Hey!

I’m NASA Kennedy’s Margaret Truitt, taking you inside KSC!

"... and we have liftoff of SpaceX Falcon 9 rocket and Dragon."

SpaceX launched its fourth operational cargo resupply mission to the International Space Station carrying materials for the orbiting laboratory.

Among Dragon’s 5-thousand pounds of experiments and equipment packed by Kennedy’s uniquely-talented work force: the first 3D printer in space and the ISS-RapidScat instrument.

What happened to the Martian atmosphere is...
a question scientists expect MAVEN will help

answer.

And don't forget, Spaceport Magazine shows you more

...Inside KSC!
