we're going to look briefly at some video of the rollback of the mobile service tower the gantry as it moved back away from the delta 2 had about 8 15 pacific time this evening the delta rocket has we see it here is approximately nine hundred and twenty eight feet tall it's 8 feet in diameter with a ten foot ferry and at liftoff it will weigh three hundred and thirty thousand pounds it has three strap-on solid rocket boosters that will ignite at liftoff let's a brief time lapse of our tower roll back this evening which
once again occurred about 8 15 p.m.

tonight at t-minus one hour 38 minutes

eight seconds and counting this is Delta

launch control
