

1

00:00:00,000 --> 00:00:07,000

All right, let's get off the recording and let's start with something I had to demand.

2

00:00:07,000 --> 00:00:09,000

I want to speak to you.

3

00:00:09,000 --> 00:00:12,000

I'm going to speak to you frankly and I may get a little rough sometimes.

4

00:00:12,000 --> 00:00:17,000

I hope that all the titles remain within the bounds of not being able to come and decalculate

5

00:00:17,000 --> 00:00:18,000

with tax.

6

00:00:18,000 --> 00:00:23,000

Let us dispose of very strong and sturdy balls and I must explain.

7

00:00:23,000 --> 00:00:25,000

Well, let's just explain.

8

00:00:25,000 --> 00:00:27,000

I'm sixty-seven.

9

00:00:27,000 --> 00:00:30,000

I'm not my good pal, but this is the wood that's for all of us.

10

00:00:30,000 --> 00:00:32,000

Everybody is.

11

00:00:32,000 --> 00:00:35,000

This is the matter of my reputation today.

12

00:00:35,000 --> 00:00:37,000

I have my hands at you.

13

00:00:37,000 --> 00:00:39,000

That was going on in production at my heart.

14

00:00:39,000 --> 00:00:41,000

I'm not the, this is not the case.

15

00:00:41,000 --> 00:00:43,000

You'll get to know us by the time speaking.

16

00:00:43,000 --> 00:00:45,000

I'm also the major case.

17

00:00:45,000 --> 00:00:47,000

I'm also Dr. Davidson.

18

00:00:47,000 --> 00:00:50,000

I'm also the best-case memory that's getting into this whole business.

19

00:00:50,000 --> 00:00:52,000

You're an ironhide.

20

00:00:52,000 --> 00:00:56,000

I'm on the subject of you first and along all the sides.

21

00:00:56,000 --> 00:01:04,000

At any time at the beginning, we are a technological culture in this country and the western world

22

00:01:04,000 --> 00:01:07,000

and the whole world is becoming that way.

23

00:01:07,000 --> 00:01:14,000

Now, our technology is at the present moment founded on what is called fitting.

24

00:01:14,000 --> 00:01:17,000

Not a typical scientist, but fitting.

25

00:01:17,000 --> 00:01:22,000

And the fittest fit is our most modern of the most advanced of today.

26

00:01:22,000 --> 00:01:25,000

At least I've heard mathematicians on top of the kind of theory.

27

00:01:25,000 --> 00:01:29,000

And then a physicist, then down to a chemist.

28

00:01:29,000 --> 00:01:32,000

A small little biologist, before taking a long...

29

00:01:32,000 --> 00:01:36,000

Now, I've a good fact in my doubt that I don't have to tell you this.

30

00:01:36,000 --> 00:01:42,000

Many people have been to those where I was born, born of an old family.

31

00:01:42,000 --> 00:01:46,000

I just come to my dumps in the basement only a few years ago.

32

00:01:46,000 --> 00:01:49,000

But what do we know most clearly in this country?

33

00:01:49,000 --> 00:01:51,000

Far.

34

00:01:51,000 --> 00:01:56,000

What sounds at all is technology, gadget theory, art and then the shit from the most far.

35

00:01:56,000 --> 00:02:00,000

What we call philosophy in this country is what's called pure far.

36

00:02:00,000 --> 00:02:02,000

The rest of the world.

37

00:02:02,000 --> 00:02:05,000

And what? The rest of the world calls philosophy.

38

00:02:05,000 --> 00:02:07,000

We call them energetics in this country.

39

00:02:07,000 --> 00:02:08,000

All right?

40

00:02:08,000 --> 00:02:10,000

Let's get out of the way.

41

00:02:10,000 --> 00:02:16,000

Now, about 99% of physicists might not be saying it's being changed.

42

00:02:16,000 --> 00:02:19,000

But the magic here, the outside, is the toll.

43

00:02:19,000 --> 00:02:22,000

Many of my studies met a semantic.

44

00:02:22,000 --> 00:02:26,000

It only takes one family to divide.

45

00:02:26,000 --> 00:02:28,000

Think of a principle plan of bomb.

46

00:02:28,000 --> 00:02:31,000

It takes 100,000 people to put one together.

47

00:02:31,000 --> 00:02:35,000

And we live in an age when it's the people who put bombs together that matter.

48

00:02:35,000 --> 00:02:37,000

We all are worships.

49

00:02:37,000 --> 00:02:42,000

And I think to the enormous critics of the physicists who understate that they are,

50

00:02:43,000 --> 00:02:47,000

have not yet found it unorthodoxy or a hierarchy,

51

00:02:47,000 --> 00:02:51,000

nor are they bullying people around that try to do a hard job.

52

00:02:51,000 --> 00:02:53,000

But it all started.

53

00:02:53,000 --> 00:02:57,000

The last chemist is about 25% of probably real scientists.

54

00:02:57,000 --> 00:02:59,000

Do you know what the definition of science is?

55

00:02:59,000 --> 00:03:01,000

We look at it from the evening webster.

56

00:03:01,000 --> 00:03:06,000

It is the exploration or investigation of the unknown, not of the known.

57

00:03:06,000 --> 00:03:09,000

Technology, from the technos,

58

00:03:09,000 --> 00:03:13,000

you look at it from the Greek dictionary, you find out that it actually comes down

59

00:03:13,000 --> 00:03:20,000

to the further elaboration of our understanding of our log of knowledge of the known,

60

00:03:20,000 --> 00:03:22,000

or technos.

61

00:03:22,000 --> 00:03:25,000

Techno, I think it is, I don't know, but anyhow.

62

00:03:25,000 --> 00:03:29,000

Now, men, are really working in the field of pure science.

63

00:03:29,000 --> 00:03:30,000

In other words, it's warm.

64

00:03:30,000 --> 00:03:33,000

It starts with imagination, just like science fiction does.

65

00:03:33,000 --> 00:03:35,000

Following which comes the hypothesis,

66

00:03:35,000 --> 00:03:37,000

other which may develop a theory,

67

00:03:37,000 --> 00:03:39,000

not to which you can't put a theory in its word chart,

68

00:03:39,000 --> 00:03:43,000

you finally have practice and a theory.

69

00:03:43,000 --> 00:03:46,000

The chemists are examining real things.

70

00:03:46,000 --> 00:03:49,000

Do you realize that the only thing that doesn't exist,

71

00:03:49,000 --> 00:03:51,000

the only thing that we know for sure that's the truth,

72

00:03:51,000 --> 00:03:55,000

that's mathematics, we can't get it wrong tonight.

73

00:03:55,000 --> 00:03:57,000

The official thing is mathematics.

74

00:03:57,000 --> 00:04:00,000

In nature, outside of modern intelligence,

75

00:04:00,000 --> 00:04:03,000

there was a time, mine, that would exist.

76

00:04:03,000 --> 00:04:06,000

If you add five apples, two apples, three apples,

77

00:04:06,000 --> 00:04:08,000

the two apples, you don't get five apples.

78

00:04:08,000 --> 00:04:10,000

There's a lot of apples lying on the ground.

79

00:04:10,000 --> 00:04:12,000

Mathematics is a very peculiar business,

80

00:04:12,000 --> 00:04:15,000

but it is, the only thing that's actually true,

81

00:04:15,000 --> 00:04:19,000

and can actually, in every case, be proved right or wrong,

82

00:04:19,000 --> 00:04:22,000

despite that probable little figure, which means possibility,

83

00:04:22,000 --> 00:04:24,000

which is now accepted, and it's been a bit,

84

00:04:24,000 --> 00:04:28,000

but it's a past, so there's only thing that doesn't really exist.

85

00:04:28,000 --> 00:04:31,000

Physics is the next one down.

86

00:04:31,000 --> 00:04:34,000

You know a certain physicist who's not mentioned his name,

87

00:04:34,000 --> 00:04:37,000

who's one of the people who helped us with the atom bomb together,

88

00:04:37,000 --> 00:04:40,000

quite a doubtful name, not very long ago,

89

00:04:40,000 --> 00:04:43,000

that when they laid off the first elemental atom bomb,

90

00:04:43,000 --> 00:04:48,000

the element or though, we knew of the existence

91

00:04:48,000 --> 00:04:51,000

of 40-list particles in the nucleus, and we know now.

92

00:04:51,000 --> 00:04:53,000

So really, they've been sitting around with some decision,

93

00:04:53,000 --> 00:04:55,000

they're very much about it.

94

00:04:55,000 --> 00:04:58,000

There's a lot of serious issues, or a few serious issues,

95

00:04:58,000 --> 00:05:01,000

people who put this stuff together, and then have bad technology.

96

00:05:01,000 --> 00:05:04,000

Then you come down to the chemist.

97

00:05:04,000 --> 00:05:07,000

Finally you come down to the biologist,

98

00:05:07,000 --> 00:05:10,000

and the biologist is called a philosopher,

99

00:05:10,000 --> 00:05:12,000

for this becoming of vital importance.

100

00:05:12,000 --> 00:05:16,000

After all, biology is dealing with facts,

101

00:05:16,000 --> 00:05:20,000

which are studying from ourselves on up and on down,

102

00:05:20,000 --> 00:05:23,000

and the majority of them still have to be found

103

00:05:23,000 --> 00:05:26,000

because there's a lot of biological technology going on.

104

00:05:26,000 --> 00:05:30,000

But out the whole, the biologist has to be a little bit more

105

00:05:30,000 --> 00:05:33,000

scientific to always say about it.

106

00:05:33,000 --> 00:05:35,000

I'm not being denied, I'm trying to put the thing,

107

00:05:35,000 --> 00:05:37,000

it's a managed-to-mend scenario,

108

00:05:37,000 --> 00:05:39,000

but a lot of people are understanding.

109

00:05:39,000 --> 00:05:43,000

They think of sending radio stations, putting atom bombs together.

110

00:05:43,000 --> 00:05:45,000

It's not, it's not, it's gadgetarian,

111

00:05:45,000 --> 00:05:47,000

but very advanced order.

112

00:05:47,000 --> 00:05:49,000

They want the bigger bang in the Russian system.

113

00:05:49,000 --> 00:05:52,000

If you get 100,000 people together, you need to be there on the ground,

114

00:05:52,000 --> 00:05:54,000

you put them together in a certain kind of way,

115

00:05:54,000 --> 00:05:56,000

and you get your big bang.

116

00:05:56,000 --> 00:05:58,000

But the families of this world,

117

00:05:58,000 --> 00:06:00,000

and the people who think of the theory,

118

00:06:00,000 --> 00:06:03,000

and develop the theory, are exploring the unknown.

119

00:06:03,000 --> 00:06:06,000

Now there's been so little scientific

120

00:06:06,000 --> 00:06:10,000

respect, sure, to this whole subject of what I call eupolytics.

121

00:06:10,000 --> 00:06:16,000

And I think it's about time that one of the classes

122

00:06:16,000 --> 00:06:19,000

could find time, or play it, or play it,

123

00:06:19,000 --> 00:06:24,000

to allow this great subject to be taken in.

124

00:06:24,000 --> 00:06:26,000

The vitriolicists, the vitrologists,

125

00:06:26,000 --> 00:06:28,000

don't want it to be possible to be.

126

00:06:28,000 --> 00:06:30,000

They're concerned with things in our sky,

127

00:06:30,000 --> 00:06:32,000

certainly, which they have to know about.

128

00:06:32,000 --> 00:06:34,000

Just one of them wasn't a part of it.

129

00:06:34,000 --> 00:06:36,000

Anyhow, they can't see how these things are reported,

130

00:06:36,000 --> 00:06:39,000

because they are too far away to play it out.

131

00:06:39,000 --> 00:06:42,000

And as they just get into their skin, they say,

132

00:06:42,000 --> 00:06:44,000

the physicists, they're one of a sort,

133

00:06:44,000 --> 00:06:46,000

and so they're positive.

134

00:06:46,000 --> 00:06:48,000

And so they're very interested in the chemistry of this guy

135

00:06:48,000 --> 00:06:51,000

in the hole, and so on down the line.

136

00:06:51,000 --> 00:06:54,000

The biologists believe in the world,

137

00:06:54,000 --> 00:06:58,000

which is people who have the knowledge enough to do that.

138

00:06:58,000 --> 00:07:00,000

And so they even suspect my colleagues,

139

00:07:00,000 --> 00:07:02,000

this is a car accident, they said,

140

00:07:02,000 --> 00:07:05,000

bad liquor, met hallucination.

141

00:07:05,000 --> 00:07:07,000

Geek-legged Navy blitz, I don't know where I put it,

142

00:07:07,000 --> 00:07:09,000

I heard about flying holes on the slides,

143

00:07:09,000 --> 00:07:11,000

there's a sea monster,

144

00:07:11,000 --> 00:07:14,000

that's one of the great explanations of sea monsters.

145

00:07:14,000 --> 00:07:16,000

Geek-legged Navy blitz,

146

00:07:16,000 --> 00:07:18,000

or Navy must be getting rid of this,

147

00:07:18,000 --> 00:07:20,000

it's been about 400 years,

148

00:07:20,000 --> 00:07:22,000

about 100 years, but all his kind of holes,

149

00:07:22,000 --> 00:07:24,000

they're very, very expensive.

150

00:07:24,000 --> 00:07:27,000

Here, there have been,

151

00:07:27,000 --> 00:07:29,000

what zero child sport is,

152

00:07:29,000 --> 00:07:32,000

is the core of the O-S-M,

153

00:07:32,000 --> 00:07:34,000

objects being loaded,

154

00:07:34,000 --> 00:07:36,000

and it gets a much nicer connotation,

155

00:07:36,000 --> 00:07:39,000

to UFOs, when I say to my flying object,

156

00:07:39,000 --> 00:07:41,000

objects being loaded,

157

00:07:41,000 --> 00:07:43,000

I would point out that nowadays,

158

00:07:43,000 --> 00:07:45,000

there were decades of outings,

159

00:07:45,000 --> 00:07:47,000

where it's important early days,

160

00:07:47,000 --> 00:07:49,000

if you've been looking for something there,

161

00:07:49,000 --> 00:07:51,000

the theme types of things,

162

00:07:51,000 --> 00:07:53,000

have been seen throughout history,

163

00:07:53,000 --> 00:07:55,000

and don't think that it's all important,

164

00:07:55,000 --> 00:07:57,000

you say to report it.

165

00:07:57,000 --> 00:08:00,000

Forty-tharves is the medium for reports of his mother,

166

00:08:00,000 --> 00:08:02,000

he could have been out to date of 1800s.

167

00:08:02,000 --> 00:08:04,000

A couple of gentlemen you mentioned before,

168

00:08:04,000 --> 00:08:06,000

Jessup and so on,

169

00:08:06,000 --> 00:08:08,000

have dug out reports of Wilkinson.

170

00:08:08,000 --> 00:08:10,000

I don't remember if Wilkinson was a work of art,

171

00:08:10,000 --> 00:08:12,000

who's not an engineer,

172

00:08:12,000 --> 00:08:14,000

I don't know if he's a single level,

173

00:08:14,000 --> 00:08:16,000

I'm talking about,

174

00:08:16,000 --> 00:08:18,000

he's got a way back to early Chinese literature,

175

00:08:18,000 --> 00:08:20,000

but quite a bunch of the Bible,

176

00:08:20,000 --> 00:08:22,000

probably the flying wheel in the sky,

177

00:08:22,000 --> 00:08:24,000

but I saw him taken up in the pilot's area.

178

00:08:24,000 --> 00:08:26,000

People wanted,

179

00:08:26,000 --> 00:08:30,000

they weren't fighting for what somebody was going to tell them,

180

00:08:30,000 --> 00:08:32,000

that you're lying,

181

00:08:32,000 --> 00:08:34,000

you're open to what they said,

182

00:08:34,000 --> 00:08:36,000

what they thought,

183

00:08:36,000 --> 00:08:38,000

what they thought they thought they said,

184

00:08:38,000 --> 00:08:40,000

and he got it in the presence,

185

00:08:40,000 --> 00:08:42,000

and it's available.

186

00:08:42,000 --> 00:08:44,000

They're Egyptian,

187

00:08:44,000 --> 00:08:46,000

have certain wave-intuitions,

188

00:08:46,000 --> 00:08:48,000

but much more important than that,

189

00:08:48,000 --> 00:08:50,000

and I would ask you,

190

00:08:50,000 --> 00:08:52,000

and any of you that know,

191

00:08:52,000 --> 00:08:54,000

just go to the New York Public Library,

192

00:08:54,000 --> 00:08:56,000

get a however much teachings of the world,

193

00:08:56,000 --> 00:08:58,000

starting in London,

194

00:08:58,000 --> 00:09:00,000

starting with his conception in the late 1700s,

195

00:09:00,000 --> 00:09:02,000

and go on up to about 1865,

196

00:09:02,000 --> 00:09:04,000

just rub off through the pages of those proceedings,

197

00:09:04,000 --> 00:09:08,000

you will find Dory after Dory reported,

198

00:09:08,000 --> 00:09:10,000

two G's throughout the study of London,

199

00:09:10,000 --> 00:09:12,000

five members of the Royal Society,

200

00:09:12,000 --> 00:09:14,000

of all kinds of various things

201

00:09:14,000 --> 00:09:16,000

being seen in the sky.

202

00:09:16,000 --> 00:09:18,000

And I did the form,

203

00:09:18,000 --> 00:09:20,000

I did the shape of many things

204

00:09:20,000 --> 00:09:22,000

that weren't being reported yet,

205

00:09:22,000 --> 00:09:24,000

and that are the formwork.

206

00:09:24,000 --> 00:09:26,000

And then these,

207

00:09:26,000 --> 00:09:28,000

things at the bottom of the land,

208

00:09:28,000 --> 00:09:30,000

modern shaped jobs,

209

00:09:30,000 --> 00:09:32,000

some quite rich ware things,

210

00:09:32,000 --> 00:09:36,000

similar things that look like types,

211

00:09:36,000 --> 00:09:38,000

the car shaped objects,

212

00:09:38,000 --> 00:09:40,000

lights of all kinds,

213

00:09:40,000 --> 00:09:42,000

objects with lights on them and so on.

214

00:09:42,000 --> 00:09:44,000

I really don't think of anybody,

215

00:09:44,000 --> 00:09:46,000

except for most of the population,

216

00:09:46,000 --> 00:09:48,000

the gentlemen of the present,

217

00:09:48,000 --> 00:09:50,000

like Trump, wherever you're in,

218

00:09:50,000 --> 00:09:52,000

it is on the really long,

219

00:09:52,000 --> 00:09:54,000

at the back of their being,

220

00:09:54,000 --> 00:09:56,000

a lot of things buzzing about in the sky,

221

00:09:56,000 --> 00:09:58,000

or having been seen in the sky.

222

00:09:58,000 --> 00:10:00,000

I mean, to tell you that there is all nonsense,

223

00:10:00,000 --> 00:10:02,000

and the study is about,

224

00:10:02,000 --> 00:10:04,000

you know, but I see there's 10,000 people

225

00:10:04,000 --> 00:10:06,000

out on that road,

226

00:10:06,000 --> 00:10:08,000

watching this alleged balloon.

227

00:10:08,000 --> 00:10:10,000

My eyes might start,

228

00:10:10,000 --> 00:10:12,000

of course, I didn't have any fuel for that,

229

00:10:12,000 --> 00:10:14,000

it was a horrible money to me,

230

00:10:14,000 --> 00:10:16,000

it was a balloon, it was one big one,

231

00:10:16,000 --> 00:10:18,000

it certainly wasn't their little small footage of it,

232

00:10:18,000 --> 00:10:20,000

which was there all the long time,

233

00:10:20,000 --> 00:10:22,000

but because it was in the sky,

234

00:10:22,000 --> 00:10:24,000

nearly 100 miles away,

235

00:10:24,000 --> 00:10:26,000

half an hour before that one was led off,

236

00:10:26,000 --> 00:10:28,000

it was in the sky,

237

00:10:28,000 --> 00:10:30,000

five corporations doing it out there,

238

00:10:30,000 --> 00:10:32,000

they wouldn't tell us if one was led off,

239

00:10:32,000 --> 00:10:34,000

and they weren't telling us the wind

240

00:10:34,000 --> 00:10:36,000

and the round direction,

241

00:10:36,000 --> 00:10:38,000

thousands of balloons, a lot of people looked at it

242

00:10:38,000 --> 00:10:40,000

and it was filled with nonsense,

243

00:10:40,000 --> 00:10:42,000

there's something hanging down underneath, all right,

244

00:10:42,000 --> 00:10:44,000

but the whole thing, despite the fact

245

00:10:44,000 --> 00:10:46,000

that they finally wiped it away,

246

00:10:46,000 --> 00:10:48,000

it's not a talk about saying it was a balloon,

247

00:10:48,000 --> 00:10:50,000

we know it was a balloon.

248

00:10:50,000 --> 00:10:52,000

All right, but in the meantime,

249

00:10:52,000 --> 00:10:54,000

all you can see is my remarks about it there,

250

00:10:54,000 --> 00:10:56,000

it must have been a balloon,

251

00:10:56,000 --> 00:10:58,000

it stands a thousand people looking at it,

252

00:10:58,000 --> 00:11:00,000

there is always reports, it's a scientific journal,

253

00:11:00,000 --> 00:11:02,000

and the world started to learn,

254

00:11:02,000 --> 00:11:04,000

there's this mind-based organization,

255

00:11:04,000 --> 00:11:06,000

there's always been criticism being there,

256

00:11:06,000 --> 00:11:08,000

and here they have the major official journal,

257

00:11:08,000 --> 00:11:10,000

you'll find them in several mythological journals,

258

00:11:10,000 --> 00:11:12,000

which are three to four,

259

00:11:12,000 --> 00:11:14,000

it's not all news, they've been flipping through now,

260

00:11:14,000 --> 00:11:16,000

we get into the references,

261

00:11:16,000 --> 00:11:18,000

there's no obvious funny way, but the references are there,

262

00:11:18,000 --> 00:11:20,000

and I spent days,

263

00:11:20,000 --> 00:11:22,000

when they'd be cut out four copies from Charles Ford

264

00:11:22,000 --> 00:11:24,000

and card index, and cut in half,

265

00:11:24,000 --> 00:11:26,000

and then we'd go take them all to nature,

266

00:11:26,000 --> 00:11:28,000

and those things that we're trying to take to the end of the system,

267

00:11:28,000 --> 00:11:30,000

on the card index tonight,

268

00:11:30,000 --> 00:11:32,000

and there are others that aren't sitting in the library,

269

00:11:32,000 --> 00:11:34,000

outside, they'll be nil for some time,

270

00:11:34,000 --> 00:11:36,000

you're asking for these different journals,

271

00:11:36,000 --> 00:11:38,000

talking to neighbors,

272

00:11:38,000 --> 00:11:40,000

and seeing if the things are ready in there,

273

00:11:40,000 --> 00:11:42,000

and they're there, all right,

274

00:11:42,000 --> 00:11:44,000

when I think they did fun enough,

275

00:11:44,000 --> 00:11:46,000

where there's the actual pages of these,

276

00:11:46,000 --> 00:11:48,000

more out of the journals, right in the public library,

277

00:11:48,000 --> 00:11:50,000

we had a sense of a fixed set for Thursday,

278

00:11:50,000 --> 00:11:52,000

before we could find the proper pagination

279

00:11:52,000 --> 00:11:54,000

for the first time in the world,

280

00:11:54,000 --> 00:11:56,000

and it was about 1870,

281

00:11:56,000 --> 00:11:58,000

they had a wonderful person called David Bruca,

282

00:11:58,000 --> 00:12:00,000

who I think had had a seemingly

283

00:12:00,000 --> 00:12:02,000

open mind to the better sense of that word,

284

00:12:02,000 --> 00:12:04,000

and he allowed these things to be published,

285

00:12:04,000 --> 00:12:08,000

but about that time he's been far

286

00:12:08,000 --> 00:12:10,000

or rather technologically

287

00:12:10,000 --> 00:12:12,000

giving going,

288

00:12:12,000 --> 00:12:14,000

becoming patronized,

289

00:12:14,000 --> 00:12:16,000

and you put the casting without the rise of technical focus.

290

00:12:16,000 --> 00:12:18,000

He understood the sense of this,

291

00:12:18,000 --> 00:12:20,000

and I'll talk about the series,

292

00:12:20,000 --> 00:12:22,000

the geological series,

293

00:12:22,000 --> 00:12:24,000

the door has been laid down,

294

00:12:24,000 --> 00:12:26,000

you put the subway out for another two million years,

295

00:12:26,000 --> 00:12:28,000

jammed in between the illigacy

296

00:12:28,000 --> 00:12:30,000

and the ear-sync,

297

00:12:30,000 --> 00:12:32,000

so without a whole picture,

298

00:12:32,000 --> 00:12:34,000

and until somebody could actually come up

299

00:12:34,000 --> 00:12:36,000

and show you, and you could rock a rock and wet in there,

300

00:12:36,000 --> 00:12:38,000

the thing is, it's not,

301

00:12:38,000 --> 00:12:40,000

in other words, it's a direct concentrate

302

00:12:40,000 --> 00:12:42,000

of what has to be done to get on with the technology.

303

00:12:42,000 --> 00:12:44,000

We can have fun and make things in forever,

304

00:12:44,000 --> 00:12:46,000

so we've got all the fun,

305

00:12:46,000 --> 00:12:48,000

and that seems to work.

306

00:12:48,000 --> 00:12:52,000

It's a purely historical gesture,

307

00:12:52,000 --> 00:12:54,000

as it were, now with great cause,

308

00:12:54,000 --> 00:12:56,000

and he's saying,

309

00:12:56,000 --> 00:12:58,000

well, I don't know,

310

00:12:58,000 --> 00:13:00,000

I'm sort of pontificating to the one thing now,

311

00:13:00,000 --> 00:13:02,000

but there isn't any reason for it to start

312

00:13:02,000 --> 00:13:04,000

as a methodology,

313

00:13:04,000 --> 00:13:06,000

in addition to being the investigation of the unknown,

314

00:13:06,000 --> 00:13:08,000

and I started to live again

315

00:13:08,000 --> 00:13:10,000

a thing like the occult

316

00:13:10,000 --> 00:13:12,000

received into the body of pure science,

317

00:13:12,000 --> 00:13:14,000

because I thought this was in the occult,

318

00:13:14,000 --> 00:13:16,000

and this is in everything,

319

00:13:16,000 --> 00:13:18,000

and then I might have to throw in

320

00:13:18,000 --> 00:13:20,000

one thing might be shorter,

321

00:13:20,000 --> 00:13:22,000

like the short way,

322

00:13:22,000 --> 00:13:24,000

but a lot of things are improbable,

323

00:13:24,000 --> 00:13:26,000

so I don't think anything is impossible.

324

00:13:26,000 --> 00:13:28,000

Now, the occult I don't think

325

00:13:28,000 --> 00:13:30,000

will be included in the science,

326

00:13:30,000 --> 00:13:32,000

but the courage is not open to measurement,

327

00:13:32,000 --> 00:13:34,000

which means in its widest sense,

328

00:13:34,000 --> 00:13:36,000

that if a man says,

329

00:13:36,000 --> 00:13:38,000

I have been built,

330

00:13:38,000 --> 00:13:40,000

then it's a vacuum of polio.

331

00:13:40,000 --> 00:13:42,000

Not only is it a vacuum,

332

00:13:42,000 --> 00:13:44,000

but it's a vacuum of polio,

333

00:13:44,000 --> 00:13:46,000

not only has that vacuum gone through,

334

00:13:46,000 --> 00:13:48,000

preventing polio,

335

00:13:48,000 --> 00:13:50,000

but somebody else,

336

00:13:50,000 --> 00:13:52,000

using his publishing to counter

337

00:13:52,000 --> 00:13:54,000

how he prepared that vaccine,

338

00:13:54,000 --> 00:13:56,000

has got to be able to serve in a normal time

339

00:13:56,000 --> 00:13:58,000

and place and come up with the same results.

340

00:13:58,000 --> 00:14:00,000

If now that it says,

341

00:14:00,000 --> 00:14:02,000

I saw a flying disk

342

00:14:04,000 --> 00:14:06,000

over all of you,

343

00:14:06,000 --> 00:14:08,000

at 9.10 on the 11th,

344

00:14:08,000 --> 00:14:10,000

if I must say,

345

00:14:10,000 --> 00:14:12,000

but if he's not a part of his statement,

346

00:14:12,000 --> 00:14:14,000

and so far,

347

00:14:14,000 --> 00:14:16,000

that you can't reproduce the disk

348

00:14:16,000 --> 00:14:18,000

of any other place at the same time,

349

00:14:18,000 --> 00:14:20,000

that's a pretty crude way of putting it,

350

00:14:20,000 --> 00:14:22,000

I'm pitching a rubber band

351

00:14:22,000 --> 00:14:24,000

as far as I can to try and make my point.

352

00:14:24,000 --> 00:14:26,000

Now, this is my size,

353

00:14:26,000 --> 00:14:28,000

you've got to be able to weigh and measure the oxygen,

354

00:14:28,000 --> 00:14:30,000

at least you've got to be able to reproduce it

355

00:14:30,000 --> 00:14:32,000

on the bar.

356

00:14:32,000 --> 00:14:34,000

Dr. J.B. Ryan ran into that great difficulty

357

00:14:34,000 --> 00:14:36,000

when he was working on the ST.

358

00:14:36,000 --> 00:14:38,000

He took it, come on,

359

00:14:38,000 --> 00:14:40,000

and go in without any kind of rigging out,

360

00:14:40,000 --> 00:14:42,000

and you put in depth into the statement,

361

00:14:42,000 --> 00:14:44,000

I'm not the following result,

362

00:14:44,000 --> 00:14:46,000

I'm not a participant

363

00:14:46,000 --> 00:14:48,000

within gentlemen sitting in front of me,

364

00:14:48,000 --> 00:14:50,000

and will it go in a room

365

00:14:50,000 --> 00:14:52,000

or in another room,

366

00:14:52,000 --> 00:14:54,000

or in a way,

367

00:14:54,000 --> 00:14:56,000

and then get out and work out in another experiment,

368

00:14:56,000 --> 00:14:58,000

and take those, and you can just make out,

369

00:14:58,000 --> 00:15:00,000

just to come out and do all.

370

00:15:00,000 --> 00:15:02,000

It's going to be very difficult in those border lines,

371

00:15:02,000 --> 00:15:04,000

in those occasions.

372

00:15:04,000 --> 00:15:06,000

However,

373

00:15:06,000 --> 00:15:08,000

with the autology,

374

00:15:08,000 --> 00:15:10,000

there's a lot of practical things in there.

375

00:15:10,000 --> 00:15:12,000

I believe it would essentially

376

00:15:12,000 --> 00:15:14,000

be subjected

377

00:15:14,000 --> 00:15:16,000

to a proper analysis

378

00:15:16,000 --> 00:15:18,000

and proper measurements in time

379

00:15:18,000 --> 00:15:20,000

if people could take them in seriously.

380

00:15:20,000 --> 00:15:22,000

I don't know whether

381

00:15:22,000 --> 00:15:24,000

any of the air forces,

382

00:15:24,000 --> 00:15:26,000

particularly the Swedes and the Prugies,

383

00:15:26,000 --> 00:15:28,000

I continue to stress

384

00:15:28,000 --> 00:15:30,000

that those very days in the world

385

00:15:30,000 --> 00:15:32,000

are becoming so very, very numerous.

386

00:15:32,000 --> 00:15:34,000

I know that the British

387

00:15:34,000 --> 00:15:36,000

have grabbed a lot of

388

00:15:36,000 --> 00:15:38,000

the same substance as the four Nuttams

389

00:15:38,000 --> 00:15:40,000

and the guys, which is very complex reports of it,

390

00:15:40,000 --> 00:15:42,000

and I think they are also pretty interested

391

00:15:42,000 --> 00:15:44,000

in that day when the game gets credit to our air forces

392

00:15:44,000 --> 00:15:46,000

and having come out and done something about it.

393

00:15:46,000 --> 00:15:48,000

I don't think that this is enough to be

394

00:15:48,000 --> 00:15:50,000

just recovering us.

395

00:15:50,000 --> 00:15:52,000

Anything is the other way, they've got a wonderful job

396

00:15:52,000 --> 00:15:54,000

trying to find out something

397

00:15:54,000 --> 00:15:56,000

and putting out these beautiful forms.

398

00:15:56,000 --> 00:15:58,000

So we can come to those in detail

399

00:15:58,000 --> 00:16:00,000

with our dryers and fix up the mess.

400

00:16:00,000 --> 00:16:02,000

But we have an over-route,

401

00:16:02,000 --> 00:16:04,000

one major fact in trying to be

402

00:16:04,000 --> 00:16:06,000

what I'd like to call

403

00:16:06,000 --> 00:16:08,000

scientific about this,

404

00:16:08,000 --> 00:16:10,000

is the objective and module for that.

405

00:16:10,000 --> 00:16:12,000

And then I was asking about

406

00:16:12,000 --> 00:16:14,000

what the previous ideas

407

00:16:14,000 --> 00:16:16,000

and all of them that I've heard on your program recently

408

00:16:16,000 --> 00:16:18,000

have been.

409

00:16:18,000 --> 00:16:20,000

I did, as doing some physics

410

00:16:20,000 --> 00:16:22,000

with a little bit of chemistry,

411

00:16:22,000 --> 00:16:24,000

a great deal of the Kirtan Dagger stuff

412

00:16:24,000 --> 00:16:26,000

and a lot of publishing business

413

00:16:26,000 --> 00:16:28,000

and all of it.

414

00:16:28,000 --> 00:16:30,000

Not one single person

415

00:16:30,000 --> 00:16:32,000

has already used their mind

416

00:16:32,000 --> 00:16:34,000

to set down

417

00:16:34,000 --> 00:16:36,000

but it nearly will end up with these things.

418

00:16:36,000 --> 00:16:38,000

Now, are you thinking of me to jump

419

00:16:38,000 --> 00:16:40,000

right off the surface of Merck?

420

00:16:40,000 --> 00:16:42,000

You're taking me outside

421

00:16:42,000 --> 00:16:44,000

for the comrades here.

422

00:16:44,000 --> 00:16:46,000

We're not too far away from the

423

00:16:46,000 --> 00:16:48,000

town pipe.

424

00:16:48,000 --> 00:16:50,000

I'm going to be over at the spoil

425

00:16:50,000 --> 00:16:52,000

despite all the oil

426

00:16:52,000 --> 00:16:54,000

and the very...

427

00:16:54,000 --> 00:16:56,000

You don't keep me up.

428

00:16:56,000 --> 00:16:58,000

Any cubing get out of the spoil.

429

00:16:58,000 --> 00:17:00,000

I take you further than that,

430

00:17:00,000 --> 00:17:02,000

give it to me to take a little

431

00:17:02,000 --> 00:17:04,000

of a lap

432

00:17:04,000 --> 00:17:06,000

and give me a little bit of money

433

00:17:06,000 --> 00:17:08,000

to take some technicians.

434

00:17:08,000 --> 00:17:10,000

To examine that,

435

00:17:10,000 --> 00:17:12,000

you make a yard of soil

436

00:17:12,000 --> 00:17:14,000

into the yard in a cubing yard.

437

00:17:14,000 --> 00:17:16,000

Yon, yon, yon.

438

00:17:16,000 --> 00:17:18,000

I can, I think I'm right,

439

00:17:18,000 --> 00:17:20,000

say and pathologist

440

00:17:20,000 --> 00:17:22,000

and say another biologist

441

00:17:22,000 --> 00:17:24,000

would start making correct answers.

442

00:17:24,000 --> 00:17:26,000

I would say there are 10,000 different kinds

443

00:17:26,000 --> 00:17:28,000

of life forms in that

444

00:17:28,000 --> 00:17:30,000

little bit of soil.

445

00:17:30,000 --> 00:17:32,000

The time it's taken of bacteria

446

00:17:32,000 --> 00:17:34,000

and the little worm, the little

447

00:17:34,000 --> 00:17:36,000

insect, the egg, the

448

00:17:36,000 --> 00:17:38,000

fungus, and all the rest of it.

449

00:17:38,000 --> 00:17:40,000

We're not planning on exaggerating.

450

00:17:40,000 --> 00:17:42,000

I don't know, I may be taking touch with that.

451

00:17:42,000 --> 00:17:44,000

But there are tons of different kinds

452

00:17:44,000 --> 00:17:46,000

of life forms living right in

453

00:17:46,000 --> 00:17:48,000

that one little bit of soil.

454

00:17:48,000 --> 00:17:50,000

However, the different life forms

455

00:17:50,000 --> 00:17:52,000

of the certain are absolutely

456

00:17:52,000 --> 00:17:54,000

incredible.

457

00:17:54,000 --> 00:17:56,000

There are about a million

458

00:17:56,000 --> 00:17:58,000

species of living animals

459

00:17:58,000 --> 00:18:00,000

which have Latin names already.

460

00:18:00,000 --> 00:18:02,000

The entomologist,

461

00:18:02,000 --> 00:18:04,000

there is this one

462

00:18:04,000 --> 00:18:06,000

kind of, the insect people,

463

00:18:06,000 --> 00:18:08,000

insect or worm, my German,

464

00:18:08,000 --> 00:18:10,000

talking of crustaceans, all the spiving

465

00:18:10,000 --> 00:18:12,000

groups, the arachnids, all the psychophies

466

00:18:12,000 --> 00:18:14,000

which all enjoyed this lady, the animal.

467

00:18:14,000 --> 00:18:16,000

The insect or worm are half

468

00:18:16,000 --> 00:18:18,000

that number, at 500 miles.

469

00:18:18,000 --> 00:18:20,000

And the entomologist is sure that

470

00:18:20,000 --> 00:18:22,000

we've got about one night of those

471

00:18:22,000 --> 00:18:24,000

yet to be discovered on the surface of the Earth.

472

00:18:24,000 --> 00:18:26,000

That's the insect or worm.

473

00:18:26,000 --> 00:18:28,000

The 35,000 species of

474

00:18:28,000 --> 00:18:30,000

nerve species of beetles and the

475

00:18:30,000 --> 00:18:32,000

bicherole or worm.

476

00:18:32,000 --> 00:18:34,000

I may as well just to know that there are

477

00:18:34,000 --> 00:18:36,000

822

478

00:18:36,000 --> 00:18:38,000

species and such species

479

00:18:38,000 --> 00:18:40,000

of mammals indigenous to

480

00:18:40,000 --> 00:18:42,000

North America and the United States

481

00:18:42,000 --> 00:18:44,000

that would germinate a rat.

482

00:18:44,000 --> 00:18:46,000

A rat in the wild just a rat in the wild.

483

00:18:46,000 --> 00:18:48,000

Well,

484

00:18:48,000 --> 00:18:50,000

the business, business of

485

00:18:50,000 --> 00:18:52,000

UFOs,

486

00:18:52,000 --> 00:18:54,000

they have I think is that

487

00:18:54,000 --> 00:18:56,000

pinecone is this and that.

488

00:18:56,000 --> 00:18:58,000

They are propelled

489

00:18:58,000 --> 00:19:00,000

on precious, immutable, different

490

00:19:00,000 --> 00:19:02,000

kinds and different origins

491

00:19:02,000 --> 00:19:04,000

that it will take an enormous

492

00:19:04,000 --> 00:19:06,000

style

493

00:19:06,000 --> 00:19:08,000

to do anything about it.

494

00:19:08,000 --> 00:19:10,000

It's a big example of these two things.

495

00:19:10,000 --> 00:19:12,000

And I absolutely refuse to

496

00:19:12,000 --> 00:19:14,000

give any opinion.

497

00:19:14,000 --> 00:19:16,000

I do not want to come out of the other one.

498

00:19:16,000 --> 00:19:18,000

To say that they are, I certainly will

499

00:19:18,000 --> 00:19:20,000

definitely say that not only one thing,

500

00:19:20,000 --> 00:19:22,000

but all two things, they are probably

501

00:19:22,000 --> 00:19:24,000

hundreds.

502

00:19:24,000 --> 00:19:26,000

I have a

503

00:19:26,000 --> 00:19:28,000

little while to answer on this, John.

504

00:19:28,000 --> 00:19:30,000

We were talking about some interesting things

505

00:19:30,000 --> 00:19:32,000

of different species coming out here tonight.

506

00:19:32,000 --> 00:19:34,000

I thought the final step

507

00:19:34,000 --> 00:19:36,000

of UFOs, third round,

508

00:19:36,000 --> 00:19:38,000

I'm sure, that you've ever seen right here.

509

00:19:40,000 --> 00:19:42,000

With and I hope to make a point that I have been working

510

00:19:42,000 --> 00:19:44,000

on to get what it says.

511

00:19:44,000 --> 00:19:46,000

If you haven't, don't give it away

512

00:19:46,000 --> 00:19:48,000

to your listeners. I'm going to show you

513

00:19:48,000 --> 00:19:50,000

a rather than a third order.

514

00:19:50,000 --> 00:19:52,000

They are set up on cards

515

00:19:52,000 --> 00:19:54,000

and we have students

516

00:19:54,000 --> 00:19:56,000

who have to do the video as well as the audio right here.

517

00:19:56,000 --> 00:19:58,000

They're set up on cards

518

00:19:58,000 --> 00:20:00,000

with a piece of

519

00:20:00,000 --> 00:20:02,000

a little window cut in the cover

520

00:20:02,000 --> 00:20:04,000

and I want to show you

521

00:20:04,000 --> 00:20:06,000

for them to you at the time

522

00:20:06,000 --> 00:20:08,000

and if you have any of Barlin's comments

523

00:20:08,000 --> 00:20:10,000

make them. But I'll turn you off

524

00:20:10,000 --> 00:20:12,000

and I think you're going the wrong way.

525

00:20:12,000 --> 00:20:14,000

It's a devastating point.

526

00:20:14,000 --> 00:20:16,000

They're talking to Sylvia and Burt

527

00:20:16,000 --> 00:20:18,000

who are about to

528

00:20:18,000 --> 00:20:20,000

do the job.

529

00:20:20,000 --> 00:20:22,000

If you want to make any comments, that is a

530

00:20:22,000 --> 00:20:24,000

close and ordinary.

531

00:20:24,000 --> 00:20:26,000

I would say it's a damper to do

532

00:20:26,000 --> 00:20:28,000

a little round things underneath.

533

00:20:28,000 --> 00:20:30,000

Let me look at you.

534

00:20:30,000 --> 00:20:32,000

These are what you would call

535

00:20:32,000 --> 00:20:34,000

reliable, but kind of just fine.

536

00:20:34,000 --> 00:20:36,000

No, I consider that they're reliable

537

00:20:36,000 --> 00:20:38,000

and already accomplished very well.

538

00:20:38,000 --> 00:20:40,000

I imagine the Air Force

539

00:20:40,000 --> 00:20:42,000

must be in the may have found

540

00:20:42,000 --> 00:20:44,000

they may not have the money to get out of it.

541

00:20:44,000 --> 00:20:46,000

I think one of the jobs which has

542

00:20:46,000 --> 00:20:48,000

used to be possible or on the side

543

00:20:48,000 --> 00:20:50,000

I think they're going to do

544

00:20:50,000 --> 00:20:52,000

something you think.

545

00:20:52,000 --> 00:20:54,000

All right.

546

00:20:54,000 --> 00:20:56,000

What do you think that is?

547

00:20:56,000 --> 00:20:58,000

These are some

548

00:20:58,000 --> 00:21:00,000

particular

549

00:21:00,000 --> 00:21:02,000

although they look like they're not.

550

00:21:02,000 --> 00:21:04,000

They're connected.

551

00:21:04,000 --> 00:21:06,000

They're part of the next line there.

552

00:21:06,000 --> 00:21:08,000

Now here the photograph is the same

553

00:21:08,000 --> 00:21:10,000

I've been taking with

554

00:21:10,000 --> 00:21:12,000

Yenka Red and I think in another

555

00:21:12,000 --> 00:21:14,000

there one of them is nice and close.

556

00:21:14,000 --> 00:21:16,000

Oh, I'm so contented to

557

00:21:16,000 --> 00:21:18,000

do this.

558

00:21:18,000 --> 00:21:20,000

There's another one.

559

00:21:20,000 --> 00:21:22,000

There's

560

00:21:22,000 --> 00:21:24,000

that's the sightings of first things

561

00:21:24,000 --> 00:21:26,000

being done in Florida.

562

00:21:26,000 --> 00:21:28,000

The only comment I can make at the moment

563

00:21:28,000 --> 00:21:30,000

is I've never seen any pictures

564

00:21:30,000 --> 00:21:32,000

like these, any photograph

565

00:21:32,000 --> 00:21:34,000

as far as flying properties that can

566

00:21:34,000 --> 00:21:36,000

see. Doesn't that look like

567

00:21:36,000 --> 00:21:38,000

a rampage?

568

00:21:38,000 --> 00:21:40,000

That's nice.

569

00:21:40,000 --> 00:21:42,000

The one that's been

570

00:21:42,000 --> 00:21:44,000

the four slides was the one

571

00:21:44,000 --> 00:21:46,000

that I guess

572

00:21:46,000 --> 00:21:48,000

you might even call a

573

00:21:48,000 --> 00:21:50,000

King Kong man

574

00:21:50,000 --> 00:21:52,000

they have a

575

00:21:52,000 --> 00:21:54,000

yeah, I'd like to

576

00:21:54,000 --> 00:21:56,000

he's my

577

00:21:56,000 --> 00:21:58,000

to the cake in this, not a trick

578

00:21:58,000 --> 00:22:00,000

do you remember the

579

00:22:00,000 --> 00:22:02,000

case where the little things

580

00:22:02,000 --> 00:22:04,000

came out all that

581

00:22:04,000 --> 00:22:06,000

that Michelle mentioned

582

00:22:06,000 --> 00:22:08,000

in his book, do you remember that?

583

00:22:08,000 --> 00:22:10,000

How did you know that?

584

00:22:10,000 --> 00:22:12,000

Did you remember

585

00:22:12,000 --> 00:22:14,000

that that's any closer than the

586

00:22:14,000 --> 00:22:16,000

that's in the age of 10, a lot of it

587

00:22:16,000 --> 00:22:18,000

of course.

588

00:22:18,000 --> 00:22:20,000

There's IFC

589

00:22:20,000 --> 00:22:22,000

some of the ones that put around

590

00:22:22,000 --> 00:22:24,000

the thing that was in there they can see

591

00:22:24,000 --> 00:22:26,000

part of it is the government still

592

00:22:26,000 --> 00:22:28,000

the color one was taken by the

593

00:22:28,000 --> 00:22:30,000

the round one thing

594

00:22:30,000 --> 00:22:32,000

that will be a different way

595

00:22:32,000 --> 00:22:34,000

now you can take the last one.

596

00:22:34,000 --> 00:22:36,000

Well

597

00:22:36,000 --> 00:22:38,000

I'm guessing

598

00:22:38,000 --> 00:22:40,000

I did see a photograph

599

00:22:40,000 --> 00:22:42,000

of

600

00:22:42,000 --> 00:22:44,000

a plane or an airplane

601

00:22:44,000 --> 00:22:46,000

either the

602

00:22:46,000 --> 00:22:48,000

the other one.

603

00:22:48,000 --> 00:22:50,000

Open up the 12th

604

00:22:50,000 --> 00:22:52,000

which one I don't want to be too, I don't want to open

605

00:22:52,000 --> 00:22:54,000

I want to see if I have to make a

606

00:22:54,000 --> 00:22:56,000

guess which one I have

607

00:22:56,000 --> 00:22:58,000

the many names

608

00:22:58,000 --> 00:23:00,000

are complicated now in the bottom

609

00:23:00,000 --> 00:23:02,000

the first one that I showed

610

00:23:02,000 --> 00:23:04,000

is the photo

611

00:23:04,000 --> 00:23:06,000

the photo shape of the

612

00:23:06,000 --> 00:23:08,000

the background

613

00:23:08,000 --> 00:23:10,000

with the few little round things

614

00:23:10,000 --> 00:23:12,000

underneath

615

00:23:12,000 --> 00:23:14,000

the second one I think is this one

616

00:23:14,000 --> 00:23:16,000

which is a very little

617

00:23:16,000 --> 00:23:18,000

light from the Hades

618

00:23:18,000 --> 00:23:20,000

in a circle

619

00:23:20,000 --> 00:23:22,000

a little piece coming out

620

00:23:22,000 --> 00:23:24,000

now I've got most of these matched

621

00:23:24,000 --> 00:23:26,000

to various types

622

00:23:26,000 --> 00:23:28,000

I think

623

00:23:28,000 --> 00:23:30,000

those were there, I'm not

624

00:23:30,000 --> 00:23:32,000

going to be describing them, they are

625

00:23:32,000 --> 00:23:34,000

all limited looking objects

626

00:23:34,000 --> 00:23:36,000

but a dark brown

627

00:23:36,000 --> 00:23:38,000

I have now our stars and

628

00:23:38,000 --> 00:23:40,000

we will open them up and

629

00:23:40,000 --> 00:23:42,000

we will not close them

630

00:23:42,000 --> 00:23:44,000

out of a limited animal

631

00:23:44,000 --> 00:23:46,000

none of them are very small size

632

00:23:46,000 --> 00:23:48,000

just one 8 or 9

633

00:23:48,000 --> 00:23:50,000

nearly all in one size

634

00:23:50,000 --> 00:23:52,000

but at the same time

635

00:23:52,000 --> 00:23:54,000

now this green little dot

636

00:23:54,000 --> 00:23:56,000

is actually a kind of brown

637

00:23:56,000 --> 00:23:58,000

the female

638

00:23:58,000 --> 00:24:00,000

of the people starting

639

00:24:00,000 --> 00:24:02,000

with the insubvent

640

00:24:02,000 --> 00:24:04,000

has red and green light

641

00:24:04,000 --> 00:24:06,000

and it's going to pop into a fucking go cloud

642

00:24:06,000 --> 00:24:08,000

so if we have turned around and taken

643

00:24:08,000 --> 00:24:10,000

it full-time and all your pieces

644

00:24:10,000 --> 00:24:12,000

will be applied now

645

00:24:12,000 --> 00:24:14,000

this shape on each ear

646

00:24:14,000 --> 00:24:16,000

which looks very well like my dance

647

00:24:16,000 --> 00:24:18,000

it's further up like a rounder light

648

00:24:18,000 --> 00:24:20,000

turns out to be a very small coefficient

649

00:24:20,000 --> 00:24:22,000

of a shine which is kind of a sea

650

00:24:22,000 --> 00:24:24,000

ball of the church in this hand

651

00:24:24,000 --> 00:24:26,000

it happens to Ruben S

652

00:24:26,000 --> 00:24:28,000

but nice, he's giving me Ruben S

653

00:24:28,000 --> 00:24:30,000

now I'm not bringing these things out

654

00:24:30,000 --> 00:24:32,000

to try and differentiate

655

00:24:32,000 --> 00:24:34,000

don't care about these

656

00:24:34,000 --> 00:24:36,000

or about that

657

00:24:36,000 --> 00:24:38,000

I'm not bringing them out to try and say

658

00:24:38,000 --> 00:24:40,000

that the

659

00:24:40,000 --> 00:24:42,000

when it got

660

00:24:42,000 --> 00:24:44,000

shown to you

661

00:24:44,000 --> 00:24:46,000

was they

662

00:24:46,000 --> 00:24:48,000

all that they picked them by

663

00:24:48,000 --> 00:24:50,000

brush dropping these small luminous animals

664

00:24:50,000 --> 00:24:52,000

which are in every sea

665

00:24:52,000 --> 00:24:54,000

and are wood under a microscope

666

00:24:54,000 --> 00:24:56,000

and then giving those brush drops luminous animals

667

00:24:56,000 --> 00:24:58,000

to them at the flying saucer

668

00:24:58,000 --> 00:25:00,000

and these they've published in any of the

669

00:25:00,000 --> 00:25:02,000

flying saucer books

670

00:25:02,000 --> 00:25:04,000

because those flying saucers

671

00:25:04,000 --> 00:25:06,000

will never come to the woman's Williams

672

00:25:06,000 --> 00:25:08,000

they have never come to the

673

00:25:08,000 --> 00:25:10,000

biological aspect of the thing

674

00:25:10,000 --> 00:25:12,000

now these two here

675

00:25:14,000 --> 00:25:16,000

I guess one that if I were

676

00:25:16,000 --> 00:25:18,000

getting this correctly

677

00:25:18,000 --> 00:25:20,000

are these photographs

678

00:25:20,000 --> 00:25:22,000

of 8 baby

679

00:25:22,000 --> 00:25:24,000

no, you may

680

00:25:24,000 --> 00:25:26,000

this here

681

00:25:26,000 --> 00:25:28,000

looking to me is like

682

00:25:28,000 --> 00:25:30,000

the face

683

00:25:30,000 --> 00:25:32,000

of an egg feeder

684

00:25:32,000 --> 00:25:34,000

possibly set up on

685

00:25:34,000 --> 00:25:36,000

a piece of black velvet

686

00:25:36,000 --> 00:25:38,000

or a photographic black paper

687

00:25:38,000 --> 00:25:40,000

and just some light

688

00:25:40,000 --> 00:25:42,000

short cuts

689

00:25:42,000 --> 00:25:44,000

and then there's the

690

00:25:44,000 --> 00:25:46,000

the third round

691

00:25:46,000 --> 00:25:48,000

with a piece of brown paper

692

00:25:48,000 --> 00:25:50,000

over that card

693

00:25:50,000 --> 00:25:52,000

with a window cabinet

694

00:25:52,000 --> 00:25:54,000

and a little bit of a

695

00:25:54,000 --> 00:25:56,000

one-third of a photograph of a series

696

00:25:56,000 --> 00:25:58,000

or part of a photograph

697

00:25:58,000 --> 00:26:00,000

by Daniel

698

00:26:00,000 --> 00:26:02,000

the brown paper

699

00:26:02,000 --> 00:26:04,000

you can see what they really are

700

00:26:04,000 --> 00:26:06,000

they are painted taken out of

701

00:26:06,000 --> 00:26:08,000

Dr. Harvey's book on animal life

702

00:26:08,000 --> 00:26:10,000

and they are all

703

00:26:10,000 --> 00:26:12,000

animal-informed vegetables

704

00:26:12,000 --> 00:26:14,000

which is luminous

705

00:26:14,000 --> 00:26:16,000

besides the chemiluminescence

706

00:26:16,000 --> 00:26:18,000

as a good example

707

00:26:18,000 --> 00:26:20,000

of the very small

708

00:26:20,000 --> 00:26:22,000

and legitimate nature

709

00:26:22,000 --> 00:26:24,000

they have in every way

710

00:26:24,000 --> 00:26:26,000

the appearance

711

00:26:26,000 --> 00:26:28,000

of many of the descriptions

712

00:26:28,000 --> 00:26:30,000

of different types

713

00:26:30,000 --> 00:26:32,000

of UFOs

714

00:26:32,000 --> 00:26:34,000

now I'm not saying the photographs

715

00:26:34,000 --> 00:26:36,000

of UFOs that have been visited by such gentlemen

716

00:26:36,000 --> 00:26:38,000

but for that reason

717

00:26:38,000 --> 00:26:40,000

our photographs of this nature

718

00:26:40,000 --> 00:26:42,000

we have gotten in front of it

719

00:26:42,000 --> 00:26:44,000

two times

720

00:26:44,000 --> 00:26:46,000

or two measures by which

721

00:26:46,000 --> 00:26:48,000

the photographs could be

722

00:26:48,000 --> 00:26:50,000

taken out of the picture

723

00:26:50,000 --> 00:26:52,000

and a few at this point

724

00:26:52,000 --> 00:26:54,000

they went and I think the third round

725

00:26:54,000 --> 00:26:56,000

was printed or otherwise

726

00:26:56,000 --> 00:26:58,000

are faked wrong now

727

00:26:58,000 --> 00:27:00,000

that's another whole subject which I would like to get on

728

00:27:00,000 --> 00:27:02,000

if I may

729

00:27:02,000 --> 00:27:04,000

I hope I've got

730

00:27:04,000 --> 00:27:06,000

you and I hope I've got

731

00:27:06,000 --> 00:27:08,000

a hundred or millions of listeners

732

00:27:08,000 --> 00:27:10,000

to try and approach that

733

00:27:10,000 --> 00:27:12,000

and I hope to do this also

734

00:27:12,000 --> 00:27:14,000

a logical

735

00:27:14,000 --> 00:27:16,000

I pointed out that life on a certain

736

00:27:16,000 --> 00:27:18,000

ground level

737

00:27:18,000 --> 00:27:20,000

has been numbered before

738

00:27:20,000 --> 00:27:22,000

and if you go on and on

739

00:27:22,000 --> 00:27:24,000

there are millions of life forms

740

00:27:24,000 --> 00:27:26,000

but even now

741

00:27:26,000 --> 00:27:28,000

I've shown you things here

742

00:27:28,000 --> 00:27:30,000

which I've shown you never seen before

743

00:27:30,000 --> 00:27:32,000

but now I had it out of shape

744

00:27:32,000 --> 00:27:34,000

they are called radios in

745

00:27:34,000 --> 00:27:36,000

Zoria

746

00:27:36,000 --> 00:27:38,000

there's a huge group

747

00:27:38,000 --> 00:27:40,000

of single-billed animals

748

00:27:40,000 --> 00:27:42,000

which are found in every drop of water

749

00:27:42,000 --> 00:27:44,000

that's used in the world

750

00:27:44,000 --> 00:27:46,000

and in any plastic cup

751

00:27:46,000 --> 00:27:48,000

and in the drop of a bit more than you see

752

00:27:48,000 --> 00:27:50,000

cylinder

753

00:27:50,000 --> 00:27:52,000

and then there's no even form

754

00:27:52,000 --> 00:27:54,000

but

755

00:27:54,000 --> 00:27:56,000

trying everything

756

00:27:56,000 --> 00:27:58,000

yes, little photo like a child

757

00:27:58,000 --> 00:28:00,000

little play like a kid

758

00:28:00,000 --> 00:28:02,000

make some little blood and have a little bit of play this minute

759

00:28:02,000 --> 00:28:04,000

there's a little blind spot

760

00:28:04,000 --> 00:28:06,000

there's no red color

761

00:28:06,000 --> 00:28:08,000

the red circle

762

00:28:08,000 --> 00:28:10,000

there's big mediums

763

00:28:10,000 --> 00:28:12,000

it is suitable for an animal

764

00:28:12,000 --> 00:28:14,000

to adopt the most perfect of all forms

765

00:28:14,000 --> 00:28:16,000

is the goblin form

766

00:28:16,000 --> 00:28:18,000

the purpose is a local motion

767

00:28:18,000 --> 00:28:20,000

of a particle going up and down

768

00:28:20,000 --> 00:28:22,000

and they become compressed

769

00:28:22,000 --> 00:28:24,000

the purpose of other forms is right aside

770

00:28:24,000 --> 00:28:26,000

then comes the question of

771

00:28:26,000 --> 00:28:28,000

the stress of the structure

772

00:28:28,000 --> 00:28:30,000

the randomness one

773

00:28:30,000 --> 00:28:32,000

is just going to do it out like an amoeba

774

00:28:32,000 --> 00:28:34,000

if they want to retain some kind of form

775

00:28:34,000 --> 00:28:36,000

they will probably become

776

00:28:36,000 --> 00:28:38,000

hexagonal, triangular

777

00:28:38,000 --> 00:28:40,000

so they get e drone

778

00:28:40,000 --> 00:28:42,000

hexagonal

779

00:28:42,000 --> 00:28:44,000

e drone

780

00:28:44,000 --> 00:28:46,000

various geometric shapes

781

00:28:46,000 --> 00:28:48,000

and these four animals

782

00:28:48,000 --> 00:28:50,000

are used about the plankton of this

783

00:28:50,000 --> 00:28:52,000

which we may all have to feed on one day

784

00:28:52,000 --> 00:28:54,000

which we all feed on

785

00:28:54,000 --> 00:28:56,000

which most fishes feed on it

786

00:28:56,000 --> 00:28:58,000

made up of millions of these little diamonds

787

00:28:58,000 --> 00:29:00,000

and they are the most wonderful little shapes

788

00:29:00,000 --> 00:29:02,000

because they float and spend it

789

00:29:02,000 --> 00:29:04,000

in the water

790

00:29:04,000 --> 00:29:06,000

and they take

791

00:29:06,000 --> 00:29:08,000

so long to sink and they never get anywhere to be the main

792

00:29:08,000 --> 00:29:10,000

and their whole life cycle is

793

00:29:10,000 --> 00:29:12,000

passed through

794

00:29:12,000 --> 00:29:14,000

in the thinking of a few feet perhaps

795

00:29:14,000 --> 00:29:16,000

sometimes the year when the sea goes green

796

00:29:16,000 --> 00:29:18,000

when lakes start to go sort of reddish

797

00:29:18,000 --> 00:29:20,000

that is when you have a little bit of a clutch

798

00:29:20,000 --> 00:29:22,000

of maybe bacteria or enthusiasm

799

00:29:22,000 --> 00:29:24,000

or one of these small

800

00:29:24,000 --> 00:29:26,000

turtles there

801

00:29:26,000 --> 00:29:28,000

a type animal

802

00:29:28,000 --> 00:29:30,000

or bacteria in some cases

803

00:29:30,000 --> 00:29:32,000

sort of a little bit of bacteria

804

00:29:32,000 --> 00:29:34,000

you know it is your refrigerator

805

00:29:34,000 --> 00:29:36,000

and some of the fishes that you've got in there

806

00:29:36,000 --> 00:29:38,000

they grow very happily in the dark

807

00:29:38,000 --> 00:29:40,000

I have a little on the experiment

808

00:29:40,000 --> 00:29:42,000

there is a type of bacteria

809

00:29:42,000 --> 00:29:44,000

which is module in the fishes scale

810

00:29:44,000 --> 00:29:46,000

those individual little bacteria

811

00:29:46,000 --> 00:29:48,000

those small egg mathematicians

812

00:29:48,000 --> 00:29:50,000

we cannot feed close to the naked eye

813

00:29:50,000 --> 00:29:52,000

you have to get quite a powerful

814

00:29:52,000 --> 00:29:54,000

like a certainty each individual little one

815

00:29:54,000 --> 00:29:56,000

they put out a continuous

816

00:29:56,000 --> 00:29:58,000

total right

817

00:29:58,000 --> 00:30:00,000

throughout their kind of little lives

818

00:30:00,000 --> 00:30:02,000

which in the portion of their size

819

00:30:02,000 --> 00:30:04,000

is about 400 times

820

00:30:04,000 --> 00:30:06,000

that of the power of using the New York City

821

00:30:06,000 --> 00:30:08,000

nature

822

00:30:08,000 --> 00:30:10,000

is a very very wonderful thing now

823

00:30:10,000 --> 00:30:12,000

I'm coming to my point

824

00:30:12,000 --> 00:30:14,000

why brought these things up

825

00:30:14,000 --> 00:30:16,000

but to point out

826

00:30:16,000 --> 00:30:18,000

that the biologist does not have to say

827

00:30:18,000 --> 00:30:20,000

in his use of business

828

00:30:20,000 --> 00:30:22,000

neither gives credit to a British gentleman

829

00:30:22,000 --> 00:30:24,000

who I've never met

830

00:30:24,000 --> 00:30:26,000

I don't know who he is or where he is

831

00:30:26,000 --> 00:30:28,000

his name is spelled Z-O-E

832

00:30:28,000 --> 00:30:30,000

which I understand is the Polish way of saying show

833

00:30:30,000 --> 00:30:32,000

uh

834

00:30:32,000 --> 00:30:34,000

West Oakland W-A-S-I-L-K-O

835

00:30:34,000 --> 00:30:38,000

I'm from the Zelenki S-E-R-E-C-K-I

836

00:30:38,000 --> 00:30:40,000

I have close to five years

837

00:30:40,000 --> 00:30:42,000

I spoke a couple of times on the air

838

00:30:42,000 --> 00:30:44,000

I was very panc-discharred

839

00:30:44,000 --> 00:30:46,000

this gentleman has developed a theory

840

00:30:46,000 --> 00:30:48,000

and I give full credit to him

841

00:30:48,000 --> 00:30:50,000

before bringing it to my attention

842

00:30:50,000 --> 00:30:52,000

I've been working on this for years

843

00:30:52,000 --> 00:30:54,000

but when I've been working on it I've been

844

00:30:54,000 --> 00:30:56,000

thinking about the aspects of this

845

00:30:56,000 --> 00:30:58,000

and putting them down in those subjects

846

00:30:58,000 --> 00:31:00,000

to be quick

847

00:31:00,000 --> 00:31:02,000

material

848

00:31:02,000 --> 00:31:04,000

last on the other hand

849

00:31:04,000 --> 00:31:06,000

is half on matter

850

00:31:06,000 --> 00:31:08,000

half on energy

851

00:31:08,000 --> 00:31:10,000

they take such a big, invigorated ball

852

00:31:10,000 --> 00:31:12,000

out of the soil

853

00:31:12,000 --> 00:31:14,000

through their roots

854

00:31:14,000 --> 00:31:16,000

and they take and they combine sunlight

855

00:31:16,000 --> 00:31:18,000

where you can solar fill

856

00:31:18,000 --> 00:31:20,000

and the energy of the sunlight

857

00:31:20,000 --> 00:31:22,000

combining the chemical to build up

858

00:31:22,000 --> 00:31:24,000

their boot-nuggets

859

00:31:24,000 --> 00:31:26,000

which they build their bodies

860

00:31:26,000 --> 00:31:28,000

so we have life forms in the best of the best

861

00:31:28,000 --> 00:31:30,000

for half-native half-energy

862

00:31:30,000 --> 00:31:32,000

now

863

00:31:32,000 --> 00:31:34,000

it is nothing impossible in nature

864

00:31:34,000 --> 00:31:36,000

it is a great business

865

00:31:36,000 --> 00:31:38,000

that is highly probable

866

00:31:38,000 --> 00:31:40,000

that it could be life-sort

867

00:31:40,000 --> 00:31:42,000

and I'll talk about animals, or viruses, or plants

868

00:31:42,000 --> 00:31:44,000

but another type of form

869

00:31:44,000 --> 00:31:46,000

but another type of form

870

00:31:46,000 --> 00:31:48,000

life forms which means it's a good thing to be on energy

871

00:31:48,000 --> 00:31:50,000

where is energy

872

00:31:50,000 --> 00:31:52,000

of certain kinds to be obtained in

873

00:31:52,000 --> 00:31:54,000

pure form on a good old matter of energy

874

00:31:54,000 --> 00:31:56,000

basically

875

00:31:56,000 --> 00:31:58,000

we are finding out now with our fusion

876

00:31:58,000 --> 00:32:00,000

and our station's bottles

877

00:32:00,000 --> 00:32:02,000

they can all have a lot of power

878

00:32:02,000 --> 00:32:04,000

to get the amount of energy out of matter

879

00:32:04,000 --> 00:32:06,000

or put it back in

880

00:32:06,000 --> 00:32:08,000

and gather it together to get in

881

00:32:08,000 --> 00:32:10,000

to make them have a stick together

882

00:32:10,000 --> 00:32:12,000

where is the last free energy

883

00:32:12,000 --> 00:32:14,000

of certain kinds

884

00:32:14,000 --> 00:32:16,000

available

885

00:32:16,000 --> 00:32:18,000

at the other limit of our active spirit

886

00:32:18,000 --> 00:32:20,000

where such energy is

887

00:32:20,000 --> 00:32:22,000

pouring upon us from the sun

888

00:32:22,000 --> 00:32:24,000

and for many other sources

889

00:32:24,000 --> 00:32:26,000

we find now from our radio astronomy

890

00:32:26,000 --> 00:32:28,000

this is very relevant

891

00:32:28,000 --> 00:32:30,000

the initial suggestion was

892

00:32:30,000 --> 00:32:32,000

that the maybe life forms

893

00:32:32,000 --> 00:32:34,000

living out there of a high tenuous nature

894

00:32:34,000 --> 00:32:36,000

which has

895

00:32:36,000 --> 00:32:38,000

an explosion of the radar type thing

896

00:32:38,000 --> 00:32:40,000

which for some reason

897

00:32:40,000 --> 00:32:42,000

and I think he has good reasons to say this

898

00:32:42,000 --> 00:32:44,000

but I just have a lot to try and go into the technicality

899

00:32:44,000 --> 00:32:46,000

too much

900

00:32:46,000 --> 00:32:48,000

how many days is that enough for that pleasure of the silicon

901

00:32:48,000 --> 00:32:50,000

as a principal element

902

00:32:50,000 --> 00:32:52,000

the inside maybe

903

00:32:52,000 --> 00:32:54,000

the gauges

904

00:32:54,000 --> 00:32:56,000

mixed together upon the gelatin

905

00:32:56,000 --> 00:32:58,000

but most of the time

906

00:32:58,000 --> 00:33:00,000

that they

907

00:33:00,000 --> 00:33:02,000

will adopt certain forms

908

00:33:02,000 --> 00:33:04,000

the picrism glomula

909

00:33:04,000 --> 00:33:06,000

the lenticular

910

00:33:06,000 --> 00:33:08,000

the off-oblata

911

00:33:08,000 --> 00:33:10,000

the spirit-oil

912

00:33:10,000 --> 00:33:12,000

the silicon core perhaps when they are breathing

913

00:33:12,000 --> 00:33:14,000

they will adopt like I have seen myself

914

00:33:14,000 --> 00:33:16,000

like a kid

915

00:33:16,000 --> 00:33:18,000

and there are first ones

916

00:33:18,000 --> 00:33:20,000

of the

917

00:33:20,000 --> 00:33:22,000

the

918

00:33:22,000 --> 00:33:24,000

ordinary

919

00:33:24,000 --> 00:33:26,000

speaking of the cell in my pictures

920

00:33:26,000 --> 00:33:28,000

haven't noticed at some time

921

00:33:28,000 --> 00:33:30,000

the exothermic cells

922

00:33:30,000 --> 00:33:32,000

they bunched and fell together

923

00:33:32,000 --> 00:33:34,000

and they put on some supreme between

924

00:33:34,000 --> 00:33:36,000

the male and the female one

925

00:33:36,000 --> 00:33:38,000

which should fail the exothermic

926

00:33:38,000 --> 00:33:40,000

they put on some supreme and all the time

927

00:33:40,000 --> 00:33:42,000

they put on some supreme together and they join

928

00:33:42,000 --> 00:33:44,000

and they get a bit of it all the other way

929

00:33:44,000 --> 00:33:46,000

and that's when we get

930

00:33:46,000 --> 00:33:48,000

generation to plant down to be spelled

931

00:33:48,000 --> 00:33:50,000

which come together at a certain time

932

00:33:50,000 --> 00:33:52,000

and when I say the L

933

00:33:52,000 --> 00:33:54,000

these might be that I'm showing you here

934

00:33:54,000 --> 00:33:56,000

they have maybe done it

935

00:33:56,000 --> 00:33:58,000

two amoeba will put them together

936

00:33:58,000 --> 00:34:00,000

and in this they make into a full of a bigger one

937

00:34:00,000 --> 00:34:02,000

and then they lie red and red

938

00:34:02,000 --> 00:34:04,000

and then the skin first

939

00:34:04,000 --> 00:34:06,000

and I'll come off the little one

940

00:34:06,000 --> 00:34:08,000

there are a kind where they'll come together

941

00:34:08,000 --> 00:34:10,000

and then they put a plate of light

942

00:34:10,000 --> 00:34:12,000

and they seem to throw out under the microscope

943

00:34:12,000 --> 00:34:14,000

a little cement between them

944

00:34:14,000 --> 00:34:16,000

they may find a little cylinder

945

00:34:16,000 --> 00:34:18,000

and then they put a little cement

946

00:34:18,000 --> 00:34:20,000

and then out of them come little pairs

947

00:34:20,000 --> 00:34:22,000

of little things which don't look like

948

00:34:22,000 --> 00:34:24,000

either the cylinder or the tube

949

00:34:24,000 --> 00:34:26,000

or at all objects

950

00:34:26,000 --> 00:34:28,000

a bit of friction

951

00:34:28,000 --> 00:34:30,000

of that I have never heard

952

00:34:30,000 --> 00:34:32,000

and get by Mr. Michel

953

00:34:32,000 --> 00:34:34,000

in the case it's reported to all of the dust

954

00:34:34,000 --> 00:34:36,000

of ground

955

00:34:36,000 --> 00:34:38,000

a little cylinder appearing in the sky

956

00:34:38,000 --> 00:34:40,000

some hours and little pairs of things

957

00:34:40,000 --> 00:34:42,000

coming out of it and dancing around its hair

958

00:34:42,000 --> 00:34:44,000

but whatever truth is touched

959

00:34:44,000 --> 00:34:46,000

a lot of this stuff called angel hair

960

00:34:46,000 --> 00:34:48,000

came in coupling down

961

00:34:48,000 --> 00:34:50,000

we'll get to that in a minute

962

00:34:50,000 --> 00:34:52,000

this theory and very much my theory

963

00:34:52,000 --> 00:34:54,000

is that some things

964

00:34:54,000 --> 00:34:56,000

you've heard but the remaining of any large

965

00:34:56,000 --> 00:34:58,000

response of

966

00:34:58,000 --> 00:35:00,000

life forms living on the outer edge

967

00:35:00,000 --> 00:35:02,000

of our atmosphere which are

968

00:35:02,000 --> 00:35:04,000

often life forms very little

969

00:35:04,000 --> 00:35:06,000

in other words there will be a kind of natural

970

00:35:06,000 --> 00:35:08,000

natural problem that could be such a thing

971

00:35:08,000 --> 00:35:10,000

now everybody says we'll survive over

972

00:35:10,000 --> 00:35:12,000

and we're aware of it why do we need them

973

00:35:12,000 --> 00:35:14,000

well I am not good at

974

00:35:14,000 --> 00:35:16,000

objects

975

00:35:16,000 --> 00:35:18,000

but you know perfectly well

976

00:35:18,000 --> 00:35:20,000

most of our telegraphers

977

00:35:20,000 --> 00:35:22,000

train our

978

00:35:22,000 --> 00:35:24,000

train disease they are

979

00:35:24,000 --> 00:35:26,000

our trains outside our atmosphere

980

00:35:26,000 --> 00:35:28,000

most of our meteorologists

981

00:35:28,000 --> 00:35:30,000

are very very light and things inside our atmosphere

982

00:35:30,000 --> 00:35:32,000

we are working like magic

983

00:35:32,000 --> 00:35:34,000

there is the effort

984

00:35:34,000 --> 00:35:36,000

everybody is to find out what goes on

985

00:35:36,000 --> 00:35:38,000

at the edge of our atmosphere

986

00:35:38,000 --> 00:35:40,000

but in every minute

987

00:35:40,000 --> 00:35:42,000

we are going to turn around and tell you

988

00:35:42,000 --> 00:35:44,000

that things have to be disease learning about

989

00:35:44,000 --> 00:35:46,000

this guy named Adam

990

00:35:46,000 --> 00:35:48,000

and they are not the type of form

991

00:35:48,000 --> 00:35:50,000

which

992

00:35:50,000 --> 00:35:52,000

is a natural environment

993

00:35:52,000 --> 00:35:54,000

a natural object

994

00:35:54,000 --> 00:35:56,000

which is not an inanimate object

995

00:35:56,000 --> 00:35:58,000

and it's neither an animal nor a plant

996

00:35:58,000 --> 00:36:00,000

nor a virus but it's only in other words

997

00:36:00,000 --> 00:36:02,000

a life form that might take up

998

00:36:02,000 --> 00:36:04,000

then even if they were awake come come

999

00:36:04,000 --> 00:36:06,000

no of these things will be normal

1000

00:36:06,000 --> 00:36:08,000

and I will be reported

1001

00:36:08,000 --> 00:36:10,000

I will take that in a moment

1002

00:36:10,000 --> 00:36:12,000

then they say are they trapped on this man

1003

00:36:12,000 --> 00:36:14,000

well I am

1004

00:36:14,000 --> 00:36:16,000

I am different as big as I but I should have made some notes

1005

00:36:16,000 --> 00:36:18,000

before I came inside John that I would give them to you

1006

00:36:18,000 --> 00:36:20,000

and if you want to read on the air

1007

00:36:20,000 --> 00:36:22,000

I can either read them or I can send you

1008

00:36:22,000 --> 00:36:24,000

in notes and you can read yourself

1009

00:36:24,000 --> 00:36:26,000

if you take the density of water

1010

00:36:26,000 --> 00:36:28,000

in the medium

1011

00:36:28,000 --> 00:36:30,000

and the pressure of water is the bottom of the ocean

1012

00:36:30,000 --> 00:36:32,000

and the top of the ocean

1013

00:36:32,000 --> 00:36:34,000

and you compare it with

1014

00:36:34,000 --> 00:36:36,000

the density of the air at ocean level

1015

00:36:36,000 --> 00:36:38,000

and then on up to

1016

00:36:38,000 --> 00:36:40,000

while I was in atmosphere

1017

00:36:40,000 --> 00:36:42,000

and you extrapolate

1018

00:36:42,000 --> 00:36:44,000

what the use we have in water

1019

00:36:44,000 --> 00:36:46,000

in the air

1020

00:36:46,000 --> 00:36:48,000

I don't mind making myself fair

1021

00:36:48,000 --> 00:36:50,000

an animal of course is

1022

00:36:50,000 --> 00:36:52,000

traveling in the medium

1023

00:36:52,000 --> 00:36:54,000

of water

1024

00:36:54,000 --> 00:36:56,000

and the amount of energy only we use

1025

00:36:56,000 --> 00:36:58,000

muscles the most of all is probably the blue whale

1026

00:36:58,000 --> 00:37:00,000

which is just one great huge

1027

00:37:00,000 --> 00:37:02,000

amount of muscle actually

1028

00:37:02,000 --> 00:37:04,000

and it goes at tremendous speed

1029

00:37:04,000 --> 00:37:06,000

and if you are in the water

1030

00:37:06,000 --> 00:37:08,000

you can hear the surface

1031

00:37:08,000 --> 00:37:10,000

speed

1032

00:37:10,000 --> 00:37:12,000

the only axis is the lower axis

1033

00:37:12,000 --> 00:37:14,000

the means to travel much faster

1034

00:37:14,000 --> 00:37:16,000

both for the sea

1035

00:37:16,000 --> 00:37:18,000

and the axis

1036

00:37:18,000 --> 00:37:20,000

the rare sign goes up

1037

00:37:20,000 --> 00:37:22,000

the means to travel much faster still

1038

00:37:22,000 --> 00:37:24,000

and by pure installation

1039

00:37:24,000 --> 00:37:26,000

according to Mr. Wetzowski

1040

00:37:26,000 --> 00:37:28,000

and each of us can tell me if we have to get some energy

1041

00:37:28,000 --> 00:37:30,000

during the actual deep air

1042

00:37:30,000 --> 00:37:32,000

but up mountains

1043

00:37:32,000 --> 00:37:34,000

the speed of something in water

1044

00:37:34,000 --> 00:37:36,000

like 700 I think

1045

00:37:36,000 --> 00:37:38,000

and you will get

1046

00:37:38,000 --> 00:37:40,000

the speed at which the oxygen is the same size

1047

00:37:40,000 --> 00:37:42,000

or comparable size

1048

00:37:42,000 --> 00:37:44,000

can travel in the atmosphere

1049

00:37:44,000 --> 00:37:46,000

also at a size

1050

00:37:46,000 --> 00:37:48,000

the harder you push down

1051

00:37:48,000 --> 00:37:50,000

from around

1052

00:37:50,000 --> 00:37:52,000

the better it is to be formed

1053

00:37:52,000 --> 00:37:54,000

and the looser the medium

1054

00:37:54,000 --> 00:37:56,000

around you is

1055

00:37:56,000 --> 00:37:58,000

the bigger you can be without a steady state

1056

00:37:58,000 --> 00:38:00,000

the normal size is reported to some use though

1057

00:38:00,000 --> 00:38:02,000

and on tunnels

1058

00:38:02,000 --> 00:38:04,000

we are outside the bound

1059

00:38:04,000 --> 00:38:06,000

of a life form living in a rare site

1060

00:38:06,000 --> 00:38:08,000

and there is being exclusively

1061

00:38:08,000 --> 00:38:10,000

on the radio energy

1062

00:38:10,000 --> 00:38:12,000

may I ask you

1063

00:38:12,000 --> 00:38:14,000

is following your thoughts now

1064

00:38:14,000 --> 00:38:16,000

is it conceivable

1065

00:38:16,000 --> 00:38:18,000

that as this life

1066

00:38:18,000 --> 00:38:20,000

it might exist

1067

00:38:20,000 --> 00:38:22,000

life forms

1068

00:38:22,000 --> 00:38:24,000

as it gets closer and closer

1069

00:38:24,000 --> 00:38:26,000

to the life source

1070

00:38:26,000 --> 00:38:28,000

which on earth our plant life uses

1071

00:38:28,000 --> 00:38:30,000

our effort to create a new movement

1072

00:38:30,000 --> 00:38:32,000

is at the speed of light

1073

00:38:32,000 --> 00:38:34,000

that's a lovely thought

1074

00:38:34,000 --> 00:38:36,000

I have been caught there

1075

00:38:36,000 --> 00:38:38,000

far from one of the neighbors

1076

00:38:38,000 --> 00:38:40,000

who was born

1077

00:38:40,000 --> 00:38:42,000

to that I would have to ask

1078

00:38:42,000 --> 00:38:44,000

if there is my decision to fight on the green part

1079

00:38:44,000 --> 00:38:46,000

of the subject which does have a slight

1080

00:38:46,000 --> 00:38:48,000

interest in the biological aspects

1081

00:38:48,000 --> 00:38:50,000

of this thing I may make an answer there

1082

00:38:50,000 --> 00:38:52,000

and to get some of the knowledge I remember

1083

00:38:52,000 --> 00:38:54,000

for myself it's a great thought

1084

00:38:54,000 --> 00:38:56,000

but I was wishing in the meantime

1085

00:38:56,000 --> 00:38:58,000

that I could find myself

1086

00:38:58,000 --> 00:39:00,000

as a bound of possibility

1087

00:39:00,000 --> 00:39:02,000

as well as probability

1088

00:39:02,000 --> 00:39:04,000

of probability

1089

00:39:04,000 --> 00:39:06,000

of the surface of our planet

1090

00:39:06,000 --> 00:39:08,000

and its aesthetic envelope

1091

00:39:08,000 --> 00:39:10,000

as we know it's the first day

1092

00:39:10,000 --> 00:39:12,000

we are tiny on a lot of things about it

1093

00:39:12,000 --> 00:39:14,000

we can predict it before you know the old idea

1094

00:39:14,000 --> 00:39:16,000

was that it was early when out in this place

1095

00:39:16,000 --> 00:39:18,000

the children told you you've gone

1096

00:39:18,000 --> 00:39:20,000

but as you know now

1097

00:39:20,000 --> 00:39:22,000

there is a great layer up there

1098

00:39:22,000 --> 00:39:24,000

that's for your heart

1099

00:39:24,000 --> 00:39:26,000

Mark, please have been stressing

1100

00:39:26,000 --> 00:39:28,000

stressing, stressing again

1101

00:39:28,000 --> 00:39:30,000

that I do not say that all you've known

1102

00:39:30,000 --> 00:39:32,000

could be

1103

00:39:32,000 --> 00:39:34,000

all must be or maybe

1104

00:39:34,000 --> 00:39:36,000

or must be explained

1105

00:39:36,000 --> 00:39:38,000

by this theory

1106

00:39:38,000 --> 00:39:40,000

that was forewarned by this theory

1107

00:39:40,000 --> 00:39:42,000

of the ordinary

1108

00:39:42,000 --> 00:39:44,000

on the other hand

1109

00:39:44,000 --> 00:39:46,000

I'm very given some I hope real shocker

1110

00:39:46,000 --> 00:39:48,000

in this particular theory

1111

00:39:48,000 --> 00:39:50,000

I have not had the

1112

00:39:50,000 --> 00:39:52,000

time or the facilities

1113

00:39:52,000 --> 00:39:54,000

to serve as a theory without visual aids

1114

00:39:54,000 --> 00:39:56,000

and an awful lot of discussion and explaining myself

1115

00:39:56,000 --> 00:39:58,000

and I saw all of you

1116

00:39:58,000 --> 00:40:00,000

wishing to get up my throat and think

1117

00:40:00,000 --> 00:40:02,000

what about this and what about that

1118

00:40:02,000 --> 00:40:04,000

I've only tried to give you the conjecture

1119

00:40:04,000 --> 00:40:06,000

which goes behind this theory

1120

00:40:06,000 --> 00:40:08,000

and I believe now me it is quite a theory

1121

00:40:08,000 --> 00:40:10,000

quite a long story

1122

00:40:10,000 --> 00:40:12,000

so the aspects of it which

1123

00:40:12,000 --> 00:40:14,000

have made me more deeply interested in this

1124

00:40:14,000 --> 00:40:16,000

of, no, not more deeply

1125

00:40:16,000 --> 00:40:18,000

in this aspect of you both

1126

00:40:18,000 --> 00:40:20,000

than any other

1127

00:40:20,000 --> 00:40:22,000

I'm more honest because I am a trained biologist

1128

00:40:22,000 --> 00:40:24,000

and my whole life is with animals

1129

00:40:24,000 --> 00:40:26,000

with life forms of one kind and another

1130

00:40:26,000 --> 00:40:28,000

I would just like to point out

1131

00:40:28,000 --> 00:40:30,000

the number of different ways in which

1132

00:40:30,000 --> 00:40:32,000

uh, you both as described

1133

00:40:32,000 --> 00:40:34,000

by the poor long suffering

1134

00:40:34,000 --> 00:40:36,000

bleeding

1135

00:40:36,000 --> 00:40:38,000

public

1136

00:40:38,000 --> 00:40:40,000

who is being throughout the ages and their comp tests

1137

00:40:40,000 --> 00:40:42,000

uh, take a look

1138

00:40:42,000 --> 00:40:44,000

because there are a number of things

1139

00:40:44,000 --> 00:40:46,000

that some of you you both as you reported

1140

00:40:46,000 --> 00:40:48,000

are the natural

1141

00:40:48,000 --> 00:40:50,000

habits

1142

00:40:50,000 --> 00:40:52,000

of life forms

1143

00:40:52,000 --> 00:40:54,000

particularly of animals in some aspects

1144

00:40:54,000 --> 00:40:56,000

I live with animals right now

1145

00:40:56,000 --> 00:40:58,000

I don't think that animals really

1146

00:40:58,000 --> 00:41:00,000

any animals in the universe have intelligence

1147

00:41:00,000 --> 00:41:02,000

if you ever want a cat

1148

00:41:02,000 --> 00:41:04,000

talking a mouse or a bird

1149

00:41:04,000 --> 00:41:06,000

but if the birds are mouse and the cat

1150

00:41:06,000 --> 00:41:08,000

are certainly using intelligence

1151

00:41:08,000 --> 00:41:10,000

and intelligence

1152

00:41:10,000 --> 00:41:12,000

pervades them

1153

00:41:12,000 --> 00:41:14,000

about the fall

1154

00:41:14,000 --> 00:41:16,000

the cat is thinking out his next move

1155

00:41:16,000 --> 00:41:18,000

and if anybody can tell me the difference

1156

00:41:18,000 --> 00:41:20,000

between these things and reasons

1157

00:41:20,000 --> 00:41:22,000

they better get on the air right sharp

1158

00:41:22,000 --> 00:41:24,000

and prove it

1159

00:41:24,000 --> 00:41:26,000

now take some of the things that these creatures do

1160

00:41:26,000 --> 00:41:28,000

I'll come here for that fucking stop

1161

00:41:28,000 --> 00:41:30,000

and tell

1162

00:41:30,000 --> 00:41:32,000

any animals in the universe

1163

00:41:32,000 --> 00:41:34,000

any life form which could travel

1164

00:41:34,000 --> 00:41:36,000

uh, at 15,000 miles an hour

1165

00:41:36,000 --> 00:41:38,000

and some of these things would be a legend to do

1166

00:41:38,000 --> 00:41:40,000

just that people are 90,000

1167

00:41:40,000 --> 00:41:42,000

people say this is a very risky given

1168

00:41:42,000 --> 00:41:44,000

by interpolation

1169

00:41:44,000 --> 00:41:46,000

and do it in a liquid medium

1170

00:41:46,000 --> 00:41:48,000

or following under the earth start with moans

1171

00:41:48,000 --> 00:41:50,000

and say how slow do they get along

1172

00:41:50,000 --> 00:41:52,000

so moans, you're on a rapid investment

1173

00:41:52,000 --> 00:41:54,000

depending on how things are following around on the earth

1174

00:41:54,000 --> 00:41:56,000

take along the target and push up their way through

1175

00:41:56,000 --> 00:41:58,000

after you've got a muscular energy

1176

00:41:58,000 --> 00:42:00,000

uh, animals and water can

1177

00:42:00,000 --> 00:42:02,000

travel faster and more freely

1178

00:42:02,000 --> 00:42:04,000

animals in the air can travel faster still

1179

00:42:04,000 --> 00:42:06,000

if you get out and go to the country

1180

00:42:06,000 --> 00:42:08,000

to nowhere they can travel at \$100

1181

00:42:08,000 --> 00:42:10,000

and that wonderful point we've still brought up

1182

00:42:10,000 --> 00:42:12,000

is that we have to think about it really deeply

1183

00:42:12,000 --> 00:42:14,000

and if possible as we get closer

1184

00:42:14,000 --> 00:42:16,000

they get to the source of their energy

1185

00:42:16,000 --> 00:42:18,000

the fact that they may be able to go

1186

00:42:18,000 --> 00:42:20,000

of course, I've got some nasty ones coming

1187

00:42:20,000 --> 00:42:22,000

in a minute when it comes to another end

1188

00:42:22,000 --> 00:42:24,000

of the inequality, that is the whole question

1189

00:42:24,000 --> 00:42:26,000

of teleportation and the possibility

1190

00:42:26,000 --> 00:42:28,000

of trans-greding

1191

00:42:28,000 --> 00:42:30,000

the speed of life

1192

00:42:30,000 --> 00:42:32,000

which as Einstein said

1193

00:42:32,000 --> 00:42:34,000

that before he dies

1194

00:42:34,000 --> 00:42:36,000

he's only at the radical point

1195

00:42:36,000 --> 00:42:38,000

just the same as speed of moans

1196

00:42:38,000 --> 00:42:40,000

is the relative point

1197

00:42:40,000 --> 00:42:42,000

I remember when I was

1198

00:42:42,000 --> 00:42:44,000

a kid, I was told

1199

00:42:44,000 --> 00:42:46,000

no airplane would ever have the power

1200

00:42:46,000 --> 00:42:48,000

to pass barriers because

1201

00:42:48,000 --> 00:42:50,000

the cave virgin is far from college at that point

1202

00:42:50,000 --> 00:42:52,000

and it'd be like describing an airplane

1203

00:42:52,000 --> 00:42:54,000

into a brick wall

1204

00:42:54,000 --> 00:42:56,000

for all the people who were telling me

1205

00:42:56,000 --> 00:42:58,000

it all forgot about the bullet wounding

1206

00:42:58,000 --> 00:43:00,000

which we've been doing for a very long time

1207

00:43:00,000 --> 00:43:02,000

it'd be very well-adept in fact

1208

00:43:02,000 --> 00:43:04,000

and that this business of running into a brick wall

1209

00:43:04,000 --> 00:43:06,000

in the dead date

1210

00:43:06,000 --> 00:43:08,000

will bring you back to what I'm talking about here first

1211

00:43:08,000 --> 00:43:10,000

usually only cop-shape

1212

00:43:10,000 --> 00:43:12,000

or what you've done

1213

00:43:12,000 --> 00:43:14,000

the big meagre which comes bubbling around

1214

00:43:14,000 --> 00:43:16,000

it is made of

1215

00:43:16,000 --> 00:43:18,000

a tough curve

1216

00:43:18,000 --> 00:43:20,000

it's a natural plastic

1217

00:43:20,000 --> 00:43:22,000

it makes up the other things

1218

00:43:22,000 --> 00:43:24,000

the hard shell of it

1219

00:43:24,000 --> 00:43:26,000

but it is a very nice enemy

1220

00:43:26,000 --> 00:43:28,000

it's something of a millimeter

1221

00:43:28,000 --> 00:43:30,000

in thickness only

1222

00:43:30,000 --> 00:43:32,000

and yet one of those meagres

1223

00:43:32,000 --> 00:43:34,000

can drive straight into a brick wall

1224

00:43:34,000 --> 00:43:36,000

at a particular time

1225

00:43:36,000 --> 00:43:38,000

and they are

1226

00:43:38,000 --> 00:43:40,000

banged to the wall

1227

00:43:40,000 --> 00:43:42,000

all down the ground enough to walk away

1228

00:43:42,000 --> 00:43:44,000

I'd like to see some of our needles

1229

00:43:44,000 --> 00:43:46,000

travel through the feet of the best meagres

1230

00:43:46,000 --> 00:43:48,000

and I'll have to

1231

00:43:48,000 --> 00:43:50,000

let it go, they just stay okay

1232

00:43:50,000 --> 00:43:52,000

and then the other thing is

1233

00:43:52,000 --> 00:43:54,000

traveling in all this business

1234

00:43:54,000 --> 00:43:56,000

there's a certain search in lies

1235

00:43:56,000 --> 00:43:58,000

you know when you're going into a pine wood

1236

00:43:58,000 --> 00:44:00,000

and you see this thing looks like

1237

00:44:00,000 --> 00:44:02,000

a yellow jacket is hovering in the air

1238

00:44:02,000 --> 00:44:04,000

suddenly it's somewhere else

1239

00:44:04,000 --> 00:44:06,000

it's a egg beetle style

1240

00:44:06,000 --> 00:44:08,000

it was alleged by one scientist

1241

00:44:08,000 --> 00:44:10,000

of course he was immediately

1242

00:44:10,000 --> 00:44:12,000

blocked on the edge

1243

00:44:12,000 --> 00:44:14,000

but I believe that

1244

00:44:14,000 --> 00:44:16,000

people think you're far off

1245

00:44:16,000 --> 00:44:18,000

from the work of other people

1246

00:44:18,000 --> 00:44:20,000

but allegedly he was able to travel 800 miles an hour

1247

00:44:20,000 --> 00:44:22,000

or that's before anybody broke into a sandbarry

1248

00:44:22,000 --> 00:44:24,000

and there was an uproar

1249

00:44:24,000 --> 00:44:26,000

especially on the top of a Mexican mountain

1250

00:44:26,000 --> 00:44:28,000

I don't know, I bring it up

1251

00:44:28,000 --> 00:44:30,000

I'm more concerned about it

1252

00:44:30,000 --> 00:44:32,000

because he did say

1253

00:44:32,000 --> 00:44:34,000

that he was walking

1254

00:44:34,000 --> 00:44:36,000

that was the end of every time

1255

00:44:36,000 --> 00:44:38,000

but they have found that animals do travel

1256

00:44:38,000 --> 00:44:40,000

flying animals

1257

00:44:40,000 --> 00:44:42,000

the index of all of their artifacts

1258

00:44:42,000 --> 00:44:44,000

they can allow and the people

1259

00:44:44,000 --> 00:44:46,000

it's a bit fascinating

1260

00:44:46,000 --> 00:44:48,000

I'm thinking the other aspects of it

1261

00:44:48,000 --> 00:44:50,000

flying into a brick wall

1262

00:44:50,000 --> 00:44:52,000

we're making any ford here

1263

00:44:52,000 --> 00:44:54,000

you try driving your car to a brick wall

1264

00:44:54,000 --> 00:44:56,000

and 40 miles an hour

1265

00:44:56,000 --> 00:44:58,000

and I can see some fields produced

1266

00:44:58,000 --> 00:45:00,000

which has a 10,000-thousand-thousand-thousand-thousand-thousand

1267

00:45:00,000 --> 00:45:02,000

a shell of a beetle is made

1268

00:45:02,000 --> 00:45:04,000

sitting half-initive

1269

00:45:04,000 --> 00:45:06,000

we don't have a way to go

1270

00:45:06,000 --> 00:45:08,000

any house back to these

1271

00:45:08,000 --> 00:45:10,000

you-posts which might possibly be

1272

00:45:10,000 --> 00:45:12,000

a life-form

1273

00:45:12,000 --> 00:45:14,000

the enormous speed

1274

00:45:14,000 --> 00:45:16,000

would not be insurable

1275

00:45:16,000 --> 00:45:18,000

anything that can go that enormous speed

1276

00:45:18,000 --> 00:45:20,000

obviously there's no stopper

1277

00:45:20,000 --> 00:45:22,000

from

1278

00:45:22,000 --> 00:45:24,000

from terminiges

1279

00:45:24,000 --> 00:45:26,000

that were in acceleration

1280

00:45:26,000 --> 00:45:28,000

also if they can go so far

1281

00:45:28,000 --> 00:45:30,000

and if they can go so far

1282

00:45:30,000 --> 00:45:32,000

they can go off to another angle

1283

00:45:32,000 --> 00:45:34,000

in other words they don't make a right angle turn

1284

00:45:34,000 --> 00:45:36,000

they come to a dead stop

1285

00:45:36,000 --> 00:45:38,000

or to another direction

1286

00:45:38,000 --> 00:45:40,000

that is possible

1287

00:45:40,000 --> 00:45:42,000

I don't think that this type already do that

1288

00:45:42,000 --> 00:45:44,000

very often I think that's the most

1289

00:45:44,000 --> 00:45:46,000

in the country

1290

00:45:46,000 --> 00:45:48,000

you're supposed to deal principally

1291

00:45:48,000 --> 00:45:50,000

with this kind

1292

00:45:50,000 --> 00:45:52,000

so we'll get to this first event first

1293

00:45:52,000 --> 00:45:54,000

just to see one more point

1294

00:45:54,000 --> 00:45:56,000

I've shown you photographs of luminous animals

1295

00:45:56,000 --> 00:45:58,000

a fungus

1296

00:45:58,000 --> 00:46:00,000

bacteria

1297

00:46:00,000 --> 00:46:02,000

almost a preform of life

1298

00:46:02,000 --> 00:46:04,000

no, it has luminous

1299

00:46:04,000 --> 00:46:06,000

there's a right kind of luminous people

1300

00:46:06,000 --> 00:46:08,000

in a cave in front of there

1301

00:46:08,000 --> 00:46:10,000

I mean we've got some other for that

1302

00:46:10,000 --> 00:46:12,000

but it has all on the side of it

1303

00:46:12,000 --> 00:46:14,000

another kind just found like all of them

1304

00:46:14,000 --> 00:46:16,000

but there are luminous fed

1305

00:46:16,000 --> 00:46:18,000

there is one bird

1306

00:46:18,000 --> 00:46:20,000

the young of this particular bird

1307

00:46:20,000 --> 00:46:22,000

in Australia

1308

00:46:22,000 --> 00:46:24,000

there's a little bird open their mouth to be fed

1309

00:46:24,000 --> 00:46:26,000

there's a mouse in luminous

1310

00:46:26,000 --> 00:46:28,000

not because they are luminous

1311

00:46:28,000 --> 00:46:30,000

but because they are not in luminous bacteria

1312

00:46:30,000 --> 00:46:32,000

they have launched in there

1313

00:46:32,000 --> 00:46:34,000

the theory is that the mother can find them

1314

00:46:34,000 --> 00:46:36,000

or easily in the dark

1315

00:46:36,000 --> 00:46:38,000

there are sponges which are luminous

1316

00:46:38,000 --> 00:46:40,000

there are

1317

00:46:40,000 --> 00:46:42,000

there are squids

1318

00:46:42,000 --> 00:46:44,000

how squids are particularly interesting

1319

00:46:44,000 --> 00:46:46,000

they have a gar-shek

1320

00:46:46,000 --> 00:46:48,000

and they have like porcelains

1321

00:46:48,000 --> 00:46:50,000

all on the side

1322

00:46:50,000 --> 00:46:52,000

and they are living some of these squids

1323

00:46:52,000 --> 00:46:54,000

and they have a lot of motion

1324

00:46:54,000 --> 00:46:56,000

they have four different colors

1325

00:46:56,000 --> 00:46:58,000

where are the porcelains on the side

1326

00:46:58,000 --> 00:47:00,000

if you like I have to look through the more

1327

00:47:00,000 --> 00:47:02,000

you've got to see some of those squids

1328

00:47:02,000 --> 00:47:04,000

there's a fish called

1329

00:47:04,000 --> 00:47:06,000

the Tentil flaperon

1330

00:47:06,000 --> 00:47:08,000

which I caught when I was a pretty youngster

1331

00:47:08,000 --> 00:47:10,000

in the band of sea

1332

00:47:10,000 --> 00:47:12,000

often caught in the Moroccan

1333

00:47:12,000 --> 00:47:14,000

and there were those

1334

00:47:14,000 --> 00:47:16,000

there was a mother who was very

1335

00:47:16,000 --> 00:47:18,000

very looking for fish

1336

00:47:18,000 --> 00:47:20,000

she was told that she was a bit like a porgy

1337

00:47:20,000 --> 00:47:22,000

and under the eye

1338

00:47:22,000 --> 00:47:24,000

which of course is very good for having eyelids

1339

00:47:24,000 --> 00:47:26,000

a feather for the micromera

1340

00:47:26,000 --> 00:47:28,000

very apocryphal

1341

00:47:28,000 --> 00:47:30,000

for the kidney-shaped apocryphal

1342

00:47:30,000 --> 00:47:32,000

in each eye

1343

00:47:32,000 --> 00:47:34,000

with a movable lid as it were

1344

00:47:34,000 --> 00:47:36,000

and in this pocket

1345

00:47:36,000 --> 00:47:38,000

in coming shortly away this fish

1346

00:47:38,000 --> 00:47:40,000

manages invariably to gather

1347

00:47:40,000 --> 00:47:42,000

an enormous amount of luminous bacteria

1348

00:47:42,000 --> 00:47:44,000

which just lived in there

1349

00:47:44,000 --> 00:47:46,000

like for the parasite

1350

00:47:46,000 --> 00:47:48,000

that happened in there, glowing away all the time

1351

00:47:48,000 --> 00:47:50,000

and when the fish once

1352

00:47:50,000 --> 00:47:52,000

see his food on the bottom

1353

00:47:52,000 --> 00:47:54,000

he simply opens his little shutter

1354

00:47:54,000 --> 00:47:56,000

and he gets a little headlight pointing down

1355

00:47:56,000 --> 00:47:58,000

onto the ground

1356

00:47:58,000 --> 00:48:00,000

and the most amazing thing is he had some in the pocket

1357

00:48:00,000 --> 00:48:02,000

and it was all dark

1358

00:48:02,000 --> 00:48:04,000

but it's a little headlight that came on

1359

00:48:04,000 --> 00:48:06,000

so he can see the ground and come to him

1360

00:48:06,000 --> 00:48:08,000

now I come back to the

1361

00:48:08,000 --> 00:48:10,000

the luminous squids

1362

00:48:10,000 --> 00:48:12,000

to have these pork rinds next to the mic

1363

00:48:12,000 --> 00:48:14,000

you'll see others there

1364

00:48:14,000 --> 00:48:16,000

that wonderful spot in Joe Park

1365

00:48:16,000 --> 00:48:18,000

where he was going

1366

00:48:18,000 --> 00:48:20,000

it was very dark

1367

00:48:20,000 --> 00:48:22,000

and it was all the time inside

1368

00:48:22,000 --> 00:48:24,000

a dark lawn

1369

00:48:24,000 --> 00:48:26,000

in the Brazilian jungle

1370

00:48:26,000 --> 00:48:28,000

now a lot of these

1371

00:48:28,000 --> 00:48:30,000

euclides have been reported

1372

00:48:30,000 --> 00:48:32,000

and have been very important

1373

00:48:32,000 --> 00:48:34,000

in some of which are large

1374

00:48:34,000 --> 00:48:36,000

and some of which are square

1375

00:48:36,000 --> 00:48:38,000

and the pilot has just arrived

1376

00:48:38,000 --> 00:48:40,000

and the light has been set down in the tent

1377

00:48:40,000 --> 00:48:42,000

it looks like a mysterious flare inside

1378

00:48:42,000 --> 00:48:44,000

the wicked cave is written

1379

00:48:44,000 --> 00:48:46,000

in the form of a self-liminoscopy

1380

00:48:46,000 --> 00:48:48,000

carrying the early light

1381

00:48:48,000 --> 00:48:50,000

it's not in any way

1382

00:48:50,000 --> 00:48:52,000

beyond the ground possibility

1383

00:48:52,000 --> 00:48:54,000

it's not impossible

1384

00:48:54,000 --> 00:48:56,000

now it seems to me

1385

00:48:56,000 --> 00:48:58,000

get their food

1386

00:48:58,000 --> 00:49:00,000

their energy and where they evolved

1387

00:49:00,000 --> 00:49:02,000

and live in rare kind of a sparing map

1388

00:49:02,000 --> 00:49:04,000

just that maybe right outside the end

1389

00:49:04,000 --> 00:49:06,000

there actually is a sort of space

1390

00:49:06,000 --> 00:49:08,000

that maybe is interesting about

1391

00:49:08,000 --> 00:49:10,000

after all it's a big of a city

1392

00:49:10,000 --> 00:49:12,000

and we know this map are also in space now

1393

00:49:12,000 --> 00:49:14,000

and it's very interesting that many

1394

00:49:14,000 --> 00:49:16,000

it's a tech and many whole cases

1395

00:49:16,000 --> 00:49:18,000

report that the outside of these animals

1396

00:49:18,000 --> 00:49:20,000

looks more like a luminous

1397

00:49:20,000 --> 00:49:22,000

but it's a city

1398

00:49:22,000 --> 00:49:24,000

and a sort of super hero that's a very true

1399

00:49:24,000 --> 00:49:26,000

this day

1400

00:49:26,000 --> 00:49:28,000

might seem like the devil

1401

00:49:28,000 --> 00:49:30,000

but they came down to low

1402

00:49:30,000 --> 00:49:32,000

and got drowned

1403

00:49:32,000 --> 00:49:34,000

in our access to

1404

00:49:34,000 --> 00:49:36,000

they were drowned probably in our access to

1405

00:49:36,000 --> 00:49:38,000

uh...

1406

00:49:38,000 --> 00:49:40,000

they were in the middle of the city

1407

00:49:40,000 --> 00:49:42,000

probably in our access to

1408

00:49:42,000 --> 00:49:44,000

uh... the mountain

1409

00:49:44,000 --> 00:49:46,000

they were putting it

1410

00:49:46,000 --> 00:49:48,000

if they come down too far

1411

00:49:48,000 --> 00:49:50,000

on the other hand another aspect of this

1412

00:49:50,000 --> 00:49:52,000

sort of theory is that

1413

00:49:52,000 --> 00:49:54,000

if you see a hole in the sky

1414

00:49:54,000 --> 00:49:56,000

it sometimes drifts down

1415

00:49:56,000 --> 00:49:58,000

maybe they get sick and go down

1416

00:49:58,000 --> 00:50:00,000

like when whales get squished

1417

00:50:00,000 --> 00:50:02,000

they come up

1418

00:50:02,000 --> 00:50:04,000

but they have been appearing

1419

00:50:04,000 --> 00:50:06,000

if you take a map

1420

00:50:06,000 --> 00:50:08,000

and that appears a few times

1421

00:50:08,000 --> 00:50:10,000

as Dr. Devon said last night

1422

00:50:10,000 --> 00:50:12,000

they're all turning up in radio

1423

00:50:12,000 --> 00:50:14,000

also they occur much more

1424

00:50:14,000 --> 00:50:16,000

frequently over

1425

00:50:16,000 --> 00:50:18,000

atomic energy plants over large cities

1426

00:50:18,000 --> 00:50:20,000

exactly over all the places

1427

00:50:20,000 --> 00:50:22,000

where we are broadcasting

1428

00:50:22,000 --> 00:50:24,000

telecasting

1429

00:50:24,000 --> 00:50:26,000

putting out the

1430

00:50:26,000 --> 00:50:28,000

masses and masses of electro-magnetic energy

1431

00:50:28,000 --> 00:50:30,000

which didn't exist in the open

1432

00:50:30,000 --> 00:50:32,000

used to be put out of these places

1433

00:50:32,000 --> 00:50:34,000

these things get their food from above

1434

00:50:34,000 --> 00:50:36,000

and they can be able to get themselves food

1435

00:50:36,000 --> 00:50:38,000

from below

1436

00:50:38,000 --> 00:50:40,000

they being life-force come down

1437

00:50:40,000 --> 00:50:42,000

so if it's mitigating maybe they can come down

1438

00:50:42,000 --> 00:50:44,000

with this very strong radio beam

1439

00:50:44,000 --> 00:50:46,000

and they can the radio beam

1440

00:50:46,000 --> 00:50:48,000

pick up a certain amount of electro-magnetic energy from there

1441

00:50:48,000 --> 00:50:50,000

but they can be very difficult to use to tend you

1442

00:50:50,000 --> 00:50:52,000

when they are partying on them

1443

00:50:52,000 --> 00:50:54,000

when they affect our radar

1444

00:50:54,000 --> 00:50:56,000

now currently we're there solid objects

1445

00:50:56,000 --> 00:50:58,000

they may not be very solid

1446

00:50:58,000 --> 00:51:00,000

but they are, they're not hallucinations

1447

00:51:00,000 --> 00:51:02,000

they're things and of course they will affect our radar

1448

00:51:02,000 --> 00:51:04,000

they pick up the space

1449

00:51:04,000 --> 00:51:06,000

it's a 30 day explanation of full-sighted

1450

00:51:06,000 --> 00:51:08,000

also

1451

00:51:08,000 --> 00:51:10,000

I was in

1452

00:51:10,000 --> 00:51:12,000

a couple of intelligence services

1453

00:51:12,000 --> 00:51:14,000

for 10 years before during the war

1454

00:51:14,000 --> 00:51:16,000

I was in the Navy intelligence

1455

00:51:16,000 --> 00:51:18,000

which appeared and I had depth of instruction

1456

00:51:18,000 --> 00:51:20,000

from our high

1457

00:51:20,000 --> 00:51:22,000

I was pleased to stop reporting

1458

00:51:22,000 --> 00:51:24,000

green light

1459

00:51:24,000 --> 00:51:26,000

we thought that they were the enemy signaling to each other

1460

00:51:26,000 --> 00:51:28,000

one happened but very fluid

1461

00:51:28,000 --> 00:51:30,000

was this in the end

1462

00:51:30,000 --> 00:51:32,000

one of these green glowing objects

1463

00:51:32,000 --> 00:51:34,000

landed on a road in Kirchbauer

1464

00:51:34,000 --> 00:51:36,000

where 500 British troops

1465

00:51:36,000 --> 00:51:38,000

were marching to Willemina Port

1466

00:51:38,000 --> 00:51:40,000

up to take over the oil fields

1467

00:51:40,000 --> 00:51:42,000

after four of Holland

1468

00:51:42,000 --> 00:51:44,000

and landed in front of the officer

1469

00:51:44,000 --> 00:51:46,000

on the road one of these things

1470

00:51:46,000 --> 00:51:48,000

and I don't know if the officer being the British

1471

00:51:48,000 --> 00:51:50,000

who had said charge or forward men

1472

00:51:50,000 --> 00:51:52,000

anyhow they changed this thing

1473

00:51:52,000 --> 00:51:54,000

and it played a

1474

00:51:54,000 --> 00:51:56,000

tag with them

1475

00:51:56,000 --> 00:51:58,000

it bounced along and disappeared

1476

00:51:58,000 --> 00:52:00,000

it got her, ran along to the little bit of coal

1477

00:52:00,000 --> 00:52:02,000

and came out the other side of the road

1478

00:52:02,000 --> 00:52:04,000

and ran away in front of them

1479

00:52:04,000 --> 00:52:06,000

and it finally just went up the sky and disappeared

1480

00:52:06,000 --> 00:52:08,000

and from then on

1481

00:52:08,000 --> 00:52:10,000

the atmosphere decided that these things

1482

00:52:10,000 --> 00:52:12,000

must have been green light

1483

00:52:12,000 --> 00:52:14,000

but in actual phenomena

1484

00:52:14,000 --> 00:52:16,000

indeed they are now full-sighted

1485

00:52:16,000 --> 00:52:18,000

the activity of that thing

1486

00:52:18,000 --> 00:52:20,000

the activities of full-sighted

1487

00:52:20,000 --> 00:52:22,000

and much of the behavior

1488

00:52:22,000 --> 00:52:24,000

of many you've posed

1489

00:52:24,000 --> 00:52:26,000

is exactly that of an animal

1490

00:52:26,000 --> 00:52:28,000

they are inclusive

1491

00:52:28,000 --> 00:52:30,000

they seem to be intelligently controlled

1492

00:52:30,000 --> 00:52:32,000

they are

1493

00:52:32,000 --> 00:52:34,000

because all animals are intelligent

1494

00:52:34,000 --> 00:52:36,000

in a matter of degree

1495

00:52:36,000 --> 00:52:38,000

even if they're bumbling a poplar

1496

00:52:38,000 --> 00:52:40,000

and anything can prove in high speed

1497

00:52:40,000 --> 00:52:42,000

it's probably got to have some kind of

1498

00:52:42,000 --> 00:52:44,000

intelligence

1499

00:52:44,000 --> 00:52:46,000

of course is bad words, it's very, very effective

1500

00:52:46,000 --> 00:52:48,000

but in other words they are intelligently

1501

00:52:48,000 --> 00:52:50,000

directed from within to get me

1502

00:52:50,000 --> 00:52:52,000

and they come down to play tag

1503

00:52:52,000 --> 00:52:54,000

with the airplane

1504

00:52:54,000 --> 00:52:56,000

what they are, they smell of metal

1505

00:52:56,000 --> 00:52:58,000

they are giving out energy all over

1506

00:52:58,000 --> 00:53:00,000

to pump the lung and pick up a little

1507

00:53:00,000 --> 00:53:02,000

blood wherever on the way

1508

00:53:02,000 --> 00:53:04,000

these funny, great, lovely things have come up

1509

00:53:04,000 --> 00:53:06,000

all the things that come up from the bottom of the sea

1510

00:53:06,000 --> 00:53:08,000

were amazed at all the reminiscent

1511

00:53:08,000 --> 00:53:10,000

of a thing called a cracker

1512

00:53:10,000 --> 00:53:12,000

we've now had an architect of squid

1513

00:53:12,000 --> 00:53:14,000

which can grow with its magical

1514

00:53:14,000 --> 00:53:16,000

dubbing service that it would want

1515

00:53:16,000 --> 00:53:18,000

it was last half the first few months

1516

00:53:18,000 --> 00:53:20,000

now everybody here at the museum

1517

00:53:20,000 --> 00:53:22,000

has seen this of

1518

00:53:22,000 --> 00:53:24,000

it's that they're used with Mr. Dayton

1519

00:53:24,000 --> 00:53:26,000

to conch fishers out of the grand bank

1520

00:53:26,000 --> 00:53:28,000

and that all the way through

1521

00:53:28,000 --> 00:53:30,000

but one professor's several

1522

00:53:30,000 --> 00:53:32,000

who probably actually grew up there, H. W.

1523

00:53:32,000 --> 00:53:34,000

but we are amazed at some of those things that come up from the bottom of the sea

1524

00:53:34,000 --> 00:53:36,000

in the museum these days

1525

00:53:36,000 --> 00:53:38,000

these things probably just as amazed at

1526

00:53:38,000 --> 00:53:40,000

giving them out

1527

00:53:40,000 --> 00:53:42,000

as the revolving connotations

1528

00:53:42,000 --> 00:53:44,000

but they're looking for food like everything else

1529

00:53:44,000 --> 00:53:46,000

and they're not going to run into a plane

1530

00:53:46,000 --> 00:53:48,000

they can move much faster

1531

00:53:48,000 --> 00:53:50,000

than the player they can play or how it is

1532

00:53:50,000 --> 00:53:52,000

don't do anything in front of it

1533

00:53:52,000 --> 00:53:54,000

but some of the things that come down a little like that

1534

00:53:54,000 --> 00:53:56,000

most of the councilmen have said it was reported to have got

1535

00:53:56,000 --> 00:53:58,000

the status of the man

1536

00:53:58,000 --> 00:54:00,000

they wanted these things in the pluridus once, remember

1537

00:54:00,000 --> 00:54:02,000

when I was taking a life form

1538

00:54:02,000 --> 00:54:04,000

feeding on energy

1539

00:54:04,000 --> 00:54:06,000

but ever

1540

00:54:06,000 --> 00:54:08,000

it must be able to store energy

1541

00:54:08,000 --> 00:54:10,000

electric eoses

1542

00:54:10,000 --> 00:54:12,000

can store oh my goodness, what a lot of electricity

1543

00:54:12,000 --> 00:54:14,000

can store in a storage battery

1544

00:54:14,000 --> 00:54:16,000

these things are a little far out

1545

00:54:16,000 --> 00:54:18,000

of the way around

1546

00:54:18,000 --> 00:54:20,000

coming out here, nothing around the pluridus

1547

00:54:20,000 --> 00:54:22,000

it's a lot of cars

1548

00:54:22,000 --> 00:54:24,000

it's a bunch of the boss that's all

1549

00:54:24,000 --> 00:54:26,000

got in the wrong convection current

1550

00:54:26,000 --> 00:54:28,000

and he's floating down there

1551

00:54:28,000 --> 00:54:30,000

probably it might be uncomfortable

1552

00:54:30,000 --> 00:54:32,000

but there's tremendous pressure around it

1553

00:54:32,000 --> 00:54:34,000

which is not usually there

1554

00:54:34,000 --> 00:54:36,000

and I'm making this part of the human

1555

00:54:36,000 --> 00:54:38,000

which is there to not explain

1556

00:54:38,000 --> 00:54:40,000

animal intelligence

1557

00:54:40,000 --> 00:54:42,000

but behavior rather, behavior is a better word

1558

00:54:42,000 --> 00:54:44,000

and that comes as a human being

1559

00:54:44,000 --> 00:54:46,000

and now the ball in it

1560

00:54:46,000 --> 00:54:48,000

goes up and gets into pluridus

1561

00:54:48,000 --> 00:54:50,000

electric shock

1562

00:54:50,000 --> 00:54:52,000

I'm using the word electricity

1563

00:54:52,000 --> 00:54:54,000

to again over simplify

1564

00:54:54,000 --> 00:54:56,000

because the different types of electric

1565

00:54:56,000 --> 00:54:58,000

electric waves

1566

00:54:58,000 --> 00:55:00,000

are all raised to this level

1567

00:55:00,000 --> 00:55:02,000

and so there may be one kind of speed

1568

00:55:02,000 --> 00:55:04,000

in this wave range

1569

00:55:04,000 --> 00:55:06,000

another one here

1570

00:55:06,000 --> 00:55:08,000

there may be thousands and hundreds

1571

00:55:08,000 --> 00:55:10,000

of millions of different kinds

1572

00:55:10,000 --> 00:55:12,000

all these creatures have their behavior

1573

00:55:12,000 --> 00:55:14,000

I say is definitely that

1574

00:55:14,000 --> 00:55:16,000

of a life form

1575

00:55:16,000 --> 00:55:18,000

such cases

1576

00:55:18,000 --> 00:55:20,000

but correlations between

1577

00:55:20,000 --> 00:55:22,000

reports of UFOs

1578

00:55:22,000 --> 00:55:24,000

and animal behavior

1579

00:55:24,000 --> 00:55:26,000

but now let me cut that out

1580

00:55:26,000 --> 00:55:28,000

and say

1581

00:55:28,000 --> 00:55:30,000

I would not attempt to put any of these

1582

00:55:30,000 --> 00:55:32,000

on this which I think might be life form

1583

00:55:32,000 --> 00:55:34,000

I try to be

1584

00:55:34,000 --> 00:55:36,000

objective of this

1585

00:55:36,000 --> 00:55:38,000

particularly scientific

1586

00:55:38,000 --> 00:55:40,000

I'm interested in other words

1587

00:55:40,000 --> 00:55:42,000

in the exploring investigation

1588

00:55:42,000 --> 00:55:44,000

of the unknown by the use of

1589

00:55:44,000 --> 00:55:46,000

imagination and secondly by policy

1590

00:55:48,000 --> 00:55:50,000

we need facts

1591

00:55:50,000 --> 00:55:52,000

I don't know if anybody is talking UFOs here

1592

00:55:52,000 --> 00:55:54,000

I very much doubted this animal type

1593

00:55:54,000 --> 00:55:56,000

all this life form type

1594

00:55:56,000 --> 00:55:58,000

could be gotten to that

1595

00:55:58,000 --> 00:56:00,000

but it's a bad thing when they get out of our atmosphere

1596

00:56:00,000 --> 00:56:02,000

they dissolve

1597

00:56:02,000 --> 00:56:04,000

and

1598

00:56:04,000 --> 00:56:06,000

sometimes when they crash amongst themselves

1599

00:56:06,000 --> 00:56:08,000

there seems to be a discharge

1600

00:56:08,000 --> 00:56:10,000

and this angel pair comes down

1601

00:56:10,000 --> 00:56:12,000

in other cases of placement of Philadelphia

1602

00:56:12,000 --> 00:56:14,000

we saw a lamp on the pavement

1603

00:56:14,000 --> 00:56:16,000

a very sharp window picked it up

1604

00:56:16,000 --> 00:56:18,000

I can bring you four part witnesses

1605

00:56:18,000 --> 00:56:20,000

in our Warren County

1606

00:56:20,000 --> 00:56:22,000

who saw the first thing

1607

00:56:22,000 --> 00:56:24,000

and they went and picked this stuff up on the trees

1608

00:56:24,000 --> 00:56:26,000

and you know the old state

1609

00:56:26,000 --> 00:56:28,000

it is migrating spiders

1610

00:56:28,000 --> 00:56:30,000

and they put out a web and then they go blowing on a witness

1611

00:56:30,000 --> 00:56:32,000

and the spiders web even though spiders were put on the microscope

1612

00:56:32,000 --> 00:56:34,000

it's a string with little drops of oil on it

1613

00:56:34,000 --> 00:56:36,000

this is not they picked it up

1614

00:56:36,000 --> 00:56:38,000

but as they put it on their hands

1615

00:56:38,000 --> 00:56:40,000

it becomes jelly

1616

00:56:40,000 --> 00:56:44,000

and then it doesn't appear to dissolve right into my tube

1617

00:56:44,000 --> 00:56:46,000

other people I believe the Donald King Hill

1618

00:56:46,000 --> 00:56:48,000

has some lock up in a bottle

1619

00:56:48,000 --> 00:56:50,000

or has someone one time

1620

00:56:50,000 --> 00:56:52,000

and when he was let out

1621

00:56:52,000 --> 00:56:54,000

there was a function of a weakness bar

1622

00:56:54,000 --> 00:56:56,000

I don't know what he's had there analyzed

1623

00:56:56,000 --> 00:56:58,000

I think truthfully people tried to do it

1624

00:56:58,000 --> 00:57:00,000

and everything gets to a lab it just dissolves into my tube

1625

00:57:00,000 --> 00:57:04,000

it goes away in other words it dissolves our atmosphere

1626

00:57:04,000 --> 00:57:06,000

that's the bad word case of the day

1627

00:57:06,000 --> 00:57:08,000

but the thing is that we don't think it's a scum

1628

00:57:08,000 --> 00:57:10,000

but the other thing is there

1629

00:57:10,000 --> 00:57:12,000

which looks much more like machines

1630

00:57:12,000 --> 00:57:14,000

I must admit

1631

00:57:14,000 --> 00:57:16,000

come over the market

1632

00:57:16,000 --> 00:57:18,000

there's an after-app that's in big storage bars

1633

00:57:18,000 --> 00:57:20,000

on that is getting all those calories

1634

00:57:20,000 --> 00:57:22,000

and the atmosphere

1635

00:57:22,000 --> 00:57:24,000

that's the crest of the market where they came over

1636

00:57:24,000 --> 00:57:26,000

was highly charged with carbonations matter

1637

00:57:26,000 --> 00:57:28,000

and they need to be unable to cope with carbonations matter

1638

00:57:28,000 --> 00:57:30,000

in the gauge of formal particles

1639

00:57:30,000 --> 00:57:32,000

they may have closed

1640

00:57:32,000 --> 00:57:34,000

they are reading this

1641

00:57:34,000 --> 00:57:36,000

relay machines for

1642

00:57:36,000 --> 00:57:38,000

and they all went out of gear

1643

00:57:38,000 --> 00:57:40,000

at the same time one managed to land

1644

00:57:40,000 --> 00:57:42,000

two went away because they were outside age

1645

00:57:42,000 --> 00:57:44,000

don't forget if you remember one another

1646

00:57:44,000 --> 00:57:46,000

they did not keep on going

1647

00:57:46,000 --> 00:57:48,000

and the other two crashed and one flew up in the air

1648

00:57:48,000 --> 00:57:50,000

all the way to the table part of the air

1649

00:57:50,000 --> 00:57:52,000

and they got stuck

1650

00:57:52,000 --> 00:57:54,000

and the ashes that set out in the New Brutus store

1651

00:57:54,000 --> 00:57:56,000

was nothing else but the beginning

1652

00:57:56,000 --> 00:57:58,000

of Angel's hair

1653

00:57:58,000 --> 00:58:00,000

or as Charles Ford says

1654

00:58:00,000 --> 00:58:02,000

there have been rains of substance

1655

00:58:02,000 --> 00:58:04,000

which looks exactly like blood

1656

00:58:04,000 --> 00:58:06,000

there have been rains of ashes

1657

00:58:06,000 --> 00:58:08,000

there have been rains which would show

1658

00:58:08,000 --> 00:58:10,000

that the carbonations come down

1659

00:58:10,000 --> 00:58:12,000

but you don't have one of these things about a half long

1660

00:58:12,000 --> 00:58:14,000

it might be that it's bigger

1661

00:58:14,000 --> 00:58:16,000

so you would not be energy

1662

00:58:16,000 --> 00:58:18,000

so in that you would rather plane truant

1663

00:58:18,000 --> 00:58:20,000

and you'd only come out to sticky mass all over you

1664

00:58:20,000 --> 00:58:22,000

so the stillers are enormous on the amount of material

1665

00:58:22,000 --> 00:58:24,000

in there in a very tenuous form

1666

00:58:24,000 --> 00:58:26,000

first they could die

1667

00:58:26,000 --> 00:58:28,000

first they died from time when they run out of energy

1668

00:58:28,000 --> 00:58:30,000

or something goes wrong with their mechanism

1669

00:58:30,000 --> 00:58:32,000

I'm speaking of biology

1670

00:58:32,000 --> 00:58:34,000

but they run out they die

1671

00:58:34,000 --> 00:58:36,000

and what do you think about the carbon

1672

00:58:36,000 --> 00:58:38,000

and the liquid in the store

1673

00:58:38,000 --> 00:58:40,000

and the air in the product

1674

00:58:40,000 --> 00:58:42,000

and it falls very rapidly through the

1675

00:58:42,000 --> 00:58:44,000

increasingly dead atmosphere

1676

00:58:44,000 --> 00:58:46,000

well burn out like an angel

1677

00:58:46,000 --> 00:58:48,000

and all the air in the ashes

1678

00:58:48,000 --> 00:58:50,000

grows into a range of carbonations matter

1679

00:58:50,000 --> 00:58:52,000

your range of blood may be

1680

00:58:52,000 --> 00:58:54,000

of a similar nature

1681

00:58:54,000 --> 00:58:56,000

may be the heavy parts

1682

00:58:56,000 --> 00:58:58,000

that may have certain other liquidities

1683

00:58:58,000 --> 00:59:00,000

and so on and so forth in your own level

1684

00:59:00,000 --> 00:59:02,000

your range of blood

1685

00:59:02,000 --> 00:59:04,000

let us say the 80% of your report

1686

00:59:04,000 --> 00:59:06,000

are dealing with life forms

1687

00:59:06,000 --> 00:59:08,000

or they are

1688

00:59:08,000 --> 00:59:10,000

they are out of the way

1689

00:59:10,000 --> 00:59:12,000

there is no other we turn it on a whole group

1690

00:59:12,000 --> 00:59:14,000

there is also a possibility

1691

00:59:14,000 --> 00:59:16,000

of another whole group

1692

00:59:16,000 --> 00:59:18,000

there is no reason for the effort

1693

00:59:18,000 --> 00:59:20,000

why there should not be other intelligence

1694

00:59:20,000 --> 00:59:22,000

out of form of life

1695

00:59:22,000 --> 00:59:24,000

in the universe

1696

00:59:24,000 --> 00:59:26,000

of the level of energy

1697

00:59:26,000 --> 00:59:28,000

or about energy

1698

00:59:28,000 --> 00:59:30,000

there is no reason to deny

1699

00:59:30,000 --> 00:59:32,000

of the ability

1700

00:59:32,000 --> 00:59:34,000

that intelligence

1701

00:59:34,000 --> 00:59:36,000

on our level or higher

1702

00:59:36,000 --> 00:59:38,000

right up to the orbit of life

1703

00:59:38,000 --> 00:59:40,000

may not be contained in a body such as we have

1704

00:59:40,000 --> 00:59:42,000

made of hydrogen and carbon

1705

00:59:42,000 --> 00:59:44,000

which is highly suitable

1706

00:59:44,000 --> 00:59:46,000

to our planet

1707

00:59:46,000 --> 00:59:48,000

but on other planets

1708

00:59:48,000 --> 00:59:50,000

Dr. Ness is considering around our sun

1709

00:59:50,000 --> 00:59:52,000

considering around others around us

1710

00:59:52,000 --> 00:59:54,000

how many suns are there in our galaxy

1711

00:59:54,000 --> 00:59:56,000

of the size of our sun

1712

00:59:56,000 --> 00:59:58,000

400

1713

00:59:58,000 --> 01:00:00,000

million or something

1714

01:00:00,000 --> 01:00:02,000

in our galaxy alone

1715

01:00:02,000 --> 01:00:04,000

and according to the series of

1716

01:00:04,000 --> 01:00:06,000

Coipers Chicago and Weisegel

1717

01:00:06,000 --> 01:00:08,000

of Germany

1718

01:00:08,000 --> 01:00:10,000

planets are an initial concomitant

1719

01:00:10,000 --> 01:00:12,000

of the formation of a sun

1720

01:00:12,000 --> 01:00:14,000

when the sun starts at the whirling

1721

01:00:14,000 --> 01:00:16,000

they just don't know what this is

1722

01:00:16,000 --> 01:00:18,000

as it subtracts

1723

01:00:18,000 --> 01:00:20,000

the heavy matter flies out

1724

01:00:20,000 --> 01:00:22,000

like the sped up ghost in the middle

1725

01:00:22,000 --> 01:00:24,000

and makes the sun automatically

1726

01:00:24,000 --> 01:00:26,000

they gather up all the heavy matter and make the planet

1727

01:00:26,000 --> 01:00:28,000

and there will always be a set of planets

1728

01:00:28,000 --> 01:00:30,000

showing around every sun

1729

01:00:30,000 --> 01:00:32,000

or every sun of the same size of the earth

1730

01:00:32,000 --> 01:00:34,000

or we've got a set of the same number of planets

1731

01:00:34,000 --> 01:00:36,000

or about the same average of the sky

1732

01:00:36,000 --> 01:00:38,000

according to those who are low or anyhow

1733

01:00:38,000 --> 01:00:40,000

I'd say that is a bit too sure

1734

01:00:40,000 --> 01:00:42,000

the astronomers

1735

01:00:42,000 --> 01:00:44,000

and the third planet ours will probably be very good

1736

01:00:44,000 --> 01:00:46,000

as it is to Earth

1737

01:00:46,000 --> 01:00:48,000

there is not a thing in nature

1738

01:00:48,000 --> 01:00:50,000

that the biological pattern of evolution can have

1739

01:00:50,000 --> 01:00:52,000

one animal living on one continent

1740

01:00:52,000 --> 01:00:54,000

due to the same

1741

01:00:54,000 --> 01:00:56,000

things that it has to do

1742

01:00:56,000 --> 01:00:58,000

develop it to look at it exactly

1743

01:00:58,000 --> 01:01:00,000

like a completely different animal

1744

01:01:00,000 --> 01:01:02,000

and on a continent

1745

01:01:02,000 --> 01:01:04,000

they're not related in any way

1746

01:01:04,000 --> 01:01:06,000

but they come to look on the scientific

1747

01:01:06,000 --> 01:01:08,000

and call parallel evolution

1748

01:01:08,000 --> 01:01:10,000

and there's no reason why even human life

1749

01:01:10,000 --> 01:01:12,000

looking mammals couldn't be developed

1750

01:01:12,000 --> 01:01:14,000

on a planet going around another sun

1751

01:01:14,000 --> 01:01:16,000

at the same size of the earth

1752

01:01:16,000 --> 01:01:18,000

it's not being made of the same material as we know

1753

01:01:18,000 --> 01:01:20,000

through spectroscopic analysis

1754

01:01:20,000 --> 01:01:22,000

or for example

1755

01:01:22,000 --> 01:01:24,000

the new reason why this should not be

1756

01:01:24,000 --> 01:01:26,000

light forms with intelligences

1757

01:01:26,000 --> 01:01:28,000

but in other words who can build the sheath

1758

01:01:28,000 --> 01:01:30,000

who would want to build the sheath

1759

01:01:30,000 --> 01:01:32,000

and who might go flying in them

1760

01:01:32,000 --> 01:01:34,000

we cannot discredit the possibility

1761

01:01:34,000 --> 01:01:36,000

that there could be in other words

1762

01:01:36,000 --> 01:01:38,000

man

1763

01:01:38,000 --> 01:01:40,000

and I've used man in his equivalent

1764

01:01:40,000 --> 01:01:42,000

man's UFOs which are machines

1765

01:01:42,000 --> 01:01:44,000

structures

1766

01:01:44,000 --> 01:01:46,000

guided by the intelligence

1767

01:01:46,000 --> 01:01:48,000

either writing in that machine

1768

01:01:48,000 --> 01:01:50,000

or processing from a distance from other ships

1769

01:01:50,000 --> 01:01:52,000

there is no reason why that can be

1770

01:01:52,000 --> 01:01:54,000

recalculated on things like this
