

1

00:00:00,000 --> 00:00:12,000

Ladies and gentlemen, the hero who's there on UFO News Radio, CFRB 1010.

2

00:00:12,000 --> 00:00:16,000

Strange days indeed.

3

00:00:16,000 --> 00:00:24,000

And in studio with me tonight for the evening is a weekly contributing editor, is his official

4

00:00:24,000 --> 00:00:25,000

title.

5

00:00:25,000 --> 00:00:27,000

David Furlott is with us.

6

00:00:27,000 --> 00:00:32,000

Joining us on the phone is Palmyro Campania.

7

00:00:32,000 --> 00:00:36,000

Palmyro works for the Department of National Defense in his hometown of Ottawa.

8

00:00:36,000 --> 00:00:43,000

He is active as the Canadian representative to NATO in the area of actual magnetics in military aircraft.

9

00:00:43,000 --> 00:00:49,000

He first became interested in UFOs back in 1966 after reading Frank Edwards book Flying Saucers

10

00:00:49,000 --> 00:00:54,000

of Serious Business and has been following the situation ever since.

11

00:00:54,000 --> 00:01:01,000

The author of the UFO files, the Canadian connection exposed and storms of controversy,

12

00:01:01,000 --> 00:01:05,000

the secret Avro-Aro files revealed.

13

00:01:05,000 --> 00:01:12,000

And he's also somewhat of an authority on the father of our first guest tonight, Robert Brockhouse

14

00:01:12,000 --> 00:01:19,000

Smith, who as you heard Dave describing a little while ago was a Canadian radio engineer

15

00:01:19,000 --> 00:01:20,000

and a ufologist.

16

00:01:20,000 --> 00:01:23,000

Palmyro, good evening and welcome back to the program.

17

00:01:23,000 --> 00:01:25,000

Yes, good to be here tonight.

18

00:01:25,000 --> 00:01:29,000

And also on the phone from his home in Ottawa is James Smith.

19

00:01:29,000 --> 00:01:31,000

James, welcome to the program.

20

00:01:31,000 --> 00:01:32,000

Good evening.

21

00:01:32,000 --> 00:01:34,000

Thank you for inviting me on.

22

00:01:34,000 --> 00:01:35,000

Thank you for coming on.

23

00:01:35,000 --> 00:01:39,000

I understand that you don't come out in public very often.

24

00:01:39,000 --> 00:01:45,000

No, for no particular reason other than that the situation has been that I've been in the

25

00:01:45,000 --> 00:01:51,000

periphery of UFO exploration over the years and I haven't had too many opportunities.

26

00:01:51,000 --> 00:01:55,000

And as we were saying, you're the son of Robert Brockhouse Smith.

27

00:01:55,000 --> 00:02:01,000

Palmyro, a very brief few moments about with Smith and some of the things that he did,

28

00:02:01,000 --> 00:02:02,000

if you would.

29

00:02:02,000 --> 00:02:09,000

Robert Smith was the broadcast engineer with the Department of Transport and in 1950 he

30

00:02:09,000 --> 00:02:16,000

was in Washington at the conference and he heard about both stories, the funny sausage

31

00:02:16,000 --> 00:02:18,000

and the fake lost very short.

32

00:02:18,000 --> 00:02:23,000

He was put in touch with an American scientist by the name of Dr. Robert Sarbacher, 33 of

33

00:02:23,000 --> 00:02:25,000

our Canadian embassy.

34

00:02:25,000 --> 00:02:31,000

Sarbacher informed Wilbert that the UFOs were real out of this planet and if there was anything

35

00:02:31,000 --> 00:02:36,000

that he was doing in his work that might contribute to the understanding of how they operated,

36

00:02:36,000 --> 00:02:39,000

principles of operation, they would welcome that input.

37

00:02:39,000 --> 00:02:47,000

Wilbert came back to Canada and put a memo together to his authorities requesting the

38

00:02:47,000 --> 00:02:53,000

establishment of a research effort into the investigation of UFOs and that he actually

39

00:02:53,000 --> 00:02:58,000

led to his setting up a UFO research station both 1953.

40

00:02:58,000 --> 00:03:05,000

He was also working in parallel with that with respect to a government sponsored project,

41

00:03:05,000 --> 00:03:09,000

Second Story, which I believe had begun around 1952.

42

00:03:09,000 --> 00:03:14,000

He was a key member of that community as well, kind of a parallel from the Blue Book.

43

00:03:14,000 --> 00:03:23,000

Subsequent to that he made some claims that he had received pieces of the UFOs for investigation

44

00:03:23,000 --> 00:03:28,000

and these are some of the things that perhaps we can explore with Jim Smith.

45

00:03:28,000 --> 00:03:33,000

Do you have a strong recollection of the things that your father was into, Jim Smith?

46

00:03:33,000 --> 00:03:38,000

I remember in 1950 I was seven years old. He was the eldest of three.

47

00:03:38,000 --> 00:03:45,000

My interest was peripheral right up until the time of his death in 62 because kids were involved

48

00:03:45,000 --> 00:03:48,000

in a lot of other activities every now and again.

49

00:03:48,000 --> 00:03:50,000

We'd poke in and see what was going on when he was up to.

50

00:03:50,000 --> 00:03:56,000

We'd spend a lot of time in research and he'd be away at various establishments where he had facilities

51

00:03:56,000 --> 00:04:00,000

to do things. Sometimes he'd take us kids with him and sometimes not.

52

00:04:00,000 --> 00:04:06,000

We had peripheral interest in the little things that would pop up that we'd remember.

53

00:04:06,000 --> 00:04:11,000

Many times they do remember blue military cars pulling up to the house and leaving packages

54

00:04:11,000 --> 00:04:14,000

of things were into metallurgical analysis.

55

00:04:14,000 --> 00:04:20,000

We'd ask them what they were and they said they were chunks that identified things

56

00:04:20,000 --> 00:04:22,000

that the military either shot down or found.

57

00:04:22,000 --> 00:04:27,000

Unidentified things? Or did he actually use the word flying saucers?

58

00:04:27,000 --> 00:04:34,000

Yes, on a couple of instances. I remember packages on the sides of a loaf of bread coming in.

59

00:04:34,000 --> 00:04:40,000

The box would contain a chunk of metal that he'd been told that the Air Force had shot

60

00:04:40,000 --> 00:04:45,000

the chunk off of a flying saucer. He'd already done some analysis of it.

61

00:04:45,000 --> 00:04:48,000

I would like him to have a go at it too.

62

00:04:48,000 --> 00:04:50,000

Was this the American Air Force or Canadian Air Force?

63

00:04:50,000 --> 00:04:55,000

I don't remember what color the plane was but it came from the stage when it was delivered to the house.

64

00:04:55,000 --> 00:04:59,000

So it came from the states? Yes, that's what I was looking for.

65

00:04:59,000 --> 00:05:03,000

On more than one occasion there were these pieces that were sent to them?

66

00:05:03,000 --> 00:05:07,000

On several occasions. They'd be of different sizes and there was no regularity to it at all.

67

00:05:07,000 --> 00:05:13,000

He'd send them away for analysis and try to cut pieces off of them and do it as well.

68

00:05:13,000 --> 00:05:18,000

Some of those pieces you were saying some came in the mail, some came by military vehicle?

69

00:05:18,000 --> 00:05:19,000

Yes.

70

00:05:19,000 --> 00:05:23,000

So there was a number of them that were arriving.

71

00:05:23,000 --> 00:05:27,000

You actually saw some of these pieces as well, did you?

72

00:05:27,000 --> 00:05:31,000

Oh yes. I told him when he was talking to Mark, I think he was in there.

73

00:05:31,000 --> 00:05:35,000

How old would you have been then?

74

00:05:35,000 --> 00:05:39,000

Well, I was 17, in the high age group.

75

00:05:39,000 --> 00:05:47,000

Did you get an opportunity to handle any of them? How would you know what was an unusual piece of metal that gave you...

76

00:05:47,000 --> 00:05:52,000

I got to handle a few of them. One was a chunk about the size of a brick.

77

00:05:52,000 --> 00:06:00,000

A semi-circular shape. A very smooth metal except where the jacket edges were that had been disconnected from whatever it belonged to.

78

00:06:00,000 --> 00:06:04,000

It was not quite heavy in terms of its size.

79

00:06:04,000 --> 00:06:09,000

He had analysis done about it when I remember seeing that particular analysis.

80

00:06:09,000 --> 00:06:14,000

She'd come back and there were a few things in there that they're not found on this planet that were on an adepto bottle.

81

00:06:14,000 --> 00:06:15,000

Oh really?

82

00:06:15,000 --> 00:06:21,000

One of them was that they were a high, dense-walled steel and whatever else goes into it.

83

00:06:21,000 --> 00:06:27,000

So presumably that paperwork was secret and he wouldn't have kept any copies of the analysis.

84

00:06:27,000 --> 00:06:30,000

I don't know where it had gone.

85

00:06:30,000 --> 00:06:37,000

All of the artifacts or all of these materials I think had been returned at some particular point in time?

86

00:06:37,000 --> 00:06:39,000

Yeah, I even said in the back.

87

00:06:39,000 --> 00:06:42,000

That's unfortunate. Wouldn't it be nice to have one?

88

00:06:42,000 --> 00:06:47,000

He probably cut off a cubic inch or something or hang onto that.

89

00:06:47,000 --> 00:06:51,000

That was to where it's ultimately destination was.

90

00:06:51,000 --> 00:06:58,000

He did make the comment once in an open program that he sent them back to an authority that was higher than the U.S. Air Force.

91

00:06:58,000 --> 00:07:03,000

Words for that effect. He was asked, did this go back to the U.S. Air Force? No. Did it go back to the CIA? No.

92

00:07:03,000 --> 00:07:05,000

I grew much higher than that.

93

00:07:05,000 --> 00:07:09,000

But he never did reveal the source for high-witness over time.

94

00:07:09,000 --> 00:07:16,000

No, no. One can only surmise about that and take a stab in the dark and say perhaps in J-12.

95

00:07:16,000 --> 00:07:18,000

That was a possibility.

96

00:07:18,000 --> 00:07:20,000

Yeah, well, we'll have your money again.

97

00:07:20,000 --> 00:07:22,000

That's in the dark now.

98

00:07:22,000 --> 00:07:29,000

Now, Jim, did he mention that he was shown bodies at one point or something?

99

00:07:29,000 --> 00:07:36,000

Yeah, on one of the times when he was in the States a lot, hardly due to his work as a superintendent radio regulation.

100

00:07:36,000 --> 00:07:41,000

He had to deal with frequency allocation channels, radio and that sort of business.

101

00:07:41,000 --> 00:07:48,000

We frequently had committees in the States when they were working out joint allocations, for example.

102

00:07:48,000 --> 00:07:54,000

And on several occasions he played it off to be shown things on this line.

103

00:07:54,000 --> 00:07:58,000

That was pretty well under the Efficient Secrets Act he told us.

104

00:07:58,000 --> 00:08:04,000

Harder when he, just before he passed away in 62, he felt the act couldn't get him any more than that.

105

00:08:04,000 --> 00:08:08,000

I did ask him these, yes, he was on the bodies.

106

00:08:08,000 --> 00:08:14,000

And he had several connections with the refiring military folks, if I remember correctly.

107

00:08:14,000 --> 00:08:17,000

One of them was Rear Admiral Knowles, I believe.

108

00:08:17,000 --> 00:08:21,000

Ah, yes, yeah, we were at Knowles on many occasions.

109

00:08:21,000 --> 00:08:24,000

He was with the Justice and the Evil Intelligence.

110

00:08:24,000 --> 00:08:30,000

So there was opportunity there for this type of thing to be legitimate.

111

00:08:30,000 --> 00:08:33,000

He was told these things were there.

112

00:08:33,000 --> 00:08:37,000

It would have been interesting to be a sly on the wall of those social gatherings.

113

00:08:37,000 --> 00:08:39,000

He wouldn't believe it.

114

00:08:39,000 --> 00:08:41,000

Did he describe them at all?

115

00:08:41,000 --> 00:08:48,000

Not that I can recall, except the descriptions that had sort of been out and about were very

accurate.

116

00:08:48,000 --> 00:08:52,000

The descriptions that were out and about were fairly accurate.

117

00:08:52,000 --> 00:08:55,000

We had descriptions of braids and that kind of thing.

118

00:08:55,000 --> 00:08:57,000

I think their descriptions were smallish.

119

00:08:57,000 --> 00:09:00,000

I don't know about that, it's very coloring.

120

00:09:00,000 --> 00:09:03,000

I don't remember a lot of those details.

121

00:09:03,000 --> 00:09:10,000

I just really didn't satisfy my curiosity that he had seen them and that they were real.

122

00:09:10,000 --> 00:09:18,000

As you were growing up there, Jim, and say, hitting the adolescent ages, you know, the 14, 15, 16,

123

00:09:18,000 --> 00:09:20,000

how are you feeling about all of this?

124

00:09:20,000 --> 00:09:23,000

Quite interested and quite proud.

125

00:09:23,000 --> 00:09:30,000

I think that here's, my dad and a group of other people doing some research and something that was really strange and different.

126

00:09:30,000 --> 00:09:34,000

At that time, we were looking for a boogie man under every rock.

127

00:09:34,000 --> 00:09:41,000

Any unusual kind of thinking was not changed the gray besides black or white.

128

00:09:41,000 --> 00:09:43,000

That's just the way it was at that time.

129

00:09:43,000 --> 00:09:50,000

Many people came and reported sightings and it evolved that there was a flying saucer club.

130

00:09:50,000 --> 00:09:56,000

We tended to meet once a month in our basement and it drew people from all over the place.

131

00:09:56,000 --> 00:10:05,000

It became more better known than anybody from politics to anybody who had seen something unusual would come and share the experiences.

132

00:10:05,000 --> 00:10:10,000

We're talking with Jim Smith, the son of Wilbur Rockhouse Smith.

133

00:10:10,000 --> 00:10:16,000

Also on the line with us is a regular monthly contributing editor, Pamiro Pompani.

134

00:10:16,000 --> 00:10:21,000

In studio with me is our weekly contributing editor, Dave Furlough.

135

00:10:21,000 --> 00:10:28,000

Dave and I were talking during the commercial break and Dave just said, this is like Jesse and Jesse Marcel Jr.,

136

00:10:28,000 --> 00:10:33,000

senior and junior, and the stuff that your dad is being sent.

137

00:10:33,000 --> 00:10:38,000

It's a mental things that are heavier than they should be when you look at them.

138

00:10:38,000 --> 00:10:43,000

Your dad is seen, claimed to have seen alien bodies.

139

00:10:43,000 --> 00:10:49,000

It's mind-boggling when you consider that all of this is non-existent.

140

00:10:49,000 --> 00:10:54,000

UFOs don't exist officially at the official statement.

141

00:10:54,000 --> 00:11:02,000

Someone called in the control room a few moments ago and said, does Jim believe in flying saucers?

142

00:11:02,000 --> 00:11:05,000

Yes, I do. I've seen a number of them.

143

00:11:05,000 --> 00:11:07,000

Some of them quite up close.

144

00:11:07,000 --> 00:11:14,000

At our home when this flying saucer club met in the basement, there were basement windows.

145

00:11:14,000 --> 00:11:20,000

On many occasions there would be small monitor saucers looking in the window.

146

00:11:20,000 --> 00:11:23,000

You have to give this thing two opens going on.

147

00:11:23,000 --> 00:11:30,000

In terms of size, it would be 30, 36 inches across and it would be on a foot thick, rather looking like a jelly donut.

148

00:11:30,000 --> 00:11:36,000

I came out of the steps out of the front porch one evening just after dark and came down the front steps

149

00:11:36,000 --> 00:11:43,000

sitting on the above three feet off the front lawn, where it could look in the window and monitor what was going on.

150

00:11:43,000 --> 00:11:49,000

We sort of stood there and looked at each other for 20 or 30 seconds or so and then it just took off straight up.

151

00:11:49,000 --> 00:11:56,000

The grass underneath it was virtually completely sterile for the next 10 years.

152

00:11:56,000 --> 00:11:59,000

Nothing would grow to this great patch.

153

00:11:59,000 --> 00:12:04,000

Similarly in the trees at the back of the side of the house again with access to a window.

154

00:12:04,000 --> 00:12:10,000

Our neighbors used to complain, Smith keep your saucers, your old trees, because these things would sit up there and then

155

00:12:10,000 --> 00:12:14,000

virtually burn all of the leaves and branches around them.

156

00:12:14,000 --> 00:12:17,000

They would get a great dead clump and a hole in the middle of it.

157

00:12:17,000 --> 00:12:20,000

Two or three trees and access to windows.

158

00:12:20,000 --> 00:12:22,000

I've seen a number of those.

159

00:12:22,000 --> 00:12:29,000

So in other words, the UFO club that was discussing UFOs was being observed by UFOs.

160

00:12:29,000 --> 00:12:33,000

I remember Betty Hill having that kind of experience.

161

00:12:33,000 --> 00:12:37,000

Don't know if you recall the story of Betty, but he killed a fork and he had a big stomach.

162

00:12:37,000 --> 00:12:41,000

He gave it to her and later on she would have it.

163

00:12:41,000 --> 00:12:49,000

You could say that nature indicated that there would be objects or something up in the sky inside of the building where it would be.

164

00:12:49,000 --> 00:12:51,000

The small size is interesting.

165

00:12:51,000 --> 00:12:53,000

I've heard reports of small size.

166

00:12:53,000 --> 00:12:57,000

Well, full fighters for one.

167

00:12:57,000 --> 00:13:03,000

Second World War, bombers were flying from Britain over to Europe, from the bomb.

168

00:13:03,000 --> 00:13:08,000

There were these little disc shaped objects that flew in and out.

169

00:13:08,000 --> 00:13:16,000

In fact, they became such a regular occurrence that gunners used to warm up their guns by shooting at these things.

170

00:13:16,000 --> 00:13:20,000

Jim, your dad had a sighting, did he not? Back in the 50s?

171

00:13:20,000 --> 00:13:23,000

There were so many to be heard on that I can't recall.

172

00:13:23,000 --> 00:13:25,000

Why?

173

00:13:25,000 --> 00:13:30,000

What I don't understand is why a lot of these stories haven't come out before.

174

00:13:30,000 --> 00:13:40,000

I mean, not stories, but a lot of these events, the Flying Social Club, Dave and I are sitting here with our eyebrows raised at one another.

175

00:13:40,000 --> 00:13:42,000

We haven't heard this stuff before.

176

00:13:42,000 --> 00:13:45,000

Well, I talked a little bit about it in the UFO files.

177

00:13:45,000 --> 00:13:47,000

They were called the boys from Topside.

178

00:13:47,000 --> 00:13:49,000

Discussed his sighting actually.

179

00:13:49,000 --> 00:13:54,000

Now, that's how it was in 1963, I believe it was, reported with this.

180

00:13:54,000 --> 00:13:56,000

And we talked about the alien bodies.

181

00:13:56,000 --> 00:13:58,000

Yeah, you're sure.

182

00:13:58,000 --> 00:14:03,000

The title for the new book, Palm Arrow, is Keep the Sources in Your Own Damn Tree.

183

00:14:03,000 --> 00:14:09,000

Yeah, just by way of background, Jim, your dad's got some engineering awards for his work.

184

00:14:09,000 --> 00:14:14,000

He grew up when radio was growing up and held a number of patents from broadcast equipment.

185

00:14:14,000 --> 00:14:24,000

He received awards from the Canadian Association of Broadcasters for his work in radio engineering, keeping everybody honest in the Western Hemisphere.

186

00:14:24,000 --> 00:14:35,000

On the one hand, as far as official business concerned, he's done all of these wonderful things for the media that we're on now, but on the other hand, he's a saucer hand.

187

00:14:35,000 --> 00:14:37,000

It would seem to me, yes?

188

00:14:37,000 --> 00:14:42,000

Yes, this was all of the interest he had in saucers was strictly on his own time.

189

00:14:42,000 --> 00:14:47,000

Yeah, he was an engineer, therefore, concerned as to how he would make things go.

190

00:14:47,000 --> 00:14:51,000

So his research dealt with trying to figure out the propulsion system, right?

191

00:14:51,000 --> 00:14:57,000

And he did a lot of work with magnets, and he got it working, his final experiments.

192

00:14:57,000 --> 00:15:08,000

And I saw those on a laboratory level, he was able to put in his ordinary cheap clock in the apparatus, fire it up, depending on the direction it was spinning.

193

00:15:08,000 --> 00:15:16,000

He would lose time or gain time, and also with the weights and balances of these things later, or heavier.

194

00:15:16,000 --> 00:15:21,000

And it didn't seem to matter whether it was in the freezer or the oven or anything.

195

00:15:21,000 --> 00:15:26,000

I saw scientists that had been controlled experiments, because that's what scientists and engineers do.

196

00:15:26,000 --> 00:15:32,000

And he got the thing to work, so he was able to prove that, yes, using magnetic fields, these things could function.

197

00:15:32,000 --> 00:15:35,000

And those experiments are interesting.

198

00:15:35,000 --> 00:15:47,000

I remember talking to Jim, I said there was some word out of the Tampere University in Finland where they were doing experiments that were of a very similar nature that Wilbur was working on,

199

00:15:47,000 --> 00:15:54,000

where they had superconducting magnets rotating spheres and such, and it was lighter above them.

200

00:15:54,000 --> 00:15:59,000

NASA has picked up on that work, and as far as I know, they're continuing to.

201

00:15:59,000 --> 00:16:09,000

And they're trying to figure out a way of, I guess, shielding against gravity, to put it one way, they don't play back, they try to shift gravity,

202

00:16:09,000 --> 00:16:15,000

but shield against it so that whatever is above the shield is not affected by the gravity.

203

00:16:15,000 --> 00:16:23,000

Well, that work was designed to show that gravity is a variable, and apparently time is not a constant either.

204

00:16:23,000 --> 00:16:32,000

And the saucers could function by adjusting the gravity field on this planet so that they in fact fall away from it.

205

00:16:32,000 --> 00:16:39,000

And when that occurs, they can also alter the time, so time becomes meaningless, whether it's a dependent variable.

206

00:16:39,000 --> 00:16:46,000

So the saucer falls away from the particular planet, that's whatever speed you'd like.

207

00:16:46,000 --> 00:16:52,000

I want to go back to the flying saucer club from Holland, Jim Smith.

208

00:16:52,000 --> 00:16:57,000

The people that were there, were they sort of people from around the corner?

209

00:16:57,000 --> 00:17:00,000

Were they flying saucer reachers?

210

00:17:00,000 --> 00:17:02,000

Were they civil servants?

211

00:17:02,000 --> 00:17:09,000

Military was a full, across the full spectrum of the kinds of people who are popular on our planet.

212

00:17:09,000 --> 00:17:15,000

It started with just a few people who had seen the sighting and wanted to talk to somebody about it.

213

00:17:15,000 --> 00:17:20,000

That had built a questionnaire kind of thing that he had posted out to people.

214

00:17:20,000 --> 00:17:26,000

We read the press or who had heard the radio or something, and they completed the questionnaire and sent it back,

215

00:17:26,000 --> 00:17:29,000

and they could try to separate the week from the shafts.

216

00:17:29,000 --> 00:17:34,000

But over the years, people would say, read the city, they heard about it, who's going to talk,

217

00:17:34,000 --> 00:17:36,000

and they'd come and attend the meeting.

218

00:17:36,000 --> 00:17:38,000

There's not regularity that they knew it existed.

219

00:17:38,000 --> 00:17:45,000

There were everybody from pilots to housewives to servants, a full spectrum.

220

00:17:45,000 --> 00:17:49,000

Sometimes the same people would be there, but there were always new ones coming in.

221

00:17:49,000 --> 00:17:55,000

Mike Woods sent an email. He asked, was official Ottawa the Prime Minister's office

222

00:17:55,000 --> 00:18:00,000

over the Department of National Defense being advised about the UFO Club?

223

00:18:00,000 --> 00:18:04,000

Any indication that the U.S. got answers and sat on it?

224

00:18:04,000 --> 00:18:07,000

In terms of the club, there was nothing secret about it.

225

00:18:07,000 --> 00:18:13,000

It was public. They published a little newsletter that just distributed amongst those who wanted it,

226

00:18:13,000 --> 00:18:18,000

passed it on to their friends. It was very informal and anybody could come and attend.

227

00:18:18,000 --> 00:18:23,000

I know there were Harsian people in attendance on many occasions.

228

00:18:23,000 --> 00:18:30,000

As far as other military people there, for whatever reason, some were military pilots who had sightings,

229

00:18:30,000 --> 00:18:34,000

and they just wanted to pass that on and see if anybody could offer any explanations.

230

00:18:34,000 --> 00:18:37,000

There were others who came and sat and just watched them.

231

00:18:37,000 --> 00:18:40,000

But that was a very informal social thing.

232

00:18:40,000 --> 00:18:47,000

Was everybody known to your dad who came or were there strangers there who might have also been on or in the meeting?

233

00:18:47,000 --> 00:18:51,000

There were not many strangers that introduced themselves to the door.

234

00:18:51,000 --> 00:18:55,000

It was an official club meeting I'd like to attend. Everybody was welcome.

235

00:18:55,000 --> 00:18:59,000

If I recall, Wilbert was quite open with everything.

236

00:18:59,000 --> 00:19:06,000

That may have been one of the problems that they could be faced when he was conducting his UFO work in the mid-50s.

237

00:19:06,000 --> 00:19:09,000

A lot of the information was getting out to the press.

238

00:19:09,000 --> 00:19:16,000

The press was blowing it up, making the headlines, and I guess that got into a little bit of hot water with his own departments.

239

00:19:16,000 --> 00:19:18,000

Yes, that would be a fair assumption.

240

00:19:18,000 --> 00:19:21,000

I know they were all meetings were very old.

241

00:19:21,000 --> 00:19:28,000

Jim, was any of the documentation and what have you that your father gathered, like the questionnaire that you alluded to earlier?

242

00:19:28,000 --> 00:19:30,000

Do you have any of that?

243

00:19:30,000 --> 00:19:37,000

After death, there were a number of other people in the club who had been helping with research who attempted to carry on.

244

00:19:37,000 --> 00:19:40,000

And they did continue to do research for another year or two.

245

00:19:40,000 --> 00:19:43,000

We're talking a core group of maybe four or five people.

246

00:19:43,000 --> 00:19:50,000

And then they dissipated and went to separate ways or ran into Stonewalls and couldn't go any further because only two of them had engineering backgrounds.

247

00:19:50,000 --> 00:19:54,000

And a lot of the files, things about the research nature,

248

00:19:54,000 --> 00:19:59,000

not for us while keeping them at our home anymore because we were involved.

249

00:19:59,000 --> 00:20:02,000

So they were all transferred out to the people who were doing the research.

250

00:20:02,000 --> 00:20:05,000

And as you know, as time goes by, things disappear.

251

00:20:05,000 --> 00:20:08,000

So I would say that with respect to the questionnaire,

252

00:20:08,000 --> 00:20:12,000

and the number of those types of documents they are available in the National Archives,

253

00:20:12,000 --> 00:20:18,000

because he actually provided those to the Project Second Story Committee that Peter Millman was running.

254

00:20:18,000 --> 00:20:23,000

And they used those questionnaires the few times when I stressed the word few,

255

00:20:23,000 --> 00:20:27,000

when they went out to investigate and interrogate or talk to witnesses.

256

00:20:27,000 --> 00:20:33,000

But it was mostly Wilbert's work that went into the development of those tools that they were using.

257

00:20:33,000 --> 00:20:35,000

I want to bring a call right on this.

258

00:20:35,000 --> 00:20:39,000

This is John joining us on CFRB 1010.

259

00:20:39,000 --> 00:20:41,000

A question.

260

00:20:41,000 --> 00:20:45,000

Paul Merrill alluded to the fact that the UFO program,

261

00:20:45,000 --> 00:20:54,000

according to the U.S. government, was a couple of levels higher than the H-bomb or atomic program back in the 40s.

262

00:20:54,000 --> 00:21:03,000

What troubles me is the cavalier treatment of the UFO material that was brought to the house or sent by mail,

263

00:21:03,000 --> 00:21:06,000

which doesn't really add up to me.

264

00:21:06,000 --> 00:21:14,000

In fact, I couldn't see them sending secrets to a scientist by mail as opposed to having them hand delivered.

265

00:21:14,000 --> 00:21:20,000

I can't expand on it very much of the fact that they were delivered by mail or in person.

266

00:21:20,000 --> 00:21:24,000

Sometimes the easiest way is the most obvious.

267

00:21:24,000 --> 00:21:28,000

I don't know the hierarchy of who considers what to be super secret and important.

268

00:21:28,000 --> 00:21:31,000

The material is coming through.

269

00:21:31,000 --> 00:21:33,000

I get the wrong mail all the time.

270

00:21:33,000 --> 00:21:38,000

If I get something in a mail and I look at it and it's some sort of metal, and I say,

271

00:21:38,000 --> 00:21:43,000

wow, this is very strange, and it goes lost in the mail, which a lot of the stuff does.

272

00:21:43,000 --> 00:21:48,000

John raises a fair point that I've discussed that one I've laid back in the book,

273

00:21:48,000 --> 00:21:57,000

because it troubled me as well, Jim Smith knows this, but I was coming around to some of the conclusions that some of those fragments were not genuine.

274

00:21:57,000 --> 00:22:01,000

And I just go into some of this as the reasons why I believe that.

275

00:22:01,000 --> 00:22:06,000

And it relates back to the information that Wilbur was provided from Sir Bucker,

276

00:22:06,000 --> 00:22:09,000

what he was told that they were real, etc.

277

00:22:09,000 --> 00:22:14,000

The impression I was getting was that if you wanted to have someone discredit himself,

278

00:22:14,000 --> 00:22:18,000

if you had just given him true and accurate information,

279

00:22:18,000 --> 00:22:28,000

it might be to start sending this type of bogus material and know that he will eventually probably go public with it at some point.

280

00:22:28,000 --> 00:22:35,000

And if he does, the media could grab onto that and try to discredit the individual for later on in time.

281

00:22:35,000 --> 00:22:39,000

People would look back at that and raise exactly the same question John has raised and say,

282

00:22:39,000 --> 00:22:44,000

well, geez, I don't buy that, and so therefore all of it was not true.

283

00:22:44,000 --> 00:22:50,000

Having looked at all the material, I concluded that the information he got from Sir Bucker was the accurate information.

284

00:22:50,000 --> 00:22:54,000

Selling what happened after that, particularly with respect to the pieces,

285

00:22:54,000 --> 00:22:57,000

I think there was something else going on behind it.

286

00:22:57,000 --> 00:23:02,000

There may have been some which is a piece of come true, I don't know, but I would think that some of them were not.

287

00:23:02,000 --> 00:23:09,000

One last question. In relation to having been told about the alien bodies or had any alien bodies,

288

00:23:09,000 --> 00:23:13,000

and he mentioned that basically, I guess, would be on his deathbed,

289

00:23:13,000 --> 00:23:19,000

yeah, did you get the sense of credibility from what he was saying to you?

290

00:23:19,000 --> 00:23:23,000

Yeah, in fact, maybe we should clear up something right here,

291

00:23:23,000 --> 00:23:27,000

because there have been some stories about that your father had brain cancer,

292

00:23:27,000 --> 00:23:32,000

and there was a logical extension that, well, maybe this was affecting his mind,

293

00:23:32,000 --> 00:23:34,000

well, in fact, he did not have brain cancer, am I correct?

294

00:23:34,000 --> 00:23:37,000

No, he died of cancer in the Lord's Hall.

295

00:23:37,000 --> 00:23:42,000

His faculties were all there, other than that, the problem he was basically.

296

00:23:42,000 --> 00:23:51,000

But I just hope that Jim can give me a sense of where the situation was when his father broached the subject to him.

297

00:23:51,000 --> 00:23:58,000

Was it in a one-on-one situation? What did he say to you? How did he come across with it?

298

00:23:58,000 --> 00:24:00,000

What it is in terms of the body?

299

00:24:00,000 --> 00:24:02,000

How was the subject broached?

300

00:24:02,000 --> 00:24:04,000

Okay, in a one-on-one situation.

301

00:24:04,000 --> 00:24:06,000

That's not an isolated incident.

302

00:24:06,000 --> 00:24:12,000

The involvement in saucers would occupy many evenings on the telephone with questionnaires,

303

00:24:12,000 --> 00:24:15,000

and people would come and etc., etc.

304

00:24:15,000 --> 00:24:20,000

And so the story about the bodies, we had heard that, and we'd asked,

305

00:24:20,000 --> 00:24:23,000

and when he had come back from the conference, he said,

306

00:24:23,000 --> 00:24:26,000

well, I can't hear you saying anything because it's under the official secret act,

307

00:24:26,000 --> 00:24:30,000

and so, okay, there we are, so we left that alone, and life goes on.

308

00:24:30,000 --> 00:24:34,000

He was 19 when he died, so I'd researched for about nine or ten months ago,

309

00:24:34,000 --> 00:24:38,000

and it was in that time that we'd started sitting and chatting.

310

00:24:38,000 --> 00:24:43,000

As much as a 19-year-old can, and he's got four things on the go all at the same time.

311

00:24:43,000 --> 00:24:45,000

And I'd asked him, and I'd asked him,

312

00:24:45,000 --> 00:24:49,000

remember the bodies that you had seen, could you say anything?

313

00:24:49,000 --> 00:24:53,000

And he said, yes, yes, that's true, I did see those.

314

00:24:53,000 --> 00:24:56,000

Well, that's not as my curiosity as I said earlier, so...

315

00:24:56,000 --> 00:24:58,000

Thanks for your cold talk.

316

00:24:58,000 --> 00:25:02,000

So, the hero who has been making reference to his book,

317

00:25:02,000 --> 00:25:06,000

the UFO files, the Canadian connection exposed,

318

00:25:06,000 --> 00:25:10,000

and you can get that information via the strange days,

319

00:25:10,000 --> 00:25:16,000

indeed, webpage at the virtually strange.net website,

320

00:25:16,000 --> 00:25:19,000

and just click your way through UFOs to the program,

321

00:25:19,000 --> 00:25:22,000

and then click on Miro's name and tonight's listing,

322

00:25:22,000 --> 00:25:26,000

or any of the other nights that he's on, and it'll take you to his website.

323

00:25:26,000 --> 00:25:30,000

And you can get those things where we could sit and talk for two or three hours about this.

324

00:25:30,000 --> 00:25:34,000

Is there anything else that we need to nail tonight on Miro?

325

00:25:34,000 --> 00:25:37,000

I think we've pretty much covered the essence.

326

00:25:37,000 --> 00:25:40,000

Jim, I don't know about you, from your perspective, I can think of nothing.

327

00:25:40,000 --> 00:25:42,000

I'm responding to questions.

328

00:25:42,000 --> 00:25:45,000

Understood. Dave, I have one question for you, Jim.

329

00:25:45,000 --> 00:25:47,000

You said you were one of three siblings.

330

00:25:47,000 --> 00:25:48,000

Yes.

331

00:25:48,000 --> 00:25:51,000

Did your father discuss this with your brothers and sisters?

332

00:25:51,000 --> 00:25:54,000

Well, we were all in the family, and yes, he would.

333

00:25:54,000 --> 00:25:58,000

My brother's three years younger, and my sister's nine years younger, so...

334

00:25:58,000 --> 00:26:04,000

A day as intrigued by UFOs as your dad was, and you are?

335

00:26:04,000 --> 00:26:06,000

We're all on the periphery because we're not engineers,

336

00:26:06,000 --> 00:26:08,000

and because of the things to do as well,

337

00:26:08,000 --> 00:26:12,000

and so it occupies a portion of our time, and there's an interest there,

338

00:26:12,000 --> 00:26:14,000

no doubt about it.

339

00:26:14,000 --> 00:26:17,000

We don't know where to proceed or what to do.

340

00:26:17,000 --> 00:26:18,000

Yeah.

341

00:26:18,000 --> 00:26:21,000

Dad's book, The New Science, I have four printings done of that,

342

00:26:21,000 --> 00:26:26,000

and it was sort of my responsibility to deal with that book for those who wrote for it.
