I first heard about Katherine's story from a fellow colleague Rose King who's retired now and I looked up her information and read her story it was simply amazed and then I've heard more about Mary and Dorothy and their careers here at NASA and it literally brought tears to my eyes.

Because I've never seen anyone that looks like me that had been so mission-critical to NASA you know 40, 50 years ago. So for them to do what they did it kind of favor with me strength to me that you know mission is important.

I'm here for a reason... and I can do this.
[Music] [Pharrell Williams - Hidden Figures Soundtrack]
