

1
00:00:00,000 --> 00:00:09,808
I almost got off with the world's

2
00:00:03,720 --> 00:00:15,630
briefest presentation I thank Bob for

3
00:00:09,808 --> 00:00:18,239
that I I got into physics a long time

4
00:00:15,630 --> 00:00:21,719
ago as a young kid I really was curious

5
00:00:18,239 --> 00:00:23,219
about the world and I thought that

6
00:00:21,719 --> 00:00:26,329
science would be the way to get the

7
00:00:23,219 --> 00:00:29,250
answers so I went to MIT and Princeton

8
00:00:26,329 --> 00:00:31,559
thinking that conventional physics was

9
00:00:29,250 --> 00:00:33,689
going to have a satisfying theory of the

10
00:00:31,559 --> 00:00:35,429
universe and I kind of came away feeling

11
00:00:33,689 --> 00:00:38,699
that something was missing still it

12
00:00:35,429 --> 00:00:40,530
didn't it didn't seem it's not the basic

13
00:00:38,700 --> 00:00:45,359
deep questions all fit together very

14
00:00:40,530 --> 00:00:47,820
well this is a book that so summarizes

15
00:00:45,359 --> 00:00:51,378
my search to date the synchronized

16
00:00:47,820 --> 00:00:55,948
universe new science at the paranormal

17
00:00:51,378 --> 00:00:58,920
what what I found in the mid-80s is a

18
00:00:55,948 --> 00:01:00,780
clue for what I was missing

19
00:00:58,920 --> 00:01:03,750
can everyone hear me in the back okay is

20
00:01:00,780 --> 00:01:06,570
this okay I discovered remote viewing

21
00:01:03,750 --> 00:01:11,609
and remote viewing of course allows you

22
00:01:06,569 --> 00:01:13,469
to to to move in space and in time far

23
00:01:11,609 --> 00:01:17,969
beyond what our conventional physics

24
00:01:13,469 --> 00:01:19,920
would allow based on causality so that

25
00:01:17,969 --> 00:01:22,170
was just plus it doesn't weaken with

26
00:01:19,920 --> 00:01:24,359
with distance with the square of the

27
00:01:22,170 --> 00:01:26,879
distance like the forces we know about

28
00:01:24,359 --> 00:01:29,420
do so all of a sudden we had some major

29

00:01:26,879 --> 00:01:32,219
anomalies I mean this was a clue for me

30
00:01:29,420 --> 00:01:35,490
that maybe there were some things that

31
00:01:32,219 --> 00:01:38,069
the grad school had not covered that I

32
00:01:35,489 --> 00:01:40,618
needed to look into since that time a

33
00:01:38,069 --> 00:01:42,719
number of other anomalies have shown up

34
00:01:40,618 --> 00:01:44,810
in mainstream physics of course

35
00:01:42,719 --> 00:01:48,000
physicists theorists are very quick to

36
00:01:44,810 --> 00:01:50,159
provide explanations for them Dark

37
00:01:48,000 --> 00:01:53,250
Matter being one but it was kind of an

38
00:01:50,159 --> 00:01:55,469
unexpected anomaly when I went to grad

39
00:01:53,250 --> 00:01:57,359
school in the gravity group at Princeton

40
00:01:55,469 --> 00:01:59,368
no one talked about dark matter everyone

41
00:01:57,359 --> 00:02:01,828
thought that the Big Bang model was a

42
00:01:59,368 --> 00:02:03,899
pretty good shape in those days now we

43
00:02:01,828 --> 00:02:07,589

know there's a whole lot of extra stuff

44

00:02:03,899 --> 00:02:11,370
out there that was not included we're

45

00:02:07,590 --> 00:02:12,629
also seeing anomalies in pendulum

46

00:02:11,370 --> 00:02:15,900
phenomena the

47

00:02:12,629 --> 00:02:18,689
the the merese la experiments or once

48

00:02:15,900 --> 00:02:21,150
axel and others have also duplicated

49

00:02:18,689 --> 00:02:24,120
this when you have a pendulum swinging

50

00:02:21,150 --> 00:02:26,550
and the Earth turns beneath that there's

51

00:02:24,120 --> 00:02:29,280
a certain angular change the pendulum is

52

00:02:26,550 --> 00:02:32,340
supposed to undergo but when a solar

53

00:02:29,280 --> 00:02:35,340
eclipse occurs an anomaly happens the

54

00:02:32,340 --> 00:02:38,189
angle veers off in many cases at a

55

00:02:35,340 --> 00:02:40,469
strange angle suggesting that something

56

00:02:38,189 --> 00:02:44,609
is missing from our current gravity

57

00:02:40,469 --> 00:02:49,020
model cold fusion despite all the hoopla

58
00:02:44,610 --> 00:02:51,750
after the 89 announcements and the

59
00:02:49,020 --> 00:02:53,969
suppose and failure to replicate at MIT

60
00:02:51,750 --> 00:02:57,030
and Princeton we now know that the print

61
00:02:53,969 --> 00:03:00,780
at the MIT and Caltech we now know that

62
00:02:57,030 --> 00:03:03,419
the MIT group actually did get excess

63
00:03:00,780 --> 00:03:06,060
energy which they subtracted out in the

64
00:03:03,419 --> 00:03:08,879
final draft of their paper and since

65
00:03:06,060 --> 00:03:11,310
then over 500 labs around the world have

66
00:03:08,879 --> 00:03:13,889
replicated various aspects of cold

67
00:03:11,310 --> 00:03:16,500
fusion we don't really have a theory a

68
00:03:13,889 --> 00:03:18,809
satisfactory theory for why it happens

69
00:03:16,500 --> 00:03:21,870
but there are a number of very

70
00:03:18,810 --> 00:03:24,090
successful experiments going on today in

71
00:03:21,870 --> 00:03:27,180
many labs around the world

72
00:03:24,090 --> 00:03:30,180
charge clusters one more anomaly that

73
00:03:27,180 --> 00:03:34,110
falls into current hard science if you

74
00:03:30,180 --> 00:03:37,710
create a spark in a vacuum chamber and

75
00:03:34,110 --> 00:03:40,800
you produce a large number of electrons

76
00:03:37,710 --> 00:03:43,400
in a very small space if you make maybe

77
00:03:40,800 --> 00:03:47,430
a 10 billion or so in a micron sized

78
00:03:43,400 --> 00:03:49,560
sphere anomalies start to show up that

79
00:03:47,430 --> 00:03:53,159
are not accounted for by current physics

80
00:03:49,560 --> 00:03:55,080
they don't repel at enormous speeds the

81
00:03:53,159 --> 00:03:57,030
way they should instead they tend to

82
00:03:55,080 --> 00:03:59,219
clump together so when they hit a

83
00:03:57,030 --> 00:04:01,800
witness plate some distance away the

84
00:03:59,219 --> 00:04:04,889
lower picture there shows the pattern

85
00:04:01,800 --> 00:04:07,560
that you get each dark spot is a charged

86

00:04:04,889 --> 00:04:09,259
cluster with billions of electrons and

87
00:04:07,560 --> 00:04:11,670
these charged clusters themselves

88
00:04:09,259 --> 00:04:13,769
develop a little magnetic fields and

89
00:04:11,669 --> 00:04:15,629
they kind of link together like a pop

90
00:04:13,770 --> 00:04:20,100
beads on a necklace when they hit the

91
00:04:15,629 --> 00:04:22,769
witness plate we think probably that at

92
00:04:20,100 --> 00:04:25,020
this density of charge we're getting

93
00:04:22,769 --> 00:04:25,769
some zero point value Manama leas that

94
00:04:25,019 --> 00:04:30,478
are not deterrent

95
00:04:25,769 --> 00:04:32,728
explained in current physics but you

96
00:04:30,478 --> 00:04:34,889
know it certainly is one one more clue

97
00:04:32,728 --> 00:04:37,258
that our science does not have all the

98
00:04:34,889 --> 00:04:40,620
answers at the present time when this

99
00:04:37,259 --> 00:04:43,560
charge cluster hits a metal plate you

100
00:04:40,620 --> 00:04:46,769

get a hole it drills into the plate in

101

00:04:43,560 --> 00:04:49,589

the top picture here and it looks a lot

102

00:04:46,769 --> 00:04:52,408

like some kind of fusion or some kind of

103

00:04:49,589 --> 00:04:55,109

very strong melting is occurring when

104

00:04:52,408 --> 00:04:56,908

the electrons hit the metal in cosmology

105

00:04:55,110 --> 00:05:03,379

there are also anomalies this is a

106

00:04:56,908 --> 00:05:03,379

Halton ARP photograph of a fairly nearby

107

00:05:03,470 --> 00:05:10,080

galaxy with jets that are some that are

108

00:05:07,408 --> 00:05:11,668

connected to three objects that are

109

00:05:10,079 --> 00:05:14,038

supposed to be there are classified as

110

00:05:11,668 --> 00:05:16,500

quasars that should be much much further

111

00:05:14,038 --> 00:05:18,959

away than the nearby object and yet they

112

00:05:16,500 --> 00:05:21,389

have these Jets connecting them and he

113

00:05:18,959 --> 00:05:23,489

reasons from this that actually our

114

00:05:21,389 --> 00:05:25,199

whole idea of what a quasar is is wrong

115
00:05:23,490 --> 00:05:27,960
and that a whole lot of redshifts are

116
00:05:25,199 --> 00:05:30,090
missing something important the speed of

117
00:05:27,959 --> 00:05:32,459
light one more example Raymond chow and

118
00:05:30,089 --> 00:05:34,288
others we've seen anomalies in the speed

119
00:05:32,459 --> 00:05:37,408
of light where we get faster than light

120
00:05:34,288 --> 00:05:39,478
propagation in some cases what I want to

121
00:05:37,408 --> 00:05:42,538
talk about today are other types of

122
00:05:39,478 --> 00:05:45,028
phenomena that also give us hints about

123
00:05:42,538 --> 00:05:47,519
anomalies that might help us to

124
00:05:45,028 --> 00:05:50,278
construct a better theory of physics or

125
00:05:47,519 --> 00:05:53,370
help us to get to guide us if we are

126
00:05:50,278 --> 00:05:55,139
missing things that need to be added and

127
00:05:53,370 --> 00:05:59,550
of course other paranormal phenomena and

128
00:05:55,139 --> 00:06:05,129
UFOs or to anomalistic areas that are

129
00:05:59,550 --> 00:06:06,918
good guides to provide clues for us so

130
00:06:05,129 --> 00:06:10,288
if we can look at what some of those

131
00:06:06,918 --> 00:06:12,810
experiments and incidents teach us I'm

132
00:06:10,288 --> 00:06:15,658
not trying to prove that either one

133
00:06:12,810 --> 00:06:18,449
exists today that's a big subject that

134
00:06:15,658 --> 00:06:20,848
would be a much longer talk some good

135
00:06:18,449 --> 00:06:23,370
references supporting each phenomena can

136
00:06:20,848 --> 00:06:25,079
be suggested for the paranormal

137
00:06:23,370 --> 00:06:26,759
the psychic discoveries behind the iron

138
00:06:25,079 --> 00:06:29,089
curtain by Australia and Schroder back

139
00:06:26,759 --> 00:06:32,340
in nineteen seventy was one of the great

140
00:06:29,089 --> 00:06:33,689
watershed books margins of reality by

141
00:06:32,339 --> 00:06:37,369
Bob John in brennidon

142
00:06:33,689 --> 00:06:39,560
Dean Raiden's books bill tillers books

143

00:06:37,370 --> 00:06:40,910
genic monocles books output

144
00:06:39,560 --> 00:06:42,800
mine at the bottom there I think I try

145
00:06:40,910 --> 00:06:45,830
to summarize these things but there are

146
00:06:42,800 --> 00:06:48,290
many many books that got a good guide

147
00:06:45,829 --> 00:06:51,740
for those who were learning about the

148
00:06:48,290 --> 00:06:54,020
anomalies in the paranormal and for UFOs

149
00:06:51,740 --> 00:06:56,418
I would say Timothy goods above top

150
00:06:54,019 --> 00:06:58,819
secret was one of those great books in

151
00:06:56,418 --> 00:07:01,339
the late 80s that showed us there was

152
00:06:58,819 --> 00:07:03,918
some substance here that we weren't we

153
00:07:01,339 --> 00:07:06,409
had not been seeing before Michael Hess

154
00:07:03,918 --> 00:07:08,649
omens UFOs the secret history is a very

155
00:07:06,410 --> 00:07:12,200
thorough book about some of the evidence

156
00:07:08,649 --> 00:07:15,079
built hoarse those day after Roswell Ray

157
00:07:12,199 --> 00:07:18,050

Fowler's books John Mac's books witty

158

00:07:15,079 --> 00:07:22,060

streamers books all give different views

159

00:07:18,050 --> 00:07:24,829

of this very complex and large subject

160

00:07:22,060 --> 00:07:27,019

some paranormal phenomena as you know

161

00:07:24,829 --> 00:07:30,409

have been demonstrated in the lab with

162

00:07:27,019 --> 00:07:32,959

good statistics the prepare lab Dean

163

00:07:30,410 --> 00:07:37,130

Radin global consciousness project with

164

00:07:32,959 --> 00:07:39,439

ESP PK and remote viewing now we can say

165

00:07:37,129 --> 00:07:43,159

have been established with high

166

00:07:39,439 --> 00:07:44,959

probability in my mind some effects are

167

00:07:43,160 --> 00:07:46,970

more spectacular in a rare and more

168

00:07:44,959 --> 00:07:49,750

controversial and they depend more on

169

00:07:46,970 --> 00:07:54,560

anecdotal evidence levitation

170

00:07:49,750 --> 00:07:57,139

teleportation etc this is a problem

171

00:07:54,560 --> 00:08:01,668

studying UFOs scientifically since you

172
00:07:57,139 --> 00:08:03,259
can't really control repeatability its

173
00:08:01,668 --> 00:08:07,459
although it's desirable to have good

174
00:08:03,259 --> 00:08:09,918
statistics in science some events are

175
00:08:07,459 --> 00:08:11,899
rare and non repeatable and yet we have

176
00:08:09,918 --> 00:08:14,839
to live with it if the event is

177
00:08:11,899 --> 00:08:16,699
spectacular enough the Big Bang is one

178
00:08:14,839 --> 00:08:20,299
we've kind of stuck with we get one you

179
00:08:16,699 --> 00:08:22,399
know to study the first atomic bomb test

180
00:08:20,300 --> 00:08:26,210
was sufficient to convince the military

181
00:08:22,399 --> 00:08:29,629
that they were ready to go the Omega

182
00:08:26,209 --> 00:08:32,569
minus particles of scotch to convince

183
00:08:29,629 --> 00:08:34,519
people that su3 the Eightfold way of

184
00:08:32,570 --> 00:08:38,120
Mariko maan was correct there so there

185
00:08:34,519 --> 00:08:42,110
are cases where a few examples have a

186
00:08:38,120 --> 00:08:43,729
lot of power it's not ideal but it's we

187
00:08:42,110 --> 00:08:47,839
have we're stuck with basically until we

188
00:08:43,729 --> 00:08:49,820
have some better data in case of UFOs

189
00:08:47,839 --> 00:08:52,950
there are some really high credibility

190
00:08:49,820 --> 00:08:54,720
witnesses so for people who have

191
00:08:52,950 --> 00:08:57,060
looked into the subject - who are

192
00:08:54,720 --> 00:08:59,430
skeptics it's worthwhile looking at what

193
00:08:57,059 --> 00:09:03,929
some pretty high credibility individuals

194
00:08:59,429 --> 00:09:06,089
said about their existence it's time for

195
00:09:03,929 --> 00:09:08,370
the truth to be brought out behind the

196
00:09:06,090 --> 00:09:11,580
scenes high ranking Air Force officers

197
00:09:08,370 --> 00:09:13,679
are soberly concerned about UFOs but

198
00:09:11,580 --> 00:09:15,810
through official secrecy secrecy and

199
00:09:13,679 --> 00:09:18,629
ridicule many citizens are led to

200

00:09:15,809 --> 00:09:21,179
believe the unknown objects are nonsense

201
00:09:18,629 --> 00:09:23,669
and this is the former CIA director

202
00:09:21,179 --> 00:09:27,659
Vice Admiral Roscoe Helen Cotter in a

203
00:09:23,669 --> 00:09:30,299
statement to Congress this flying saucer

204
00:09:27,659 --> 00:09:31,829
situation is not at all imaginary or

205
00:09:30,299 --> 00:09:34,259
seeing too much in some natural

206
00:09:31,830 --> 00:09:36,690
phenomena something is really flying

207
00:09:34,259 --> 00:09:40,350
around the phenomenon is something real

208
00:09:36,690 --> 00:09:42,720
and not visionary or fictitious general

209
00:09:40,350 --> 00:09:47,190
Nathan twining chief of staff US Air

210
00:09:42,720 --> 00:09:48,690
Force more than 10,000 sightings have

211
00:09:47,190 --> 00:09:50,790
been reported the majority of which

212
00:09:48,690 --> 00:09:53,730
cannot be accounted for by any

213
00:09:50,789 --> 00:09:56,279
scientific explanation I'm convinced

214
00:09:53,730 --> 00:09:58,920

these objects do exist and that they are

215

00:09:56,279 --> 00:10:01,309

not manufactured by any nation a nation

216

00:09:58,919 --> 00:10:01,309

on earth
