welcome to a new era of American leadership in space Kennedy Space Center is proof that public and private sectors can achieve more by working together than they could ever achieve apart as President Trump said last week in his work it is America’s destiny to be the leader amongst nations on our adventure into the grave I’m not with the National Space Council we will grab that destiny with both hands and go to work with each and every one of you and hear from this bridge to space our nation will return
to the moon and we will put American boots on the face of Mars
