greetings i am dan je Tian and I'm an IT specialist with Kennedy Space Center's exploration research and Technology programs with Kennedy becoming the nation's premier multi-user spaceport. I'm excited to support the er NT program reach new heights with our commercial partners by ensuring the IT requirements for computers and phones the fiber-optic lines I play a small but significant role in ensuring this and success my advice to the younger generation is to never doubt your capabilities my School of Business Dean
always used to say luck is when

preparation meets opportunity

stay prepared
