

1
00:00:33,810 --> 00:00:40,450
hello I'm Richard Saunders welcome again

2
00:00:37,359 --> 00:00:43,590
to formula origami this time we hang

3
00:00:40,450 --> 00:00:48,510
time this little some sort of course

4
00:00:43,590 --> 00:00:48,510
great little model very easy to make

5
00:00:49,070 --> 00:00:56,909
so you begin without square of paper

6
00:00:52,710 --> 00:01:02,760
with the count side now we follow the

7
00:00:56,909 --> 00:01:08,729
bottom edge up to the top like this like

8
00:01:02,759 --> 00:01:11,030
a nice crease here will unfold that

9
00:01:08,730 --> 00:01:11,030
again

10
00:01:13,180 --> 00:01:21,610
now take this edge here hold it across

11
00:01:16,000 --> 00:01:29,409
like that again another nice crease and

12
00:01:21,609 --> 00:01:31,629
unfold now turn them all over this fold

13
00:01:29,409 --> 00:01:39,329
this corner here up to the top leg

14
00:01:31,629 --> 00:01:42,340
battery a nice pole here unfold that and

15
00:01:39,329 --> 00:01:46,769
do the same with this corner here hold

16
00:01:42,340 --> 00:01:46,770
it up top

17
00:01:50,069 --> 00:01:57,399
nice crease unfold that now if we pick

18
00:01:54,400 --> 00:01:59,890
up the model push that up slightly we

19
00:01:57,400 --> 00:02:03,330
should be able to grab the ridges at the

20
00:01:59,890 --> 00:02:09,789
top here and squash the whole thing

21
00:02:03,329 --> 00:02:12,099
together squash it down flat next thing

22
00:02:09,789 --> 00:02:15,039
to do is to fold this bottom edge here

23
00:02:12,099 --> 00:02:20,109
on the top flap only in towards the

24
00:02:15,039 --> 00:02:25,919
center that Max increase and do the same

25
00:02:20,110 --> 00:02:25,920
thing with this edge here only

26
00:02:26,979 --> 00:02:29,579
that

27
00:02:30,150 --> 00:02:36,230
finally the top point down along that

28
00:02:33,419 --> 00:02:36,229
line we've just made

29

00:02:39,990 --> 00:02:44,360
so we end up with that sort of shape to

30
00:02:42,060 --> 00:02:51,420
unfold the last three faults they're

31
00:02:44,360 --> 00:02:53,730
there now to grow a pair of scissors cut

32
00:02:51,419 --> 00:02:56,549
the very top flap only from the base

33
00:02:53,729 --> 00:03:00,810
here to that point there at the fold

34
00:02:56,550 --> 00:03:03,170
we've just made only on the top flap so

35
00:03:00,810 --> 00:03:03,170
here we go

36
00:03:08,060 --> 00:03:16,620
just like that now we fold up this new

37
00:03:14,550 --> 00:03:21,420
flat we've created here straight up and

38
00:03:16,620 --> 00:03:25,189
out to the side fold this side and the

39
00:03:21,419 --> 00:03:25,189
same way like that

40
00:03:28,389 --> 00:03:34,869
once we've done that turn the model over

41
00:03:31,650 --> 00:03:40,500
do exactly the same thing to this side

42
00:03:34,870 --> 00:03:40,500
so I'll bring in silent edge like that

43
00:03:41,710 --> 00:03:44,490

bring in this edge here

44

00:03:48,219 --> 00:03:53,189

and finally bring the top down like that

45

00:03:54,129 --> 00:04:03,079

unfold the last three folds you make

46

00:03:56,590 --> 00:04:06,580

once again scissors and cut

47

00:04:03,080 --> 00:04:10,840

top flap only

48

00:04:06,580 --> 00:04:17,199

this base the point right to the crease

49

00:04:10,840 --> 00:04:20,620

you just made like that once again fold

50

00:04:17,199 --> 00:04:23,509

these parts up and out to the side one

51

00:04:20,620 --> 00:04:27,300

this part is why

52

00:04:23,509 --> 00:04:29,550

how do you function at the moment next

53

00:04:27,300 --> 00:04:32,100

thing to do is to fold these areas can

54

00:04:29,550 --> 00:04:38,870

half towards the center so I'll grab

55

00:04:32,100 --> 00:04:38,870

this whole area like this across

56

00:04:45,288 --> 00:04:50,050

to the same with this side oh let across

57

00:04:52,930 --> 00:04:58,150

turn the model over

58
00:04:55,579 --> 00:05:02,139
and do the same thing on the other side

59
00:04:58,149 --> 00:05:02,138
these flaps come in like this

60
00:05:05,279 --> 00:05:08,959
this side across like this

61
00:05:15,709 --> 00:05:22,560
now turn the model around so these areas

62
00:05:19,889 --> 00:05:25,110
are facing you next thing we're going to

63
00:05:22,560 --> 00:05:28,370
do we're going to open up this side here

64
00:05:25,110 --> 00:05:31,729
to make the tail so put our thumb and

65
00:05:28,370 --> 00:05:31,728
fold it down

66
00:05:33,459 --> 00:05:36,418
in itself

67
00:05:36,870 --> 00:05:46,899
squash my life make time for the head do

68
00:05:43,209 --> 00:05:51,968
the same thing further up thumb inside

69
00:05:46,899 --> 00:05:53,998
and squash him down to make me

70
00:05:51,968 --> 00:05:53,998
Oh

71
00:05:54,420 --> 00:05:59,650
and there's the

72

00:05:56,848 --> 00:06:02,740

that is our somersaulting horse and to

73

00:05:59,649 --> 00:06:06,448

make a jump simply given a good flick

74

00:06:02,740 --> 00:06:06,449

under the tail Lakers

75

00:06:14,848 --> 00:06:16,908

you
