hello on behalf of the entire NASA

family I would like to congratulate NASA
legend Katherine Johnson as she
celebrates her 100th birthday with slide
rules and pencils Katherine and her
pioneering colleagues helped our
nation's space program literally get off
the ground
long before the hidden figures book and
movie elevated their story to millions
around the world they were at NASA
breaking down barriers and pushing the
frontier of human achievement
Katherine's confidence bravery and
commitment to excellence at NASA decades ago continues to inspire the NASA workforce even today nowhere is this more evident than at NASA Langley's Katherine Johnson computational research facility Katherine we are blessed to have you as a part of our NASA family and I want to thank you for all you've done for our country and our agency we wish you the very best on this very special day ad astra
