

1

00:00:00,000 --> 00:00:07,000

Hello Major Keeho, this is Peter Norris speaking to you from Melbourne, Australia.

2

00:00:07,000 --> 00:00:14,000

I've sent you this tape in the hope that you may like to record some comments on the establishment of NYCAP.

3

00:00:14,000 --> 00:00:22,000

As I've mentioned to you in my letters, we run a weekly radio show here called The Truth Behind Flying Saucers.

4

00:00:23,000 --> 00:00:30,000

This is a show which has caused tremendous interest in Melbourne, has been running since March this year.

5

00:00:30,000 --> 00:00:35,000

And in the last few weeks we have mentioned NYCAP quite a few times.

6

00:00:35,000 --> 00:00:42,000

A lot of listeners have written into us expressing their interest and asking us to forward their names onto you

7

00:00:42,000 --> 00:00:45,000

so that you may send them for particulars of NYCAP.

8

00:00:45,000 --> 00:00:49,000

Now we'll be sending those names onto you very shortly.

9

00:00:49,000 --> 00:00:58,000

However we think it might cause more of an impact if you were to record a few comments on NYCAP yourself.

10

00:00:58,000 --> 00:01:04,000

Requesting listeners who are interested to send their names into us for forwarding onto you in Washington.

11

00:01:04,000 --> 00:01:15,000

And we feel that the result would be that a lot of Melbourne people would be interested in joining NYCAP on a full membership basis.

12

00:01:15,000 --> 00:01:21,000

Record double track if you wish at 7.5 inches per second.

13

00:01:21,000 --> 00:01:31,000

Don't worry about the length, it can be as long as you like because we can take extracts for playing over the radio show

14

00:01:31,000 --> 00:01:36,000

and the holler of the tape can then be played at our next public meeting.

15

00:01:37,000 --> 00:01:46,000

I'm sending an international money order which will be sufficient in amount to cover air mailing of the tape back to me.

16

00:01:46,000 --> 00:01:52,000

Now my address is Melbourne Victoria Australia.

17

00:01:52,000 --> 00:01:56,000

I hope that money order will get to you soon.

18

00:01:56,000 --> 00:02:05,000

Dr Ditmar of Able Forks in New York tells me that one money order I sent him took months to arrive.

19

00:02:05,000 --> 00:02:07,000

Why that is, I don't understand.

20

00:02:07,000 --> 00:02:12,000

I've sent you too many orders before to the total value of \$7.50.

21

00:02:12,000 --> 00:02:22,000

I hope you've got them by now, but if you haven't then you'll know that they've apparently been held up in the course of being sent over.

22

00:02:22,000 --> 00:02:30,000

But at any rate, this postal note I'm sending you to cover air mail back is on the way and I hope you'll get it shortly.

23

00:02:30,000 --> 00:02:37,000

I received my first copy of the UFO investigator some weeks ago and enjoyed it immensely.

24

00:02:37,000 --> 00:02:45,000

I've shared it with around to quite a few of my friends and they appear to be quite impressed even though they weren't UFO believers.

25

00:02:46,000 --> 00:02:58,000

I think that the most impressive thing about the publication is the obviously highest standard and high qualification of the members of the Board of Governors.

26

00:02:58,000 --> 00:03:05,000

I think that will go a long way to quidditing the UFO subject generally in the eyes of the public.

27

00:03:05,000 --> 00:03:11,000

I was very interested too to see that you are allocating space each issue for members' questions.

28

00:03:11,000 --> 00:03:21,000

One particular question I would like to see answered, quite possibly you may already have given space to it in the second issue of the investigator,

29

00:03:21,000 --> 00:03:32,000

is the very interesting matter which arose in the Flying Sousa Review of England in the last issue about a peculiar sighting in Brazil.

30

00:03:32,000 --> 00:03:38,000

I understand that some sort of substance fell from a flying saucer which was identified as being pure 10,

31

00:03:38,000 --> 00:03:42,000

which could not be found on Earth under any circumstances.

32

00:03:42,000 --> 00:03:53,000

The report went on to say that Professor Mani had got hold of a piece of this 10 and had analysed it and found that it was pure 10.

33

00:03:53,000 --> 00:04:06,000

There weren't any further details given in the Flying Sousa Review so I shall look forward to hearing further details as to whether NICAP has made any further analyses and has any more news to hand.

34

00:04:07,000 --> 00:04:20,000

We as a society feel very proud to be associated with you in this great work and we hope that you will call on us at any time that you find that we can be of use to you.

35

00:04:20,000 --> 00:04:24,000

Of course if we get any good sightings here we will forward them on to you.

36

00:04:24,000 --> 00:04:32,000

During the last few months however I should point out that we have had very few sightings, very few good sightings.

37

00:04:32,000 --> 00:04:42,000

On May 19th there was a peculiar incident when a meteor-like object flashed right across the state and was seen by thousands of people.

38

00:04:42,000 --> 00:04:47,000

That was very peculiar. You may have read about it in the English Flying Sousa Review.

39

00:04:47,000 --> 00:04:51,000

However since then things have been very quiet.

40

00:04:51,000 --> 00:05:01,000

In 1953-54 we had many reports. They were frequent, almost weekly you might say, of peculiar sightings, amazing sightings.

41

00:05:01,000 --> 00:05:04,000

But since then things have quietened down.

42

00:05:04,000 --> 00:05:07,000

It's almost as though the UFOs had a good look at us in those years.

43

00:05:07,000 --> 00:05:16,000

Decided we weren't of military or scientific interest and went off to places which were more interesting to them.

44

00:05:16,000 --> 00:05:19,000

At any rate that's the way it seems to me.

45

00:05:19,000 --> 00:05:28,000

Well I shan't take up any more of your time but I will look forward to getting this take back from you with your comments.

46

00:05:28,000 --> 00:05:32,000

I hope you have at least caught it on it if that's not too much trouble for you.

47

00:05:32,000 --> 00:05:38,000

We realise of course that you must be very busy but we would be very grateful if you could do this for us.

48

00:05:38,000 --> 00:05:49,000

And I know that there will be many people in Melbourne, not only amongst our members but amongst the general public who would be most interested to hear from you.

49

00:05:49,000 --> 00:05:55,000

Incidentally I hope that you will one day find your way clear to make a tour of Australia.

50

00:05:55,000 --> 00:06:03,000

There are thousands of people here who have read your books and I can assure you that you would get a very good reception.

51

00:06:03,000 --> 00:06:07,000

Well I think that's all for now so I'll say goodbye.
