

1

00:00:00,000 --> 00:00:07,000

It's time now for North Garrity and Space Station.

2

00:00:07,000 --> 00:00:15,000

For the past seven years, North Garrity has been doing research into UFO, unidentified

3

00:00:15,000 --> 00:00:16,000

flying objects.

4

00:00:16,000 --> 00:00:21,000

Mr. Garrity is a veteran of two-year study in the airborne missiles with the U.S. Air Force,

5

00:00:21,000 --> 00:00:25,000

and is considered Florida's leading authority on UFO.

6

00:00:25,000 --> 00:00:27,000

And now here is Mr. Garrity.

7

00:00:28,000 --> 00:00:29,000

Good evening friends.

8

00:00:29,000 --> 00:00:35,000

It's Saturday night, and it's time once again for the strange, the unusual, and the unexplained.

9

00:00:35,000 --> 00:00:42,000

And tonight, as we promised you last week, we have a guest, all away from Toronto, Canada,

10

00:00:42,000 --> 00:00:44,000

to guest, I should say.

11

00:00:44,000 --> 00:00:48,000

Gene DuPlan-Tier and his wife, Eileen.

12

00:00:48,000 --> 00:00:55,000

And Gene is the editor of a UFO publication called Space, Science, and Saucers.

13

00:00:55,000 --> 00:00:59,000

And we've quoted from this publication from time to time.

14

00:00:59,000 --> 00:01:04,000

Gene has been putting out this publication from Toronto for the past three and a half years.

15

00:01:04,000 --> 00:01:10,000

Now, of course, like everyone else, he gets rich on this, just like I do, and one of these

16

00:01:10,000 --> 00:01:12,000

days he'll be able to retire.

17

00:01:12,000 --> 00:01:22,000

But in the meantime, he works as a commercial artist for the Financial Post in Toronto.

18

00:01:22,000 --> 00:01:31,000

And his wife, Eileen, who helps him with this publication, is a stenographer and dancing instructor

19

00:01:31,000 --> 00:01:37,000

when she's not getting wealthy with this UFO publication.

20

00:01:37,000 --> 00:01:40,000

Now, you do get wealthy on this, don't you, Gene?

21

00:01:40,000 --> 00:01:42,000

How else could I come down here?

22

00:01:42,000 --> 00:01:45,000

How else could he come to Florida on a vacation?

23

00:01:45,000 --> 00:01:51,000

I happen to know that, like all other people in this, he's lucky to be able to make enough money

24

00:01:51,000 --> 00:01:54,000

to buy his stamps as myself.

25

00:01:54,000 --> 00:02:00,000

Sometimes I have to take it out of the pocket to buy the stamps, and I've got a hunch he does, too.

26

00:02:00,000 --> 00:02:04,000

Now, I've been on vacation now here for a week or so in Miami.

27

00:02:04,000 --> 00:02:06,000

This is not your first time here.

28

00:02:06,000 --> 00:02:08,000

How are you enjoying it?

29

00:02:08,000 --> 00:02:09,000

Oh, very much, Norbert.

30

00:02:09,000 --> 00:02:14,000

I love the sun and the beautiful clear atmosphere, but not the fluoridated water.

31

00:02:14,000 --> 00:02:17,000

You haven't got that up in Canada yet, have you?

32

00:02:17,000 --> 00:02:19,000

Not yet, but we're supposed to sometime.

33

00:02:19,000 --> 00:02:21,000

They're working on it?

34

00:02:21,000 --> 00:02:25,000

They certainly are, but there are a number of other people working against it, too.

35

00:02:25,000 --> 00:02:30,000

Well, enlist all you can to work against it, including your wife.

36

00:02:30,000 --> 00:02:35,000

We're against it here, too, but what happens, we don't know.

37

00:02:35,000 --> 00:02:45,000

Now, let's take a moment out before we interview these two very nice people from our neighboring country of Canada on the north.

38

00:02:45,000 --> 00:02:50,000

We get along much better with our neighbors on the north than we do the south.

39

00:02:50,000 --> 00:03:00,000

Let's take a moment out to talk about sea view awnings, and then we'll find out what's been going on up in Canada for the past three and a half or five or ten years.

40

00:03:00,000 --> 00:03:04,000

Mr. and Mrs. Homeowner, are you a window slave?

41

00:03:04,000 --> 00:03:09,000

Does every sudden shower send you scurrying to close the windows?

42

00:03:09,000 --> 00:03:18,000

And the rainy season is here, so watch out for those rugs, floors, and furnishings, and keep them safe from the rain.

43

00:03:18,000 --> 00:03:20,000

Don't be a window slave.

44

00:03:20,000 --> 00:03:30,000

Keep the rain out with sea view awnings, and ask your neighbors who have sea view awnings, and they'll tell you that sea view awnings are the best.

45

00:03:30,000 --> 00:03:40,000

Don't let the sun fade your rugs, your slip covers, and your house will be 15 degrees cooler with awnings.

46

00:03:40,000 --> 00:03:46,000

So call sea view for a free home survey at plaza 83632.

47

00:03:46,000 --> 00:03:49,000

At sea view at plaza 83632.

48

00:03:49,000 --> 00:03:52,000

No money down in convenient terms.

49

00:03:52,000 --> 00:03:58,000

Remember, better living will start for you with sea view.

50

00:03:58,000 --> 00:04:04,000

So call the Monday Morning Plaza 83632 for a free home survey.

51

00:04:04,000 --> 00:04:11,000

Now, Gene, you have had some interesting items that I have used over the years here.

52

00:04:11,000 --> 00:04:15,000

Some I have used partially, some complete.

53

00:04:15,000 --> 00:04:26,000

But one of them I remember in particular, several years ago, was the Galt Ontario report by Jack Stevens, a 15-year-old boy,

54

00:04:26,000 --> 00:04:30,000

back in July of 1957, July 30th.

55

00:04:30,000 --> 00:04:33,000

Can you fill us in on this?

56

00:04:33,000 --> 00:04:39,000

Who was Jack Stevens, and what did he see, and where did this happen in all this business?

57

00:04:39,000 --> 00:04:46,000

Well, Jack was just an ordinary schoolboy who was out one day walking with his dog, Tex,

58

00:04:46,000 --> 00:04:51,000

and he quite often took little walks through the country.

59

00:04:51,000 --> 00:04:58,000

And this particular morning, he was four miles from Galt walking on a farmer's field.

60

00:04:58,000 --> 00:05:05,000

And he heard a noise, something like a dynamo in the air, and it was a very unusual sound,

61

00:05:05,000 --> 00:05:12,000

not having experienced anything like that before, and he saw this very bright light coming towards him.

62

00:05:12,000 --> 00:05:20,000

And it came over the trees and more or less hovered in the air for a few seconds,

63

00:05:20,000 --> 00:05:29,000

and then came straight down onto a gully, and there seemed to be a radiation or a red flame from underneath it,

64

00:05:29,000 --> 00:05:35,000

although it wasn't flame, it was just a very bright red light.

65

00:05:35,000 --> 00:05:40,000

And it appeared to land on the ground, although he couldn't see that for sure,

66

00:05:40,000 --> 00:05:49,000

because he was halfway down the field on a hill, and there was very tall grass covering the bottom part of this machine.

67

00:05:50,000 --> 00:05:58,000

Now, it was about 35 feet in diameter, and it was about 12 feet tall.

68

00:05:58,000 --> 00:06:04,000

That's about as well as he could judge from where he was standing, and he was about 300 yards from it.

69

00:06:04,000 --> 00:06:13,000

And this disc had a dome on it, and the outer area was spinning very rapidly,

70

00:06:13,000 --> 00:06:16,000

with a bright light down below on the outer flange.

71

00:06:17,000 --> 00:06:26,000

While the center part finished spinning, and he could see that there were lines coming down from the dome down to the outer flange.

72

00:06:26,000 --> 00:06:35,000

And as the whole thing stopped, there were little portholes, and from inside there was a very bright light coming from them.

73

00:06:35,000 --> 00:06:42,000

And he saw this thing there for about 45 minutes, and his dog was barking very wildly,

74

00:06:42,000 --> 00:06:49,000

and Jack himself, in his own words, was petrified at the sight of this thing, because he had never seen anything like it before.

75

00:06:49,000 --> 00:06:51,000

What time of the day was this?

76

00:06:51,000 --> 00:07:02,000

That was approximately 10.30 in the morning, and he could see no one come out from this thing,

77

00:07:02,000 --> 00:07:11,000

and it landed right next to some bushes and trees, and from there there was a path going down to a little lake

78

00:07:11,000 --> 00:07:18,000

or pond, as I would call it, and we found out later that this water was very pure,

79

00:07:18,000 --> 00:07:29,000

and gait is, they get their water from five artesian wells, and it has some of the purest water in that neighborhood.

80

00:07:29,000 --> 00:07:37,000

So we thought after that maybe some little men or creatures came out from there and filled up their buckets

81

00:07:37,000 --> 00:07:44,000

or hose lines or whatever it was, because we have noticed other stories similar where these craft have landed

82

00:07:44,000 --> 00:07:51,000

and have taken aboard fresh water, for some reason or other, but he could see no one,

83

00:07:51,000 --> 00:07:59,000

unless they had come out from the other side and were very small and were shielded by the craft itself

84

00:07:59,000 --> 00:08:04,000

and made a beeline for these bushes right for the path into the water.

85

00:08:04,000 --> 00:08:06,000

That's the only other explanation we can think of.

86

00:08:06,000 --> 00:08:08,000

How far was the craft from the water?

87

00:08:08,000 --> 00:08:19,000

I'd say it was about, oh, about 10 yards or so. It wasn't very far, because where the edge of this craft had touched the bushes,

88

00:08:19,000 --> 00:08:23,000

that is where the path began, and it was only a few yards to the water.

89

00:08:23,000 --> 00:08:26,000

And that path was on the opposite side of the boy?

90

00:08:26,000 --> 00:08:33,000

Yes, it was on the wrong side of him, so he couldn't see anything going down to the path,

91

00:08:33,000 --> 00:08:38,000

and I would think that he would have been able to see something being there for 45 minutes.

92

00:08:38,000 --> 00:08:45,000

Did this glow continue on the bottom of the craft during that time, or did it go out?

93

00:08:45,000 --> 00:08:53,000

No, as it, he only saw the glow as it just lightly landed on the ground,

94

00:08:53,000 --> 00:08:57,000

and he couldn't see any glow afterwards because of the tall grass surrounding it.

95

00:08:57,000 --> 00:09:04,000

Well, let's come back to this in just a minute. First, I want to take a moment off for a public

service announcement

96

00:09:04,000 --> 00:09:09,000

concerning J. Edgar Hoover's book, The Masters of Deceit.

97

00:09:09,000 --> 00:09:14,000

Now, J. Edgar Hoover, as you know, is the head of the FBI, and several years ago he wrote this book.

98

00:09:14,000 --> 00:09:20,000

It was put out in the hardcover editions, and just recently has been published in the Pocket Book Edition.

99

00:09:20,000 --> 00:09:25,000

So you can get this for 50 cents wherever books or magazines are sold.

100

00:09:25,000 --> 00:09:32,000

So pick it up at your drugstore or your favorite newsstand, and if your dealer doesn't have J. Edgar Hoover's book on hand,

101

00:09:32,000 --> 00:09:39,000

ask him why he doesn't. This could be important to you because all dealers should have this book in stock.

102

00:09:39,000 --> 00:09:46,000

This book will tell you what the Communist bosses are doing now to bring America to its knees,

103

00:09:46,000 --> 00:09:51,000

and you cannot be a well-informed American without having read this book.

104

00:09:52,000 --> 00:09:59,000

Remember, it's J. Edgar Hoover's book, Masters of Deceit, now out in the Pocket Book Edition for only 50 cents.

105

00:09:59,000 --> 00:10:07,000

Now, let's go back to Galt Ontario. During this time that he was watching it, you say it didn't move,

106

00:10:07,000 --> 00:10:11,000

and it made no noise whatsoever, it just absolutely still.

107

00:10:11,000 --> 00:10:18,000

No, once it landed there was no sound whatever from it, and it just seemed to sit there for that length of time.

108

00:10:18,000 --> 00:10:25,000

Now, of course, you didn't see this, you're having to take the boy's word second hand on this, right?

109

00:10:25,000 --> 00:10:26,000

That's right, yes.

110

00:10:26,000 --> 00:10:32,000

Anything else that he said that might shed light on this at this particular time while it was there?

111

00:10:32,000 --> 00:10:40,000

Well, the only other thing would be that after a while the thing started to spin again,

112

00:10:40,000 --> 00:10:45,000

and it rose vertically in the air, and it went back in the direction from which it came.

113

00:10:46,000 --> 00:10:51,000

And then, of course, he made a beeline out of there and home as fast as he could,

114

00:10:51,000 --> 00:10:58,000

and he was very upset about it, and he only told his parents at the time,

115

00:10:58,000 --> 00:11:03,000

and told no one else until the following Saturday about his experience.

116

00:11:03,000 --> 00:11:11,000

And during that time that he was there, the dog continually barked, he'd never quit.

117

00:11:11,000 --> 00:11:14,000

I mean, apparently the dog was quite excited about this.

118

00:11:14,000 --> 00:11:23,000

Yes, he was. As you've heard sometimes, dogs or cats are able to see things that humans can't end.

119

00:11:23,000 --> 00:11:27,000

Maybe this dog saw something that Jack didn't, maybe that's what scared him.

120

00:11:27,000 --> 00:11:31,000

Or maybe he could hear something that Jack couldn't hear too very possibly,

121

00:11:31,000 --> 00:11:35,000

he had much better hearing than a human does, the dog.

122

00:11:35,000 --> 00:11:41,000

Now, when did you go out to investigate this, and when you did, what did you find?

123

00:11:42,000 --> 00:11:49,000

Well, when I went out there, Jack took me to the place, and we noticed these prints in the ground.

124

00:11:49,000 --> 00:12:00,000

Now, it was an uneven triangle, and these prints seemed to have three toes and a heel mark.

125

00:12:00,000 --> 00:12:06,000

And it's as if this thing came down with some force at an angle.

126

00:12:07,000 --> 00:12:14,000

And instead of being the ordinary 15 foot equilateral triangle between the prints,

127

00:12:14,000 --> 00:12:20,000

there was a distance of 14 feet, 15 feet, and 17 feet.

128

00:12:20,000 --> 00:12:26,000

And not only that, this triangle was not in the center of the circle,

129

00:12:26,000 --> 00:12:31,000

but was off to one side, which was an unusual aspect of this case.

130

00:12:32,000 --> 00:12:38,000

Jack put his hand down on the area that this object covered,

131

00:12:38,000 --> 00:12:41,000

and he noticed that his hand turned a slight purple color.

132

00:12:41,000 --> 00:12:47,000

So he took his hand off there, and within a few hours, it gradually returned back to normal.

133

00:12:47,000 --> 00:12:52,000

Now, these prints themselves were about 18 inches long,

134

00:12:52,000 --> 00:12:57,000

and the impression that it made into the ground was about two inches deep,

135

00:12:57,000 --> 00:13:04,000

and the strange thing was that instead of being compressed ground,

136

00:13:04,000 --> 00:13:08,000

you could, say, even put your finger down into the soil,

137

00:13:08,000 --> 00:13:14,000

and it would go for about four inches through it, as if it was fine talcum powder.

138

00:13:14,000 --> 00:13:16,000

Sort of pulverized, huh?

139

00:13:16,000 --> 00:13:18,000

That's right, yes.

140

00:13:18,000 --> 00:13:23,000

Now, I run into a case of something like that very much myself,

141

00:13:23,000 --> 00:13:25,000

and we're not going to take time out to go into that.

142

00:13:25,000 --> 00:13:27,000

We're going to let you carry on with yours.

143

00:13:27,000 --> 00:13:28,000

All right.

144

00:13:28,000 --> 00:13:35,000

We had a man there in Galt who ran a chemical ground analysis laboratory,

145

00:13:35,000 --> 00:13:42,000

and he found many properties in the ground that were unusual.

146

00:13:42,000 --> 00:13:49,000

One of them was a blue-purple radiation from the soil samples that he had taken from this spot,

147

00:13:49,000 --> 00:13:54,000

and he noticed that no matter which way he pointed them through a microscope,

148

00:13:54,000 --> 00:13:58,000

that this blue-purple radiation faced the north.

149

00:13:58,000 --> 00:14:02,000

Now, we have to take time out every so often for one of our sponsors,

150

00:14:02,000 --> 00:14:07,000

so we're going to come back to the radiation and the purple coloring and the soil in a moment,

151

00:14:07,000 --> 00:14:14,000

but we're going to tell you about Sally's Natural Foods at 129 Southeast 1st Avenue in Miami,

152

00:14:14,000 --> 00:14:17,000

and that's opposite the Grayland Hotel.

153

00:14:17,000 --> 00:14:24,000

Your health food store is in business to give you the best possible foods for a long, healthy, and enjoyable life.

154

00:14:24,000 --> 00:14:28,000

In this day and age, when we are suffering from nutritional deficiencies,

155

00:14:28,000 --> 00:14:35,000

it is to our advantage to buy and use the best foods possible to build better bodies.

156

00:14:35,000 --> 00:14:38,000

Health food stores are dedicated to your health.

157

00:14:38,000 --> 00:14:41,000

They are in business for your health,

158

00:14:41,000 --> 00:14:49,000

and the products you buy from the health food stores are wholesome, uncontaminated, unpreserved, and as natural as possible.

159

00:14:49,000 --> 00:14:55,000

Today, when the prevention of disease and the correction of our mineral deficiencies are so necessary,

160

00:14:55,000 --> 00:15:01,000

it is important that we have natural foods to develop nutritionally well-balanced bodies.

161

00:15:01,000 --> 00:15:09,000

So, why put off until tomorrow the thrilling adventures in enjoying good food from the health food store

162

00:15:09,000 --> 00:15:12,000

and our health food store that we want you to get acquainted with,

163

00:15:12,000 --> 00:15:21,000

your nutrition center in your neighborhood is Sally's Natural Foods at 129 Southeast 1st Avenue in downtown Miami.

164

00:15:21,000 --> 00:15:28,000

We're going to find out some things about the soil up in Canada here that made things grow faster and bigger and better,

165

00:15:28,000 --> 00:15:37,000

and we hope more nutritional, so maybe we can send the people out to galt on terrio to grow some food in this spot

166

00:15:37,000 --> 00:15:43,000

in this 35-foot diameter and maybe we'll get some better food to send to Sally's health food store.

167

00:15:43,000 --> 00:15:48,000

What did the man find from the soil samples that he tested?

168

00:15:48,000 --> 00:15:54,000

Well, there were some wheat sheaves in the field along with most of the hay and whatnot,

169

00:15:54,000 --> 00:16:01,000

and he managed to get some grain samples in that 35-foot diameter area,

170

00:16:01,000 --> 00:16:05,000

and it wasn't for a while, of course, till he could grow them,

171

00:16:05,000 --> 00:16:13,000

and he found that the grain appeared much healthier and sturdier than elsewhere in the fields.

172

00:16:13,000 --> 00:16:19,000

Now, another thing he noticed that the ants in that area were much larger and stronger,

173

00:16:19,000 --> 00:16:24,000

and the ant hills were much higher than the ordinary ones that were surrounding this round spot.

174

00:16:24,000 --> 00:16:28,000

How long did this take to take effect with the ants and the ant hills?

175

00:16:28,000 --> 00:16:34,000

Oh, this was a matter of a number of weeks to a month or two,

176

00:16:34,000 --> 00:16:40,000

and he noticed once they got this radiation or whatever it was, it seemed to affect them.

177

00:16:40,000 --> 00:16:49,000

Another thing, this fellow took a number of soil samples and jars,

178

00:16:49,000 --> 00:16:55,000

and one of them was a little spider that accidentally got in the jar,

179

00:16:55,000 --> 00:17:01,000

and a number of weeks later, this spider grew to ten times its normal size.

180

00:17:01,000 --> 00:17:03,000

He's a monster!

181

00:17:03,000 --> 00:17:06,000

It sounds like it, doesn't it?

182

00:17:06,000 --> 00:17:11,000

How big was he to begin with? There's a problem. Ten times ten feet is a hundred feet.

183

00:17:11,000 --> 00:17:13,000

Let's hope he wasn't ten feet to begin with.

184

00:17:13,000 --> 00:17:19,000

No, I think he grew to about a quarter of an inch, so he must have been a very small spider.

185

00:17:19,000 --> 00:17:21,000

Well, maybe he would have grown anyway.

186

00:17:21,000 --> 00:17:28,000

Well, this fellow, he did quite a good job on it, and he found these other spiders,

187

00:17:28,000 --> 00:17:33,000

and they still kept their original size, so all he could figure was there was something in the soil

188

00:17:33,000 --> 00:17:35,000

that made him grow that large.

189

00:17:35,000 --> 00:17:38,000

So his brothers and sisters didn't get a dose of this?

190

00:17:38,000 --> 00:17:39,000

Evidently not.

191

00:17:39,000 --> 00:17:46,000

Unless he went back to the field and could find some more, but he didn't find any more.

192

00:17:46,000 --> 00:17:50,000

It was just this one lucky one, you might say. They got the extra dose.

193

00:17:50,000 --> 00:17:55,000

Well, maybe he knows his spiders, I hope so. I don't know my spiders. Go ahead.

194

00:17:55,000 --> 00:18:01,000

Well, another thing he did, he put six-inch-long nails into another jar of this soil.

195

00:18:01,000 --> 00:18:03,000

How much did they grow?

196

00:18:03,000 --> 00:18:05,000

Longer.

197

00:18:05,000 --> 00:18:08,000

Well, it was kind of shocking.

198

00:18:08,000 --> 00:18:16,000

He put some probes onto them from a galvanic meter, which measures the strengthened direction of electric current,

199

00:18:16,000 --> 00:18:23,000

and he noticed that the dial went right over to the other side, showing that there was electricity in the ground.

200

00:18:23,000 --> 00:18:32,000

And this was shown right on the Kitchener TV station, and so he had many witnesses for this effect.

201

00:18:32,000 --> 00:18:37,000

Although when we visited him, this dial only went about halfway over,

202

00:18:37,000 --> 00:18:43,000

so this charge just dissipates itself into the air, I guess, in a matter of time,

203

00:18:43,000 --> 00:18:51,000

and of course we didn't have that big showing on the meter.

204

00:18:51,000 --> 00:18:59,000

Now, anything else that this pseudoscientist found out? I don't know, he's a scientist or not.

205

00:18:59,000 --> 00:19:02,000

A pseudoscientist.

206

00:19:02,000 --> 00:19:11,000

Well, he couldn't fix the polarity of this charge at all, and it was very elusive, as he said.

207

00:19:11,000 --> 00:19:18,000

That's about all he could find out from this thing, except that he was going to grow more samples from the grain that he had grown,

208

00:19:18,000 --> 00:19:21,000

and we sort of lost track of them.

209

00:19:21,000 --> 00:19:25,000

Did you find out what happened the following year in the same spot?

210

00:19:25,000 --> 00:19:29,000

Did the same thing happen, or did you have no reports on that?

211

00:19:29,000 --> 00:19:34,000

No, there were no reports, and things gradually died out in that area.

212

00:19:34,000 --> 00:19:39,000

Although Jack has been looking for this machine to come back again, or a similar one,

213

00:19:39,000 --> 00:19:43,000

but he has never seen anything since then, and that's right up to date.

214

00:19:43,000 --> 00:19:46,000

Everything died out, including the spider.

215

00:19:46,000 --> 00:19:48,000

Just about, yeah.

216

00:19:48,000 --> 00:19:53,000

Now, how about the boy, the 15-year-old boy, Jack Stevens, what was your opinion of him,

217

00:19:53,000 --> 00:19:57,000

and how about his parents, how did they take this?

218

00:19:57,000 --> 00:20:02,000

Well, his parents more or less wanted him to keep on with his studies,

219

00:20:02,000 --> 00:20:08,000

and this thing kind of interrupted things, and no doubt it showed on his school marks a bit.

220

00:20:08,000 --> 00:20:12,000

The kids that he went to school with were always asking,

221

00:20:12,000 --> 00:20:15,000

well, have you seen any flying saucers today, Jack?

222

00:20:15,000 --> 00:20:25,000

And he was more or less ridiculed, and he was actually sorry that he had seen anything like this in the first place.

223

00:20:25,000 --> 00:20:35,000

And according to a story that he was talking to another reporter, Ray Francis from the Gallup Evening Reporter,

224

00:20:35,000 --> 00:20:41,000

he said, no, he hasn't seen anything, and he actually doesn't want to see anything anymore,

225

00:20:41,000 --> 00:20:47,000

and I think his parents have something to do with that, because it would take quite a lot from his studies

226

00:20:47,000 --> 00:20:53,000

thinking about these unusual things, whereas he should be concentrating on his schoolwork and getting an education.

227

00:20:53,000 --> 00:20:57,000

Now, Eileen, we haven't even talked to you yet.

228

00:20:57,000 --> 00:21:04,000

Now, that's not normal here for us not to talk to the wife of the team here.

229

00:21:04,000 --> 00:21:10,000

You were out there as well, and you saw some of these things, and you talked to the boy.

230

00:21:10,000 --> 00:21:15,000

Do you have anything to add that your husband may have flipped up on and missed,

231

00:21:15,000 --> 00:21:18,000

or any observations that you made that he didn't see?

232

00:21:18,000 --> 00:21:23,000

No, I just wanted to mention when you were asking about Jack,

233

00:21:23,000 --> 00:21:29,000

Gene mentioned that they didn't want this saucer to interfere with his studies,

234

00:21:29,000 --> 00:21:35,000

but actually Jack wasn't a great one for schooling, and I wanted just to mention that.

235

00:21:35,000 --> 00:21:38,000

I don't know what effect that would have on the story.

236

00:21:38,000 --> 00:21:42,000

I mean, he had no imagination, so I don't think he could make up a story like that.

237

00:21:42,000 --> 00:21:45,000

He didn't strike me as the type to make a story up.

238

00:21:45,000 --> 00:21:49,000

But what I meant was he wasn't the intellectual type.

239

00:21:49,000 --> 00:21:51,000

And he didn't read a lot of science fiction?

240

00:21:51,000 --> 00:21:55,000

I don't think he read anything very much to be quite frank from knowing him.

241

00:21:55,000 --> 00:21:58,000

Not even in school lessons, huh?

242

00:21:58,000 --> 00:22:06,000

Now, let's take a... well, before we do that, while we joke about these things sometimes,

243

00:22:06,000 --> 00:22:10,000

we know there's a very good possibility that this sort of thing can happen.

244

00:22:10,000 --> 00:22:16,000

We have come across many cases, newspaper clippings that have been sent to us,

245

00:22:16,000 --> 00:22:23,000

burnt out areas found mysteriously that no one knows how they happened.

246

00:22:23,000 --> 00:22:29,000

One case up in Kentucky where a man who had insomnia or some such disease

247

00:22:29,000 --> 00:22:34,000

and couldn't sleep at night, he got up at 3 o'clock in the morning and so forth in the summer

248

00:22:34,000 --> 00:22:38,000

and he went out and sat beside the pump or the well,

249

00:22:38,000 --> 00:22:41,000

and he saw something land in the field, a glowing light.

250

00:22:41,000 --> 00:22:48,000

He didn't go out that night because he didn't feel like going out alone at night in the dark

251

00:22:48,000 --> 00:22:50,000

to see any such strange thing.

252

00:22:50,000 --> 00:22:54,000

But the following morning there was a, I think it was a 13-foot circle,

253

00:22:54,000 --> 00:22:58,000

burned out not all through the circle, but just the outside rim.

254

00:22:58,000 --> 00:23:03,000

And this was a postman or a...

255

00:23:03,000 --> 00:23:06,000

worked for the post office anyway in this town up in Kentucky.

256

00:23:06,000 --> 00:23:10,000

And apparently the Air Force knows that these things do happen

257

00:23:10,000 --> 00:23:16,000

because I have here before me the Air Force Operations and Training Memorandum,

258

00:23:16,000 --> 00:23:24,000

page 15 of this memorandum that was put out on the 24th of December of 1959

259

00:23:24,000 --> 00:23:27,000

in which the Air Force says,

260

00:23:27,000 --> 00:23:29,000

UFOs are serious business.

261

00:23:30,000 --> 00:23:36,000

And they tell how the intelligence officer or the provost marshal of the base

262

00:23:36,000 --> 00:23:41,000

should investigate UFOs and some of the things that he should have

263

00:23:41,000 --> 00:23:47,000

besides an investigative background, if possible, a scientific or a technical background,

264

00:23:47,000 --> 00:23:52,000

he should be, and now we quote from this operations and training memorandum,

265

00:23:52,000 --> 00:23:58,000

he should be equipped with binoculars, camera, Geiger counter,

266

00:23:58,000 --> 00:24:03,000

a compass, certainly ties in the radiation, magnifying glass and have a source

267

00:24:03,000 --> 00:24:06,000

for containers in which to store samples.

268

00:24:06,000 --> 00:24:10,000

And I assume that that means spiders as well,

269

00:24:10,000 --> 00:24:14,000

but grows 10 times the normal size to store in these jars

270

00:24:14,000 --> 00:24:17,000

or whatever kind of containers they're going to use.

271

00:24:17,000 --> 00:24:20,000

Now let's take a moment out for a public service announcement.

272

00:24:20,000 --> 00:24:24,000

We're going to tell you about the schedule of lectures

273

00:24:24,000 --> 00:24:28,000

that are going to take place on the week of June the 12th

274

00:24:28,000 --> 00:24:34,000

at the Everglades Hotel at 244 Biscayne Boulevard in downtown Miami.

275

00:24:34,000 --> 00:24:39,000

This is Dr. Schwartz's School of Anti-Communism,

276

00:24:39,000 --> 00:24:42,000

and if you could make all of this week,

277

00:24:42,000 --> 00:24:45,000

I don't think there's much that you would miss on this particular subject

278

00:24:45,000 --> 00:24:51,000

because they have about 15 lectures over this five-day period

279

00:24:51,000 --> 00:24:56,000

from Monday through Friday, June the 12th through the 16th,

280

00:24:56,000 --> 00:25:01,000

about 15 lectures and at least a half a dozen films.

281

00:25:01,000 --> 00:25:07,000

So you would get something in the 20-some sessions here

282

00:25:07,000 --> 00:25:11,000

for an enrollment fee for the full course of \$20.

283

00:25:11,000 --> 00:25:17,000

Now if you want a one-days course, which would entitle you to about five lectures

284

00:25:17,000 --> 00:25:24,000

and two films, that is \$5, or any one particular evening is \$2,

285

00:25:24,000 --> 00:25:31,000

and they have such people as Dr. Schwartz and Herb Philbrick,

286

00:25:31,000 --> 00:25:41,000

the counterspy with the FBI and the man whom the television series,

287

00:25:41,000 --> 00:25:47,000

I Led Three Lives, was based upon, and he will be here for a number of these lectures.

288

00:25:47,000 --> 00:25:54,000

So if you're interested in this, check further with the people involved

289

00:25:54,000 --> 00:25:59,000

at the Everglades Hotel or get in touch with me

290

00:25:59,000 --> 00:26:05,000

and I can get you in touch with the individuals who can give you more information on this.

291

00:26:05,000 --> 00:26:09,000

That's the week of June the 12th through the 16th.

292

00:26:09,000 --> 00:26:16,000

Now let's go back to our guest here, Jean and Eileen Duplantier.

293

00:26:16,000 --> 00:26:22,000

I try to pronounce this the English way because the French way throws me almost here.

294

00:26:22,000 --> 00:26:24,000

So we'll see.

295

00:26:24,000 --> 00:26:29,000

What do they call this up in Canada? They pronounce it the French way or the English?

296

00:26:29,000 --> 00:26:32,000

Well, where I come from, it's the English way. Duplantier.

297

00:26:32,000 --> 00:26:33,000

Duplantier.

298

00:26:33,000 --> 00:26:35,000

And they give me the French again?

299

00:26:35,000 --> 00:26:36,000

Duplantier.

300

00:26:36,000 --> 00:26:38,000

Duplantier, say.

301

00:26:38,000 --> 00:26:42,000

That sounds kind of affected, so I don't bother with that.

302

00:26:42,000 --> 00:26:50,000

Well, we'll try to do this the English way because I don't think we have too many Frenchmen here in the listening audience.

303

00:26:50,000 --> 00:26:54,000

Now let's see. Well, I think we pretty well covered the Galt report.

304

00:26:54,000 --> 00:26:59,000

Now there are a few other things that we might want to cover up there.

305

00:26:59,000 --> 00:27:05,000

There's a man named Wilbur Smith that we've heard somewhat of down in this part of the country.

306

00:27:05,000 --> 00:27:15,000

It seems that he's an engineer up in Toronto and he's in charge or was in charge at one time of a tracking station.

307

00:27:15,000 --> 00:27:18,000

Oh, he's in Ottawa, not in Toronto.

308

00:27:18,000 --> 00:27:28,000

A tracking station that was set up at Shirley Bay, Ontario, and was closed down after some time.

309

00:27:28,000 --> 00:27:30,000

At least the story we got here.

310

00:27:30,000 --> 00:27:38,000

Well, it was one of these billion dollar affairs or whether it was just a little a homemade workshop affair, but maybe you could fill us in on this.

311

00:27:38,000 --> 00:27:39,000

What was this?

312

00:27:39,000 --> 00:27:43,000

And it was written up in a number of publications and so forth.

313

00:27:43,000 --> 00:27:48,000

What sort of a investigative procedure was this?

314

00:27:48,000 --> 00:27:57,000

Well, he knew there was something going on in the sky and he wanted some material in the way of detectors and one thing and another.

315

00:27:57,000 --> 00:28:06,000

And the government had extra equipment that they weren't using at the time and he asked for a loan of them.

316

00:28:06,000 --> 00:28:15,000

And there wasn't anything too expensive and they gave him this little shack in Shirley's Bay to store this equipment.

317

00:28:15,000 --> 00:28:26,000

And they never did really get anything except just once after quite a number of months when the detector went haywire that something was overhead.

318

00:28:26,000 --> 00:28:41,000

But they could never prove one way or another what it was, but they knew something unusual had gone overhead because airplanes, which did the same thing, did not affect this instrument.

319

00:28:41,000 --> 00:28:54,000

And so after more or less fruitless research up there, they disbanded and Mr. Smith just went back to investigating on his own again.

320

00:28:54,000 --> 00:29:02,000

Because the Air Force thought well he had fooled around enough with this and they didn't want to get their name mixed up too much with it.

321

00:29:02,000 --> 00:29:05,000

It was already getting mixed up. That's probably why they stopped it.

322

00:29:05,000 --> 00:29:06,000

That is the reason, yes.

323

00:29:06,000 --> 00:29:18,000

Well, what do you think of this man, Wilbur Smith? Is he just an amateur researcher like ourselves or is he quite a reputable engineer or what is he?

324

00:29:18,000 --> 00:29:30,000

Well, evidently he's quite a well-known engineer up there. I think he's head of one of the departments and he's a very intelligent person and he sure can talk a blue streak.

325

00:29:30,000 --> 00:29:39,000

He's a marvelous person for you to have down here. I'm sure he could give you much more information than I could on activities in Ontario.

326

00:29:39,000 --> 00:29:56,000

He lectures and talks to a great many people and has a great use of the English vocabulary so that he can really say things that you may need a dictionary once in a while to understand what he's saying.

327

00:29:56,000 --> 00:30:04,000

Well, we can find a lot of people that can do that. I keep a dictionary in my elbow all the time. Once in a while I even open it.

328

00:30:04,000 --> 00:30:07,000

Most of the time I just prop my elbow on it or curse.

329

00:30:07,000 --> 00:30:20,000

Now, time is now 11.30 and time to tell the listeners that we're listening to WMIE 11.40 on your dial where 11.40 serves more than a million people.

330

00:30:20,000 --> 00:30:27,000

And we're going to tell you now about the New York electronic supply company at 505 North Miami Avenue.

331

00:30:27,000 --> 00:30:34,000

Where if you're a Do-It-Yourself fan you can get your radio and your TV tubes at a 20% discount.

332

00:30:34,000 --> 00:30:40,000

And of course that's quite a saving and it's worth a trip to the New York electronic supply company.

333

00:30:40,000 --> 00:30:48,000

And if you're not a Do-It-Yourself fan and you don't know one part of a radio from the other except the knobs like me.

334

00:30:48,000 --> 00:31:01,000

And now back to Gulf Ontario with our guests of the evening tonight, Gene Duplantier and his lovely wife Eileen Duplantier.

335

00:31:01,000 --> 00:31:12,000

Who is the stenographer and keeps the files straight and all this sort of thing that I don't seem to manage to be able to do around here.

336

00:31:12,000 --> 00:31:16,000

I usually have to hunt a while before I can find anything in my files.

337

00:31:16,000 --> 00:31:24,000

Now something I wanted to mention before we go into any more of these investigations up in Canada.

338

00:31:24,000 --> 00:31:34,000

In case you missed it, they did bring up more of this wreckage of this plane in the Banana River up near Jacksonville,

339

00:31:34,000 --> 00:31:37,000

between Jacksonville and Daytona Beach.

340

00:31:37,000 --> 00:31:50,000

And they found it was not one of the five Avengers that disappeared back in 1945 from Fort Lauderdale on December the 5th of 1945.

341

00:31:50,000 --> 00:31:58,000

Now I was rather hoping this would not be one of them and of course that's the way it turned out.

342

00:31:58,000 --> 00:32:02,000

Because they would have spoiled a perfectly good mystery.

343

00:32:02,000 --> 00:32:10,000

And now on the other hand if one of them disappeared by falling into this narrow water known as the Banana River,

344

00:32:10,000 --> 00:32:18,000

did they all five fall into this and what happened to the PBY that went out to search for them.

345

00:32:18,000 --> 00:32:27,000

So just as well in my opinion that this was not one of those crafts because here's a perfectly good mystery that would have been shot all the pieces.

346

00:32:27,000 --> 00:32:32,000

If it had turned out to be one of those or maybe it would have given us a bigger mystery.

347

00:32:32,000 --> 00:32:38,000

Where are the other five? Where are the other four Avengers and where's the other PBY?

348

00:32:38,000 --> 00:32:42,000

Anyway it's one of the Navy's greatest mysteries still unsolved.

349

00:32:42,000 --> 00:32:46,000

Now let's see what we can find in the way of mysteries up in Canada.

350

00:32:46,000 --> 00:33:00,000

Now you have a report up there of not too recent vintage I guess of six months or so ago of a Captain Ward with Trans-Canada Airlines

351

00:33:00,000 --> 00:33:06,000

that saw something up in the area. Where was it up around Quebec, Montreal?

352

00:33:06,000 --> 00:33:11,000

Yes he was on a flight from seven islands Quebec down to Montreal.

353

00:33:11,000 --> 00:33:17,000

And when he was about halfway which was just about over back at the Ville, Quebec,

354

00:33:17,000 --> 00:33:29,000

he noticed this pink light in the sky and then there was another pink light like rings emanating from the center of this bright light.

355

00:33:29,000 --> 00:33:40,000

And his passengers and crew members noticed this and there happened to be two CF-100 jets in the area at the time and they noticed that.

356

00:33:41,000 --> 00:33:45,000

Those were the planes of the Royal Canadian Air Force.

357

00:33:45,000 --> 00:33:58,000

Then I believe there was a Lufthansa passenger airliner flying over New York State that noticed this and I think there was one other airliner that saw this phenomenon in the sky.

358

00:33:58,000 --> 00:34:06,000

So he had many witnesses even more so than probably Captain Killian on his run to Detroit a little while ago.

359

00:34:07,000 --> 00:34:20,000

We had one of our friends in Quebec investigating the case and although he didn't say too much when he was talking to Captain Ward,

360

00:34:20,000 --> 00:34:33,000

he sent a letter to him asking for more information and he also phoned him but after that there was

no answer and no return letter.

361

00:34:33,000 --> 00:34:44,000

So whether the silence group had gotten to him or not, that's something maybe we'll never know unless of course in the interim while I've been here, he has been able to get in touch with him.

362

00:34:44,000 --> 00:34:55,000

This fellow that investigated him was told that there were a couple of intelligence officers into Canada to keep him quiet.

363

00:34:55,000 --> 00:35:00,000

Although on investigating this he could find no evidence of this.

364

00:35:00,000 --> 00:35:07,000

Now this may have just been a scare campaign to keep him from investigating further into this saucer mystery.

365

00:35:07,000 --> 00:35:17,000

It's hard to say but if he was happened to be a nervous character it might have succeeded in keeping him from investigating any more saucer activity in Canada.

366

00:35:17,000 --> 00:35:29,000

Well I've had cases where airline pilots have reported something here, pilots flying out of Miami and immediately after they were very hot on this

367

00:35:29,000 --> 00:35:41,000

and were excited about what they saw and had told other pilots who in turn had told me but by the time I got to them it wasn't a case of any pressure on them.

368

00:35:41,000 --> 00:35:51,000

It was just a case that they decided in 48 hours time that it would be far better if they didn't say anything about it or get any publicity and therefore they wouldn't get any ridicule.

369

00:35:51,000 --> 00:35:55,000

So it's very possibly that same case, wouldn't you think so in this case?

370

00:35:55,000 --> 00:36:07,000

I would think so. Actually I think there's very little truth in all this business about silence groups and having people and three men in black and so forth.

371

00:36:07,000 --> 00:36:14,000

I don't think that would happen too much especially in Canada because we don't have that much going on up there.

372

00:36:14,000 --> 00:36:21,000

It seems the saucer's seen it just visit rarely and so we don't have too much action going up there.

373

00:36:21,000 --> 00:36:28,000

You mean you don't have any bill collectors up in Canada? I've always told these people what these three men in black were.

374

00:36:28,000 --> 00:36:37,000

They were bill collectors who came around to collect bills from people who publish UFO publications and can't meet their expenses and you haven't been calling on?

375

00:36:37,000 --> 00:36:39,000

Not yet Norbert Norbert.

376

00:36:39,000 --> 00:36:43,000

How about you? Have there been any calling on you while your husband's been at work?

377

00:36:43,000 --> 00:36:46,000

No I just don't answer the door.

378

00:36:46,000 --> 00:36:47,000

See?

379

00:36:47,000 --> 00:36:50,000

She's scared already, already.

380

00:36:50,000 --> 00:36:55,000

Now maybe she was out with these four hunters. Did your wife ever go hunting with four hunters?

381

00:36:55,000 --> 00:37:05,000

As a case where they were driving along this trans-Canada highway I understand and something hovered over the car and paced them for a long time.

382

00:37:05,000 --> 00:37:09,000

Now we get those reports now and then. I don't think this one ever appeared in any newspapers did it?

383

00:37:09,000 --> 00:37:28,000

Well I believe this happened around Sunday of October 25th in 1959 and it is very similar to these cases that happened in 57 in a number of ways that they were trailed by this object for about 30 miles along this trans-Canada highway.

384

00:37:28,000 --> 00:37:45,000

These four hunters were coming back from their little expedition and this oval shaped loying object hovered over their car and went in front of it and came back and behind it and as I say it falls for about 30 miles.

385

00:37:45,000 --> 00:37:53,000

And they noticed that it was spinning but they didn't roll down the car window so they couldn't actually find out if it was making any noise.

386

00:37:54,000 --> 00:38:05,000

It seemed to be near enough to them that they could have heard some noise had they stopped the car which they did at one time and this object stopped right over the car but they still didn't open the windows.

387

00:38:05,000 --> 00:38:08,000

I think they were a bit too afraid of it.

388

00:38:08,000 --> 00:38:26,000

So when they got to town they told the people about it and should say that after this 30 mile ride that had followed them it suddenly veered off to one side and took off and just disappeared into the sunset you might say.

389

00:38:26,000 --> 00:38:31,000

So it did appear in the Port Arthur newspaper.

390

00:38:31,000 --> 00:38:45,000

That's about all I can tell you about that because they mention the names of the people but I haven't put them down here because they could be just about anybody that happened in many of these cases.

391

00:38:45,000 --> 00:38:48,000

They didn't say what these hunters were hunting.

392

00:38:48,000 --> 00:38:53,000

Well they probably were hunting deer or some animal something like that.

393

00:38:53,000 --> 00:39:00,000

There are an awful lot of woods up there and deer like to live around that district.

394

00:39:00,000 --> 00:39:02,000

Well maybe they didn't find any in there.

395

00:39:02,000 --> 00:39:05,000

They had some story to tell their wives when they got home.

396

00:39:05,000 --> 00:39:09,000

Well at least to spread some light in the subject there.

397

00:39:09,000 --> 00:39:12,000

Well we've had cases like that before.

398

00:39:12,000 --> 00:39:19,000

There have been five cases at least from South America where a doctor in a medical school Dr. Funes you may have read some of those.

399

00:39:19,000 --> 00:39:20,000

Yes.

400

00:39:20,000 --> 00:39:27,000

And the case up in upstate New York where some man claimed that this thing had followed his car.

401

00:39:27,000 --> 00:39:39,000

The case up in North Carolina where this truck driver was scared to death when he came into the city and said this ball of light had followed his car on this lonely road.

402

00:39:39,000 --> 00:39:48,000

These things have happened apparently and I know of a case where a salesman this one I know personally was driving through a area over in the city.

403

00:39:48,000 --> 00:39:54,000

The area over in West Florida, Florida near Arcadia and a big light as big as the moon.

404

00:39:54,000 --> 00:40:03,000

He said came out of the sky and followed him along and for I'd say half a minute and then it boom it just took off.

405

00:40:03,000 --> 00:40:07,000

And he swears that this was something highly unusual.

406

00:40:07,000 --> 00:40:10,000

He had the feeling that something was watching him.

407

00:40:10,000 --> 00:40:16,000

Of course I imagine all over myself in a lonely place like this I would feel the same way.

408

00:40:16,000 --> 00:40:23,000

Even if nothing was watching me you know he was sober and a non drinking salesman.

409

00:40:23,000 --> 00:40:25,000

I've known this salesman for a long time.

410

00:40:25,000 --> 00:40:27,000

He called on me and my business.

411

00:40:27,000 --> 00:40:40,000

He sold supplies for a photographic company and certainly a I'd say he was in his about his sixties and not a young lad out on any binge by any means.

412

00:40:40,000 --> 00:40:48,000

Now if you had any contact claims up in Canada I know all the crackpots are down here in the United States.

413

00:40:48,000 --> 00:40:50,000

Canadians are conservative.

414

00:40:50,000 --> 00:40:51,000

Canadians are conservative.

415

00:40:51,000 --> 00:40:53,000

We can use some conservatives.

416

00:40:53,000 --> 00:40:55,000

Is that the reason they've been no claims?

417

00:40:55,000 --> 00:41:03,000

Oh I don't know whether they're not overly dramatic or anything actually and boys just certainly haven't had any claims of contacts.

418

00:41:03,000 --> 00:41:10,000

Well the burnishers are conservative too but we've had some claims out in Great Britain you know out of England and Scotland even yet already.

419

00:41:10,000 --> 00:41:11,000

Cedric Ellingham.

420

00:41:11,000 --> 00:41:14,000

Maybe we haven't enough people.

421

00:41:14,000 --> 00:41:17,000

I just get a few crackpots.

422

00:41:17,000 --> 00:41:21,000

Any place you got people you got crackpots.

423

00:41:21,000 --> 00:41:27,000

How about you Jean what are your opinions on that on the lack of contact cases from Canada.

424

00:41:27,000 --> 00:41:45,000

Well actually I haven't heard of any true contact story except there have been a few cases of these mediums having contacted space people but who knows what they really are.

425

00:41:45,000 --> 00:42:01,000

If there's space people or just earthbound entities that haven't gone too far I don't know what they are but they give you a good line every once in a while with different things that are happening but of course there's no way of proving them.

426

00:42:01,000 --> 00:42:07,000

No that's the problem with all of these contacts particularly the mental ones no proof.

427

00:42:07,000 --> 00:42:09,000

You had something you wanted to say Eileen.

428

00:42:09,000 --> 00:42:13,000

I was just thinking about the chap who his ancestors were in Martians.

429

00:42:13,000 --> 00:42:16,000

We do come across a few odd ones.

430

00:42:16,000 --> 00:42:19,000

A few odd models up in Canada.

431

00:42:19,000 --> 00:42:22,000

Well I read that case.

432

00:42:22,000 --> 00:42:26,000

I was not too very much impressed with it.

433

00:42:26,000 --> 00:42:31,000

He seemed to be sort of a recluse or an eccentric living all by himself.

434

00:42:31,000 --> 00:42:33,000

Wasn't he.

435

00:42:33,000 --> 00:42:55,000

Yes that's right he lived in a small very small house and he kept to himself and he was building a sort of saucer craft in his back room and he went to a number of different industries there that machined the parts for him and he used to watch the men as they did it.

436

00:42:55,000 --> 00:43:01,000

He didn't get anything done in one place so they wouldn't know what part was for what or so they couldn't figure it out.

437

00:43:01,000 --> 00:43:10,000

He was very careful because he didn't want anybody finding out what he was doing or stealing his invention.

438

00:43:10,000 --> 00:43:15,000

So you don't know whether he ever succeeded in getting all these parts but the other even.

439

00:43:15,000 --> 00:43:17,000

Well spare parts.

440

00:43:17,000 --> 00:43:31,000

Well the first one he made was partly out of aluminum and he took it to Niagara Falls Ontario and he did fly for quite a while but the thing heated up and burnt the main parts out of it and of course he landed.

441

00:43:31,000 --> 00:43:46,000

I don't know how far up in the air he got with it but from then on he was going to do the whole thing over in nickel and he was living in a little shack right off at the International Nickel Company so he was very handy to his parts.

442

00:43:46,000 --> 00:43:51,000

Well I'll tell you what he should do next after we give you a message from the Le Mans studio.

443

00:43:51,000 --> 00:43:56,000

Now this one is all a message in poetry here.

444

00:43:56,000 --> 00:43:59,000

Now you can't blame that on me because I'm not a poet.

445

00:43:59,000 --> 00:44:03,000

I've got a ghost writer and my ghost is a poet.

446

00:44:03,000 --> 00:44:06,000

So let's see what the ghost writer has to say.

447

00:44:06,000 --> 00:44:16,000

It was the 18th of April in 75 if only some men were now alive who felt the oppression of a foreign drive.

448

00:44:16,000 --> 00:44:21,000

From their ranks would arise a voice to tell us clear we have no choice.

449

00:44:21,000 --> 00:44:24,000

Our freedom was not easily won.

450

00:44:24,000 --> 00:44:27,000

War is hell to every mother's son.

451

00:44:27,000 --> 00:44:34,000

There has arisen in our midst a foe concealed with a mighty fist who chooses to lie and cheat and steal.

452

00:44:34,000 --> 00:44:38,000

At best it is difficult with this enemy to deal.

453

00:44:38,000 --> 00:44:43,000

Our weaker brothers have fallen prey to their methods and the things they say.

454

00:44:43,000 --> 00:44:50,000

We watch and wait for we know not what yet we must act now or lose a lot.

455

00:44:50,000 --> 00:44:53,000

Who amongst you has balanced the scale?

456

00:44:53,000 --> 00:44:57,000

Will you live as free men or in slavery fail?

457

00:44:57,000 --> 00:45:00,000

Now read the newspapers carefully and well.

458

00:45:00,000 --> 00:45:05,000

Then in groups discuss and tell all that you find that is wrong or right.

459

00:45:05,000 --> 00:45:08,000

Together we can win this fight.

460

00:45:08,000 --> 00:45:12,000

My ghost writer is quite a poet I would say wouldn't you?

461

00:45:12,000 --> 00:45:14,000

Yes he is.

462

00:45:14,000 --> 00:45:19,000

Now let's see where were we before we picked up ghost writing.

463

00:45:19,000 --> 00:45:24,000

No we were with Mr. Pritchelsky from Port Colburn who was building the...

464

00:45:24,000 --> 00:45:27,000

his nickel plated spying saucer.

465

00:45:27,000 --> 00:45:29,000

Oh yes and the back green of the house.

466

00:45:29,000 --> 00:45:34,000

And the first one got too hot with aluminum.

467

00:45:34,000 --> 00:45:38,000

Now what he should have done is taken this to Niagara Falls and went over the falls,

468

00:45:38,000 --> 00:45:43,000

not in a barrel but in his saucer and cooled it off.

469

00:45:43,000 --> 00:45:45,000

But what did he find out with the nickel?

470

00:45:45,000 --> 00:45:49,000

Well he was just constructing this thing when we visited him.

471

00:45:49,000 --> 00:45:53,000

Although we were unlucky to see him at the time.

472

00:45:53,000 --> 00:46:01,000

But another one of my people that I was in contact with down in Buffalo had visited him.

473

00:46:01,000 --> 00:46:10,000

And he had seen this machine in his back room and various other items from Mars that he had hanging on his wall.

474

00:46:10,000 --> 00:46:16,000

Like pictures of animals that look very much like the ones we have here on earth.

475

00:46:16,000 --> 00:46:20,000

And if I didn't know any better I would say they are the same.

476

00:46:20,000 --> 00:46:23,000

But he told you they were from Mars so now you know.

477

00:46:23,000 --> 00:46:25,000

Yeah I guess I have to believe him.

478

00:46:25,000 --> 00:46:29,000

He didn't give you a pedigree or a sample.

479

00:46:29,000 --> 00:46:32,000

He didn't give you a sample of his dog's hair.

480

00:46:32,000 --> 00:46:38,000

No all this was according to my friend in Buffalo who had visited him.

481

00:46:38,000 --> 00:46:43,000

He went down there but we waited for a whole day but we couldn't get hold of him.

482

00:46:43,000 --> 00:46:50,000

Although we went to his house and looked in but no one was there and we were unlucky enough not to see him.

483

00:46:50,000 --> 00:46:52,000

We were lucky enough not to see him.

484

00:46:52,000 --> 00:46:54,000

As I said we were lucky enough not to see him.

485

00:46:54,000 --> 00:47:00,000

You never know you might have quite a distract me in this thing and made the thing take off and I might not be here tonight.

486

00:47:00,000 --> 00:47:02,000

Bye bye Gene.

487

00:47:02,000 --> 00:47:04,000

Where did he get all this nickel?

488

00:47:04,000 --> 00:47:08,000

Was it just an accident that there was a nickel company across the highway?

489

00:47:08,000 --> 00:47:11,000

And did they mind if he got his nickel there?

490

00:47:11,000 --> 00:47:15,000

No as long as he has the money they'll make anything for the people.

491

00:47:15,000 --> 00:47:18,000

Well he didn't get these parts from their scrap pile then.

492

00:47:18,000 --> 00:47:22,000

No he had to have it engineered the way that he wanted.

493

00:47:22,000 --> 00:47:28,000

He drew the diagrams to the milling of an inch I suppose and they had to machine them right there.

494

00:47:28,000 --> 00:47:30,000

Under his watchful eye.

495

00:47:30,000 --> 00:47:34,000

Yes that's right so he did it correctly he didn't want any mistakes this time.

496

00:47:34,000 --> 00:47:39,000

Well I don't blame him you can't trust earth people so that's why you've got to watch these things.

497

00:47:39,000 --> 00:47:47,000

Now to get this on to Wilbur Smith again I understand he made some kind of a magnetic detector.

498

00:47:47,000 --> 00:47:51,000

Did you see that or know anything about it?

499

00:47:51,000 --> 00:47:59,000

I've never seen it but he drew a diagram for us and it consists of a metal pipe and a piece of nylon cord

500

00:47:59,000 --> 00:48:05,000

and a little indicator on a scale.

501

00:48:05,000 --> 00:48:11,000

And it seems that when you go to different areas of the provinces of Ontario or Quebec

502

00:48:11,000 --> 00:48:14,000

which is the only place he has tried it out

503

00:48:14,000 --> 00:48:18,000

he noticed that this indicator goes to one side of the scale.

504

00:48:18,000 --> 00:48:24,000

And in there he's found something unusual in the air which he calls the binding force of matter.

505

00:48:24,000 --> 00:48:30,000

And in Quebec there was a certain area where an airplane had crashed

506

00:48:30,000 --> 00:48:40,000

and a number of lives were lost and he took this little gadget up there and he noticed the dial going right to

507

00:48:40,000 --> 00:48:48,000

at least the pointer going right to the end of the dial showing that there was this binding force in the air.

508

00:48:48,000 --> 00:48:55,000

Now he went back there about two months later and he noticed this force was no longer there.

509

00:48:55,000 --> 00:49:05,000

And going from various places he noticed that there were areas where this force was concentrating

510

00:49:05,000 --> 00:49:12,000

and he has a theory that if a plane should fly through this area that it could disintegrate

511

00:49:12,000 --> 00:49:20,000

or cause some part of the motor or airplane to malfunction and thereby cause a crash.

512

00:49:20,000 --> 00:49:27,000

Now there is one thing he's not sure of whether this force just dissipates into the air after a while

513

00:49:27,000 --> 00:49:34,000

not saying where it comes from originally or whether it just moves on as if a cloud would have moved over a field.

514

00:49:34,000 --> 00:49:38,000

Is this what we hear referred to at times as a magnetic vortex?

515

00:49:38,000 --> 00:49:41,000

Yes, I think that is what he's referring to.

516

00:49:41,000 --> 00:49:48,000

He noticed that this little instrument can also detect great amounts of radiation in the air

517

00:49:48,000 --> 00:49:53,000

especially a few years ago when many atomic bombs were being set off in Nevada.

518

00:49:53,000 --> 00:50:01,000

And of course the fallout and the wind would blow over the northern section of the states and into Ontario

519

00:50:01,000 --> 00:50:07,000

which dips very greatly into the states if you should look at a map.

520

00:50:07,000 --> 00:50:13,000

And of course we would get some of this area that the fallout would fall into.

521

00:50:13,000 --> 00:50:19,000

Well was this an area of a stronger magnetic field or a weaker magnetic field?

522

00:50:19,000 --> 00:50:23,000

No, this was a stronger magnetic field.

523

00:50:23,000 --> 00:50:28,000

For the ordinary areas that he covered he set this little indicator at zero

524

00:50:28,000 --> 00:50:34,000

and then he would have it going up a number of tens of numbers.

525

00:50:34,000 --> 00:50:41,000

And when you would get into one of these vortexes the nylon cord would tighten up very much

526

00:50:41,000 --> 00:50:45,000

and turn the indicator up to one of the higher numbers.

527

00:50:45,000 --> 00:50:50,000

And although it wasn't there to see this indicator showed that there was something there.

528

00:50:50,000 --> 00:50:54,000

Now you say a nylon cord this doesn't sound much like magnetic.

529

00:50:54,000 --> 00:50:58,000

It would have to be metal, wouldn't it, to operate magnetically?

530

00:50:58,000 --> 00:51:02,000

Well he had, there probably was something more to this.

531

00:51:02,000 --> 00:51:10,000

There was the metal pipe and the little loops that he had at either end of this pipe to hold it.

532

00:51:10,000 --> 00:51:14,000

And there might have been something in that.

533

00:51:14,000 --> 00:51:19,000

He says that he got this from sources that he didn't wish to name at the time

534

00:51:19,000 --> 00:51:25,000

because they were unorthodox and he was just experimenting with this

535

00:51:25,000 --> 00:51:31,000

but he found out from these sources that there was something to this that he was told.

536

00:51:31,000 --> 00:51:37,000

Mr. Polkrzewski, did he get them from the nickel company across his street?

537

00:51:37,000 --> 00:51:39,000

Not so far away.

538

00:51:39,000 --> 00:51:45,000

But we know that Wilbur Smith is more scientifically minded from what we get down here

539

00:51:45,000 --> 00:51:52,000

and from what I have read of a number of his writings he seems to be a very intelligent individual.

540

00:51:52,000 --> 00:51:57,000

Yes he is and I don't think he would fool around with any foolish contraption

541

00:51:57,000 --> 00:52:00,000

unless it had some worth attributed to it.

542

00:52:01,000 --> 00:52:09,000

Nylon cord, I don't know whether nylon tightens up depending on the moisture content of the air or not

543

00:52:09,000 --> 00:52:14,000

is it possible that this could have been strictly a case of humidity in the air that wasn't doing this?

544

00:52:14,000 --> 00:52:23,000

Well it could have been but he said that the only thing that was any good to use for this instrument was nylon cord.

545

00:52:23,000 --> 00:52:31,000

So he must have experimented before or was just told from his contacts who told him about this

546

00:52:31,000 --> 00:52:33,000

that that was what he should use for it.

547

00:52:33,000 --> 00:52:41,000

The whole story is kind of elusive and up in the air so it's hard to say what is what.

548

00:52:41,000 --> 00:52:43,000

I just have to take his word for it.

549

00:52:43,000 --> 00:52:51,000

I don't know why that story should be so elusive when everything else in this field is so solid and factual and true.

550

00:52:51,000 --> 00:52:57,000

Well it just shows to go you that there are strange things going on no matter where you are

551

00:52:57,000 --> 00:53:05,000

and up in Canada the population of course is not nearly as concentrated as it is here in the United States.

552

00:53:05,000 --> 00:53:11,000

I was rather surprised a little earlier in the evening when I asked you about the population of Canada

553

00:53:11,000 --> 00:53:15,000

and you said 18 million is that right for the entire Canada?

554

00:53:15,000 --> 00:53:19,000

Yes it won't be that shortly and by the end of the year probably

555

00:53:19,000 --> 00:53:21,000

they think it will be about 18 million.

556

00:53:21,000 --> 00:53:27,000

Canada comprises an area in square miles equal to the United States doesn't it?

557

00:53:27,000 --> 00:53:34,000

Yes and very much more than that but it's mostly rocks and woods and full of wolves and deers

558

00:53:34,000 --> 00:53:42,000

and of course when you get up north there's not nothing but tundra and snow and what not like that.

559

00:53:42,000 --> 00:53:46,000

There's very little populace up in the North Country.

560

00:53:46,000 --> 00:53:52,000

The people are mostly settled along the southern most part of Canada

561

00:53:52,000 --> 00:53:55,000

which naturally borders right along with the states.

562

00:53:55,000 --> 00:53:58,000

And along the St. Lawrence River.

563

00:53:58,000 --> 00:54:03,000

How big is Montreal and Quebec in population? They're fairly large aren't they?

564

00:54:03,000 --> 00:54:06,000

Well Montreal is Canada's largest city.

565

00:54:06,000 --> 00:54:15,000

We have about 1 million, it's about 1,700,000 in metropolitan Toronto

566

00:54:15,000 --> 00:54:19,000

and of course Montreal is over the 2 million mark.

567

00:54:19,000 --> 00:54:21,000

It's a very huge city.

568

00:54:21,000 --> 00:54:25,000

Bigger than Miami? Yes bigger than Miami.

569

00:54:25,000 --> 00:54:32,000

I know I was up there and I couldn't find nobody to talk English with me.

570

00:54:32,000 --> 00:54:37,000

Everybody wanted to talk French. How about in Toronto?

571

00:54:37,000 --> 00:54:42,000

Well in Toronto at the moment we have a very cosmopolitan crowd.

572

00:54:42,000 --> 00:54:48,000

There are many people from Europe coming over so it is getting to be a city more or less like New York

573

00:54:48,000 --> 00:54:53,000

where many languages are spoken and it is not like it was many years ago

574

00:54:53,000 --> 00:54:59,000

when we had English, Irish and Scotch and a few assorted Europeans.

575

00:54:59,000 --> 00:55:04,000

Now we have a great many Europeans over there and consequently the city has grown drastically

576

00:55:04,000 --> 00:55:07,000

in the last 10 to 15 years.

577

00:55:07,000 --> 00:55:11,000

It is you might say a boom town or a boom city.

578

00:55:11,000 --> 00:55:13,000

Now you have more Scotch than ever.

579

00:55:13,000 --> 00:55:16,000

Yeah just about. You go to the right places.

580

00:55:16,000 --> 00:55:18,000

Scotch in every city.

581

00:55:18,000 --> 00:55:25,000

Now tell me, we only have a couple of minutes left here, tell me how it is that you happen to come all the way down here to Miami on vacation

582

00:55:25,000 --> 00:55:29,000

when you've got all this beautiful Canada up there to visit.

583

00:55:29,000 --> 00:55:31,000

What's so nice about Miami?

584

00:55:31,000 --> 00:55:40,000

Well for one thing we don't have the tropical growth and we don't have nice warm Atlantic waters off the coast of Florida.

585

00:55:40,000 --> 00:55:52,000

We have wonderful fresh air down here and lovely housing, the white houses and things of that nature we just don't have up there.

586

00:55:52,000 --> 00:55:54,000

You have to come south if you want that.

587

00:55:54,000 --> 00:55:55,000

No wonder.

588

00:55:55,000 --> 00:55:58,000

And how about you Eileen, what is it you like about this area?

589

00:55:58,000 --> 00:56:03,000

Well everything he said plus the lovely warm water for swimming.

590

00:56:03,000 --> 00:56:08,000

I love swimming and it's, well, the warmest you would get it.

591

00:56:08,000 --> 00:56:13,000

There wouldn't be 70 degrees and even in the summer in the small lakes.

592

00:56:13,000 --> 00:56:16,000

It might just barely be 70.

593

00:56:16,000 --> 00:56:21,000

Yes I know. I was lived up in that part of the country on the St. Lawrence River for five years.

594

00:56:21,000 --> 00:56:25,000

In fact the winters are so long up there.

595

00:56:25,000 --> 00:56:29,000

I spent one winter up there, it was 22 months long.

596

00:56:29,000 --> 00:56:32,000

Do you ever have any of those in tomorrow?

597

00:56:32,000 --> 00:56:34,000

That's possible.

598

00:56:34,000 --> 00:56:37,000

And you're going to spend a whole weekend one Sunday afternoon up there.

599

00:56:37,000 --> 00:56:39,000

Things are going so well.

600

00:56:39,000 --> 00:56:47,000

Well we're glad you came to Miami and we're glad you came out here to the asteroid belt for us to interview on the strange and the unusual up in Canada.

601

00:56:47,000 --> 00:56:53,000

And when you come back again, look us up and we'll put you on the air again.

602

00:56:53,000 --> 00:56:56,000

Thanks. It was a pleasure to have both of you as our guests.

603

00:56:56,000 --> 00:57:02,000

So you say goodbye to Mr. and Mrs. Miami because you're going back to Canada tomorrow, right?

604

00:57:02,000 --> 00:57:04,000

Yes we are.

605

00:57:04,000 --> 00:57:06,000

Thanks very much for having us here. We enjoyed it.

606

00:57:06,000 --> 00:57:12,000

It was my pleasure. Now let's take a moment out to sign off with a message from the Gables Letter Service.

607

00:57:12,000 --> 00:57:17,000

And we're going to quote from Winston Churchill's book *The Gathering Storm*.

608

00:57:17,000 --> 00:57:25,000

Written in 1939 or of events in 1939 but applying today more than ever in 1961.

609

00:57:25,000 --> 00:57:27,000

And we quote Winston Churchill,

610

00:57:27,000 --> 00:57:31,000

If you will not fight when you have every chance of winning,

611

00:57:31,000 --> 00:57:37,000

you may come to the place when you will have to fight when the chances of winning are very precarious.

612

00:57:37,000 --> 00:57:42,000

Or you may have to fight when there is very little hope of achieving victory.

613

00:57:42,000 --> 00:57:45,000

Or there may yet be a worse case.

614

00:57:45,000 --> 00:57:52,000

You may have to fight when there is no chance of victory because it is better to die than to live as slaves.

615

00:57:52,000 --> 00:57:55,000

Unquote Sir Winston Churchill.

616

00:57:55,000 --> 00:58:01,000

This has been a message from the Gables Letter Service and until next Saturday, once again, it's good night.

617

00:58:01,000 --> 00:58:06,000

You have been listening to Space Station with your host, Norm Garrity.

618

00:58:06,000 --> 00:58:10,000

Mr. Garrity is editor of a monthly publication titled Space.

619

00:58:10,000 --> 00:58:20,000

And you may subscribe for a period of one year by sending your check or money order for \$3 to Space Care of WMIE Miami, Florida.

620

00:58:20,000 --> 00:58:25,000

Next Saturday, once again, step aboard your Space Station.
