

1

00:00:00,000 --> 00:00:07,000

William Lear is one of the most outspoken men in the aviation industry.

2

00:00:07,000 --> 00:00:13,000

The president of Lear incorporated a phantom company that manufactures electronic equipment for airfats.

3

00:00:13,000 --> 00:00:19,000

Mr. Lear, have you ever seen an unidentified flying object from a distance just place?

4

00:00:19,000 --> 00:00:23,000

One night we were going out to Palm Springs, Manifep, we were on our way to Bogartau, Columbia,

5

00:00:23,000 --> 00:00:29,000

and I had an altitude of about 11,000 feet and my pilot, Hal Herman, was flying at the time.

6

00:00:29,000 --> 00:00:33,000

I was setting up this profile and he pointed out one of these devices in the air,

7

00:00:33,000 --> 00:00:36,000

of course I thought he was kidding but I saw it at the same time.

8

00:00:36,000 --> 00:00:40,000

He pointed it out to me and it was an object that went from about over Palm Springs,

9

00:00:40,000 --> 00:00:44,000

it looked like zero point, not at the Palm Springs, it was very high-rated space.

10

00:00:44,000 --> 00:00:47,000

Would you describe it a little further, what did it look like?

11

00:00:47,000 --> 00:00:53,000

It's a very nebulous thing to try to describe an object that we saw but it was a bright object,

12

00:00:53,000 --> 00:00:59,000

it was a characteristic greenish, blueish sort of ethereal light about it.

13

00:00:59,000 --> 00:01:01,000

What do you think it was?

14

00:01:01,000 --> 00:01:03,000

Well I think it was a...

15

00:01:03,000 --> 00:01:09,000

Mr. Pryce, I think we've been seeing her reading about it, hearing about it, it's reported a lot of

16

00:01:09,000 --> 00:01:15,000

conflagues, but it could readily be from another planet.

17

00:01:15,000 --> 00:01:19,000

I know that you can automatically push yourself in the limit,

18

00:01:19,000 --> 00:01:24,000

take courage to believe such a thing, but I think it's been enough, people with substance source

19

00:01:24,000 --> 00:01:29,000

reported such things that I don't think any longer that you can completely discredit their possibility

20

00:01:29,000 --> 00:01:32,000

of there being visitations from another planet.

21

00:01:32,000 --> 00:01:34,000

I think we're pretty...

22

00:01:34,000 --> 00:01:41,000

We think that out of the millions of galaxies and the literally hundreds of millions of possible worlds

23

00:01:41,000 --> 00:01:46,000

that could exist, that there's only one world that could exist and we belong such as ourselves,

24

00:01:46,000 --> 00:01:49,000

I think possibly they think come from there.

25

00:01:49,000 --> 00:01:54,000

Would you have to guess that these are the same sort of things as are being described

26

00:01:54,000 --> 00:01:57,000

or allegedly seen in the current outbreak of signings?

27

00:01:57,000 --> 00:01:59,000

I believe so and I don't believe this is anything new.

28

00:01:59,000 --> 00:02:04,000

I think that the signings have been pretty well established back as much as 300-400 years ago

29

00:02:04,000 --> 00:02:10,000

and the efficiency of all that means it's coming from a much older intellectual society than we have in existence today.

30

00:02:10,000 --> 00:02:15,000

Now I'm going to take advantage of your long experience in the technical field of aviation.

31

00:02:15,000 --> 00:02:21,000

How would you explain the tremendous speed and the strange maneuverings of the signings?

32

00:02:21,000 --> 00:02:26,000

Well, certainly they don't operate on any of their propulsion or the aerodynamic principles of our present aircraft

33

00:02:26,000 --> 00:02:31,000

because if they did, well they couldn't do the apparent things that they say that they do which is last

34

00:02:31,000 --> 00:02:36,000

and straight down, take off, straight up and maneuver at tremendous speeds forward

35

00:02:36,000 --> 00:02:42,000

to then immediately change their course, move at right angles with apparently no acceleration effect.

36

00:02:42,000 --> 00:02:44,000

But what kind of power might they have?

37

00:02:44,000 --> 00:02:51,000

Well, it would have to be something that's beyond our present knowledge of mechanics and physics at the present time

38

00:02:51,000 --> 00:02:57,000

but that's not entirely impossible. It could have been figured out by an older and, as I say, more intellectual society

39

00:02:57,000 --> 00:02:59,000

than we have in existence today.

40

00:02:59,000 --> 00:03:02,000

I know that it could be an anti-gravitational device.

41

00:03:02,000 --> 00:03:07,000

Anti-gravitational? That sounds like something out of Buck Rogers.

42

00:03:07,000 --> 00:03:09,000

What is anti-gravity?

43

00:03:09,000 --> 00:03:12,000

Well, we can't any longer look down our nose as things have come out of our garage.

44

00:03:12,000 --> 00:03:13,000

Yeah, yeah.

45

00:03:13,000 --> 00:03:17,000

So, it's, after all, we have a gravitational thing.

46

00:03:17,000 --> 00:03:19,000

When we call gravity, we don't know what it is.

47

00:03:19,000 --> 00:03:25,000

I think a Einstein had probably lived a few years longer than he was right on the verge of at least evolving a formula

48

00:03:25,000 --> 00:03:28,000

that would have at least allowed us to describe gravity.

49

00:03:28,000 --> 00:03:33,000

And, of course, the gravity is the force, it's a very weak force, but because of the preponderance of the size

50

00:03:33,000 --> 00:03:38,000

from which it emanates, for instance, to give you an idea, please, it takes the whole earth

51

00:03:38,000 --> 00:03:42,000

in order to develop those things with a small object that I can hold in my hand before it's a one-house.

52

00:03:42,000 --> 00:03:47,000

Well, this is a rather weak force, but nevertheless, it's a real force that's hard for us to understand, gravity,

53

00:03:47,000 --> 00:03:51,000

because so far we haven't been able to create gravity as we can take magnetic forces,

54

00:03:51,000 --> 00:03:53,000

and electrostatic forces, and things of that kind.

55

00:03:53,000 --> 00:03:56,000

But nevertheless, we know it exists, and we don't believe it.

56

00:03:56,000 --> 00:03:58,000

Just jump on with something.
