

1

00:00:00,000 --> 00:00:08,800

Reports keep coming in of a mysterious brilliant object being cited in areas of New Mexico and

2

00:00:08,800 --> 00:00:09,800

Texas.

3

00:00:09,800 --> 00:00:16,240

The latest report is from James Stokes, an engineer from the Air Force Missile Development

4

00:00:16,240 --> 00:00:21,000

Center at Holloman Air Force Base in Alamo Board of New Mexico.

5

00:00:21,000 --> 00:00:26,960

He has told of seeing a brilliant colored egg-shaped object yesterday, and he's quoted

6

00:00:26,960 --> 00:00:34,800

as saying, some force emanating from it stalled 10 cars on an isolated desert road between

7

00:00:34,800 --> 00:00:38,920

White Sands Proving Grounds and Alamogordo.

8

00:00:38,920 --> 00:00:45,240

Stokes also told Terry Clark, and his director of a radio station in Alamogordo, that as

9

00:00:45,240 --> 00:00:51,480

the object passed in a shallow dive across the sky, he could feel a kind of a heat wave

10

00:00:51,480 --> 00:00:55,200

like radiation from a giant sun lamp.

11

00:00:55,200 --> 00:00:57,360

But he said he heard no sound.

12

00:00:57,360 --> 00:01:03,360

Earlier reports in recent days told of a big ball of fire spotted over much of West Texas.

13

00:01:03,360 --> 00:01:07,800

The Air Force is investigating.

14

00:01:07,800 --> 00:01:13,480

In all the news from the United States, the Air Force apparently is convinced that an

15

00:01:13,480 --> 00:01:19,880

electronics engineer actually saw an unidentified flying object over the New Mexico desert.

16

00:01:19,880 --> 00:01:24,120

The engineer, who works at the Air Force's White Sands Missile Proving Grounds, said

17

00:01:24,120 --> 00:01:29,400

the egg-shaped object with rings around it was spotted at the same time as his car and

18

00:01:29,400 --> 00:01:32,320

10 others were mysteriously stalled Monday.

19

00:01:32,320 --> 00:01:37,200

I spoke to him, said the Air Force is trying to locate other motorists whose cars are set

20

00:01:37,200 --> 00:01:38,720

by Stokes to have stalled.
