Hi I'm NASA Kennedy's Callie Burke taking you inside KSC NASA's test spacecraft lifted humanity into a new period of discovery as it blasted off from Space Launch Complex 40 on a SpaceX Falcon 9 rocket test will provide scans of some of the nearest and brightest stars in our sky on the hunt for exoplanets that could support life the successful launch was years in the making as NASA's launch services program worked to certify SpaceX's rocket to carry an NASA's science mission for only the second time to see all of that hard
work for the past two and a half years

that the entire Falcon nine team within LSB put together to see that rewarded with a successful launch means so much
to our team Kennedy welcomes a new spacecraft to the Space Coast

NASA's Parker Solar Probe landed in Titusville where it was offloaded from the c5 galaxy and hauled to the Astrotech processing facility the Parker Solar Probe will get closer to the Sun than any other spacecraft in history after it lifts off from Space Launch Complex 37 on top of a United Launch
Alliance Delta 4 heavy rocket this summer and remember spaceport magazine digs deeper inside KSC you
