

1
00:00:00,000 --> 00:00:04,919
absorption of light so these are the

2
00:00:03,299 --> 00:00:08,910
experimental data of course this effect

3
00:00:04,919 --> 00:00:11,580
is highly significant and then the

4
00:00:08,910 --> 00:00:14,219
question is I have a minute or two or

5
00:00:11,580 --> 00:00:16,170
questions and answers okay so the last

6
00:00:14,218 --> 00:00:17,989
point is what is it what is the physical

7
00:00:16,170 --> 00:00:21,060
phenomenon this will take a second

8
00:00:17,989 --> 00:00:23,278
explaining this if it's not a force

9
00:00:21,059 --> 00:00:27,288
field and it's not the magnetic vector

10
00:00:23,278 --> 00:00:29,939
potential there are other kinds of

11
00:00:27,289 --> 00:00:32,460
potentials that are mathematically based

12
00:00:29,939 --> 00:00:34,619
and the one of most interest to me is

13
00:00:32,460 --> 00:00:36,359
the quantum potentials proposed by david

14
00:00:34,619 --> 00:00:39,030
bohm because associated with quanta

15
00:00:36,359 --> 00:00:42,359
potentials or quantum fields and this

16
00:00:39,030 --> 00:00:44,750
kind of experimental data supports the

17
00:00:42,359 --> 00:00:47,340
theories that quantum fields are

18
00:00:44,750 --> 00:00:51,679
involved with the process of information

19
00:00:47,340 --> 00:00:51,680
storage in water thank you very much

20
00:00:55,799 --> 00:01:00,759
okay you can read that while i'm talking

21
00:00:58,238 --> 00:01:03,640
I need to my apologize to the

22
00:01:00,759 --> 00:01:08,009
speaker and for the audience I got so

23
00:01:03,640 --> 00:01:10,810
engrossed in taking those three mornings

24
00:01:08,009 --> 00:01:18,868
so that I hit me this life but you can

25
00:01:10,810 --> 00:01:18,868
read it with regard to what are exposed

26
00:01:21,799 --> 00:01:26,850
property

27
00:01:24,049 --> 00:01:29,970
as a great question I've done that in

28
00:01:26,849 --> 00:01:32,759
with various treatment energized

29

00:01:29,969 --> 00:01:35,280
treatments and it seems to be a rather

30
00:01:32,759 --> 00:01:37,799
permanent change it seems to last for

31
00:01:35,280 --> 00:01:39,118
months which kind of surprised me i kept

32
00:01:37,799 --> 00:01:40,740
the sample around said okay I'm just

33
00:01:39,118 --> 00:01:43,859
going to see what happens you know

34
00:01:40,739 --> 00:01:45,750
months later and it seems to be rather

35
00:01:43,859 --> 00:01:48,209
permanent change which is what is

36
00:01:45,750 --> 00:01:50,549
required for a homeopathic type of

37
00:01:48,209 --> 00:01:54,089
mechanism so that's why I believe that

38
00:01:50,549 --> 00:01:56,729
these kind of enteral energy fields are

39
00:01:54,090 --> 00:02:03,359
involved with homeopathy because it has

40
00:01:56,728 --> 00:02:06,239
to be a permanent change so you jump

41
00:02:03,359 --> 00:02:09,330
from having this vector potential to

42
00:02:06,239 --> 00:02:13,949
saying that it's some sort of a lot of

43
00:02:09,330 --> 00:02:16,500

effective as a bomb ave rolla effect up

44

00:02:13,949 --> 00:02:17,669

why do you make that jump why don't you

45

00:02:16,500 --> 00:02:20,810

just say

46

00:02:17,669 --> 00:02:24,589

darling effect a direct effect

47

00:02:20,810 --> 00:02:26,800

oh because because tilton calculated the

48

00:02:24,590 --> 00:02:30,409

intensity of the a field in the x filer

49

00:02:26,800 --> 00:02:32,480

situation and Cyril Smith had done some

50

00:02:30,409 --> 00:02:35,780

calculations showing that there was a

51

00:02:32,479 --> 00:02:38,659

minimum amount of a field required to

52

00:02:35,780 --> 00:02:42,709

imprint and if we go back a couple

53

00:02:38,659 --> 00:02:44,359

slides it that a threshold was

54

00:02:42,709 --> 00:02:46,700

significantly higher than the actual

55

00:02:44,360 --> 00:02:50,959

amount of the a field calculated in the

56

00:02:46,699 --> 00:02:53,859

x filer coil so therefore i'm concluding

57

00:02:50,959 --> 00:02:57,229

that the a field and they may be

58
00:02:53,860 --> 00:02:59,030
important but in addition to the a field

59
00:02:57,229 --> 00:03:01,609
i think some of these other non

60
00:02:59,030 --> 00:03:03,830
classical potentials are also involved

61
00:03:01,610 --> 00:03:08,269
that's why I made the jump sorry that

62
00:03:03,830 --> 00:03:11,680
might not have been clearer comments I

63
00:03:08,269 --> 00:03:13,689
want to make what one is there's some

64
00:03:11,680 --> 00:03:17,510
small bit of work that's been done

65
00:03:13,689 --> 00:03:19,729
sacred space preparing a space for

66
00:03:17,509 --> 00:03:23,609
experimentation and what you're really

67
00:03:19,729 --> 00:03:26,819
talking about in the water off mission

68
00:03:23,610 --> 00:03:29,580
they're just smaller spaces so that make

69
00:03:26,819 --> 00:03:32,849
that so something to do that and the

70
00:03:29,580 --> 00:03:36,710
other thing is there's a recent paper or

71
00:03:32,849 --> 00:03:36,710
something just came out on the

72
00:03:37,129 --> 00:03:48,169
entanglement with biologic plant plant

73
00:03:42,060 --> 00:03:53,189
material it if room temperature well

74
00:03:48,169 --> 00:03:55,109
dangle okay well in response to the

75
00:03:53,189 --> 00:03:57,000
latter question quantum entanglement is

76
00:03:55,110 --> 00:03:59,220
is another one of the theories that have

77
00:03:57,000 --> 00:04:02,300
been put out I really here I'm only

78
00:03:59,219 --> 00:04:06,120
describing the theory of doody chi and

79
00:04:02,300 --> 00:04:07,920
preparado about how information stored

80
00:04:06,120 --> 00:04:10,860
in water but other people have talked

81
00:04:07,919 --> 00:04:12,599
about the role of quantum entanglement

82
00:04:10,860 --> 00:04:14,480
when dealing with a homeopathic

83
00:04:12,599 --> 00:04:16,949
preparation in a clinical situation

84
00:04:14,479 --> 00:04:19,529
because they believe that there's a

85
00:04:16,949 --> 00:04:22,680
quantum entanglement between the heel

86

00:04:19,529 --> 00:04:25,949
the the practitioner the subject and the

87
00:04:22,680 --> 00:04:28,290
remedy so that's another reason why how

88
00:04:25,949 --> 00:04:30,000
many clinical trials are often not

89
00:04:28,290 --> 00:04:32,720
reproducible because we really don't

90
00:04:30,000 --> 00:04:39,449
know the resonant conditions to ensure

91
00:04:32,720 --> 00:04:42,330
the quantum entanglement partly true

92
00:04:39,449 --> 00:04:44,459
will be cancellation but it's not

93
00:04:42,329 --> 00:04:47,430
perfect these fields aren't uniform and

94
00:04:44,459 --> 00:04:49,139
so some of that space it's not going to

95
00:04:47,430 --> 00:04:50,129
have that good cancellation so that

96
00:04:49,139 --> 00:04:51,658
there is

97
00:04:50,129 --> 00:04:54,389
number that's going to describe your

98
00:04:51,658 --> 00:04:56,550
whole space well what's the coil size

99
00:04:54,389 --> 00:04:59,848
and the water size and os sauce was

100
00:04:56,550 --> 00:05:04,139

important I I didn't actually mention it

101

00:04:59,848 --> 00:05:07,378

but bz is the an AZ is the intensity of

102

00:05:04,139 --> 00:05:10,408

the DA field in the B field in the

103

00:05:07,379 --> 00:05:12,269

central axis right along the center and

104

00:05:10,408 --> 00:05:14,728

that's where the test tube was placed

105

00:05:12,269 --> 00:05:18,179

very carefully right in the dead center

106

00:05:14,728 --> 00:05:20,998

of the x file or coil where the be

107

00:05:18,178 --> 00:05:23,698

filled and the a field were virtually

108

00:05:20,999 --> 00:05:25,469

zero so yes you're correct and if I had

109

00:05:23,699 --> 00:05:29,999

not had to say the test tube in the dead

110

00:05:25,468 --> 00:05:32,848

center off to the side then then okay

111

00:05:29,999 --> 00:05:37,619

that's true okay it's not it's not a

112

00:05:32,848 --> 00:05:41,308

zero diameter obviously but I it you

113

00:05:37,619 --> 00:05:45,379

know within experimental error okay so

114

00:05:41,309 --> 00:05:47,669

you're proposing that in there may be a

115
00:05:45,379 --> 00:05:50,039
larger contribution of the be filled in

116
00:05:47,668 --> 00:05:52,348
the a field present in the water and

117
00:05:50,038 --> 00:05:58,740
this is a very good point thank you very

118
00:05:52,348 --> 00:06:01,139
much the diameter of the tube is is it

119
00:05:58,740 --> 00:06:04,499
was it is a test tube basically and the

120
00:06:01,139 --> 00:06:07,110
coil itself was was probably in a couple

121
00:06:04,499 --> 00:06:09,659
of inches and that kind of diameter but

122
00:06:07,110 --> 00:06:11,369
that is a very good point and ultimately

123
00:06:09,658 --> 00:06:14,098
to repeat these experiments you want to

124
00:06:11,369 --> 00:06:15,689
get a really thin well you could I mean

125
00:06:14,098 --> 00:06:18,028
that argument you can never get a thin

126
00:06:15,689 --> 00:06:21,559
enough cylinder of water in the dead

127
00:06:18,028 --> 00:06:21,558
center okay good point
