

1

00:00:00,000 --> 00:00:11,000

The entire crew and some of the passengers watched this object for 18 minutes and it

2

00:00:11,000 --> 00:00:18,000

lengthened the station alongside us some distance away and I think there's no question that

3

00:00:18,000 --> 00:00:23,000

it was no illusion and that it was being intelligently handled.

4

00:00:23,000 --> 00:00:29,000

We'd served dinner to the passengers and we were serving drinks and we noticed there was some

5

00:00:29,000 --> 00:00:35,000

confusion in the cabin. The passengers were all looking out at the port side of the aircraft.

6

00:00:35,000 --> 00:00:42,000

I went to look through to see what was going on, look through the window and there we saw these

7

00:00:42,000 --> 00:00:50,000

seven objects. The one very large one which was black and solid looking, it kept changing shape

8

00:00:50,000 --> 00:00:57,000

when we first saw it, it was pear shaped and then it was stretched out like a cigar and then

9

00:00:57,000 --> 00:01:03,000

like an inverted telephone. I know it sounds ridiculous but it did look absolutely solid.

10

00:01:03,000 --> 00:01:10,000

There were six little ones applying information, sometimes three in front and three behind

11

00:01:10,000 --> 00:01:17,000

or five in front and one behind but always six with changing formation. The passengers of course

12

00:01:17,000 --> 00:01:24,000

asked me what it was and I had no idea. I went on the flight deck and asked Captain Howard

13

00:01:24,000 --> 00:01:30,000

and I got on the flight deck, Captain Howard and the technical crew were also all looking through

14

00:01:30,000 --> 00:01:37,000

the window and when I asked Captain Howard what it was he simply said, I don't know but for

15

00:01:37,000 --> 00:01:39,000

good and sake keep the passengers happy.
