

1

00:00:00,000 --> 00:00:25,120

Good evening. I'm David Shornbrod. We're gathered together tonight to hear an extraordinary

2

00:00:25,120 --> 00:00:30,860

story, one of the most fascinating stories in the history of man. Whether it is true or

3

00:00:30,860 --> 00:00:35,400

false is something that you will judge after you've heard the story and a discussion of

4

00:00:35,400 --> 00:00:41,440

it by a panel of scientists and science editors. The story will be told by the two people who

5

00:00:41,440 --> 00:00:50,120

have lived it, first Mr. Barney Hill and his wife Betty Hill. Barney and Betty Hill are two of

6

00:00:50,120 --> 00:00:56,640

many Americans who claim to have seen an unidentified flying object and two or perhaps a hundred who

7

00:00:56,640 --> 00:01:03,920

claim to have been aboard a flying saucer. Their story was written up for them by John Fuller,

8

00:01:03,920 --> 00:01:11,360

author, columnist, who in this new book, *The Interrupted Journey, Two Lost Hours Aboard a Flying*

9

00:01:11,360 --> 00:01:17,960

Saucer, tells not only their story but their therapy and the revelation to themselves by

10

00:01:17,960 --> 00:01:24,280

themselves under hypnosis of their extraordinary experience. And this will then be examined and

11

00:01:24,280 --> 00:01:30,600

discussed by a panel of experts. Let's now meet our experts. Dr. Leo Sprinkel, counselor and

12

00:01:30,600 --> 00:01:36,760

assistant professor of psychology at the University of Wyoming. Mr. Edward Edelson, science editor of

13

00:01:36,760 --> 00:01:43,760

the World Journal Tribune of New York. Professor James McDonald, an atmospheric physics professor

14

00:01:43,760 --> 00:01:51,840

at the University of Arizona. Mr. Leon Jariff, science editor of Time magazine. And Carl Sagan,

15

00:01:51,840 --> 00:01:58,720

professor at Harvard University and also at the Smithsonian Astrophysical Observatory. Now,

16

00:01:58,720 --> 00:02:06,000

Mr. and Mrs. Hill, for your story. I believe it began on the night of the 19th of September 1961 as

17

00:02:06,000 --> 00:02:12,880

you were driving home from a vacation in Canada and something happened near Lancaster, New Hampshire.

18

00:02:13,200 --> 00:02:15,760

Which one of you was the first to see this something happen?

19

00:02:15,760 --> 00:02:16,800

Benny was the first one.

20

00:02:16,800 --> 00:02:17,120

Yes.

21

00:02:17,120 --> 00:02:19,120

Benny, could you start the story then?

22

00:02:19,120 --> 00:02:27,520

Yes. We were driving along on route three and it was a very clear night and the moon was very,

23

00:02:27,520 --> 00:02:34,560

almost full and very bright. And the stars were very, the sky was very clear. We can see the stars

24

00:02:34,560 --> 00:02:42,560

easily. But suddenly, right near the moon, I noticed a new star which was much larger and

25

00:02:42,640 --> 00:02:47,840

brighter than the other stars in the sky. And I called Benny's attention to this.

26

00:02:48,800 --> 00:02:56,160

Then suddenly, we noticed it started to move. And it went across the face of the moon. We stopped

27

00:02:56,160 --> 00:03:01,840

the car and got out to look at this because we thought it was the satellite. And while we were

28

00:03:01,840 --> 00:03:09,120

observing it, it made a turn and started to come in in our direction. And at this point,

29

00:03:10,080 --> 00:03:17,200

we changed our minds thinking that it must be a plane. We were driving along and as it came

30

00:03:17,200 --> 00:03:23,520

in close so I began to realize that it was not a satellite or a plane, but it was something that

31

00:03:23,520 --> 00:03:31,120

I had never seen before. Now this was based on its maneuverability, the way it was flying.

32

00:03:32,000 --> 00:03:40,160

It was sort of, it had a very erratic flight in the sky. And as it came in closer to us,

33

00:03:40,160 --> 00:03:47,200

it was sort of riding along on the ridge of the mountains. And then when we got in the area of

34

00:03:47,200 --> 00:03:55,680

Indian Head, it suddenly swung out over the highway in front of our car. At this time, I could see

35

00:03:55,680 --> 00:04:02,240

a row of windows around the edge and a red light on each side. And it was at this point

36

00:04:02,880 --> 00:04:08,880

that Benny stopped the car and he decided to get out, to get a good look at it and to identify it.

37

00:04:08,880 --> 00:04:16,080

So I got out of the car and took the pair of binoculars, 7x50 Crescent of binoculars, and stepped

38

00:04:16,080 --> 00:04:21,120

away. And as I raised the binoculars, looking over the roof of the car from my position on the

39

00:04:21,120 --> 00:04:27,200

ground, the object shifted across the highway, where now in making the shift, it also had a

40

00:04:27,200 --> 00:04:33,360

descent motion that brought it to what I roughly estimated as about 100 feet in the air. And then

41

00:04:33,360 --> 00:04:40,560

I began walking across the highway into the field. I walked quite a distance in the field and I saw

42

00:04:40,560 --> 00:04:45,600

what I thought were figures standing by this huge plate glass looking back at me. I couldn't believe

43

00:04:45,600 --> 00:04:50,880

it. I dashed back to the car screaming to Benny that, oh my gosh, I said something is good. I said,

44

00:04:50,880 --> 00:04:56,720

it's going to capture us is what I said. There was a series of beeps and then later there was

45

00:04:56,720 --> 00:05:01,120

another series of beeps. And Betty asked me if I now believed in flying saucers and I told her,

46

00:05:01,120 --> 00:05:07,760

don't be ridiculous, of course not. We continued then to proceed on to Fortsmouth and we arrived.

47

00:05:07,760 --> 00:05:14,000

We both felt very uncomfortable and clean. I don't think I mentioned to Betty how I felt,

48

00:05:14,000 --> 00:05:20,080

but I felt clammy as if I had fallen into something very, very filthy. What time did you

49

00:05:20,080 --> 00:05:25,040

come home? I understand there was a time factor that you were surprised that you had come home so

50

00:05:25,040 --> 00:05:30,480

late. Well actually at the time, no, I wasn't surprised that we had arrived home later than

51

00:05:30,480 --> 00:05:35,920

really what we would have expected because we didn't put any particular importance on our arrival

52

00:05:35,920 --> 00:05:42,960

time except that we knew it was around 4.30. We should have arrived home at four hours. We arrived

53

00:05:42,960 --> 00:05:48,160

home in about five and a half to six hours. What were these objects on the back of your car that

54

00:05:48,160 --> 00:05:53,360

bothered you so much? Well, when we went and I went out to look at the car to check it with the

55

00:05:53,360 --> 00:06:00,320

compass as this physicist had suggested, I found some round highly polished spots on the trunk of

56

00:06:00,320 --> 00:06:10,560

the car. When I put the compass near them, it just reacted erratically. Spun around? Yes. And then

57

00:06:10,560 --> 00:06:15,680

when I moved it away, the compass reacted long. We had been asked if others had seen this spot and

58

00:06:15,680 --> 00:06:19,680

there are. There was a sergeant living in our apartment building at the time. He and his wife

59

00:06:19,680 --> 00:06:24,880

knew we had been on vacation so they came down and I told them she had gone out and she was quite

60

00:06:24,880 --> 00:06:29,440

upset about what she had seen and was trying to get me to go out and I wouldn't. So they went out

61

00:06:29,440 --> 00:06:34,880

and took a look and they came in quite excited, insisting that I go out and look on the trunk

62

00:06:34,880 --> 00:06:40,240

of Betty's car. So when I went out, I also too saw these large shiny spots and I didn't put any

63

00:06:41,280 --> 00:06:44,720

while it wasn't important. They were just shiny spots. I didn't know how they got there but I

64

00:06:44,720 --> 00:06:51,120

didn't try to even understand how they were there. What next? During the same period of time, well

65

00:06:51,120 --> 00:06:57,920

about ten days after the sighting itself, I had a series of dreams that lasted for about five nights

66

00:06:58,560 --> 00:07:06,720

and these were somewhat upsetting and puzzling to me. At first I thought of them only as bad dreams

67

00:07:06,720 --> 00:07:12,960

but then when the scientists noticed that there was this period of time, then I began to wonder if

68

00:07:12,960 --> 00:07:18,640

my dreams might have been my way of trying to recall what had happened. What could you tell us

69

00:07:18,640 --> 00:07:28,320

now about what was in those dreams? Well, the dreams, well briefly, in my dreams we were driving along,

70

00:07:28,320 --> 00:07:34,640

we were stopped by a group of men in the highway, taking all the cars, taking aboard the UFO,

71

00:07:35,360 --> 00:07:42,800

underwent physical examination and then were released. These were the dreams that I had.

72

00:07:43,920 --> 00:07:53,920

How long after your mysterious experience in Lancaster and the mountains did you go to see Dr.

73

00:07:53,920 --> 00:08:00,480

Simon? Well, this would have been in the latter part of 1963. The sighting was in September 1961

74

00:08:01,040 --> 00:08:09,520

and so I was in two years. Yes. Yes. It revealed to you what story did you learn about your experience

75

00:08:09,520 --> 00:08:17,040

under hypnosis? Well, there were the beeping sounds and then I apparently went into some kind of days,

76

00:08:18,000 --> 00:08:25,120

some kind of condition like this and were driving along and Bonnie suddenly made a shot left hand

77

00:08:25,120 --> 00:08:31,680

turn off the highway and we ran around a curve and there was a group of men standing in the highway

78

00:08:32,560 --> 00:08:36,800

and under hypnosis my first thought was there must be an automobile accident

79

00:08:36,800 --> 00:08:45,200

and then the car monitor died and Bonnie was trying to stop the car. He wasn't able to

80

00:08:45,200 --> 00:08:53,040

and these men were coming closer and they divided and at this moment I panicked. I became very frightened.

81

00:08:53,840 --> 00:09:00,000

I tried to open the car door thinking I would get out, run and hide in the woods until they were

82

00:09:00,000 --> 00:09:08,800

gone. Just as I opened the door they stepped over where I was. And could you remember under hypnosis

83

00:09:08,800 --> 00:09:17,600

what these men looked like? Not at that moment. Then they took me out of the car and I went into

84

00:09:17,600 --> 00:09:25,040

sort of another deeper days of some sort. Kind of a trance. Yes. And then I was more or less pulled

85

00:09:25,040 --> 00:09:32,800

myself out of this or at least partially and I found myself walking in the woods with a man on

86

00:09:32,800 --> 00:09:40,640

each side of me and some in front some behind me and then in back of me was Bonnie and he was like

87

00:09:40,640 --> 00:09:47,360

sleepwalking and there were these two men holding, well I was holding him up. We walked through this

88

00:09:47,360 --> 00:09:53,840

long path in the woods until we came to the craft that was sitting on the ground. We went up the ramp

89

00:09:54,720 --> 00:10:00,400

and my dad was never mentioned in Betty's dreams but we both seemed to share the idea

90

00:10:00,400 --> 00:10:05,600

that we had been going up a ramp. It was not in Betty's dreams but it was the word that came out

91

00:10:05,600 --> 00:10:13,120

on hypnosis. Yes. So we went up ramp into this car as it curved and they took me into the first room

92

00:10:14,000 --> 00:10:21,600

and they took Bonnie into the second room and while I was in there they did what we call

93

00:10:22,000 --> 00:10:31,040

physical examination. The first thing they did was they examined my arm

94

00:10:32,400 --> 00:10:38,720

apparently they were looking at my skin and they seem to be making a lot of comments

95

00:10:38,720 --> 00:10:45,280

in themselves. My sister was quite excited about this and they brought over what I called, I've

96

00:10:45,360 --> 00:10:51,920

never seen one so I don't know but I call it a microscope with a camera attached. Then after that

97

00:10:51,920 --> 00:11:03,040

they get to hear samples on my fingernails. They checked my eyes, hair, my ears, nose and things

98

00:11:03,040 --> 00:11:09,760

like this and they looked over my hands and my feet, particularly my feet quite thoroughly.

99

00:11:10,720 --> 00:11:16,720

Then they said they were going to test my nervous system and they brought over some kind of machine

100

00:11:17,440 --> 00:11:27,120

which they touched. Were you fully dressed? No, they took off my dress and my shoes and then during

101

00:11:27,120 --> 00:11:33,760

this what they call the checking of my nervous system I had a slip on and they pulled my slip off

102

00:11:34,720 --> 00:11:45,920

and did this testing. Then the next one was the examiner had a needle and I became aware that he

was

103

00:11:45,920 --> 00:11:53,040

going to... Jack you? Yes, I didn't know if it was injection or what it was and I begged them not to

104

00:11:53,040 --> 00:11:59,440

use the needle because it would hurt and he started to insert it into my navel. A long needle? It was a

105

00:11:59,520 --> 00:12:05,760

long needle. I don't know how... This long? I think I'm going to get most of it. I said four to six

106

00:12:05,760 --> 00:12:13,120

inches but I became badly frightened when I saw the needle and then when I found out I planned to

107

00:12:13,120 --> 00:12:19,440

put it into my navel I became very frightened and I begged them not to do it and the leader said

108

00:12:19,440 --> 00:12:25,920

it wouldn't hurt and they started to put it in and it did. Why was he doing it? Well he said it was

109

00:12:25,920 --> 00:12:33,200

a pregnancy test and I said well it was no pregnancy test here and well they seemed to be very surprised

110

00:12:33,200 --> 00:12:39,200

that I had any pain from this and the leader put his hand up over my eyes and the pain went away

111

00:12:39,200 --> 00:12:43,520

but they stopped the test. There was one man whom you called the leader? There was what I called the

112

00:12:43,520 --> 00:12:49,920

leader and what I called the examiner. What language did you speak to them? I spoke in English

113

00:12:50,480 --> 00:12:55,680

and I don't know what language they spoke in but I understood them in English.

114

00:12:57,200 --> 00:13:04,320

By word or sound or thought transference? I don't know. You don't know? No but I

115

00:13:05,040 --> 00:13:11,840

noticed it seemed to me I actually heard sounds. I cannot say it was English. What happened when

116

00:13:11,840 --> 00:13:17,760

the examination was finished? Well then I was standing there waiting to go back to the cow because

117

00:13:17,760 --> 00:13:23,440

all during this time they reassured us that as soon as the test were over we'd go back to the cow

118

00:13:24,480 --> 00:13:30,800

and so I was standing there waiting and they said that Bonnie's examination was taking longer

119

00:13:30,800 --> 00:13:38,240

and that I would have to wait for him and then there was all this excitement and this man came

120

00:13:38,240 --> 00:13:45,360

into the room without tugging at my teeth and I questioned them about this and this is why they

121

00:13:45,360 --> 00:13:50,880

showed their surprise that Bonnie's teeth were removable and mine were not. Well with your

122

00:13:50,880 --> 00:13:57,120

experiences while Betty was in the room being examined by these man-like beings and I'd like to

123

00:13:57,120 --> 00:14:02,800

emphasize before I go into that is that this was brought out under hypnosis because I am still a

124

00:14:02,800 --> 00:14:08,800

bit reluctant in this area. I think it is important to reemphasize that the story you've just told is

125

00:14:08,800 --> 00:14:13,040

one that you were not consciously aware of. You never had to. Which was brought out of you by your

126

00:14:13,760 --> 00:14:20,400

psychiatrist Dr. Baden Simon on the hypnosis. Yes and it seemed as if I was carried up the ramp

127

00:14:20,400 --> 00:14:25,760

my feet were banging against the ground as these small men I described came up to me and

128

00:14:26,640 --> 00:14:31,680

carried me from the car and through the woods and up this ramp and into this room where I opened my

129

00:14:31,680 --> 00:14:36,720

eyes I saw a table. Betty described the table as being adequate for her to lie on the one that's

130

00:14:36,720 --> 00:14:44,000

the room where she was in and at this time I do not know where Betty is and apparently I am more

131

00:14:44,000 --> 00:14:49,840

concerned for my own welfare to be concerned about Betty but the table that I described was small

132

00:14:50,400 --> 00:14:56,560

and obviously the difference in our heights could be the answer. Well how tall were these men?

133

00:14:57,200 --> 00:15:01,440

I estimate well I said they were about as tall as Betty but this would mean that they would be

134

00:15:01,440 --> 00:15:08,160

five one above four and a half to five feet five feet yes and I'm five feet eight so that the three

135

00:15:08,160 --> 00:15:13,360

inches difference was quite a difference and I said that the table was too small where I too was

136

00:15:13,360 --> 00:15:21,040

given an examination. I'm very conscious about my teeth I was very upset about I only got as far

137

00:15:21,040 --> 00:15:25,760

as saying something went into my mouth and I did not bother the doctor and he did not press this

138

00:15:25,760 --> 00:15:29,920

as to what was happening but I can only think now that this would have been when my teeth would have

139

00:15:29,920 --> 00:15:35,600

been extracted and pulled out pulled out yeah I should have said pulled out because they had dentures

140

00:15:35,600 --> 00:15:42,400

yes and so they weren't extracted they had been but I go in the point explain that the kind of

141

00:15:42,400 --> 00:15:47,200

examination that I had been given is the scraping of the skin and I had been turned over they were

142

00:15:47,200 --> 00:15:54,080

interested in body openings and a cup-like object was placed against my genitals and I was reluctant

143

00:15:54,080 --> 00:15:59,120

to talk about that until Mr. Fuller was able to murder from me by saying lower abdomen

144

00:16:00,000 --> 00:16:04,480

and this would have been the extended examination. What do you believe now butter?

145

00:16:05,200 --> 00:16:14,160

All right that's petty first. All right petty. I believe we were really captured I mean if we

146

00:16:14,160 --> 00:16:19,600

if we were not captured there was no face to the problem of what happened during this two hours of

147

00:16:19,600 --> 00:16:24,560

van life. Well this is what I'm forced in a sense to believe that something happened that night I

148

00:16:24,640 --> 00:16:32,400

can't say definite as to what definitely happened but apparently if the hypnosis which we were led

149

00:16:32,400 --> 00:16:37,120

to believe would be the means of opening up the amnesia if this is not the facts then what are

150

00:16:37,120 --> 00:16:42,480

the facts? Well I think we're going to discuss that with a group of very knowledgeable people

151

00:16:42,480 --> 00:16:48,720

in just a moment from now. We're back with Barney and Betty Hill and about to begin discussion of

152

00:16:48,720 --> 00:16:53,520

their extraordinary case but before we go to the panel I think we ought to look at some sketches

153

00:16:53,520 --> 00:16:58,160

that they made. You may remember they said that when they got home from their experience they both

154

00:16:58,160 --> 00:17:02,800

drew sketches of what they had seen and then later on the hypnosis they drew more sketches

155

00:17:02,800 --> 00:17:08,480

would you identify these and tell us what they are? This is one that Barney drew of the abduction

156

00:17:08,480 --> 00:17:16,400

spot itself. Oh the abduction took place. Yes this is how he remembered this. A car a roadblock and

157

00:17:16,400 --> 00:17:22,560

the and the disc. Yes right this is one that Betty drew and similar to the one I drew in the two

158

00:17:22,560 --> 00:17:28,640

red balls on the side of the indicates the red lights. That's what you saw that night. This is

159

00:17:28,640 --> 00:17:35,520

what that's all. Yes now the next picture is what I tried to describe when I was standing in the

field

160

00:17:35,520 --> 00:17:40,240

and as the lights had parted away from the craft itself and the figure standing there looking back

161

00:17:40,240 --> 00:17:47,840

at me now the next sketch is what is one I sketched while on the hypnosis and I was trying to

162

00:17:47,840 --> 00:17:53,920

explain to Dr. Simon what the persons that I was involved with looked like and this is what I

163

00:17:53,920 --> 00:17:59,520

drew in deep trance. I was trying to emphasize the eyes and this is what was so outstanding

164

00:17:59,520 --> 00:18:05,440

that the eyes seemed to go around the side of the face this way and the cap was my attempt at

165

00:18:05,440 --> 00:18:12,160

drawing a military cap. They had a military cap and some sort of a scarf scribble around the neck.

166

00:18:12,160 --> 00:18:18,320

Yes the figure doesn't seem to have a mouth. No it doesn't. This is a map that Betty drew

167

00:18:19,360 --> 00:18:23,680

and you can't have briefly talk about that Betty. On board the craft I asked them where they came

168

00:18:23,680 --> 00:18:29,520

from and the leader went over and showed me this map. He didn't explain where he was

169

00:18:30,240 --> 00:18:37,200

where he was on the map but he did explain that the lines he got in trade routes and

170

00:18:37,280 --> 00:18:44,800

places where they weren't regular and then expeditions. Now this is another map that we

171

00:18:45,360 --> 00:18:51,680

have here that shows the constellation of Pegasus. Yes this was printed in the New York Times. One

172

00:18:51,680 --> 00:18:57,680

year after Betty had drawn her map in which the Russians were reporting that they thought there

173

00:18:57,680 --> 00:19:04,240

were radio signals emanating from this section in the sky. She then compared the sketch she had

174

00:19:04,240 --> 00:19:09,440

drawn with the map that was published in the New York Times and she thought that there was a great

175

00:19:09,440 --> 00:19:15,280

similarity between the two. Now what is this coming about? That seems to be another attempt to sketch

176

00:19:15,280 --> 00:19:20,400

these humanoid creatures. That's correct. This was after I had undergone the session of regressive

177

00:19:20,400 --> 00:19:26,560

hypnosis and now trying to draw for the doctor's benefit what I thought the creatures looked like

178

00:19:26,560 --> 00:19:32,000

and again there's the heavy emphasis on the eyes the two slits representing nostrils and my attempt

179

00:19:32,000 --> 00:19:37,680

to show the slit line for the mouth and when the mouth was potted that is what I'm trying to show

180

00:19:37,680 --> 00:19:42,560

in this sketch. That was what I thought was a membrane inside that seemed to flutter rather than

181

00:19:42,560 --> 00:19:48,640

the same lip muscles that we have. The two nostrils without a nose. Yes that's correct. All right I

182

00:19:48,640 --> 00:19:54,320

think that the panel has been very patient I'm sure very interested in everything that's been said

183

00:19:54,320 --> 00:20:01,520

and perhaps we might ask who would like to start the questioning Dr. Sagan of Harvard University and

184

00:20:01,520 --> 00:20:07,440

I think also of the Smithsonian Astrophysical Observatory at Harvard. All right back to Sagan.

185

00:20:08,080 --> 00:20:14,640

Well I'd like to begin the questioning if I may with with one general line of inquiry.

186

00:20:15,440 --> 00:20:21,680

Our present understanding of the evolution of life on earth is that it's a slow process of

187

00:20:21,680 --> 00:20:28,960

evolution by natural selection that human beings are the product of several billions of years of

188

00:20:29,040 --> 00:20:35,360

random mutation accidental effects leading up to what we are now if events were even slightly

189

00:20:35,360 --> 00:20:39,760

different in the previous history of the earth we think that we would not wind up with things that

190

00:20:39,760 --> 00:20:44,880

are closely human beings but with something else. Now other planets certainly have environments quite

191

00:20:44,880 --> 00:20:50,800

different from those on the earth and therefore we would expect that beings that evolved there

192

00:20:50,800 --> 00:20:56,320

would have even greater differences and would not look closely like human beings and that's why I

193

00:20:56,400 --> 00:21:05,040

was interested to see that the characterization of the inhabitants of the supposed extraterrestrial

194

00:21:05,040 --> 00:21:11,840

space here who were with a few minor differences very closely human head to eyes something like a

195

00:21:11,840 --> 00:21:18,720

nose mouth hands feet and so on this seemed to me to have an intrinsic implausibility about it

196

00:21:18,720 --> 00:21:25,360

seemed to me that much more likely that this was putting projecting human experience onto

197

00:21:25,360 --> 00:21:31,200

perhaps something else the one question I'd like to ask is fingers how many fingers did you notice

198

00:21:31,200 --> 00:21:37,760

any about the Sagan didn't notice anything how about ear lobes I didn't notice ears how about

199

00:21:37,760 --> 00:21:45,120

Mrs. May I just briefly inject something here we were on another discussion and after very quietly

200

00:21:45,120 --> 00:21:50,880

more or less very relaxed discussing for about two and a half hours the scientists question is very

201

00:21:50,880 --> 00:21:58,320

closely about the absence of our seeing or noticing hands so the announcer put a paper over my

202

00:21:58,320 --> 00:22:03,920

hand and asked the scientist what about my hands had he noticed anything was I wearing a ring or not

203

00:22:03,920 --> 00:22:08,560

and he had to admit he hadn't noticed them this would have been a much more relaxed situation

204

00:22:08,560 --> 00:22:12,720

right well but the point is that you did notice some details and I was interested in

205

00:22:13,280 --> 00:22:18,720

whether you had noticed some other details yes no I had not how about here ready no I didn't

206

00:22:19,600 --> 00:22:26,720

yes I think I think the thing that does strikes me most is the fact that not only did these

207

00:22:26,720 --> 00:22:31,120

creatures breathe the earth's atmosphere with no difficulty but you were able to breathe the

208

00:22:31,120 --> 00:22:37,120

spacecraft's atmosphere with no difficulty is that a question no it's our comment well that's all I

209

00:22:37,120 --> 00:22:43,920

can say is that you notice any respirators or anything about not my position no Leon Jadav of

210

00:22:44,000 --> 00:22:49,840

science editor of Time magazine I think has a question or comment yes as I understand it

211

00:22:51,040 --> 00:22:56,160

the only tangible evidence of the visit of this ship and their experience with it

212

00:22:57,840 --> 00:23:05,600

is the appearance of the bright shiny spots on the trunk of your car is that correct that would

213

00:23:05,600 --> 00:23:13,120

have been one of the tangible evidence one that I hadn't found to be important is that when I arrived

214

00:23:13,200 --> 00:23:19,280

in Poetsmouth that morning my shoes were badly scuffed and this well it's my opinion a rather

215

00:23:19,280 --> 00:23:25,680

my word there's no proof to it the reason I asked I am aware of the scuff marks on your shoes but

216

00:23:25,680 --> 00:23:31,520

that should have happened in any earthly experience this is correct the point that I wonder about

217

00:23:31,520 --> 00:23:38,880

is the failure either of of mrs hill to call the attention of these spots to mr webb of the

218

00:23:38,880 --> 00:23:44,800

Hayden planetarium who was there a couple of years later or perhaps you had mentioned them but

219

00:23:45,360 --> 00:23:52,400

then mr webb neglected to look at them and since this is the only tangible evidence we wonder why

220

00:23:52,400 --> 00:23:58,720

someone didn't think of this we discussed the spots with Walter webb and with mr Holman and mr

221

00:23:58,720 --> 00:24:08,400

Jackson but we had spent hours discussing this and then it was just an oversight on their part and

222

00:24:08,400 --> 00:24:14,000

leaving when they left us we just forgot to show them to know if I ever did no one put that question

223

00:24:14,000 --> 00:24:20,720

to mr webb maybe john who was talking yes I did and uh wolder webb simply throws up his hand and

224

00:24:20,720 --> 00:24:27,600

discussed it his own failure as an investigator I am convinced in my own mind that nothing was hidden

225

00:24:27,680 --> 00:24:34,640

there was simply a very serious oversight and he agrees that it was ed eddleton of world journal

226

00:24:34,640 --> 00:24:40,960

tribune although spots still there and if not were what happened to them the spots gradually

227

00:24:40,960 --> 00:24:47,520

wore away over the winter months and we don't have the time to have professor mcdonald of

228

00:24:47,520 --> 00:24:53,040

university of arizona while we're on the spots there there is a point that uh probably ought to be

229

00:24:53,120 --> 00:24:57,840

made and then a question that ought to be asked the reason you originally uh uh got the compass out

230

00:24:57,840 --> 00:25:02,960

to look at those was that someone had suggested that this would be a means of testing for radiation

231

00:25:02,960 --> 00:25:10,080

I I it's not clear to me how that would ever have detected the irradiation of the car I think that

232

00:25:10,080 --> 00:25:15,680

is just an alteration that should be made are you saying that if it were irradiated that the

233

00:25:15,680 --> 00:25:20,560

compass would not in any case behave this way yeah in the first instance I'm saying that irradiation

234

00:25:20,560 --> 00:25:27,040

could not be detected with a mad compass but so that's just a side comment but you did the experiment

235

00:25:27,040 --> 00:25:32,160

nevertheless and so we have the results of the experiment and it's quite disconcerting because

236

00:25:32,880 --> 00:25:40,560

with anything other than a or a current rapidly changing dipole moment of some mysterious kind

237

00:25:40,560 --> 00:25:46,000

in the trunk of the car there is no easy way to understand the mechanism to cause the compass

238

00:25:46,000 --> 00:25:52,400

needle to spin well those beeping sounds the only noise you heard is this apparently huge aircraft

239

00:25:52,400 --> 00:25:59,600

approached yes these were the this was the only sound we heard and by the end you didn't hear any sound

240

00:25:59,600 --> 00:26:03,680

when you were all in the vehicle sound but it wasn't as the aircraft approached it was after I had

241

00:26:03,680 --> 00:26:08,560

dashed back to the car and screamed to Betty Betty that something was going to capture us

242

00:26:08,560 --> 00:26:14,480

then there was a series of beeps now I do recall touching the steering column because it was a very

243

00:26:14,560 --> 00:26:20,320

subtle vibration and the last I remembered is Betty was feeling around on the panel of the car the

244

00:26:20,320 --> 00:26:25,040

dashboard itself and then later there was another series of beeps and the game remark what's that

245

00:26:25,840 --> 00:26:32,320

and Betty then asked if I believed in flying saucers and I said no I'm certainly not a psychologist but

246

00:26:33,200 --> 00:26:40,240

some aspects of the story that mrs hill told particularly the the needle incident seemed to me

247

00:26:41,040 --> 00:26:49,760

recognizable from having read Freud and I wonder mr shunbrun that by any chance had been talked over

248

00:26:50,720 --> 00:26:56,320

between you and dr simon yes I would rather not put that into context but it has been however I

249

00:26:56,320 --> 00:27:01,920

think that mr fuller had discussed that with dr simon I discussed it with Betty herself too and

250

00:27:01,920 --> 00:27:08,720

Betty is a qualified state social worker is aware of the dream symbolism and that sort of thing

251

00:27:08,720 --> 00:27:15,280

and it is something that she cannot explain one way or the other I don't think that it should be

252

00:27:15,280 --> 00:27:22,640

discussed publicly I do say that that facet of it has been completely and thoroughly explored

253

00:27:23,200 --> 00:27:29,200

and Betty is fully aware of it as anybody else and may I add something that's something that I've

254

00:27:29,200 --> 00:27:36,480

discovered since the hypnosis and I don't know if this would apply to adults but in hospitals when

255

00:27:36,480 --> 00:27:44,320

it's necessary to obtain a blood sample from a small infant it is done through the navel I think

256

00:27:44,320 --> 00:27:50,960

that you might correct me if this is wrong at least point out to one fact that you said it was a very

257

00:27:50,960 --> 00:27:56,480

large needle larger than anything that you ever seen from along that had been plunged into your

258

00:27:56,480 --> 00:28:03,520

navel I can't say it was plunged in but it was they started to insert it and I had pain and I was

259

00:28:03,520 --> 00:28:09,680

under the impression they stopped but there was no blood or physical evidence of puncture I wasn't

260

00:28:09,680 --> 00:28:18,080

aware of this until 1964 well whenever it happened if it did happen you didn't detect any wound on

261

00:28:18,080 --> 00:28:25,920

your body no any other questions about this well I think that I'd like to be very careful about this

262

00:28:25,920 --> 00:28:32,080

and I've taken very careful notes in my discussion with dr simon and I'd like to read these notes to

263

00:28:32,160 --> 00:28:38,960

you I want to take just a second to go over them myself and we will be back with dr simon's testimony

264

00:28:38,960 --> 00:28:45,280

given to us right after this message I recently had the opportunity of talking to dr ben simon the

265

00:28:45,280 --> 00:28:51,520

psychiatrist who's treated bitty and Barney hill and asked him whether he could summarize for me his

266

00:28:51,520 --> 00:28:57,200

findings he made it very clear that we must avoid such words as belief for other unscientific words

267

00:28:57,200 --> 00:29:03,200

and that the treatment has not been completely concluded and so this is a summary of the doctor's

268

00:29:03,200 --> 00:29:09,600

thoughts on the case of Barney and Betty hill he said that from the very start he envisaged of four

269

00:29:09,600 --> 00:29:15,520

possibilities one is that it might be a rare psychological phenomenon known as fully adieu

270

00:29:15,520 --> 00:29:20,240

that means both people going crazy at the same time with the same illusion and he excluded that

271

00:29:20,240 --> 00:29:25,520

immediately he said these were to him very very sane and reasonable and and honest people and

272

00:29:25,520 --> 00:29:30,640

not suffering from this quite rare psychological phenomenon of fully adieu the second possibility

273

00:29:30,640 --> 00:29:36,320

is that this was simply a fraud and he said of course he had to go into that and he went into

274

00:29:36,320 --> 00:29:41,520

it very thoroughly and he's convinced that the way their stories came out in hypnosis as well as

275

00:29:41,520 --> 00:29:47,440

the waking period analysis convinces him that there is no case for fraud here at all then there was

276

00:29:47,440 --> 00:29:53,680

the third possibility that the story was fundamentally true as related that in fact they not only cited

277

00:29:53,680 --> 00:29:59,600

a flying object but that they were aboard a flying object a flying saucer and met humanoid creatures

278

00:29:59,600 --> 00:30:07,440

and he said that after examination he came to the conclusion that this was a very remote possibility

279

00:30:07,440 --> 00:30:12,960

and he said there were any number of evidences that that pointed in another direction which leads to

280

00:30:12,960 --> 00:30:19,360

the fourth possibility in his various hypotheses which he calls the dream hypothesis and that is

281

00:30:19,360 --> 00:30:27,200

that Betty after the experience had certain dreams and that after a period of time the dreams became

282

00:30:27,200 --> 00:30:33,760

reality and the doctor pointed out that although hypnosis under hypnosis the patient always tells

283

00:30:33,760 --> 00:30:40,480

the truth it is the truth as the patient sees and knows the truth himself but it is not necessarily

284

00:30:40,480 --> 00:30:48,160

the ultimate non-personal truth and the doctor said he found many evidences that there was a

285

00:30:48,160 --> 00:30:53,920

strong stimulus from the very first experience that you had in citing this object a very strong

286

00:30:53,920 --> 00:31:00,240

stimulus towards believing the existence of the flying saucer and the doctor said to me i do believe

287

00:31:00,240 --> 00:31:08,160

that they saw an unidentified flying object and his final word on the subject that there is very

288

00:31:08,160 --> 00:31:15,520

strong evidence of dream content and that of all of the hypotheses that he examined the dream hypothesis

289

00:31:15,520 --> 00:31:23,440

is the most likely one and that is the burden of his present summary before we go on to discuss the

290

00:31:23,440 --> 00:31:27,760

very much broader subject in which of course i think we're all interested about the existence of

291

00:31:27,760 --> 00:31:33,200

intelligence creatures outside of earth who have in fact an advanced technology and have been

visiting

292

00:31:33,200 --> 00:31:39,200

earth before we go into that i think in all fairness i must allow john fuller of the hills to make

293

00:31:39,200 --> 00:31:45,200

some comment on the summary of what dr benzheim told me the only comment i can make is this that

294

00:31:45,680 --> 00:31:51,760

i spent weeks with dr simon going over the tapes listening stopping going all that sort of thing

295

00:31:52,480 --> 00:31:58,000

naturally it's a long hard pull in this kind of situation and there are many vacillations and many

296

00:31:58,560 --> 00:32:06,560

hesitations and many different points of discussion that come up one problem one of the main reasons

297

00:32:06,560 --> 00:32:14,160

why dr simon had moved away from the fact of the actuality of this is because of the fact that

298

00:32:14,160 --> 00:32:19,760

he of course was not interested in the ufo story and as a scientist and i don't blame him he would

299

00:32:20,560 --> 00:32:26,640

be inclined because it is not documented anywhere in scientific history and this is the main reason

300

00:32:26,640 --> 00:32:34,000

why i think it is most important that the scientific fraternity turn toward the masses of the other

301

00:32:34,000 --> 00:32:39,120

cases which are appearing right now so that if a case like this comes up there is at least some

302

00:32:39,600 --> 00:32:46,320

some background and some foundation some substance to make a judgment one way or the other on this

303

00:32:46,320 --> 00:32:54,800

there's no doubt that there are a fair small fact of these sightings which remain unknown that

304

00:32:54,800 --> 00:33:00,560

is very different from saying that the only possible explanation of these unknowns is that

305

00:33:00,560 --> 00:33:06,480

there's space vehicles from another planet and if you look at the number of relatively obscure

306

00:33:06,480 --> 00:33:14,480

natural phenomena which have been identified misapprehended as fine saucers you see that nature

307

00:33:14,480 --> 00:33:18,240

is very complicated and i wonder if i heard well be that there are actually things in the

308

00:33:18,240 --> 00:33:24,400

atmosphere of the earth things of a biological nature things in particular involving atmospheric

309

00:33:24,400 --> 00:33:29,520

refraction which can explain the category of unknowns the mere fact that we don't know it

310

00:33:30,160 --> 00:33:35,680

means just that it doesn't mean the extraterrestrial visitation is the only possible explanation

311

00:33:35,680 --> 00:33:41,040

i just like to point out that if these are visitors from another planet they're going about this

312

00:33:41,040 --> 00:33:47,040

in a very illogical let's say unerrantly way well that's not what i was about to say and

313

00:33:47,040 --> 00:33:53,120

just pointed out that the unidentified cover are coming in various different shapes so apparently

314

00:33:53,120 --> 00:33:58,080

they've sent a whole fleet of these things here they have gone to very great expense to come

315

00:33:58,080 --> 00:34:04,320

long distances and yet somehow they don't want to open contact with us they seem to delight in

316

00:34:04,320 --> 00:34:10,880

deserted places and in hard maneuvers and i think one point dr sagan mentioned in his book is that

317

00:34:10,880 --> 00:34:15,600

astronomers have been pointing telescopes toward the sky and taking pictures many pictures of the

318

00:34:15,600 --> 00:34:22,880

night sky and there has been a singular lack of provable UFOs on those pictures even when i might

319

00:34:22,880 --> 00:34:30,400

add these sky surveys have been designed to look for rapidly moving objects namely a study of
mirrors

320

00:34:31,200 --> 00:34:35,360

and i think this tends to explain the general skepticism of the astronomical community towards

321

00:34:35,360 --> 00:34:39,360

the flying saucer reports in general that doesn't mean that there aren't things up there that are

322

00:34:39,360 --> 00:34:45,600

unidentified let me reiterate again that unidentified doesn't mean extraterrestrial it means we

323

00:34:45,600 --> 00:34:51,280

don't understand it and i quite agree that uh that that there is something there to be found out

324

00:34:51,280 --> 00:34:55,280

i think there's probably things meteorological things geophysical and almost certainly things

325

00:34:55,280 --> 00:35:01,040

psychological well let me point out something there and to go back both to the to the hell's

326

00:35:01,040 --> 00:35:07,840

case and to your remarks dr sagan uh you suggest that a very small fraction of all the official

327

00:35:07,840 --> 00:35:13,920

official cases project blue book of the air force are unidentified i spent almost all of the summer

328

00:35:13,920 --> 00:35:19,120

a good bit of the spring about the last six months in nearly full time study of this uh this whole

329

00:35:19,760 --> 00:35:25,120

and then as part of that uh been up to right patterns and can't agree with either your remarks

330

00:35:25,120 --> 00:35:31,040

or the air force remarks project blue book figures when i went over case after case and i dare say

331

00:35:31,040 --> 00:35:38,080

i've looked into about 150 200 cases at right patterns and alone the discrepancies between the

332

00:35:38,080 --> 00:35:44,640

official categorizations balloons aircraft berg and so on astronomical meteorological the discrepancies

333

00:35:44,720 --> 00:35:51,360

between the official categorizations and the content of the reports was to me and no other word

334

00:35:51,360 --> 00:35:57,760

could describe this astounding document uh despite these discrepancies that you found in reports have

335

00:35:57,760 --> 00:36:06,000

you or has anyone else who has investigated this phenomenon um seriously ever found a single piece

336

00:36:06,000 --> 00:36:13,040

of evidence hardware hardware uh anything other than pictures or settings and not hardware uh

337

00:36:13,040 --> 00:36:17,280

certainly there have been many cases i could probably sit here and think of a couple of dozen

338

00:36:18,080 --> 00:36:23,920

of the instances where the credible observers describe such artifacts if you will as indentations

339

00:36:23,920 --> 00:36:29,680

in the ground where a craft settled a scorched vegetation near which uh is it true but then

340

00:36:29,680 --> 00:36:35,040

who are not but then because they're been a scientific inquiry yes there's been one case

341

00:36:35,040 --> 00:36:40,000

in which some people have read the findings and some people have uh i've been skeptical and this

342

00:36:40,000 --> 00:36:46,560

is reported in the book by corral lorenza and chainer husband lj lorenza are head of the aerial

343

00:36:46,560 --> 00:36:51,920

phenomena research organization and they received a report from dr fontes who is a physician um

344

00:36:51,920 --> 00:37:00,480

in in brazil and the report describes a fragment which supposedly came from a flying saucer which

345

00:37:00,480 --> 00:37:06,160

burst and then were analyzed i don't i can't comment on the report how well it was done but

346

00:37:06,160 --> 00:37:10,720

according to the conclusion this would suggest it was a high quality aluminum

347

00:37:11,920 --> 00:37:18,480

or magnesium pardon me uh higher quality than supposedly is possible in earth laboratory but

348

00:37:18,480 --> 00:37:22,800

there are other people gentlemen please forgive me forgive me for interrupting this very exciting

349

00:37:22,800 --> 00:37:27,200

discussion at this moment we'll come back to it right after this message we're back again with

350

00:37:27,200 --> 00:37:32,560

professor mcdonald a professor of atmospheric physics the university of arizona sir you said a

351

00:37:32,560 --> 00:37:38,080

moment ago that the subject requires considerable examination rectification would you begin by

352

00:37:38,080 --> 00:37:43,280

telling us of how you first got interested and came to this opinion well i've uh had a uh

353

00:37:43,920 --> 00:37:50,480

a mild interest in this problem for perhaps a decade my field is atmospheric physics and a lot of the

354

00:37:50,480 --> 00:37:55,360

official explanations have centered around atmospheric physical phenomena optical effects and so on

355

00:37:55,920 --> 00:38:01,280

and this led me all at 1954 so to begin checking cases in the southern arizona

356

00:38:02,000 --> 00:38:08,960

area where i live and work let me take one case this is now almost 10 years ago the rather important

357

00:38:08,960 --> 00:38:14,720

case probably many listeners will remember when it was headline news it occurred in levelland texas

358

00:38:15,360 --> 00:38:23,120

the night of november second and the morning of the third 1957 it involved some very interesting

359

00:38:23,120 --> 00:38:29,200

phenomena uh i've interviewed some of the people who were involved in it i have a map here uh that

360

00:38:29,200 --> 00:38:35,680

will give us a little bit of a notion of the uh of the general geography here is levelland texas a

361

00:38:35,680 --> 00:38:42,880

small town about 30 000 the lines are highways running in and out of level and uh for about 11 o'clock

362

00:38:43,680 --> 00:38:49,920

at night on the second till around one in the morning on the third a series of about 10 independent

363

00:38:49,920 --> 00:38:56,080

sightings by uh 10 persons a couple of them were law enforcement officers others were just drivers

364

00:38:56,080 --> 00:39:02,720

over here there were uh there was a two grain combines involved in every one of these instances

365

00:39:02,720 --> 00:39:07,840

the interesting thing that happened was that the driver of the vehicle suddenly came upon a very

366

00:39:07,840 --> 00:39:14,800

large and when i say large uh the reported sizes were the order of 100 to 200 feet diameter glowing

367

00:39:15,520 --> 00:39:21,120

sometimes reddish sometimes bluish objects hovering over fields or roads the first effect on the

368

00:39:21,120 --> 00:39:28,080

vehicle was a interference with the lights and then the ignition system failed excuse me doctor i

369

00:39:28,080 --> 00:39:31,600

noticed that you have a lot of numbers on the map if you could point them out these places where

370

00:39:31,600 --> 00:39:37,040

the sightings were there yes they are 10 numbers on here i won't bother the names and individuals

371

00:39:37,040 --> 00:39:43,040

but this 10 miles is about the size of this pencil just to give you some scale and these are spread

372

00:39:43,040 --> 00:39:47,280

over a two hour period and each one of these numbers here's one seven they correspond to

373

00:39:47,280 --> 00:39:54,400

the names of the people were instances in which cars were stopped and the lights went out as soon

374

00:39:54,400 --> 00:39:58,320

as the object took off which was the characteristic pattern so the some of the cars were stopped

for

375

00:39:58,320 --> 00:40:02,400

two two or three minutes but then the objects rose from the ground sometimes with enormous

376

00:40:02,400 --> 00:40:07,840

accelerations then the lights came back on without any manipulation of the ignition key and the driver

377

00:40:07,840 --> 00:40:12,960

found he could immediately start his car this was common to all of these cases now the official

378

00:40:12,960 --> 00:40:19,280

explanation of this level in texas case based on the air force handling of the project blue book

379

00:40:19,280 --> 00:40:26,480

investigation was that this was ball lightning uh that that's what accounted supposedly for these

380

00:40:26,480 --> 00:40:33,440

200 foot diameter objects plus wet ignitions and that was the official explanation of why the cars

381

00:40:33,440 --> 00:40:38,240

stopped now we all know about the fact that cars when they do get wet don't usually start immediately

382

00:40:38,320 --> 00:40:42,960

there's a bit of a problem there but this is uh this is uh only secondary compared to what one

383

00:40:42,960 --> 00:40:48,880

finds when he looks as i have at the actual weather data for the case in question excuse me sir

384

00:40:48,880 --> 00:40:54,000

before we get there if it were ball lightning is it normal to have ball lightning of that size and

385

00:40:54,000 --> 00:41:00,000

would that ball lightning have the electromagnetic quality of stopping these engines well there are

386

00:41:00,000 --> 00:41:04,240

there are first of all the typical size of ball lightning ball lightning is a fairly rare phenomenon

387

00:41:04,240 --> 00:41:07,920

most of us have never seen it i have never seen it though that's very much in my field

388

00:41:07,920 --> 00:41:13,600

the uh of flipton diameter is a typical phenomenon but the the cases of ball lightning uh that are

389

00:41:13,600 --> 00:41:19,120

on record are uh strictly limited to extreme thunderstorm conditions where you have an energy

390

00:41:19,120 --> 00:41:26,080

source a high potential high gradient and the uh there is no i am not aware of any case where a

391

00:41:26,080 --> 00:41:31,680

vehicle was stopped by ball lightning it i could not assert that it could not occur well uh then

392

00:41:31,680 --> 00:41:35,680

this was the question i asked i discussed this problem with a colleague at westinghouse who's

393

00:41:35,680 --> 00:41:40,080

expert in these problems he said well maybe in the event of a really severe thunderstorm you could

394

00:41:40,080 --> 00:41:44,320

scale up ball lightning to tens of feet and maybe they made an error of estimate size so i looked at

395

00:41:44,320 --> 00:41:50,480

the map and i was quite startled uh as a person with meteorological training here's the map for

396

00:41:50,480 --> 00:41:55,120

the very time this is 12 o'clock midnight right in the middle of the level in texas that's a weather

397

00:41:55,120 --> 00:42:00,560

map this is a weather map these are the isobars i think perhaps many persons looking on will

398

00:42:00,640 --> 00:42:06,400

be familiar with us from weather sessions here's the gulf coast uh in the state of texas in is in

399

00:42:06,400 --> 00:42:13,040

here now i'll point with my pencil to level and texas which is in the panhandle and any of you

400

00:42:13,040 --> 00:42:18,720

who are familiar with meteorology will immediately be bothered by the fact that uh level and was

401

00:42:19,360 --> 00:42:24,160

being invaded by a large high pressure area pushing down over the great plains the nearest front was

402

00:42:24,160 --> 00:42:29,360

down near san angelo hundreds of miles away the nearest rain was about a hundred miles away

403

00:42:30,160 --> 00:42:36,160

the weather report for the nearest stations involved only scattered clouds and in level and

404

00:42:37,280 --> 00:42:42,320

area there were no stations at the time of the observation that even had any rain two hours

405

00:42:42,320 --> 00:42:46,000

later the one station that had less than one hundredth of an inch and here is the official

406

00:42:46,000 --> 00:42:52,560

explanation charging severe thunderstorms and wet ignitions utterly senseless and when i asked the

407

00:42:52,560 --> 00:42:58,320

people at right paterson they really had no very good answer and all i can say is that in cases of

408

00:42:58,320 --> 00:43:03,600

this sort uh an ad hoc explanation is almost full out of the blue i have just seen it in too many

409

00:43:03,600 --> 00:43:10,080

instances to be happy with us uh there there are many very definite things that could be done

410

00:43:10,080 --> 00:43:15,520

in a scientific context to pursue this problem and it badly needs that kind of attention in my opinion

411

00:43:16,160 --> 00:43:22,160

thank you very much uh professor mcdonald we'll be back again in just a moment we have heard the

412

00:43:22,160 --> 00:43:28,560

extraordinary personal story of barney and betty hill and a much broader discussion of the phenomenon

413

00:43:28,560 --> 00:43:35,520

of ufo's by a panel of authorities some of whom insist there are no visitors from outer space

414

00:43:35,520 --> 00:43:41,200

some of whom are skeptical and some of whom believe that the only explanation to fit the facts

415

00:43:41,200 --> 00:43:48,320

is that there are extra terrestrial visitors well what are we to believe when the experts disagree

416

00:43:49,280 --> 00:43:53,840

speaking both for myself and for the editors of this program we would say this

417

00:43:54,560 --> 00:44:01,680

unidentified flying objects demand serious and immediate scientific attention we would recommend

418

00:44:01,680 --> 00:44:08,880

one an immediate study in depth by university teams two a pattern analysis by computer of

419

00:44:08,880 --> 00:44:16,160

existing data and three the establishment of a ufo research center staffed by competent scientists

420

00:44:16,720 --> 00:44:23,600

for ridicule is no longer appropriate we did not write the words that i have just spoken

421

00:44:24,240 --> 00:44:30,000

they had taken from a speech made in june of this year by dr j alan heinic chairman of the

422

00:44:30,000 --> 00:44:35,440

astronomy department of northwestern university and for the past 18 years science advisor to the

423

00:44:35,440 --> 00:44:43,200

air force study of ufo's we subscribe to his recommendations but we would make one important

424

00:44:43,200 --> 00:44:49,360

addition that the ufo research center the totally independent of government but that

425

00:44:49,360 --> 00:44:58,240

would have the authority to examine air force data this is david shonbrunn good night
