

1

00:00:00,000 --> 00:00:04,000

Welcome to London Mr. Demsky.

2

00:00:04,000 --> 00:00:09,000

I'm mighty glad to be here. A little chilly to what I have been accustomed to.

3

00:00:09,000 --> 00:00:13,000

It has gone a little curled hasn't it? Never mind, it'll warm up perhaps tomorrow.

4

00:00:13,000 --> 00:00:20,000

Now you've just turned in from Australia as part of your world tour lecturing on flying saucers.

5

00:00:20,000 --> 00:00:27,000

You've turned to spoken to people from Venus and your recent book inside the spaceships.

6

00:00:27,000 --> 00:00:31,000

You say you've made a journey. Now are these facts correct?

7

00:00:31,000 --> 00:00:37,000

They are correct. They're facts and they'll stand as facts for a long time I believe.

8

00:00:37,000 --> 00:00:44,000

Now very many people believe in the existence of flying saucers but few have any of had the experiences that you've had.

9

00:00:44,000 --> 00:00:47,000

Now can you tell me where did you first meet a man from?

10

00:00:47,000 --> 00:00:55,000

Well in the Arnet Desert, Mojave Desert, 1952 on November the 28th.

11

00:00:55,000 --> 00:01:02,000

And you've met him since? I've met him since and I've known him for a while. I've also flown around the moon.

12

00:01:02,000 --> 00:01:04,000

Have you really? Yes.

13

00:01:04,000 --> 00:01:09,000

Now that brings me to a point in your recent book. You say you've been inside one of these flying

saucers.

14

00:01:09,000 --> 00:01:12,000

And they're correct. How did that come about?

15

00:01:12,000 --> 00:01:16,000

Well, what do you mean? How did that come about there?

16

00:01:16,000 --> 00:01:18,000

Well how were you invited to?

17

00:01:18,000 --> 00:01:24,000

Well on the second contact that I've made I was invited to take a ride with him. I went in.

18

00:01:24,000 --> 00:01:29,000

And it was no different than taking a ride down the plane that I just came in.

19

00:01:29,000 --> 00:01:35,000

In your book I see some very remarkable photographs. How did you take those? One in particular of the flying saucers?

20

00:01:35,000 --> 00:01:42,000

Well the reason why they may be remarkable is you say because they're all taken through a telescope.

21

00:01:42,000 --> 00:01:45,000

With a camera directly you could not get a picture that sharp.

22

00:01:45,000 --> 00:01:53,000

But with a telescope that's why astronomy uses telescopes to get good pictures of stars at a great distance.

23

00:01:53,000 --> 00:01:57,000

Now can you give me details about these people? What do they like?

24

00:01:57,000 --> 00:02:03,000

Well they're very much like ourselves after all. Why should they be any different?

25

00:02:03,000 --> 00:02:09,000

We assume that we are the images of a creator and why should the creator be a freak somewhere else?

26

00:02:09,000 --> 00:02:12,000

And they are like us in every respect?

27

00:02:12,000 --> 00:02:16,000

Absolutely. Except a little further advance in many ways.

28

00:02:16,000 --> 00:02:20,000

Now why is it that they weren't normally land here?

29

00:02:20,000 --> 00:02:29,000

Well they have landed many many times. I have on record right now two two thousand five hundred cases where context has been made.

30

00:02:29,000 --> 00:02:37,000

And quite a number of landings where people had the experiences I have had except they didn't stick their neck out as I did.

31

00:02:37,000 --> 00:02:41,000

And I wouldn't have done it either had the press not put me out there first.

32

00:02:41,000 --> 00:02:46,000

What did you say Mr. Damsky is the purpose of the visit to well?

33

00:02:46,000 --> 00:02:52,000

Well it's purely scientific I would say it has been put on the other side but it's true scientific.

34

00:02:52,000 --> 00:02:59,000

You see we have the geophysical here been extended for another eighteen months all because the earth is shifting.

35

00:02:59,000 --> 00:03:03,000

And of course they're observing the same thing as we are observing.

36

00:03:03,000 --> 00:03:13,000

And according to the information recent information of the eighteen months research on that the earth has made its life change already.

37

00:03:13,000 --> 00:03:17,000

And they're interested in that sense is part of the same system.

38

00:03:17,000 --> 00:03:21,000

Now why have they chosen you as choice a contact man?

39

00:03:21,000 --> 00:03:28,000

They haven't really chosen me I think it was an accident. I haven't been in the right places the right spot that's all the right time.

40

00:03:28,000 --> 00:03:33,000

But they have chosen others since they have chosen me and some even before myself.

41

00:03:33,000 --> 00:03:38,000

Have you any tangible evidence to show us all the existence of the earth?

42

00:03:38,000 --> 00:03:53,000

Well yes I have to small degree and that is I had given Mr. Desmond down here Leslie Desmond some mineral in the air had analyzed and incidentally he didn't know this.

43

00:03:53,000 --> 00:03:59,000

But I have analyzed since then at the Air Research in Phoenix Arizona and it came out the same way.

44

00:03:59,000 --> 00:04:05,000

I have even home a what to call a microwave film on it.

45

00:04:05,000 --> 00:04:07,000

Where did you get it from one of the flying saucers?

46

00:04:07,000 --> 00:04:14,000

Yes and there's two elements in there that are not found on earth according to the analysis of both cases.

47

00:04:14,000 --> 00:04:19,000

Now do you think we shall see more of people from other time in the future?

48

00:04:19,000 --> 00:04:34,000

Well I think so if the records follow as they have been going because in Adelaide, Australia a lecture down there and I we saw four flying saucers right after the lecture that is all group of people did.

49

00:04:34,000 --> 00:04:36,000

And they asked me why don't they land here?

50

00:04:36,000 --> 00:04:42,000

I said they might after I leave on the 13th day of March be glaring to place right there.

51

00:04:42,000 --> 00:04:43,000

So they could be happening.

52

00:04:43,000 --> 00:04:46,000

Would you say the influences are going to be good or evil?

53

00:04:46,000 --> 00:04:48,000

Influences are very good.

54

00:04:48,000 --> 00:04:50,000

Very good.

55

00:04:50,000 --> 00:04:52,000

When do you think you'll meet them again?

56

00:04:52,000 --> 00:04:53,000

When will I meet them?

57

00:04:53,000 --> 00:04:55,000

That's hard to say you never can tell.

58

00:04:55,000 --> 00:04:59,000

When I one last question I'd like to put to you Mr. Damsky.

59

00:04:59,000 --> 00:05:01,000

I'm a radio reporter.

60

00:05:01,000 --> 00:05:03,000

I would like to meet them to interview them.

61

00:05:03,000 --> 00:05:05,000

Could you ever arrange that for me do you think?

62

00:05:05,000 --> 00:05:10,000

I wish I could but there will be a lot up to them whether they want such an interview or not.

63

00:05:10,000 --> 00:05:12,000

If they do I surely would.

64

00:05:12,000 --> 00:05:13,000

You'll let me know will you?

65

00:05:13,000 --> 00:05:15,000

I would do that right now.
