. But no, we get curated excerpts from motivated individuals.

Where's the data?

2022-06-13T14:53:23+00:00

https://twitter.com/_/status/1536361093349580802

@PredatoryPanic @EvaporatingH2O When people discuss it in groups and are interviewed in groups, their stories convene and grow together. More so with kids.

This is not a deliberate thing.

2022-06-13T14:47:02+00:00

https://twitter.com/_/status/1536359494661206016

@KirbysCrackle I don't think it's roleplaying. I'm suggesting that as a possible way of recreating the genesis incident.

You could also have someone dressed as an alien (or just wearing a wetsuit and some welders goggles) come and wave at the kids. But that would be difficult.

2022-06-13T14:44:28+00:00

https://twitter.com/_/status/1536358849489170437

@AliensOnEarth_ @zorbonk Do you think that all the photos that look like hubcaps or mixing bowls are genuine non-human flying craft?

If not, then which ones do you think are not fake?

2022-06-13T14:41:38+00:00

https://twitter.com/_/status/1536358134511308801

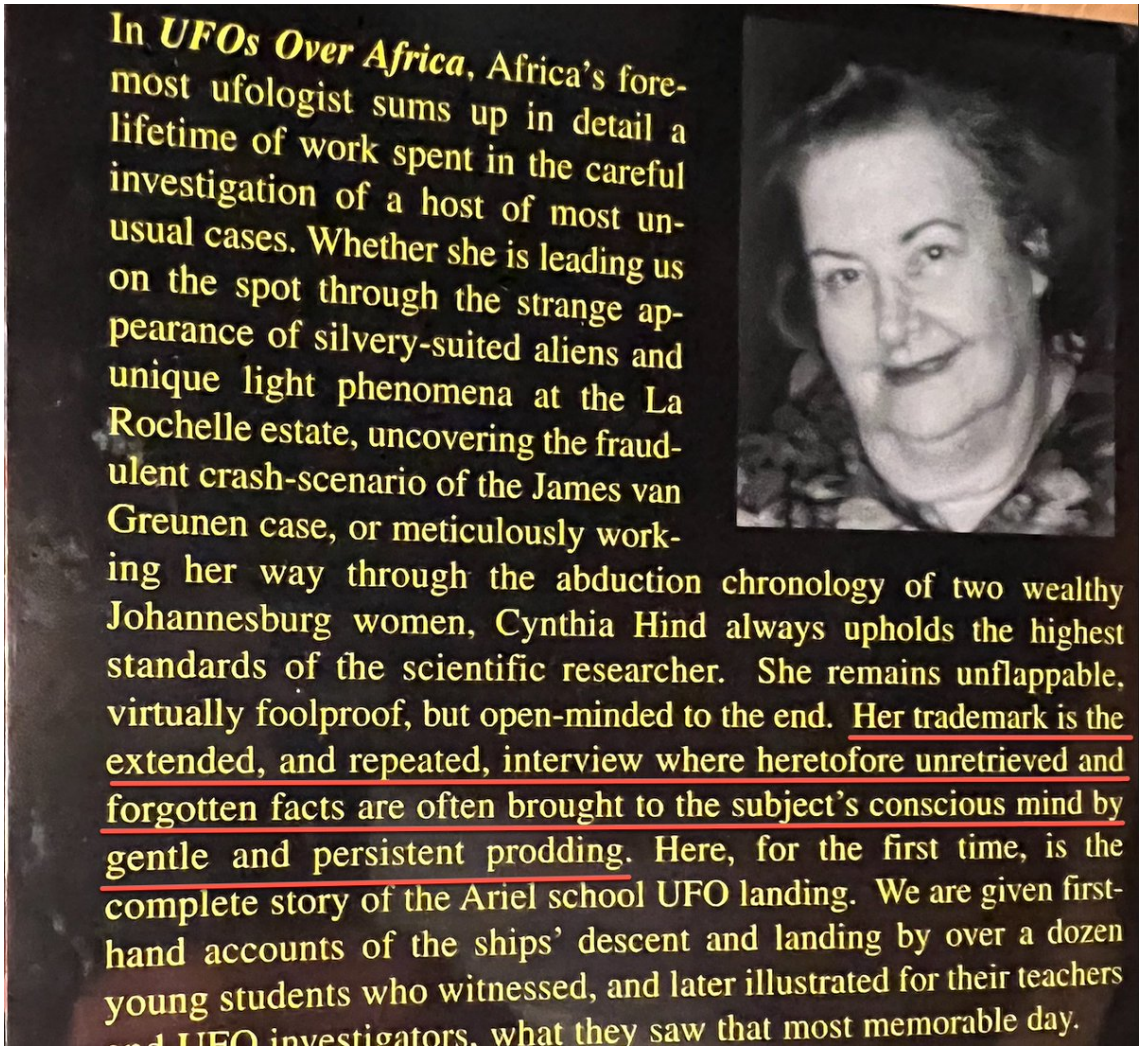
@PThegermandude @h43z It's a hypothesis. Are we not allowed to express what we feel is the more likely explanation. It's also possible there was a bizarre and world-changing encounter with aliens. But I would put that far down the list.

2022-06-13T14:31:18+00:00

https://twitter.com/_/status/1536355537767411712

@JohnSam10418239 @beta_sid @dan44269820 Tell a story together, and you get a somewhat consistent story, especially with lots of "gentle and persistent prodding"

http://pbs.twimg.com/media/FVI7HJbUcAAW2c1.jpg



http://pbs.twimg.com/media/FVI7GTvUUAAZQL-.jpg

http://pbs.twimg.com/media/FVI7HJbUcAAW2c1.jpg

2022-06-13T14:28:15+00:00

https://twitter.com/_/status/1536354768423071744

@h43z Not with "roleplaying", no. I think some kids saw an odd person in the middle of a UFO flap (caused by space debris a couple of days earlier), they started talking about it, then it grew from there

---

2022-06-13T14:22:45+00:00

https://twitter.com/_/status/1536353383140904962

@JohnSam10418239 @beta_sid @dan44269820 They believe their memories to be true.

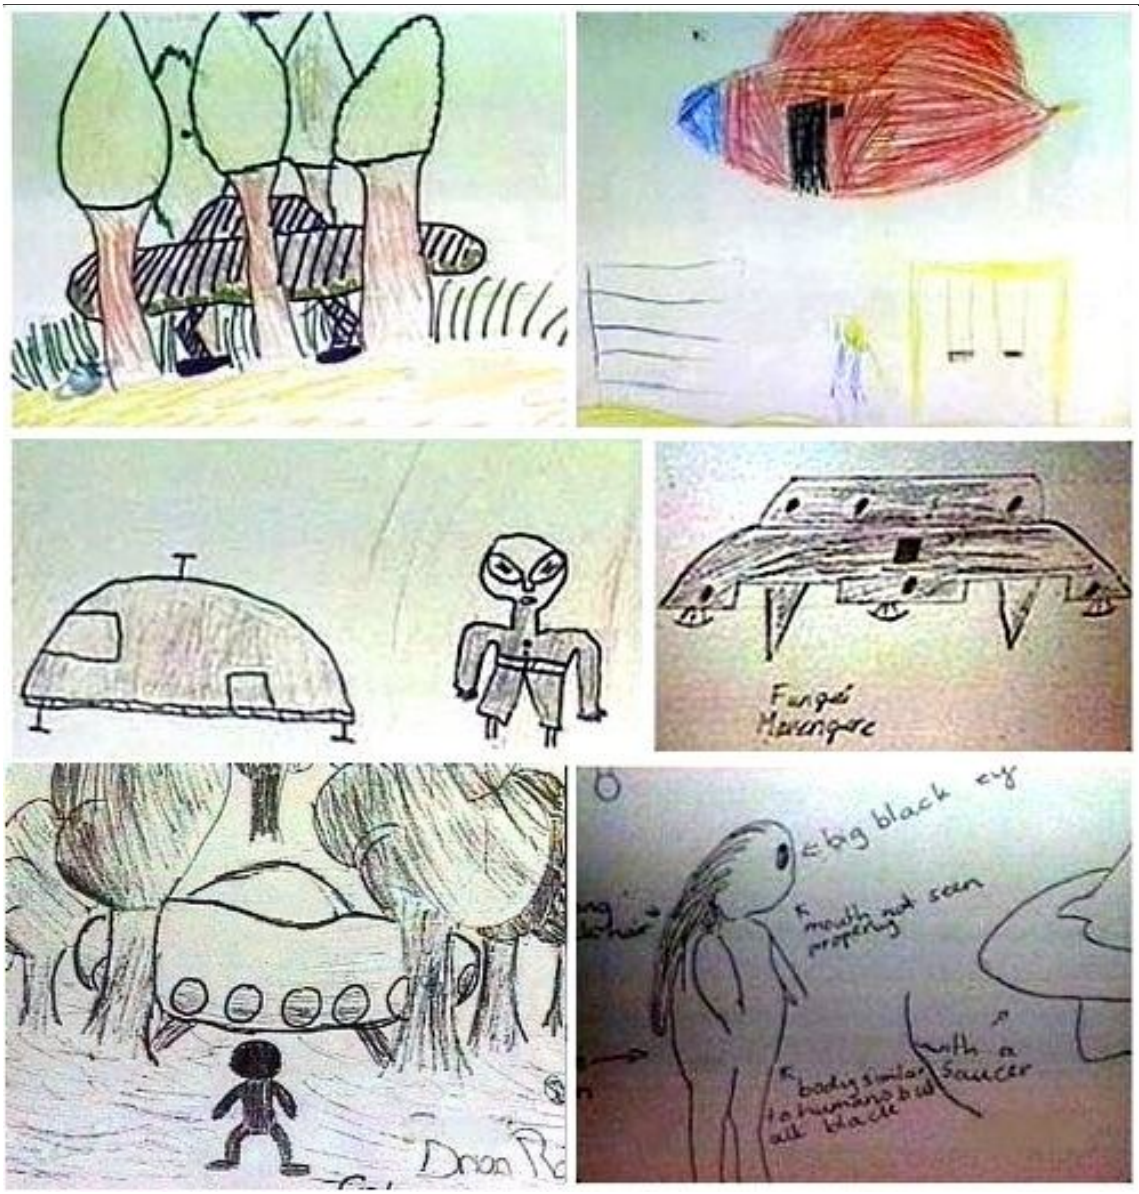
2022-06-13T14:21:34+00:00

https://twitter.com/_/status/1536353086695825410

Child psychologists, teachers, could you ethically recreate the Ariel School alien incident?

i.e. have kids roleplay seeing aliens and flying saucer on friday, then get them to draw pictures and retell on camera, in groups next week, then individually, months, then years later?

http://pbs.twimg.com/media/FVI401wVIAAVnmm.jpg



http://pbs.twimg.com/media/FVI01ScVsAIhVHF.jpg

http://pbs.twimg.com/media/FVI2SRyUYAENWn_.jpg

http://pbs.twimg.com/media/FVI401wVIAAVnmm.jpg

http://pbs.twimg.com/media/FVI28AbUEAADFss.jpg

2022-06-13T13:56:05+00:00

https://twitter.com/_/status/1536346674875904001

@Edmonstar_7 @zorbonk @Joel08316401 Also kids. Probably triggered by a balloon.

2022-06-13T13:54:01+00:00

https://twitter.com/_/status/1536346153050025985

@JohnSam10418239 @beta_sid @dan44269820 No, I said a "similar consistency" - like what you'd get in the case of kids illustrating a story together.

It would make a great experiment. Some teacher should try it.

2022-06-13T13:52:27+00:00

https://twitter.com/_/status/1536345760559558656

@Edmonstar_7 @zorbonk @Joel08316401 Adults who saw some excited kids and thought they were just messing around.

2022-06-13T13:51:54+00:00

https://twitter.com/_/status/1536345620251672579

@skyumpix Your points say it's really hard to take good photos of UFOs, but there are lots of good photos. Which is it?

2022-06-13T13:50:14+00:00

https://twitter.com/_/status/1536345199474905094

@Edmonstar_7 @zorbonk @Joel08316401 They were kids.

2022-06-13T13:49:58+00:00

https://twitter.com/_/status/1536345133003571201

@skyumpix They have edges, don't they? Or are they actually fuzzy blobs?

2022-06-13T13:45:20+00:00

https://twitter.com/_/status/1536343969809911811

@Edmonstar_7 @zorbonk @Joel08316401 It's one minor hypothesis. There is a large number of possibilities, and the truth will never be known.

But why do you think a welder is somehow less likely than a spaceship with telepathic aliens?

2022-06-13T13:42:18+00:00

https://twitter.com/_/status/1536343202722066437

@JohnSam10418239 @beta_sid @dan44269820 If you read kids a story, then have them draw pictures together of that story, then they will have a similar consistency.

2022-06-13T13:36:57+00:00

https://twitter.com/_/status/1536341859370295296

@skyumpix Aerodynamic contrails on a plane 80 miles away. We did full 3D reconstruction. Itâ□□s a perfect match.

2022-06-13T08:52:39+00:00

https://twitter.com/_/status/1536270311527550976

@skyumpix Sorry, that just sounds like a long list of increasingly implausible excuses.

If people can see them, then eventually there will be good photos. So far no.

2022-06-13T07:51:49+00:00

https://twitter.com/_/status/1536255002976477184

@TheOutThere2016 @Omengod But why?

2022-06-13T05:20:41+00:00

https://twitter.com/_/status/1536216968746831872

@the_cholla @lbf_tweet @MiddleOfMayhem @michiokaku Right, another anonymous out-of-context quote.

2022-06-13T05:16:22+00:00

https://twitter.com/_/status/1536215880622694400

@the_cholla @lbf_tweet @MiddleOfMayhem That's nothing at all like the gimbal. It's the position of the light that causes to the rotation of the lens flare. Almost as irrelevant as the knife.

2022-06-13T04:41:23+00:00

https://twitter.com/_/status/1536207078078918656

@SwinkInc Camera moves a lot. Object does not move much. See: https://www.youtube.com/watch?v=xI0-js7oXLU

2022-06-13T04:11:52+00:00

https://twitter.com/_/status/1536199649857482752

@the_cholla @lbf_tweet @MiddleOfMayhem @michiokaku Derotation would essentially be instant. Why not? Itâ□□s a vastly lighter mechanism than the pod roll

---

2022-06-13T02:56:09+00:00

https://twitter.com/_/status/1536180596484976641

@caitgaist @BrianSzy_PF @aka__V @Robot__Roberto @michiokaku Day says he considered radar glitches, or something civilian, right up until he heard Fravor freaking out.

2022-06-13T02:52:14+00:00

https://twitter.com/_/status/1536179611767230464

@the_cholla @lbf_tweet @MiddleOfMayhem @michiokaku How would that work? Itâ□□s not like gimbal is a hot knife held against a wall.

2022-06-13T02:50:28+00:00

https://twitter.com/_/status/1536179163320553472

@the_cholla @bradjohansson21 @Spectre67904513 @MiddleOfMayhem @michiokaku Saying it â□□flew away from himâ□□ is a bit misleading. Itâ□□s flying away from him yes, but itâ□□s not like it u and left. It made no real changes through the video.

2022-06-13T02:48:50+00:00

https://twitter.com/_/status/1536178753264529408

@the_cholla @bradjohansson21 @Spectre67904513 @MiddleOfMayhem @michiokaku Iâ□□ve not looked at it for a while, but thereâ□□s a chunk of uncertainty on the 5Â°/6Â° values - plus we donâ□□t have clouds, so hard to be as accurate as Gimbal.

2022-06-13T02:25:51+00:00

https://twitter.com/_/status/1536172968522395648

@the_cholla @bradjohansson21 @Spectre67904513 @MiddleOfMayhem @michiokaku He didnâ□□t â□□chaseâ□□ anything. The took a video of something, itâ□□s out of focus. Could a a plane o drone.

2022-06-13T02:24:00+00:00

https://twitter.com/_/status/1536172503999033344

@TheOutThere2016 Well itâ□□s pointless then.

2022-06-13T02:22:20+00:00

2022-06-13T00:50:20+00:00

https://twitter.com/_/status/1536148931003809792

@Tarcante @Oswald1160 @AtticusFinch_JD @michiokaku Has Kaku endorsed Knuth's (misleading) paper?

Has he even read it?

2022-06-13T00:48:50+00:00

https://twitter.com/_/status/1536148554531500032

@HighStrangenes3 There is a possibility that they are all mundane (at least in the sense of not requiring new physics, advanced technology, or aliens)

2022-06-13T00:34:00+00:00

https://twitter.com/_/status/1536144820304891905

@the_cholla @MiddleOfMayhem @michiokaku And when you are saying "Not saying Kaku is right" - you mean he's wrong. You should say that.

2022-06-13T00:33:05+00:00

https://twitter.com/_/status/1536144590540918784

@the_cholla @MiddleOfMayhem @michiokaku I disagree. FLIR1 could very well be a plane or a drone.

Gimbal's video is MUCH better explained by the distant straight line. Your loopy 10NM trajectory is far less Occamic.

2022-06-13T00:26:57+00:00
https://twitter.com/_/status/1536143050128228353
@AdmiralQuality It was shot from the passenger seat.
http://pbs.twimg.com/media/FVF59QRUsAAcC72.jpg

2022-06-13T00:25:17+00:00
https://twitter.com/_/status/1536142627963252736
Now it UFO videos looked like this, then they simply would not be UFO videos.

I can't say it strongly enough. THIS IS EVIDENCE.

The lack of good videos strongly suggests most (if not all) UFO videos are of mundane objects.
http://pbs.twimg.com/ext_tw_video_thumb/1536142255316037632/pu/img/TKEFchP5RqdWZ7hv.jpg

2022-06-13T00:21:40+00:00

https://twitter.com/_/status/1536141719544004609
@dellerm93 I don't have a good example of that. There are thousands of videos that are indeterminate, so hard to identify. Nothing unambiguously weird though. That's the problem.

2022-06-13T00:17:50+00:00
https://twitter.com/_/status/1536140753373515779
Twitter made it even worse - which is also something that happens

---

2022-06-13T00:15:17+00:00
https://twitter.com/_/status/1536140114165760000
I took this video of a flying object today. The original is 4K and you can tell what it is. But I've converted it to 180P to more accurately replicate the typical UFO experience.
The potato-level quality of the majority of UFO videos (including the Navy ones) is a MASSIVE clue.
http://pbs.twimg.com/ext_tw_video_thumb/1536139520915124224/pu/img/x1N_pTlYyc9o4axz.jpg

---

http://pbs.twimg.com/ext_tw_video_thumb/1536139520915124224/pu/img/x1N_pTlYyc9o4axz.jpg
2022-06-13T00:06:30+00:00
https://twitter.com/_/status/1536137901586542593
@the_cholla @MiddleOfMayhem @michiokaku They certainly don't have the exotic evidence of advanced propulsion that Kaku and others propose. Their motions are mundane. What they are is uncertain, but planes or drones of some sort are quite plausible explanations.

2022-06-12T19:06:09+00:00
https://twitter.com/_/status/1536062315459579904
@enmasse01 @MiddleOfMayhem @michiokaku Then he should have no problem in actually backing up his claims.

2022-06-12T18:20:31+00:00
https://twitter.com/_/status/1536050830729613317
@BostonsBuddha @CDVilsack Yes, I'm sure. Because it's the only usage that fits. It's obvious.

Why, which one do you prefer? Showing up? None of them make sense. This is silly.

2022-06-12T18:17:23+00:00
https://twitter.com/_/status/1536050043928469504
@CarpJayD I focus on specific claims, to see if those claims are true, or not, (if such a determination can be made).

With the Navy UFO videos, I've attempted to interview everyone involved, and have read or listened to hours of personal accounts.

2022-06-12T18:12:23+00:00
https://twitter.com/_/status/1536048783716323328
@CDVilsack @BostonsBuddha @michiokaku Kaku made explicit claims that the videos (analyzed frame-by-frame) showed things that defy the normal laws of physics, and I'm asking

him to back that up.

Or retract his claims. http://pbs.twimg.com/media/FVEj8v6VIAAQpYa.jpg

---

Michio Kaku 0:54

That's right. It used to be the third rail of a scientific establishment. If you're talking about UFOs, you are pretty much relegated to being a nutcase. And the giggle factor kicks in. Right? Yeah. But things have changed, then, you know, because of the fact that the military is now basically releasing hours of videotapes, of things that defy the normal laws of physics. And the military has admitted that, quote, "they're not ours". Before there was always that ambiguity, that maybe it's a new stealth bomber, or a new, fantastic device being prepared by the military. Nope. The military now admits that they're not ours, then the question is, Whose are they then?

Michio Kaku 2:12

It used to be that one person would see something in the sky and say, Look, Martha, look, there's something up there. Now, things have changed. Now, we have multiple sightings by multiple modes, that is the gold standard, the gold standard for looking for these objects, not just one person, but several people that are reputable, not just radar, but visual sighting, infrared sensors, telescopic evidence. Now we have multiple sightings by multiple modes. And so the burden of proof has shifted, it used to be the burden of proof was on the people who believed in UFOs, they saw something? Prove it! Now the burden of proof has shifted to the Pentagon to the military. Now they have to prove that these aren't extraterrestrial. And so I think there's been a sea change, a sea change in the last several years. You know, 50 years ago, there was a congressional hearing. And it was coming out of project Bluebook. And there was a lot of laughter and a lot of jokes about things, little green men and out of space 50 years ago, that's the way it was now, things have changed. Now people are looking at looking at: are they a threat militarily? What kinds of sensors do we have? What kind of metrics do we have, we now have frame-by-frame an analysis of these objects. These objects travel between Mach Five and Mach 20, that's 20 times the speed of sound. These objects can zigzag. And we can measure the g-force inside the this object, the g-forces are several hundred times the force of gravity. In other words, any living person's bones will be crushed by these objects. So they're probably drones of some sort. These objects can drop 70,000 feet in a few seconds. Think about that. It can drop a tremendous distance in just a few seconds, and they can go underwater. This is something that we didn't realize before. But yes, they can actually go underwater. And they also move without creating an exhaust or breaking the sound barrier. So these are things that we can now document frame by frame, looking at these videotapes.

http://pbs.twimg.com/media/FVEj8v6VIAAQpYa.jpg

https://twitter.com/_/status/1536033805324066816

@JACKonline700 @michiokaku So then why say "these are things that we can now document frame by frame, looking at these videotapes"?

If you can't actually do that, then it's still just stories.

2022-06-12T16:44:48+00:00

https://twitter.com/_/status/1536026743366004736

RT @AtticusFinch_JD: @MickWest @michiokaku And if he hasn't personally verified this, which obviously he has NOT, WHOSE analysis is he relyâ□¦

2022-06-12T16:22:21+00:00

https://twitter.com/_/status/1536021092573192192

@EMP_Wrecker @michiokaku I'd be all ears. Sounds fascinating.

But right now that's just fantasy. Like Kaku's characterization of the situation.

2022-06-12T16:05:32+00:00

https://twitter.com/_/status/1536016863242530816

A challenge to @michiokaku.

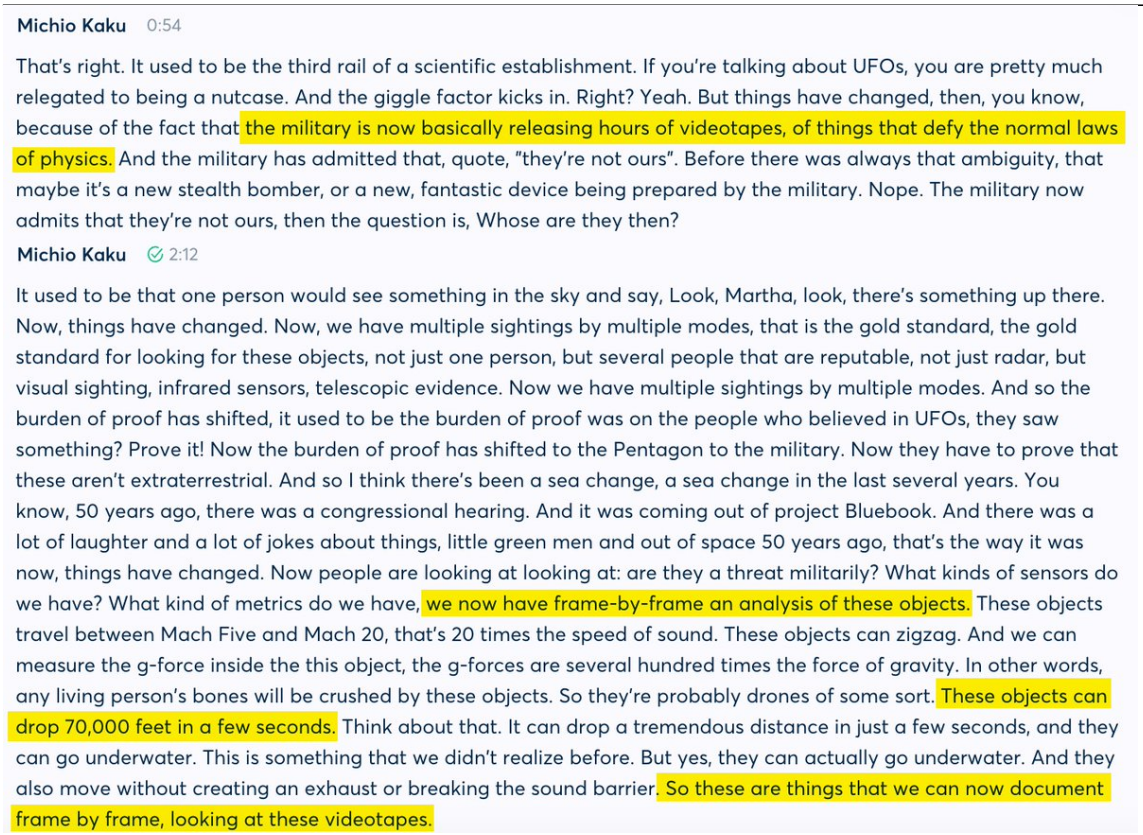
Back up your claims.

Which military-released video shows things that "defy the normal laws of physics"?

How did you personally verify this?

What's the math? http://pbs.twimg.com/media/FVEG6XmUEAAlLSt.jpg

---



Michio Kaku 0:54

That's right. It used to be the third rail of a scientific establishment. If you're talking about UFOs, you are pretty much relegated to being a nutcase. And the giggle factor kicks in. Right? Yeah. But things have changed, then, you know, because of the fact that the military is now basically releasing hours of videotapes, of things that defy the normal laws of physics. And the military has admitted that, quote, "they're not ours". Before there was always that ambiguity, that maybe it's a new stealth bomber, or a new, fantastic device being prepared by the military. Nope. The military now admits that they're not ours, then the question is, Whose are they then?

Michio Kaku 2:12

It used to be that one person would see something in the sky and say, Look, Martha, look, there's something up there. Now, things have changed. Now, we have multiple sightings by multiple modes, that is the gold standard, the gold standard for looking for these objects, not just one person, but several people that are reputable, not just radar, but visual sighting, infrared sensors, telescopic evidence. Now we have multiple sightings by multiple modes. And so the burden of proof has shifted, it used to be the burden of proof was on the people who believed in UFOs, they saw something? Prove it! Now the burden of proof has shifted to the Pentagon to the military. Now they have to prove that these aren't extraterrestrial. And so I think there's been a sea change, a sea change in the last several years. You know, 50 years ago, there was a congressional hearing. And it was coming out of project Bluebook. And there was a lot of laughter and a lot of jokes about things, little green men and out of space 50 years ago, that's the way it was now, things have changed. Now people are looking at looking at: are they a threat militarily? What kinds of sensors do we have? What kind of metrics do we have, we now have frame-by-frame an analysis of these objects. These objects travel between Mach Five and Mach 20, that's 20 times the speed of sound. These objects can zigzag. And we can measure the g-force inside the this object, the g-forces are several hundred times the force of gravity. In other words, any living person's bones will be crushed by these objects. So they're probably drones of some sort. These objects can drop 70,000 feet in a few seconds. Think about that. It can drop a tremendous distance in just a few seconds, and they can go underwater. This is something that we didn't realize before. But yes, they can actually go underwater. And they also move without creating an exhaust or breaking the sound barrier. So these are things that we can now document frame by frame, looking at these videotapes.

2022-06-12T15:56:16+00:00

https://twitter.com/_/status/1536014530047725569

@BarlowTerry And "Green Triangle" is not there because it's not a UAP - it was an example of something they identified.

Also it never even looked like it was defying any laws of physics.

2022-06-12T15:48:23+00:00
https://twitter.com/_/status/1536012545277894656
@No3spera There were 100 seconds released.

Kaku said "hours" were released

So he was off by a factor of at least 80x

So his claim is still total BS, which is the crux of the matter.

2022-06-12T15:41:17+00:00
https://twitter.com/_/status/1536010761566179329
@No3spera No, the crux was

A) hours, vs seconds
B) defying the laws of physics vs. not.

Huge mischaracterizations by Kaku. A "big lie" - but probably told honestly as he's not actually looked deep enough into it to lie about it.

2022-06-12T15:33:46+00:00
https://twitter.com/_/status/1536008869545070592
@BarlowTerry Sorry, 100 seconds.
FLIR1, Gimbal, and GoFast are all 30 seconds.
FlyBy is 10 seconds.
Those are the military official releases so far.

2022-06-12T15:12:48+00:00
https://twitter.com/_/status/1536003592070385664
@MadBunnyNo1 @uncertainvector Or maybe people often see birds?

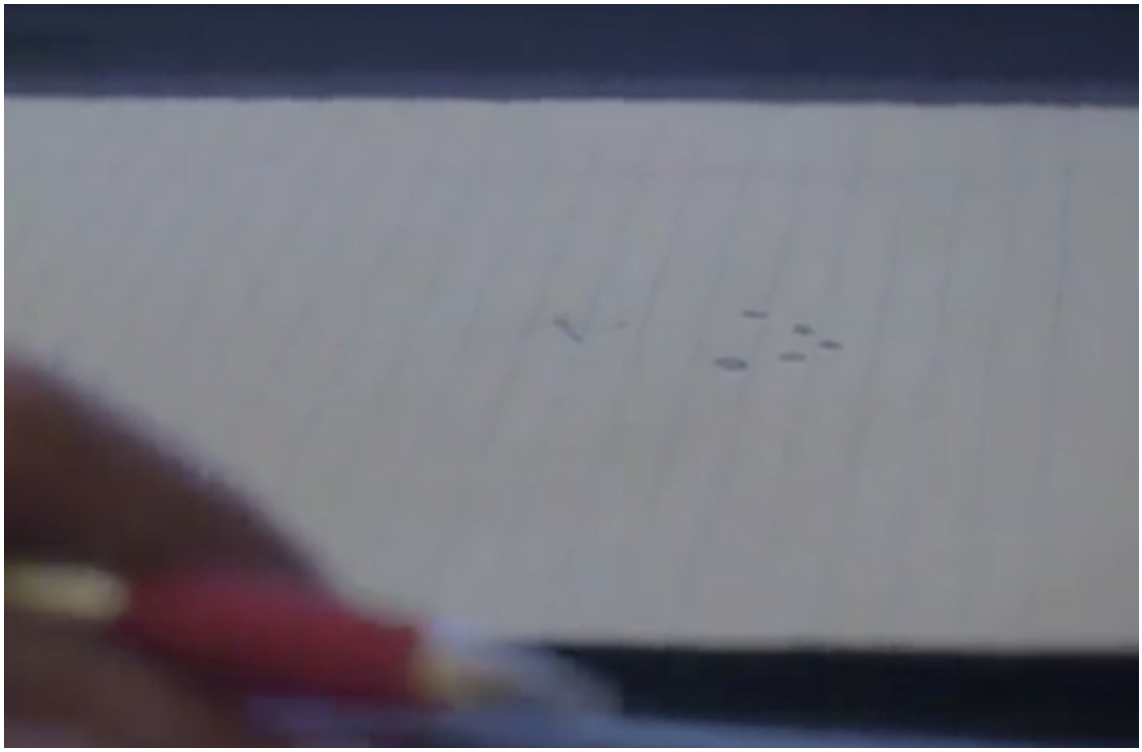
2022-06-12T15:12:00+00:00
https://twitter.com/_/status/1536003390857129984
Minor correction: Kaku did not say "hundreds of hours..." the actual quote is: "the military is now basically releasing hours of videotapes, of things that defy the normal laws of physics."

But it's still just 90 second of things that don't defy any laws of physics.
https://twitter.com/MickWest/status/1535005603805900800

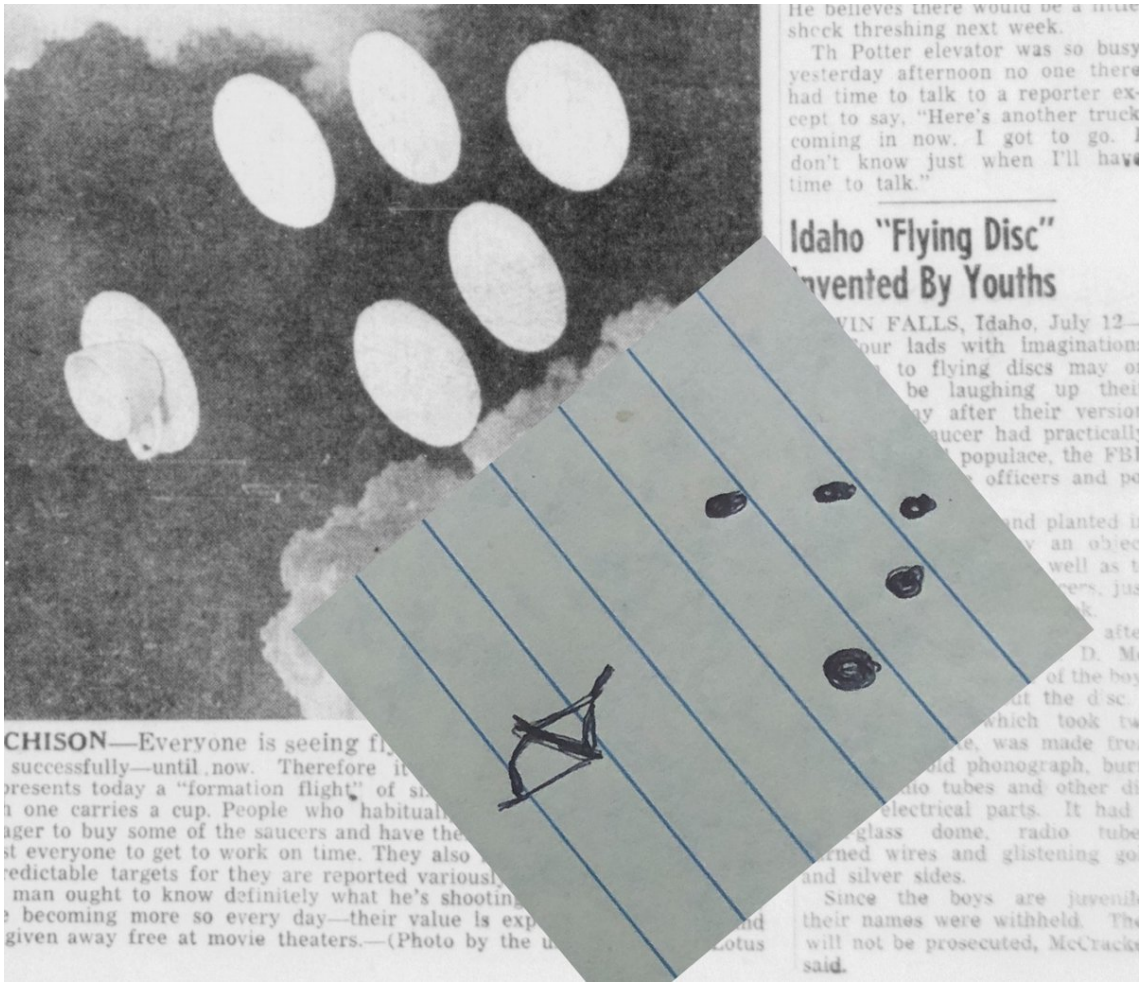
2022-06-12T15:06:13+00:00
https://twitter.com/_/status/1536001934313725952
June 24, 1947 - Kenneth Arnold sees the first "Flying Saucers"
July 12 1947 - Atchison Daily Globe produces a humorous interpretation.
2020 - @uncertainvector sketches some UFOs he saw on instrument tapes.
It's the EXACT SAME FORMATION!

Funny coincidence? Probably. http://pbs.twimg.com/media/FVD5VpbUEAEked0.jpg

http://pbs.twimg.com/media/FVD5VpbUEAEked0.jpg



http://pbs.twimg.com/media/FVD4BVIVsAADfla.jpg



He believes there would be a little shock threshing next week.

Th Potter elevator was so busy yesterday afternoon no one there had time to talk to a reporter except to say, "Here's another truck coming in now. I got to go. I don't know just when I'll have time to talk."

Idaho "Flying Disc" Invented By Youths

VIN FALLS, Idaho, July 12— our lads with imagination to flying discs may o be laughing up thei y after their versio ucer had practicall populace, the FB officers and p nd planted i an obje well as t ers, jus aft D. M of the boy ut the disc which took tw e, was made fro id phonograph, bur io tubes and other di electrical parts. It had glass dome, radio tube rned wires and glistening go and silver sides.

Since the boys are juvenil their names were withheld. The will not be prosecuted, McCrack said.

CHISON—Everyone is seeing fl successfully—until now. Therefore i presents today a "formation flight" of s one carries a cup. People who habitual ager to buy some of the saucers and have the st everyone to get to work on time. They also edictable targets for they are reported various man ought to know definitely what he's shootin becoming more so every day—their value is exp nd given away free at movie theaters.—(Photo by the u Lotus

http://pbs.twimg.com/media/FVD40k8UEAAu9e9.jpg

ATCHISON DAILY GLOBE

ATCHISON, KANSAS, SATURDAY, July 12, 1947 —8 PAGES

"SAUCERS" OVER ATCHISON—Everyone is seeing flying saucers these days but no one has photographed them successfully—until now. Therefore it is with considerable tongue-in-cheek pride that The Globe presents today a "formation flight" of six flying saucers. We know they are saucers because the sixth one carries a cup. People who habitually pour hot coffee into their saucers and blow on it are eager to buy some of the saucers and have their coffee cooled at 1,600 miles per hour, thus enabling almost everyone to get to work on time. They also may be used by trap shooters although they make unpredictable targets for they are reported variously to range from six inches to 20 feet in diameter and a man ought to know definitely what he's shooting at. As saucers become more plentiful—and they are becoming more so every day—their value is expected to decrease and sooner or later they will be given away free at movie theaters.—(Photo by the usually reliable Lotus Engraving Co.)

ity that he knew about.

George Thornton of Troy reports yields of up to 30 bushels in his vicinity, but said not too much wheat is coming in because not much of this small grain is grown in his vicinity any more. He believes there would be a little shock threshing next week.

Th Potter elevator was so busy yesterday afternoon no one there had time to talk to a reporter except to say, "Here's another truck coming in now. I got to go. I don't know just when I'll have time to talk."

Idaho "Flying Disc" Invented By Youths

TWIN FALLS, Idaho, July 12—(AP)—Four lads with imaginations that run to flying discs may or may not be laughing up their sleeves today after their version of a flying saucer had practically the entire local populace, the FBI, army intelligence officers and police on the run.

The boys created and planted in a local yard yesterday an object that looked to them, as well as to the army and civilian officers, just like a flying disc should look.

Their hoax was exposed after Assistant Police Chief I. D. McCracken was tipped one of the boys knew something about the disc.

The creation, which took two days to complete, was made from parts of an old phonograph, burned out radio tubes and other discarded electrical parts. It had a plexi-glass dome, radio tubes, burned wires and glistening gold and silver sides.

Since the boys are juveniles their names were withheld. They will not be prosecuted, McCracken said.

https://twitter.com/_/status/1535855892934995969

@RossElderWrites But do they look like this?

2022-06-12T05:21:38+00:00

https://twitter.com/_/status/1535854819218403330

@randomlydelibe1 If it's white, and there's some illumination from below. But it's not really clear. LIZ, of course.

2022-06-12T04:45:53+00:00

https://twitter.com/_/status/1535845824596348934

@randomlydelibe1 Kinda bird-like, but the video needs stabilizing.

2018-05-08T19:42:42+00:00

https://twitter.com/_/status/993939266081181696

@__dregs__ @Joshphi23040839 Weird that some people are UFO enthusiasts? Not at all. Justice probably liked being at Skunkworks, and this is the closest he can get now. It's a bit sad, because his talents are probably being wasted on nonsense.

2018-05-08T18:57:59+00:00

https://twitter.com/_/status/993928013623382016

@limitedview The bigger the image the more bandwidth can be saved. The non-Earth parts are about 15% of the area of the image. Also less storage space is needed for archives.

2018-05-08T18:48:53+00:00

https://twitter.com/_/status/993925724569403392

@limitedview There's un-cropped images, but if I showed you one what would you say about it?

2018-05-08T18:48:21+00:00

https://twitter.com/_/status/993925590578167808

@limitedview And again that's a cropped image. They use a circular mask for space, to save bandwidth.

2018-05-08T18:45:33+00:00

https://twitter.com/_/status/993924887164084224

@Joshphi23040839 @__dregs__ Did DeLonge actually post this? Got a link?

2018-05-08T18:43:35+00:00

https://twitter.com/_/status/993924388423483392

@limitedview Well those are shot though the atmosphere. But I'm not clear what your problem is? What would a "real" photo look like? Would you only accept a polaroid? What about all the photos taken from the ISS?

If you are simply going to declare everything as fake then why are you asking?

2018-05-08T18:28:54+00:00

https://twitter.com/_/status/993920695250833409

@__dregs__ @Joshphi23040839 It's the CARET hoax. There's some discussion here: http://www.abovetopsecret.com/forum/thread289007/pg1

2018-05-08T18:21:50+00:00

https://twitter.com/_/status/993918914932322304

@limitedview All photos are pixilated. Like most full-disk images they crop out the region outside the atmospheres to slightly reduct the file size.

But what WOULD the Earth shot from space look like, if not this? Can you draw a diagram?

2018-05-08T17:19:20+00:00

https://twitter.com/_/status/993903186866929664

@limitedview The images are shot in space. It proves there are cameras in geostationary orbit (and other orbits, if you look at AQUA, TERRA, etc. You can verify the images against ground observations.

2018-05-08T17:15:57+00:00

https://twitter.com/_/status/993902337478443008

@limitedview They are about the same, but it depends on how well they are calibrated and how steady you can hold them. At 400km at plane at 40,000 feet would be pretty much on the horizon and that's a lot of atmosphere to see through. Impressive if verified. Pics?

2018-05-08T04:07:34+00:00

https://twitter.com/_/status/993703933225852928

@TheJakeSimpson @crest_research Millions of people are capable of change. That there also exist other people who have more fixed beliefs is not a reason to give up on everyone. There's

plenty of good that can be done.

2018-05-07T23:36:22+00:00

https://twitter.com/_/status/993635682953318400

https://twitter.com/_/status/991079336726872064

@BayleeB79 @AdolfTwittler8 @PamJonesLiberty @naomirwolf @realDonaldTrump @OpChemtrails @rsqk9s What about it? It's just a plane contrails. Does something about it look odd to you ?

2018-04-30T22:16:38+00:00

https://twitter.com/_/status/991078901827825664

@rsqk9s @AdolfTwittler8 @PamJonesLiberty @naomirwolf @realDonaldTrump @OpChemtrails Lots of private jets are not tracked on publicly available "radar" like ADS-B. It's allowed for privacy/security reasons. However the vast majority of planes that leave contrails can be identified. The others don't look any different.

2018-04-30T22:14:36+00:00

https://twitter.com/_/status/991078391662063616
@AdolfTwittler8 @PamJonesLiberty @naomirwolf @realDonaldTrump @OpChemtrails @rsqk9s Planes fly in odd patterns for a variety of reasons. We can generally track them down on the Skydentify forum, if you've got some examples with time, date, and location. For example here's one that Patrick Roddie asked me to identify:
https://www.metabunk.org/zigzag-contrail-on-terra-image.t9065/

2018-04-30T22:10:54+00:00
https://twitter.com/_/status/991077460300083200
@AdolfTwittler8 @PamJonesLiberty @naomirwolf @realDonaldTrump @OpChemtrails @rsqk9s Straight lines form grid where they intersect. Planes don't all fly in the same direction.

2018-04-30T22:09:54+00:00
https://twitter.com/_/status/991077207450701824
@BayleeB79 @AdolfTwittler8 @PamJonesLiberty @naomirwolf @realDonaldTrump @OpChemtrails @rsqk9s First pic is of cloud seeding flares. The other tree are ballast barrels on various test planes which are identified here:
https://www.metabunk.org/debunked-chemtrail-plane-interior-ballast-barrels.t661/
http://pbs.twimg.com/media/DcEDa77UwAAd2RY.jpg

During flight tests in 1994, the cabin interior of the prototype *777* was filled with what at first glance looked like aluminum beer kegs. In fact, these 55-gallon barrels contained water. The contents of two dozen barrels in the forward cabin and a like number of barrels in the aft section were pumped back and forth to simulate shifts in center of gravity that would result from passengers moving about. The top photo shows the cabin as it is when the *777* is delivered.

http://pbs.twimg.com/media/DcEDYSWVwAE4DiN.jpg

Water tanks provided ballast to simulate passenger and cargo loads for flight testing. Not only could the tanks simulate various amounts of weight, they could also shift the weight fore and aft in flight through connecting pipes to test different center-of-gravity configurations. *Boeing*

@kerrijacobi @naomirwolf @PamJonesLiberty @realDonaldTrump @OpChemtrails @rsqk9s Here's some photos from a book on clouds from 1972. Contrails were the same then as they are now. http://pbs.twimg.com/media/Db94iw9UQAAUU4g.jpg

---

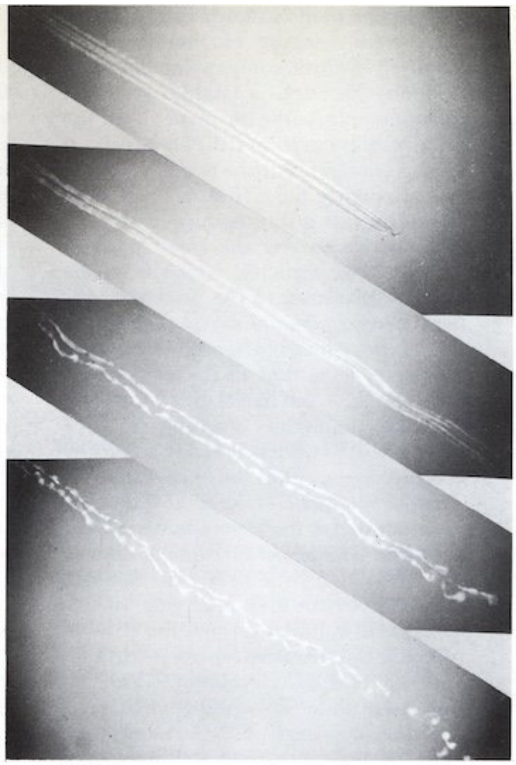
11.2.4 The contrail is formed about one wingspan behind the aircraft when the exhaust has mixed with sufficient air of the environment to produce saturation. The edges of the trails are ragged to begin with but further mixing evaporates these and the trail becomes smooth: this indicates that the condensation persists only in the low pressure region of the vortex cores.

Close to the aircraft it is seen that the two trails from the inner engines descend further than the outer ones, those on the right being separately visible but the outer left one being behind the inner left one. Often one complete rotation of the inner round the outer one can be seen.

In the second picture the trails appear hollow. This is because the exhaust did not enter the middle of the vortex core. The particles are too small for centrifuging to be significant.

The irregularities are intensified, and at the right end the mixing penetrates in a few places into the vortex cores and dissipates the cloud. The spacing of the loops must be determined by the distance apart of the vortices: irregularities of all wavelengths are unstable, but two loops very close together merge into one, while new loops can appear between those that are rather far apart. The interval between the first and last pictures is 90 sec.

Motion identical with that shown here has been observed in smoke trails emitted at the wing tips of a Comet aircraft at 3,000 metres which is far below the normal altitude for contrails.



11.2.4

11.2.5 The condensation outside the vortex cores persisted in the trail of the first aircraft to pass, but not in the trail of the second. It seems probable, therefore, that the first trail was frozen as a result of being at an environmental temperature near to or below −40°C. (See 11.4.)

These pictures were taken looking vertically upwards over a period of about three minutes, and because the aircraft was on a turn the downwash was inclined outwards. The effect is to give a view rather like the side view of a straight trail (see 11.2.3, 11.2.8). Where the vortices are closest together they have penetrated farthest, and the blobs correspond to the places where the mixing has penetrated into the vortex cores. In the lowest picture the linear clouds are composed of the detrained accompanying fluid.

@kerrijacobi @naomirwolf @PamJonesLiberty @realDonaldTrump @OpChemtrails @rsqk9s Those are photos of planes landing in misty conditions, producing streamers of aerodynamic contrails. Here's Paul Joseph Watson explaining:
https://www.youtube.com/watch?v=BlTeqBwf2Ic

2018-04-28T23:53:11+00:00
https://twitter.com/_/status/990378426652540928
@GeoeWatchDebunk Contrails move quite a lot in an hour. Since the wind aloft can be 50-100mph, they can often move that much in an hour. Best viewed in timelapse.

https://www.youtube.com/watch?v=gXl3T9FYKBw

2018-04-28T18:34:17+00:00
https://twitter.com/_/status/990298172051226624
@Oilfield_Jobs @FinancialTimes You have to be at least 100 miles from an airport to see contrails to/from that airport. Most contrails people see is from flyover traffic from airports 100s or 1000s of miles away.

2018-04-28T18:28:37+00:00

https://twitter.com/_/status/990095041107382273

@PamJonesLiberty @dianesheldon5 @OpChemtrails Contrails do sometimes turn the sky grey, yes.

But they are just clouds - water vapor condensed into clouds. They do nothing to your health. Look at real forms of pollution, like diesel trucks or power stations.

2018-04-28T05:03:59+00:00

https://twitter.com/_/status/990094254168035328

@naomirwolf @PamJonesLiberty @realDonaldTrump @OpChemtrails @rsqk9s They did look like this five years ago.

Check photos fro five years ago, Heck, check the chemtrail sites from five years ago, or ten years ago. Nothing has changed. You are just paying more attention to contrails.

2018-04-28T04:35:23+00:00

https://twitter.com/_/status/990087054938681344

@ConspiraFact @PamJonesLiberty @naomirwolf @realDonaldTrump @OpChemtrails @rsqk9s Really? Link to one of those documents that "admits" spraying. And not crop dusting, fire fighting, skywriting, or cloud seeding â actual geoengineering.
You won't find any.

2018-04-27T22:18:37+00:00
https://twitter.com/_/status/989992237772652544
@PamJonesLiberty @naomirwolf @realDonaldTrump @OpChemtrails @rsqk9s And yet it looks exactly like contrails. So there's actually plenty of questions about your claim.

2018-04-27T22:01:25+00:00
https://twitter.com/_/status/989987912031719424
@MolotoVNKA Erm, have you actually flown that route? You can't "move slightly to the right"
https://www.youtube.com/watch?v=WdKjO1j0-64

2018-04-27T21:51:22+00:00
https://twitter.com/_/status/989985380542726144
@MolotoVNKA SW and NE are 180Â° apart. What are you talking about?

I'm placing the plane where the FDR says it is. Or just 60Â° (240Â°) from the impact point.

2018-04-27T21:49:20+00:00
https://twitter.com/_/status/989984868938350592
@MolotoVNKA Which flight simulator do you use? I use X-Plane.

2018-04-27T21:48:11+00:00
https://twitter.com/_/status/989984580038873088
@MolotoVNKA I've hit it. What you CAN'T do is make a last minute sharp turn. If you are north of the annex then you miss the Pentagon.

2018-04-27T21:42:03+00:00
https://twitter.com/_/status/989983034827882496
@MolotoVNKA The animations shows 60Â° heading right (correcting from magnetic). It's impossible to hit the Pentagon if you fly north of the annex at 60Â° But it's a perfect fit for south. http://pbs.twimg.com/media/Db0gPiiVAAAp18M.jpg

---

2018-04-27T21:37:25+00:00

https://twitter.com/_/status/989981871424487424

@MolotoVNKA That data I sent you was from a FOIA request from Pilots for 9/11 Truth. It's the official FDR data.

2018-04-27T21:36:30+00:00

https://twitter.com/_/status/989981641136263169

@MolotoVNKA NE? Perhaps you need to draw a diagram. Both the animation and the data shows the plane heading towards the west facing wall

---

2018-04-27T21:30:07+00:00

https://twitter.com/_/status/989980033031651328

Here's the actual FDR data in a Google Earth KMZ.

https://www.metabunk.org/sk/aa77v2.5.3.kmz

http://pbs.twimg.com/media/Db0cpAOV0AA69k6.jpg

AA77 FDR CSVs (v2.5)

AAL77

This is a rendering of American Airlines flight 77 flight path, which was hijacked on 9/11/2001 and flown into the Pentagon.

Presented here are two plots, constructed from two data sources, available on the internet. The so called "Pilots for Truth" organization (PfT) provides their data, allegedly aquired from an original flight data recorder file, released to them under the Freedom of Information Act (FOIA), on their site, www.aa77fdr.com.

Other set of data comes from an independent 9/11 researcher/debunker, Mike Williams (MikeW of the JREF forum). He presents his FOIA aquired data on his site www.911myths.com.

Data for PfT flight path comes from their "Complete Tabular File", which is a Comma Separated Values (CSV) file. Columns used in this presentation are
"NAVlon" - geographical longitude coordinate
"NAVlat" - geographical latitude coordinate
"ALT" - presumably pressure altitude
"CASraw" - computed airspeed
"HDGtruecapt" - true heading
"HDGmagcapt" - magnetic heading
"ATTrollcapt" - roll
"ATTpitchcapt" - pitch
"NAVtrackangletrue" - track angle true
"NAVgndspdcapt" - ground speed
"ACClat" - lateral acceleration
"ACClong" - longitudinal acceleration
"ACCvert" - vertical acceleration

Latitude, longitude and altitude data were used to draw the plot and position the plane models. Models were further aligned with roll and pitch data. Speeds, accelerations and headings were only used in the popup balloons for each data point.

MikeW's flight path is a basic rendering of Lat/Long/altitude data.

Longitude data in MikeW's CSV file is originally offset by some 20 miles to the west. It has been adjusted for a take off from Dulles International. Lat/Long geolocation data is also presented in a much coarser way (1NM or 1 latitude minute as opposed to about 1 lat second resolution in the PfT CSV). This lack of geolocation resolution also prevents the rendering of plane models along data points.

There are no indications as to the actual Lat/Long accuracy of either data source. 911myths data has a native resolution of 1 nautical mile, while aa77fdr data shows some signs of interpolation. If the decoding of Lat/Long data is done in software, especially if it's done by interpolation or some inertial calculations, incorporating the weight of the aircraft, PfT might've introduced additional inaccuracies by processing their raw FDR file with a wrong template. Their CSV had been processed by Boeing 757-300 template, while AAL77 was a somewhat smaller and lighter Boeing 757-223 plane.

There appear to be no indications that Lat/Long data is accurate to anything more than a nautical mile. After all, planes don't take off half a mile south of the runway.

Special thanks to Dan O. of the JREF forum for providing a Boeing 757 3D model.

CSV sources:
aa77fdr.com
911myths.com
plane model:
Google 3D Warehouse

http://pbs.twimg.com/media/Db0cpAOV0AA69k6.jpg

2018-04-27T21:22:51+00:00

https://twitter.com/_/status/989978203983831041

@MolotoVNKA That doesn't match the animation though. So where are you getting that from?

2018-04-27T21:12:12+00:00

https://twitter.com/_/status/989975525526392832

@MolotoVNKA An animation is not data. I'm referring to the actual numbers.

Have you seen this:

http://www.journalof911studies.com/volume/2010/Calibration%20of%20altimeter_92.pdf

---

2018-04-27T21:08:55+00:00

https://twitter.com/_/status/989974699651227648

@MolotoVNKA And why does the actual FDR data in Google Earth show the correct path?

2018-04-27T21:08:07+00:00

https://twitter.com/_/status/989974495128514560

@MolotoVNKA There's plenty of accounts describing the incoming plane.

What exactly do you think might have happened? Where did the plane go? How did the light poles fall? Why do eyewitness describe the plane hitting light poles?

2018-04-27T21:06:33+00:00

https://twitter.com/_/status/989974101140754434

@MolotoVNKA No, that poor quality VIDEO appears to match. But the actual data puts it on the south side.

Also since the plane hit the light poles and the Pentagon, then that's where it had to be. Which is also consistent with most of the eyewitnesses. And the bodies of the passengers.

2018-04-27T21:01:48+00:00

https://twitter.com/_/status/989972908268142593

@MolotoVNKA They also saw it hit the Pentagon

2018-04-27T20:53:16+00:00

https://twitter.com/_/status/989970758024609793

@MolotoVNKA They were prompted and selected by the CIT, that's all. There were hundreds of people who saw the plane hit. The FDR data disagrees. This animation probably would demonstrate that if you went by the grid lines, not the badly placed texture.

2018-04-27T20:45:35+00:00

https://twitter.com/_/status/989968825520078848

@MolotoVNKA The problem is the very rough graphics they were using. If you plot the FDR on an actual map, you get this: http://pbs.twimg.com/media/Db0TX32VAAEfHzC.jpg

---

http://pbs.twimg.com/media/Db0TX32VAAEfHzC.jpg

2018-04-27T20:41:53+00:00

https://twitter.com/_/status/989967894082502656

@MolotoVNKA Aha, I see you are referring to this:

http://pbs.twimg.com/media/Db0SZaCV4AAx-Qj.jpg

http://pbs.twimg.com/media/Db0SZaCV4AAx-Qj.jpg

2018-04-27T20:32:37+00:00

https://twitter.com/_/status/989965562947096576

@MolotoVNKA And what's the problem there exactly? That track goes along the expected path, south of the Navy annex, and through the light poles.

2018-04-27T20:31:21+00:00

https://twitter.com/_/status/989965245786435585

@naomirwolf @PamJonesLiberty @realDonaldTrump @OpChemtrails @rsqk9s But Kucinich didn't say it was actually happening, did he? Lots of people are concerned about possible future geoengineering, me included. That does not mean "chemtrails" are currently a real thing.

2018-04-27T20:18:29+00:00

https://twitter.com/_/status/989962004449263616

@VectorNectar I've read them. What are you claiming they prove? A concern for biodiversity and sustainability?

2018-04-27T19:59:18+00:00

https://twitter.com/_/status/989957180152365056

@MolotoVNKA And where is this animation?

2018-04-27T19:58:41+00:00

https://twitter.com/_/status/989957024401117184

@erinbiba That's what "mute" is for :)

No worries, I can never resist a Google-fu challenge.

2018-04-27T06:06:34+00:00

https://twitter.com/_/status/989747614127026176

@MolotoVNKA The FDR data flies to the south of the Navy annex, and through the region with the light poles. The only thing that does not match this is a small percentage of eyewitness recollections.

What do you think is wrong with the animation? Show it.

2018-04-27T05:46:11+00:00

https://twitter.com/_/status/989742484606435329

2018-04-26T23:00:00+00:00

https://twitter.com/_/status/989640265689280512

@KennethOath @Oswald1160 @limitedview @ForeverFlatErth What's the problem there exactly? I've flow in a light aircraft to Catalina. Looked fine to me. Did you do the math?

2018-04-26T22:58:55+00:00

https://twitter.com/_/status/989639991713132544

@careydod Thanks! I never really played much THPS after THUG, which was the last one I worked on. I never got into THUGPro, but it's pretty interesting. May it live forever.

2018-04-26T22:05:06+00:00

https://twitter.com/_/status/989626451153448960

@KennethOath @Oswald1160 @limitedview @ForeverFlatErth I don't have answers I cannot question.

Science creates models of the universe, refining the models if they don't fit. We can test these models against our own personal observations. I have done this, and I've not found any problem with the spherical Earth model.

Have you?

2018-04-26T22:01:19+00:00
https://twitter.com/_/status/989625497473581056
@KennethOath @Oswald1160 @limitedview @ForeverFlatErth Do you believe anything, or do you simply enjoy being overly solipsistic and argumentative?

2018-04-26T21:52:11+00:00
https://twitter.com/_/status/989623198185541633
@KennethOath @Oswald1160 @limitedview @ForeverFlatErth Not really. Haven't you seen the output of doppler radar?

Anyway. I'll go by the weight of the evidence. Do you have any evidence that the Earth is flat?

2018-04-26T21:43:50+00:00
https://twitter.com/_/status/989621099041243136
@KennethOath @Oswald1160 @limitedview @ForeverFlatErth Now realize it does this for the entire hemisphere. Every 15 minutes. All day. Every day.

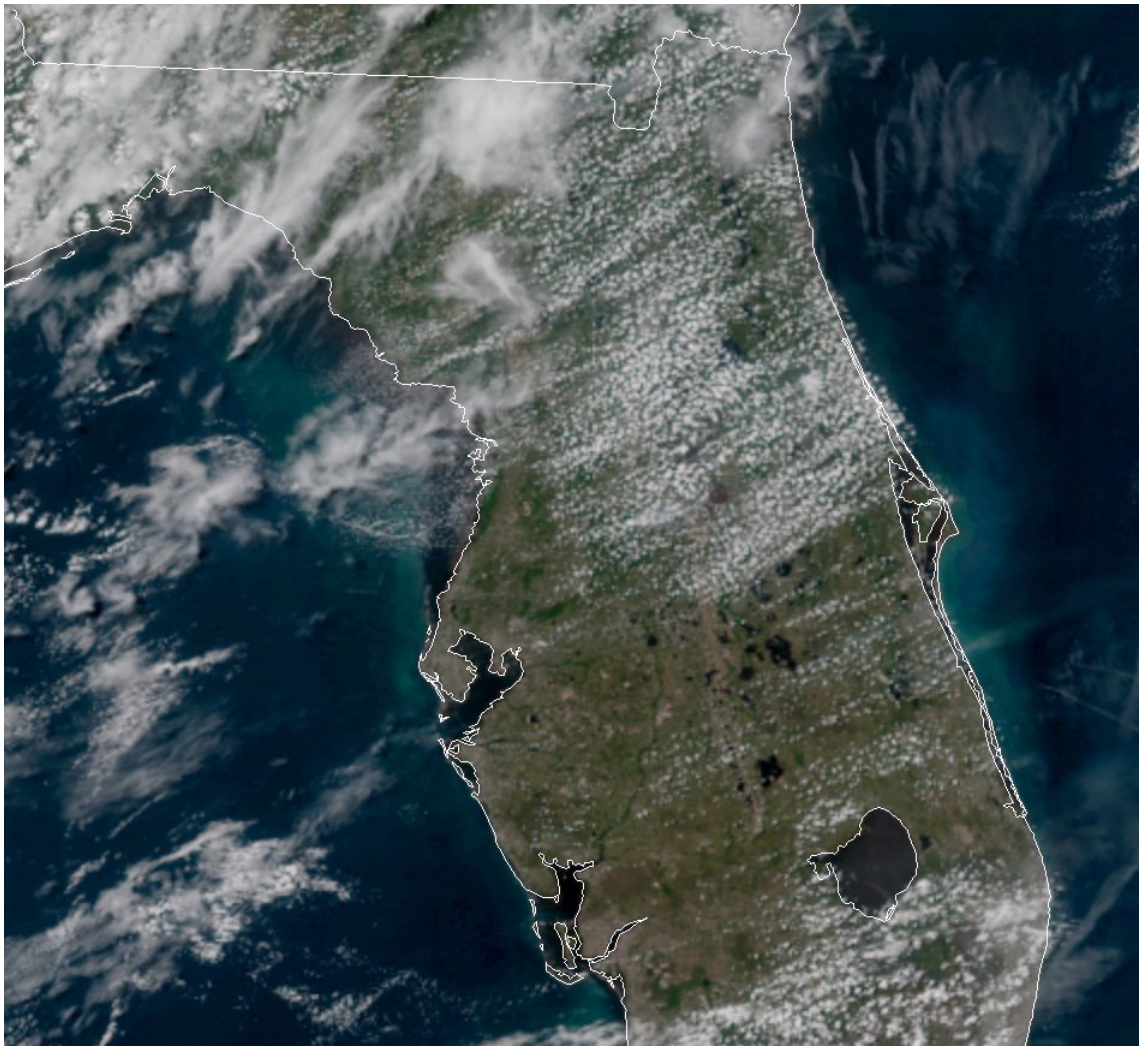
It's a camera, on a satellite, taking photos. That's the only way it could possibly work.
http://pbs.twimg.com/media/DbvW-usUwAAmcHR.jpg

http://pbs.twimg.com/media/DbvW-usUwAAmcHR.jpg

2018-04-26T21:42:40+00:00

https://twitter.com/_/status/989620802944360449

@KennethOath @Oswald1160 @limitedview @ForeverFlatErth Not without a vast network of airborne cameras, no. Look at a tiny bit of one GOES-16 image. It makes this every 15 minutes. Every single little cloud is correct. http://pbs.twimg.com/media/DbvWwBZV0AA2OWU.jpg



http://pbs.twimg.com/media/DbvWwBZV0AA2OWU.jpg

2018-04-26T21:40:17+00:00

https://twitter.com/_/status/989620205255979008

@KennethOath @Oswald1160 @limitedview @ForeverFlatErth Yes, I'm an expert in 3D modeling. I used to be technical director of Neversoft Entertainment.

2018-04-26T21:39:05+00:00

https://twitter.com/_/status/989619902955728896

@KennethOath @Oswald1160 @limitedview @ForeverFlatErth I'm a computer graphics expert. I understand. So I know how impossible it would be to fake. However it's a difficult thing to explain to other people. Look at GOES-16 animations.

2018-04-26T21:37:42+00:00

https://twitter.com/_/status/989619555558305792

@KennethOath @Oswald1160 @limitedview @ForeverFlatErth This one could not. You'd need millions of balloons for a start. Because the images are consistent FROM ABOVE. It's flawless. Have you looked at GOES-16 animations?

http://rammb-slider.cira.colostate.edu/?sat=goes-16&sec=full_disk&x=9215&y=4934&z=5&im=12&ts=1&st=0&et=0&speed=130&motion=loop&map=1&lat=0&p%5B0%5D=16&opacity%5B0%5D=1&hidden%5B0%5D=0&pause=0&slider=-1&hide_controls=0&mouse_draw=0&s=rammb-slider

https://twitter.com/_/status/989617353179643904

@KennethOath @Oswald1160 @limitedview @ForeverFlatErth They consistently match observations from the ground. "Ground truth". I've checked this, https://www.metabunk.org/how-to-prove-satellite-images-are-real-ground-truth.t8781/

2018-04-26T18:50:00+00:00

https://twitter.com/_/status/989577350521151489

@JiriGlembek @VectorNectar I'm not arguing credibility. Here I'm debunking a very specific claim of evidence. The claim here is that Brennan's statements about SAI geoengineering are evidence it exists. I'm explaining that it is NOT evidence, and I give counterexamples to illustrate the logic.

2018-04-26T17:49:55+00:00

https://twitter.com/_/status/989562231070253056

@DanPeacock12 @HealthRanger Explained here: http://contrailscience.com/barium-chemtrails/ http://pbs.twimg.com/media/DbuhlxFUQAAB4u4.jpg

---

Barium Chemtrails on KSLA

Brief Summary:

- Samples of water were collected in August 2007, in Stamps Arkansas, by leaving some bowls outside for a month
- The resultant dirty water was tested by KSLA and was found to have the same amount of barium in it as most municipal tap water.
- The reporter misunderstood the results, and said there was a lot of Barium
- The reporter now admits he was mistaken, and that he found no evidence for chemtrails

http://pbs.twimg.com/media/DbuhlxFUQAAB4u4.jpg

2018-04-26T17:34:26+00:00

https://twitter.com/_/status/989558334259785728

@JiriGlembek @VectorNectar The argument is that talking about possibly doing something does not mean that that thing is currently being done.
What is the flaw in that argument?

2018-04-26T17:27:45+00:00

https://twitter.com/_/status/989556653723807744

@HealthRanger "Irrefutable proof" of something nobody has ever denied. Lead in AV gas is a known issue. Far less than the old lead in gasoline problem. It's gradually being phased out. You seem to be conflating it with the false "chemtrails" issue.
https://www.faa.gov/about/initiatives/avgas/

2018-04-26T17:23:16+00:00

https://twitter.com/_/status/989555524168384512

@randallme It's logical to assume that everyone makes mistakes sometimes. Being wrong is always a possibility for everyone, some people less than others, sure, but nobody is 100% infallible.

2018-04-26T16:49:48+00:00

https://twitter.com/_/status/989547100772814848

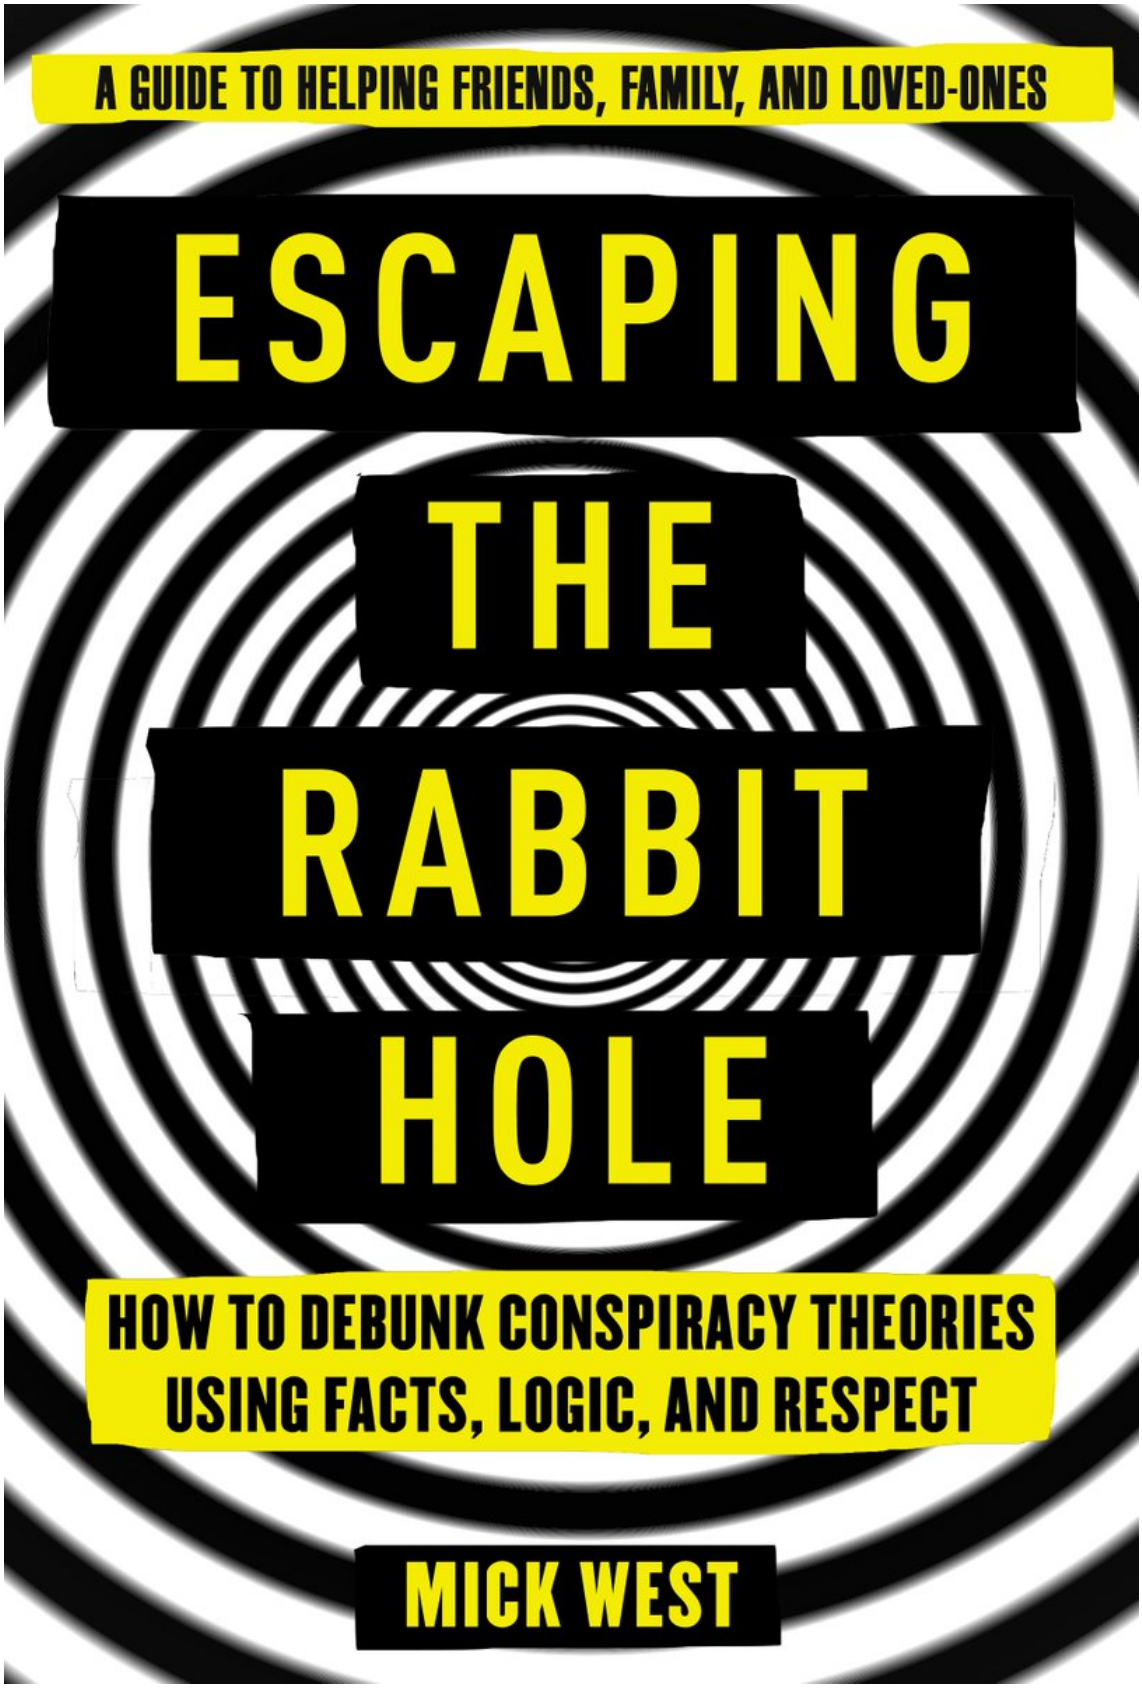
@intellihubnews @ShepardAmbellas Write it down. It will save time later.

2018-04-26T16:43:26+00:00

https://twitter.com/_/status/989545499551195136

Hitting the shelves in September, "Escaping the Rabbit Hole" examines how real people get out of the conspiracy theory rabbit hole, and what you can can do to help them. I cover a spectrum of theories, from 9/11 controlled demolitions to Flat Earth. And chemtrails, of course.

http://pbs.twimg.com/media/DbuRjHvVQAICCwO.jpg



http://pbs.twimg.com/media/DbuRjHvVQAICCwO.jpg

2018-04-26T16:32:57+00:00

https://twitter.com/_/status/989542859379376133

@intellihubnews @ShepardAmbellas Not really, the idea that someone was shooting out of a helicopter in plain sight of potentially hundreds of thousands of people is something we can dismiss due to absence of evidence.

2018-04-26T16:30:26+00:00

https://twitter.com/_/status/989542226186260481

@limitedview @KennethOath @Oswald1160 @ForeverFlatErth @rsimmon Its a photo. On film. One of many.

https://www.flickr.com/photos/projectapolloarchive/21081863984

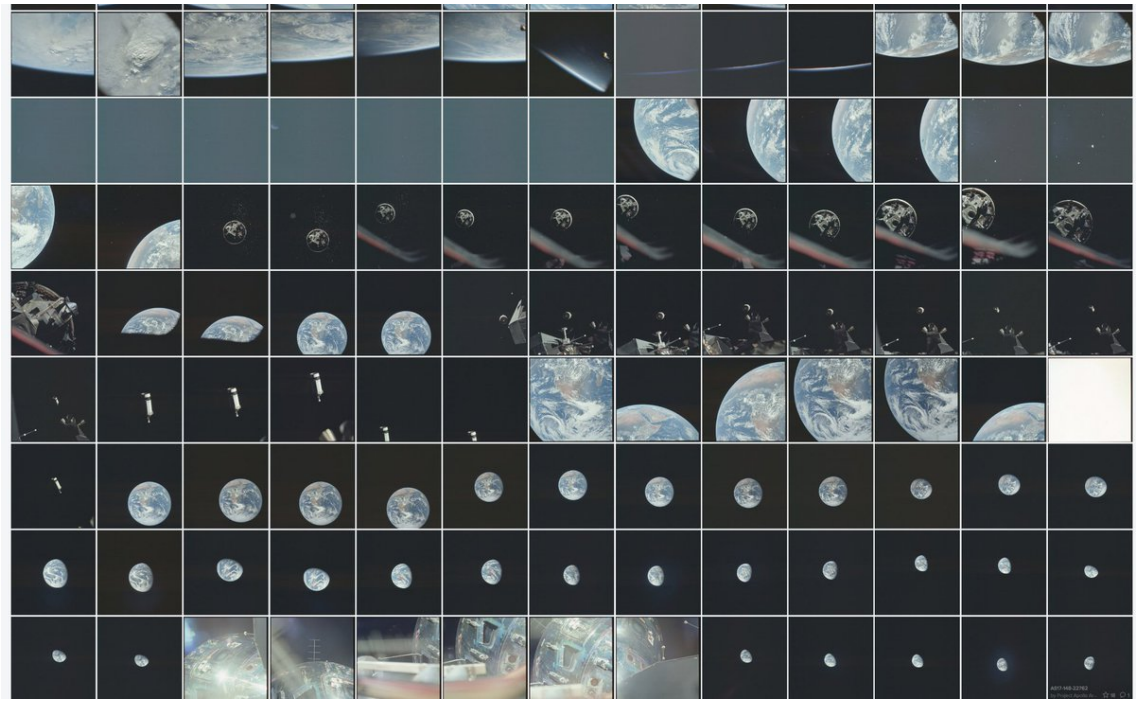
http://pbs.twimg.com/media/Dbt9On2U0AAICtL.jpg
2018-04-26T14:56:28+00:00
https://twitter.com/_/status/989518581330132993
@JgvJaime Those are actually ballast barrels on test planes. They are full of water for weight and balance. https://www.metabunk.org/debunked-chemtrail-plane-interior-ballast-barrels.t661/
http://pbs.twimg.com/media/Dbt55VKVQAEI4_V.jpg

During flight tests in 1994, the cabin interior of the prototype *777* was filled with what at first glance looked like aluminum beer kegs. In fact, these 55-gallon barrels contained water. The contents of two dozen barrels in the forward cabin and a like number of barrels in the aft section were pumped back and forth to simulate shifts in center of gravity that would result from passengers moving about. The top photo shows the cabin as it is when the *777* is delivered.

http://pbs.twimg.com/media/Dbt55VKVQAEI4_V.jpg
2018-04-26T13:55:47+00:00
https://twitter.com/_/status/989503307554017280
@KennethOath @Oswald1160 @limitedview @ForeverFlatErth You should check out the other images on the same roll of film as the 1972 Blue Marble image. Do you think they are composites too? http://pbs.twimg.com/media/Dbtr9H5VwAA7D9i.jpg

---



http://pbs.twimg.com/media/Dbtr9H5VwAA7D9i.jpg

2018-04-26T13:53:19+00:00

https://twitter.com/_/status/989502686968954881

@KennethOath @Oswald1160 @limitedview @ForeverFlatErth Oswald linked to a thread that contained a reference to the 1972 Blue Marble image.

You though that he was referring to the more recent Blue Marble image.

What else?

2018-04-26T13:47:51+00:00

https://twitter.com/_/status/989501312474628096

@KennethOath @Oswald1160 @limitedview @ForeverFlatErth Your brought up the blue marble. Now admittedly you did it BY MISTAKE, thinking that Oswald was referring to it. But you were still the first to mention it.

So let's discuss the the 1972 blue marble image, which is not a composite image.

2018-04-26T13:42:38+00:00

https://twitter.com/_/status/989499999753879553

@KennethOath @Oswald1160 @limitedview @ForeverFlatErth Ken, you are just avoiding discussing the actual issue here. Let's talk about the Blue Marble images if you like. You now know the 1972 image is not a composite, right?

2018-04-26T13:40:17+00:00

https://twitter.com/_/status/989499409216950274

@VectorNectar Contingency plans for what happens if the President has been assassinated are discussed by the CIA. Does that mean the President has been assassinated.

2018-04-26T13:39:16+00:00

https://twitter.com/_/status/989499153032990720

@VectorNectar Non-existent missions to Mars are also discussed by NASA. Does that mean

there are people on Mars?

2018-04-26T13:37:10+00:00

https://twitter.com/_/status/989498621853810689

@KennethOath @Oswald1160 @limitedview @ForeverFlatErth He brought up that thread, because it related to your question. He did not bring up the Blue Marble.

You seem to avoid the important issue here. There are lots of actual photos the Earth from space.

2018-04-26T13:32:50+00:00

https://twitter.com/_/status/989497534656606209

@KennethOath @Oswald1160 @limitedview @ForeverFlatErth You did bring it up. You were shown a thread about a general globe viewing topic. You saw the 1972 blue marble image mentioned in that thread. Then you posted that it was not a photograph. But you were actually thinking about the 2012 composite image. https://en.wikipedia.org/wiki/The_Blue_Marble

---

2018-04-26T13:29:23+00:00

https://twitter.com/_/status/989496664917401601

@KennethOath @Oswald1160 @limitedview @ForeverFlatErth The 1972 blue marble image IS a photograph. https://www.flickr.com/photos/projectapolloarchive/21081863984

2018-04-26T13:26:16+00:00

https://twitter.com/_/status/989495880125374464

@KennethOath @Oswald1160 @limitedview @ForeverFlatErth You were incorrect. You said the Blue Marble image was a composite, and referenced a thread about the 1972 image, which was not.

2018-04-26T13:25:05+00:00

https://twitter.com/_/status/989495582564671489

@KennethOath @Oswald1160 @limitedview @ForeverFlatErth Like tried to observe the apparent size of the sun through the day?

2018-04-26T13:24:42+00:00

https://twitter.com/_/status/989495487802716162

@KennethOath @Oswald1160 @limitedview @ForeverFlatErth Have you ever done any experiments?

2018-04-26T13:23:45+00:00

https://twitter.com/_/status/989495247066427398

@KennethOath @Oswald1160 @limitedview @ForeverFlatErth So you are just being semantic?

2018-04-26T13:23:28+00:00

https://twitter.com/_/status/989495176153350149

@KennethOath @Oswald1160 @limitedview @ForeverFlatErth Post a link to this readme file.

2018-04-26T13:22:30+00:00

https://twitter.com/_/status/989494933143744512

@KennethOath @Oswald1160 @limitedview @ForeverFlatErth Brought what up? That thread

references the 1972 Blue Marble image, which IS a single image, taken from Apollo 17.

2018-04-26T13:19:05+00:00

https://twitter.com/_/status/989494070912270336

@KennethOath @Oswald1160 @limitedview @ForeverFlatErth Why?

2018-04-26T13:18:35+00:00

https://twitter.com/_/status/989493947251572738

@KennethOath @Oswald1160 @limitedview @ForeverFlatErth Perhaps if you explained WHY you asked? http://pbs.twimg.com/media/DbtjdKtV0AASlT7.jpg

---

http://pbs.twimg.com/media/DbtjdKtV0AASlT7.jpg

2018-04-26T13:16:44+00:00

https://twitter.com/_/status/989493481948172288

@KennethOath @Oswald1160 @limitedview @ForeverFlatErth Explain why you bring up Blue Marble. Otherwise it looks like you are trolling.

2018-04-26T13:16:14+00:00

https://twitter.com/_/status/989493356043501568

@KennethOath @Oswald1160 @limitedview @ForeverFlatErth Why are you bringing up the Blue Marble image? It was created as a high resolution composite from low altitude images. Like Google maps. It's irrelevant. There's thousands of full frame images of the Earth from space. Like GOES-16, DSCOVR, Himawari-8, etc.

2018-04-26T06:48:43+00:00

https://twitter.com/_/status/989395832469315584

@KennethOath @limitedview @ForeverFlatErth I'll check back tomorrow. Maybe include a diagram.

2018-04-26T06:46:45+00:00

https://twitter.com/_/status/989395339735019520

@KennethOath @limitedview @ForeverFlatErth How high above a 4000 mile radius globe Earth would you need to be to make it look like a 1" radius tennis ball that was two inches from your eye?

2018-04-26T06:45:04+00:00

https://twitter.com/_/status/989394914352873472

@KennethOath @limitedview @ForeverFlatErth Let me ask you a question.

2018-04-26T06:44:22+00:00

https://twitter.com/_/status/989394740775866368

@KennethOath @limitedview @ForeverFlatErth If you were to say you can see a tennis ball is a ball from one inch away, then that's very roughly 3000 miles up on the globe Earth. So if you want the same angular sized image of the Earth as of the tennis ball, then go 3,000 miles up.

2018-04-26T06:42:22+00:00

https://twitter.com/_/status/989394236725383168

@KennethOath @limitedview @ForeverFlatErth There is no such altitude. There's no such distance for a tennis ball either. However you can use the latter to establish simple equivalences for the the former.

2018-04-26T06:38:46+00:00

https://twitter.com/_/status/989393330134966274

@KennethOath @limitedview @ForeverFlatErth Assume I have a deep understanding of projective geometry, cameras, and vision. Then ask a sensible question.

2018-04-26T06:28:21+00:00

https://twitter.com/_/status/989390706857803776

@KennethOath @limitedview @ForeverFlatErth Explain why you asked that.

2018-04-26T06:27:57+00:00

https://twitter.com/_/status/989390609294151680

@KennethOath @limitedview @ForeverFlatErth Assume I have a deep understanding of 3D geometry. Then ask a serious question.

2018-04-26T06:27:03+00:00

https://twitter.com/_/status/989390382726168576

@KennethOath @limitedview @ForeverFlatErth Assume I do. Then ask a serious question.

2018-04-26T06:25:22+00:00

https://twitter.com/_/status/989389957436325888

@KennethOath @limitedview @ForeverFlatErth Explain why you are asking this.

2018-04-26T06:24:41+00:00

https://twitter.com/_/status/989389786417790976

@KennethOath @limitedview @ForeverFlatErth Why don't you explain the reason behind your question? Then I'll be able to answer it better.

2018-04-26T06:23:12+00:00

https://twitter.com/_/status/989389412218765312

@KennethOath @limitedview @ForeverFlatErth It's really unclear what you are asking? You just

want to know the height at which the entire horizon is visible at once? Of the height at which the disk of the Earth has a certain angular size? These are all simple math things (assuming you can ballpark the FOV of a human)

2018-04-26T06:20:40+00:00

https://twitter.com/_/status/989388776186101760

@KennethOath @limitedview @ForeverFlatErth But it's still "just the horizon", by your reckoning. Just a lot more of the half of the plane than the pool photo.

2018-04-26T06:19:16+00:00

https://twitter.com/_/status/989388423642234881

@KennethOath @limitedview @ForeverFlatErth It's a single photo. Taken by DSCOVR. https://www.youtube.com/watch?v=CFrP6QfbC2g

---

2018-04-26T06:18:28+00:00

https://twitter.com/_/status/989388220596043776

@KennethOath @limitedview @ForeverFlatErth I'm asking what you personally mean by "see it as a ball". It's trivial to take a photo of the earth where it looks like a ball. http://pbs.twimg.com/media/DbsDSdVUQAACrbk.jpg

---

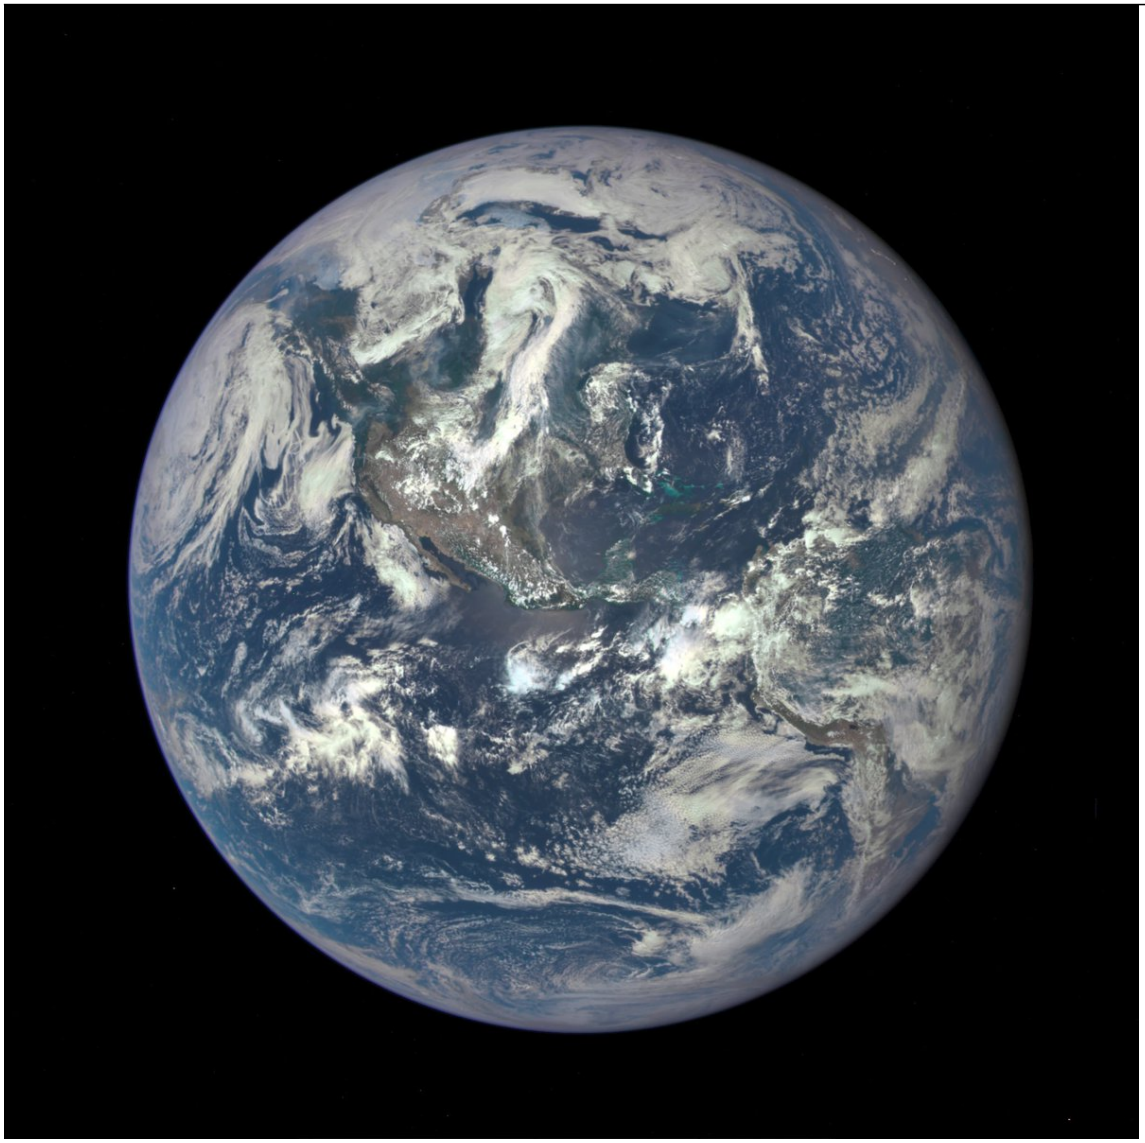
http://pbs.twimg.com/media/DbsDSdVUQAACrbk.jpg

2018-04-26T06:16:45+00:00

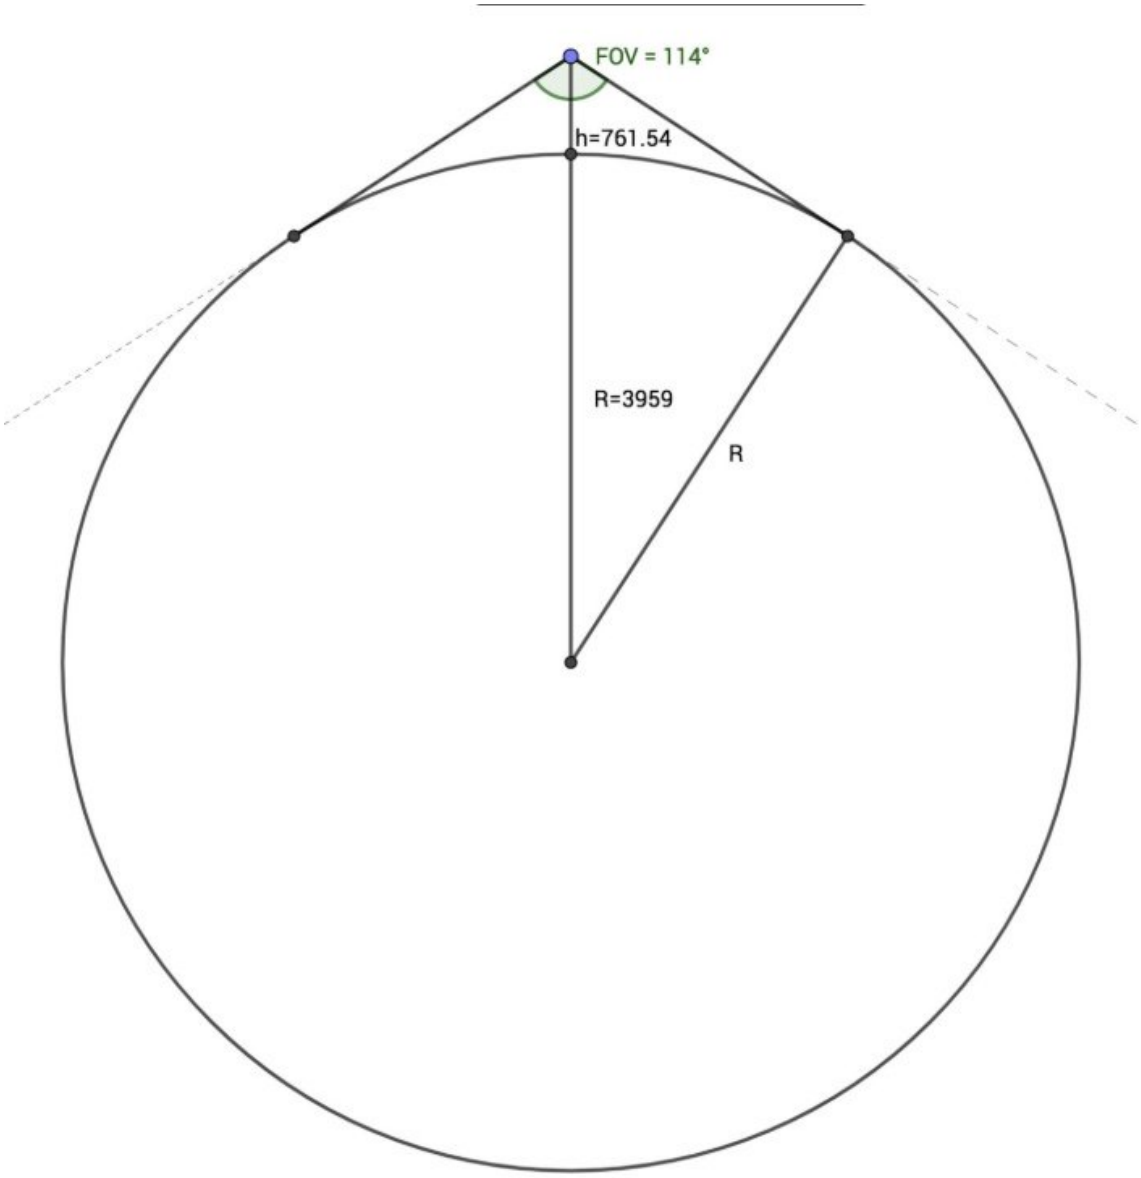
https://twitter.com/_/status/989387789111148544

@KennethOath @limitedview @ForeverFlatErth I have already explained you can never see the entire 180Â° of half the earth, you can simply approach that limit as you get higher. Even DSCOVR can't see it all. Just most of it. Still, it looks pretty ball-like

http://pbs.twimg.com/media/DbsC1ksVAAA3FWj.jpg



http://pbs.twimg.com/media/DbsC1ksVAAA3FWj.jpg
2018-04-26T06:14:50+00:00
https://twitter.com/_/status/989387306384572416
@KennethOath @limitedview @ForeverFlatErth Depends on your field of view, and what you mean by "as a ball". http://pbs.twimg.com/media/DbsCcE2V0AAntRI.jpg



http://pbs.twimg.com/media/DbsCcE2V0AAntRI.jpg
2018-04-26T06:13:17+00:00
https://twitter.com/_/status/989386914632425472
@KennethOath @limitedview @ForeverFlatErth You need a big level, and a place to stand with a wide view of the ocean horizon.
https://www.metabunk.org/measuring-the-curvature-of-the-horizon-with-a-level.t7832/
http://pbs.twimg.com/media/DbsCCBhUwAID6XI.jpg

horizon 10 to 1 stretched.jpg

http://pbs.twimg.com/media/DbsCCBhUwAID6XI.jpg

2018-04-26T06:12:08+00:00

https://twitter.com/_/status/989386628459257856

@KennethOath @limitedview @ForeverFlatErth You can see the curve of the horizon from 400 feet. Above that it gets harder due the atmosphere.

2018-04-26T06:11:33+00:00

https://twitter.com/_/status/989386478953218048

@KennethOath @limitedview @ForeverFlatErth I can see it right now. It's below me.

2018-04-26T06:10:03+00:00

https://twitter.com/_/status/989386102120239104

@KennethOath @limitedview @ForeverFlatErth You can never see the sphere as a whole, you can only approach being able to see half of it. You just see more as you get higher.

2018-04-26T06:08:10+00:00

https://twitter.com/_/status/989385628411408384

@KennethOath @limitedview @ForeverFlatErth How is that not a comparison? It's the same photo taken at different times.

2018-04-26T06:06:14+00:00

https://twitter.com/_/status/989385142060793856

@KennethOath @limitedview @ForeverFlatErth Lots of practical experiments to check claims of flat or round Earth.

https://www.metabunk.org/a-diy-theodolite-for-measuring-the-dip-of-the-horizon.t8617/

https://twitter.com/_/status/989383839121260544

@KennethOath @limitedview @ForeverFlatErth Are you not zetetic?

2018-04-26T06:00:44+00:00

https://twitter.com/_/status/989383759941156864

@KennethOath @limitedview @ForeverFlatErth Along with the absence of evidence of a flat Earth, the existence of time zones and seasons, and the overwhelming scientific consensus.

Yes.

2018-04-26T05:56:22+00:00

https://twitter.com/_/status/989382658395271173

@KennethOath @limitedview @ForeverFlatErth I checked it. I observed the sun and moon not changing angular size through the day. I observed the celestial sphere with rotation about a southern celestial pole. I observed huge mountains being obscured by the horizon, then being revealed as I climbed higher. That was enough.

2018-04-26T05:51:33+00:00

https://twitter.com/_/status/989381449139683328

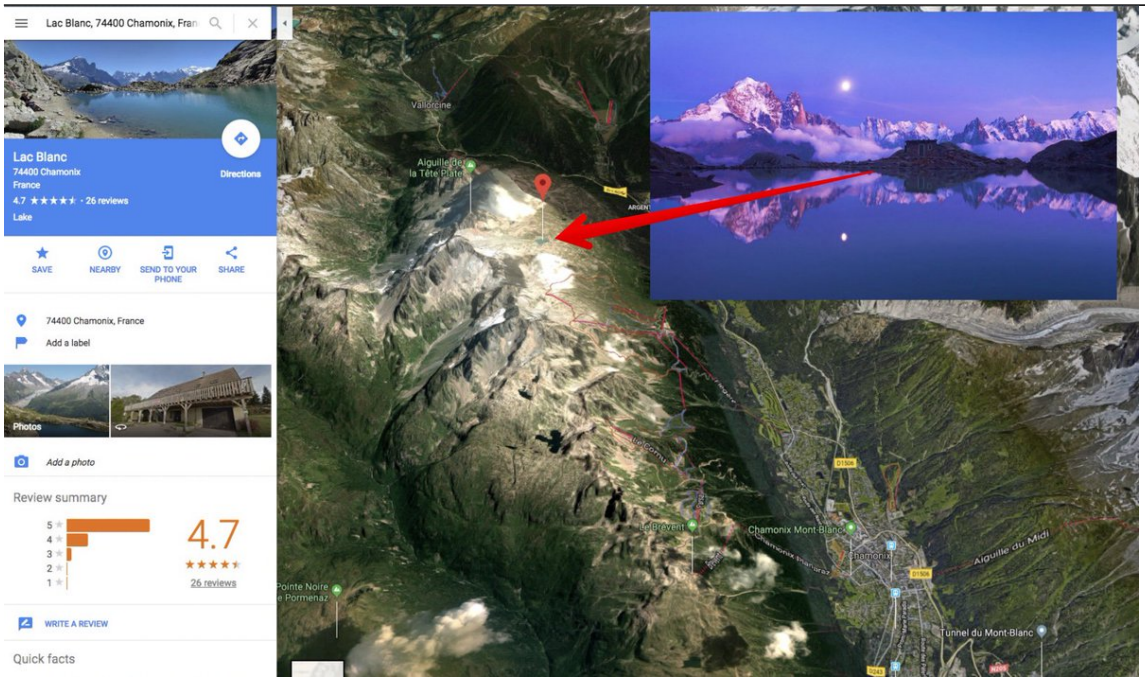
@limitedview @KennethOath @ForeverFlatErth So how much would the image be bent? assuming your photo there is on a flat earth, then what would it look like on a globe earth of about 4,000 mile radius? How would it differ? Draw it.

2018-04-26T04:18:12+00:00

https://twitter.com/_/status/989357953055539201

@limitedview @KennethOath @ForeverFlatErth You should probably try to find a better example than a 300 foot long lake high in the alps.

http://pbs.twimg.com/media/DbrnssbVMAA_4bj.jpg



http://pbs.twimg.com/media/DbrnssbVMAA_4bj.jpg

2018-04-26T04:12:00+00:00

https://twitter.com/_/status/989356394267607040

@limitedview @KennethOath @ForeverFlatErth How do you know it's not curved? If it were curved, with a 4,000 mile radius of curvature, then what would it look like?

2018-04-26T04:09:27+00:00

https://twitter.com/_/status/989355752060960768

@KennethOath @limitedview @ForeverFlatErth I just use regular math. What is the difference between the image produced by a very slightly curving reflective surface and a flat surface? We can investigate this mathematically, or we can do it practically by very slightly bending a large

glass mirror.

2018-04-26T04:04:46+00:00

https://twitter.com/_/status/989354574468165632

@KennethOath @naomirwolf No, just facts.

2018-04-26T00:05:19+00:00

https://twitter.com/_/status/989294314256678912

@BrianDunning So what about Historians discussing, say, the Lavon Affair? https://en.wikipedia.org/wiki/Lavon_Affair

---

2018-04-26T00:02:01+00:00

https://twitter.com/_/status/989293485990723585

@KennethOath @limitedview @ForeverFlatErth I correct things that are demonstrably incorrect. With trivial things like very-slightly-curved water reflecting almost exactly like a flat mirror, then we don't need to rely on authority, we can simply do the math.

2018-04-25T23:59:39+00:00

https://twitter.com/_/status/989292890474987520

@KennethOath @naomirwolf Personal experience. I look up contrails planes almost every day. I don't find the plane only one or two times a year. Probably military, but still leaving a normal contrail.

2018-04-25T23:57:47+00:00

https://twitter.com/_/status/989292419446276096

@MolotoVNKA How do you know that the FDR data indicates a flight path to the south of the Navy Annex? Have you looked at the actual data and plotted it on a map?

2018-04-25T15:41:40+00:00

https://twitter.com/_/status/989167567993372672

@MolotoVNKA How do you know?

2018-04-25T15:41:40+00:00

https://twitter.com/_/status/989167565812346880

@limitedview @KennethOath @ForeverFlatErth Sure. Take a mirror and bend it to match a 4000 mike radius. Notice it still appears flat and reflects apparently the same.

2018-04-25T05:17:14+00:00

https://twitter.com/_/status/989010421800566784

2018-04-18T15:06:49+00:00

https://twitter.com/_/status/986622080484425728

@naomirwolf The vast majority (>99%) of planes leaving trails show up on flight trackers. However it can be difficult as people frequently underestimate the distance from them to the plane. There's lots of tracked planes over remote places like Scotland (heading to the US). Varies.

2018-04-18T14:11:48+00:00

https://twitter.com/_/status/986608237448314880

@davebrooker322 i.e. he's saying that he thinks there should be a pause in the "progress to deploy solar geoengineering". Also not the article says: "Mr Pasztorâ□□s warning comes as researchers prepare for what is thought to be the worldâ□□s first outdoor experiment" (on SAI).

2018-04-18T14:09:46+00:00

https://twitter.com/_/status/986607724921208832

@davebrooker322 You have quoted two words out of context.

"Progress to deploy solar engineering, experimental technology designed to protect the world against the impact of the changing climate, must pause, a former United Nations climate expert says"

2018-04-18T14:07:35+00:00

https://twitter.com/_/status/986607173303058432

@naomirwolf It's an ordinary solar halo. It's not uncommon. Aristotle wrote about them in 350BC, and they were describe by William Fulke in 1563, Encyclopedia Britannica, 1773. The 1823 Encyclopedia says there are "one or two every week" in North America.

http://pbs.twimg.com/media/DbEhDx0UwAEuy45.jpg

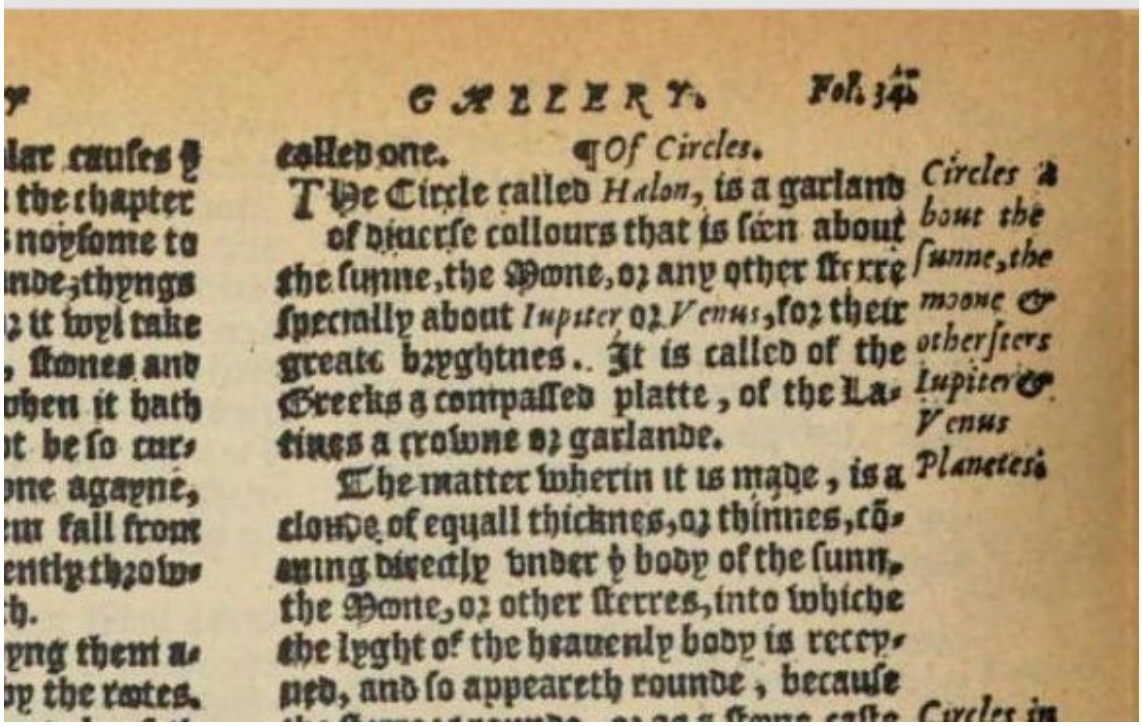
PARHELIUM, or PARHELION, in physiology, a mock sun, or meteor, in form of a very bright light, appearing on one side of the sun.

The parhelia are formed by the reflection of the sun's beams on a cloud properly posited. They usually accompany the coronæ, or luminous circles, and are placed in the same circumference and at the same height. Their colours resemble that of the rainbow, the red and yellow are on the side towards the sun, and the blue and violet on the other. There are coronæ sometimes seen without parhelia, and *vice versa*.

Parhelia are double, triple, *&c.* and in 1629 a parhelion of five suns was seen at Rome, and in 1666 another at Arles of six.

M. Mariotte accounts for parhelia from an infinity of little particles of ice floating in the air, that multiply the image of the sun by refraction or reflection; and by a geometrical calculus he has determined the precise figure of these little icicles, their situation in the air, and the size of the coronæ of circles which accompany the parhelia, and the colours wherewith they are painted.

http://pbs.twimg.com/media/DbEgN7XVAAA1tZk.jpg



GALLERY. Fol. 34.

called one. ¶ *Of Circles.*

The Circle called *Halon*, is a garland of diuerse collours that is seen about the sunne, the Moone, or any other sterre specially about *Iupiter* or *Venus*, for their greate bryghtnes. It is called of the Greeks a compassed platte, of the Latines a crowne or garlande.

Circles about the sunne, the moone & other sters Iupiter & Venus Planetes.

The matter wherin it is made, is a cloude of equall thicknes, or thinnes, cõming directly vnder ẏ body of the sunn, the Moone, or other sterres, into whiche the lyght of the heauenly body is receyued, and so appeareth rounde, because

http://pbs.twimg.com/media/DbEgBeYV4AATGBn.jpg

the outermost circle was a bright red. In 1728, one was seen of a pale red outwardly, then followed yellow, and then green, terminated by a white. Corona.

These coronas are very frequent. In Holland, M. Muschenbroeck says, 50 may be seen in the day-time, almost every year; but they are difficult to be observed, except the eye be so situated, that not the body of the sun, but only the neighbouring parts of the heavens, can be seen. Mr Middleton says, that this phenomenon is very frequent in North America; for that there is generally one or two about the sun every week, and as many about the moon every month. Halos round the sun are very frequent in Russia. M. Æpinus says, that from the 23d of April 1758, to the 20th of September, he himself had observed no less than 26, and that he has sometimes seen twice as many in the same sp ce of time.

Here's the original email thread.
http://pbs.twimg.com/media/DZ0LEazU0AEFvPN.jpg

Mick West <mick@mickwest.com> 11/17/17

to Philippe

They are not parallel though, just very close. The Earth is large.

Why is the horizon curved here?

phiroc 11/17/17

to me

Clearly that photo has some serious problem if you zoom in the horizon you can see the angular pixelation from Photoshop which causes the horizon to look like steps and boxes at different heights and therefore giving you the illusion of a spherical horizon. And what is that white line going across the picture? Next time send me a real aerial photograph not some computer animated JPEG. By the way what you estimate is the distance of the horizon left to right in that photo?

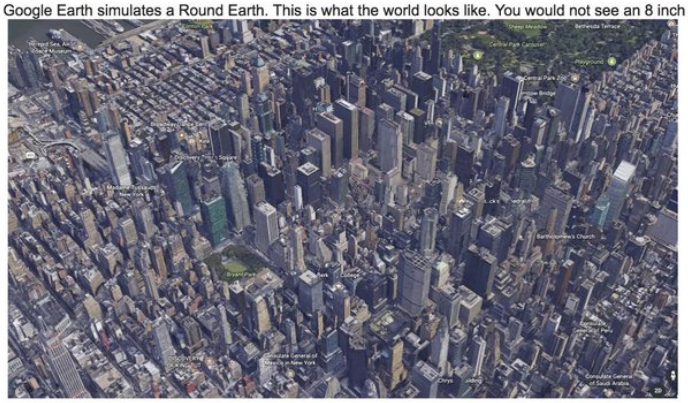
to Philippe

Google Earth simulates a Round Earth. This is what the world looks like. You would not see an 8 inch difference.



phiroc 11/17/17

to me

You just made my point and this is that the surface is flat in order for all those structures to be perpendicular. If there is no curvature there is no 8 inch declination for the first mile therefore the earth is a flat plane.

Florida eh? You could probably still find something with a viewpoint 100+ feet above sea level. Compare that with beach views of distant object. Get a Nikon P900.

2018-03-31T13:22:16+00:00

https://twitter.com/_/status/980072789297135616

@nickmyer 100 years is about when the first persistent contrails were observed. They have been observed ever since. People noticed them a lot more after they started looking for them. Take J Marvin Herndon for example.

2018-03-31T13:06:11+00:00

https://twitter.com/_/status/980068741277917184

@nickmyer So you think they have been spraying for 100 years, but people only started noticing it around the time the internet got popular?

2018-03-31T13:03:26+00:00

https://twitter.com/_/status/980068048768966656

There are two types of contrails: aerodynamic contrails and exhaust contrails. From a distance they look similar. Close up they are very different. Aerodynamic contrails can form in warmer temperatures and often start and stop suddenly as they are sensitive to air conditions.

https://twitter.com/_/status/979848503038898176

@techmanufo @apicasefiles As far as I know nobody has even deliberately sprayed stuff from a plane into the stratosphere. What it would look like would depend on what was being sprayed. It would probably look different to both types of contrail.

2018-03-30T22:29:13+00:00

https://twitter.com/_/status/979848044639240192

@GreenTeamBC They almost never dump fuel. It's only done in an emergency. Or very rare miscalculations or unexpected tailwinds.

2018-03-30T21:03:42+00:00

https://twitter.com/_/status/979826523073953792

An aerodynamic contrail. This less common type of contrail is responsible for a lot of "chemtrail" sightings by people who have never heard of aerodynamic contrails. I keep trying to explain it to them. http://pbs.twimg.com/media/DZkKvD5VwAA9jvu.jpg

@ForeverFlatErth @revolve88 @JurassicTruth I've not watched it all. But I'm guessing no, based on the nonsensical bits I did watch.

Why a book? That basically saying there isn't any actual evidence in this video. So it's waste of time watching it. Let me know when you have numbers.

2018-03-30T17:03:56+00:00

https://twitter.com/_/status/979766187629277184

@emilybramley27 @mmsBA Emily, contrails need very cold air in which to form, and -40Â°C for exhaust contrails to form (homogenous freezing point of water). So that's generally very high up. Aerodynamic contrails are different, can persist in warmer temps.

2018-03-30T17:00:33+00:00

https://twitter.com/_/status/979765335548035072

@mmsBA It's possible it was an aerodynamic contrail, which can form and persist at lower altitudes (higher temperatures). I've seen them at 25,000 feet quite often. This type of thing.

https://twitter.com/_/status/979565627219181568
@ForeverFlatErth @revolve88 @JurassicTruth The problem here is atmosphere. As you get higher the horizon gets further away. That means you are looking through more atmosphere to see it. There's a sweet spot from 400 to around 1000 feet when the ocean horizon is close enough to be sharp, with curve visible. Then gets hazy.

2018-03-30T01:53:02+00:00
https://twitter.com/_/status/979536948153876480
@ForeverFlatErth @JurassicTruth @revolve88 It's not obvious at all. In fact its very hard too see the curve of the horizon at 400 feet. However you CAN see it, if you have a wide enough field of view and a straight edge.

@VerumBellator1 Yes, with CO2 emissions. Here, you can read that bottom book. Just remember Weather != Climate. https://www.nsf.gov/nsb/publications/1965/nsb1265.pdf

https://twitter.com/_/status/977777072054575104

@PostDisclosure @Vccomplice And regarding their radar operators testimony being used in court of law - it would be 1000x better for the case if they had the actual data.

2018-03-25T05:18:20+00:00

https://twitter.com/_/status/977776676619735041

@PostDisclosure @Vccomplice My point is more that the radar DATA is not available. Nor has anyone claimed to analyze it. Operators making momentary evaluations is not the same as

comprehensive data analysis.

2018-03-25T05:06:28+00:00

https://twitter.com/_/status/977773688304033792

@PostDisclosure @Vccomplice What do you think the defense would say about such eyewitness evidence?

2018-03-25T04:46:29+00:00

https://twitter.com/_/status/977768659115323392

@PostDisclosure @Vccomplice No I'm not saying that. I did not answer this "question" because I assumed it was rhetorical.

2018-03-25T04:28:50+00:00

https://twitter.com/_/status/977764220673470467

@PostDisclosure @Vccomplice Wait, what question did I not answer?

2018-03-25T04:28:12+00:00

https://twitter.com/_/status/977764058052079616

@PostDisclosure @Vccomplice So what, you trust the bits you like?

2018-03-25T04:27:42+00:00

https://twitter.com/_/status/977763935293075457

@PostDisclosure @Vccomplice I'm discussing why you believe what you do. You do it on trusting a small number of people. You don't do it based on physical evidence.

2018-03-25T04:26:09+00:00

https://twitter.com/_/status/977763544937594880

@PostDisclosure @Vccomplice That changes nothing. You are still basing your belief on trusting a few people. Not on actual evidence.

2018-03-25T04:24:55+00:00

https://twitter.com/_/status/977763234676527105

@PostDisclosure @Vccomplice Do you trust Elizondo?

2018-03-25T04:24:13+00:00

https://twitter.com/_/status/977763056317968384

@PostDisclosure @Vccomplice So you are basing this on trust of a few people, not actual evidence.

2018-03-25T04:19:38+00:00

https://twitter.com/_/status/977761902276177920

@PostDisclosure @Vccomplice How would you know what was on those radars? How is this better than some anecdote?

2018-03-25T04:19:01+00:00

https://twitter.com/_/status/977761746910773250

@PostDisclosure @Vccomplice Someone saying there is a recording of something is not evidence. Let's see them.

2018-03-25T04:17:31+00:00

https://twitter.com/_/status/977761372405575680

@PostDisclosure @Vccomplice Perhaps because every time we have both, the explanation becomes clear. But a first person account alone, or a video with no context, allows some subjective interpretation.

2018-03-25T04:16:36+00:00

https://twitter.com/_/status/977761140443832320

@PostDisclosure @Vccomplice My point is that it would be more compelling if there was a video of the engagement. Or a first-person account of the video. We have neither. Yet they are falsely combined into one "event"

2018-03-25T04:14:46+00:00

https://twitter.com/_/status/977760679376560128

@flightradar24 And in debunking the Flat Earth :)

2018-03-25T04:13:25+00:00

https://twitter.com/_/status/977760340514451456

@MarkDob5 @PostDisclosure @RichDolan @nickpopemod @BigelowSpace See what exactly? What does this have to do with physics?

2018-03-25T04:12:40+00:00

https://twitter.com/_/status/977760148721614849

@PostDisclosure @Vccomplice So again you get to the idea that you have definitive proof of something breaking the known laws of physics? Has this ever actually happened and been demonstrated not to be a radar glitch?

2018-03-25T04:11:12+00:00

https://twitter.com/_/status/977759783141830658

@PostDisclosure @Vccomplice Don't you think it's curious there's no combination of video and extensive "engagement" by the same person. Maybe because they don't line up?

2018-03-25T04:04:02+00:00

https://twitter.com/_/status/977757976126676992

@PostDisclosure @Vccomplice Which bit of the event? Because the video sure can.

2018-03-25T04:03:20+00:00

https://twitter.com/_/status/977757801307975680

@PostDisclosure @Vccomplice If something is an unidentified conventional aircraft, then is it identified?

2018-03-25T04:02:35+00:00

https://twitter.com/_/status/977757611809423365
