construction of the new mobile launcher

or ml progresses with the placement of

the launch mount on May 26 at NASA's

Kennedy Space Center the work is taking

place in launch complex 39 in the mobile

launcher park site north of Kennedy's

Vehicle Assembly Building the new

launcher a transporter launch base for

NASA's next-generation space vehicles is

a three hundred and fifty five foot tall

structure with multiple platforms for

personnel access its base is lighter

than the Space Shuttle mobile launcher

platform so the crawler-transporter can
pick up the heavier load of the tower

and taller rocket
