

1

00:00:00,000 --> 00:00:07,000

This is program PM on KYW, Westinghouse Radio in Cleveland, Ohio.

2

00:00:30,000 --> 00:00:44,000

I guess you can tell from the rather hysterical type of music that we're out there again,

3

00:00:44,000 --> 00:00:48,000

as some would say, out there in left field.

4

00:00:48,000 --> 00:00:52,000

But there are many people, apparently, from the mail we've been getting on this particular

5

00:00:52,000 --> 00:00:56,000

portion of program PM, who it's becoming more of a center-fold type subject, I guess.

6

00:00:56,000 --> 00:01:02,000

And you know, I'm speaking of ufology, unidentified flying objects or flying saucers.

7

00:01:02,000 --> 00:01:08,000

And tonight, many thanks to check off down the list and talk about with our UFO investigators,

8

00:01:08,000 --> 00:01:11,000

Bob Grove and Earl Nett.

9

00:01:11,000 --> 00:01:16,000

Now let me just give you a little rundown of what's to come in weeks to come here on program PM's

10

00:01:16,000 --> 00:01:18,000

UFO roundtable.

11

00:01:18,000 --> 00:01:25,000

Professor Charles Meany, an astronomy and mathematics professor at Defiance College,

12

00:01:25,000 --> 00:01:28,000

will be our guest next week, January 17th.

13

00:01:28,000 --> 00:01:34,000

On the following week, January 24th, Mr. Wesley Fitch, who is Earl and Bob Tell Me,

14

00:01:34,000 --> 00:01:38,000

has one of the largest collection of UFO materials known.

15

00:01:38,000 --> 00:01:44,000

And the following week after that, I hope to invite from the Cleveland UFO Society,

16

00:01:44,000 --> 00:01:46,000

Mr. Lawrence Blasey.

17

00:01:46,000 --> 00:01:48,000

So we've got some interesting guests coming up.

18

00:01:48,000 --> 00:01:51,000

And tonight, we'd like to have, among other things, you as our guest.

19

00:01:51,000 --> 00:01:53,000

The phones are going to be used tonight.

20

00:01:53,000 --> 00:01:55,000

We've got questions in the last couple of weeks.

21

00:01:55,000 --> 00:01:58,000

The number is 241-5637.

22

00:01:58,000 --> 00:02:00,000

Now we'll be taking those calls.

23

00:02:00,000 --> 00:02:01,000

You can be calling now if you'd like.

24

00:02:01,000 --> 00:02:02,000

I'm reserving your place on the line.

25

00:02:02,000 --> 00:02:04,000

But we'd like to talk to Bob and Earl about a few things first.

26

00:02:04,000 --> 00:02:06,000

Kind of set the groundwork.

27

00:02:06,000 --> 00:02:07,000

Bob, you were here early.

28

00:02:07,000 --> 00:02:09,000

You had a chance to go through the mail.

29

00:02:09,000 --> 00:02:11,000

And boy, it was a lot this week.

30

00:02:11,000 --> 00:02:13,000

And you know, like, please keep it coming.

31

00:02:13,000 --> 00:02:15,000

Just sit right here at the KYW.

32

00:02:15,000 --> 00:02:17,000

Find anything particularly interesting that needs answering, Bob?

33

00:02:17,000 --> 00:02:18,000

Yes.

34

00:02:18,000 --> 00:02:22,000

As a matter of fact, I sure would hate to have to have the job of weeding through it

35

00:02:22,000 --> 00:02:24,000

and finding out what was more interesting than the others.

36

00:02:24,000 --> 00:02:26,000

I found all of it absolutely fascinating.

37

00:02:26,000 --> 00:02:30,000

One letter, which I tried to get to last week on the air and didn't get a chance to,

38

00:02:30,000 --> 00:02:36,000

was a statement which wound up by Dave Barrow from the Speed Lunkers Associated in Bowdoin, Georgia.

39

00:02:36,000 --> 00:02:37,000

They listen every week to us.

40

00:02:37,000 --> 00:02:39,000

But they seem like there is a cave explorer.

41

00:02:39,000 --> 00:02:40,000

Cave explorer.

42

00:02:40,000 --> 00:02:41,000

Right.

43

00:02:41,000 --> 00:02:42,000

Fascinating enterprise.

44

00:02:42,000 --> 00:02:43,000

And I understand from the text of their letters,

45

00:02:43,000 --> 00:02:45,000

that isn't the only thing they're interested in.

46

00:02:45,000 --> 00:02:47,000

They're interested in this type of thing, too.

47

00:02:47,000 --> 00:02:52,000

I finally wind up in the letter by saying something that really has a lot of truth to it.

48

00:02:52,000 --> 00:02:57,000

Just being teens makes us very anxious to help clear up the UFO mystery.

49

00:02:57,000 --> 00:03:00,000

And nobody appreciates that more than a high school teacher, believe me.

50

00:03:00,000 --> 00:03:03,000

Pardon me, Bob, but you don't suppose that the beings Speed Lunkers,

51

00:03:03,000 --> 00:03:05,000

they'd be interested in the shaver mystery.

52

00:03:05,000 --> 00:03:06,000

That's down below the ground, you know.

53

00:03:06,000 --> 00:03:07,000

Oh, yes, that's right.

54

00:03:07,000 --> 00:03:08,000

So it is.

55

00:03:08,000 --> 00:03:09,000

We'll have to get into that one.

56

00:03:09,000 --> 00:03:12,000

Yeah, somebody called about the other night asking.

57

00:03:12,000 --> 00:03:15,000

So far as other letters had came up,

58

00:03:15,000 --> 00:03:20,000

Barry Foster from Akron would like to have a list of books and magazines available.

59

00:03:20,000 --> 00:03:27,000

Ed Wood, Bruce Klobecki and David Lake.

60

00:03:27,000 --> 00:03:32,000

So for these gentlemen, the publications that I hardly recommend,

61

00:03:32,000 --> 00:03:36,000

one of the newest ones is called The Great Flying Saucer Hoax.

62

00:03:36,000 --> 00:03:38,000

And this has been out now for about a year.

63

00:03:38,000 --> 00:03:43,000

Written by Carl Lorenzen, L-O-R-E-N-Z-E-N, Carl Lorenzen,

64

00:03:43,000 --> 00:03:48,000

who has the Aerial Phenomenon Research Organization from Tucson, Arizona.

65

00:03:48,000 --> 00:03:54,000

Another one, E.J. Rupelt, R-U-P-P-E-L-T, The Report on Unidentified Flying Objects.

66

00:03:54,000 --> 00:04:00,000

And any of the Donald Keyhole productions on paper are very good.

67

00:04:00,000 --> 00:04:03,000

So far as magazines that are out, this is kind of rough.

68

00:04:03,000 --> 00:04:10,000

But Flying Saucers by Ray Palmer is probably the number one publication on a large scale in magazines.

69

00:04:10,000 --> 00:04:19,000

The APRO Bulletin and the NICAP Investigator, which are respectively Lorenzen's and Keyhole's bulletins,

70

00:04:19,000 --> 00:04:24,000

are also excellent sources of new material on UFO investigation.

71

00:04:24,000 --> 00:04:28,000

A very fine letter, I might say, from Kenneth Parrington from Romeo, Michigan,

72

00:04:28,000 --> 00:04:30,000

regarding his reports and theories.

73

00:04:30,000 --> 00:04:31,000

And thank you very much.

74

00:04:31,000 --> 00:04:33,000

It made very interesting reading.

75

00:04:33,000 --> 00:04:36,000

This was a fellow who works for one of the motor companies.

76

00:04:36,000 --> 00:04:37,000

Right.

77

00:04:37,000 --> 00:04:42,000

He's a test driver for one of the motor companies up near Romeo, Michigan.

78

00:04:42,000 --> 00:04:50,000

And he has made some very fascinating discoveries for himself so far as the UFO phenomenon are concerned.

79

00:04:50,000 --> 00:04:56,000

I just wondered, Bob, how he outlined in that long letter that he wrote some very interesting flying saucer that he observed.

80

00:04:56,000 --> 00:04:59,000

And he says that half of the plant at the...

81

00:04:59,000 --> 00:05:00,000

She said, where he worked.

82

00:05:00,000 --> 00:05:01,000

Yes, that's right.

83

00:05:01,000 --> 00:05:02,000

Have you heard about that one before?

84

00:05:02,000 --> 00:05:04,000

No, that one had never come by.

85

00:05:04,000 --> 00:05:08,000

This is one of these that a whole number of people will see, and then it never makes the papers.

86

00:05:08,000 --> 00:05:14,000

Mainly, and I'll tell you another thing that we can bring in immediately at this point I wanted to bring in.

87

00:05:14,000 --> 00:05:20,000

The term that crops up so often in these letters, please don't use my name on the air.

88

00:05:20,000 --> 00:05:21,000

Why is that?

89

00:05:21,000 --> 00:05:23,000

That is a very interesting thing.

90

00:05:23,000 --> 00:05:30,000

And I think it's because of some of the, well, not disrespect, but tongue-in-cheek attitudes that have been taken on by a number of people

91

00:05:30,000 --> 00:05:38,000

who have talked to people that perhaps are very credulous or perhaps lead the UFO investigation

92

00:05:38,000 --> 00:05:43,000

on into something of the realm of the complete supernatural and the leave objectivity.

93

00:05:43,000 --> 00:05:49,000

This is an unfortunate black eye that sometimes arrives for the UFO's sincere investigation.

94

00:05:49,000 --> 00:05:55,000

And I think it's really a shame that this sort of thing does happen, but some people are really afraid to associate,

95

00:05:55,000 --> 00:05:57,000

although they want to know all they can.

96

00:05:57,000 --> 00:05:58,000

The struggle of conformity.

97

00:05:58,000 --> 00:06:00,000

Yes, the struggle of conformity.

98

00:06:00,000 --> 00:06:04,000

It's an unfortunate sort of thing that has been imposed on this.

99

00:06:04,000 --> 00:06:12,000

I want also, if I might, to thank a clarification letter that came from an ex-army man whom I referred to on the air

100

00:06:12,000 --> 00:06:15,000

that turned out to be an ex-army woman.

101

00:06:15,000 --> 00:06:18,000

So thank you, ma'am, for writing this letter of clarification.

102

00:06:18,000 --> 00:06:19,000

Viva la Défense.

103

00:06:19,000 --> 00:06:20,000

I guess.

104

00:06:20,000 --> 00:06:23,000

Joe and Jerry from Lorraine, thanks very much.

105

00:06:23,000 --> 00:06:25,000

And don't apologize for your writing.

106

00:06:25,000 --> 00:06:29,000

It was no trouble reading it, and your sighting was very, very interesting.

107

00:06:29,000 --> 00:06:35,000

And by the way, both of them did a very good job in describing an object the way it should be described

108

00:06:35,000 --> 00:06:38,000

as a familiar object held at arm's length.

109

00:06:38,000 --> 00:06:40,000

Now they said a dime at a six-foot distance.

110

00:06:40,000 --> 00:06:45,000

This, of course, is a very long arm, but in any case, it does give a perspective on the object that was seen.

111

00:06:45,000 --> 00:06:47,000

I want to thank them for it.

112

00:06:47,000 --> 00:06:51,000

So far as Bruce Klobecki, you were interested for your tape recordings there,

113

00:06:51,000 --> 00:06:54,000

and where you can get things that I said you can detect UFOs with.

114

00:06:54,000 --> 00:07:00,000

Transducers are difficult to come by, but can be bought from special electronics outlets.

115

00:07:00,000 --> 00:07:04,000

Cartwright detectors are basically big compasses which have to be built.

116

00:07:04,000 --> 00:07:12,000

For UFO pictures, flying saucer magazines, and then check very carefully on the sources from these magazines.

117

00:07:12,000 --> 00:07:19,000

One other thing before we go in, there was a two-tonight phone call, which I see are already on the line.

118

00:07:19,000 --> 00:07:24,000

We had a call just after the program last week, and I want to get in touch with the gentleman again.

119

00:07:24,000 --> 00:07:27,000

Bob Noack, I hope you're listening tonight.

120

00:07:27,000 --> 00:07:34,000

He's a college student, and he has two letters from the Air Force, one completely denying the existence of UFOs

121

00:07:34,000 --> 00:07:38,000

and the other one, classifying UFO investigation as top secret.

122

00:07:38,000 --> 00:07:42,000

I think these are both very interesting, and we'll delve into that at a future date on the program.

123

00:07:42,000 --> 00:07:47,000

In fact, I'd like to talk to Bob on the air on one of our broadcast phone calls one of these days.

124

00:07:47,000 --> 00:07:49,000

Now, we will get to those phone calls in just a moment.

125

00:07:49,000 --> 00:07:56,000

First, let me ask you, Earl, you're involved in a good deal, are you not, with giving lectures.

126

00:07:56,000 --> 00:07:59,000

Now, what do you try to present when you have a lecture?

127

00:07:59,000 --> 00:08:09,000

Well, I try to make every lecture different because of the age bracket, for instance, of the audience,

128

00:08:09,000 --> 00:08:13,000

or their knowledge of the subject.

129

00:08:13,000 --> 00:08:19,000

I always check with the chairman or the program director as to how much the people really know about the subject

130

00:08:19,000 --> 00:08:22,000

or what phase of the UFO picture they'd like to hear about.

131

00:08:22,000 --> 00:08:32,000

And I would like to say this, that I never make a charge for myself, but I do ask that a check be sent to either NYCAP or APRO.

132

00:08:32,000 --> 00:08:37,000

They are both, as you know, nonprofit groups.

133

00:08:37,000 --> 00:08:42,000

And for that reason, for the amount of time I spend to prepare for a lecture,

134

00:08:42,000 --> 00:08:48,000

I feel that it's worth the trouble to have them send the check to those organizations, or either one.

135

00:08:48,000 --> 00:08:54,000

And I would like to say that, besides from the help this gives the organization, it also serves to announce to one and all that you are not in this for the money.

136

00:08:54,000 --> 00:08:55,000

Definitely.

137

00:08:55,000 --> 00:08:56,000

Thank you very much.

138

00:08:56,000 --> 00:09:03,000

As an interest, let's get to a couple of the, oh, by the way, now for all those lectures, you can just drop a card here to Earl Ness,

139

00:09:03,000 --> 00:09:09,000

program PM, KYW, Cleveland, and we'll be glad to hold them for Earl if you'd like to have him visit with your group.

140

00:09:09,000 --> 00:09:14,000

Let's take a call now, and we'll get back and talk with Bob and Earl some more after they answer some questions from the workverse.

141

00:09:14,000 --> 00:09:16,000

Okay, what's your question, please?

142

00:09:16,000 --> 00:09:17,000

What's your question like?

143

00:09:17,000 --> 00:09:20,000

Go ahead.

144

00:09:20,000 --> 00:09:24,000

How long do we think UFOs have been around?

145

00:09:24,000 --> 00:09:31,000

Not just to our knowledge, but in general, maybe even going beyond what we actually know, and be the Bob or Earl,

146

00:09:31,000 --> 00:09:33,000

might have an opinion on how far they go back.

147

00:09:33,000 --> 00:09:35,000

Let's find out, Earl, what do you think?

148

00:09:35,000 --> 00:09:40,000

Well, there is a subject for a great discussion.

149

00:09:40,000 --> 00:09:48,000

Desmond Leslie would tell you in many, many digits how many many years ago the first on the scene,

150

00:09:48,000 --> 00:09:50,000

going back maybe a million years and so on.

151

00:09:50,000 --> 00:09:58,000

But so far as the general public is concerned today, we go back to 1947 when Kenneth Arnold saw them.

152

00:09:58,000 --> 00:10:06,000

Yet the Borey Island case that took place a little before Kenneth Arnold called them flying saucers,

153

00:10:06,000 --> 00:10:12,000

just a matter of a very few days relatively before the famous sighting of Arnold.

154

00:10:12,000 --> 00:10:17,000

But actually these objects have been coming here for many, many, many years,

155

00:10:17,000 --> 00:10:23,000

and it is nothing new only that it has received greater publicity of recent years.

156

00:10:23,000 --> 00:10:28,000

Well, based on the information that you have now, gathered from all sources,

157

00:10:28,000 --> 00:10:35,000

just in your own opinion, when is the date that you would fix, as they're saying, to my own satisfaction, this is when they probably started coming?

158

00:10:35,000 --> 00:10:37,000

Well, before the days of Christ.

159

00:10:37,000 --> 00:10:38,000

Not long.

160

00:10:38,000 --> 00:10:39,000

Yes.

161

00:10:39,000 --> 00:10:43,000

And we've only been off the ground for a relatively few years when the rights got us off.

162

00:10:43,000 --> 00:10:45,000

And this is not off the ground.

163

00:10:45,000 --> 00:10:49,000

I'm speaking now, I'm speaking of interplanetary travel that has happened.

164

00:10:49,000 --> 00:11:00,000

So that's the reason why it's always interesting to me when I pick up something where scientists are called men with closed minds.

165

00:11:00,000 --> 00:11:05,000

I think this article that I handed to you the other evening from Nick Nestor stated,

166

00:11:05,000 --> 00:11:16,000

it was written by Dr. Ivan Stevenson, and in there it was very shocking to me to learn that it was actually 1903 when the scientists finally,

167

00:11:16,000 --> 00:11:25,000

and the astronomers admit it, that meteorites come not just from some volcanic eruption and blown by the wind,

168

00:11:25,000 --> 00:11:27,000

but actually come from outer space.

169

00:11:27,000 --> 00:11:29,000

That's only 160 years ago.

170

00:11:29,000 --> 00:11:30,000

And prior to that.

171

00:11:30,000 --> 00:11:32,000

I mean, they really thought they just went up and came down again.

172

00:11:32,000 --> 00:11:37,000

Yes, they just couldn't believe that they were from the sky.

173

00:11:37,000 --> 00:11:43,000

I'd like to go into that maybe next week before we get our friend, Professor Manion,

174

00:11:43,000 --> 00:11:48,000

because he is one of the men who does not have a closed mind.

175

00:11:48,000 --> 00:11:50,000

All right, I'd like to read that during the course of this week,

176

00:11:50,000 --> 00:11:53,000

and then we can talk about it on the air before talking to Professor Manion.

177

00:11:53,000 --> 00:11:56,000

Bob, what do you think about how long they've been living here?

178

00:11:56,000 --> 00:12:07,000

Well, I generally take the side or the attitude that much of the well-biblical and pre-biblical and of course post-biblical writings

179

00:12:07,000 --> 00:12:16,000

are a very subjective nature, and for this reason, I am reluctant to accept everything that is in them without an interpretation.

180

00:12:16,000 --> 00:12:23,000

I shouldn't say I'm reluctant to accept everything in them, but I should say that there are some items in there which I think have to be interpreted,

181

00:12:23,000 --> 00:12:32,000

and we know that were placed in there through interpretation, and for this reason, not knowing the exact perspective in which they were admitted to these works,

182

00:12:32,000 --> 00:12:41,000

not just the Bible, but other works that went along with it, I feel that I generally find a little more comfort in accepting the Second World War on,

183

00:12:41,000 --> 00:12:45,000

reports from the First and Second World War on, in other words, the early 1900s.

184

00:12:45,000 --> 00:12:46,000

The Foo Fighters?

185

00:12:46,000 --> 00:12:52,000

Yes, Foo Fighters on, in other words, when you're speaking of the Bible, you're probably referring to like Ezekiel with a wheel within a wheel,

186

00:12:52,000 --> 00:12:54,000

and some people interpret that way.

187

00:12:54,000 --> 00:12:57,000

Yes, that's right, some people interpret that as a flying saucer. I'm here to rub a little more literally.

188

00:12:57,000 --> 00:13:00,000

You can interpret it in many ways.

189

00:13:00,000 --> 00:13:05,000

Well, okay, that's it for you. I'm sure it does. Thank you for calling. Program, P.A., your question please.

190

00:13:08,000 --> 00:13:12,000

You'd like to know if anyone has ever seen a flying saucer land? And that's all?

191

00:13:12,000 --> 00:13:14,000

Oh, that's easy.

192

00:13:14,000 --> 00:13:17,000

Well, I'm sure it's a yes, but let's find out how, why and what.

193

00:13:17,000 --> 00:13:27,000

Well, right back in our own general area, Old and More. The man we went into great detail about some weeks back,

194

00:13:27,000 --> 00:13:34,000

who not only saw it land, but then the following day the Geiger counters showed that it had landed, the radioactivity.

195

00:13:34,000 --> 00:13:37,000

It showed that something was there.

196

00:13:37,000 --> 00:13:45,000

Yes, micro-rentions were 20 times what they should have been under normal conditions, and there have been many landings.

197

00:13:46,000 --> 00:13:51,000

I don't mean by that, but I go along with contactees and the little green antennas and all that.

198

00:13:51,000 --> 00:13:53,000

How many people saw this particular landing you're talking about?

199

00:13:53,000 --> 00:13:54,000

Old and More alone.

200

00:13:54,000 --> 00:13:55,000

Just one.

201

00:13:55,000 --> 00:14:01,000

And he went home to get his wife, and when she came back it was gone. Of course, he had a harder time than ever to explain that.

202

00:14:01,000 --> 00:14:03,000

Which ones have you heard about, Bob?

203

00:14:03,000 --> 00:14:06,000

Of course, Old and More is the one we always think about, associated close here.

204

00:14:06,000 --> 00:14:07,000

How long was it?

205

00:14:07,000 --> 00:14:09,000

Old and More was a 58 or 56.

206

00:14:09,000 --> 00:14:11,000

I'll look it up somewhere.

207

00:14:11,000 --> 00:14:14,000

Several years ago, late 50s.

208

00:14:14,000 --> 00:14:18,000

Of course, from a standpoint of landing, UFOs that have landed.

209

00:14:18,000 --> 00:14:24,000

There was one seen over a lake in South America, and this is written up in Carl Lorenzen's latest publication.

210

00:14:24,000 --> 00:14:31,000

This supposedly had disintegrated in the air, and she has something that looks like awfully good, almost proof that this happened.

211

00:14:31,000 --> 00:14:36,000

And I suggest then refer them immediately to Carl Lorenzen's The Great Flying Saucer Hoax,

212

00:14:36,000 --> 00:14:42,000

referring the hoax by the way to the Air Force perpetration that she would suggest they are doing, saying they don't even exist.

213

00:14:42,000 --> 00:14:43,000

That's a mystery in time.

214

00:14:43,000 --> 00:14:44,000

Yes, it is.

215

00:14:44,000 --> 00:14:52,000

Pride in November the 22nd, 1957, was when this article was printed in the Cleveland Plain Dealer, and this was relative to Old and More.

216

00:14:52,000 --> 00:14:54,000

So it happened the day before.

217

00:14:54,000 --> 00:14:56,000

Okay, so apparently there have been plenty of sightings.

218

00:14:56,000 --> 00:14:57,000

Okay.

219

00:14:57,000 --> 00:14:58,000

And landings.

220

00:14:58,000 --> 00:14:59,000

Thank you for calling.

221

00:14:59,000 --> 00:15:04,000

I wish I could think of the one I mentioned several weeks ago on the show.

222

00:15:04,000 --> 00:15:12,000

This is famous West Virginia, and I meant to ask Bob or Earl, would you check into that for me, something monster.

223

00:15:12,000 --> 00:15:13,000

Oh, the monster.

224

00:15:13,000 --> 00:15:14,000

I'll tell you what it is.

225

00:15:14,000 --> 00:15:17,000

The Bluefield Monster or something monster.

226

00:15:17,000 --> 00:15:18,000

I know that story well.

227

00:15:18,000 --> 00:15:23,000

Because I heard this, I was just listening with slack jaw when I first heard it, you know.

228

00:15:23,000 --> 00:15:26,000

Well, the school teacher and her children were going up on this no one.

229

00:15:26,000 --> 00:15:36,000

Incidentally, when we have see Wesley Fitzger, he has covered that ground thoroughly and can tell you to the minute detail time for meeting all about it.

230

00:15:36,000 --> 00:15:49,000

But quickly, it was a case where the school teacher and a few of her pupils went over this little hill or no, and on the other side was his object right down there on the ground.

231

00:15:49,000 --> 00:15:57,000

And they were very frightened because this creature that they saw in the other direction then was coming toward them.

232

00:15:57,000 --> 00:15:58,000

I saw two.

233

00:15:58,000 --> 00:16:02,000

Yes, the one was the monster and the other was apparently a ship.

234

00:16:02,000 --> 00:16:03,000

A ship.

235

00:16:03,000 --> 00:16:05,000

A UFO.

236

00:16:05,000 --> 00:16:10,000

But it's a fantastic thing and it did leave an awful odor there.

237

00:16:10,000 --> 00:16:14,000

And this is quite frequently true where they are so close.

238

00:16:14,000 --> 00:16:17,000

There is a putrid odor.

239

00:16:17,000 --> 00:16:20,000

Of course, many immediately debunk this.

240

00:16:20,000 --> 00:16:22,000

A UFO from the animal.

241

00:16:22,000 --> 00:16:27,000

Well, we don't know if it's the like with angel hair, you get the ionized air and so forth.

242

00:16:27,000 --> 00:16:29,000

If it's that that's causing it, what it is.

243

00:16:29,000 --> 00:16:39,000

But I have a strong suspicion that when anybody sees something like this and they're so startled that the eyes might look like they were headlights when they maybe are just the size of a little flashlight.

244

00:16:39,000 --> 00:16:42,000

So I think there is a certain amount of exaggeration perhaps there.

245

00:16:42,000 --> 00:16:56,000

One of the things that stuck with me about that monster story that I wish I could think of now was that I heard that they analyzed some ground the next day and they found a chemical or something or some product that they never heard of before.

246

00:16:56,000 --> 00:16:57,000

Do you remember that phase of it?

247

00:16:57,000 --> 00:16:59,000

I don't recall that particular phase of it.

248

00:16:59,000 --> 00:17:01,000

You're not confusing this.

249

00:17:01,000 --> 00:17:08,000

Are you with the Florida case where the Boy Scout leader had quite an experience?

250

00:17:08,000 --> 00:17:10,000

It's quite...

251

00:17:10,000 --> 00:17:23,000

Well, this was West Virginia because the Florida case as it happened, and I read about this a number of years ago, but as it happens when I read about that in the paper, this Florida scout master had been my scout master.

252

00:17:23,000 --> 00:17:24,000

Really?

253

00:17:24,000 --> 00:17:26,000

He was from West Palm Beach.

254

00:17:26,000 --> 00:17:27,000

Is that right?

255

00:17:27,000 --> 00:17:30,000

He was my scout master when I was down there.

256

00:17:30,000 --> 00:17:34,000

And at the time I said, well, he always was kind of a...

257

00:17:34,000 --> 00:17:37,000

But the ground was badly fractional.

258

00:17:37,000 --> 00:17:39,000

Before I met you fellas.

259

00:17:39,000 --> 00:17:41,000

All right, thank you for calling.

260

00:17:41,000 --> 00:17:43,000

Program PM, your question please.

261

00:17:45,000 --> 00:17:52,000

If there is life on other planets, do we think it would be life as we know it around us today?

262

00:17:52,000 --> 00:17:53,000

All right, Bob?

263

00:17:53,000 --> 00:17:58,000

Well, I suppose this would be more or less referred to me as much as I do teach space science.

264

00:17:58,000 --> 00:18:08,000

Now from the standpoint of life as we know it, of course, this is based on the chemical processes which we as humans are we as earthbound life exhibit.

265

00:18:08,000 --> 00:18:13,000

We would again have to conjecture in this because we quite truthfully, no scientist knows.

266

00:18:13,000 --> 00:18:20,000

But because no scientist knows, we're making definite strides forward in doing research on this original research.

267

00:18:20,000 --> 00:18:34,000

We're setting up, for example, the huge radio telescopes constantly monitoring the very, very high frequency, 1420 megacycle wavelength for possible signals from outer space of an intelligent origin.

268

00:18:34,000 --> 00:18:45,000

Not only are we doing this, but of course our Mariner 2 space probe, which has just two weeks ago passed the planet Venus is still, or I should say at the time, radioed by telemetry.

269

00:18:45,000 --> 00:18:52,000

A tremendous amount of information back to our computers, which is constantly now being extracted for information to be released to the public.

270

00:18:52,000 --> 00:18:53,000

No people yet?

271

00:18:53,000 --> 00:18:55,000

No people yet, that's right.

272

00:18:55,000 --> 00:18:59,000

How would this though, Ty, I heard something.

273

00:18:59,000 --> 00:19:15,000

There was a term I think one of our engineers around here said that, let me check it out, that there is no possibility of any chemical ingredients existing anywhere in the universe that do not exist and are not known right here.

274

00:19:15,000 --> 00:19:17,000

That's absolutely correct.

275

00:19:17,000 --> 00:19:33,000

The reason for it is because in our present atomic concept, which scientists universally now do accept in more or less, of course, degrees, any of them will say that if you take one proton and one electron, you get hydrogen and so on.

276

00:19:33,000 --> 00:19:43,000

Building all the way up to uranium, which is the largest unstable atom which we can possibly have

before it begins to break down to make two smaller type of elements or atoms.

277

00:19:43,000 --> 00:20:00,000

And we suspect that the bonding force between these particles and these atoms is the same throughout the entire universe, that the subatomic particles are the same throughout the entire universe, and therefore chemicals which exist using these would necessarily have the same definite proportional laws of combination.

278

00:20:00,000 --> 00:20:03,000

When was the last chemical ingredient discovered here on Earth?

279

00:20:03,000 --> 00:20:06,000

Well, we have constantly been manufacturing new ones.

280

00:20:06,000 --> 00:20:17,000

We're not discovering new ones. Uranium and radium, for example, toward the beginning of the 1900s and just after 1900 we started to get in.

281

00:20:17,000 --> 00:20:22,000

Finally, the uranium and the radium and so on began to fill in the gap that we had.

282

00:20:22,000 --> 00:20:29,000

And around 1900, a little later than that, we finally got some of the more recent radioactive materials.

283

00:20:29,000 --> 00:20:35,000

But there are 92 possible atoms, therefore elements, which exist in the Earth.

284

00:20:35,000 --> 00:20:46,000

And we suspect probably only the same 92 exist throughout the entire universe in a natural state, although artificially others can be made a little bit larger and more complex than these.

285

00:20:46,000 --> 00:20:56,000

Probably at one time, I hate to consider the much time on this, but I still wonder about, probably at one time when they were 87 or 91,

286

00:20:56,000 --> 00:21:01,000

Maybe they said that's a number 93 lurking somewhere around, that we don't know about.

287

00:21:01,000 --> 00:21:06,000

Well, there's 103, but these were manufactured artificially on Earth. I'm sorry, I didn't mean to interrupt.

288

00:21:06,000 --> 00:21:11,000

I just wanted to add this little bit here as long as we're talking about students and so forth.

289

00:21:11,000 --> 00:21:18,000

I was talking only a few hours ago tonight with Leonard Chester of Parma, and he was telling me that his son, who attends Parma Junior High School,

290

00:21:18,000 --> 00:21:25,000

was telling him that many of the students up there listened to this program and they even discussed this in class the other day.

291

00:21:25,000 --> 00:21:30,000

So maybe these are some of the physicists with the open minds of the future.

292

00:21:30,000 --> 00:21:31,000

We're becoming educational.

293

00:21:32,000 --> 00:21:37,000

That's all right, in physics we talked about hypnotism today, so I don't see any reason why you don't know about UFO.

294

00:21:37,000 --> 00:21:43,000

And one of your upcoming tests, I wish you would include some questions based on material on the show every Thursday night.

295

00:21:43,000 --> 00:21:44,000

That way, wow.

296

00:21:44,000 --> 00:21:45,000

You're giving away my final exam.

297

00:21:45,000 --> 00:21:46,000

That helps a lot.

298

00:21:46,000 --> 00:21:51,000

Let's start so we can get some quick questions on, some quick answers just in the few minutes of remaining time.

299

00:21:51,000 --> 00:21:52,000

What's your question, please?

300

00:21:55,000 --> 00:21:59,000

Have UFOs ever been monitored by a chasing or a pursuing plane?

301

00:21:59,000 --> 00:22:00,000

Oh, yeah.

302

00:22:00,000 --> 00:22:01,000

All right.

303

00:22:01,000 --> 00:22:03,000

And if so, what circumstances, Cheryl?

304

00:22:03,000 --> 00:22:10,000

Well, yes, the Chebego case is one of the famous ones, and I didn't bring the information with me tonight,

305

00:22:10,000 --> 00:22:13,000

but I was just furnished this the past week.

306

00:22:13,000 --> 00:22:23,000

It's from an old Cleveland news a friend of mine gave me, and it tells how on radar they were tracing this for a long time,

307

00:22:23,000 --> 00:22:25,000

even when it wasn't visible to the eye.

308

00:22:25,000 --> 00:22:32,000

But many, many times on radar, they do get these blips, and they can trace them, and it's tangible information.

309

00:22:32,000 --> 00:22:36,000

The planes really have actually taken off in pursuit of these objects.

310

00:22:36,000 --> 00:22:37,000

Many times.

311

00:22:37,000 --> 00:22:41,000

Of course, the famous Thomas Mantel case where he lost his life was where he was getting closer and closer.

312

00:22:41,000 --> 00:22:47,000

And I was told a couple of years ago that the last statement he made to the radio officer on the ground,

313

00:22:47,000 --> 00:22:54,000

and I hope this is true, I have no way of absolutely proving it, was as he came closer and closer to the object,

314

00:22:54,000 --> 00:22:56,000

and he said, my God, there are people in it.

315

00:22:56,000 --> 00:22:58,000

And that was the last that was heard.

316

00:22:58,000 --> 00:22:59,000

And let me die.

317

00:22:59,000 --> 00:23:00,000

Yes, sir.

318

00:23:00,000 --> 00:23:01,000

Christ.

319

00:23:01,000 --> 00:23:02,000

Christ.

320

00:23:02,000 --> 00:23:07,000

All right, we gave a list of books earlier, and we'll probably be giving it in future weeks.

321

00:23:07,000 --> 00:23:08,000

We can't take the time right now.

322

00:23:08,000 --> 00:23:18,000

But if you would call back after the show is over, 2415637, Earl and Bob, you always stick around and answer our questions that we don't get to on the air.

323

00:23:18,000 --> 00:23:23,000

2415637, for anybody else who'd like to call in after the show is over, if we didn't get to your question,

324

00:23:23,000 --> 00:23:25,000

we'll stick around and answer them off the air for you, okay?

325

00:23:25,000 --> 00:23:26,000

Thank you for calling.

326

00:23:26,000 --> 00:23:28,000

Program to you and your question.

327

00:23:33,000 --> 00:23:36,000

A few weeks ago, Earl mentioned that there had been a kidnapping.

328

00:23:36,000 --> 00:23:37,000

Yes.

329

00:23:37,000 --> 00:23:39,000

Before a group of people.

330

00:23:39,000 --> 00:23:44,000

If I'm not mistaken, this was in connection with Pearl Lorenzen, and we never did get really the complete story,

331

00:23:44,000 --> 00:23:51,000

and we will, next time we talk to Carl, we'll get a really complete story from the woman herself, okay?

332

00:23:51,000 --> 00:23:53,000

The bulletin is not yet out.

333

00:23:53,000 --> 00:23:54,000

Okay, then?

334

00:23:54,000 --> 00:23:55,000

All right, thank you for calling.

335

00:23:55,000 --> 00:23:56,000

You just keep listening.

336

00:23:56,000 --> 00:23:58,000

We'll have that story right here on the UFO round table.

337

00:23:58,000 --> 00:23:59,000

You said that.

338

00:23:59,000 --> 00:24:01,000

Sure, well, I'm sure glad the bulletin's like users.

339

00:24:01,000 --> 00:24:02,000

Thank you for calling.

340

00:24:02,000 --> 00:24:06,000

Program to you and your question, please.

341

00:24:06,000 --> 00:24:08,000

A little bit on the what?

342

00:24:08,000 --> 00:24:10,000

On the fictional side.

343

00:24:11,000 --> 00:24:16,000

Is it not possible that these UFOs are...

344

00:24:19,000 --> 00:24:29,000

that we are part of a galaxy, and that they are from where another galaxy, or they're from the same

galaxy,

345

00:24:29,000 --> 00:24:36,000

and they've all mastered interplanetary communication and travel, and they are just down here checking on us,

346

00:24:36,000 --> 00:24:40,000

as much as we look out in our chicken coops and check on our own property?

347

00:24:40,000 --> 00:24:42,000

Well, let's find out what Bob thinks about that.

348

00:24:42,000 --> 00:24:44,000

This, of course, is a very great possibility.

349

00:24:44,000 --> 00:24:48,000

We're, of course, assuming individually here.

350

00:24:48,000 --> 00:24:55,000

Generally, people, of course, every person visualizes all existence in terms of his own frame of reference as an individual,

351

00:24:55,000 --> 00:25:03,000

and this then makes it exceedingly difficult for this universal concept, which necessarily must be studied when we're thinking about intelligence and outer space,

352

00:25:03,000 --> 00:25:10,000

and it is very possible that we are not even in the middle, but maybe way behind in terms of technology from space

353

00:25:10,000 --> 00:25:15,000

and technology from existence of life throughout, scattered all through the universe.

354

00:25:15,000 --> 00:25:23,000

Harve, I might suggest that he read the latest issue of Flying Saucer Magazine, the American issue that you can pick up at any of the downtown stores or the bookstands.

355

00:25:23,000 --> 00:25:29,000

In there, there's quite an article on the relationship of Mars, when it's closest to us, when it's furthest away,

356

00:25:29,000 --> 00:25:32,000

its graph showing the most sightings.

357

00:25:32,000 --> 00:25:35,000

Also, he might check with Amy Michelle in the Straight Line Mystery.

358

00:25:35,000 --> 00:25:37,000

Okay, thank you for calling. Very interesting question.

359

00:25:37,000 --> 00:25:45,000

It always kind of brings to my mind and sort of spooks me in a way, but after all these weeks, I'm still fence-straddling, not quite sure,

360

00:25:45,000 --> 00:25:55,000

but I keep heartening back to the thought that not too many years ago, just not even 500 years ago, there were a great number of people right here on this earth,

361

00:25:55,000 --> 00:26:03,000

situated in a body of land known as Eurasia, that thought that they were the whole world.

362

00:26:03,000 --> 00:26:07,000

And then we were sitting over here all the time where the Indians were.

363

00:26:07,000 --> 00:26:10,000

Well, it's the way it goes, and our time is up for tonight. That's the way it goes, too.

364

00:26:10,000 --> 00:26:14,000

And this time just seems to flip by Earl Leff and Bob Grove.

365

00:26:14,000 --> 00:26:17,000

My thanks very much to both of you for joining me on program PM.

366

00:26:17,000 --> 00:26:20,000

Our time has gone by. Tommy Griffith is chafing it a bit.

367

00:26:20,000 --> 00:26:23,000

Time for the Tom Griffith Show all night, right here on KYW.

368

00:26:23,000 --> 00:26:26,000

Once again, right here at the same time next week. You follow G-Round Table,

369

00:26:26,000 --> 00:26:29,000

you're up to really hard, Morgan, and Earl Leff and Bob Grove.

370

00:26:29,000 --> 00:26:32,000

Next week, 10.30, you follow us.
