ShatteredReality	2019-07-12	https://youtu.be/FVEe-jHdn0	%2367 Terry Lovelace	Fahrusha and Kate Valentine welcome Terry Lovelace, alien abductee and author of Incident at Devil's Den to "Shattered Reality Podcast". Terry's experiences during his time in the U.S. Air Force were so remarkable that we gave him lots of room to tell his story. His experiences began in childhood and took on a whole new dimension when he served as a medic in the U.S. Airforce. Today he has evidence that these encounters have even impacted his health. Regretfully we lost Kate Valentine's connection about 20 minutes into the show. Terry Lovelace is a lawyer and former Assistant Attorney General of both Vermont and American Samoa. . ShatteredReality	2019-05-30	https://youtu.be/mZUhLFh6r2I	%2366 Mark Boccuzzi Adventures in Psi	<p>Fahrusha was very pleased to welcome psi researcher Mark Boccuzzi to Shattered Reality Podcast. He and his wife Dr. Julie Beischel (a previous guest on SRP) founded the Windbridge Institute. Mark started in psychic research by doing scientific research on ghosts in the San Francisco Bay Area. Our conversation wandered through several areas of psi research. He is the Managing Editor of Threshold: Journal of Interdisciplinary Consciousness Studies, a free, online-only, open access, peer-reviewed journal that disseminates information focusing on interdisciplinary studies of consciousness as it relates to dying, death, and what comes next. In his book Visualizing Intention, Mark has created images which are evocative of human emotions and intentions. A free PDF of the book is available at the Windbridge Institute's website and the full color 100 page book is available on Amazon. How does intention affect events and machines? Visualization can positively impact the power of intention. In addition we spoke about Instrumental Trans-Communication (ITC) which is using mechanical recording apparatus to capture voices of the dead or other non-corporeal beings. Shattered Reality Podcast had one of these spontaneous occurrences in episode #45 Tom Butler and EVPs. We touched upon anomalous photographs wherein orbs or unusual light phenomenon can be seen. He is an independent software designer who became interested in Dogon mythology and symbolism in the early 1990s through the works of Jerome Clark and Robert Temple. He has studied ancient myth, language, and cosmology since 1997 , has been a lecturer at Colgate University and has authored eight books on the subject . He also appears in the late John Anthony West's Magical Egypt DVD series. Recorded: 3-27-2018</p>	Transcript Link

ShatteredReality	2019-03-15	https://youtu.be/uFewGml4L5s	%2364 Anthony Peake Consciousness	<p>Kate Valentine and Fahrusha of "Shattered Reality Podcast" were very happy to welcome Anthony Peake, author of nine widely acclaimed books on various aspects of non-physical realities (or are they?), time and consciousness. We spoke with him primarily about his book Opening the Doors of Perception, which is based on the Aldous Huxley book The Doors of Perception the title of which derives from a passage from a poem by William Blake: : "If the doors of perception were cleansed everything would appear to man as it is, infinite.". This brings to mind the image of great thinkers through time standing on the shoulders of the one before and building upon their knowledge. We also touched upon two of his other books Time and the Rose Garden: Encountering the Magical in the life and works of J.B. Priestley and A Life of Philip K Dick: The Man Who Remembered the Future. Both Priestley and Dick explored the subjects of time and consciousness in an unorthodox and thought provoking manner. We discussed the difficulties of exploring consciousness anomalies using the paradigm of the materialistic scientific method. Does substantial first person experience data equal proof? Are we just meat puppets with accidental biological consciousness or are we part of an infinite consciousness which is eternal? Is reality holographic and are we living in a simulation? Peake explains this through the vocabulary of Gnosticism. How can we break through the doors of perception? Humans can experience other realities through dreams, schizophrenia, psychotropic drugs and other processes. Are these realities any less real than 4-D? Only in the sense that in 4-D we can have the perception of consensus with other humans. This is called "consensual reality" and on a certain level unprovable due to the fact that individuals see the same event very differently. Perhaps this quote from Aldous Huxley is germane to our subject: "Maybe this world is another planet's hell." Recorded: 3-13-2018</p>	Transcript Link

ShatteredReality	2019-01-30	https://youtu.be/n2Zxlu0qLPM	%2363 Dr. Julie Beischel Medium Research	Fahrusha and Kate Valentine welcome Dr. Julie Beischel, Phd. to "Shattered Reality Podcast" to discuss her evidentiary studies into mediumship. Dr. Beischel is the co-founder and Director of Research at the Windbridge Institute for Applied Research in Human Potential and is at the forefront of modern studies into mediumship. Her work is part of the movement to shift the paradigm surrounding the concept of the brain as seat of consciousness to brain as transceiver of consciousness. Currently, part of the Institute has spun off into the Windbridge Research Center, whose mission is to ease suffering around dying, death, and what comes next, by performing rigorous scientific research. Note: Tom Butler was our guest who spoke about EVP (Electronic Voice Production) in conjunction with messages from the deceased.	Transcript Link

Preston is the author of twenty books on paranormal phenomena mostly about UFOs. Preston speaks about ordinary Americans who have encounters with extraordinary beings in his book INSIDE UFOS. We also spoke briefly about another of his books THE CORONADO ISLAND UFO INCIDENT. Preston Dennett is currently at work on several new books. Recorded: 2-13-2018	Transcript Link

ShatteredReality	2018-11-03	https://youtu.be/03jONe8KWkg	%2361 Kate and Fahrusha shatter a little REALITY	Fahrusha and Kate Valentine talk about shattering reality. After sixty episodes, Kate and Fahrusha decide to simply talk to each other about a variety of paranormal phenomena. They discuss their impressions of cryptozoology and why people are interested in the paranormal. Fahrusha relates her experience of seeing three unusual black butterflies in three unusual places in one day. (Note: The stopover was at Dulles airport, not Charlotte.) They also discuss Sasquatch and the unfolding story of possible UFO disclosure by the "To The Stars Academy". Kate recollects her prior interview with Frank Faschino concerning the Flatwoods Monster. The the show's audio engineer mentioned having seen a large bird with orange skin and a mammalian face. Fahrusha read a very thoughtful letter she had received from listener Freeman about his views on alien intelligence. . Recorded: 1-19-2018	Transcript Link

ShatteredReality	2018-09-17	https://youtu.be/_qw1U0H8Rd4	%2360 Terry Ray and the Orange Orbs	<p>Kate Valentine and Fahrusha, hosts of Shattered Reality Podcast, were pleased to welcome Terry Ray, author of The Complete Story of the Worldwide Invasion of the Orange Orbs, to discuss his theories about these orange orbs and case histories he has investigated. The show started out with Fahrusha discussing the news of purported UFO disclosure revelations by former government operatives. This story is ongoing and we plan to keep on top of it. Terry Ray was a military pilot, trial lawyer, law professor emeritus and is a certified Field Investigator for MUFON. Terry became fascinated by the orange orbs after a multiple sighting while on vacation in Ocean City, Maryland. His book is divided into 3 sections: maps and statistics, case histories and conclusions. He has also written an entertaining science fiction novel entitled GXM731 as well as other works of fiction. Currently he is working on a new book which will explain his work with photographic evidence of the orbs and the filters he has used with those photographs. In this episode we discuss Terry's books, his views on the nature of the Orange Orbs, the source of the orbs and possible beings associated with them. He explains his ideas about the government's role in disclosure versus "the others" apparently attempting to acclimatize the general population to seeing anomalous lights and craft in the skies of Earth. Overall this episode is thought-provoking and simultaneously entertaining, and while Terry's theories are speculative they are well thought out and certainly not impossible. ShatteredReality	2018-09-01	https://youtu.be/1Wnk-wUpHs8	%2359 Lynne Kelly and The Memory Code	Lynne Kelly, Ph.D., author of The Memory Code, joined Fahrusha and Kate Valentine on Shattered Reality Podcast to discuss memory devices used by oral cultures from the Stone Age to the present day. A native of Australia, she was drawn into this study whilst working on her doctorate. What she discovered really surprised her. She started by researching Australian Aboriginal songlines. The elders of these groups knew all of the plants and animals from memory and often generations of lineage back into time. She discovered the mechanism by which they accomplished this feat. Much of the knowledge was restricted to elders or shamans. They would trek to areas that held significance and repeat dances and songs which held enormous amounts of related knowledge. There were also objects with inscrutable (to the uninitiated) marks which held mountains of knowledge and were portable. Preliterate cultures around the world used these memory palaces and memory devices and some cultures still do. Among those that still employ these devices are many Aboriginal groups in Australia, some African tribes as well as cultures in Oceania. Memory champions in the literate world have learned some of these techniques from writings of the ancient Greeks and use them to win contests today. The Memory Code gives us amazing insight into the mysteries of ancient places like Stonehenge, the Nasca Lines and Easter Island to name a few. Recorded: 12/05/2017	Transcript Link

ShatteredReality	2018-08-05	https://youtu.be/gSMwtp69k1w	%2358 Marty Rosenblatt Associative Remote Viewing	<p>Kate Valentine and Fahrusha welcome Marty Rosenblatt to “Shattered Reality Podcast”. Marty is the founder of the Applied Precognition Project. “The Applied Precognition Project’s mission is to publicly explore, research and apply logic and intuition/emotion to predict future event outcomes, enabling participants to evolve personally while contributing to the elevation of global consciousness.” APP has several different groups of viewers who remotely view different sorts of future events that can generate money, such as the stock market or sports events. The APP also has several other groups, including the “Sublime” group which focuses on remote viewing from the dream state coordinated by Nancy Smith, a friend of SRP. We spoke to Marty about his method of Associative Remote Viewing and related scientific concepts such as retro-causation and quantum entanglement. He spoke about the basic precepts of ARV. He is very conversant in interesting theories about consciousness and shared some with us. We went on to speak about Hal Puthoff’s participation in Tom DeLonge’s “To The Stars Academy” and other puzzling conundrums. In the Listeners’ Corner we spoke of listener June Ponte’s art show and read a selection of the excellent children’s book Imagine If Thoughts Were Balloons illustrated by listener Diane Waybright. This book demonstrates a very compassionate way to help children to choose their thoughts consciously. Recorded: 11-14-2017</p>	Transcript Link

ShatteredReality	2018-07-09	https://youtu.be/Zuw8hREY_bk	%2357 John B. Alexander Ph.D. - Reality Denied	<p>Kate Valentine and Fahrusha were very pleased to welcome Dr. John B. Alexander back to "Shattered Reality Podcast" to discuss his new book "Reality Denied, Firsthand Experiences with Things That Can't Happen- But Did." This book recounts many of Alexander's paranormal and anomalous experiences. We spoke about UFOs, trans-species communication with dolphins and unusual human skills including metal bending. The book is filled with fascinating experiences, exotic places visited, and extraordinary people met. Dr. Alexander began his career as an Army infantry private, rose to Colonel, received a PhD, became a non-lethal weapons expert and has delved deeply into shamanism. He calls for more research into the nature of consciousness. He fears that today's paradigm of materialism discourages young scientists from researching the true nature of consciousness. He encourages more open-mindedness in science and hopes that young researchers will have the courage to explore areas beyond the soul-crushing confines of mechanistic materialism. He is the author of a number of other books and articles including UFOs: Myths, Conspiracies and Realities and is the recipient of awards too numerous to mention.</p> <p>Recorded: 10-24-2017</p>	Transcript Link

ShatteredReality	2018-06-08	https://youtu.be/pHmYJDR40rc	%2356 David Booher_ Was Gerry Irwin an Abductee?	<p>Fahrusha welcomed David Booher, author of No Return, The Gerry Irwin Story, UFO Abduction or Covert Operation? to Shattered Reality Podcast. Booher has penned an exceptionally well written and researched book on the extraordinary experiences of an Army soldier in 1959. Before David Booher did his research, everyone in the ufological community thought that Gerry Irwin had completely disappeared. Booher found Irwin, alive and reasonably well in his native Idaho. While on leave from Fort Bliss in 1959, Gerry Irwin saw an unidentified falling object in Utah during his drive toward his army base in Texas. Thinking it was a plane in the process of crashing he left his car by the side of the road and headed into the bush to help. He was found by a local sheriff face down in the February snow. He subsequently suffered from extreme amnesia and went AWOL on two occasions. Those are the bare bones of the story as described in 1962 by Jim and Coral Lorenzen of APRO. We discussed some of the many details the author was able to ferret out. In our Listeners Corner, June Ponte, an artist and intuitive from New Jersey, tells us of two UFO sightings she experienced in the Garden State. Co-incidentally Gerry Irwin had been a Nike missile technologist at the time of his initial experience and June Ponte had been protesting nuclear power directly before one of her sightings. ShatteredReality	2018-05-21	https://youtu.be/_VwnGTscex0	%2355 Dr. Irena Scott	<p>Fahrusha and Kate Valentine welcome Dr. Irena Scott, author of <i>UFOs Today, 70 Years of Lies, Misinformation and Government Cover-Up</i>, to "Shattered Reality Podcast". Her book is a compendium of many years of research into UFO phenomena. An Ohio native, who has worked for the Defense Intelligence Agency and the Battelle Memorial Institute as an image analyst, she has a very impressive educational background including a BS from Ohio State University, an MS from the University of Nevada, and a PhD from the University of Missouri in the Department of Veterinary Medicine. Her post-doctoral studies were done at Cornell University. She also has been a case investigator for MUFON. Add to that her proximity and frequent visits to Wright Patterson Air Force Base, which is purportedly where the remains of alien visitors and crashed alien craft are taken, and you have the makings of some astonishing reports that Dr. Scott got directly from witnesses. We explore her impressions of the origins and purposes of those non-human intelligences which have been recorded since the dawn of time, but more specifically in her book, since the famous Kenneth Arnold sighting in 1947. Included in our discussion is the fascinating and heretofore under-reported Coyne helicopter case, which is one of many such cases featured in her book. In our "Listener's Corner" we feature well-known NYC artist Anthony Santuoso who speaks about two family members' experiences with UFOs and his father's near death experience. Anthony is a painter in the style of Magical Realism, a founding member of the seminal co-operative Bowery Gallery in Manhattan, and a current instructor in the Fine Arts Department of the Fashion Institute of Technology. ShatteredReality	2018-05-05	https://youtu.be/0mDJNfTYfTw	%2354 Dr. Roger Nelson and The Global Consciousness Project	<p>Kate Valentine and Fahrusha welcome Dr. Roger D. Nelson of the Global Consciousness Project to "Shattered Reality Podcast". Dr. Nelson has had a lifelong interest in the anomalies of human consciousness. He was Coordinator of Research at the Princeton Engineering Anomalies Research (PEAR) laboratory at Princeton University from 1980 to 2002. The GCP or Global Consciousness Project is an international, multidisciplinary collaboration of scientists and engineers which uses Random Number Generators (RNGs) or Random Event Generators (REGs) to measure changes in the consciousness fields of groups of humans across the globe. At the time of this writing they have more than 15 years of random data in parallel sequences of synchronized 200-bit trials generated every second. That is truly amazing! We discussed this and various related topics regarding what could be termed as micro-PK or small scale psychokinesis, including remote influencing. We included a couple of questions from a listener. Please continue to send us your questions. Future guests are posted a few days ahead on our Facebook page. At the end of the show, Fahrusha read an account from a friend of the show in England, Mr. A. who took photos of a mysterious noxious gas cloud that descended upon an English Channel beach, Seven Sisters Cliffs, and injured walkers and sunbathers. Fahrusha had written a blog piece featuring Dr. Nelson a few years ago which can be accessed at https://fahrusha.wordpress.com/2015/06/20/annihilation-or-the-triumph-of-consciousness/ Recorded: 9-12-2017</p>	Transcript Link

ShatteredReality	2018-04-13	https://youtu.be/ioW0_nHkrKw	%2353-Lucina Stone	<p>Kate Valentine and Fahrusha are proud to welcome listener and author Lucina Stone to “Shattered Reality Podcast”. She is the author of the Daniela Story series of young adult fiction. The first book of the series is called Santa Muerte and was inspired by our show “Shattered Reality Podcast”, and more specifically by the episodes dealing with Mexico. Lucina is an avid listener to our podcast. We are elated to have inspired someone to the degree that they felt impelled to write a series of books! Lucina, from Morris County, New Jersey, was the 2016 winner of two awards of the prestigious International Latino Book Awards for Best Sci/Fi novel and Best New Author. Santa Muerte- The Daniela Story (Story Merchant Books Press, 2016 release) tackles diversity in science fiction and fantasy by using folklore and culture. She holds a MA in Clinical Counseling and is a Licensed Professional Counselor. On this episode we discuss the genesis of this novel. Lucina paid attention to her dreams, which gave her some ideas for the novel. Her novel is very inclusive giving important roles within it to women, Latinas and LGBT people. We here at “Shattered Reality Podcast” support inclusivity, especially as we are both women. Much of the story is about the relationship between mothers and daughters as cultures change through time and country, but there are some surprising science fiction plot twists that will amaze the reader. Note: Fahrusha mentioned Carlos Castaneda, the Yaqui shaman Don Juan, and the female followers of Castaneda, but could not remember the name of the one whose books she had read and found intriguing. That woman was Florinda Donner, who was actually married for Castaneda for a number of years and member of a Nagual group that surrounded him, including also Taisha Abelar. “They were known as the witches, and two of them, Florinda Donner-Grau and Taisha Abelar, vanished the day after Castaneda’s death, along with Cleargreen president Amalia Marquez and Tensegrity instructor Kylie Lundahl. A few weeks later, Patricia Partin, Castaneda’s adopted daughter as well as his lover, also disappeared.” (From the Salon article by Robert Marshall.) Recorded: 8-8-2017</p>	Transcript Link

ShatteredReality	2018-03-30	https://youtu.be/9Uw1ai3Y9WI	%2352 Brenda Dunne - the PEAR Lab and More	<p>Kate Valentine and Fahrusha were pleased to welcome Brenda Dunne lab manager of the PEAR (Princeton Engineering Anomalies Research) Lab to Shattered Reality Podcast. Fahrusha was lucky to meet Brenda Dunne and the late Dr. Robert Jahn at the 2017 SSE Symposium at Yale. Brenda Dunne was given the Founder's Award at the Symposium. In this episode, Brenda talks in detail about the workings of the PEAR Lab, remote viewing, REGs (Random Event Generators) and RNGs (Random Number Generators), and what it was like working for more than 40 years with Dr. Robert Jahn. She also spoke of the beginnings of the SSE. Fahrusha and Kate Valentine are both Associate Members. Much of the Lab's work with the REGs centered around getting a statistically significant result from the machine when a person or persons concentrated on doing so, or when an unusual and emotionally affecting event occurred in the environment, locally or worldwide. Since the closing of the PEAR Lab, Dunne and Jahn continued their work together at the International Consciousness Research Laboratories (ICRL). The ICRL publishes books on consciousness research. Together, Jahn and Dunne have written five books together including Molecular Memories (2015), Quirks of the Quantum Mind (2012), Consciousness and the Source of Reality (2011), Filters and Reflections: Perspectives on Reality with Zachary Jones (2009), and Margins of Reality (1987). Fahrusha spoke about a precognitive dream she had about being in New Haven directly before the SSE Symposium. Brenda Dunne, M.S. holds degrees in psychology and the humanities from Mundelein College in Chicago (1976), and a M.S. in Human Development from the University of Chicago (1979). ShatteredReality	2018-02-08	https://youtu.be/y_3uPWNOLGY	%2351 Dr. Michael Reddy	<p>Shattered Reality Podcast #51 On July 11, 2017 Kate Valentine and Fahrusha welcomed Dr. Michael J. Reddy to “Shattered Reality Podcast.” We started the show with two of the entertaining “Keynoter” songs that Michael has written and sung at several professional conferences to help set themes and introduce main speakers. They are both about current changing paradigms. Then we turned to Michael’s practice of Family Constellation Work. As he says, “there are two kinds of trauma—the one you experience yourself, and the sort you inherit from parents and ancestors who could not clear it themselves.” This heritable form of trauma is supported increasingly now by epigenetics, but it remains present in and passes down through a psychic, transgenerational family system. He maintains that left over loyalties to unresolved issues in your birth family’s past can shape your life for the worse and that constellation work clears these. Michael credits the work with saving his life in 2008. Michael’s book on the subject is Health, Happiness & Family Constellations, How Ancestors, Family Systems and Hidden Loyalties Shape Your Life and What You Can Do About It. Finally we discussed Michael’s 7 year apprenticeship with native and mixed blood indigenous teachers from 1986-93. One of these teachers was the late Sun Bear, a controversial Ojibwe elder who espoused sharing the traditional medicine with all races. Our co-host Fahrusha also had an interesting experience with Sun Bear when he visited the yoga studio she attended. In shamanic terms, successful constellations start to look like divination followed by sympathetic magic. Recorded: 7-11-2017</p>	Transcript Link

ShatteredReality	2018-01-30	https://youtu.be/C0od67Gtje0	%2350 Fahrusha on Alien Evolution	Shattered Reality Podcast #50 On May 20, 2017, Shattered Reality Podcast travelled to Pine Bush NY for the annual UFO Festival. On this special #50 episode, Fahrusha presents her thoughts on alien (or extraterrestrial) evolution. The fellow asking a few questions is David Biedny, who has been a guest on, and a friend of Shattered Reality Podcast. Kate Valentine can also be heard in the background. In short, Fahrusha asks, "If life is ubiquitous in the physical Universe, might it evolve in similar ways when similar elements are present?" Also implicit in this question is, "What defines life? Is it consciousness or respiration?" These may be impossible questions to answer definitively but they are fun and fascinating to ponder. This is a short one, only 22 minutes long! An article with the same theme can be found on Fahrusha's blog, http://fahrusha.wordpress.com (Extraterrestrial Evolution). Recorded:5-20-2017	Transcript Link

ShatteredReality	2018-01-16	https://youtu.be/_o5QkGZI1Y4	%2349 Phillip Davidson, PhD	<p>Kate Valentine and Fahrusha are pleased to welcome Dr. Phillip Davidson to “Shattered Reality Podcast.” Phil started his work life as an IT professional and spent a number of years at a high level job in Hong Kong. When he returned to the United Kingdom, he decided to retrain and earned a PhD in Psychology. He had a keen interest in the nature of consciousness and became a grief counselor. Coincidentally, like our last guest, Dr. Milton Wainwright, Phil hails from Sheffield, England. Fahrusha had the pleasure of meeting and conversing with Phil at a Monroe Institute’s Professional Division Seminar. Over the years of being a grief counselor he noted how many individuals he interacted with were unable to move forward after the death of a loved one, particularly if the loved one was a child. Phil takes people from the waking state of consciousness to a place where they can access their unconscious. EVT is that process. Through EVT, Enhanced Visualization Technique, people are able to leave their bodies, meet their higher selves, and communicate with their departed loved ones. Loss of body image or proprioception is key to EVT. With EVT one can stay conscious during the entire experience of exploration of the unconsciousness. Dr. Davidson specializes in using his technique with grieving people, but psychonaut explorers can greatly benefit from EVT as well. With EVT the grieving individual can learn to communicate with the departed loved one at will and without the services of a medium. We at “Shattered Reality Podcast” like the idea of this method because it appears to bridge the gap between a person’s unconscious and the One that is all individual consciousnesses. We ourselves have not sampled EVT but would certainly like to do so. Recorded: 5/23/17</p>	Transcript Link

ShatteredReality	2017-12-20	https://youtu.be/ET7fv8m8nNI	%2348 Professor Milton Wainwright - Panspermia	<p>Kate Valentine and Fahrusha Kate Valentine and Fahrusha are proud to present Professor Milton Wainwright, Ph.D. of Sheffield University who has done remarkable experiments concerning the theory of panspermia. Panspermia is an age old concept which had new life breathed into it by astronomer Sir Fred Hoyle and cosmologist Chandra Wickramasinghe. According to Wikipedia, panspermia is the hypothesis that life exists throughout the Universe, distributed by meteoroids, asteroids, comets, planetoids, and also by spacecraft in the form of unintended contamination by microorganisms. Neopanspermia is the proposition that it is happening currently as well. This is not to be confused with panpsychism which proposes that everything in the Universe is conscious on some level. Professor Wainwright has done some very amazing experiments discovering life forms in the upper atmosphere (25+ miles up) that are heretofore unknown on Earth and rather too heavy to have floated up from the surface. He has devised an ingenious method to prevent contamination. He and his graduate students have analyzed his findings with two types of electron microscopes and are currently hoping to find some scientists around the world to replicate his experiments. Interestingly, physicist Stephen Hawking has mentioned panspermia as the possible way that life has been spread across the Universe. Professor Wainwright can be reached by visiting his website miltonwainwright.com/contact/. Recorded: 5/09/17</p>	Transcript Link

ShatteredReality	2017-10-19	https://youtu.be/GZi0bkl2mvo	%2345 Tom Butler and EVPs	<p>Shattered Reality Podcast #45 Kate Valentine and Fahrusha welcome Tom Butler, expert on the EVP phenomena and author of Your Immortal Self: Exploring the Mindful Way. EVP stands for Electronic Voice Phenomena. The practice of using electronics to record the voices of entities was brought to the public eye by Latvian writer and parapsychologist Konstantīns Raudive and Swedish painter and film producer Friedrich Jürgenson. Tom and his wife Lisa Butler manage the A Trans C which stands for Association TransCommunication. The organization was started by the late Sarah Estep in 1982 as the American Association of Electronic Voice Phenomena (AA-EVP). Her objective was to “provide objective evidence that we survive physical death in our individual conscious state.” Tom Butler explains the basics of the EVP phenomena and links it to his understanding of human consciousness. We got a huge surprise when we bid Tom good-bye and were wrapping up the show. Suddenly on Kate’s track only we recorded an EVP. Kate and Fahrusha and our audio engineer, Bill, were all in the same room in plain sight of one another. We were totally surprised and flummoxed. You can hear it on the podcast after we hung up with Tom. We were all baffled. Here is what Tom had to say when we forwarded the clip to him: “Lisa and I agree that it does sound like a voice and assuming it was not voice from the room, it fits our expectation of EVP. As we hear it, there is a “Woup” voice sound shortly followed by a gurgling sound and then the prolonged “Ohhhhh.” We like to think of EVP as communication, but knowing they are often watching in, and how people in the peanut gallery like to comment on the goings on, I would not be surprised to learn the speaker was making a choking sound and then laughing about his or her cleverness. The speaker sounds like a young person “The thing is, we will likely never know. Many EVP are simply comments for which we have no references. Examples of such EVP can accumulate pretty fast, so except for their novelty, we usually suggest they are discarded. Else, we become overwhelmed with unanswerable questions. Your example does fit into the novelty category, as most peanut gallery comments are not as clear. “One of the things to look for is where the utterance showed up in the equipment. ShatteredReality	2017-09-28	https://youtu.be/R-26xKiZp9g	%2344 Dr. Penny Sartori and the Near Death Experience	<p>Kate Valentine and Fahrusha welcome Dr. Penny Sartori, author of <i>The Wisdom of Near Death Experiences</i>. Dr. Sartori has been trained as a nurse and worked in the Intensive Therapy Unit at hospitals in Wales, UK for twenty years. During her time as a nurse she was fascinated by the death-bed experiences of patients and the near death experiences that some had. She was so intensely interested that she earned a Ph.D. in Near Death Studies. She teaches two original courses at Swansea University on the treatment of ITU patients and their spirituality. In addition, Dr. Sartori has collected many accounts from people who have divulged their near death experiences to her. The experiences are varied but many have some attributes which are very similar. She is currently working on another book with a near death experiencer named Kelly Walsh about the transformative aspect of NDEs around the world. She has found that those patients who have had a positive near death experience are no longer afraid to die. In this episode's Listener Segment, Despina added a miraculous experience she had on a Greek Island where she made a pilgrimage to the church of a local saint. She walked thirty miles in one day and had a mystical adventure. Recorded: 2/25/17</p>	Transcript Link

ShatteredReality	2017-09-01	https://youtu.be/scvpGoMigQE	%2343 Rey Hernandez	Shattered Reality Podcast #43 Fahrusha and Kate Valentine welcome Rey Hernandez co-founder of FREE: The Dr. Edgar Mitchell Foundation for Research into Extraterrestrial Encounters. He gives us an overview of his many amazing UFO contact experiences. He also speaks about the mission of FREE, which is deeply involved with the role of consciousness in paranormal experiences. There are many consciousness researchers and abduction experts on the Board of FREE including former podcast guests Kathleen Marden and Dr. Claude Swanson. The cofounders include Dr. Rudy Schild, the late Dr. Edgar Mitchell, and our former guest, Mary Rodwell. FREE invites you to take a survey on UFO encounters on their homepage. In addition, one of our listeners, Gerry, tells us all about an intriguing paranormal dream experience she had a few years ago. Lastly, Fahrusha reveals how she and one of her clients have been dreaming uncannily similar dreams. Originally Air Date: 01/31/2017	Transcript Link

ShatteredReality	2017-08-10	https://youtu.be/MBD0h7TpHvM	%2342 Psychic Experiences of Psi Explorers	<p>Shattered Reality Podcast #42 In this podcast episode #42, Kate Valentine and Fahrusha speak to two Psi Explorers and one listener about their personal psychic experiences. First up is Russell Targ, formerly of the Stanford Research Institute, and one of the originators of remote viewing. His two stories of his own precognitive dreams are thought-provoking. He emphasizes that psychic dreams and other psi phenomena are normal and these experiences can be had by anyone. We just need to be attentive to them. Russell Targ's latest book <i>The of Reality of ESP, A Physicist's Proof of Psychic Abilities</i> is an excellent book explaining several different but related psi abilities and substantial examples from his professional experience. A trailer for his movie about the history of the US government's Remote Viewing program and his participation in it can be seen at the website thirdeyespies.com. Next up is Dr. Michael Grosso who tells two stories from his own collection of personal psychic experiences. The first is the story of a beautiful Christmas miracle (I can't tell you more because that would be a spoiler) and the second is a precognitive dream he had as a child. His most recent book is <i>The Man Who Could Fly: St. Joseph of Copertino and the Mystery of Levitation</i>. Listener Peter completes this episode with a very strange ghostly experience he had at the illustrious old Hotel Del Coronado in California in the early 1990's. Notes: During the episode Fahrusha mentioned an opinion piece on her blog which was reprinted by George Filer on Filer's Files. We want to thank Ken Pfeifer for also reprinting it. The article is called <i>Extraterrestrial Evolution</i>. Recorded: 1/3/17</p>	Transcript Link

ShatteredReality	2017-07-14	https://youtu.be/MPKmXZpaE9g	%2341 Alan Steinfeld	Shattered Reality Podcast #41 Kate Valentine and Fahrusha welcome New Realities founder Alan Steinfeld to Shattered Reality Podcast. Our discussion is very wide-ranging and very conversational. We talk about a trip that Alan organized and Fahrusha and a group of merry seekers made to Damanhur, the intentional community in Northern Italy, which focuses on ecology, art and spirituality. We move on to ET experiences and the significance of the experience to the individual and to society. Is there the possibility of disclosure? Are ET experiences transcendent? Negative? The same as spiritual experiences? We probe these questions a bit. Together we do get into ideas and concepts where we voice opinions and hash it out. It was necessary to clarify terms so that we knew precisely about what we were speaking. It was edifying to note, though we might use different terms we were overwhelmingly on the same page. ShatteredReality	2017-07-04	https://youtu.be/9st_Z6a4FhM	%2340 Ardy Sixkiller Clarke and the Star People	<p>Shattered Reality Podcast #40 Kate Valentine and Fahrusha welcome Dr. Ardy Sixkiller Clarke to Shattered Reality Podcast. She has written three books on American Indians and their experiences with Star People and Sky People. They are "Encounters With Star People: Untold Stories of American Indians", "Sky People: Untold Stories of Alien Encounters in Mesoamerica" and "More Encounters with Star People: Urban American Indians Tell Their Stories". She is also the author of twelve charming children's books and the best-selling academic text: "Sisters in the Blood: The Education of Women in Native America". It was a pleasure to speak with Dr. Clark about the many experiences she has personally chronicled through direct meetings with American Indians of many different tribes. Star People are part of the oral history of many indigenous peoples in North America and around the world. Those who are interested in ufology from a Euro-Centric point of view would be well advised to consider a slightly different perspective. It is fascinating how the actual experiences are quite similar but sometimes the experiencer's frame of reference and cultural context molds what he or she takes away from the contact with the Star People. □ □ Recorded: 11/08/16</p>	Transcript Link

ShatteredReality	2017-04-23	https://youtu.be/Ciq53zeRNLw	%2339 - Dr. Claude Swanson, PHYSICS OF CONSCIOUSNESS	Fahrusha and Kate Valentine welcome Dr. Claude Swanson to "Shattered Reality Podcast". He discusses a number of fascinating phenomena that are not explainable by Western physics and posits an alternative theory of subtle energy and torsion. Some of the included topics were time travel, remote viewing, UFOs, psychokinesis, out of body experiences and more; all in the context of a different picture of physics. We could have talked to Dr. Swanson for two days straight and still have more topics to cover. Dr. Swanson's books are The Synchronized Universe: New Science of the Paranormal and Life Force: The Scientific Basis. He is writing a third volume centering on the physics of the soul and the afterlife. His website is http://synchronizeduniverse.com . Dr. Swanson grew up in Virginia. He studied physics at M.I.T. and went on to get his Ph.D. at Princeton, working with physicist Robert Dicke. He did post graduate work at both Princeton and Cornell. Later he formed his own consulting firm and worked on applied physics projects for a number of corporate and government entities. Recorded: 11/01/16	Transcript Link

She took her most impressive interviews, made transcripts and created a book called Consciousness: Bridging the Gap Between Conventional Science and the New Super Science of Quantum Mechanics from Rainbow Ridge Books. Eva Herr has also authored another book called Apace. Recorded: 10/11/16	Transcript Link

ShatteredReality	2017-02-09	https://youtu.be/9pebR5-pwVU	%2337 Robert Hastings UFOs and Nukes	<p>Fahrusha and Kate Valentine welcome Robert Hastings, researcher of incursions by UFOs into nuclear weapons storage facilities, to Shattered Reality Podcast. One of the biggest threats to humanity and the planet is the possibility of the explosion of nuclear weapons on the Earth or in the atmosphere. Since the dawn of the nuclear age in the late 1940s, UFOs have been observed in conjunction with nuclear tests, nuclear research facilities and nuclear missile silos. This situation continues to the current day. Robert Hastings has been faithfully documenting this phenomena for more than three decades. In many cases the UFOs apparently took the missiles off line rendering them unable to be fired. In a few cases there were nuclear weapons put into the firing mode causing panic. While Hastings' research is largely centered in the US, there is documented evidence of incursions by UFOs happening at Russian missile sites as well. Robert Hastings' 48-minute documentary film, UFOs and Nukes: The Secret Link Revealed, is available at www.vimeo.com/ondemand/ufosandnukes. His book, UFOs and Nukes: Extraordinary Encounters at Nuclear Weapons Sites, is available ONLY at www.ufohastings.com/book for \$24.95. To contact Robert Hastings if you are a witness to a UFO at a military site (only) is : ufohastings@aol.com Robert Hastings mentioned on Shattered Reality Podcast an article, which is difficult to locate on the Internet featuring ex-CIA administrator Victor Marchetti. It discusses why the 'Powers That Be' in various countries which are purportedly officially aware of the UFO secret will never voluntarily divulge it. He also mentions high-level rumors he heard at CIA of crashed UFOs and bodies of "little gray men on ice at Wright-Patterson AFB". ShatteredReality	2017-01-19	https://youtu.be/Qq3ZBJ91YGE	%2336 Lisette Larkins	<p>Kate Valentine and Fahrusha warmly welcome Lisette Larkins, experimenter extraordinaire and prolific author, to Shattered Reality Podcast. Her alien encounters are numerous and filled with wise advice for those on Earth-plane. Here at Shattered Reality we believe in giving our guests the podium to express themselves and relate their experiences. We do not criticize the experiences of others that we believe to be expressed honestly from the heart. So kindly suspend disbelief when listening to the real life experiences of a very nice fellow human being. She has come out of these experiences with a great amount of wisdom which rivals many a sage. Greatly of interest to Fahrusha in Lisette's account are the paralysis and electrical "voltage" which precedes the alien communication which Fahrusha has also experienced. See the following: https://fahrusha.wordpress.com/2010/02/27/sleep-paralysis-vibrations-spiritual-revelation-and-alien-abduction-or-getting-out-of-4d/ Lisette Larkins is the author of five books, the latest of which is Above and Beyond, the Incredible True Story of Extraterrestrial Contact. He has written and co-written a very impressive list of books and professional psychological papers. We cover some of his work in dream studies. Beginning with his dream telepathy research with Montague Ullman and at the Dream Lab at Maimonides Medical Center in Brooklyn and continuing with his work today with an amazing female dreamer in Arizona, Dr. Stan gives wonderful examples of powerfully psychic dreams that will stimulate you to journal your sleeping adventures for further contemplation. Dr. Krippner also discusses some of his shamanic studies and his long term friendship with Rolling Thunder, a colorful Native American shaman and cultural icon. He wrote a book about this called The Voice of Rolling Thunder with Sidian Morningstar Jones. Dr. Stanley Krippner's website can be accessed for a list of his books and articles to read and more. ShatteredReality	2016-12-21	https://youtu.be/SkXloBiDeIU	%2334 Russell Targ and Remote Viewing	Shattered Reality Podcast #34 Russell Targ, renowned physicist and author, joins Kate Valentine and Fahrusha for an amazing conversation about remote viewing. This episode is a MUST listen. Shattered Reality Podcast is honored to present this psychic pioneer and his fascinating story about his seminal work in remote viewing as a contractor for several clandestine alphabet agencies. Targ is the author of nine books. His latest The Reality of ESP: A Physicist's Proof of Psychic Abilities he feels is most complete, partially due to the fact that he was able to include both photos and information that were previously classified. He is also the producer of a new film titled Third Eye Spies which is due for release at the end of the year. Fahrusha has seen two iterations of the film in progress and hails it as an important historical document and a gripping narrative of psychic espionage. The award-winning director of the film is Lance Mungia. One quote from the movie's home page sums up Russell Targ's point of view about remote viewing, "The CIA, NSA and DIA used it, your tax dollars paid for it, and now you deserve to know about it." ShatteredReality	2016-12-04	https://youtu.be/wUdl0hNh1Mg	%2333 C.M. Mayo, Spiritism and the 1910 Mexican Revolution	<p>Fahrusha and Kate Valentine welcome award-winning author C.M. Mayo to “Shattered Reality Podcast” to discuss the role of Spiritism in the 1910 Mexican Revolution and related topics. Francisco I. Madero who briefly became the President of Mexico was a devout Spiritist. He was also a leader of the 1910 Mexican Revolution. Mayo’s book, <i>Metaphysical Odyssey into the Mexican Revolution: Francisco I. Madero and his secret book Spiritist Manual</i>, is actually two books in one. The first part is a well researched examination of Francisco I. Madero’s Involvement with Spiritism (an offshoot of Spiritualism with some unusual twists) and its effect on the Mexican Revolution and thereby the history of Mexico. It also chronicles C.M. Mayo’s journey to understanding the very complex network of interrelationships between the players and philosophies responsible for the Mexican Revolution. The second book within a book is C.M. Mayo’s painstaking translation of Madero’s Spiritist Manual which he wrote under the nom de plume “Bhîma”. It is an interesting look inside the mind of one of Mexico’s most famous leaders from a metaphysical perspective. We think students of history as well as those interested in the paranormal will find this episode fascinating. Errata: The 2016 SSE Symposium happened in Boulder, CO not Denver. ShatteredReality	2016-11-28	https://youtu.be/9JHRgXRvJyo	%2332 Ron Felber and Big Al Santariga	<p>Fahrusha and Kate Valentine welcome author Ron Felber to discuss his latest book Dark Angel, a fictional account of murder and mayhem under the secrecy of dark projects of the government. It required him to research DARPA (an acronym for Defense Advanced Research Projects Agency). He also speculates on whether Josef Mengele has any relationship to today's genetic research into producing super soldiers. His title Dark Angel directly corresponds to Mengele's epithet "Angel of Death". Our second guest, Big Al Santariga of the Bronxville Paranormal Society, reviews several of his UFO sightings with Kate and Fahrusha. We also pose the question as to why some people are multiple experiencers and others are non-experiencers. Production Note: Here at "Shattered Reality Podcast" we had a small production glitch, in that Kate and Fahrusha both heard a delayed echo of their own voices while recording, so please excuse their slow speech patterns. ShatteredReality	2016-11-10	https://youtu.be/898H4r8CVZk	%2331 Rosalyn Berne	<p>Fahrusha and Kate Valentine welcome Dr. Rosalyn Berne, horse whisperer. Rosalyn Berne's life has been filled with mystical experiences throughout, but by far her most unusual gift to date has been her ability to communicate with horses. She is in fact a genuine horse whisperer. Kate Valentine and Fahrusha, both animal lovers and communicators themselves, were pleased to be able to speak to Rosalyn Berne about her unusual gift. What makes Rosalyn different from other animal communicators is her unique ability, on occasion, to elicit complex and abstract thoughts from her equine companions. Most good animal communicators are able to understand the creature with whom they are interfacing well enough to determine the creature's feelings, needs, likes and dislikes, and their traumas and illnesses. Receiving abstract thoughts about other subjects is highly unusual. Something that I (Fahrusha) forgot to mention during the podcast is that the word for little horse in Schwitzer Deutsch (Swiss German) is Rösli and the name Roselind refers not to roses in its derivation but to being a horse woman. Coincidence? Berne is the author of four books and is working on a fifth. Her two published works on her mystical life and her equine communication abilities are Waking to Beauty: Encounters with Remarkable Beings (2016) and When the Horses Whisper (2014). In addition Dr. Berne is a professor in the field of Science, Technology, & Society (STS) at the University of Virginia. Recorded: 5-31-2016</p>	Transcript Link

ShatteredReality	2016-10-22	https://youtu.be/zU0u-XCULy0	%2330 Andrew Chesnut and Santa Muerte	Shattered Reality Podcast #30 Kate Valentine and Fahrusha welcome Andrew Chesnut, author of Devoted to Death, Santa Muerte, the Skeleton Saint, for this thirtieth episode of Shattered Reality Podcast. He is the Bishop Walter F. Sullivan Chair in Catholic Studies and Professor of Religious Studies at Virginia Commonwealth University School of World Studies. The worship of Santa Muerte is the fastest growing sect in the Western Hemisphere. Santa Muerte can be considered to be a religious syncretism between the Spanish European Grim Reaperess and the the death diety of the Aztec goddess, Mictecacihuatl. She is widely worshipped by the very poor, drug dealers, prison guards, and the lovelorn. Devotees believe the Bony Lady to be the fastest and most efficacious miracle worker. We also compare Santa Muerte to other folk saints both in the Americas and Europe and discuss the commonalties and differences as well as religious trends. Recorded: 5/10/16	Transcript Link

ShatteredReality	2016-09-04	https://youtu.be/RloYHRy5hl0	%2327 - Dr. Michael Grosso and "The Man Who Could Fly"	<p>Fahrusha and Kate Valentine welcome philosopher and author Dr. Michael Grosso to "Shattered Reality Podcast". Levitation, particularly unaided human flight, has been a fascination of many individuals since the advent of human history. In this episode of "Shattered Reality Podcast", Kate Valentine and Fahrusha seek to uncover information about the secrets and reality of this ever mysterious, ever elusive ability, with the able help of Dr. Michael Grosso, author of The Man Who Could Fly. St. Joseph of Copertino, the subject of the book, was an uneducated and poor man who lived in the 17th Century in Italy. He became a Franciscan friar and during the course of his devotions experienced spiritual ecstasy causing him to levitate. This levitation was beyond his control. It was witnessed by thousands of people during his lifetime and happened hundreds of times in different locations around southern Italy. Dr. Michael Grosso has taught humanities and philosophy at Marymount Manhattan College, City University of New York, and New Jersey City University. He is affiliated with the Division of Perceptual Studies at the University of Virginia. His other books include The Final Choice: Playing the Survival Game (1985); Frontiers of the Soul: Exploring Psychic Evolution (1992), The Millennium Myth: Love and Death at the End of Time (1995), Soulmaking: Uncommon Paths to Self-Understanding (1997), and Experiencing the Next World Now (2004). We chose having Alex on the show because of the valuable work he has done by having debunkers on his show and taking them on with intelligence and grace, while demolishing their faulty positions forcefully and with aplomb. We may not agree with everything he proposes but we are eternally grateful for his doing some very heavy lifting for all legitimate anomalous researchers. His crusade against the antiquated and disproven paradigms of the mechanistic and materialistic worldview is truly a valuable contribution to the very paradigm shifting we espouse on "Shattered Reality Podcast".
