We will go forward to the moon with humans.

Explore moon to Mars.

We are expanding our presence in the solar system.

With our powerful rocket and versatile spacecraft.

Building and testing new tools and technologies.

Advancing human innovation.

Living and working far from home.

Using lessons learned in Earth orbit.

Building a Gateway to explore the Moon and beyond.

Enabling a space economy in Earth orbit and on the Moon.

Using new human lunar landers and working with our partners.
Enabling not just one giant leap
But many more on the Moon and Mars

We will go forward with American leadership in space
