

1  
00:00:00,000 --> 00:00:04,559  
return to the natural order when you

2  
00:00:02,009 --> 00:00:08,029  
change the intention you get a very

3  
00:00:04,559 --> 00:00:11,189  
different pattern you see in effect when

4  
00:00:08,029 --> 00:00:14,939  
the water is treated but you don't see

5  
00:00:11,189 --> 00:00:17,100  
in effect directly when this intention

6  
00:00:14,939 --> 00:00:19,350  
is directed toward toward the tumor

7  
00:00:17,100 --> 00:00:21,090  
cells now we can discuss this and I'm

8  
00:00:19,350 --> 00:00:22,590  
not really sure this is a real anomaly

9  
00:00:21,089 --> 00:00:24,089  
for me this is not at all what I

10  
00:00:22,589 --> 00:00:26,368  
expected so this can't be an

11  
00:00:24,089 --> 00:00:28,349  
experimenter effect and this effect was

12  
00:00:26,368 --> 00:00:30,980  
seen with with the loving intention and

13  
00:00:28,349 --> 00:00:34,890  
it was seen with the dematerialization

14  
00:00:30,980 --> 00:00:37,969  
intention but it was not obtained with

15  
00:00:34,890 --> 00:00:40,920  
the return to the natural order so this

16  
00:00:37,969 --> 00:00:43,829  
phenomenon is at this point completely

17  
00:00:40,920 --> 00:00:45,570  
unexplained I really don't have an

18  
00:00:43,829 --> 00:00:48,239  
explanation other than to say that

19  
00:00:45,570 --> 00:00:51,539  
certainly intentions resonate with water

20  
00:00:48,238 --> 00:00:55,109  
in a different way and can be stored in

21  
00:00:51,539 --> 00:00:58,020  
a different way and therefore have and

22  
00:00:55,109 --> 00:01:02,009  
can be read by the biological system in

23  
00:00:58,020 --> 00:01:03,660  
a different way so this is you know

24  
00:01:02,009 --> 00:01:05,009  
preliminary experiments which is the

25  
00:01:03,659 --> 00:01:08,819  
whole purpose of being in this kind of

26  
00:01:05,010 --> 00:01:12,719  
society this is unpublished data but

27  
00:01:08,819 --> 00:01:15,389  
there's clearly is a defect on the

28  
00:01:12,719 --> 00:01:19,920  
different intentions so that is my

29

00:01:15,390 --> 00:01:22,290  
conclusion that the healing effects can

30  
00:01:19,920 --> 00:01:25,379  
be direct or they can be indirect that

31  
00:01:22,290 --> 00:01:27,000  
water seems to mediate the effects water

32  
00:01:25,379 --> 00:01:33,089  
in this case is storing the information

33  
00:01:27,000 --> 00:01:35,400  
and the treatment time is over 15

34  
00:01:33,090 --> 00:01:37,829  
minutes as I said but the biological

35  
00:01:35,400 --> 00:01:41,310  
system is reading the information stored

36  
00:01:37,828 --> 00:01:43,978  
in the water over 24 hour period because

37  
00:01:41,310 --> 00:01:50,759  
the growth period was over a 24-hour

38  
00:01:43,978 --> 00:01:52,228  
period it seems that some intentions are

39  
00:01:50,759 --> 00:01:53,939  
quite effective and some are not

40  
00:01:52,228 --> 00:01:57,929  
effective there's a difference between

41  
00:01:53,938 --> 00:02:04,019  
direct and indirect and it seems that

42  
00:01:57,930 --> 00:02:06,810  
there's a lot of unknown phenomena

43  
00:02:04,019 --> 00:02:09,118

anomalous phenomena occurring okay since

44

00:02:06,810 --> 00:02:11,729

I do have a couple more minutes I want

45

00:02:09,118 --> 00:02:13,530

to address the possible mechanisms how

46

00:02:11,729 --> 00:02:16,379

this phenomena could

47

00:02:13,530 --> 00:02:19,620

be occurring now water memory is

48

00:02:16,379 --> 00:02:22,590

actually it's controversial but there is

49

00:02:19,620 --> 00:02:25,890

some scientific literature that water

50

00:02:22,590 --> 00:02:28,740

can remember heat exposure that's

51

00:02:25,889 --> 00:02:30,779

thermal memory and that's known that the

52

00:02:28,740 --> 00:02:33,770

vibration and rotation modes of the

53

00:02:30,780 --> 00:02:36,150

water molecules can store heat energy

54

00:02:33,770 --> 00:02:38,159

ultraviolet energy can be stored in

55

00:02:36,150 --> 00:02:40,379

electron transitions of the water

56

00:02:38,159 --> 00:02:42,419

molecule there's even a phenomenal

57

00:02:40,379 --> 00:02:44,340

hydration memory which is in the

58

00:02:42,419 --> 00:02:48,199  
scientific literature published in

59

00:02:44,340 --> 00:02:50,789  
peer-reviewed journals in this case the

60

00:02:48,199 --> 00:02:54,000  
has been done with enzymes and

61

00:02:50,789 --> 00:02:56,609  
particular chemicals that are added to

62

00:02:54,000 --> 00:02:59,879  
the water that affects the enzymes the

63

00:02:56,610 --> 00:03:02,400  
the result in effect on the enzyme

64

00:02:59,879 --> 00:03:04,409  
activity it has more to do with the

65

00:03:02,400 --> 00:03:07,050  
ability of the chemical to structure the

66

00:03:04,409 --> 00:03:09,979  
water than it does with the chemical

67

00:03:07,050 --> 00:03:13,380  
structure of the additive which is a

68

00:03:09,979 --> 00:03:15,030  
interesting phenomenon so in additional

69

00:03:13,379 --> 00:03:17,430  
to the traditional mechanisms we have

70

00:03:15,030 --> 00:03:18,989  
non traditional mechanisms and we've

71

00:03:17,430 --> 00:03:22,019  
talked really hurt a little bit about

72  
00:03:18,989 --> 00:03:24,599  
the hydrogen bond this afternoon which

73  
00:03:22,019 --> 00:03:27,090  
is which allows water to form clusters

74  
00:03:24,599 --> 00:03:29,819  
and this is one possible mechanism

75  
00:03:27,090 --> 00:03:32,519  
except for the fact that these clusters

76  
00:03:29,819 --> 00:03:34,829  
kind of disappear and disappear and

77  
00:03:32,519 --> 00:03:37,230  
flicker on and off so if the information

78  
00:03:34,829 --> 00:03:39,510  
was to be stored in the structure as

79  
00:03:37,229 --> 00:03:41,518  
soon as the structure dissipates you

80  
00:03:39,509 --> 00:03:43,500  
would think the information would just

81  
00:03:41,519 --> 00:03:46,170  
dissipate along with it so I'm not sure

82  
00:03:43,500 --> 00:03:48,569  
that's the best of explanations there

83  
00:03:46,169 --> 00:03:51,569  
are various other explanations I think

84  
00:03:48,569 --> 00:03:53,819  
the most likely explanation is the one

85  
00:03:51,569 --> 00:03:56,009  
that was proposed by del Giudice a

86

00:03:53,819 --> 00:03:59,459  
couple of years ago where he described

87  
00:03:56,009 --> 00:04:03,179  
quantum domains in water so in addition

88  
00:03:59,459 --> 00:04:06,180  
to having these structural clusters of

89  
00:04:03,180 --> 00:04:08,489  
water we have quantum domains which are

90  
00:04:06,180 --> 00:04:11,909  
described in terms of quantum fields

91  
00:04:08,489 --> 00:04:14,519  
within the quantum domains and coherent

92  
00:04:11,909 --> 00:04:17,788  
oscillations between the coherent

93  
00:04:14,519 --> 00:04:21,298  
domains so it seems to me that that's

94  
00:04:17,788 --> 00:04:25,009  
one likely possible explanation because

95  
00:04:21,298 --> 00:04:27,239  
of the quantum nature of consciousness

96  
00:04:25,009 --> 00:04:28,649  
so I'm throwing that out as

97  
00:04:27,240 --> 00:04:30,269  
possible mechanisms there are other

98  
00:04:28,649 --> 00:04:32,758  
mechanisms involved these

99  
00:04:30,269 --> 00:04:34,589  
superconducting filaments and solo times

100  
00:04:32,759 --> 00:04:37,530

and for all the physicists in the

101

00:04:34,589 --> 00:04:39,659

audience obviously there are a lot of

102

00:04:37,529 --> 00:04:41,489

theories out but very little bit of

103

00:04:39,660 --> 00:04:43,680

correlation between the theory and the

104

00:04:41,490 --> 00:04:45,470

experimental data since I have 30

105

00:04:43,680 --> 00:04:52,860

seconds left I want to thank you for

106

00:04:45,470 --> 00:05:04,169

your time that's it okay so we really

107

00:04:52,860 --> 00:05:10,080

have five minutes um has anyone looked

108

00:05:04,168 --> 00:05:13,318

at the investigated the the law the

109

00:05:10,079 --> 00:05:15,810

other logical possibility that distant

110

00:05:13,319 --> 00:05:18,090

intentional effects on tumor growth

111

00:05:15,810 --> 00:05:21,720

could be in negative direction and to

112

00:05:18,089 --> 00:05:24,329

increase the tumor growth rate yes from

113

00:05:21,720 --> 00:05:27,000

other experiments that I've done with

114

00:05:24,329 --> 00:05:30,089

with the same healer where we were more

115  
00:05:27,000 --> 00:05:31,439  
focusing on direct experiments these

116  
00:05:30,089 --> 00:05:33,418  
were not actually done at a distance

117  
00:05:31,439 --> 00:05:36,779  
they were done in the lab and the healer

118  
00:05:33,418 --> 00:05:39,569  
just laid his hands on the water but

119  
00:05:36,779 --> 00:05:43,589  
depending on his intention yes he could

120  
00:05:39,569 --> 00:05:47,310  
inhibit the growth if he visualized the

121  
00:05:43,589 --> 00:05:50,339  
end point was you know fewer cells in

122  
00:05:47,310 --> 00:05:52,800  
the petri dish the actual growth was uh

123  
00:05:50,339 --> 00:05:54,598  
I mean more especially the opposite more

124  
00:05:52,800 --> 00:05:56,310  
cells he could actually stimulate the

125  
00:05:54,598 --> 00:05:59,759  
growth as well as inhibit the growth

126  
00:05:56,310 --> 00:06:01,829  
depending on the intention a Glen two

127  
00:05:59,759 --> 00:06:03,960  
quick questions um could you comment on

128  
00:06:01,829 --> 00:06:05,939  
the level of purity the water a and B

129  
00:06:03,959 --> 00:06:08,279  
the second question is what hydration

130  
00:06:05,939 --> 00:06:11,968  
memory be most like a homeopathic

131  
00:06:08,279 --> 00:06:14,728  
dilution well first question is easy it

132  
00:06:11,968 --> 00:06:17,550  
was deionized water standard laboratory

133  
00:06:14,728 --> 00:06:21,329  
water that we use to measure to use to

134  
00:06:17,550 --> 00:06:25,889  
make tissue culture medium hydration

135  
00:06:21,329 --> 00:06:31,649  
memory and homeopathy hmm I have to

136  
00:06:25,889 --> 00:06:32,879  
think about that it yeah I hadn't

137  
00:06:31,649 --> 00:06:35,429  
actually thought about that but that's a

138  
00:06:32,879 --> 00:06:36,959  
very feasible explanation because it's

139  
00:06:35,430 --> 00:06:38,788  
the presence of the chemical which

140  
00:06:36,959 --> 00:06:40,259  
actually structures the water and then

141  
00:06:38,788 --> 00:06:42,490  
has a result in effect

142  
00:06:40,259 --> 00:06:46,539  
so yes that that's a very feasible

143

00:06:42,490 --> 00:06:49,569  
mechanism for homeopathy a question if I

144  
00:06:46,540 --> 00:06:52,030  
understand correctly you've shown that

145  
00:06:49,569 --> 00:06:54,730  
intention affects the structure of water

146  
00:06:52,029 --> 00:06:58,299  
right and you've also shown in other

147  
00:06:54,730 --> 00:07:02,620  
experiments that intention applied to

148  
00:06:58,300 --> 00:07:04,540  
water or to a subject effects a healing

149  
00:07:02,620 --> 00:07:07,120  
or produces healing an effect on the

150  
00:07:04,540 --> 00:07:09,610  
biological system correct but the so the

151  
00:07:07,120 --> 00:07:11,889  
question still remains is that the

152  
00:07:09,610 --> 00:07:15,879  
structure in the water that produces the

153  
00:07:11,889 --> 00:07:18,849  
healing when that water is is given to

154  
00:07:15,879 --> 00:07:21,850  
the what needs to be healed or is it

155  
00:07:18,850 --> 00:07:24,910  
just a direct effect of that intention

156  
00:07:21,850 --> 00:07:26,890  
and the water could have been applying

157  
00:07:24,910 --> 00:07:28,360

the intention to that lamp instead and

158

00:07:26,889 --> 00:07:31,240

it still would have healed that person

159

00:07:28,360 --> 00:07:33,790

so it seems to me the way to really

160

00:07:31,240 --> 00:07:35,259

prove that it's the water structure that

161

00:07:33,790 --> 00:07:38,439

has done the healing and not just the

162

00:07:35,259 --> 00:07:40,389

intention directly would be to show for

163

00:07:38,439 --> 00:07:43,360

example that the degradation of the

164

00:07:40,389 --> 00:07:45,550

structure in the water correlates in

165

00:07:43,360 --> 00:07:47,590

time with the degradation of the healing

166

00:07:45,550 --> 00:07:51,509

power or something like that has

167

00:07:47,589 --> 00:07:54,579

anything like that been done the degra

168

00:07:51,509 --> 00:07:57,399

we don't know how long it lasts in

169

00:07:54,579 --> 00:07:59,919

compared to the electromagnetic exposure

170

00:07:57,399 --> 00:08:03,489

which we know lasts about 20 minutes to

171

00:07:59,920 --> 00:08:07,449

a half an hour have I looked at that

172  
00:08:03,490 --> 00:08:08,920  
much the no III do not know how long it

173  
00:08:07,449 --> 00:08:12,729  
lasts and I have not made any such

174  
00:08:08,920 --> 00:08:14,199  
correlations and no nobody has done

175  
00:08:12,730 --> 00:08:16,090  
those kind of experiments and a few

176  
00:08:14,199 --> 00:08:19,240  
scientists who do these kind of

177  
00:08:16,089 --> 00:08:22,239  
experiments usually our first looking at

178  
00:08:19,240 --> 00:08:23,769  
the phenomenological aspects of it you

179  
00:08:22,240 --> 00:08:26,230  
know the phenomena is you know that

180  
00:08:23,769 --> 00:08:29,919  
water seems to be able to carry the

181  
00:08:26,230 --> 00:08:31,870  
information of intent and once you have

182  
00:08:29,920 --> 00:08:33,759  
that phenomena then you can go into much

183  
00:08:31,870 --> 00:08:35,529  
more details the first attempt at even

184  
00:08:33,759 --> 00:08:37,720  
looking at the mechanism is to say is

185  
00:08:35,529 --> 00:08:40,120  
there a structural change in the water

186  
00:08:37,720 --> 00:08:42,279  
that correlates with the storage of the

187  
00:08:40,120 --> 00:08:43,389  
information so that's the first attempt

188  
00:08:42,279 --> 00:08:48,100  
and obviously there's a lot more

189  
00:08:43,389 --> 00:08:49,659  
experiments to do glenwood to share with

190  
00:08:48,100 --> 00:08:51,820  
us the difference between the Sham

191  
00:08:49,659 --> 00:08:53,289  
healing of the water as well as the

192  
00:08:51,820 --> 00:08:55,269  
cells I didn't see

193  
00:08:53,289 --> 00:08:58,409  
that clearly represented in your slides

194  
00:08:55,269 --> 00:09:01,028  
maybe I missed something okay the the

195  
00:08:58,409 --> 00:09:05,259  
experiment the tumor cells were split

196  
00:09:01,028 --> 00:09:08,009  
into two batches of cells six petry

197  
00:09:05,259 --> 00:09:11,560  
dishes and six patrie dishes and I had a

198  
00:09:08,009 --> 00:09:14,620  
second person independently bring the

199  
00:09:11,559 --> 00:09:18,129  
dishes to the healer in one room and the

200

00:09:14,620 --> 00:09:20,440  
the non healer in another room and then

201  
00:09:18,129 --> 00:09:22,360  
they for during the 15-minute period you

202  
00:09:20,440 --> 00:09:24,579  
know the healer did his intention thing

203  
00:09:22,360 --> 00:09:25,690  
and the non healer well actually I

204  
00:09:24,578 --> 00:09:27,189  
didn't mention that but in some

205  
00:09:25,690 --> 00:09:30,339  
experiments I actually had the non

206  
00:09:27,190 --> 00:09:32,649  
healer read a book so that they were the

207  
00:09:30,339 --> 00:09:34,420  
results all the Sham healing that was my

208  
00:09:32,649 --> 00:09:37,089  
question I understood the method yeah oh

209  
00:09:34,419 --> 00:09:42,429  
sorry there well the data was presented

210  
00:09:37,089 --> 00:09:46,839  
as the as the per the percent inhibition

211  
00:09:42,429 --> 00:09:48,669  
and oh IC relative to the control yeah I

212  
00:09:46,839 --> 00:09:52,209  
with the Sham healer compared to the

213  
00:09:48,669 --> 00:09:57,458  
lender Glasgow right the magnitude of

214  
00:09:52,208 --> 00:09:59,528

the effect was taken into account and I

215

00:09:57,458 --> 00:10:02,039

actually did the difference between the

216

00:09:59,528 --> 00:10:02,039

healing and
