

1

00:00:00,000 --> 00:00:07,000

In the very early times, people didn't understand the majestic kind of catastrophes of nature.

2

00:00:07,000 --> 00:00:20,000

If a volcano blew its head and destroyed a village, primitive people used to think that there's some enlarged monster, some enlargement,

3

00:00:20,000 --> 00:00:24,000

other thing that was familiar to them, like a wild animal or something.

4

00:00:24,000 --> 00:00:35,000

In other words, they interpreted this ununderstandable, rather fearsome thing in terms of their present knowledge, primitive as it was.

5

00:00:35,000 --> 00:00:42,000

And when you get into many little times with a sort of research and sort of mysticism and religious server,

6

00:00:42,000 --> 00:00:50,000

and I suppose if people saw unexplained things in the sky in those days, they explained them as miracles.

7

00:00:50,000 --> 00:00:56,000

Well, then you get to today, and we're on the brink of interplanetary travel.

8

00:00:56,000 --> 00:01:03,000

And so we begin to see things in the sky again if we can't understand or can't explain them immediately.

9

00:01:03,000 --> 00:01:12,000

So we explain them again with this sort of colossal egotism of man at his present time.

10

00:01:12,000 --> 00:01:19,000

We explain them in terms of our latest ability, namely on the brink of space travel, these must be spaceships.

11

00:01:20,000 --> 00:01:22,000

Thank you.
