

1
00:00:00,000 --> 00:00:03,359
as I was doing here and some of the

2
00:00:01,770 --> 00:00:05,370
things he does know that I'm coming here

3
00:00:03,359 --> 00:00:06,839
and fortunately he didn't come to today

4
00:00:05,370 --> 00:00:08,820
died I have a little embarrassment to

5
00:00:06,839 --> 00:00:10,730
discuss it sir but I do see that in

6
00:00:08,820 --> 00:00:13,109
universities you have a very own

7
00:00:10,730 --> 00:00:15,388
political in terms of unit the ownership

8
00:00:13,109 --> 00:00:25,948
issues and stuff so I think I stress

9
00:00:15,388 --> 00:00:28,719
that very much curious is given the kind

10
00:00:25,949 --> 00:00:30,440
of changes going on at all

11
00:00:28,719 --> 00:00:33,560
world they

12
00:00:30,440 --> 00:00:37,730
we will see more or fewer of these types

13
00:00:33,560 --> 00:00:41,840
of paths on referring to the stick throw

14
00:00:37,729 --> 00:00:45,500
the dog catch the shaping of a swing

15
00:00:41,840 --> 00:00:48,040
from side to side and the use of a

16
00:00:45,500 --> 00:00:48,039
blazing

17
00:00:56,039 --> 00:01:00,549
thank the both I think some things that

18
00:00:58,539 --> 00:01:02,619
make it to the more public eye I'm very

19
00:01:00,549 --> 00:01:03,669
familiar with the law and the issues

20
00:01:02,619 --> 00:01:06,670
that relate to that type of thing

21
00:01:03,670 --> 00:01:09,250
there's actually been patent up the case

22
00:01:06,670 --> 00:01:11,349
a lot of case law recently that i think

23
00:01:09,250 --> 00:01:12,519
would probably invalidate so some of

24
00:01:11,349 --> 00:01:15,129
those patents might exist that are

25
00:01:12,519 --> 00:01:17,319
probably invalid now and i personally

26
00:01:15,129 --> 00:01:19,390
think the way the law has changed it's

27
00:01:17,319 --> 00:01:21,699
actually made it a little bit too too

28
00:01:19,390 --> 00:01:23,859
onerous for patenting certain types of

29

00:01:21,700 --> 00:01:26,590
methods or software their systems and

30
00:01:23,859 --> 00:01:31,200
i'm hoping to see a little bit of a pull

31
00:01:26,590 --> 00:01:31,200
back away from the way things have gone

32
00:01:34,170 --> 00:01:40,170
to close associates here for tea bags

33
00:01:41,879 --> 00:01:58,298
a year process though and I think my

34
00:01:49,828 --> 00:02:01,209
the time especially if she falls on my

35
00:01:58,299 --> 00:02:04,210
slide I had mentioned and the slide

36
00:02:01,209 --> 00:02:06,879
mentions that you say he's probably

37
00:02:04,209 --> 00:02:09,159
correct that I skipped over an important

38
00:02:06,879 --> 00:02:10,568
part on my slide which is for foreign

39
00:02:09,159 --> 00:02:13,900
patents if you want to get protection

40
00:02:10,568 --> 00:02:16,449
abroad you have to file prior to any

41
00:02:13,900 --> 00:02:18,099
disclosure I probably so all these

42
00:02:16,449 --> 00:02:20,859
people I was on my slide I didn't

43
00:02:18,098 --> 00:02:22,090

mention it but yeah so there's a one

44

00:02:20,860 --> 00:02:24,459
year grace period in the United States

45

00:02:22,090 --> 00:02:26,348
but you have to file prior to any

46

00:02:24,459 --> 00:02:29,110
disclosure if you want to have

47

00:02:26,348 --> 00:02:31,060
protection abroad and then I didn't get

48

00:02:29,110 --> 00:02:33,130
into foreign protection once you file

49

00:02:31,060 --> 00:02:36,329
then you have a one-year period to

50

00:02:33,129 --> 00:02:36,329
foreign file and stuff like that

51

00:02:43,560 --> 00:02:47,949
q

52

00:02:45,729 --> 00:02:50,348
a new survey the Patent Office of

53

00:02:47,949 --> 00:02:53,469
happening back and develop the new

54

00:02:50,348 --> 00:02:56,699
statistics for they go to break one

55

00:02:53,469 --> 00:02:56,699
packet they

56

00:03:04,949 --> 00:03:08,429
okay thank you
