t-minus 10 9 8 7 6 5 4 3 2 1 main engine

ignition and liftoff of the Atlas 5 with

t brasil building our ability to meet

the growing future of communications in

booster be used on the close of control

bitch y'all roll program has begun

vehicle moderate so good

+ battery voltages are stable

temperatures low

mr. engine continues to look very good

pumps needs and Jennifer servers advance

get you out where program is complete

the vehicle batteries can come right
down imagine these look very good take
pressures are stable going through the sound barrier at this time xq vehicle
body rates continue look very good
controlling right Donovan coming up on booster throttle back and we have to throttle back right on schedule and then response looks good booster engine performance continues look very good
