

1

00:00:00,000 --> 00:00:07,000

Mr Shutterwood, could you tell us how you first became involved in the War Mr Mystery?

2

00:00:07,000 --> 00:00:15,000

Yes, quite simply really. It was just that I was the man on the spot, I suppose, to report the news when it first broke.

3

00:00:15,000 --> 00:00:23,000

And although I was secretly laughing at the early witnesses, I just couldn't believe that what they were telling me was true.

4

00:00:23,000 --> 00:00:32,000

And yet, the fact that it was true was proven to me by a personal experience I had nine months later after the first outbreak.

5

00:00:32,000 --> 00:00:38,000

It all began on Christmas Day of 1964, which is a long, rather good, it's almost two years ago now.

6

00:00:38,000 --> 00:00:47,000

And first of all, the advent of this thing, as we call it, either individually or collectively, we term it the thing, for one of a better name probably,

7

00:00:47,000 --> 00:00:51,000

because I don't think that many War Mr People have heard of flying saucers.

8

00:00:51,000 --> 00:01:02,000

When this thing broke on Christmas morning of 1964, the first to be affected were troops, soldiers around here at Nook Camp,

9

00:01:02,000 --> 00:01:14,000

and they woke, it was just as though, this was told to me by a sergeant up there, it was just as though chimneys had been wrenched off the main barrack roofs

10

00:01:14,000 --> 00:01:18,000

and broken apart and the masonry scattered all over the block.

11

00:01:18,000 --> 00:01:25,000

That was the sound effects that they had accompanied by a high-pitched whining or a droning note.

12

00:01:25,000 --> 00:01:29,000

The guard turned out, quite frankly, and they saw nothing at all.

13

00:01:29,000 --> 00:01:35,000

A few hours later, it would be about 6.12 a.m. on Christmas Day 1964,

14

00:01:35,000 --> 00:01:42,000

Mrs. Marjorie Byer, her housewife, was going to church, her early morning service, at Christ Church.

15

00:01:43,000 --> 00:01:48,000

And then the sounds, as she put it, descended on her, or the aerial vibrations descended on her.

16

00:01:48,000 --> 00:01:53,000

She felt, she actually felt, there was a bodily contact, she felt as though her neck was being pressed down,

17

00:01:53,000 --> 00:02:01,000

and she felt most uncomfortable. She was savagely jerked backward and she just couldn't fight off these vibrations.

18

00:02:01,000 --> 00:02:05,000

Again, nothing seen. That was a shocking experience.

19

00:02:05,000 --> 00:02:11,000

And although I've led off by saying that I was secretly laughing, I wasn't laughing outwardly, obviously I'd be a fool to do that,

20

00:02:11,000 --> 00:02:16,000

but as a newsman of 30 years' experience, and pretty hard-headed,

21

00:02:16,000 --> 00:02:23,000

I just couldn't really believe, you know, in full what she was telling me.

22

00:02:23,000 --> 00:02:27,000

But then, of course, the head postmaster of all, Mr. Roger Rump came along

23

00:02:27,000 --> 00:02:32,000

and he'd experienced a similar sort of thing on the same morning at approximately the same time,

24

00:02:32,000 --> 00:02:35,000

except that he was luckily in bed.

25

00:02:35,000 --> 00:02:43,000

And he heard the sound as of all his 5000 pounds being uprooted, as he called it, you know, by an unseen giant hand,

26

00:02:43,000 --> 00:02:50,000

and then smashed on again, but he heard this high droning note, and he wondered,

27

00:02:50,000 --> 00:02:53,000

I mean, it couldn't have been high-pathicables or anything like that.

28

00:02:53,000 --> 00:03:00,000

We've checked all the possible things that it could have been, and in this case, it could not have been anything normal or earthly.

29

00:03:00,000 --> 00:03:05,000

Well, then that was the humble start, or the specialist start in one way, I suppose,

30

00:03:05,000 --> 00:03:15,000

but then we got onto sightings of the objects themselves, and we've had over 800 people now have seen most peculiar things,

31

00:03:15,000 --> 00:03:20,000

but they all conform really to two basic patterns or descriptions.

32

00:03:20,000 --> 00:03:28,000

One, the long cigar in the sky, and it's often described as a cigar, sometimes with lighted windows,

33

00:03:28,000 --> 00:03:33,000

and the conventional, what we know know to be termed a flying saucer,

34

00:03:33,000 --> 00:03:40,000

which apparently the outer part spins, the central dome, which is that the uppermost part does not,

35

00:03:40,000 --> 00:03:45,000

and there are four portholes apparently on either side of the dome, we've checked on that.

36

00:03:45,000 --> 00:03:52,000

But as I say, I was getting, for example, an army major gave me a good story on the thing line,

37

00:03:52,000 --> 00:04:00,000

and he said that his car was stopped at over 40 miles an hour, it was stopped dead by an aerial vibration at Colway Clump.

38

00:04:00,000 --> 00:04:06,000

He again, when he jumped out of the car, would feel this pressure from above,

39

00:04:06,000 --> 00:04:13,000

and he described the noise to me as though it was a thousand high-powered refrigeration plants in action all at the one time.

40

00:04:13,000 --> 00:04:18,000

Well, of course, we have no refrigeration units around here, that was ruled out,

41

00:04:18,000 --> 00:04:28,000

but we've had an Aria pilot's wife, a matron at a hospital, a hospital physiotherapist, a vicar, his wife, their family.

42

00:04:28,000 --> 00:04:37,000

We've had a naval officer who was on leave at the time, at Longleat, who has seen these things.

43

00:04:37,000 --> 00:04:46,000

We've had engineers, the usual classes, classes of people, headmasters and art master, art students at the college around here.

44

00:04:46,000 --> 00:04:50,000

People of that kind of a have actually seen these things.

45

00:04:50,000 --> 00:05:00,000

Now, even so, although they seem to be affecting, visually or affordably, they were affecting the right type of people, very high-caliber witness in my book.

46

00:05:00,000 --> 00:05:10,000

I was still secretly, secretly, immediately laughing at these people, because I just didn't believe that anything from outer space could possibly exist.

47

00:05:10,000 --> 00:05:19,000

But I was convinced on September the 28th, which is a Tuesday, at 3.42 p.m., I'll never forget, when I saw this cigar for myself,

48

00:05:19,000 --> 00:05:27,000

and I trained the camera on it, the movie camera, I could feel a needling sensation of my left arm, the left side of my face.

49

00:05:27,000 --> 00:05:38,000

My eye watered for several weeks afterwards, it was very embarrassing, and I could feel that this

thing had power, that it was pushing out.

50

00:05:38,000 --> 00:05:47,000

Whether it thought that I was manning a machine gun, was trying to, you know, fire away at it, or whether it disliked or didn't want to be photographed, I wouldn't like to say.

51

00:05:47,000 --> 00:05:57,000

But I think really, there was certainly no radioactivity there, I checked up with the doctor, there's nothing radioactive or harmful about the ray that was being pushed out.

52

00:05:57,000 --> 00:06:05,000

But I think it was pushed out really, and truly, I think that the main reason was, this is a disbelieving sort of chap.

53

00:06:05,000 --> 00:06:09,000

Now we've got to convince him personally, and they did. There's no doubt about it.

54

00:06:09,000 --> 00:06:22,000

And the camera jumped about in my hands, I dropped it, and the film had jumped off the reel before that, I'm sure, because there were only a few inches of film on the thing, and the rest was just blackened out.

55

00:06:22,000 --> 00:06:31,000

And I've produced this in evidence, I've been in touch with the Air Ministry, or they've been in touch with me rather, on an average twice a week since last August.

56

00:06:31,000 --> 00:06:45,000

And everything, every sighting that's happened, witnesses' names, addresses, location, in sky, the object, direction it's pursuing, any variation in speed, any variation in color, and I find that the two are synonymous.

57

00:06:45,000 --> 00:06:49,000

If there's a variation in color, it denotes that there's an alteration in speed.

58

00:06:49,000 --> 00:06:59,000

I think we've given them some useful information, and particularly how these craft, all of them, have the capacity apparently, so apparently, of changing shape,

59

00:06:59,000 --> 00:07:07,000

or they do visually to us, but that could be, of course, that they're traveling at that particular time so fast that the eye just can't follow them.

60

00:07:07,000 --> 00:07:18,000

It got a bit more serious in September and October for a period of about seven weeks, I was getting nightly phone calls here, and I just couldn't weigh them up.

61

00:07:18,000 --> 00:07:25,000

I thought these people must be absolute hoaxers, but I didn't think it was a very good, very nice thing to do to pull anyone's leg.

62

00:07:25,000 --> 00:07:41,000

These things were still happening all about here. As I say, over 800 people have been affected, and I say affected deliberately, because a number of them tell me afterwards that they feel somehow different after having seen these things at close, particularly at close quarters.

63

00:07:41,000 --> 00:07:47,000

They do seem to get a moral or a spiritual uplift, and they become, as they term it, better people.

64

00:07:47,000 --> 00:07:57,000

They want to be more tolerant, whether that conveys anything I wouldn't know, that may be going into the realms of the esoteric or the arcana, and I don't believe in the supernatural.

65

00:07:57,000 --> 00:08:12,000

But these calls, because, harking back to these calls, now these, if they were not hoaxers, could be the most relevant and the most revelatory things that have ever happened, because I was contacted on the phone by three people.

66

00:08:13,000 --> 00:08:34,000

Now, they rang from a local phone box, they even gave me the kiosk number. There was no doubting

the fact that they were there, because, I mean, the whole family here, you know, would know that they were here, and I had Peter Earl of the News of the World down who was following up a theme story at the time when the first call broke, and I handed the receiver to him and he listened.

67

00:08:34,000 --> 00:08:48,000

Now, as you know, if you get a local call, you get the four pennies dropping, but there were no pennies dropping at all, and all that I could hear was a distinct crackling noise as of electricity, and this accompanied the voices always that came through to me.

68

00:08:49,000 --> 00:08:59,000

There were three people, and they claimed that they came from a planet, or a cantel, as they termed it, called Anstria, and I made them spell it out, A-E-N-S-T-R-I-A.

69

00:08:59,000 --> 00:09:08,000

The female queen, the commander of the Ocepandet Anstria, or the Cantel Anstria, was named Teleli Song, and I made her spell that out.

70

00:09:08,000 --> 00:09:19,000

The chap who first came to me on their behalf was called Kelsan, C-A-E-L-L-S-A-N, and he told me that phonetically it wouldn't matter if I spelled it with a K to begin with.

71

00:09:20,000 --> 00:09:28,000

But what they told me, the third person, was a chap called Celeric, S-E-L-L-R-I-K, who was the English interpreter of the planet.

72

00:09:28,000 --> 00:09:34,000

Kelsan was the spacecraft commander, and Teleli Song was the female queen.

73

00:09:34,000 --> 00:09:48,000

Now, they told me, this sounded outrageous to me, but among the little incidental and things and trivia that they told me to begin with, as though trying to persuade me, well, you must listen, you know.

74

00:09:48,000 --> 00:09:58,000

Here is what sort of people we are, and this is what we're here for. Leading up that, they told me that, or Teleli Song, for example, said that she was 758 years old in our earth terms.

75

00:09:58,000 --> 00:10:05,000

Their conception of time, I would imagine, is different from ours, but in our earth terms she was 758 years old.

76

00:10:05,000 --> 00:10:10,000

Kelsan and Celeric and Teleli Song come to that.

77

00:10:10,000 --> 00:10:21,000

All warned me that this earth should know certain information, and I took this damn pains taking me in shorthand, and I wrote my notes up for my book.

78

00:10:21,000 --> 00:10:27,000

But I wrote them up, I didn't want to use them because I was thinking all the time, am I being hoaxed?

79

00:10:27,000 --> 00:10:35,000

Well, now, the wife was rather nervous with all these calls coming through, although these voices were very musical, beautiful voices, as is electric crackling,

80

00:10:35,000 --> 00:10:40,000

and they didn't turn the dear shuttlewood or shuttlewood, my friend, it was always shuttlewood.

81

00:10:40,000 --> 00:10:47,000

But when they referred to one another, it was our beloved Celeric Song, our beloved Kelsan, our beloved Celeric.

82

00:10:47,000 --> 00:10:55,000

Well, these calls went on for seven weeks, and in about the third week, the wife said that I'm getting fed up with this, I'm really nervous about these people.

83

00:10:55,000 --> 00:11:01,000

She was convinced that these calls were genuine, I think, but she was a little bit worried as to

what type of people they were.

84

00:11:02,000 --> 00:11:09,000

Well, I told her very little, but I did agree that the next time they came through, we would get onto the police on another phone,

85

00:11:09,000 --> 00:11:16,000

get them to go to this call box and apprehend whoever was in there, so that if it was a hoaxer, or well and good, we'd know.

86

00:11:16,000 --> 00:11:19,000

If it wasn't, well, then we didn't know what happened.

87

00:11:19,000 --> 00:11:27,000

But we had this signal, you see, and I was giving her the signal as she came downstairs from putting the baby up to bed one night, about the third week of these calls,

88

00:11:27,000 --> 00:11:34,000

and she was going to fly to the phone to have her father's phone, which is another house down the road.

89

00:11:34,000 --> 00:11:42,000

But as soon as I gave a signal, and I said nothing at all about this phone call, the voice on the other end, which I think was Kelsan at that time,

90

00:11:42,000 --> 00:11:49,000

warned me immediately. He could read my mind, I had no doubt about that. He monitored my thoughts, because he said immediately,

91

00:11:49,000 --> 00:11:56,000

please do not try and apprehend us. It will be the worst for you, and we have no, we have nothing but love and compassion for your people,

92

00:11:56,000 --> 00:12:05,000

but we are here for specific purposes, but for heaven's sake, do not try and apprehend us. We will have to harm you if you do.

93

00:12:05,000 --> 00:12:10,000

No one can apprehend us. And that struck me as most peculiar.

94

00:12:10,000 --> 00:12:18,000

Several other things were beyond the pale of Shia coincidence, because, for example, on the first night that they rang,

95

00:12:18,000 --> 00:12:24,000

it was a Saturday, September the 10th. On September the 9th, or was it the 11th? Well, not, it wouldn't be the 7th, but anyway,

96

00:12:24,000 --> 00:12:32,000

our story came out in the mirror in September, together with young Faulkner's picture, which is a genuine picture of the thing.

97

00:12:32,000 --> 00:12:43,000

On the next day in the mirror, a false picture appeared, a hoax picture had been made up, you know, and this was on that particular night that Kelsan

98

00:12:43,000 --> 00:12:52,000

went through, and of course, I immediately said, sort of stringing him along and laughing, you know, in a laughing fashion,

99

00:12:52,000 --> 00:13:00,000

I said, well, what did you think of our picture in the mirror yesterday? And he said, by our standards, very poor, culpably poor,

100

00:13:00,000 --> 00:13:08,000

but by your standards, good, it is of our machine, and, or one of our craft, one of our spacecraft.

101

00:13:09,000 --> 00:13:17,000

And then I said, well, what did you think of the picture in the mirror today? And this was two days, Mark, before it was acknowledged to be a hoax picture.

102

00:13:17,000 --> 00:13:26,000

And immediately he said, it is too serious to laugh at, really, although we have a sense of humour, as you have, as you people have,

103

00:13:26,000 --> 00:13:37,000

but it is a fake, fake, fake, a great shame. And that was two days before. Well, a lot of things of that nature crept into the conversations,

104

00:13:37,000 --> 00:13:44,000

and it was as though not only could he monitor my thoughts, I couldn't monitor his, but he could certainly follow my trend of thought.

105

00:13:44,000 --> 00:13:52,000

I met very, very rarely did I have to ask them, any of them, a question. As soon as the question was in my mind and being framed,

106

00:13:52,000 --> 00:14:01,000

they'd answer immediately. So it was very uncanny. Anyway, these calls went on for seven weeks, and then I think that these people sensed.

107

00:14:02,000 --> 00:14:08,000

I wasn't still fully convinced, obviously. I've got to keep my feet well on the ground as a journalist, and to tell the people the truth.

108

00:14:08,000 --> 00:14:13,000

I don't care a hang about editors, that doesn't worry me what they want. I think it's the people that count most.

109

00:14:13,000 --> 00:14:22,000

But the messages that they gave me, these three, they would always finish off their telephone conversations each night with this warning or advice.

110

00:14:22,000 --> 00:14:29,000

Remember that the light from the suns, in the plural, the light from the suns shines upon us all.

111

00:14:29,000 --> 00:14:39,000

And their great fear, I look upon it as a fear, was not so much that they're filled with brotherly love for us and they want to save us,

112

00:14:39,000 --> 00:14:45,000

but I think that they're also, it's a matter of self-preservation to them, because what they were

telling me was correct.

113

00:14:45,000 --> 00:14:57,000

We could, really, by our own stupid nuclear experimentation and precipitous actions, if you like, on the part of well-meaning scientists, but misled scientists,

114

00:14:57,000 --> 00:15:06,000

if we committed some stupid mistake with the application of nuclear energy, we could ignite the whole of our Earth's envelope,

115

00:15:06,000 --> 00:15:11,000

or our planet's envelope, the cantel's envelope, as they would say, these people,

116

00:15:11,000 --> 00:15:19,000

in turn, as our scientists do not appreciate how perilously thin the atmosphere is around other galaxies,

117

00:15:19,000 --> 00:15:28,000

in addition to how perilously thin it is, even between our planets in this solar system, we could destroy our own creative system on this Earth.

118

00:15:28,000 --> 00:15:38,000

We could destroy or disrupt the creative system, as they say down by what they call the Great Spirit of Universal Truth, which is apparently God.

119

00:15:38,000 --> 00:15:44,000

That's their terminology. We could destroy the whole of our solar system, or the destroyer's creative system.

120

00:15:44,000 --> 00:15:53,000

We would blast our Sun out of the sky. We could also, then, by repercussions through space, we could knock their galaxies out of the sky,

121

00:15:53,000 --> 00:15:58,000

and that's their great fear. I'm certain of that, if what they're telling me is correct.

122

00:15:58,000 --> 00:16:09,000

And also, they gave me pointers to this effect that we are already, what we have done so far, is already weakening a protective belt around this Earth,

123

00:16:09,000 --> 00:16:15,000

is gouging holes in that belt, and they have to remedy that for us, and for their own sakes as well.

124

00:16:15,000 --> 00:16:25,000

Now, I was getting messages of that type, and everyone, all of these three people, who call them people for now, assuming they weren't hoaxers,

125

00:16:25,000 --> 00:16:37,000

were telling me how anxious they are to come onto Earth, to land without fear of being, you know, shot at, without fear of being scorned too much more than they have been already.

126

00:16:37,000 --> 00:16:47,000

When the time is right, they want to land, and they can help our medical people and our scientists in the correct application of both medical pursuits and scientific pursuits.

127

00:16:47,000 --> 00:16:57,000

They know disease, they conquered disease thousands of years ago, so therefore they can help all this world's people as far as cancer and the killing diseases go.

128

00:16:57,000 --> 00:17:05,000

They can also tell us what we can do in the right sense. We're now in an ultimate stage of evolution, the nuclear age, they tell us.

129

00:17:05,000 --> 00:17:17,000

That's why they're concerned, because it's so fatally easy, having got to that stage, to make a precipitate action, or to mix wrong elements or put wrong additives to the, you know, the compound,

130

00:17:17,000 --> 00:17:25,000

and therefore we would blow ourselves up and let them be it, and of course they fear that, I'm not sure, if their messages are correct.

131

00:17:25,000 --> 00:17:35,000

Well now, as I say, up to that time I was a little bit, I was laughing inwardly a little bit, until I was speaking to some scientists and medical people about this,

132

00:17:35,000 --> 00:17:46,000

and it's surprising how seriously a number of them took this, and I could tell that scientists did know, as these people have warned us, that there are only three basic sciences, that are branches of science,

133

00:17:46,000 --> 00:17:55,000

and I'm long scientific, you know, there's material or physical science, there's a spiritual science, there's a social science.

134

00:17:55,000 --> 00:18:08,000

Now, for the past half century, this is what I've been told by all of these three people at different times, material and physical science, which is gratifying our concrete needs, you know, materialism,

135

00:18:08,000 --> 00:18:21,000

motor cars, television sets, what have you, transport even, we, the superstructure of that science is dwarfing the other two sciences, which are spiritual and social,

136

00:18:21,000 --> 00:18:35,000

we're losing sight of spiritual and social sciences, which are creative, we don't know how to use their creations, so that the superstructure of the material science is in danger now of collapsing on top of the other two,

137

00:18:35,000 --> 00:18:49,000

and if that happens, well, we finish as a world, and they know that, so I think that there's a little, something here that's a little bit religious, they're here, they tell me, they're not the only planet engaged in this operation,

138

00:18:49,000 --> 00:19:01,000

but it is an operation, and apparently it's by divine guidance that they're here, they're not allowed under universal law to actually come down among us and tell us exactly what's wrong,

139

00:19:01,000 --> 00:19:11,000

but they have to give pointers, and they allege that they have in fact contacted the governments of all the leading nations on this earth, that's the nuclear powers obviously,

140

00:19:11,000 --> 00:19:23,000

and that these governments know who they are, they know what their primary purposes and aims are in coming to earth, and I've quoted these certain dates on which certain things are allege to have happened around here,

141

00:19:23,000 --> 00:19:34,000

and definitely nothing to do with the military, no accidents reported or anything like that from the police, so far as I'm concerned, and I'm convinced now, having watched them every night for the past nine months,

142

00:19:34,000 --> 00:19:43,000

these things are clear, nice, they've been ever since February the 25th on Crade or Hill, we've seen them above us hovering, as though saying, well, here we are, you know,

143

00:19:43,000 --> 00:19:51,000

and I've no doubt in my mind now that these are interplanetary or extraterrestrial or whatever you want to call them, they're certainly not of this earth,

144

00:19:51,000 --> 00:20:02,000

so that therefore looking back, I'm convinced now that the calls I received were genuine, particularly when I've witnessed landings myself up on that hill, that sounds incredible,

145

00:20:02,000 --> 00:20:11,000

but there are certain things I couldn't tell people at the moment, they would just laugh, but I think my book will pave the way, it's given faithfully I think,

146

00:20:11,000 --> 00:20:18,000

as a reporter, a trained observer, should write it up, it's given the whole facts of what has happened around here, and they have been facts,

147

00:20:18,000 --> 00:20:28,000

there's been no confusion in people's minds about military rockets or flares or satellites coming over, now for example, I'll give you one example here,

148

00:20:28,000 --> 00:20:41,000

we've had these things coming into the sky, we've timed them, and they come straight into you, it's like a curtain of light, it's over your head from the horizon,

149

00:20:41,000 --> 00:20:51,000

but in a straight line, not as a satellite comes up over the horizon, it's above your head in 18 seconds, now it's 36 seconds, assuming it went on instead of hovering,

150

00:20:51,000 --> 00:20:59,000

absolutely noiseless, it hovers, it hovers through up to an hour, it can cross the whole horizon therefore in less than 40 seconds, we'll put it at that,

151

00:20:59,000 --> 00:21:10,000

a satellite which is travelling at 17,500 miles an hour takes between 10 and, well we've worked it out, between 10 and 14, I would say minutes,

152

00:21:10,000 --> 00:21:19,000

to cross the same horizon, that's doing that speed, what speed are these things doing, even assuming they're no more than 40 or 50 miles up,

153

00:21:19,000 --> 00:21:27,000

although that's the norm I think, we were pretty certain, we've gone into it very deeply recently because we've had it forced onto us,

154

00:21:27,000 --> 00:21:35,000

so the observation team of three on that hill every clear night, an XREF crewman and airborne fighter Bob Strong,

155

00:21:35,000 --> 00:21:46,000

who's seen over 340 of these things since February the 25th this year, there's Mrs. Sibble Champion, a housewife who's intensely interested in this,

156

00:21:46,000 --> 00:21:54,000

as indeed I am, I lead the little team but I don't consider that I'm a leader, I don't consider that I'm an expert in this subject,

157

00:21:54,000 --> 00:22:01,000

but it's been forced upon me to do something because so many people have been down here hundreds from all over the world and they say,

158

00:22:01,000 --> 00:22:08,000

well look, you're at the centre of this, you've taken all the evidence on these things, obviously you're the right man in the right place at the right time,

159

00:22:08,000 --> 00:22:13,000

I would like that, but it could have been anyone, you know, it could have been Jack Jones, Joe So for anyone,

160

00:22:13,000 --> 00:22:20,000

I mean, I'm not over-published to myself, but I felt that it's my band and duty to chronicle as faithfully as I can what's happened here

161

00:22:20,000 --> 00:22:27,000

and I want to crack open the whole enigma to get really at the bottom of this, so that we have visual proof,

162

00:22:27,000 --> 00:22:34,000

with magistrates if you like, the Chief Inspector please, the Brigadier at the School of Infantry, high military people, civilian people,

163

00:22:34,000 --> 00:22:41,000

they're all there when these people do come down and I want them to appear if possible in the photographs that we take of them on the ground

164

00:22:41,000 --> 00:22:48,000

and certainly I take a notebook and pencil every night up there in case this does happen, so I can be there to interview them,

165

00:22:48,000 --> 00:22:56,000

but I think it's a phenomenal thing, of course it is, it's a fantastic thing, but there's so much evidence generating from all parts of the world,

166

00:22:56,000 --> 00:23:02,000

emanating from all parts of the world, that this is, one is not unique insofar as these things go,

167

00:23:02,000 --> 00:23:08,000

you know these sources, whatever you like to call them, I don't like the term sources, I prefer the term thing,

168

00:23:08,000 --> 00:23:15,000

although it may sound a little bit derogatory, it's not meant for him, but we're seeing them at such close range on some nights

169

00:23:15,000 --> 00:23:21,000

that we're convinced now that they will land shortly and tell us everything, we're convinced,

otherwise we'd be fools,

170

00:23:21,000 --> 00:23:28,000

we wouldn't have to go up there every night, every clear night for about eight or nine months now, and of course we're learning things all the time

171

00:23:28,000 --> 00:23:34,000

and I hope the book does give a point at the people as long as they have open minds, now here's another peculiar factor,

172

00:23:34,000 --> 00:23:41,000

I put a letter into our local journal on the feature editor and chief reporter and I put into that letter a warm invitation

173

00:23:41,000 --> 00:23:46,000

to anyone with an open mind in Warwindstead to come up and join our team for one night when it's clear,

174

00:23:46,000 --> 00:23:55,000

any night that they like they can come and join our team, I had two replies, that's all, out of a town, a district of 11,000 people,

175

00:23:55,000 --> 00:24:03,000

and yet word of what we are seeing got out to America and Australia, we've had Australians up there, we've had American headmasters,

176

00:24:03,000 --> 00:24:10,000

people that major have flown all the way by jet, 3 or 4,000 miles from West Orange in New Jersey for example,

177

00:24:10,000 --> 00:24:18,000

Richard George, a headmaster of a school there, he came all the way from America just on spec, purely on blind faith that he would see the warments to think

178

00:24:18,000 --> 00:24:23,000

and he was the first one to observe it from the hill and it hovered, now he went back and he was thrilled to bits

179

00:24:23,000 --> 00:24:30,000

and yet you see, you have that, that the whole world is interested, but the people of Warwindstead, and I'm not running them down

180

00:24:30,000 --> 00:24:35,000

because there are a lot of brave and fearless people who have come forward braving ridicule to tell me what they've seen,

181

00:24:35,000 --> 00:24:43,000

I'm not running the whole of Warwindstead down but I think that it's a very apathetic term, certainly so far as the thing is concerned,

182

00:24:43,000 --> 00:24:49,000

if only they had open enough minds to come up but they will laugh at it all, the majority of people even now,

183

00:24:49,000 --> 00:24:56,000

I'd say that 70% of people in Warwindstead admit that the thing is there, or 90% would, but 70% would still persist,

184

00:24:56,000 --> 00:25:02,000

even after seeing it, they would say well it must be something secret on a secret list, and when you get that attitude,

185

00:25:02,000 --> 00:25:07,000

I mean you can't do anything, we take astro compasses up there, the other lights compasses, we take bearings,

186

00:25:07,000 --> 00:25:14,000

we take measurements as far as we can, we've got a 3 inch telescope, a good camera now, we've just fought out 90 quid for a good camera

187

00:25:14,000 --> 00:25:21,000

and we've got a really good camera lens, in an effort to get more detail, to satisfy everyone really,

188

00:25:21,000 --> 00:25:29,000

but you still get that attitude that we'll grant that we're getting something peculiar here but we think it's something on the secret list,

189

00:25:29,000 --> 00:25:34,000

and that rather annoys me in a quiet way, I don't show feeling, I think we should all be tolerant,

190

00:25:34,000 --> 00:25:41,000

if there's one thing that these things teach you, I think it's love and tolerance, I certainly had a change of attitude,

191

00:25:41,000 --> 00:25:46,000

or of character even, I think in one way, since being in contact with these things.

192

00:25:46,000 --> 00:25:50,000

Has the aliens told us anything about life on science in this solar system?

193

00:25:50,000 --> 00:25:56,000

They've told us, so far as, well these of course, you must understand, are not in our solar system, the end streams,

194

00:25:56,000 --> 00:26:03,000

they told me that in a way, that they are not, Venus and Mars for example, which definitely are people according to them,

195

00:26:03,000 --> 00:26:09,000

Venus and Mars of course are going to different names to them, so that Venus and Mars would convey nothing to them,

196

00:26:09,000 --> 00:26:16,000

you know that's not their terminology, I mean they call an Earth or a planet, if you like, their term for it,

197

00:26:16,000 --> 00:26:24,000

as I stress this, can tell, C-A-N-T-E-L, but there are several things I have learned,

198

00:26:24,000 --> 00:26:31,000

and that is reincarnation is definite, whether religious people like to accept it or not,

199

00:26:31,000 --> 00:26:37,000

they tell me that reincarnation is a definite fact, so that if you read your Bible, it still doesn't conflict,

200

00:26:37,000 --> 00:26:43,000

that you die and you're born again, you reawakened, your soul lives on and that is the essence of it,

201

00:26:43,000 --> 00:26:51,000

but it doesn't mean to say that you go into another sphere, into a heaven, you're born here, where you're born originally,

202

00:26:51,000 --> 00:26:59,000

you keep being reincarnated until you've reached the perfection required before you go and join these people in another planet,

203

00:26:59,000 --> 00:27:06,000

and there, the God says to me that in my house are many mansions, well obviously that is the conception of heaven

204

00:27:06,000 --> 00:27:13,000

if you're religious, and I'm not awfully religious, you know, and yet I can only get that on my consciousness all the time,

205

00:27:13,000 --> 00:27:21,000

is that this is a great spiritual force that's moving down in our atmosphere, I get that, I'm not the only one to get that impression,

206

00:27:21,000 --> 00:27:26,000

Bob Strung I think you'll find, or anyone who's studied this thing at close quarters and in any detail,

207

00:27:26,000 --> 00:27:31,000

and for any length of time, you gradually become aware that there's something big and profound,

208

00:27:31,000 --> 00:27:36,000

and could be extremely helpful and beneficial to mankind in this operation that the planets are doing.

209

00:27:36,000 --> 00:27:46,000

You asked me about other planets, it's factual, according to these people, that Mars and Venus, I know, those two are people,

210

00:27:46,000 --> 00:27:55,000

absolutely like us, absolutely as we are, except that the people with whom I dealt are even more advanced,

211

00:27:55,000 --> 00:28:03,000

they're even more advanced, I'm convinced of that, because we've had a number of cases here of people having seen someone

212

00:28:03,000 --> 00:28:10,000

who had talked to them, and then the person has disappeared, so I think that these people have not only gained an extra sense,

213

00:28:10,000 --> 00:28:16,000

you know, they had six senses as opposed to a five, they have an extra dimension, they've mastered the fourth dimension,

214

00:28:16,000 --> 00:28:23,000

they can alter, if you like, the frequency, you know, of their atomic particles, we're all made up of atomic particles after all,

215

00:28:23,000 --> 00:28:29,000

they can lower and raise at will the frequencies of the atomic particles of which flash is compared with a flash and bone,

216

00:28:29,000 --> 00:28:36,000

and I think that they can render themselves invisible to sight, they would appear to be invisible, and then become visible when they want to,

217

00:28:36,000 --> 00:28:42,000

and I think that they can also erect a force barrier, not only round their craft to cushion it against friction when travelling at high speeds,

218

00:28:42,000 --> 00:28:49,000

I think they have their own personal value which they can erect also, because we've heard of various cases,

219

00:28:49,000 --> 00:28:54,000

we've heard of various cases of people going along at night in a car, they've seen someone lying in a road,

220

00:28:54,000 --> 00:29:00,000

they've gone over bang, front wheels over, bang, rear wheels over, they've run back in great alarm thinking,

221

00:29:00,000 --> 00:29:05,000

oh, my God, I must have killed him, or seriously injured him, run back, no one there at all, no blood stains on him.

222

00:29:05,000 --> 00:29:14,000

That's happened, so it sounds fantastic, but I think the world, by next May, is acquired by the prophecy here, by next May, May of 1967,

223

00:29:14,000 --> 00:29:17,000

I think that this world will have to be convinced of these people.

224

00:29:17,000 --> 00:29:22,000

Well, they can do it. Well, I can't tell you, just take that as a quiet prophecy.

225

00:29:25,000 --> 00:29:33,000

This is Annabel Plowman, who's the secretary of the Warmington District Trade Council, her husband is chairman of the Agricultural Workers Union,

226

00:29:33,000 --> 00:29:41,000

the district, they've both seen these people, obviously, and she particularly, her experience was quite hair-raising.

227

00:29:42,000 --> 00:29:52,000

She was coming back at about 5.20 past 12 or 0025 as the military could say, quite dark, coming back across a skew bridge at HB,

228

00:29:52,000 --> 00:30:02,000

which is only about two miles from us, and she experienced something which really shook everyone of us at the time when we heard about this.

229

00:30:02,000 --> 00:30:07,000

I see I checked up with police from the military afterwards, definitely nothing to do with military or the police.

230

00:30:07,000 --> 00:30:11,000

No military exercise, no air-to-ground exercise that night, this blizzard.

231

00:30:11,000 --> 00:30:22,000

She came along, her car, when she got to the approach to the skew bridge, she could see from the corner of her eye on the road ahead,

232

00:30:22,000 --> 00:30:31,000

the side of the road, there's a railway embankment, and on that embankment she could see an orange ball of light, quite stationary.

233

00:30:31,000 --> 00:30:41,000

As she got over the skew bridge, her engine began to pack up, she described her lighting, for

example, as if a candle in the wind, candles in the wind.

234

00:30:41,000 --> 00:30:48,000

She more or less drew to a stop, quite involuntarily, I mean she's still got her foot well down and she was in the right gear,

235

00:30:48,000 --> 00:30:54,000

but the force of this thing, the radiance, you know, the force that it was putting out was stopping her car, there's no other reason for that.

236

00:30:54,000 --> 00:31:01,000

We've had about nine cases of the Westbury Road here of the same nature, cars, scooters, lorries, all sorts of things are stopped at there.

237

00:31:01,000 --> 00:31:05,000

And this watch is stopped as well, and compasses go, hey, why, you know, and these things are bad.

238

00:31:05,000 --> 00:31:11,000

Is that where the army camp is, just at the bottom of the hill? We went there today, there's an army camp down the bottom.

239

00:31:11,000 --> 00:31:16,000

Oh no, no, no, this is on the civilian road, out of Warrants, on the Westbury Road.

240

00:31:16,000 --> 00:31:24,000

No, it's a good four miles from the firing area, the safe firing area of the military, or even the operational area of the military is a good two miles from there.

241

00:31:24,000 --> 00:31:34,000

This is a callaway clump on the Westbury Road, we've had some peculiar experiences there, but to get back to this one, particular one, which is just illustrative of several,

242

00:31:34,000 --> 00:31:41,000

I promise you that, I've given you the names, we've got nothing to hide, her car was virtually stopped.

243

00:31:41,000 --> 00:31:50,000

Well, the funny thing was that when this ball just flittered into the road in front of her, and then she could tell it was whirling around at a furious pace,

244

00:31:50,000 --> 00:32:02,000

and then it set off at an angle of about 90 degrees, you know, it just shot straight up at it as a tangent, and as soon as it went away, her car purred into life again.

245

00:32:02,000 --> 00:32:09,000

But this peculiar thing, she noticed a spherical object, she could tell it was round, and that's all, it was very dark,

246

00:32:09,000 --> 00:32:17,000

but by the radiance of the other thing on the opposite side of the road, she could tell that there was one of these things parked, without a light, there was no light on it at all, there was no light.

247

00:32:17,000 --> 00:32:26,000

As she got closer to this, she still couldn't see, because of the radiance, you know, she couldn't really pick out any detail, because of the radiance of the thing which was going away,

248

00:32:26,000 --> 00:32:32,000

but she could tell it was a similar type of thing. As she got past there, there were two figures in the hood,

249

00:32:32,000 --> 00:32:43,000

and these two figures obviously had no idea of road safety, you know, children have, and so I completely concluded that they had no idea at all of safe road-well-ness,

250

00:32:43,000 --> 00:32:52,000

because they were standing bang in the middle of the road, one a little bit more on her side, you know, on her left hand side, and the other, the other chap was well out into the middle,

251

00:32:52,000 --> 00:32:57,000

and they were trying to stop her, waving their arms about, and they were definitely trying to stop her,

252

00:32:57,000 --> 00:33:04,000

but you can imagine the effect on a young girl, even a responsible girl, and she's a confidential clerk at the military camp round here,

253

00:33:04,000 --> 00:33:08,000

in addition to being trade union secretary for the town industry.

254

00:33:08,000 --> 00:33:18,000

She obviously had the wind up, you know, and she had to go onto her long side of the road, well onto the long side of the road, to get past them,

255

00:33:18,000 --> 00:33:26,000

and she described them in detail, which is confirmed and corroborated by at least seven other people, and they all have the same description.

256

00:33:27,000 --> 00:33:36,000

That they have their in dark clothing, it could be a chocolate brown or a dark grey, people are not

certain of the colouring because these things have happened at night.

257

00:33:36,000 --> 00:33:46,000

They've seen their craft go into and out of water, they've seen these people standing by their craft, they've even seen the people without their craft apparently,

258

00:33:46,000 --> 00:33:54,000

but they all wear the same garment, single one piece, close fitting, woolen type of uniform, I'd say, or clothing,

259

00:33:54,000 --> 00:34:03,000

a balaclava type helmet, which normally shows just their forehead, the side of their cheekbones, and that comes to a point near the chin,

260

00:34:03,000 --> 00:34:14,000

in some cases they have not seen any mouth there because it's covered the mouth, very wide faces, very broad shoulders, tapering limbs, very thin legs,

261

00:34:15,000 --> 00:34:26,000

but high broad foreheads, and when the eyes have been seen, they've been, what has been described to me as a thing of great compelling power and great beauty,

262

00:34:26,000 --> 00:34:30,000

as though there's some perhaps hypnotic, mildly hypnotic influence about the eyes.

263

00:34:30,000 --> 00:34:38,000

There are things I could tell you about what I've seen that I would rather not if you don't mind, as I'll keep it to the facts of my witnesses,

264

00:34:38,000 --> 00:34:48,000

but I think that in the end people will know what I'm trying to get at in that book, you know, I think that they will really appreciate that these people are real,

265

00:34:48,000 --> 00:34:56,000

their craft are real, they're much more highly evolved than we are, but although they may be closer to God than we are, if you want to be religious,

266

00:34:56,000 --> 00:35:01,000

they are good in the majority, the majority of them are.
