

1
00:00:00,000 --> 00:00:08,580
image to the microflora which protect us

2
00:00:03,810 --> 00:00:13,580
against fungal diseases and the main two

3
00:00:08,580 --> 00:00:18,269
diseases in the 1980s were PCP pneumonia

4
00:00:13,580 --> 00:00:22,140
which is a fungus and yeast infections

5
00:00:18,269 --> 00:00:25,859
which are also fungi so Ruth Bernstein

6
00:00:22,140 --> 00:00:28,618
has not been writing about it more

7
00:00:25,859 --> 00:00:32,820
recently and I don't know whether he's

8
00:00:28,618 --> 00:00:46,170
aware of that point of view we have time

9
00:00:32,820 --> 00:00:49,219
just for one more question yeah no thank

10
00:00:46,170 --> 00:00:51,960
you the virus HIV has never been

11
00:00:49,219 --> 00:00:54,750
demonstrated or isolated in a

12
00:00:51,960 --> 00:00:58,439
traditional way when I tell people is

13
00:00:54,750 --> 00:01:01,829
they find it hard to believe you can get

14
00:00:58,439 --> 00:01:05,819
a prize of fifty thousand dollars if you

15

00:01:01,829 --> 00:01:10,579

produce a scientific publication that

16

00:01:05,819 --> 00:01:14,519

shows that testing HIV positive

17

00:01:10,579 --> 00:01:20,280

corresponds to the presence of particles

18

00:01:14,519 --> 00:01:22,879

of virus it's also Henry a great round

19

00:01:20,280 --> 00:01:22,879

of applause
