t-minus ten nine eight seven six five

four three two go for main engine start

one zero and liftoff of the Atlas five

rocket with Cygnus at the SS John Glenn

extending the research legacy for living

and working in space

speeds interconversion good pitch yaw

roll program's gunfire rates look good

he continues to look very good speeds

interpretations and

one-eighty continues to perform well

I'll reverse the achievers

the store has begun the zero angle

attack phase of flight there's a good
putter in superb

och one vehicle now I'm going through

the sound barrier execute audience

continue to look very good at this point

plate vehicle hitting Maxima dine

interests are back right on schedule

signatures look good altitude and speed

loss customary distances five and a half

miles current velocity is 1929 miles per

hour means Trek which is good progress

right down the middle corridor
