

1
00:00:00,050 --> 00:00:04,668
all right well I'm going to speak about

2
00:00:05,179 --> 00:00:10,919
the comparison between the effects of

3
00:00:08,279 --> 00:00:16,259
using an oil and energy accumulated on

4
00:00:10,919 --> 00:00:19,230
mice with cancer and the treatment of

5
00:00:16,260 --> 00:00:24,900
similar mice not by myself but by a

6
00:00:19,230 --> 00:00:30,089
colleague using intentional healing

7
00:00:24,899 --> 00:00:32,609
methods I presented this material first

8
00:00:30,089 --> 00:00:36,630
place let me say that I very much

9
00:00:32,609 --> 00:00:39,109
appreciated dr. Leslie iyx talk because

10
00:00:36,630 --> 00:00:43,170
it gives such a broad range of

11
00:00:39,109 --> 00:00:48,390
especially in the review of what's going

12
00:00:43,170 --> 00:00:52,020
on in this field and we know basically

13
00:00:48,390 --> 00:00:52,799
very little about how healing takes

14
00:00:52,020 --> 00:00:57,480
effect

15
00:00:52,799 --> 00:01:00,030
I reviewed prior to coming here 35 books

16
00:00:57,479 --> 00:01:05,539
and papers written over the last 10

17
00:01:00,030 --> 00:01:10,490
years by researchers and healers

18
00:01:05,540 --> 00:01:13,830
physicists physicians and so forth and

19
00:01:10,489 --> 00:01:16,769
besides the an attempt to utilize

20
00:01:13,829 --> 00:01:19,679
quantum mechanical theory to explain

21
00:01:16,769 --> 00:01:23,219
some of these strange effects these

22
00:01:19,680 --> 00:01:26,670
anomalous effects there is very little

23
00:01:23,219 --> 00:01:28,920
that's satisfying to someone who really

24
00:01:26,670 --> 00:01:32,759
wants to understand how is this is what

25
00:01:28,920 --> 00:01:34,769
takes place here so what I want to

26
00:01:32,759 --> 00:01:37,228
present today is just a little bit of

27
00:01:34,769 --> 00:01:41,368
information to help us get a little bit

28
00:01:37,228 --> 00:01:43,200
into what takes place when some kinds of

29

00:01:41,368 --> 00:01:45,930
healing take place

30
00:01:43,200 --> 00:01:50,040
now the ergon energy accumulator was

31
00:01:45,930 --> 00:01:53,969
invented by wilhelm reich as in the

32
00:01:50,040 --> 00:01:59,790
course of his own research into human

33
00:01:53,969 --> 00:02:04,408
emotions and through over 30 years of

34
00:01:59,790 --> 00:02:07,560
work and biology and physics and human

35
00:02:04,409 --> 00:02:08,310
emotions he developed this accumulator

36
00:02:07,560 --> 00:02:11,090
this

37
00:02:08,310 --> 00:02:14,699
which is really a passive device

38
00:02:11,090 --> 00:02:17,039
ostensibly it consists of multiple

39
00:02:14,699 --> 00:02:19,438
layers of nonmetallic and metallic

40
00:02:17,039 --> 00:02:23,658
materials with a metal material on the

41
00:02:19,438 --> 00:02:27,389
inside and that's very easy to see here

42
00:02:23,658 --> 00:02:30,269
this is the inside part of it this is

43
00:02:27,389 --> 00:02:33,750

metal nonmetal metal nonmetal and the

44

00:02:30,269 --> 00:02:38,150
outside is stipulated has to be of a

45

00:02:33,750 --> 00:02:40,378
nonmetallic material now the right

46

00:02:38,150 --> 00:02:42,120
demonstrated many interesting and

47

00:02:40,378 --> 00:02:44,158
ominous phenomena that take place on a

48

00:02:42,120 --> 00:02:47,969
physical level within such an enclosure

49

00:02:44,158 --> 00:02:53,578
but he also did some studies on the

50

00:02:47,969 --> 00:02:57,539
treatment of mice with cancer and what

51

00:02:53,579 --> 00:03:01,139
he used were animals with spontaneous

52

00:02:57,539 --> 00:03:02,128
tumors and that study was followed by

53

00:03:01,139 --> 00:03:05,010
myself

54

00:03:02,128 --> 00:03:09,179
following Mike's death using animals

55

00:03:05,009 --> 00:03:13,108
with spontaneous tumors and transplanted

56

00:03:09,180 --> 00:03:16,349
tumors all mammary tumors and then there

57

00:03:13,109 --> 00:03:19,829
was a group in in South America that did

58
00:03:16,348 --> 00:03:25,198
another study using a kind of

59
00:03:19,829 --> 00:03:28,790
transplanted tumor so let's see where do

60
00:03:25,199 --> 00:03:28,790
i point this is this yeah

61
00:03:29,449 --> 00:03:34,699
in all those experiments I just

62
00:03:32,128 --> 00:03:34,698
mentioned

63
00:03:37,669 --> 00:03:45,530
the healing capabilities of the person

64
00:03:41,270 --> 00:03:51,110
doing the study including myself was

65
00:03:45,530 --> 00:03:52,939
unknown that is all of us as far as I

66
00:03:51,110 --> 00:03:55,850
can tell certainly I know for myself I

67
00:03:52,939 --> 00:03:57,439
know Reich's literature very well and I

68
00:03:55,849 --> 00:04:01,219
knew the papers from the people in South

69
00:03:57,439 --> 00:04:05,139
America none of them had any idea that

70
00:04:01,219 --> 00:04:09,800
their intention was playing any role in

71
00:04:05,139 --> 00:04:13,099
what the results might be however in all

72
00:04:09,800 --> 00:04:15,140
of us there was an intense desire that

73
00:04:13,099 --> 00:04:20,689
there would be some kind of healing

74
00:04:15,139 --> 00:04:26,769
outcome now what we found was that

75
00:04:20,689 --> 00:04:26,769
released what I found was that excuse me

76
00:04:27,850 --> 00:04:33,560
when you dissect a mouse that's been

77
00:04:30,620 --> 00:04:36,668
treated the all these animals were in an

78
00:04:33,560 --> 00:04:42,350
accumulator put the center of this box

79
00:04:36,668 --> 00:04:44,060
for usually an hour each day animals

80
00:04:42,350 --> 00:04:46,100
that were treated this is what their

81
00:04:44,060 --> 00:04:49,519
innards looked like when they were

82
00:04:46,100 --> 00:04:55,790
dissected at the end of the treatment

83
00:04:49,519 --> 00:04:59,870
period after they had died these are the

84
00:04:55,790 --> 00:05:03,290
untreated mice we use suitable controls

85
00:04:59,870 --> 00:05:05,449
they were put in a box and for the same

86

00:05:03,290 --> 00:05:07,790
period of time and then returned to

87
00:05:05,449 --> 00:05:09,978
their cages so they were removed from

88
00:05:07,790 --> 00:05:12,650
their cages for the same period of time

89
00:05:09,978 --> 00:05:14,659
as the treated as the accumulator

90
00:05:12,649 --> 00:05:21,259
treated animals so you can see there's

91
00:05:14,660 --> 00:05:25,070
an enormous difference excuse me the

92
00:05:21,259 --> 00:05:26,959
blackness here is due to toxins mice

93
00:05:25,069 --> 00:05:29,599
with cancer when they die really smell

94
00:05:26,959 --> 00:05:31,759
bad they stink they're full of toxins

95
00:05:29,600 --> 00:05:33,890
it's just black material you examine it

96
00:05:31,759 --> 00:05:38,240
under the microscope it's a mixture of

97
00:05:33,889 --> 00:05:43,719
bacteria and and breakdown products of

98
00:05:38,240 --> 00:05:47,860
tissue and you don't get any of that in

99
00:05:43,720 --> 00:05:47,860
the animals that were treated

100
00:05:48,259 --> 00:05:57,079

and these are the results and the

101

00:05:52,339 --> 00:05:58,789

accumulator tests we can see that these

102

00:05:57,079 --> 00:06:02,089

are the treated animals and you can see

103

00:05:58,790 --> 00:06:03,680

that they live longer in all four

104

00:06:02,089 --> 00:06:06,289

experiments that we're done

105

00:06:03,680 --> 00:06:08,030

this was rights this was mine this was

106

00:06:06,290 --> 00:06:13,390

mine and this was the South American

107

00:06:08,029 --> 00:06:15,709

group and the statistical analysis

108

00:06:13,389 --> 00:06:21,279

reveals that in practically all cases

109

00:06:15,709 --> 00:06:27,549

there was highly significant results and

110

00:06:21,279 --> 00:06:27,549

AES stands for the effect size now

111

00:06:32,949 --> 00:06:38,228

the results we can say was there was a

112

00:06:36,189 --> 00:06:41,319

definite prolongation of life but what

113

00:06:38,228 --> 00:06:42,968

I'm interested in more today is this is

114

00:06:41,319 --> 00:06:46,750

a finding that there was an intense

115
00:06:42,968 --> 00:06:53,319
inflammatory reaction in all of these

116
00:06:46,750 --> 00:06:56,949
animals that is the tumors would develop

117
00:06:53,319 --> 00:06:59,800
and at certain point just before the

118
00:06:56,949 --> 00:07:04,449
animal died the area around the tumor

119
00:06:59,800 --> 00:07:07,900
would become swollen with with fluid red

120
00:07:04,449 --> 00:07:12,129
blood cells strong vascular reaction and

121
00:07:07,899 --> 00:07:14,468
then this would burst and the animal

122
00:07:12,129 --> 00:07:16,960
would die most often that was a sequence

123
00:07:14,468 --> 00:07:19,930
so there was intense inflammatory

124
00:07:16,959 --> 00:07:22,299
reaction taking place in every single

125
00:07:19,930 --> 00:07:26,459
case the animals that were treated with

126
00:07:22,300 --> 00:07:26,460
the accumulator compared to the controls

127
00:07:28,500 --> 00:07:36,269
now you may recognize this fellow he's

128
00:07:33,699 --> 00:07:38,680
sitting in our audience today I

129
00:07:36,269 --> 00:07:42,149
presented this data on the accumulator

130
00:07:38,680 --> 00:07:47,139
several years ago to the food society

131
00:07:42,149 --> 00:07:49,959
and following that I was just

132
00:07:47,139 --> 00:07:51,848
I heard Bill speak and described his

133
00:07:49,959 --> 00:07:54,370
experiments with identical mice that I

134
00:07:51,848 --> 00:07:56,348
had used but Bombay wasn't using and

135
00:07:54,370 --> 00:07:59,918
this bill Bengston by the way those of

136
00:07:56,348 --> 00:08:02,199
you who don't know bill was using

137
00:07:59,918 --> 00:08:04,959
identical mice that I had used in my

138
00:08:02,199 --> 00:08:07,300
research and he wasn't using an Oregon

139
00:08:04,959 --> 00:08:10,688
accumulator but he was using a method of

140
00:08:07,300 --> 00:08:18,189
healing that he had been from someone

141
00:08:10,689 --> 00:08:22,479
else and this is the Bankston method if

142
00:08:18,189 --> 00:08:23,979
I may call it that it involves you

143

00:08:22,478 --> 00:08:26,918
working with students and as bill

144
00:08:23,978 --> 00:08:30,128
himself learned I assume from the person

145
00:08:26,918 --> 00:08:31,838
who taught him it involves teaching and

146
00:08:30,129 --> 00:08:34,599
learning how to do a very rapid mental

147
00:08:31,838 --> 00:08:35,350
imaging and then putting one's hands

148
00:08:34,599 --> 00:08:38,440
around the

149
00:08:35,350 --> 00:08:44,649
of the mice to be treated and then an

150
00:08:38,440 --> 00:08:48,190
accelerated image cycling and Bill

151
00:08:44,649 --> 00:08:51,250
wonders if this is what does it that is

152
00:08:48,190 --> 00:08:54,520
this methodology or with something

153
00:08:51,250 --> 00:08:58,179
passed on from his teacher to himself

154
00:08:54,519 --> 00:09:00,779
and from himself to his students who he

155
00:08:58,179 --> 00:09:04,120
was also able to train to do healing

156
00:09:00,779 --> 00:09:09,370
using this method for describe this

157
00:09:04,120 --> 00:09:14,919

fairly well go good okay so now the

158

00:09:09,370 --> 00:09:18,039

remarkable thing about Bill's study was

159

00:09:14,919 --> 00:09:20,740

that the mice who developed these these

160

00:09:18,039 --> 00:09:24,309

were their transplants weren't they

161

00:09:20,740 --> 00:09:26,409

transplanted tumors into something I had

162

00:09:24,309 --> 00:09:29,979

never seen before and I've done a lot of

163

00:09:26,409 --> 00:09:33,639

this kind of research all the mice in

164

00:09:29,980 --> 00:09:37,420

Bill's study the tumors there was an

165

00:09:33,639 --> 00:09:40,539

intense inflammatory reaction the

166

00:09:37,419 --> 00:09:43,809

release of something called tumor

167

00:09:40,539 --> 00:09:47,559

necrotic factor in which the whole area

168

00:09:43,809 --> 00:09:49,329

gets blackened we store loose or strong

169

00:09:47,559 --> 00:09:49,629

inflammatory reactions but nothing like

170

00:09:49,330 --> 00:09:52,509

that

171

00:09:49,629 --> 00:09:57,490

and then it's as if the tumor imploded

172

00:09:52,509 --> 00:10:01,889

and was gone and the lesion healed

173

00:09:57,490 --> 00:10:01,889

itself and the animal
