hey I'm NASA Kennedy's Amanda Griffin
and I'm taking you inside KSC
the last of the major components of a
United Launch Alliance Delta for heavy rocket were delivered last week aboard
the company ship mariner the rocket
second stage along with the third and
final first stage booster core arrived
together at Port Canaveral each piece
was carefully offloaded then transported
to processing facilities at launch
complex 37 at Cape Canaveral Air Force
Station the delta 4 heavy is slated to
launch NASA's Parker Solar Probe next
year Kennedy has taken precautions ahead of the possible arrival of hurricane urbe during the next few days the powerful storm is currently predicted to affect Florida as a possible category 4 or 5 major hurricane in October 2016 the spaceport was affected by Hurricane Matthew which passed just offshore as a category three storm Kennedy's damage assessment and recovery team or dart identified all the needed repairs such as damaged roofs water intrusion and power outages can it be returned to normal operations a few days later and
remember spaceport magazine digs deeper

inside KSC
