We will go forward to the Moon.

This is bold exploration.

We will land our astronauts on the Moon within the next decade.

We will fly new rockets and spacecraft and learn how to live away from Earth.

The Science will reveal new discoveries and resources beyond Earth.

We will create a foundation for ongoing human exploration.

We're going to the moon to stay.

Then, we will explore farther.

Our innovations will help us at home.

Technology we develop for exploration will improve life on Earth.
