hey I’m NASA Kennedy's Jennifer Horner

taking you inside case the six platform

segment of 20 arrived at community this week in preparation for eventually outfitting the landmark beautiful assembly building for the Space Launch

System rocket and Orion spacecraft staff

the platform is part of a network of internal structures designed for the stacking and processing needs of the next generation launch vehicle that will take astronauts to deep space and eventually to Mars the stage 3 instrumentation Kennedy now to begin
final processing for launch next year to

the station the device will be mounted
to the outside of the station where it
can monitor aerosols and gases in the
Earth's atmosphere engage the ozone
layer and remember spaceport magazine
digs deeper inside KSC
