this weird I thought it's right sister

Mary yeah

for some parts at the end yes

it's a fabulous day because the

high-fidelity rover is here they're

putting it together you see all these

men around assembling it putting it up

and pulling the mast up of course on

Mars we didn't have them we had to do

that from Earth provide the commands and

let curiosity execute those so it's

really exciting to see the rover at this

scale and it will be in the parade and

we hope the president and the people
that are at the parade will appreciate

the beautiful Rover that's sitting on

Mars doing a fantastic amount of science

for this nation
