November 26, 2016, is Small Business Saturday — a day to celebrate and support small businesses and all they do for our communities.

Small Businesses play an integral role in helping NASA achieve mission success.

This Small Business Saturday, NASA will highlight the benefits of small businesses to NASA by sharing content online.

Small businesses are a key part of NASA’s supply chain.

Over 800 small businesses contribute to the success of NASA’s Space Program in 47 out of the 50 states.

Universally small businesses innovate and statically produce 16.5 times more patents, per employee than large firms.

And have created 2 out of every 3 net new jobs.
Want to join in the celebration?

NASA will host a Small Business Saturday social media event, and everyone is encouraged to participate.

Join the event and post a photo showing how you support small business by using hashtags on Facebook and Twitter.

Small businesses enrich communities & transform lives!

And at NASA we're excited about that benefit to humankind!
