

1

00:00:00,000 --> 00:00:20,000

Recognizing the major role played by difference of opinion and conflicting ideologies in today's

2

00:00:20,000 --> 00:00:25,000

public affairs locally and nationally, our premise is the exposure of both sides of current

3

00:00:25,000 --> 00:00:30,000

questions and issues. It is the purpose of this program to provide listeners with reliable

4

00:00:30,000 --> 00:00:35,000

facts and informed opinion relating to the issues at hand so that they can seek fully

5

00:00:35,000 --> 00:00:39,000

considered personal conclusions on these issues. The opinions heard in the program are

6

00:00:39,000 --> 00:00:44,000

qualified but not necessarily representative of the opinions of this state.

7

00:00:44,000 --> 00:01:02,000

Now the moderator of 4-850, Joel Danery. Our guests on 4-850 this evening are Mr. Earl

8

00:01:02,000 --> 00:01:09,000

Jane Neff, lecturer and authority on unidentified flying objects, a member of NYCAP and APRO.

9

00:01:09,000 --> 00:01:14,000

And also with us this evening on our 4-850 program is Elmer Schott, the treasurer of the

10

00:01:14,000 --> 00:01:20,000

Cleveland Uphology Project. Our program tonight as you can well imagine from the titles that

11

00:01:20,000 --> 00:01:26,000

these two gentlemen bear relates to unidentified flying objects and as we have noted through

12

00:01:26,000 --> 00:01:30,000

newspaper and radio and television accounts there has been a great wave of sightings of

13

00:01:30,000 --> 00:01:35,000

these unidentified flying objects over the past couple of weeks, Earl. What is your comment

14

00:01:35,000 --> 00:01:40,000

and reaction to this fact and attach any significance to it?

15

00:01:40,000 --> 00:01:47,000

I very definitely attach a great deal of significance to it. In the first place we refer to what has

16

00:01:47,000 --> 00:01:54,000

been happening recently as a flap. It's a time when many UFOs are seen. Within the past few weeks

17

00:01:54,000 --> 00:01:59,000

the highly qualified observers who have been reporting these all over the globe, I mean

18

00:02:00,000 --> 00:02:08,000

aviators, astronomers, meteorologists, scientists and so forth. These men are reporting them.

19

00:02:08,000 --> 00:02:14,000

They are UFOs, they're unidentified flying objects and this has been one of the biggest flaps

20

00:02:14,000 --> 00:02:17,000

ever to have been recorded.

21

00:02:17,000 --> 00:02:21,000

What is meant by a UFO flap?

22

00:02:21,000 --> 00:02:26,000

UFO of course means unidentified flying object and this means that any object that cannot be

23

00:02:26,000 --> 00:02:33,000

identified by our Air Force or whoever is in the authority to observe them. The flap is

24

00:02:33,000 --> 00:02:36,000

the great number that are seen.

25

00:02:36,000 --> 00:02:44,000

No more? You attach any significance to this current wave of sightings and if so what significance

26

00:02:44,000 --> 00:02:46,000

do you attach to them?

27

00:02:46,000 --> 00:02:54,000

Oh I believe that through the years we find that the number of UFOs have been appearing in

28

00:02:54,000 --> 00:03:01,000

the United States here have multiplied so that we now have the UFOs coming in closer

29

00:03:01,000 --> 00:03:09,000

and in certain circumstances landing. I believe what they're doing are surveying the terrain

30

00:03:09,000 --> 00:03:17,000

and to find out exactly what plan we have in mind through some of the experimentations that are being made.

31

00:03:17,000 --> 00:03:23,000

The recent Minerator probe preceded this recent wave of UFO sightings.

32

00:03:23,000 --> 00:03:32,000

And whenever Mars is in opposition to our Earth we have many more sightings, this is every 26 months.

33

00:03:32,000 --> 00:03:39,000

But our Mariner shot may also have been a contributing factor in the increase of sightings that have

34

00:03:39,000 --> 00:03:47,000

recently been reported. The moon as everyone knows I think is going to be the first place where we will

35

00:03:47,000 --> 00:03:56,000

have our astronauts stop and make a base prior to going into space and therefore it's reasonable to assume that

36

00:03:56,000 --> 00:04:03,000

creatures coming here from other planets may use this and Mars also as a base.

37

00:04:03,000 --> 00:04:10,000

The Moon and Meritor probes to all apparent purposes showed that the two planets are uninhabitable,

38

00:04:10,000 --> 00:04:17,000

at least by our physical and physiological standards would be uninhabitable by man.

39

00:04:17,000 --> 00:04:23,000

You feel it's conceivable that this could be stopping our pointer of base for other creatures.

40

00:04:23,000 --> 00:04:31,000

Well I believe that due to the pattern that we were going to follow here in our exploration of Mars

41

00:04:31,000 --> 00:04:41,000

we also stated that we would probably use either phobos or demos as a landing place in order to survey the planet of Mars

42

00:04:41,000 --> 00:04:48,000

for a better reception in case we would probably land there in a living person.

43

00:04:48,000 --> 00:04:56,000

As for the life on Mars and Venus this is very questionable.

44

00:04:56,000 --> 00:05:03,000

No one has as yet said there is no evidence of life on Mars or Venus.

45

00:05:03,000 --> 00:05:12,000

They just said that the pictures showed and radio signals showed that there is a nonexistent life

46

00:05:12,000 --> 00:05:23,000

accepting that if we were to examine any of the photos taken of the Earth taken from a altitude of probably 140 to 170 miles

47

00:05:23,000 --> 00:05:26,000

we ourselves would say is there any life on Earth.

48

00:05:26,000 --> 00:05:33,000

What evidence there is that these things are actually guided by some kind of intelligent being.

49

00:05:33,000 --> 00:05:41,000

Why do you feel so strongly that you're not unidentified flying objects are controlled by some being from outer space?

50

00:05:41,000 --> 00:05:48,000

If they are very small as many of them were during World War II when they were referred to as Foo Fighters,

51

00:05:49,000 --> 00:05:58,000

these were objects seen by the thousands and planes, our planes and the British and the others were flying through them

52

00:05:58,000 --> 00:06:03,000

though never hitting them. These objects were only three inches in diameter and about an inch in height.

53

00:06:03,000 --> 00:06:13,000

Naturally unless it's controlled by an amoeba it would hardly be conceivable that these are occupied.

54

00:06:13,000 --> 00:06:16,000

They probably are under remote control.

55

00:06:16,000 --> 00:06:27,000

Now the larger ones they go up to 8 inches, 12 inches, 15 feet, 30 feet, 150 feet, 350 feet.

56

00:06:27,000 --> 00:06:34,000

The larger one I've heard of recently March the 8th of this year was over Japan.

57

00:06:34,000 --> 00:06:42,000

That was 2,200 feet and estimated by the Japanese flyers who were flying the flying Tigers.

58

00:06:42,000 --> 00:06:51,000

Well if these objects are not under intelligent control they are doing something very unbelievable

59

00:06:51,000 --> 00:06:59,000

because when the flying tiger and even back in the earlier days of Kenneth Arnold so far,

60

00:06:59,000 --> 00:07:07,000

these objects were doing things that only intelligent control seemingly could make them perform in this way.

61

00:07:07,000 --> 00:07:16,000

They can loop a plane, they can come toward it and the last split instant either go up or down without hitting the object.

62

00:07:16,000 --> 00:07:27,000

And recently in the case of the flying tiger every move that the pilot and the co-pilot were making this was duplicating it.

63

00:07:27,000 --> 00:07:31,000

What are your reactions to this?

64

00:07:31,000 --> 00:07:42,000

Well my reactions Joe are the fact that in several instances where aircraft were flying close to these unidentified flying objects

65

00:07:42,000 --> 00:07:49,000

they managed to diverge or depart themselves from the line of flight.

66

00:07:49,000 --> 00:07:57,000

But the most interesting part of it is that in several cases where UFOs had been seen

67

00:07:57,000 --> 00:08:04,000

lights had been shown on them by flashlights and so on and they replied in return.

68

00:08:04,000 --> 00:08:12,000

Now if there is nothing a solid object approaching them and they might be able to dodge them

69

00:08:12,000 --> 00:08:20,000

in the case of a light all we would have would be rays of light whereas there wouldn't be any indication of a solid object area.

70

00:08:20,000 --> 00:08:26,000

If they were able to reply in return then there must be intelligent life on these objects.

71

00:08:26,000 --> 00:08:37,000

Earlier you suggested or advanced a belief that Mars and Moon may be used as a base for these unidentified flying objects.

72

00:08:37,000 --> 00:08:41,000

Where do you believe the UFOs would originate from originally?

73

00:08:41,000 --> 00:08:48,000

Well I don't believe as General Twining one time stated that he thinks they come from Mars.

74

00:08:48,000 --> 00:08:52,000

President Eisenhower said he believes they come from many other planets.

75

00:08:52,000 --> 00:08:59,000

Dr. Hermann Oberth whom I had the pleasure of meeting some time ago when he was in this country

76

00:08:59,000 --> 00:09:05,000

stated that he thought they came from Alpha Centauri area.

77

00:09:05,000 --> 00:09:12,000

Now maybe they're from that place maybe they're from Epsilon Aridani or Tosati.

78

00:09:12,000 --> 00:09:17,000

These are the stars that astronomers have selected as being ideal for solar systems.

79

00:09:17,000 --> 00:09:26,000

Now if Einstein's time dilation theory is correct then the UFOs traveling at nearly the speed of light

80

00:09:26,000 --> 00:09:33,000

could conceivably cross this void in space in a matter of years or perhaps even shorter time.

81

00:09:33,000 --> 00:09:38,000

Again it's all conjecture on our part nobody knows where they are from.

82

00:09:38,000 --> 00:09:47,000

I notice in these reports of the mislabeled wave of UFOs that it's concentrated more or less in the southwestern part of the United States.

83

00:09:47,000 --> 00:09:49,000

How do you account for this?

84

00:09:49,000 --> 00:09:57,000

Years ago they were seen primarily in rural areas places where hardly a soul saw them.

85

00:09:57,000 --> 00:10:06,000

They'd be seen in parts of Europe they'd be seen in parts of Australia and in South America and so forth.

86

00:10:06,000 --> 00:10:14,000

But then later every capital city of every country in the world had UFOs over it.

87

00:10:14,000 --> 00:10:22,000

Then they seemed to follow a pattern of going above the military installations.

88

00:10:22,000 --> 00:10:28,000

I recall a Look Magazine article back in 1952.

89

00:10:28,000 --> 00:10:39,000

This was a fine photograph of a relief map and on every over and above every military installation was a little symbol indicating a UFO.

90

00:10:39,000 --> 00:10:46,000

At that particular time they seemed to have been having our military installations under surveillance.

91

00:10:46,000 --> 00:10:55,000

Now recently the large industrial cities are the ones that seem to be receiving more of the sightings.

92

00:10:55,000 --> 00:11:06,000

Florida is high on the list as a state. California is very high and Ohio also rates about third in the number of sightings.

93

00:11:06,000 --> 00:11:10,000

Does Cleveland itself have many sightings in the Cleveland area?

94

00:11:10,000 --> 00:11:16,000

I'm very glad you asked that because so many people in the Cleveland area think that we don't get very many sightings.

95

00:11:16,000 --> 00:11:18,000

This is absolutely untrue.

96

00:11:18,000 --> 00:11:28,000

In 1963 we had five plus good reported sightings at our report center per month on the average.

97

00:11:28,000 --> 00:11:36,000

Now in 1964 we had seven plus per month good sightings in the greater Cleveland area.

98

00:11:36,000 --> 00:11:42,000

So far this year we have had more sightings than all of last year.

99

00:11:42,000 --> 00:11:47,000

I saw a UFO. What would you advise me to do about it?

100

00:11:47,000 --> 00:11:51,000

First of all I would suggest you call WJW.

101

00:11:51,000 --> 00:12:02,000

Then I would call the report center. This is the Cleveland UFO report center. It's 2340861.

102

00:12:02,000 --> 00:12:09,000

Then also it would be an excellent idea to write to NYCAP or write to APRO.

103

00:12:09,000 --> 00:12:15,000

Now NYCAP is the National Investigations Committee on Aerophenomena headed by Major Don Lee Kehoe and Richard Hall.

104

00:12:15,000 --> 00:12:21,000

They're at 1536 Connecticut Avenue, northwest. That's Washington, 36 D.C.

105

00:12:21,000 --> 00:12:26,000

And APRO, the oldest organization, NYCAP is the largest, and APRO is the oldest organization.

106

00:12:26,000 --> 00:12:31,000

That's located at 4145 East Desert Place in Tucson.

107

00:12:31,000 --> 00:12:39,000

But I think that the best thing to do is to report it to the radio stations, the television stations, and the report centers.

108

00:12:39,000 --> 00:12:49,000

The newspapers sometimes cover it and in one case a party last year called one of our leading papers and they said,

109

00:12:49,000 --> 00:12:54,000

well we're not interested because our editor is not concerned.

110

00:12:54,000 --> 00:12:58,000

Maybe we might get into some of the technical aspects of the UFOs.

111

00:12:58,000 --> 00:13:06,000

I think Elmer Schutt is a little more technically inclined with respect to the flight patterns of UFOs.

112

00:13:06,000 --> 00:13:11,000

And Elmer, do you know any particular sequence to the light patterns?

113

00:13:11,000 --> 00:13:15,000

Are there any unusual flight patterns connected with these flights and sightings?

114

00:13:15,000 --> 00:13:29,000

Generally in the light patterns we find that in several of the lighting arrangements we find that in the later light pattern we find a red light surrounded by three or four white lights.

115

00:13:29,000 --> 00:13:35,000

And in certain cases this will change from the red and white to a green light.

116

00:13:35,000 --> 00:13:39,000

And from the green light it will then turn to a blue.

117

00:13:39,000 --> 00:14:03,000

Now this is probably their cruising lights because actually the luminescence from the UFOs themselves due to the, I believe, myself, the speed of travel generally goes through the corona of the red, blues, and greens, and yellows, and whites due to the speed that they are traveling.

118

00:14:03,000 --> 00:14:16,000

In the flight patterns what is generally known as a general UFO pattern is the falling leaf pattern where it generally comes down in a side swooping motion from side to side.

119

00:14:16,000 --> 00:14:23,000

And this is generally noted when the UFO is coming across very slowly.

120

00:14:23,000 --> 00:14:44,000

One of the most interesting patterns and has been observed by myself and other people is probably an initial line of UFOs coming over at a terrifically high speed and without any hesitance making a 90 degree turn in the air without slowing down.

121

00:14:44,000 --> 00:14:51,000

Conventional aircraft cannot do this unless they make a radius turn.

122

00:14:51,000 --> 00:14:54,000

Isn't this all beyond our physics and our role?

123

00:14:54,000 --> 00:15:03,000

Are there any authorities or competent physicists who would subscribe to the ability of these objects in performing these?

124

00:15:03,000 --> 00:15:12,000

More and more of our physicists and scientists are swinging around slowly but surely.

125

00:15:12,000 --> 00:15:26,000

A friend of mine not too long ago, a physicist, stated that we would perhaps have to forget all of the physics we ever knew and learn entirely new before we could do what these creatures were doing or these objects were doing.

126

00:15:26,000 --> 00:15:44,000

Walter Webb from the Charles Hayden Planetarium up in Boston is one of our special advisors for NYCAP and a man who strongly believes but we could name dozens of them Frank Salfrey's, the Colorado State University outstanding exobiologist,

127

00:15:45,000 --> 00:16:06,000

Fred Whippel is another man who is very, very pro on this subject. He's the director of the Smithsonian Astrophysical Observatory and my very good friend Charles Manney, Professor Manney, the astrophysicist of Professor Emeritus of Defiance College, is not only a strong believer, he's one of the board members of NYCAP and APRIL.

128

00:16:06,000 --> 00:16:16,000

And then there's Professor Clyde Tomball, the discoverer, the only man who has discovered a planet during our lifetime, he discovered planet Pluto.

129

00:16:16,000 --> 00:16:33,000

And he and his wife and mother-in-law were sitting in their backyard in New Mexico some years ago. He had his own private telescope and while he was looking at the moon they discovered some UFOs crossing between where they were and the moon.

130

00:16:33,000 --> 00:16:43,000

Now there's Dr. Minzl of Harvard who says these things don't exist, they're hallucinations, they're weathering versions, they're temperature inversions and so forth.

131

00:16:43,000 --> 00:17:01,000

But although he has gone along seemingly most times with the Air Force's statements that they don't exist, still recently the Air Force came out and stated that 663 unexplained sightings have been reported to them.

132

00:17:01,000 --> 00:17:06,000

So he is one of the exceptions to the rule, I would say at the present time.

133

00:17:06,000 --> 00:17:16,000

Why would the Air Force constantly take the negative approach to these sightings? Are there natural phenomena, hallucinations, planets, Jupiter, Mars or temperature?

134

00:17:16,000 --> 00:17:29,000

Well recently of course they've again come up with their usual line that Pluto, I mean not Pluto but Jupiter was doing some unusual things.

135

00:17:29,000 --> 00:17:37,000

Frankly I think that the planets stay up in their proper positions and I don't think they come swooping down near an airstrip.

136

00:17:37,000 --> 00:17:45,000

But one of the things that I think is bothering them is there's no known defense against the UFO.

137

00:17:45,000 --> 00:17:54,000

Three times SAC bombers went out after them thinking they were Russian bombers and three times they came back after they learned they were UFOs.

138

00:17:55,000 --> 00:18:08,000

Just what the reason for all this secrecy is, it's hard to say, but on two occasions we do know that the Pentagon had planned to make it known to the public and at the last minute they stopped.

139

00:18:08,000 --> 00:18:17,000

I received a letter today through a friend of mine, this is a letter that he had received just about a year ago.

140

00:18:17,000 --> 00:18:30,000

But it's interesting to me because it's from the Public Information Division of the Office of Information in Washington and written by Major Mastin Jackson himself.

141

00:18:30,000 --> 00:18:43,000

And in here he states that unfortunately, speaking of the Air Force, unfortunately we are not able

to duplicate what few photographs the Air Force has in its possession in the realm of UFOs because of the cost.

142

00:18:43,000 --> 00:19:01,000

And more importantly, because the only photographs we have are hoax materials such as pictures of flying saucers on hubcaps, cigar, human door lids with ping pong balls attached, chicken brooders, light fixtures, water spots on negatives, etc.

143

00:19:01,000 --> 00:19:11,000

Well now I can't quite go along and believe this is true because I do know that every major investigation of the Air Force is responsible for investigating these UFOs.

144

00:19:11,000 --> 00:19:23,000

It costs the taxpayers \$10,000 and I don't think they're going to be quite that wasteful and just come up with human door pictures. This is rather hard to imagine.

145

00:19:23,000 --> 00:19:42,000

Albert, I'd like to know in view of this, the attitude of the Air Force and their general pattern of downgrading these sightings and attaching their significance that you do to them, why do you persist in your attempts to dwell on this UFO subject?

146

00:19:42,000 --> 00:19:49,000

Why do you feel that you should continue to press for adoption of your view as to UFOs?

147

00:19:49,000 --> 00:20:17,000

Well, I believe this way. Apparently there is some semblance of a intelligency up there because in the many years that we have experimented with what I call our Chinese sky rockets, we haven't been able to get anything to lift off from the ground and travel at perfectly high speeds to hover, to change direction, to reverse its course.

148

00:20:18,000 --> 00:20:40,000

The apparent material in these UFOs are such that I believe that we probably could learn a lot from obtaining some of the material. The propulsion of these UFOs is something that we would very much like to attain because of the ease of travel.

149

00:20:40,000 --> 00:21:05,000

I believe that there is something to this story and the fact that there are UFOs because I believe that the multitude of people that report them are such that not everyone can be suffering from hallucinations and I believe that if everyone did report what they saw, we would have 10 times the amount of recordings that we have now.

150

00:21:05,000 --> 00:21:06,000

Have you ever saw UFOs?

151

00:21:06,000 --> 00:21:07,000

I have main sightings.

152

00:21:07,000 --> 00:21:16,000

And what makes you believe that they were? Machines under the control of intelligent beings?

153

00:21:16,000 --> 00:21:38,000

Well, I go through a mental list of eliminations. First I see that there is not a satellite because I generally check satellite travel directions. I try to simulate the speed of an aircraft and look for identifying flight pattern lights.

154

00:21:39,000 --> 00:21:47,000

Any actions that are such that cannot be duplicated by our known aircraft now?

155

00:21:47,000 --> 00:21:55,000

The proximity of the distance from the ground? Any unusual lights?

156

00:21:55,000 --> 00:22:14,000

I have never seen a weather balloon change in color. Generally there is a flashlight below to identify it for flying aircraft but the balloon itself does not light up because it looked to me like a lead disc.

157

00:22:14,000 --> 00:22:27,000

I would say that the approximate distance that I saw there was probably about 2 miles away from me but it was a little on the horizon. No colors connected.

158

00:22:27,000 --> 00:22:31,000

What motivates you in this flight of endeavor?

159

00:22:31,000 --> 00:22:43,000

When I was a youngster my mother taught me quite a bit about the sky and I just never believed that we on this planet could possibly be alone.

160

00:22:43,000 --> 00:22:55,000

Then recently when I met the author of *We Are Not Alone*, Walter Sullivan, the editor, science editor for the New York Times, I commented to him about this.

161

00:22:55,000 --> 00:23:12,000

It seems very egotistical to think that of all of the planets, of all of the solar systems, of all of the galaxies, and there are 100 billion galaxies that we know of today where a few years back we thought of one galaxy.

162

00:23:12,000 --> 00:23:19,000

Why should this little speck in the scheme of things be the one and only inhabited?

163

00:23:19,000 --> 00:23:36,000

And then back in August the 18th of 1961 with eight of my neighbors and one of the very great non-believer in UFOs, we saw one go over our rooftops on Pleasant Valley Road in Parma that was positively emits.

164

00:23:36,000 --> 00:23:59,000

This was a daytime at four twenty in the afternoon and a beautiful big elliptical silver object, no sound, no jet trail, no apparent means of motivation, but going faster than anything I'd ever seen in the sky and behind it was a jet going at a forty five degree angle to it.

165

00:23:59,000 --> 00:24:02,000

But it in comparison seemed to be standing still.

166

00:24:02,000 --> 00:24:10,000

What do astronomers have to say on this subject? Have UFOs ever been viewed through a telescope or magnified?

167

00:24:10,000 --> 00:24:21,000

Yes, but not too frequently. As though you were looking through a pipe you might say and expecting out there in space to see a UFO. After all you have the entire heavens.

168

00:24:21,000 --> 00:24:36,000

I'd prefer to have my own temporal binoculars than I would a big scope because it's as if we were having a camera in our hands and focusing it for infinity and then trying to take a pocket of maybe your finger in front of a limb.

169

00:24:36,000 --> 00:24:52,000

It's next to impossible to see a UFO through a scope. If it's very accommodating and obliging and

hovering for a great length of time and you can focus on it and if it's not, if it's very, very far away then you're fortunate.

170

00:24:52,000 --> 00:25:10,000

This is not too often the case. However among the scientists recently we felt very fortunate that a man by the name of Jacques Valet was the first to write an entire book on the UFO taking the pro stand.

171

00:25:10,000 --> 00:25:38,000

This is a fine book that just recently came out on the market called Anathema of a Phenomena. I think this is very unusual for a scientist to take this stand because prior to here that he was writing this entire book I knew of only one man, Amy Michelle, scientifically minded, wrote about orthophony and the straight line mystery because these objects over space do travel in straight lines.

172

00:25:38,000 --> 00:25:56,000

With respect to some of the physical characteristics of these UFOs, Almashot, what type of physical characteristics seem to prevail over the current round of sightings in the southwest? And what type of shapes and characteristics, what is the gamut of shapes?

173

00:25:57,000 --> 00:26:20,000

Well, there are 39 known shapes of UFOs but in generality the shapes that have been persistent in the southwest have been, let's say the disc shape. From reported media, news media they say that they look flattened on the top and bottom with a double ring around them.

174

00:26:20,000 --> 00:26:42,000

This is one of the particular types that they commonly associate with a flying saucer type. There are many flying saucer types. By this I mean that they are elliptical top and bottom. Some have small domes on top, some have domes on the bottom.

175

00:26:43,000 --> 00:26:55,000

But I will say this, that the actual persistence of the type in the southwest is generally the flying saucer or flattened disc type.

176

00:26:55,000 --> 00:27:13,000

Has one certain UFO been observed in two areas at the same time? One person in one state say that he saw this object in the sky. Has there been any verification with respect to that particular object from someone else, perhaps in another state?

177

00:27:13,000 --> 00:27:35,000

There was one real, we call it a phenomenal sighting. I believe if Earl will back me up there was one in the western skies, I believe around the state of Washington and California where this object was so huge that as they call it was almost a second sun.

178

00:27:35,000 --> 00:27:39,000

You are referring to the one a few years ago or the one back in the 1800s?

179

00:27:39,000 --> 00:27:40,000

The one a few years ago.

180

00:27:40,000 --> 00:27:41,000

Yes.

181

00:27:41,000 --> 00:28:04,000

Where this was observed not only from the state of Washington but from the state of California and from distances as far away as 150-200 miles. This must have been exceedingly large but no estimation of size due to the general distance from the public viewpoint.

182

00:28:04,000 --> 00:28:24,000

I know according to a report of two days ago that a weather observatory or a meteorological station where forecasters noted these blips on the radar. As far as I know there has been no explanation of this. Or perhaps you might have some later information with respect to this.

183

00:28:24,000 --> 00:28:45,000

Yes, I'm glad it was on radar because you will not get a planet on radar. Therefore, it's ridiculous for the Air Force or any government agency to come out and say, well what you saw was Jupiter or Venus because they just don't register on radar.

184

00:28:45,000 --> 00:29:05,000

Now the objects that have been seen recently as I earlier mentioned this evening have been seen by very qualified personnel. Down at the South Pole, the men who saw them down there recently. These scientists not only saw them, they described them as lens shaped.

185

00:29:05,000 --> 00:29:22,000

In other words, this is a beautiful description of convex-convex object describing one particular type and when it made tight turns, when it hovered, when it did these unusual things, changed colors. This cannot possibly be a case of mass hallucination.

186

00:29:22,000 --> 00:29:42,000

And also they took a photograph of it. Well, the photograph may not be too good. It will take about eight months for them to get it back into civilization for people to see it. But then when you think that coming from Newfoundland down to the Azores, we have planes flying back and forth there patrolling.

187

00:29:42,000 --> 00:30:11,000

And the men who saw these objects recently are good veteran pilots. They are meteorologists. These men rule out weather balloons. They rule out temperature inversions. And when, as Arthur Godfrey recently mentioned, one was right off of his right wing tip and his co-pilot along with Arthur saw this, the field said, well we don't see anything, but they said, well we see.

188

00:30:12,000 --> 00:30:24,000

We certainly do see it and we know what we're seeing. Also, when collisions have taken place, these are not planets getting out of their orbits.

189

00:30:24,000 --> 00:30:34,000

If I'm correct, a recent Sonsop report that suggested that one of our astronauts might have seen unidentified flying objects. Is there anything to that?

190

00:30:34,000 --> 00:31:03,000

David did not only, well he caught it on a camera. In fact, I have a reproduction of the picture

and it was like a sphere with sort of a point coming from it. This more or less resembled the object seen many years ago by Ralph Mayer, who at that time was in the Marines, but later was connected with one of the large television studios here in town.

191

00:31:03,000 --> 00:31:14,000

And that same object that he saw that night was seen probably as same object, because it resembled it in shape and size, a few nights later in another part of the United States.

192

00:31:14,000 --> 00:31:27,000

Even when I spoke with Joe Walker some while back, I was talking to him, he is the X-15 pilot, you probably remember Joe. He had shot some pictures with his gun camera out of his plane.

193

00:31:27,000 --> 00:31:47,000

This was publicized in the European papers, but touched very lightly upon in this country. There are definitely times when things like this are seen and are not explained. When Cooper was up, they tried to explain that this was ice coming off and so forth.

194

00:31:47,000 --> 00:31:53,000

But if this is coming off of a capsule, it wouldn't be going in the opposite direction.

195

00:31:53,000 --> 00:32:05,000

If security is so strict by the Air Force, how do you account for the fact that these, apparently or to me, might be sensational sightings, are common knowledge?

196

00:32:05,000 --> 00:32:34,000

They do leak through sometimes. I think I was the first person perhaps to mention on the airwaves back in December, the 21st to be exact, with Major Kehoe, the fact that the Germany two-man experimental capsule after it left the launching pad at Cape Kennedy on April of last year was followed almost immediately after leaving the launching pad, was followed by four UFOs.

197

00:32:34,000 --> 00:32:52,000

Well now, this wasn't just for a few moments. This was one complete orbit of the Earth, and two of the UFOs were above the capsule, one below it and one behind it. And after they apparently had learned what they were here for, they zoomed off into space again from where they had come.

198

00:32:52,000 --> 00:33:03,000

But this is factual information. Well, the way we get this information, we wouldn't dare report how we got it. But it is absolutely authenticated.

199

00:33:03,000 --> 00:33:08,000

Was this information communicated to ground stations by the astronaut?

200

00:33:08,000 --> 00:33:25,000

This was an experimental capsule. There were no astronauts in it. But in true magazine of January 1965, the whole story appeared. You could check this at the library. No, it's a fine story. But we came out with it on the 21st of December.

201

00:33:25,000 --> 00:33:38,000

How do you account for the fact that Elmer Schutt at the Air Force is so adamant in confessing that there is some question as to whether these UFOs are vehicles from another planet?

202

00:33:38,000 --> 00:33:55,000

I do believe that the Air Force actually does expend an awful lot of money, as I have heard, that they spend almost \$6-9 million a year on the investigations of these, as we call them, UFOs.

203

00:33:55,000 --> 00:34:10,000

I think that they'd receive multitude of calls. They do not want to commit themselves to the fact that there are UFOs, probably because of the fact that they don't wish to excite the public.

204

00:34:10,000 --> 00:34:30,000

They did publish at one time a book which said that they had reasons to believe that if they had published any information out of the existence of UFOs, it might lead to the downfall of the nation, lead to mass suicides, lead to destruction of religion.

205

00:34:30,000 --> 00:34:47,000

This, to me, is another excuse for saying that they do not have an adequate defense, and therefore they don't wish to admit this fact to the public, so they ignore completely most of the calls.

206

00:34:47,000 --> 00:34:52,000

Earl Nett, do you think there's any danger that's associated with UFOs?

207

00:34:53,000 --> 00:35:14,000

Some years ago, Captain Mantell was the first to case one of these objects. He was a veteran flyer, and he kept saying, well, I'm trying to get closer, but the object seems to stay a certain distance away and so forth.

208

00:35:14,000 --> 00:35:29,000

Well, finally his plane crashed, and later they stated that the pilot was chasing the planet Venus. Well, now I happen to have a friend who was down there at the time.

209

00:35:29,000 --> 00:35:38,000

He was in intelligence at the time for the Air Force, and he said, don't tell me that Captain Mantell didn't know the difference between Venus and UFOs.

210

00:35:38,000 --> 00:35:51,000

But there was a case over Lake Superior some years ago where we believe a very large \$3 million jet was actually kidnapped by a UFO.

211

00:35:51,000 --> 00:36:07,000

Well, now you say this sounds fantastic, but then it's not so fantastic when you realize that some of these motherships or mothercraft or interplanetary craft, the cigar-shaped objects, can release and take back into the craft.

212

00:36:07,000 --> 00:36:26,000

Five or six very large UFOs, and those are perhaps more saucer-shaped, 150 feet or whatever diameter. So that it's again conjecture on our part that we feel that perhaps the first thing they

do is stall the engine.

213

00:36:26,000 --> 00:36:32,000

Now, many times planes have had their engines stalled. Many times autos have had their engines stalled.

214

00:36:32,000 --> 00:36:47,000

There's electromagnetic force fields around these objects. There's ionized air around these objects. And probably they first stall the engines, and then again, this is a guess on our part, they probably then act as a magnet, sucking it in.

215

00:36:47,000 --> 00:37:05,000

But this was known as the famous Kinross case, is now called Kinshaw Air Force Base up there near the Sault Ste. Marie. And these two pilots who went out in this big jet to intercept the UFO were in radio communication with the base.

216

00:37:06,000 --> 00:37:24,000

But at the very moment when both visually and on radar, the two objects merged, or on radar, the two blips merged, all communication then stopped. From that time on, nothing has ever been heard from the two pilots, nor from the plane.

217

00:37:24,000 --> 00:37:35,000

The Air Force in this country claimed that it was a Canadian plane that had been there. The Canadian government stated definitely they had no plane in that area.

218

00:37:35,000 --> 00:37:49,000

There were hours and hours of search by other planes made of that area of Lake Superior. Not one particle of debris was ever found. Not an oil slick was found. It was a complete disappearance.

219

00:37:49,000 --> 00:38:00,000

And so we do feel that there is danger connected with it, and not only that way, but if you get too close to one, you could conceivably be burned by the radiation.

220

00:38:01,000 --> 00:38:17,000

You feel that there is some kind of a showdown looming with respect to the inquisitiveness of the population of the US average citizen with the Air Force and the government as to some kind of definitive statement on these US.

221

00:38:17,000 --> 00:38:42,000

I think the American people are not as gullible as some of the groups in this country believe in the military, but I feel that with the airing of subjects like this on the air, and I do mean that the radio stations and television stations have been far better about it than the newspapers have as a whole throughout the country.

222

00:38:42,000 --> 00:38:55,000

And this is finally, I believe, making an impression upon the public, and probably in this way it will eventually break as you asked before about the clergy and so forth.

223

00:38:55,000 --> 00:39:02,000

True, some theologians probably have been steering clear of it thinking they have plenty to talk about without talking about this too.

224

00:39:02,000 --> 00:39:30,000

However, when certain individuals have come forth from the clergy and said we have seen one of these as late as last week in one of the large papers in the country, the Jesuit priest from Buenos Aires stated he had seen one in our own town, a Lutheran preacher has seen one right crossing Lee Road and wasn't afraid to say so, these men are to be counted.

225

00:39:30,000 --> 00:39:46,000

I do believe that NICAP in its hard effort to make this known to the public through hopefully getting open hearings and investigation of the Air Force is getting closer to the point, but maybe I'm a bit too optimistic.

226

00:39:46,000 --> 00:39:52,000

Well, what medical or metaphysical implications do you think there are?

227

00:39:52,000 --> 00:39:53,000

Alberschacht?

228

00:39:53,000 --> 00:40:06,000

Well, metaphysical, this is very questionable because there is no actual proof as to what forms of metaphysical forces can be controlled.

229

00:40:06,000 --> 00:40:33,000

I will say that probably human eyesight in mind sometimes can play tricks, but I will offset that by saying that in the Cleveland Ufology project we are definitely trying to way lay any metaphysical forces or desires by actually trying to obtain the use of electronic instruments

230

00:40:33,000 --> 00:40:41,000

for detecting the closeness or proximity of UFOs.

231

00:40:41,000 --> 00:41:02,000

In fact, one of the strangest parts of it is that the use of FM radio and the electronic magnetic detector for signal strength can probably give you an indication that there is something near, but one of the easiest and the simplest things to give you an indication that a UFO is a signal.

232

00:41:03,000 --> 00:41:14,000

There is no signal that there is something near, and if it is a UFO sending out electromagnetic forces is a common ordinary \$1 compass.

233

00:41:14,000 --> 00:41:23,000

Well, what can we look for since these sightings are of cyclic nature, I believe, in this period?

234

00:41:23,000 --> 00:41:28,000

In view of the increased activity in space ventures here on Earth?

235

00:41:28,000 --> 00:41:38,000

I would state that I would think that as we go on we will have more and more sightings.

236

00:41:38,000 --> 00:41:49,000

If you want to take the word of a woman who has been predicting and coming very accurate in her predictions, I am referring to Jean Dixon.

237

00:41:49,000 --> 00:41:56,000

She said by the year 2000, she told me this personally, by the year 2000 everybody will know about them.

238

00:41:56,000 --> 00:42:00,000

I think that long before the year 2000, we will know much, much more about them.

239

00:42:00,000 --> 00:42:03,000

Final comment from you, Elder Schutt?

240

00:42:03,000 --> 00:42:19,000

Well, in regards to the amount of sightings that were probably held in the Cleveland area, may I respectfully say that we had a very impressive flap in the Cleveland area here on the 12th, 13th, 14th and 15th,

241

00:42:19,000 --> 00:42:34,000

where the Cleveland Ufology Project Report Center number, which is 234-861, had 49 reports mailed back to them out of a possible, I believe, 55 that were mailed out.

242

00:42:34,000 --> 00:42:44,000

And these were telephone calls that were brought in and thanks to the radio stations, the television stations, and also the newspaper,

243

00:42:44,000 --> 00:42:49,000

and telephone companies for directing the people to this number.

244

00:42:49,000 --> 00:42:52,000

We'd like to thank you very much for being with us this evening.

245

00:42:52,000 --> 00:43:01,000

Once again, we'll review our panel for you, Earl J. Neff, lecturer and authority on unidentified flying objects, a member of NYCAP and APRO,

246

00:43:01,000 --> 00:43:07,000

and also with us this evening, Albert Schutt, the treasurer of the Cleveland Ufology Project.

247

00:43:07,000 --> 00:43:13,000

We invite you to join us again next week at the same time for another 4-0-8-50 program.

248

00:43:14,000 --> 00:43:28,000

Music

249

00:43:28,000 --> 00:43:37,000

Each of the nights, this hour will be devoted to the exposure of all sides of those questions and issues most closely associated with the important affairs of our nation and our community.

250

00:43:37,000 --> 00:43:46,000

Varying views on matters of current public interest are regularly broadcast by WJW80, or the service in making today's news more interesting and meaningful.

251

00:43:46,000 --> 00:43:52,000

The opinions heard are qualified, but do not necessarily represent the views of this state.
