

1

00:00:00,000 --> 00:00:16,000

My feeling is that it is possible to build and fly something that looks like a saucer

2

00:00:16,000 --> 00:00:27,000

just from a standpoint, but I do not believe that there is such a thing at this time.

3

00:00:27,000 --> 00:00:35,000

I do not know of anything that would be considered in that category.

4

00:00:35,000 --> 00:00:43,000

I'm very familiar with pretty much what's going on in the way of research and development

5

00:00:43,000 --> 00:00:53,000

and I know nothing that would be considered as flying saucers or flying saucer material.

6

00:00:53,000 --> 00:01:00,000

You can make something that looks like a saucer fly if anybody would ever want to do it,

7

00:01:00,000 --> 00:01:09,000

but I do not believe that it's possible with our first knowledge to have them make the shoes

8

00:01:09,000 --> 00:01:13,000

and everything that everybody has been talking about.
