when it comes to today's technology

there's a gap between the innovation and

the application ideas stands in that gap

in future years of development with a

small agile team we have created a

software package capable of all critical

aspects of ground operations for

integrated communications situational

awareness and work instructions into a

compact set of smart glasses along with

a custom user friendly app simply put

it's a head-mounted display for the

ground operations technician to be safer

and more efficient it's a guide a
guardian and a communicator ready for
the lab the field and beyond safety is
the number one priority doing operations
our sensor package ensures that were
every technician rooms will be made
aware of the passers in their immediate
area the sensors are compact and our
continuously sending data to the user
system the technician needs to know
where to go and what to do
ideas displays the full breadth of
content on existing works instructions
it can be navigated with ease and can
even be take to you as you work no need
to force steps to be repeated reference

large paper manuals will cumbersome

doodle consoles you need the data you

have the data in the field things don't

always go according to plan the person

with the right answers isn't always

close by we've brought them as close as

possible with our two-way audio-visual

communication package to not only allow

remote input and clarification for

reporting for future verification

of operations but the glasses aren't all

we've got for continuing development of

a functional council app to remotely

A_CzxCGM5mU - transcript (automated).txt[15/09/2019 15:57:46]
assist every technician on the job we

00:01:45,039 --> 00:01:49,748

can tell where they are physically the

00:01:47,108 --> 00:01:53,078

step they're working on and see their

00:01:49,748 --> 00:01:55,750

environmental data we're innovating for

00:01:53,078 --> 00:01:58,508

the user and proven invaluable in the

00:01:55,750 --> 00:02:03,718

field working in the lab is one thing

00:01:58,509 --> 00:02:03,718

working on the job is everything

00:02:06,010 --> 00:02:09,868

[Music]

00:02:11,969 --> 00:02:20,799

[Music]

00:02:29,460 --> 00:02:33,960

[Music]

00:02:45,509 --> 00:02:48,719

[Music]

00:02:53,009 --> 00:02:59,258

[Music]

00:03:07,568 --> 00:03:09,628

you
