

1

00:00:00,000 --> 00:00:15,760

Ladies, gentlemen and friends, much still continues to happen at Warminster, which is inexplicable.

2

00:00:15,760 --> 00:00:24,400

Now I say that deliberately because we've had a very nasty hoax apparently played on

3

00:00:24,400 --> 00:00:36,240

us at Warminster on Bu-4 a night of last year when two young fools and whoever engineered

4

00:00:36,240 --> 00:00:47,720

the plot was an idiot deliberately filled two balloons with helium. And as opposed to

5

00:00:47,720 --> 00:00:55,880

us who stick strictly to truth as we know it, they tried to fool some very nice people on the hill.

6

00:00:55,880 --> 00:01:10,760

Point number one, be very careful because something can boomerang with quite dreadful results if one

7

00:01:10,760 --> 00:01:16,360

tampers in a very serious subject of great importance in a negative way.

8

00:01:16,360 --> 00:01:29,440

It's a solemn opening. I'm sorry about that. We had Mick Taylor of the Rolling Stones who took up

9

00:01:29,440 --> 00:01:39,000

from young Jones who died, as you probably know, on our hill two Sundays ago. You'll probably hear

10

00:01:39,000 --> 00:01:47,160

from him himself what he saw. Robert Chapman, science man of the Sunday Express, has had the moral

11

00:01:47,160 --> 00:01:56,920

courage to tell the world what he saw. Patrick Moore, BBC Two Team came down, asked the camera men,

12

00:01:56,920 --> 00:02:03,200

asked the technicians, even the girl who was manipulating the clapperboard, scene two, tape one

13

00:02:03,320 --> 00:02:08,560

and all that sort of thing. Rather nice if you could get to them and ask them what they saw,

14

00:02:08,560 --> 00:02:18,640

because the program was deliberately cut in order to knock this subject flat. And unfortunately,

15

00:02:18,640 --> 00:02:26,000

when negative types come to our hill or to any other watching point, when they deal in negative

16

00:02:26,000 --> 00:02:33,680

action in a rather mean, petty, spiteful way, perhaps to hit at three or four very sincere

17

00:02:33,680 --> 00:02:41,440

people who are trying to find out something for the benefit of many. When they do this,

18

00:02:41,440 --> 00:02:48,800

they don't hit those people at all. Our hides are as thick as rhinoceros hides by now. We don't

19

00:02:48,960 --> 00:02:58,080

worry. We don't worry. But the point is, they're hitting the validity, the relevance, and the

20

00:02:58,080 --> 00:03:08,960

great importance of the subject. August 27th, we had a landing at Warminster. And of course,

21

00:03:08,960 --> 00:03:17,040

the experts came down to knock that one down. We had the courage to, and the people who saw

22

00:03:17,040 --> 00:03:25,440

this landing had the courage, all 13 of them, to allow their names to be used in the, in any

23

00:03:25,440 --> 00:03:36,880

magazine or UFO publication that we wished. Cosmos came down. And according to its director,

24

00:03:36,880 --> 00:03:43,920

Mr. Norman Oliver, a friend of mine, they discovered a point that we had missed somewhere

25

00:03:43,920 --> 00:03:52,240

along the way. This was a little team armed, if you like, that's a bad expression, but equipped

26

00:03:52,240 --> 00:04:00,640

with Geiger counter, who went to the area and where the figure had been standing. They didn't get

27

00:04:00,640 --> 00:04:07,040

any variation in field strength at all from the instrument. All they had was complete packing up

28

00:04:07,120 --> 00:04:19,600

of that instrument. August 27th, 1969. According to the one very good witness of the figure,

29

00:04:21,040 --> 00:04:29,040

the figure could easily have been that of a special visitor on August 27th, the same date

30

00:04:29,360 --> 00:04:44,560

1967. Stilt with in my second book. Now, of course, we allow that if we make any claim, which is not

31

00:04:44,560 --> 00:04:53,680

measurable by the yardsticks of scientific concepts and training as we know it on this planet or know

32

00:04:53,680 --> 00:05:05,840

them. So when we allude quite truthfully to quite bizarre, to apparently extravagant and outlandish

33

00:05:05,840 --> 00:05:15,680

incidents that occur, such as the footsteps of the invisible walker, of course, we're ridiculed,

34

00:05:16,240 --> 00:05:25,840

doesn't worry us. We seek truth that we want. And it could be, you know, that in the final analysis

35

00:05:25,840 --> 00:05:37,360

of all this, truth will come sooner or later to each individual. Call this intuition, if you like.

36

00:05:38,080 --> 00:05:45,600

Never be swayed by the arguments, no matter how well reasoned, no matter how eloquent the speaker,

37

00:05:45,600 --> 00:05:54,320

never be swayed by what he tells you. Go and see for yourself. And then perhaps,

38

00:05:55,280 --> 00:06:04,640

the little mustard seed which is here will begin to flourish, will be nurtured, and will carry you

39

00:06:04,640 --> 00:06:10,160

on to truths which could be quite transcendental of anything that we know scientifically.

40

00:06:10,720 --> 00:06:20,640

Four established groups have been to Warminster, including the South Hertfordshire group,

41

00:06:22,000 --> 00:06:28,960

and they have been astounded by an invisible walker who came right between them on top of the

42

00:06:28,960 --> 00:06:37,840

hill and separated their particular group. You see, perhaps what appear outlandish,

43

00:06:37,840 --> 00:06:44,560

ridiculous things said, apparently on the spur of the moment, but I'm very careful what I say,

44

00:06:46,240 --> 00:06:53,280

laughed at, derided, the skeptics, the cynics, dig in their nasty, vicious fangs.

45

00:06:55,600 --> 00:07:04,480

Then, perhaps months later, poor old shuttle was going, vindicated by experience of others.

46

00:07:04,720 --> 00:07:13,280

Now, the landing has been dealt with, but I would like to tell you of a recent event,

47

00:07:14,240 --> 00:07:22,080

January the 18th of this year, which was a Sunday. The National Vice Chairman of Contact UK,

48

00:07:22,080 --> 00:07:31,200

whom I like very much and I like their group, came, his name is John Roseveer, a young scientist,

49

00:07:32,000 --> 00:07:37,840

an avant-garde type of scientist with a very open mind receptive to new truths.

50

00:07:40,320 --> 00:07:50,000

And he came to Warminster, came to the hill, and at 9.30 exactly, this is what we were seeing.

51

00:07:50,400 --> 00:08:01,040

A golden craft to the west, southwest that came in, apparently from the Clay Hill area.

52

00:08:02,560 --> 00:08:10,080

And if any of you know Cradle, if you look back at Warminster, you'll see the dip triangle of sorts

53

00:08:10,080 --> 00:08:17,680

between cop heat on the left, which is a high promontory, and the golf club, Westwoods golf club

54

00:08:17,680 --> 00:08:28,640

on the right. This craft came in, was quite close, was no more we assessed afterwards in retrospect

55

00:08:28,640 --> 00:08:36,800

than a mile distant from where we stood. And it was no higher in altitude than the one that was

56

00:08:36,800 --> 00:08:43,520

featured there for three minutes, stationary at the landing time last August. And this particular

57

00:08:43,520 --> 00:08:56,080

one was a pure golden color. Ellipsoid, no irregularity at all once it had remained,

58

00:08:56,080 --> 00:09:02,960

had come to a stationary position, there was no halo or force field around it. From the top of it,

59

00:09:02,960 --> 00:09:13,920

unwavering was a brilliant silvery plume. A fairly stiff south easterly wind,

60

00:09:15,280 --> 00:09:25,840

and the plume didn't waver an iota. And it straddled the top of the craft, inverted commas craft.

61

00:09:26,560 --> 00:09:35,760

We watched in amazement because we had been talking about the peculiarity of the cube root

62

00:09:35,760 --> 00:09:44,800

three, the recurrence of the figure nine in investigation, the peculiarities that computer

63

00:09:44,800 --> 00:09:50,480

readings have had recently, as some of you will know, and this is a scientific fact of the great

64

00:09:50,480 --> 00:09:58,960

change from day to day. And we were talking about the long ago in that context, not a religious

65

00:09:59,600 --> 00:10:05,200

duo, this was just an ordinary, fairly scientific conversation between two friends.

66

00:10:07,600 --> 00:10:14,400

But perhaps what we were thinking stirred reaction from this object,

67

00:10:14,880 --> 00:10:25,040

and the thinking intelligence aboard the object. Here perhaps is the most staggering part of this

68

00:10:25,040 --> 00:10:36,320

little event. When the craft began to glow very fiercely, and then blacked out, and it was beginning

69

00:10:37,200 --> 00:10:47,520

to do three on off movements of light radiation, we could discern at the bottom of the craft a huge

70

00:10:47,520 --> 00:11:00,400

pyramid. Not literally, but pyramid shaped from the bottom of the craft. This was very dark,

71

00:11:00,400 --> 00:11:07,680

very opaque, silhouetted against the brilliant light. And it was at the base of this craft, this

72

00:11:07,680 --> 00:11:21,840

golden craft. Then we could tell that the pyramid was dropping to earth. Both others commented that

73

00:11:22,480 --> 00:11:28,080

what a terrific glow we were feeling at that particular time. And I think that this is a

74

00:11:28,080 --> 00:11:41,680

common factor from almost all UFOs that we know. And we did a survey, quite a big survey afterwards.

75

00:11:41,680 --> 00:11:53,200

Now John Rosefear went out to Tynum. He found the marks on the ground of an apparent landing at

76

00:11:53,200 --> 00:12:01,440

about the same period that we in Warminster had ours in August 69. And he thought, well the experts

77

00:12:01,440 --> 00:12:11,360

have had their say. This is a hoax. But he found Mr and Mrs X. He had the common sense and the

78

00:12:11,360 --> 00:12:18,720

scientific know how to take down measuring instruments. And he recorded a great radiation

79

00:12:18,720 --> 00:12:30,240

difference around those holes. This surely is the first. It's the primary essential to all research.

80

00:12:30,240 --> 00:12:36,880

Where anything is scientifically measurable, measurable for heaven's sake, do it. I've never

81

00:12:36,880 --> 00:12:43,280

disagreed with that. Some people have said after I've talked, shuttlewood is interesting, but he

82

00:12:43,280 --> 00:12:52,240

doesn't believe in science. I do. And that's the whole essential point. But not restricted and

83

00:12:52,240 --> 00:12:58,880

restrictive science. Science that has taken the blinkers off, taken the cotton wool that's absorbing

84

00:12:58,880 --> 00:13:05,600

the mind and is willing to let light stream in. Thank heaven there are such scientists. And John

85

00:13:05,600 --> 00:13:15,920

Rosefear is one. But perhaps the point is, what does it all mean? And are we perhaps prone to think

86

00:13:16,480 --> 00:13:26,160

as ultra realists, perhaps in the wrong sense, that everything which is strange, which is out of

87

00:13:26,160 --> 00:13:34,640

context with what we know scientifically, perhaps we think if it doesn't conform to the physique,

88

00:13:34,640 --> 00:13:41,840

shape, pattern, form, light movement, radiation, wavelength that we can measure, it doesn't exist.

89

00:13:41,840 --> 00:13:48,880

This was one of the contensions to a large extent as the laborious and deadly dull Condon report.

90

00:13:48,880 --> 00:13:54,960

But of course, the invalidity of that report lay in the fact that there was a body of science,

91

00:13:55,040 --> 00:14:04,080

not one of whom had seen anything inexplicable. So important to see.

92

00:14:07,200 --> 00:14:15,040

Now, people are in time to fall into two groups we find even on our hill where we had an average

93

00:14:15,040 --> 00:14:20,160

of about 60 people from all parts of the country and the world throughout the summer months.

94

00:14:20,560 --> 00:14:26,880

We find that there are those who are so physically minded that even after seeing something at fairly

95

00:14:26,880 --> 00:14:35,840

close range on occasion, they are so prone to say it must be like us. It's from another planet,

96

00:14:35,840 --> 00:14:42,400

but it has physique, it has substance, it has all the physical properties that we on earth know.

97

00:14:43,200 --> 00:14:50,560

Nothing could be further than the truth, from the truth. We've taken well over 3,000 photographs

98

00:14:50,560 --> 00:14:56,880

in a period now of over four years on that hill, not 3,000 craft, don't misunderstand me.

99

00:14:57,760 --> 00:15:03,200

And we've only had about 109 fairly satisfactory developments.

100

00:15:03,280 --> 00:15:12,640

Indications therefore are, if one views it rationally and that's the safe course,

101

00:15:14,000 --> 00:15:20,640

what you're capturing on film, what the camera eye, the sensitive eye of the camera is recording,

102

00:15:21,520 --> 00:15:30,880

is probably substantial. Perhaps not metallic, but substantial and has physical properties.

103

00:15:33,760 --> 00:15:38,960

As we know, apparent solids to comprise in our reckoning.

104

00:15:41,440 --> 00:15:49,360

So therefore it is fairly reasonable to deduce that those few could come from other planets.

105

00:15:51,600 --> 00:15:58,960

But here's the horrifying truth on perhaps depending on how one views it, the degree of horror

106

00:15:58,960 --> 00:16:08,560

or enlightenment, the majority are not captureable by even the finest cameras. And we've even had

107

00:16:08,560 --> 00:16:14,560

the Paffe News Chat, Bill Nixon up there unable to take a shot of certain of these. And those,

108

00:16:14,560 --> 00:16:26,320

often enough, have been so close to us. And therefore again, with the process of logic, reasoning,

109

00:16:26,320 --> 00:16:36,240

as we know it, and scientific analysis, one would say, this needn't necessarily be extraterrestrial

110

00:16:37,120 --> 00:16:44,880

in the hard mechanical technological sense of the term. This could be something

111

00:16:45,920 --> 00:16:54,080

intradimensional, capable of changing shape and form and how many thousands of witnesses

112

00:16:54,080 --> 00:17:01,120

have sworn that they've seen an ellipsoid turn into a triangle. A chap at warrants the other

113

00:17:01,120 --> 00:17:10,720

week saw a triangle with a light at each corner in the sky. Now anything which is capable of doing

114

00:17:10,720 --> 00:17:20,240

this, which we suspected was extraterrestrial, which some people would imagine could even be

115

00:17:20,560 --> 00:17:33,680

of a type of phenomena, which is really not of this world in a way. It doesn't fit anything scientific

116

00:17:33,680 --> 00:17:40,640

we see. But it is as though atoms and molecules are split up, dispersed, form a different pattern,

117

00:17:40,640 --> 00:17:46,480

and then are drawn coherent as a swarm of bees into a pattern that we recognize again.

118

00:17:47,280 --> 00:17:54,960

And this could, we put this forward unequivocally, we put this forward firmly,

119

00:17:56,160 --> 00:18:08,800

meekly, no ego in this at all. We feel that this is a warmens that is a vortex of abnormal magnetic

120

00:18:08,800 --> 00:18:16,480

properties and that there exists there a point on this earth where of course the concentration

121

00:18:17,120 --> 00:18:23,600

of magnetic field force lines is abnormal. This is scientifically provable and has been proved.

122

00:18:25,040 --> 00:18:31,280

We would contain, particularly with what Patrick Moore and the camera team saw,

123

00:18:31,280 --> 00:18:43,040

that this is a point where what our science calls a time and a space warp exists.

124

00:18:45,440 --> 00:18:51,040

Allowing the forming of a gateway or a window, if you like,

125

00:18:52,000 --> 00:19:01,200

that lets in another dimension which can then come into ours, converge and mix with it.

126

00:19:04,000 --> 00:19:07,200

But not necessarily extraterrestrial.

127

00:19:10,640 --> 00:19:18,240

You know, again, a thing to laugh at obviously. We stuck our poor little necks out.

128

00:19:18,480 --> 00:19:27,600

The opposites, they're turning around, the things happening back to front on the hill

129

00:19:29,120 --> 00:19:35,680

where a lads tape recorder was dismantled, all the parts taken apart and laid in reverse order

130

00:19:35,680 --> 00:19:40,640

within the space of a minute on one hill at Warminster in a locked car.

131

00:19:40,640 --> 00:19:50,480

Film removed from canisters turned the wrong way round and no one knows what the agency was.

132

00:19:52,160 --> 00:19:53,520

Or perhaps why?

133

00:19:56,160 --> 00:20:01,760

An old lady with her knitting needles knitting some socks and things for grandchildren.

134

00:20:04,240 --> 00:20:09,680

The knitting needles had disappeared. We turned her little mini upside down because the poor soul

135

00:20:09,680 --> 00:20:15,600

was concerned about this. She's getting operated. Love and devotion went into the knitting.

136

00:20:17,520 --> 00:20:24,960

We eventually found the knitting needles two hours later exactly where she had put them

137

00:20:24,960 --> 00:20:28,800

in the glove compartment. Turned the wrong way round.

138

00:20:29,360 --> 00:20:37,200

Now what can we deduce with our scientific measuring sticks?

139

00:20:38,880 --> 00:20:44,240

What is there in those bizarre almost macabre happenings?

140

00:20:45,280 --> 00:20:49,920

Mind bedeviling happenings. Thank God we've got strong minds perhaps.

141

00:20:50,480 --> 00:20:56,080

What on earth can we measure in that sort of thing?

142

00:20:56,880 --> 00:21:03,360

Assuming that those responsible are from these quote craft unquote.

143

00:21:05,120 --> 00:21:10,080

To begin with we thought that here were astral entities that were quite mischievous,

144

00:21:10,080 --> 00:21:21,520

poltergeist ghosts, urging on the supernatural. Negative forces, disembodied entities that

145

00:21:21,520 --> 00:21:30,480

were there to not only to add to the ridicule of the wonderful subject of ufology, but also

146

00:21:30,480 --> 00:21:37,200

to denigrate it and those who watch so that newcomers would be driven by sheer panic, hysteria

147

00:21:37,200 --> 00:21:41,840

and fright from the hill. We were wrong. We were wrong.

148

00:21:45,840 --> 00:21:55,920

Think of what was mutely being conveyed. Most probably not just possibly and we've meditated

149

00:21:55,920 --> 00:22:06,080

long and objectively on this. The opposite gets you to truth.

150

00:22:08,320 --> 00:22:12,320

The opposites to what you think are truth.

151

00:22:15,840 --> 00:22:22,240

Diametrically opposed no matter how foolish they may seem are scientifically true.

152

00:22:22,800 --> 00:22:30,640

The pointers were there. So what do we do? We start to disseminate the knowledge accumulated

153

00:22:30,640 --> 00:22:36,080

which we thought was negative and find that there's a rich wonderful strata of the positive

154

00:22:36,080 --> 00:22:44,880

run through. The opposite or the invisible things in the whole of the universe are the strongest.

155

00:22:45,040 --> 00:22:53,440

Stupid to say it. Stupid. Here's my physique. This is me.

156

00:22:55,680 --> 00:23:01,920

With these hands, these little appendages here, I can build you this hole. I can build you a plane,

157

00:23:02,640 --> 00:23:06,560

transport your house, bricks, mortar, highways, cars.

158

00:23:07,440 --> 00:23:21,680

But those are directed. Those are intelligently controlled by the invisible force in man.

159

00:23:23,520 --> 00:23:31,920

We talk about mind over matter. It goes deeper. Mind creates matter so that everything which we

160

00:23:31,920 --> 00:23:41,280

know as material and man made in a manual way comes from that creative force which is not measurable.

161

00:23:43,280 --> 00:23:48,880

You can measure the brain. You can measure the electrical current that even comes from fingertips.

162

00:23:50,160 --> 00:23:56,960

You can measure man as the human voltage cell is here. If you sleep with your head facing north,

163

00:23:56,960 --> 00:24:02,240

you get a good night's sleep because you're in line with the polar polarity layer.

164

00:24:03,200 --> 00:24:11,440

Man is basically an electrical unit. And we know this of course. But of course, it goes deeper

165

00:24:11,440 --> 00:24:18,400

again than that. You can measure the cellular brain matter of the brain. You can measure every organ

166

00:24:18,480 --> 00:24:27,760

in the human body, but the part that one cannot measure is so important. It's a man's creative

167

00:24:27,760 --> 00:24:33,280

ability and what brings him to bring that out of the sun.

168

00:24:36,480 --> 00:24:45,600

We breathe. If we didn't, we would die. No one sees air. You don't see it. It's one of the

169

00:24:45,600 --> 00:24:50,000

invisible forces, but one of the strongest forces in the universe.

170

00:24:53,440 --> 00:24:59,760

Probably I should be according to some cynics who call us all sorts of things from homosexuals to cranks.

171

00:25:02,560 --> 00:25:05,040

And they invited me to go. This is the annoying part.

172

00:25:07,040 --> 00:25:10,640

Perhaps of course, we should be in a padded cell.

173

00:25:10,720 --> 00:25:15,440

12 inches thick steel around us.

174

00:25:18,560 --> 00:25:21,520

Locked away with a few desert island discs, perhaps.

175

00:25:23,440 --> 00:25:24,560

On a radio set.

176

00:25:27,280 --> 00:25:38,160

Now the radio set. If you calibrate that to the right wavelength and frequency, even in a padded cell,

177

00:25:39,040 --> 00:25:41,040

you're never alone.

178

00:25:44,880 --> 00:25:52,240

You can get music at the press of a button from thousands of miles away. Tokyo, Australia,

179

00:25:52,240 --> 00:25:59,120

say what you will, you will get it coming to you over all that intervening distance because you

180

00:25:59,120 --> 00:26:05,760

have calibrated on one of the great cosmic energies that we know loosely as electricity,

181

00:26:05,760 --> 00:26:13,440

but which is the fundamental life stream of the universe comes through to you. And you've been

182

00:26:13,440 --> 00:26:28,320

not too late. An invisible force so strong, atmosphere so strong, the sun's rays so strong.

183

00:26:28,800 --> 00:26:30,640

You don't see.

184

00:26:32,320 --> 00:26:36,320

They aren't something that you can grab hold of and say, there you are, mate.

185

00:26:36,320 --> 00:26:42,400

Nuts and bolts are nothing as Bufora says. Put it there and analyze it. No, it's invisible.

186

00:26:43,360 --> 00:26:47,680

And are not being disrespectful to the whole of Bufora. Many friends.

187

00:26:49,760 --> 00:26:55,840

Only to the closed-minded. I'm deliberately tonight because this is the last speech I make.

188

00:26:58,320 --> 00:27:09,120

Sun's rays, the sun, the central stabilizing wonder of our solar system, of any solar system.

189

00:27:10,400 --> 00:27:21,920

And it pours out those life giving, light giving, heat giving, beautiful rays in a love force.

190

00:27:22,880 --> 00:27:35,760

Invisible so powerful to everything that's animate in this world or any other.

191

00:27:40,560 --> 00:27:47,600

Wind can be corrosive, can be erosive, can be destructive, can be very constructive.

192

00:27:48,160 --> 00:27:50,400

An invisible force.

193

00:27:52,720 --> 00:27:57,200

Strong. More powerful than anything we know that's physical and material.

194

00:28:01,440 --> 00:28:04,560

The power that generates from our earth.

195

00:28:06,480 --> 00:28:15,200

Performs magnetic and gravitational field. Such great power there. If we could harness onto it.

196

00:28:18,240 --> 00:28:27,600

It may be that man has conquered a range of electrical force fields.

197

00:28:27,600 --> 00:28:34,400

Which he has obviously turned in the main. And there's no unwitting and electric main pun there.

198

00:28:34,400 --> 00:28:36,400

Too useful purposes.

199

00:28:40,400 --> 00:28:45,600

But is it so ridiculous? Should it invite such cheap cynicism?

200

00:28:48,000 --> 00:28:55,600

If a deep thinker, after being on a hill for four years, and definitely seeing something.

201

00:28:57,280 --> 00:29:04,960

Is it so ridiculous to suppose that there may be millions of hidden cosmic energies driving

202

00:29:04,960 --> 00:29:14,080

throughout this universe? That if man would use sense of it. And the great intelligence of all

203

00:29:14,080 --> 00:29:21,520

would appreciate that he would do so. Rather than as all things indicate he will abuse those energies.

204

00:29:23,680 --> 00:29:31,600

It could quite easily happen that man would know far far more than he does today.

205

00:29:33,360 --> 00:29:36,960

Could be that we're not permitted. We are not yet ready.

206

00:29:36,960 --> 00:29:47,200

And talking about these invisible things. Brian here has told you I'm writing a third book.

207

00:29:47,200 --> 00:29:52,480

It's my last one. And then I dropped right from the scene for obvious reasons if you think.

208

00:29:55,680 --> 00:30:03,440

Really kill? Big shoulders take it. Little children at school of mine called mad because

209

00:30:03,440 --> 00:30:13,360

their father is mad. I can't take that. I can't take that. But let's look at something a little different.

210

00:30:17,440 --> 00:30:26,240

If this is part of the message that these quote craft unquote are trying to give us for some

211

00:30:26,240 --> 00:30:30,800

deep seated and profound reason that perhaps we can only guess at.

212

00:30:34,240 --> 00:30:40,560

Then it's obvious that man's attitude perhaps in general must change.

213

00:30:43,360 --> 00:30:54,320

Well it's obvious. One doesn't have to repeat about the dangers of deadly pollution. Indiscriminate

214

00:30:54,320 --> 00:31:02,560

drug taking. Pollution of water and their nuclear stupid stupid experimentation.

215

00:31:04,240 --> 00:31:08,480

The stockpiling of enough nuclear missiles in the states allowed to blow our kingdom to

216

00:31:09,200 --> 00:31:14,800

blow our planet to kingdom come at least 10 times over enough.

217

00:31:14,800 --> 00:31:20,880

Bacteriological germs and chemical warfare supplies of port and nantsuit and cornwall

218

00:31:22,480 --> 00:31:25,760

to kill our world 30 times over in a few hours.

219

00:31:28,000 --> 00:31:37,600

You don't have to be an idiot. Do you surely to appreciate that there must be a deep deep

220

00:31:37,680 --> 00:31:47,680

parent of great concern among the more advanced kinder more loving forces of this universe.

221

00:31:48,720 --> 00:31:52,880

Those are the ones who are here in our history.

222

00:31:55,680 --> 00:31:58,160

The concern that they must feel.

223

00:31:58,240 --> 00:32:06,320

The finger is practically on the trigger of oblivion.

224

00:32:10,320 --> 00:32:15,520

It's no good saying well we're all scared to death. We all know what one atom bomb could do

225

00:32:15,520 --> 00:32:22,800

if it dropped on London. That's not the point. It's the mania behind that drive that counts.

226

00:32:23,360 --> 00:32:30,400

A terrific obsession whether it's between east and west south and north makes a difference.

227

00:32:31,680 --> 00:32:38,320

The billions and billions of currency of this world which are expended so

228

00:32:39,120 --> 00:32:47,040

divinely short sightedly not only on nuclear missiles but on anti ballistic missiles and what

229

00:32:47,040 --> 00:32:54,800

have you think think of what they show you in this connection.

230

00:32:57,600 --> 00:33:04,240

If one of the nations of this world today was so technologically advanced that it had developed

231

00:33:04,240 --> 00:33:13,360

a nuclear warhead of a chemical compound as a container that could not be detected and would

232

00:33:13,360 --> 00:33:20,160

not absorb light rays so therefore would be undetected by radar. Think think of that.

233

00:33:22,480 --> 00:33:28,880

And those craft are that sort but they don't carry those nuclear warheads.

234

00:33:30,080 --> 00:33:40,480

They carry something far far more positive. An awakening spirit in man. The BOAC pilot do you

235

00:33:40,480 --> 00:33:44,480

remember on a program on television which is fairly sensible of power from one or two things

236

00:33:44,480 --> 00:33:52,240

about pancakes and a deputy dog sheriff somewhere in the states. You can remember I'm sure

237

00:33:52,240 --> 00:33:56,320

a testimony given by that very reliable man. Thousands of flying hours.

238

00:33:59,120 --> 00:34:06,880

And when the commentator said to him what was your reaction when these six little

239

00:34:07,840 --> 00:34:16,000

gun metal grey balls suddenly left. What was your reaction. And he said.

240

00:34:16,720 --> 00:34:26,240

And I'm sure that many of you who know will echo these. Because they are showing such kindness

241

00:34:26,240 --> 00:34:28,160

in allowing us to see them.

242

00:34:28,640 --> 00:34:35,600

He said I felt as though I had lost my best friend.

243

00:34:38,480 --> 00:34:45,760

This is general. And when you read some of the sensational rubbish from the states which I

244

00:34:45,760 --> 00:34:51,280

as a journalist a professionally trained man and this is where I bring in the eye because

245

00:34:51,280 --> 00:34:56,640

of the job that I do. I've checked and checked and checked in South America.

246

00:34:58,000 --> 00:35:07,520

And 95 percent of all stories which come under the hostile. Nomenclature if you like rubbish.

247

00:35:08,640 --> 00:35:15,680

If there's any antagonism at all in any context of that nature it has stemmed and originated

248

00:35:15,680 --> 00:35:23,920

from the ground. And a solitary little lesson has been taught those who automatically fire

249

00:35:23,920 --> 00:35:27,440

at everything that moves as the military does at war.

250

00:35:29,920 --> 00:35:34,480

See anything move. Shoot it. That was my advice when I was in the guards during the war.

251

00:35:34,640 --> 00:35:43,920

And perhaps man unfortunately has devolved into that.

252

00:35:45,280 --> 00:35:55,920

Quagmire of mistrust hostility suspicion the primitive urge to kill wound maim anything

253

00:35:55,920 --> 00:36:02,400

that one doesn't understand and automatically reckons to be an enemy a potential enemy.

254

00:36:05,200 --> 00:36:13,280

Now invisible forces. I think we think that that was the salient message in what we saw.

255

00:36:15,440 --> 00:36:20,560

What about this peculiar manifestation on January the 18th.

256

00:36:22,000 --> 00:36:29,280

And again you see August 27th two and seven equals nine cube root three.

257

00:36:29,520 --> 00:36:35,280

The Holy Trinity or the three great forces in the universe.

258

00:36:36,080 --> 00:36:40,480

Doesn't matter how one looks at that. But think of this.

259

00:36:40,480 --> 00:36:47,680

Long before the days of Christ and John and I were discussing this megalithic crosses

260

00:36:48,080 --> 00:36:52,960

antedated Christ by many thousands of years.

261

00:36:55,120 --> 00:37:01,760

The Chinese philosophy which predicates in and young is quite important today.

262

00:37:02,320 --> 00:37:05,280

The Japanese I think predicate Nick and me.

263

00:37:07,040 --> 00:37:11,360

And you may well ask well here's a lot of double dots from that chat from warm and so but

264

00:37:11,440 --> 00:37:12,080

what does he mean.

265

00:37:14,960 --> 00:37:25,360

In and yet where the Chinese predicate the opposite poles in every part of existence.

266

00:37:27,040 --> 00:37:34,880

North South the ultimate positive negative in electrical fields the opposite.

267

00:37:35,600 --> 00:37:42,400

Male female the opposite heat called the opposite.

268

00:37:45,920 --> 00:37:54,480

And within those opposite somewhere along the line between the opposites of all those things

269

00:37:54,480 --> 00:37:57,520

mentioned there three things happen.

270

00:37:58,400 --> 00:38:02,480

There's a meeting of forces.

271

00:38:05,920 --> 00:38:15,520

Maybe that it's like repelling like of course and unlike attracting its opposite number.

272

00:38:16,560 --> 00:38:17,920

Principles of polarity.

273

00:38:19,200 --> 00:38:20,720

Heat and cold.

274

00:38:21,520 --> 00:38:24,560

Male female North South.

275

00:38:24,560 --> 00:38:34,240

In the center of all these ranges between the absolutes of black and white in existence if

276

00:38:34,240 --> 00:38:34,720

you like.

277

00:38:35,440 --> 00:38:39,760

Are the graduated grays where truth occurs as we know.

278

00:38:42,560 --> 00:38:49,280

And it comes about through the meeting or the action of these forces at one point.

279

00:38:49,280 --> 00:39:01,920

In a crude analogical sense male female find their suited the attraction is there they marry

280

00:39:01,920 --> 00:39:06,080

their offspring the attraction another repel.

281

00:39:09,440 --> 00:39:15,040

So that you get three actions you get the action of meeting of these forces in between.

282

00:39:15,920 --> 00:39:23,040

You get the interaction that set up by the conflict or the agreeability of these forces.

283

00:39:24,480 --> 00:39:30,400

Then you get the reaction the end result the consequence the logical development.

284

00:39:32,560 --> 00:39:40,880

And it could be you know that so much in life which is mysterious to us perhaps we because we

285

00:39:41,840 --> 00:39:45,440

are such realists in the wrong sense.

286

00:39:47,760 --> 00:39:52,880

That there's universal truth staring us in the face.

287

00:39:54,000 --> 00:40:00,320

Now if you will I normally speak off the cuff as you know I hate using the word I but I would

288

00:40:00,320 --> 00:40:02,960

like to read a portion of my last book.

289

00:40:05,120 --> 00:40:07,440

If you'll bear with me do you mind if I sit down.

290

00:40:08,240 --> 00:40:10,320

If you can't hear.

291

00:40:22,720 --> 00:40:23,120

Time.

292

00:40:27,440 --> 00:40:32,480

If instead let us forget present assumptions of our earth with a molten interior.

293

00:40:33,120 --> 00:40:39,040

Because local and natural nuclear reactors may be the cause of volcanoes.

294

00:40:41,040 --> 00:40:48,720

Regard it as a golf ball with a knobby skin and an elastic interior composed of magnetism

295

00:40:48,720 --> 00:40:52,080

instead of rubber with a helium core.

296

00:40:53,840 --> 00:41:01,120

This is renewed daily by the diurnal rotation of earth rolling a fresh spiral of magnetism

297

00:41:01,840 --> 00:41:10,160

downwards through the core. The 90 degrees thrust of magnetism supplies what we know as gravity.

298

00:41:11,920 --> 00:41:19,520

Both operate under square law and this can account for magnetic variations obviously

299

00:41:20,320 --> 00:41:24,720

because the earth is a diner dynamo motor and a paradox.

300

00:41:25,360 --> 00:41:31,600

The magnetic component of the earth is interdependent yet distinct from the visible globe and lines of

301

00:41:31,600 --> 00:41:37,840

force can break and heal without harm to the inertial effect of the globe as a flywheel.

302

00:41:40,800 --> 00:41:50,720

There seems good evidence to suppose that there is a very strong connection between magnetism

303

00:41:51,040 --> 00:42:02,640

time which we define as indefinite duration entropy diurnal rotation and time all move one way and

304

00:42:02,640 --> 00:42:11,760

are irreversible magnetism has a cyclic reversal and under stress a random backlash when a break

305

00:42:11,760 --> 00:42:19,200

occurs. We know that electricity is magnetism at a speed of 186,000 miles per second.

306

00:42:19,200 --> 00:42:25,360

Magnetism however is electricity at a variable those be.

307

00:42:28,640 --> 00:42:36,320

If we once suspect that time is continuous and spiral like the elastic interior of our planet

308

00:42:39,360 --> 00:42:46,560

we could further fairly sensibly supposed suppose that the elastic magnetic tape carries

309

00:42:46,560 --> 00:42:57,040

a memory bank and a predictor record providing mechanism for pre cognition dreams and prophecies

310

00:42:57,040 --> 00:43:01,680

by the human receiver plugging in to the appropriate tape.

311

00:43:03,920 --> 00:43:12,880

Predictor may function like computer and thus register present trends. Dreams from long past

312

00:43:12,880 --> 00:43:21,360

time may simply be emanations from buried tape and not carried in the subconscious of the individual

313

00:43:21,360 --> 00:43:33,360

as is often supposed by spiritualist mediums etc. The sun is important I won't digress here on what

314

00:43:33,360 --> 00:43:46,640

the sun is pushing out and diffusing constantly. But you know excuse me I want to cut out the dull

315

00:43:46,640 --> 00:43:56,480

parts and leave little things perhaps for scientists and others to mull over and see what they get.

316

00:43:57,440 --> 00:44:00,160

Their reactions and their findings could be so important.

317

00:44:07,440 --> 00:44:14,400

Man has always believed in an afterlife from the ancestral propitiation of animism

318

00:44:14,400 --> 00:44:20,160

to the teachings of the Christian church and man is assumed to possess a spirit

319

00:44:20,240 --> 00:44:27,360

defined by spiritualists as an astral body yet there's no need to confuse the mystery of life by

320

00:44:27,360 --> 00:44:33,440

invoking the stars. Using Occam's razor for example we can assume that the perishable

321

00:44:33,440 --> 00:44:42,000

electromechanical chemical body of animate life is essentially a robot operated and activated

322

00:44:42,000 --> 00:44:48,320

by a magnetic plasma which we know as the spirit and this spirit is everywhere.

323

00:44:48,320 --> 00:44:57,680

It abotains to all bodies in the universe. Magnetism is carried on particles of a slightly

324

00:44:57,680 --> 00:45:04,720

unstable gas and we would say through certain things that we have discovered quietly that this

325

00:45:04,720 --> 00:45:14,560

could be helium five or helium seven. Spirit of wine is the gas of alcohol the spirit of man is

326

00:45:14,560 --> 00:45:20,960

equally a gas by elimination an isotope of helium is strongly indicated.

327

00:45:25,040 --> 00:45:29,360

Let's go on to the essential part perhaps

328

00:45:32,080 --> 00:45:37,360

the time stream that's concurrent with space as we know it.

329

00:45:37,600 --> 00:45:49,760

A gaseous body for example the spirit of man if a spirit does exist there are good scientific

330

00:45:49,760 --> 00:45:58,080

reasons for supposing that this could be so can pass through walls and doors and perhaps these

331

00:45:58,080 --> 00:46:05,440

atoms which also are molecules of course are of an isotope not yet isolated nor ever can be

332

00:46:05,520 --> 00:46:13,680

because no man is an island as some of us have postulated before. A gaseous body still possessing

333

00:46:13,680 --> 00:46:22,640

the intelligence of the robot the robot and free from visible viability can equally live on in an

334

00:46:22,640 --> 00:46:30,000

environment of less sophisticated atoms and derive its nourishment from a weaker magnetic field.

335

00:46:30,720 --> 00:46:37,760

There's one point if that can be proved in the near future that I beg of you to think of.

336

00:46:39,120 --> 00:46:46,960

For heaven's sake don't create that artificial barrier between matters which are truly of spiritual

337

00:46:46,960 --> 00:46:53,360

momentum and those which are of scientific importance there's no barrier between the two.

338

00:46:53,680 --> 00:47:01,840

Science is spirit and spirit is science. If we could only eliminate that false artificial

339

00:47:01,840 --> 00:47:11,120

distinction every bufora contact UK cosmos bless their hearts every group would function perfectly

340

00:47:11,120 --> 00:47:20,880

without any nasty backbiting cynicism which erupts. Don't drive your fellow beings away.

341

00:47:21,600 --> 00:47:31,600

Come together so important. People say why don't shuttle join us. We don't want to join any group

342

00:47:31,600 --> 00:47:37,440

because we would feel it a bound and duty if we belong to any group for that group to substantiate

343

00:47:37,440 --> 00:47:44,960

our humble claims and we can't expect that and we shouldn't expect to try and pressurize anyone

344

00:47:45,200 --> 00:47:55,120

anyone into a belief that we hold. This is so true the final answer to everything in ufology

345

00:47:55,120 --> 00:48:03,520

or in any other of the many psychical aspects of life which could be so important. No one person

346

00:48:03,520 --> 00:48:13,360

no one group no one body should deliberately pressurize their opposite numbers into a belief.

347

00:48:14,320 --> 00:48:20,320

So important the individual assessment is the only criterion that you must have.

348

00:48:21,280 --> 00:48:27,680

So it's so important in near future years when you see for yourself when you have certain

349

00:48:28,320 --> 00:48:34,880

unlooked for perhaps very complex situations arising because of what you know is true.

350

00:48:34,880 --> 00:48:41,040

Don't worry about the others. Their turn has still to come. So important.

351

00:48:44,320 --> 00:48:49,600

The book goes on about the first synthetic alpha which came from bombs which are too much to handle

352

00:48:49,600 --> 00:49:01,440

at once. Early reports of course of ufos that greatly anti-daked the 1947 reports.

353

00:49:03,920 --> 00:49:08,400

Certain things which are touched upon lightly in this book for obvious reasons because

354

00:49:09,360 --> 00:49:15,120

so many people unfortunately don't read the right books and this is not a plug for my books.

355

00:49:15,120 --> 00:49:22,240

Don't think that but by the right books the Quran the Bible so much of value is there.

356

00:49:23,120 --> 00:49:27,360

These are things we find out and we aren't religious to begin with at all. Probably aren't

357

00:49:27,360 --> 00:49:32,240

today not religious but spiritual and scientific. Yes.

358

00:49:36,880 --> 00:49:44,160

One of the most disturbing effect to and on humans from this plasma of the UFO is sound.

359

00:49:45,200 --> 00:49:48,880

Yet it's reassuring to note that the energy emitted is very small.

360

00:49:49,680 --> 00:49:55,440

As an example the total energy produced by a Wembley stadium football crowd shouting goal

361

00:49:55,440 --> 00:50:02,560

would hardly boil a cup of water. Scientific fact. The least disturbing at any one moment of

362

00:50:02,560 --> 00:50:09,520

time now on this time spiral is the extremely brief repetition of quantum pulses.

363

00:50:10,960 --> 00:50:16,880

This affects the appropriate organ for the reception of what people call extra sensory perception.

364

00:50:17,600 --> 00:50:25,040

The pinnial gland the pea sized gland at the base of the skull the opening of the third eye

365

00:50:25,600 --> 00:50:31,520

which at the moment in many people is passive but is being activated by these craft.

366

00:50:33,280 --> 00:50:40,480

So important these forces are moving in for a purpose and for heaven's sake don't go away and

367

00:50:40,480 --> 00:50:46,240

say well shuttle would so despondent he thinks the world's going to end. No not in a physical

368

00:50:46,240 --> 00:50:54,640

calamitous sense at all but man must change. It's the change that's going to be wrought in man or

369

00:50:54,640 --> 00:51:04,160

else. Explanation point. Without the latest medical dictionary for example can present no explanation

370

00:51:04,160 --> 00:51:10,560

of the function of the pinnial gland but it can be firmly suggested even on our experiences at

371

00:51:10,560 --> 00:51:16,640

Warminster that it is an undeveloped detail awaiting mutation and exercise in use towards

372

00:51:16,640 --> 00:51:24,720

reliable communication by telepathy. All of you must know when you say something to another

373

00:51:24,720 --> 00:51:31,680

at one time perhaps in an unguarded moment perhaps in a flash of enthusiasm which isn't justified

374

00:51:32,000 --> 00:51:37,360

or even when you write a letter to someone whether it's a dear one or someone that you know as a

375

00:51:37,360 --> 00:51:41,600

casual acquaintance and has a kindred interest in perhaps important things in life.

376

00:51:44,000 --> 00:51:50,640

So often happens doesn't it that you're misconstrued and the very meaning that you kept well away

377

00:51:50,640 --> 00:51:55,280

from seems to come through in that letter to the person whom you're addressing or that you're

378

00:51:55,840 --> 00:52:03,040

speaking to. Such a pity because purity of thought cannot come through the written word

379

00:52:03,760 --> 00:52:11,360

or the spoken word but if there ever comes a time when the channel of mental communication

380

00:52:11,360 --> 00:52:21,280

is opened up 100% and this is on the cards we feel with respect then purity and truth will

381

00:52:21,360 --> 00:52:28,800

be the absolute order of that day because that is pure it's the helium drive.

382

00:52:32,640 --> 00:52:37,280

It could be too that what people look upon as a second coming and here I address perhaps a

383

00:52:37,280 --> 00:52:44,160

limited number of you. I love you as much as I love all the others. A great concern.

384

00:52:44,240 --> 00:52:51,760

Those who think that the second coming of Christ could be due in the next decade

385

00:52:53,760 --> 00:52:58,240

perhaps worried obviously worried as to what form it will take the sword of the spirit

386

00:52:58,880 --> 00:53:02,240

the twinkling of an eye lightning striking from east to west.

387

00:53:04,800 --> 00:53:13,600

It could come in two ways feasible ways scientifically. The opening to the fullest

388

00:53:13,600 --> 00:53:20,720

maximum of that optic if you like the third optic or the pineal which can be activated from

389

00:53:20,720 --> 00:53:29,280

its passive state and can awaken to new life given the right inducement and in the chromosomic

390

00:53:29,280 --> 00:53:35,760

structure of man medical science is still a little bit bewildered over two genes which they term

391

00:53:35,760 --> 00:53:44,800

mute mysterious silent dormant. There have been so many mutations and one can talk about the

392

00:53:44,800 --> 00:53:49,520

lidomide one can talk about schizophrenia one can talk about all sorts of things which obviously

393

00:53:50,080 --> 00:53:57,360

fit into that particular category for a certain extent. The evolution of man mutation necessary

394

00:53:57,440 --> 00:54:06,640

mutation but supposing that a new cosmic force is suddenly unleashed on this planet

395

00:54:07,600 --> 00:54:16,240

and it activates and awakens those dormant genes the rod light containers containing everything

396

00:54:16,240 --> 00:54:22,880

genetic makeup of man hereditary factors everything if that final mutation is made

397

00:54:23,440 --> 00:54:32,240

and those genes are awakened. It could be and I don't say it would be but it could be

398

00:54:33,760 --> 00:54:44,880

that this is in effect the second coming. In a scientific way when Christ assuming he was

399

00:54:44,960 --> 00:54:57,840

crucified assuming he ascended and resurrection took place and he then tells us in another part

400

00:54:57,840 --> 00:55:05,520

of the Bible as I can do so so can you do likewise and there will be greater than I to come one

401

00:55:05,520 --> 00:55:16,080

can't imagine that letter but if one tries humbly to read the wonderful beauty behind and within

402

00:55:16,080 --> 00:55:23,760

and secreted away perhaps in some of the parables of Christ could it be that when he ascended and

403

00:55:23,760 --> 00:55:28,800

I'll read you this short extract here could be important we don't know.

404

00:55:37,120 --> 00:55:42,960

By reason of the DNA spiral a child is a genetic combination of parents and ancestors

405

00:55:42,960 --> 00:55:51,200

every individual unique informed space time time factor important but as we know it irrelevant.

406

00:55:51,600 --> 00:55:58,000

The illusion is probably as mechanical as a teletape recording looped up in correct sequence

407

00:55:58,000 --> 00:56:08,400

by the pineal eye. The most tremendous event in recent history is without doubt AD 1 to AD 30.

408

00:56:08,400 --> 00:56:15,120

Jesus of Nazareth is quoted as having promised to return without stating any specific period

409

00:56:15,200 --> 00:56:26,160

prophetic assumptions that he would be reincarnated in 2000 years are just assumptions with perhaps

410

00:56:26,160 --> 00:56:35,280

an unusual slant following the axiom of astronomy that the brightest stars burn out fastest one

411

00:56:35,280 --> 00:56:42,080

could reasonably submit that the plasma of Jesus faded out soon after ascension.

412

00:56:42,720 --> 00:56:44,160

And what do we really mean by that?

413

00:56:46,240 --> 00:56:54,800

His atoms diffused and the words of the Holy Communion service where two or three are gathered

414

00:56:54,800 --> 00:57:01,360

together in my name are a true statement of something which is beyond mentalism and a

415

00:57:01,360 --> 00:57:11,920

reversal of the magnetic truth the attraction of opposites. Yin Yang it's bound within those

416

00:57:12,000 --> 00:57:23,280

extremities. He was a mutation of mind which has spread gradually and at some periods

417

00:57:23,280 --> 00:57:31,520

disastrously when repulsion of like particles has produced schisms and jihards.

418

00:57:33,600 --> 00:57:37,120

Science the spiritual one.

419

00:57:37,360 --> 00:57:45,920

I won't read any more because I'd rather speak off the cuff. One is more natural than reading

420

00:57:45,920 --> 00:57:52,560

something which has emanated through various agencies which could be very reliant.

421

00:57:55,840 --> 00:58:02,960

But I would leave you if I may if you want to hear any more please say so and I'm quite willing

422

00:58:03,520 --> 00:58:10,160

to read it. But on the basis of the landings the actual landings at Warminster that we have seen

423

00:58:11,840 --> 00:58:17,280

of the figure which has been seen now on four occasions

424

00:58:20,960 --> 00:58:32,320

of the fact that UFOs can absolutely disappear from one place and materialize again in the same

425

00:58:32,320 --> 00:58:43,920

place minutes later. My only quiet advice and heaven knows I've had to take my advice and

426

00:58:43,920 --> 00:58:51,280

give myself some real brow beatings to try and become so logical rather than illogical so

427

00:58:51,280 --> 00:58:59,360

rational when the temptation is to be irrational and lacking all supernatural paraphernalia

428

00:59:00,160 --> 00:59:05,680

because nothing rises above nature in fact it appears to do so to us but there again

429

00:59:06,240 --> 00:59:13,360

evolution brings truth in all aspects providing the seeker is sincere.

430

00:59:15,680 --> 00:59:16,800

So the final thing

431

00:59:17,200 --> 00:59:28,000

is what man thinks today inevitably he becomes tomorrow.

432

00:59:31,680 --> 00:59:40,800

Once he's grasped the essential fact that he is part of all others and is quietly proud of the

433

00:59:40,800 --> 00:59:50,320

fact that they are all part of him. Who is my brother who is my mother who were waiting without

434

00:59:50,320 --> 00:59:58,960

remember all men are my brothers love you one another the same beautiful warmth of love which

435

00:59:58,960 --> 01:00:05,520

comes from the sun right up from the little flower and the organic earth right up to our colossi if

436

01:00:05,520 --> 01:00:16,960

you like of humanity strikes everything which has been created and nothing which has been created

437

01:00:16,960 --> 01:00:29,040

will ever perish it's made for a purpose. The humble oak or the oak the acorn drops from the oak

438

01:00:29,040 --> 01:00:34,880

tree forms a fresh tree or is poked in with the dead leaves of autumn and winter into the soil

439

01:00:35,920 --> 01:00:44,160

pushed downwards over a period of time as we know it of course and it becomes a stronger

440

01:00:45,600 --> 01:00:52,160

it has a more fundamental role in universal structure it becomes carbonized it becomes coal

441

01:00:53,600 --> 01:01:00,480

it becomes crystalline it becomes diamonds the humble things of today are the great things of

442

01:01:00,560 --> 01:01:08,160

tomorrow and the more humble humanity is today in the face of the great power which is there

443

01:01:08,160 --> 01:01:16,880

ready to help but not going to produce nuts and bolts too easy where's your faith that power

444

01:01:17,600 --> 01:01:28,160

is yours for the taking if your attitude is right today and for heaven's sake don't think

445

01:01:28,160 --> 01:01:39,760

my attitude is right. Much weakness to be transmuted yet much digging within to get out the

446

01:01:39,760 --> 01:01:51,120

dross and separate the gold from the negative yet on the same basis if man aspires too high

447

01:01:51,120 --> 01:01:59,040

in a spiritual sense if he runs or tries to run before he can walk in this new dimensional status

448

01:01:59,040 --> 01:02:05,680

which is approaching if you seek nothing but the light and the positive remember this yin and yang

449

01:02:07,600 --> 01:02:16,640

man has his positive components and he has his negative components particularly in this present

450

01:02:16,640 --> 01:02:25,040

physical mold which is a transitory state in the whole evolution of life the more he helps others

451

01:02:25,040 --> 01:02:31,920

he's showing a positive drive the more he kicks others when they're down or kills as I killed during

452

01:02:31,920 --> 01:02:41,440

the war God forgive me because that's what I was taught he panders to the negative his animism is

453

01:02:42,000 --> 01:02:49,840

prevalent it is like the tree of knowledge on this planet today is over-weighted by the mass of

454

01:02:49,840 --> 01:03:00,320

technological advance by man in the great mania for nuclear oblivion and at the great detriment of

455

01:03:00,320 --> 01:03:07,280

those wonderful little twigs which are trying to push the others off the top social cultural moral

456

01:03:07,360 --> 01:03:12,160

loving qualities in man don't let them be swept down too low

457

01:03:14,640 --> 01:03:20,960

and don't aim too high to begin with and say I'm going to be so positive from now on

458

01:03:21,680 --> 01:03:27,840

I don't think a negative thought I reduce if you try suddenly to reduce and I'm sorry I split

459

01:03:27,840 --> 01:03:36,560

an infinity there if you do that you go against the whole principles of polarity in universal

460

01:03:36,560 --> 01:03:45,920

structure you really destroy yourself it's like trying to stop up a volcano with a piece of chewing

461

01:03:45,920 --> 01:03:57,920

gum so let your negative parts play a part but not to hurt not to retard anyone not to destroy

462

01:03:57,920 --> 01:04:06,080

and not for the pure lust sense of negativism but let the negative gradually harmonize with

463

01:04:06,080 --> 01:04:13,200

the positive and the positive under its own momentum not ours carries it to that top strata

464

01:04:14,160 --> 01:04:28,720

which is very near perfection thank you very much
