

1

00:00:00,000 --> 00:00:05,000

Why do you believe that flying saucers exist?

2

00:00:05,000 --> 00:00:13,000

Well, at editor of Flying Salsa Review, and through our international U.S.O. Observer

3

00:00:13,000 --> 00:00:19,000

Corps, I see thousands of fighting reports sent to us from every country.

4

00:00:19,000 --> 00:00:23,000

Send him an ordinary man in the street who happens to have seen a flying saucer.

5

00:00:23,000 --> 00:00:27,000

That's right. Some of them very highly trained observers of the world.

6

00:00:27,000 --> 00:00:29,000

Is none of them a shot, Ed just picked?

7

00:00:29,000 --> 00:00:38,000

Yes, we have our wishful thinkers, and we have, as I say, our expert observers.

8

00:00:38,000 --> 00:00:42,000

Is there any evidence that does seem to be completely true?

9

00:00:42,000 --> 00:00:52,000

Yes. For instance, I have here a fighting report sent to us by Miss Connor of Truro Cornwall.

10

00:00:52,000 --> 00:00:57,000

Miss Connor is a highly trained woman observer.

11

00:00:57,000 --> 00:01:05,000

Her fighting took place at a Royal Observatory exercise on October the 21st last year.

12

00:01:05,000 --> 00:01:14,000

Miss Connor saw a silver oblong object high in the sky and watched it for 20 minutes.

13

00:01:14,000 --> 00:01:19,000

This object was standing still against the wind, which ruled out a balloon.

14

00:01:19,000 --> 00:01:26,000

Mr. Trinch, does that say that our flying saucers show us a perfectly possible explanation?

15

00:01:26,000 --> 00:01:32,000

They are, in fact, secret weapons used by the Russians or the Americans or even ourselves.

16

00:01:32,000 --> 00:01:36,000

No, they've been seen over every country in the world.

17

00:01:36,000 --> 00:01:40,000

No, the United States would not fly their secret weapon,

18

00:01:40,000 --> 00:01:45,000

sure, over the behind the curtain countries and by saucers.

19

00:01:45,000 --> 00:01:47,000

And why do you think there are people in them?

20

00:01:47,000 --> 00:01:53,000

Many books have been written on the subject, some of which have actually contained

21

00:01:53,000 --> 00:01:59,000

contact, round-contact stories with people from outer space.

22

00:01:59,000 --> 00:02:04,000

Some of these people have even been taken for rides in flying saucers.

23

00:02:04,000 --> 00:02:07,000

Well, frankly, that sounds to me as if you've been taken for a ride.

24

00:02:07,000 --> 00:02:13,000

I simply do not believe for a second that anyone on the earth has gone up in a flying saucer.

25

00:02:13,000 --> 00:02:15,000

Well, that is a matter of opinion.

26

00:02:15,000 --> 00:02:21,000

I believe, we believe, definitely, that existence for flying saucers exists.

27

00:02:21,000 --> 00:02:23,000

That is our main plan.

28

00:02:23,000 --> 00:02:26,000

And what part of outer space do you think they come from?

29

00:02:26,000 --> 00:02:31,000

Professor Hermann Ober, the guided missile expert,

30

00:02:31,000 --> 00:02:35,000

considers that they come from other solar systems altogether.

31

00:02:35,000 --> 00:02:39,000

They may even possibly come from all over the universe.

32

00:02:39,000 --> 00:02:44,000

Choosing for our people from outer space, among us on earth at the moment.

33

00:02:44,000 --> 00:02:49,000

I have never knowing they met one, but nothing has been possible.

34

00:02:49,000 --> 00:02:54,000

Mr. Tanksha, I think I would be convinced in flying saucers except for one thing.

35

00:02:54,000 --> 00:03:01,000

If they do exist, why haven't they made themselves known to us in a manner which would leave no doubt whatsoever?

36

00:03:01,000 --> 00:03:05,000

Well, would you descend a land in a snake pit?

37

00:03:05,000 --> 00:03:08,000

Well, if flying saucers are listening into us at this moment,

38

00:03:08,000 --> 00:03:12,000

let's assure them that we will treat them most hospitably if they arrive.

39

00:03:12,000 --> 00:03:14,000

I know I'd love to see one.

40

00:03:14,000 --> 00:03:18,000

And as a matter of fact, we have with us two people who claim they have seen flying saucers.

41

00:03:18,000 --> 00:03:21,000

The first is Mr. Gavin Gibbons.

42

00:03:21,000 --> 00:03:27,000

I was near-rented when I suddenly saw a bright light in the sky.

43

00:03:27,000 --> 00:03:31,000

It was much brighter than a star and caught my attention at once.

44

00:03:31,000 --> 00:03:37,000

It got larger and larger until half the size of the moon, and then it vanished.

45

00:03:37,000 --> 00:03:41,000

I've seen ten others.

46

00:03:41,000 --> 00:03:52,000

Most of these were scanners, but we believe to be our unmanned pickups for super-television sets on the larger spacecraft.

47

00:03:52,000 --> 00:03:58,000

We think they may come from Mars, or Venus, or the planets of another star.

48

00:03:58,000 --> 00:04:06,000

In my researches in rapture and the West Midlands, I have come across a lot of activity in the Stafford area,

49

00:04:06,000 --> 00:04:11,000

especially over the two aerodromes of Cyphreth and Hickson.

50

00:04:11,000 --> 00:04:17,000

And I believe that, should the spacecraft and the spacemen decide to land,

51

00:04:17,000 --> 00:04:24,000

they will choose Stafford as their base, and now Dr. Perthewilkin, an amateur astronomer,

52

00:04:24,000 --> 00:04:31,000

I did not believe in the existence of an identified flying orbiter until June the 11th, 1954,

53

00:04:31,000 --> 00:04:36,000

when on a flight from Charleston, West Virginia, to Atlanta, in Georgia,

54

00:04:36,000 --> 00:04:42,000

the plane was flying the height of 8,000 feet between two bunk-sumeless clouds.

55

00:04:42,000 --> 00:04:51,000

Against the shaded one and above two of the clouds, I saw two perfectly oval, brilliant, and golden color objects,

56

00:04:51,000 --> 00:04:55,000

which are moving the opposite direction to the clouds, but slowly.

57

00:04:55,000 --> 00:05:04,000

Then my eye was attracted to a cellar-dog object, a slightly similar size, but which was not of a bright color.

58

00:05:04,000 --> 00:05:11,000

This suddenly accelerated from zero, and in five seconds, it vanished behind a mirror cloud.

59

00:05:11,000 --> 00:05:17,000

Its estimated speed must have been somewhere about 2,000 miles an hour.

60

00:05:17,000 --> 00:05:23,000

I'm convinced that they came from this earth, but I cannot identify them,

61

00:05:23,000 --> 00:05:27,000

and these any known civil or military objects.

62

00:05:27,000 --> 00:05:34,000

Even more remarkable is the experience of Mr. King, editor of Cognac Voice.

63

00:05:34,000 --> 00:05:53,000

On the 23rd of March, 1956, I had what was to me the great honor to be granted permission to visit the space station, you know, a bit of this earth.

64

00:05:53,000 --> 00:06:08,000

This space station, we term the third satellite, it comes from Mars, and after being given permission, I did actually visit this space station in my atheric body.

65

00:06:08,000 --> 00:06:11,000

Your atheric body, what's that?

66

00:06:11,000 --> 00:06:27,000

Well, that is the subtle counterpart of the man's body, man-hole, yes, as apart from the purely physical cellular structure.

67

00:06:27,000 --> 00:06:30,000

Have you seen people from outer space?

68

00:06:30,000 --> 00:06:36,000

Yes, I saw people from Mars and Venus and from other planets.

69

00:06:36,000 --> 00:06:38,000

So, could you understand them?

70

00:06:39,000 --> 00:06:54,000

The people from Mars, I could understand quite easily, they spoke to me through telepathy and they telepathed the kind of pictures of what they wanted to convey.

71

00:06:54,000 --> 00:06:58,000

And might I ask, what are the women on Venus like?

72

00:06:58,000 --> 00:07:05,000

Very, very beautiful indeed, out of this world, absolutely out of this world, yes.
