00:00:05,809 --> 00:00:11,070
Space Shuttle Endeavour lifted off into
the Florida skies on the power of a
modified 747 to begin a new mission of
inspiration the shuttle carrier aircraft
or SCA will carry Endeavour across the
southern United States over two days to
Los Angeles Endeavour will go on display
at the California Science Center in late
October the pair will make a flyover of
NASA's Stennis Space Center in
Mississippi and the Michoud assembly
facility near New Orleans before
stopping at Johnson Space Center home of
NASA's Mission Control the SCA is the
same converted airliner that launched

enterprise on a series of gliding tests

in 1977 since then the SCA has been used
to carry shuttles back to Florida after

a landing at California's Edwards Air

Force Base that heritage will not go

unnoticed as the SCA and endeavour will

make an overnight stop at Edwards before

eye to Los Angeles International

Airport the ferry flight will be the

last of the shuttle era shuttle

Discovery is already on display at

Washington DC's National Air and Space

Museum and shuttle atlantis will be
shown at NASA's Kennedy Space Center

discoveries flight to Washington

generated great public attention as people who had not seen a space shuttle in the sky stop traffic to wave and photograph the spacecraft the same kind of attention is expected for endeavor as it makes its cross-country journey to its new home
