

1

00:00:00,000 --> 00:00:07,000

At that time I was in contact with Richard Smith who was the, what, the king that signed

2

00:00:07,000 --> 00:00:20,000

out the research for the government candidate. And he was working very closely with our own

3

00:00:20,000 --> 00:00:27,000

people down in Washington on the spot. And at the time that this was their so-called

4

00:00:27,000 --> 00:00:36,000

government place right after he went down to Washington. And he brought back, say to me,

5

00:00:36,000 --> 00:00:51,000

and I mean what you said, a piece of metallic light-set that he said had been picked up right after that event.

6

00:00:51,000 --> 00:00:57,000

In a far yard in Virginia right across the river from Washington, D.C.

7

00:00:57,000 --> 00:01:07,000

This piece of metal had been seen to fall from the air at the time that this thing was taking place.

8

00:01:07,000 --> 00:01:15,000

He didn't know that the metal had been shot down or what had happened to it. But anyway, it came down and it broke.

9

00:01:15,000 --> 00:01:25,000

However, it wasn't a big deal. This thing apparently stands from a market that was

10

00:01:25,000 --> 00:01:35,000

probably 18 inches in diameter for the big boy. Well, I think it was, I think it contained a

11

00:01:35,000 --> 00:01:42,000

losing device or something like that. We shouldn't be crossing that side of the thing,

12

00:01:42,000 --> 00:01:51,000

because we ourselves are exploring just such things as those today. This was a

13

00:01:51,000 --> 00:01:59,000

about 18 inches in diameter, I think, from the chance of the piece that I saw,

14

00:01:59,000 --> 00:02:06,000

the top of the envelope was a couple of inches thick and it stuck down as the air

15

00:02:06,000 --> 00:02:16,000

was going to come out. It was about a 1.5 inch thick piece. The piece I saw was a piece that came from

16

00:02:16,000 --> 00:02:25,000

one of the William Arthur things in a certain place and it was about 6 inches long.

17

00:02:25,000 --> 00:02:31,000

While it broke, it was about a 1.5 inch thick.

18

00:02:31,000 --> 00:02:36,000

I believe, I mean, it's a little bit different kind of reaction. I believe that, you know, he was

19

00:02:36,000 --> 00:02:42,000

coming in through the front of the truth. That's not true. And he lived in the NBA through

20

00:02:42,000 --> 00:02:48,000

from our own government in Washington. Yes, and he returned it. Why would they give him this?

21

00:02:48,000 --> 00:02:54,000

Okay. Why would they give him trust in him? Well, he was doing all these things that's right.

22

00:02:54,000 --> 00:03:00,000

Well, the Canadian government. The Canadian government. And he was the first we worked

23

00:03:00,000 --> 00:03:08,000

and he worked it. He took it up there and he had it, he had it, he had it analyzed.

24

00:03:08,000 --> 00:03:20,000

And there was only one thing in that piece that they could identify with any security at all.

25

00:03:20,000 --> 00:03:31,000

And that was some iron-like crystals. The crystals threw out the piece. Iron-like crystals, yes.

26

00:03:31,000 --> 00:03:43,000

Outside of that, they were not able to find any other thing that was anything like we had here on the air.
