

1

00:00:30,000 --> 00:00:32,000

No, not all of them.

2

00:00:32,000 --> 00:00:35,000

What percentage of youth thought has some credibility?

3

00:00:35,000 --> 00:00:37,000

I'd say about 20%.

4

00:00:37,000 --> 00:00:43,000

Have you ever actually seen any evidence that proved that there were flying objects on a dark bar?

5

00:00:43,000 --> 00:00:45,000

No, I'm saying absolutely not.

6

00:00:45,000 --> 00:00:50,000

Now, why are you awarding for the government to the Air Force for the ability to handle these reports?

7

00:00:50,000 --> 00:00:55,000

Enough for me to please make a deal of time and money to investigate.

8

00:00:55,000 --> 00:00:58,000

Have you heard about that investigation with fellow?

9

00:00:58,000 --> 00:01:00,000

Ah, yes, there were.

10

00:01:00,000 --> 00:01:04,000

And in turn, the Air Force is still following investigating this problem.

11

00:01:04,000 --> 00:01:10,000

I can't knock me around a lot, but I'm afraid that after years and years, if I'm finding any answers,

12

00:01:10,000 --> 00:01:13,000

they sort of slack off a little bit.

13

00:01:13,000 --> 00:01:16,000

Because I was renewed interested in it now, you brought some of it out today,

14

00:01:16,000 --> 00:01:19,000

and I believe a federal test is very true.

15

00:01:19,000 --> 00:01:24,000

If there are flying objects to you, think they're coming from out of space or another planet.

16

00:01:24,000 --> 00:01:29,000

Well, if my answer is a question of the only in the team that backed up any scientific facts

17

00:01:29,000 --> 00:01:32,000

when they go down behind the system, then that would...

18

00:01:32,000 --> 00:01:34,000

Well, I'm sorry, who wants to check?

19

00:01:34,000 --> 00:01:37,000

Could there be journeys from another bar on the power of the other?

20

00:01:37,000 --> 00:01:39,000

I doubt this very much.

21

00:01:39,000 --> 00:01:44,000

You don't place any credibility in these statements we've heard tonight.

22

00:01:44,000 --> 00:01:49,000

It's taken people in the paper about foreign ice men to show them to the seniors.

23

00:01:49,000 --> 00:01:51,000

Yes, I realize that.

24

00:01:51,000 --> 00:01:53,000

I don't believe that.

25

00:01:53,000 --> 00:01:55,000

Do you think it's possible that we could be something like that?

26

00:01:55,000 --> 00:01:57,000

No, I don't.

27

00:01:57,000 --> 00:02:02,000

Now, as an aeronautical engineer, how do you feel the identity of the transformation of these flying objects?

28

00:02:02,000 --> 00:02:04,000

Could be like this, should be like this.

29

00:02:04,000 --> 00:02:07,000

I think that the next step is the Air Force field research.

30

00:02:07,000 --> 00:02:11,000

The next step, I think, is to go into a rather than whatever instrumentation program,

31

00:02:11,000 --> 00:02:16,000

something very similar to the Moon Watch program that they've got to track this by the...

32

00:02:16,000 --> 00:02:20,000

It would be fancy, but it would come up with the answer or no answer,

33

00:02:20,000 --> 00:02:22,000

and either one of us would be very significant.

34

00:02:22,000 --> 00:02:25,000

Do you feel that the public should be told what's going on, what's happening?

35

00:02:25,000 --> 00:02:26,000

Very definitely.

36

00:02:26,000 --> 00:02:32,000

I feel that standing behind Peter Z is nothing but a very detrimental to the whole project.

37

00:02:32,000 --> 00:02:35,000

I'm sorry, my short true thoughts are all over the phone.

38

00:02:35,000 --> 00:02:39,000

Now, maybe there's really nothing to this flying thought to scare me.

39

00:02:39,000 --> 00:02:45,000

That's what I keep telling myself, but I'm afraid that I tend to believe myself just a little bit less every time I say it.

40

00:02:45,000 --> 00:02:52,000

The obvious conclusion, as Mr. Ruffel just said, and the conclusion I think that we've reached in this whole report

41

00:02:52,000 --> 00:02:57,000

is that the time is now right for the government to tell us what it knows if it knows anything.
