

1  
00:00:00,000 --> 00:00:07,139  
among other funny things that happen on

2  
00:00:02,520 --> 00:00:09,710  
that day in addition to the tragic

3  
00:00:07,139 --> 00:00:12,210  
events there quite a few things that

4  
00:00:09,710 --> 00:00:15,719  
happened that are kind of odd on that

5  
00:00:12,210 --> 00:00:19,230  
day and I'm not talking about conspiracy

6  
00:00:15,718 --> 00:00:20,879  
theories or the idea that the World

7  
00:00:19,230 --> 00:00:23,910  
Trade Center towers were brought down by

8  
00:00:20,879 --> 00:00:25,679  
a particle beam weapon from space or you

9  
00:00:23,910 --> 00:00:32,368  
know the Illuminati or anything else

10  
00:00:25,679 --> 00:00:34,469  
just some easily observable phenomena

11  
00:00:32,368 --> 00:00:36,450  
say I want to talk about some of the

12  
00:00:34,469 --> 00:00:38,280  
other a known anomalies for a moment and

13  
00:00:36,450 --> 00:00:40,760  
then the geomagnetic fields both in

14  
00:00:38,280 --> 00:00:43,950  
Alaska where I was first pointed to and

15  
00:00:40,759 --> 00:00:45,390  
elsewhere and then possible of mundane

16  
00:00:43,950 --> 00:00:48,210  
explanations and perhaps some

17  
00:00:45,390 --> 00:00:50,789  
speculative explanations that might be

18  
00:00:48,210 --> 00:00:51,929  
relevant and a little discussion as it

19  
00:00:50,789 --> 00:00:53,698  
says here I'm not trying to prove

20  
00:00:51,929 --> 00:00:55,320  
anything this is far from being a

21  
00:00:53,698 --> 00:00:56,628  
completed study of anything I'm just

22  
00:00:55,320 --> 00:00:59,488  
trying to encourage further

23  
00:00:56,628 --> 00:01:02,039  
investigations as you know theories are

24  
00:00:59,488 --> 00:01:04,228  
a dime a dozen and proofs are a lot

25  
00:01:02,039 --> 00:01:06,118  
harder to come by that's from the great

26  
00:01:04,228 --> 00:01:11,728  
Sidney Harris I'm sure many of you

27  
00:01:06,118 --> 00:01:13,890  
recognize some anomalies that many of

28  
00:01:11,728 --> 00:01:15,359  
you have studied or know about the

29

00:01:13,890 --> 00:01:17,969  
global consciousness project of course

30  
00:01:15,359 --> 00:01:20,400  
random number generators went a little

31  
00:01:17,969 --> 00:01:23,099  
bit wacky just before the events of

32  
00:01:20,400 --> 00:01:26,850  
September 11th and there's a lot to be

33  
00:01:23,099 --> 00:01:30,719  
said about that our online site called

34  
00:01:26,849 --> 00:01:33,688  
got cyborgs there was some anomalies in

35  
00:01:30,719 --> 00:01:36,048  
the card guessing hit rate during that

36  
00:01:33,688 --> 00:01:38,819  
time or just previous to 9/11

37  
00:01:36,049 --> 00:01:41,250  
DeHaven found also that some free

38  
00:01:38,819 --> 00:01:45,478  
associated keywords typed into one of

39  
00:01:41,250 --> 00:01:49,500  
those little tests showed a surprising

40  
00:01:45,478 --> 00:01:53,819  
drop in the number of violence disaster

41  
00:01:49,500 --> 00:01:56,218  
terrorist related terms during the

42  
00:01:53,819 --> 00:01:58,859  
period just before 9/11 it is true that

43  
00:01:56,218 --> 00:02:00,658

there was some stock market activities

44

00:01:58,859 --> 00:02:03,659

that were kind of questionable some

45

00:02:00,659 --> 00:02:06,630

people did really short airline stocks

46

00:02:03,659 --> 00:02:07,340

in the week before September 11th we're

47

00:02:06,629 --> 00:02:09,109

told that the

48

00:02:07,340 --> 00:02:11,030

Commission 9/11 Commission looked into

49

00:02:09,110 --> 00:02:12,620

this very carefully and I believe some

50

00:02:11,030 --> 00:02:14,628

other people did as well and found the

51

00:02:12,620 --> 00:02:16,730

trades to be innocuous with no

52

00:02:14,628 --> 00:02:19,219

suspicious motivations or connections or

53

00:02:16,729 --> 00:02:20,810

anything just people felt like it was a

54

00:02:19,219 --> 00:02:22,848

good time to sell the airline stocks

55

00:02:20,810 --> 00:02:26,598

earlier we're using their site using

56

00:02:22,848 --> 00:02:28,518

their intuition to to do so they've been

57

00:02:26,598 --> 00:02:30,919

a lot of precognitive dreams and visions

58  
00:02:28,519 --> 00:02:33,140  
relating to 9/11 there's a few dozen of

59  
00:02:30,919 --> 00:02:36,589  
them on our website I have to tell you

60  
00:02:33,139 --> 00:02:38,238  
that I've heard two new precognitive

61  
00:02:36,590 --> 00:02:42,680  
dream stories just since I've been here

62  
00:02:38,239 --> 00:02:45,430  
among this audience and not from people

63  
00:02:42,680 --> 00:02:47,959  
you might expect necessarily either

64  
00:02:45,430 --> 00:02:50,450  
here's one of my interpretations of the

65  
00:02:47,959 --> 00:02:53,120  
9/11 random number generator date this

66  
00:02:50,449 --> 00:02:55,939  
is not necessarily endorsed by Roger or

67  
00:02:53,120 --> 00:02:58,879  
anybody else but the events are in red

68  
00:02:55,939 --> 00:03:01,250  
and this is the movement of the

69  
00:02:58,878 --> 00:03:06,649  
generators starting pretty clearly about

70  
00:03:01,250 --> 00:03:08,209  
four hours before the events enough has

71  
00:03:06,650 --> 00:03:10,849  
been said about that the card guessing

72  
00:03:08,209 --> 00:03:12,129  
game as some of you know is a five-card

73  
00:03:10,848 --> 00:03:15,229  
forced-choice

74  
00:03:12,129 --> 00:03:17,959  
guessing game you just try to determine

75  
00:03:15,229 --> 00:03:21,199  
which card has the picture on it as of

76  
00:03:17,959 --> 00:03:23,840  
this morning we have probably 60 or 70

77  
00:03:21,199 --> 00:03:27,108  
million trials in the can on that test

78  
00:03:23,840 --> 00:03:29,359  
alone and a total of 144 million on all

79  
00:03:27,109 --> 00:03:32,090  
of the tests and nobody has time to

80  
00:03:29,359 --> 00:03:34,849  
really analyze it fairly we don't have

81  
00:03:32,090 --> 00:03:37,129  
the support to do that but here's the

82  
00:03:34,848 --> 00:03:40,418  
card chest daily hit rate from 2002

83  
00:03:37,129 --> 00:03:46,759  
April of 2005 you can see there's a huge

84  
00:03:40,419 --> 00:03:49,790  
notch in that hit rate and that was just

85  
00:03:46,759 --> 00:03:52,548  
two weeks prior to 9/11 people got

86

00:03:49,789 --> 00:03:55,219  
incredibly bad at guessing these cards Z

87  
00:03:52,549 --> 00:03:57,169  
of minus 3 this is a filtered waveform

88  
00:03:55,219 --> 00:04:00,379  
of course but it's Z of minus 3

89  
00:03:57,169 --> 00:04:02,120  
essentially for two weeks before 9/11

90  
00:04:00,379 --> 00:04:04,489  
then it returned to normal

91  
00:04:02,120 --> 00:04:06,859  
shortly thereafter I can't show it on

92  
00:04:04,489 --> 00:04:08,780  
this diagram but there are effects on

93  
00:04:06,859 --> 00:04:13,700  
this data that persists for a year after

94  
00:04:08,780 --> 00:04:16,298  
the 9/11 deviations onto magnetometers

95  
00:04:13,699 --> 00:04:18,459  
this is a very high quality instant

96  
00:04:16,298 --> 00:04:22,109  
that's typically used by the geomagnetic

97  
00:04:18,459 --> 00:04:25,560  
community 3-axis fluxgate magnetometer

98  
00:04:22,110 --> 00:04:28,900  
three orthogonal coils basically and

99  
00:04:25,560 --> 00:04:31,329  
they are used at these various stations

100  
00:04:28,899 --> 00:04:34,929

in Alaska as well as around the world

101

00:04:31,329 --> 00:04:38,378

and also similar designs are flying in

102

00:04:34,930 --> 00:04:42,098

spacecraft let's remind ourselves of the

103

00:04:38,379 --> 00:04:45,069

event times the major events of 9/11 the

104

00:04:42,098 --> 00:04:47,529

first strike of the World Trade Center

105

00:04:45,069 --> 00:04:50,139

tower was at 1246 Universal Time

106

00:04:47,529 --> 00:04:51,848

then the second plane hit the second

107

00:04:50,139 --> 00:04:55,418

tower than a third plane at the Pentagon

108

00:04:51,848 --> 00:04:57,399

then the second tower fell then a fourth

109

00:04:55,418 --> 00:05:01,120

plane crashed in Pennsylvania then the

110

00:04:57,399 --> 00:05:03,939

first tower fell at 1429 so this gray is

111

00:05:01,120 --> 00:05:05,978

our area of interest and this is of

112

00:05:03,939 --> 00:05:09,610

course Universal Time throughout the

113

00:05:05,978 --> 00:05:11,680

entire 9/11 day so here's the first

114

00:05:09,610 --> 00:05:14,919

mandatory that I looked at Fort Yukon in

115  
00:05:11,680 --> 00:05:16,569  
the center of Alaska nice big glitch in

116  
00:05:14,918 --> 00:05:18,068  
the middle Eris and some definite

117  
00:05:16,569 --> 00:05:22,830  
changes in the character of the curve

118  
00:05:18,069 --> 00:05:25,360  
well there's the events right there so

119  
00:05:22,829 --> 00:05:28,718  
let's see someone remarkable to me

120  
00:05:25,360 --> 00:05:30,908  
because there's a real impulse centered

121  
00:05:28,718 --> 00:05:33,519  
directly on the very first event and a

122  
00:05:30,908 --> 00:05:36,069  
huge deviation centered directly on the

123  
00:05:33,519 --> 00:05:37,538  
last event and then a considerable

124  
00:05:36,069 --> 00:05:41,110  
change in the character of the core of a

125  
00:05:37,538 --> 00:05:43,449  
minor a minor geomagnetic storm a lot

126  
00:05:41,110 --> 00:05:44,259  
more noise and variance and so forth so

127  
00:05:43,449 --> 00:05:45,879  
this seemed like an interesting

128  
00:05:44,259 --> 00:05:48,340  
correspondence so I started to look

129  
00:05:45,879 --> 00:05:50,228  
around at other magnetometers here's

130  
00:05:48,339 --> 00:05:53,109  
poker flats just another place in Alaska

131  
00:05:50,228 --> 00:05:56,158  
very similar sort of thing much farther

132  
00:05:53,110 --> 00:05:59,580  
north in Alaska at Bell here we see

133  
00:05:56,158 --> 00:06:02,528  
somewhat different but still similar

134  
00:05:59,579 --> 00:06:04,750  
sort of a curve these variations are

135  
00:06:02,528 --> 00:06:06,699  
nothing special they're not larger than

136  
00:06:04,750 --> 00:06:08,259  
anything typical they just happened to

137  
00:06:06,699 --> 00:06:11,169  
be at these particular times

138  
00:06:08,259 --> 00:06:12,759  
here's Los Alamos New Mexico - big

139  
00:06:11,168 --> 00:06:16,408  
inflections at the beginning and the end

140  
00:06:12,759 --> 00:06:18,580  
of the events and a big fall in between

141  
00:06:16,408 --> 00:06:21,278  
Fredericksburg Maryland quite a bit

142  
00:06:18,579 --> 00:06:22,568  
different but still bottoms out right at

143

00:06:21,278 --> 00:06:24,699  
the end of the events and there's a

144  
00:06:22,569 --> 00:06:28,160  
transition this is much of course their

145  
00:06:24,699 --> 00:06:30,139  
data as you can see Peru

146  
00:06:28,160 --> 00:06:31,790  
something funny happening in the middle

147  
00:06:30,139 --> 00:06:34,959  
there and again another big transition

148  
00:06:31,790 --> 00:06:39,010  
right at the end of the events China

149  
00:06:34,959 --> 00:06:43,009  
similar although smaller in magnitude

150  
00:06:39,009 --> 00:06:45,949  
Lebanon very similar but a great

151  
00:06:43,009 --> 00:06:47,899  
distance away Greenland

152  
00:06:45,949 --> 00:06:51,219  
quite a bit different but there's still

153  
00:06:47,899 --> 00:06:54,379  
something going on in that area there

154  
00:06:51,220 --> 00:06:57,170  
Ethiopia a big pedestal that looks sort

155  
00:06:54,379 --> 00:07:00,560  
of like the inverse of the other curve

156  
00:06:57,170 --> 00:07:02,720  
an article where it's quieter than any

157  
00:07:00,560 --> 00:07:05,120

place else except for the Earth's

158

00:07:02,720 --> 00:07:07,190

geomagnetic field so there's a big drop

159

00:07:05,120 --> 00:07:09,699

there it seems that something is going

160

00:07:07,189 --> 00:07:12,620

on all over the planet and in various

161

00:07:09,699 --> 00:07:14,329

degrees there's in particular a big

162

00:07:12,620 --> 00:07:16,069

transition just at the end of these

163

00:07:14,329 --> 00:07:17,810

events why that might be the case I have

164

00:07:16,069 --> 00:07:21,589

no idea it could be just a big

165

00:07:17,810 --> 00:07:24,139

coincidence but this result lots of

166

00:07:21,589 --> 00:07:26,149

local sources that one might imagine you

167

00:07:24,139 --> 00:07:29,120

know HAARP or a bunch of radars training

168

00:07:26,149 --> 00:07:30,709

on or anything that's localized and

169

00:07:29,120 --> 00:07:32,149

deliberate and furthermore the

170

00:07:30,709 --> 00:07:34,609

transition started right at the

171

00:07:32,149 --> 00:07:36,349

beginning exactly at the first strike

172  
00:07:34,610 --> 00:07:39,230  
and you would think if there was some

173  
00:07:36,350 --> 00:07:42,670  
military response being recorded here

174  
00:07:39,230 --> 00:07:46,970  
that would take a little while to happen

175  
00:07:42,670 --> 00:07:49,160  
so I don't think there's any particular

176  
00:07:46,970 --> 00:07:50,780  
evidence of something nefarious going on

177  
00:07:49,160 --> 00:07:53,870  
here or anything localized let's look

178  
00:07:50,779 --> 00:07:56,479  
out in space at the magnetometer on goes

179  
00:07:53,870 --> 00:07:58,670  
8 which is as you know a geosynchronous

180  
00:07:56,480 --> 00:08:01,460  
satellite so it's about 22,000 miles

181  
00:07:58,670 --> 00:08:04,100  
away from the earth and there's a pretty

182  
00:08:01,459 --> 00:08:06,399  
clear pedestal in the geomagnetic field

183  
00:08:04,100 --> 00:08:10,280  
right there and again a big transition

184  
00:08:06,399 --> 00:08:12,229  
right at the end of the events so that's

185  
00:08:10,279 --> 00:08:14,149  
all again consistent with ordinary

186  
00:08:12,230 --> 00:08:17,210  
fluctuations in the geomagnetic field

187  
00:08:14,149 --> 00:08:19,579  
you see it in space as well we can look

188  
00:08:17,209 --> 00:08:23,409  
at the solar wind which is of course the

189  
00:08:19,579 --> 00:08:26,060  
source of much of or if not all of the

190  
00:08:23,410 --> 00:08:28,400  
variations in the local magnetic field

191  
00:08:26,060 --> 00:08:31,519  
and there's a huge spike right at the

192  
00:08:28,399 --> 00:08:35,000  
end there in the solar wind the proton

193  
00:08:31,519 --> 00:08:37,429  
densities that goes satellite this is

194  
00:08:35,000 --> 00:08:38,320  
five-minute data by the way was all I

195  
00:08:37,429 --> 00:08:40,359  
could

196  
00:08:38,320 --> 00:08:42,430  
whereas the other was one-minute data

197  
00:08:40,360 --> 00:08:46,379  
and said this might be even delayed a

198  
00:08:42,429 --> 00:08:48,669  
little by the filtering I don't know

199  
00:08:46,379 --> 00:08:50,879  
let's go a little farther out in space

200

00:08:48,669 --> 00:08:55,360  
as you know there are some satellites

201  
00:08:50,879 --> 00:08:57,480  
called ace and Soho at I1 the first

202  
00:08:55,360 --> 00:08:59,800  
lagrangian point which is on a direct

203  
00:08:57,480 --> 00:09:02,139  
running between the earth and the Sun

204  
00:08:59,799 --> 00:09:05,529  
and these are about a million miles away

205  
00:09:02,139 --> 00:09:07,029  
and they're monitoring solar wind and

206  
00:09:05,529 --> 00:09:09,490  
various other things including the

207  
00:09:07,029 --> 00:09:11,740  
interplanetary magnetic field which this

208  
00:09:09,490 --> 00:09:15,039  
is you can see a gigantic transition

209  
00:09:11,740 --> 00:09:17,950  
right in the middle of around the 1300

210  
00:09:15,039 --> 00:09:20,139  
hour there I'll remind you that on earth

211  
00:09:17,950 --> 00:09:24,280  
here is the biggest transition area the

212  
00:09:20,139 --> 00:09:27,100  
end of the 9/11 events at 1430 so that's

213  
00:09:24,279 --> 00:09:28,720  
about 75 minutes early well 75 minutes

214  
00:09:27,100 --> 00:09:31,899

turns out to be the time that it takes

215

00:09:28,720 --> 00:09:34,269

the solar wind to get from I1 to the

216

00:09:31,899 --> 00:09:37,000

less in fact if you calculate if you

217

00:09:34,269 --> 00:09:40,419

take the actual spacecraft parameters on

218

00:09:37,000 --> 00:09:42,309

that day and calculate the distance and

219

00:09:40,419 --> 00:09:45,189

divide that by the actual solar wind

220

00:09:42,309 --> 00:09:51,179

measured up I1 that day you get 75

221

00:09:45,190 --> 00:09:54,400

minutes so it's interesting that this

222

00:09:51,179 --> 00:09:57,129

was a day of particularly long time to

223

00:09:54,399 --> 00:09:59,169

earth this is three months actually

224

00:09:57,129 --> 00:10:02,470

three solar rotations about three months

225

00:09:59,169 --> 00:10:05,669

worth of the transit time calculated

226

00:10:02,470 --> 00:10:07,930

from the distance of the spacecraft and

227

00:10:05,669 --> 00:10:10,959

including the solar wind velocity for

228

00:10:07,929 --> 00:10:12,459

that day and just at the beginning of

229

00:10:10,960 --> 00:10:14,440  
nine eleven or nine ten

230

00:10:12,460 --> 00:10:15,970  
really the spacecraft is a little

231

00:10:14,440 --> 00:10:17,560  
farther away than usual and the solar

232

00:10:15,970 --> 00:10:20,980  
wind was quite a bit slower than usual

233

00:10:17,559 --> 00:10:23,559  
so for no good reason the transit time

234

00:10:20,980 --> 00:10:28,000  
of those protons and other junk to Earth

235

00:10:23,559 --> 00:10:29,949  
was almost twice as long as the average

236

00:10:28,000 --> 00:10:32,379  
which is more around 50 minutes as you

237

00:10:29,950 --> 00:10:36,610  
can steer 60 minutes as you can see on

238

00:10:32,379 --> 00:10:38,230  
the left side of the diagram there well

239

00:10:36,610 --> 00:10:40,629  
let's look at the solar wind density

240

00:10:38,230 --> 00:10:44,050  
again in a bigger view this three month

241

00:10:40,629 --> 00:10:47,169  
view of three solar rotations view the

242

00:10:44,049 --> 00:10:47,659  
the peak of interest is this one in the

243  
00:10:47,169 --> 00:10:49,219  
center

244  
00:10:47,659 --> 00:10:51,649  
you can see it's not particularly

245  
00:10:49,220 --> 00:10:53,930  
unusual there are a number of peaks here

246  
00:10:51,649 --> 00:10:55,669  
they are within this three-month period

247  
00:10:53,929 --> 00:10:58,429  
that are equal or greater in magnitude

248  
00:10:55,669 --> 00:11:00,019  
but again it's right in the middle and

249  
00:10:58,429 --> 00:11:04,339  
then centered within a minute or two of

250  
00:11:00,019 --> 00:11:05,600  
the end of these events it is also the

251  
00:11:04,340 --> 00:11:07,670  
largest peak within that particular

252  
00:11:05,600 --> 00:11:11,000  
solar rotation the middle third of the

253  
00:11:07,669 --> 00:11:13,009  
of the picture so we can get a clearer

254  
00:11:11,000 --> 00:11:14,720  
probability for how likely it is just by

255  
00:11:13,009 --> 00:11:17,720  
counting the number of similar or

256  
00:11:14,720 --> 00:11:20,960  
greater peaks in this three-month period

257

00:11:17,720 --> 00:11:23,450  
and dividing that into buckets that are

258  
00:11:20,960 --> 00:11:26,389  
the size of the synchronization what we

259  
00:11:23,450 --> 00:11:29,240  
think we're seeing here and just sort of

260  
00:11:26,389 --> 00:11:31,819  
as a preliminary or crude estimate of

261  
00:11:29,240 --> 00:11:36,799  
the probability they're roughly 10

262  
00:11:31,820 --> 00:11:38,180  
events in 11,000 10-minute periods we

263  
00:11:36,799 --> 00:11:39,559  
think the synchronization is a lot

264  
00:11:38,179 --> 00:11:41,809  
better than 10 minutes but let's be

265  
00:11:39,559 --> 00:11:44,059  
conservative in say 10 minutes that

266  
00:11:41,809 --> 00:11:46,639  
would be on its own just for that one

267  
00:11:44,059 --> 00:11:48,199  
part of the waveform a probability of

268  
00:11:46,639 --> 00:11:50,990  
less than 1,000 to 1

269  
00:11:48,200 --> 00:11:54,530  
so it's interesting but certainly not

270  
00:11:50,990 --> 00:11:57,879  
evidential of anything in particular as

271  
00:11:54,529 --> 00:12:00,319

you can see it's not a terribly unusual

272

00:11:57,879 --> 00:12:03,379

deviation on the whole but I remind you

273

00:12:00,320 --> 00:12:05,330

that there was a big impulse right at

274

00:12:03,379 --> 00:12:08,240

the beginning of these events and in

275

00:12:05,330 --> 00:12:11,150

particularly in Alaska a large deviation

276

00:12:08,240 --> 00:12:14,480

at the end of the events within a very

277

00:12:11,149 --> 00:12:16,220

short time period of synchronization so

278

00:12:14,480 --> 00:12:17,539

this to me sounds like one of these

279

00:12:16,220 --> 00:12:19,490

things it's just too much of a

280

00:12:17,539 --> 00:12:21,019

coincidence even though it's perfectly

281

00:12:19,490 --> 00:12:23,810

possible to have happened by chance

282

00:12:21,019 --> 00:12:25,490

alone so there were these geomagnetic

283

00:12:23,809 --> 00:12:27,469

field disturbances they are somewhat

284

00:12:25,490 --> 00:12:29,509

typical but surprisingly coincident I

285

00:12:27,470 --> 00:12:31,850

would say they are not only in Alaska

286  
00:12:29,509 --> 00:12:34,029  
but globally not only terrestrial but

287  
00:12:31,850 --> 00:12:37,850  
seen also in near-earth satellites and

288  
00:12:34,029 --> 00:12:40,269  
ones at a million miles away at I1 and

289  
00:12:37,850 --> 00:12:43,850  
seen as would be typical for

290  
00:12:40,269 --> 00:12:45,860  
disturbances of this kind they were also

291  
00:12:43,850 --> 00:12:50,600  
seen in the solar wind proton density

292  
00:12:45,860 --> 00:12:53,300  
and velocity but that data seems to

293  
00:12:50,600 --> 00:12:55,310  
imply that an eruption curl in the Sun

294  
00:12:53,299 --> 00:12:56,519  
traveled to earth and globally disturb

295  
00:12:55,309 --> 00:12:58,319  
the local geomantic

296  
00:12:56,519 --> 00:13:01,949  
magnetic field just that several moments

297  
00:12:58,320 --> 00:13:03,629  
of highly significant human events in

298  
00:13:01,950 --> 00:13:06,200  
other words the son burped at just the

299  
00:13:03,629 --> 00:13:08,789  
right time so that few days later or so

300  
00:13:06,200 --> 00:13:13,140  
these things lined up with the human

301  
00:13:08,789 --> 00:13:15,269  
events yet to come big coincidence

302  
00:13:13,139 --> 00:13:18,179  
well yeah it is a big coincidence but

303  
00:13:15,269 --> 00:13:20,039  
any goes to many of these so anyway

304  
00:13:18,179 --> 00:13:23,759  
we've relied a lot of these conspira-con

305  
00:13:20,039 --> 00:13:25,259  
spirit Oriole theories and ordinary

306  
00:13:23,759 --> 00:13:28,708  
mundane explanations

307  
00:13:25,259 --> 00:13:30,899  
it really wasn't military radars HAARP

308  
00:13:28,708 --> 00:13:33,739  
is sometimes been called by someone the

309  
00:13:30,899 --> 00:13:36,089  
Moby Dick of conspiracy theorist

310  
00:13:33,740 --> 00:13:38,600  
Harper's not even turned on at that time

311  
00:13:36,089 --> 00:13:41,010  
cellphones powered witches radios

312  
00:13:38,600 --> 00:13:43,200  
military hardware even unknown just

313  
00:13:41,009 --> 00:13:46,289  
don't fit the data here this really

314

00:13:43,200 --> 00:13:49,200  
seems to be an effect attributable to

315  
00:13:46,289 --> 00:13:53,610  
ordinary solar activity but ended at

316  
00:13:49,200 --> 00:13:55,620  
exactly the right moments you think that

317  
00:13:53,610 --> 00:13:59,850  
was just one coincidence well okay what

318  
00:13:55,620 --> 00:14:01,740  
happened on September 6th 1897 here's a

319  
00:13:59,850 --> 00:14:03,720  
few day period it looks kind of quiet

320  
00:14:01,740 --> 00:14:06,209  
throughout except for one big spoke in

321  
00:14:03,720 --> 00:14:07,970  
the middle of September 6th who

322  
00:14:06,208 --> 00:14:11,328  
remembers what happened that day

323  
00:14:07,970 --> 00:14:11,329  
any Brits

324  
00:14:21,779 --> 00:14:27,370  
exactly centered that one our period was

325  
00:14:25,419 --> 00:14:30,250  
exactly centered on this deviation in

326  
00:14:27,370 --> 00:14:32,610  
the geomagnetic field at the same place

327  
00:14:30,250 --> 00:14:35,259  
in Alaska or one of the same stations

328  
00:14:32,610 --> 00:14:38,190

two and a half billion viewers are said

329

00:14:35,259 --> 00:14:40,539

to have watched the funeral and that was

330

00:14:38,190 --> 00:14:44,980

you know a significant portion of the

331

00:14:40,539 --> 00:14:46,480

entire human population of the earth but

332

00:14:44,980 --> 00:14:49,420

if you look in a bigger picture here's

333

00:14:46,480 --> 00:14:51,519

that peak again it's not very big it

334

00:14:49,419 --> 00:14:54,849

just happens to be precisely centered in

335

00:14:51,519 --> 00:14:56,529

the middle of a big silent area that was

336

00:14:54,850 --> 00:15:01,090

her funeral where was her death was over

337

00:14:56,529 --> 00:15:03,250

here this is a two week plot now nothing

338

00:15:01,090 --> 00:15:04,899

significant over there but if you do

339

00:15:03,250 --> 00:15:08,590

look closely there's a little bitch in a

340

00:15:04,899 --> 00:15:11,559

big quiet pit and I haven't shown that

341

00:15:08,590 --> 00:15:13,300

but it's pretty you know stretching

342

00:15:11,559 --> 00:15:14,979

things a bit to say that this rather

343  
00:15:13,299 --> 00:15:19,719  
small deviation had something to do with

344  
00:15:14,980 --> 00:15:21,659  
her death so it's a mixed bag and let's

345  
00:15:19,720 --> 00:15:25,000  
just think for a minute if this were

346  
00:15:21,659 --> 00:15:26,589  
extraordinary as it seems what could be

347  
00:15:25,000 --> 00:15:28,090  
some extraordinary explanations well

348  
00:15:26,590 --> 00:15:31,149  
some sort of electric causal or

349  
00:15:28,090 --> 00:15:33,940  
experimental experimental effect some

350  
00:15:31,149 --> 00:15:35,620  
kind of consciousness disturbance in the

351  
00:15:33,940 --> 00:15:37,510  
force I don't know you can speculate a

352  
00:15:35,620 --> 00:15:39,009  
lot about this but to me what's

353  
00:15:37,509 --> 00:15:40,840  
important about this is that there are

354  
00:15:39,009 --> 00:15:43,659  
too many coincidences even with pretty

355  
00:15:40,840 --> 00:15:46,000  
objective viewpoints and this causes us

356  
00:15:43,659 --> 00:15:49,659  
to question our assumptions about

357  
00:15:46,000 --> 00:15:51,759  
causality and randomness and the horse

358  
00:15:49,659 --> 00:15:55,389  
I've been riding for many years is is

359  
00:15:51,759 --> 00:15:57,370  
exactly this that that the equations of

360  
00:15:55,389 --> 00:16:00,009  
physics are pretty much time symmetric

361  
00:15:57,370 --> 00:16:01,990  
and therefore we ought to see influence

362  
00:16:00,009 --> 00:16:03,460  
from the past to the Future past to the

363  
00:16:01,990 --> 00:16:05,039  
present as well as from the future to

364  
00:16:03,460 --> 00:16:08,830  
the present in fact I think

365  
00:16:05,039 --> 00:16:10,240  
speculatively well I say as at events in

366  
00:16:08,830 --> 00:16:11,710  
the present I think are determined by

367  
00:16:10,240 --> 00:16:13,930  
events and conditions in the past and

368  
00:16:11,710 --> 00:16:15,490  
those in the future and even in

369  
00:16:13,929 --> 00:16:18,599  
mainstream literature these days you can

370  
00:16:15,490 --> 00:16:21,129  
see papers purporting to show that

371

00:16:18,600 --> 00:16:23,830  
entanglement in the present can be

372  
00:16:21,129 --> 00:16:25,570  
brought about by interactions in the

373  
00:16:23,830 --> 00:16:27,940  
past as well as interactions in the

374  
00:16:25,570 --> 00:16:30,700  
future so if you have a Messiah

375  
00:16:27,940 --> 00:16:32,200  
experiment with a subject and a target

376  
00:16:30,700 --> 00:16:32,840  
generator and there's an interaction

377  
00:16:32,200 --> 00:16:34,430  
where those

378  
00:16:32,840 --> 00:16:36,889  
data streams in the future it's possible

379  
00:16:34,429 --> 00:16:38,719  
to create an entanglement which gives

380  
00:16:36,889 --> 00:16:42,080  
rise to extraordinary correlations back

381  
00:16:38,720 --> 00:16:44,029  
in the President I simply recommend this

382  
00:16:42,080 --> 00:16:46,100  
viewpoint to you as a way of thinking

383  
00:16:44,029 --> 00:16:47,959  
about delayed choice quantum eraser or

384  
00:16:46,100 --> 00:16:50,300  
lots of other quantum phenomena EPR

385  
00:16:47,960 --> 00:16:52,519

begins to make a lot more sense if you

386

00:16:50,299 --> 00:16:55,069

take this point of view so I want to

387

00:16:52,519 --> 00:16:56,689

thank some people with whom I've had

388

00:16:55,070 --> 00:16:59,600

helpful discussions about this subject

389

00:16:56,690 --> 00:17:01,370

and list some of my data sources in case

390

00:16:59,600 --> 00:17:04,120

others you want to look at the data

391

00:17:01,370 --> 00:17:07,579

I'll put these slides up on my website

392

00:17:04,119 --> 00:17:10,939

tonight or tomorrow and LU I see by the

393

00:17:07,579 --> 00:17:13,129

giant clock on the wall down the street

394

00:17:10,940 --> 00:17:16,460

not a mile from here is it or two miles

395

00:17:13,130 --> 00:17:18,380

from here that my time is up this is the

396

00:17:16,460 --> 00:17:20,809

u.s. frequency standard for time

397

00:17:18,380 --> 00:17:27,010

accurate to one second and 60 million

398

00:17:20,809 --> 00:17:29,329

years thank you thank you very much

399

00:17:27,009 --> 00:17:32,240

those that would like to ask questions

400  
00:17:29,329 --> 00:17:35,779  
if you could come up here up front to

401  
00:17:32,240 --> 00:17:37,490  
the night that would be great oh and if

402  
00:17:35,779 --> 00:17:40,970  
you order now I'll throw in an extra

403  
00:17:37,490 --> 00:17:47,240  
chart what happened in November 22nd

404  
00:17:40,970 --> 00:17:51,589  
1963 pretty pretty quiet except for that

405  
00:17:47,240 --> 00:17:53,509  
peak right there thank you for the segue

406  
00:17:51,589 --> 00:17:56,569  
into my comment but since you brought up

407  
00:17:53,509 --> 00:17:59,269  
the geo es satellite data yes are you

408  
00:17:56,569 --> 00:18:01,730  
familiar with the big upset in the x-ray

409  
00:17:59,269 --> 00:18:04,099  
data of the Geo AES data from the

410  
00:18:01,730 --> 00:18:06,289  
Indonesian tsunami and several other

411  
00:18:04,099 --> 00:18:08,059  
earthquakes since then only vaguely I'd

412  
00:18:06,289 --> 00:18:10,159  
like to know a lot about that that the

413  
00:18:08,059 --> 00:18:12,139  
data was quite well it's noisy as you

414  
00:18:10,160 --> 00:18:14,720  
would look at it and as far as I know

415  
00:18:12,140 --> 00:18:16,970  
that satellite did is now offline it's

416  
00:18:14,720 --> 00:18:19,100  
been retired this was last year's open

417  
00:18:16,970 --> 00:18:21,500  
the data might be available somewhere

418  
00:18:19,099 --> 00:18:23,179  
but it was just sort of noisy and then a

419  
00:18:21,500 --> 00:18:25,279  
couple hours after the Indonesian

420  
00:18:23,180 --> 00:18:26,690  
earthquake and tsunami it just started

421  
00:18:25,279 --> 00:18:29,089  
going crazy several orders of magnitude

422  
00:18:26,690 --> 00:18:31,670  
and lasted for days until it settled

423  
00:18:29,089 --> 00:18:34,339  
down and so I watched that satellite

424  
00:18:31,670 --> 00:18:36,380  
data for a number of significant

425  
00:18:34,339 --> 00:18:38,779  
earthquakes reported in the news for a

426  
00:18:36,380 --> 00:18:41,000  
couple of years after that by golly that

427  
00:18:38,779 --> 00:18:42,599  
it was tracking so there is some

428

00:18:41,000 --> 00:18:45,298  
interaction between the

429  
00:18:42,599 --> 00:18:47,099  
and on the side whether it's a

430  
00:18:45,298 --> 00:18:48,779  
psychological or physical I don't know

431  
00:18:47,099 --> 00:18:50,730  
but it's the data seems to be available

432  
00:18:48,779 --> 00:18:53,038  
in particularly to all the goes

433  
00:18:50,730 --> 00:18:55,798  
satellites if you want to look back as

434  
00:18:53,038 --> 00:18:57,599  
far as you want to do a data capture of

435  
00:18:55,798 --> 00:19:01,529  
that one for the Indonesian lesson is on

436  
00:18:57,599 --> 00:19:02,730  
to the next questioner okay we only have

437  
00:19:01,529 --> 00:19:07,759  
a minute left so if you can make a

438  
00:19:02,730 --> 00:19:11,519  
question short place your a

439  
00:19:07,759 --> 00:19:14,429  
investigation into entanglement past

440  
00:19:11,519 --> 00:19:17,720  
present or future to present does that

441  
00:19:14,429 --> 00:19:22,009  
shed some light on possible

442  
00:19:17,720 --> 00:19:25,069

cause-and-effect reversal that the

443

00:19:22,009 --> 00:19:27,419

effect can take place before the cause

444

00:19:25,069 --> 00:19:28,889

yeah I think entanglement is only

445

00:19:27,419 --> 00:19:33,000

explained if you have symmetrical

446

00:19:28,890 --> 00:19:36,030

cause-and-effect sort of my view of it

447

00:19:33,000 --> 00:19:38,519

and I think yes it's explains a lot the

448

00:19:36,029 --> 00:19:40,470

one thing I'm particularly interested in

449

00:19:38,519 --> 00:19:43,288

in the graphs we showed is that there is

450

00:19:40,470 --> 00:19:47,850

an increased variance in practically all

451

00:19:43,288 --> 00:19:49,169

of those things you know and I haven't

452

00:19:47,849 --> 00:19:51,119

really looked at variants yet and I

453

00:19:49,169 --> 00:19:53,250

haven't done another thing I would like

454

00:19:51,119 --> 00:19:55,558

to do which is play the GCP events

455

00:19:53,250 --> 00:19:57,419

against the geomagnetic data I haven't

456

00:19:55,558 --> 00:19:58,980

looked at the Indonesian earthquake for

457  
00:19:57,419 --> 00:20:00,150  
example at all there's a million things

458  
00:19:58,980 --> 00:20:02,640  
that could be done at this point

459  
00:20:00,150 --> 00:20:04,919  
invariance is a darn good one I think

460  
00:20:02,640 --> 00:20:06,419  
it's as you have shown an important

461  
00:20:04,919 --> 00:20:09,659  
indicator of something going on with

462  
00:20:06,419 --> 00:20:11,960  
randomness you have an idea of the odds

463  
00:20:09,659 --> 00:20:14,940  
against chance that this would occur

464  
00:20:11,960 --> 00:20:18,058  
well overall I don't know and I don't

465  
00:20:14,940 --> 00:20:19,679  
claim to be able to calculate it I gave

466  
00:20:18,058 --> 00:20:22,859  
that one crude estimate but that really

467  
00:20:19,679 --> 00:20:24,870  
doesn't capture in fairness what's going

468  
00:20:22,859 --> 00:20:26,129  
on and I don't have a good way to do

469  
00:20:24,869 --> 00:20:29,189  
that maybe somebody has better

470  
00:20:26,130 --> 00:20:31,669  
suggestions for it thank you thank you

471

00:20:29,190 --> 00:20:31,669

very much

472

00:20:34,029 --> 00:20:41,829

our next speaker is dr. paul smith we

473

00:20:38,210 --> 00:20:41,829

have another philosopher as if the law
