

1

00:00:00,000 --> 00:00:08,400

My thought is simply that the ability of some people to kid themselves is extraordinary.

2

00:00:08,400 --> 00:00:14,040

For instance, the effect the searchlights on clouds has been taken to be flying discs.

3

00:00:14,040 --> 00:00:19,720

Even radar evidence is not conclusive here because rain in the clouds would show up on

4

00:00:19,720 --> 00:00:21,720

a radar screen.

5

00:00:21,720 --> 00:00:28,040

The only saucer-shaped aircraft which we know has flown, and that only a few times, is a

6

00:00:28,040 --> 00:00:31,720

propeller-powered disc developed by an ACA.

7

00:00:31,720 --> 00:00:38,600

As a matter of fact, a cigar-shaped craft with a single revolving wing jet-powered could

8

00:00:38,600 --> 00:00:42,920

be faster and certainly would be much more maneuverable.

9

00:00:42,920 --> 00:00:48,800

In flight, this plane might look like a disc because of the halo created by its rapidly

10

00:00:48,800 --> 00:00:50,400

revolving wing.

11

00:00:50,400 --> 00:00:53,840

Such a craft would have flight characteristics similar to hummingbirds.
